

Inception Radio Network

UFO Headline News Weekend of
Saturday June 10th/Sunday June 11th,
2017

1
00:00:05,900 --> 00:00:03,260
hello it's the weekend of Saturday June

2
00:00:08,059 --> 00:00:05,910
10th and Sunday June 11 you are

3
00:00:11,089 --> 00:00:08,069
listening to inception Radio Network

4
00:00:14,320 --> 00:00:11,099
voice of the fringe majority this is

5
00:00:17,300 --> 00:00:14,330
Carol Carl with UFO headline news and

6
00:00:19,580 --> 00:00:17,310
since it's the weekend it's off the

7
00:00:22,370 --> 00:00:19,590
beaten path where we step outside the

8
00:00:24,679 --> 00:00:22,380
box the lines that define the broadcast

9
00:00:26,660 --> 00:00:24,689
for UFO headline news during the week

10
00:00:30,589 --> 00:00:26,670
just some stuff that doesn't quite fit

11
00:00:31,939 --> 00:00:30,599
into that UFO related well but then on

12
00:00:33,950 --> 00:00:31,949
the other hand what doesn't fit

13
00:00:35,780 --> 00:00:33,960

sometimes we think it really is all

14

00:00:38,389 --> 00:00:35,790

connected here's something that's

15

00:00:39,799 --> 00:00:38,399

connected what's in the night sky we

16

00:00:42,110 --> 00:00:39,809

figure that once you know pretty much

17

00:00:45,049 --> 00:00:42,120

what belongs up there the stuff that

18

00:00:47,830 --> 00:00:45,059

doesn't stand out extra from earth sky

19

00:00:50,750 --> 00:00:47,840

org here's what we can see tonight

20

00:00:53,779 --> 00:00:50,760

tonight it's the end well the end of

21

00:00:55,910 --> 00:00:53,789

Jupiter's retrograde that is the planet

22

00:00:58,459 --> 00:00:55,920

Jupiter pauses in front of the stars

23

00:01:00,979 --> 00:00:58,469

before resuming its usual eastward

24

00:01:04,130 --> 00:01:00,989

course along the zodiac in other words

25

00:01:07,010 --> 00:01:04,140

Jupiter becomes stationary on June 10th

26
00:01:08,780 --> 00:01:07,020
it ends its westward or retrograde

27
00:01:11,600 --> 00:01:08,790
motion in front of the stars of the

28
00:01:14,240 --> 00:01:11,610
constellation Virgo the maiden this

29
00:01:16,730 --> 00:01:14,250
retrograde or westward motion for

30
00:01:20,390 --> 00:01:16,740
Jupiter actually began back on February

31
00:01:22,730 --> 00:01:20,400
6th 2017 but what does it mean you asked

32
00:01:25,640 --> 00:01:22,740
well Bruce McClure who wrote this for

33
00:01:28,190 --> 00:01:25,650
earth sky org gives us an answer it only

34
00:01:29,870 --> 00:01:28,200
means that Earth passed between Jupiter

35
00:01:32,960 --> 00:01:29,880
and the Sun earlier this year that

36
00:01:34,999 --> 00:01:32,970
happened on April 7th that event which

37
00:01:37,130 --> 00:01:35,009
is called an opposition of Jupiter

38
00:01:39,440 --> 00:01:37,140

marked the middle of the best time of

39

00:01:41,510 --> 00:01:39,450

year to see Jupiter since the planet was

40

00:01:44,810 --> 00:01:41,520

closest to us and the brightest thing in

41

00:01:47,450 --> 00:01:44,820

our sky just about that time the end of

42

00:01:50,480 --> 00:01:47,460

retrograde motion means the best months

43

00:01:51,950 --> 00:01:50,490

for seeing Jupiter are over and yet you

44

00:01:54,609 --> 00:01:51,960

might not believe it if you gaze at

45

00:01:57,109 --> 00:01:54,619

Jupiter tonight Jupiter is still

46

00:01:58,700 --> 00:01:57,119

incredibly bright brighter than any star

47

00:02:01,069 --> 00:01:58,710

in the evening sky

48

00:02:02,330 --> 00:02:01,079

if you gentle is iners are residing in

49

00:02:04,370 --> 00:02:02,340

the northern hemisphere

50

00:02:06,260 --> 00:02:04,380

you can look for this brilliant beauty

51

00:02:08,510 --> 00:02:06,270

of a planet high in the south to

52

00:02:10,430 --> 00:02:08,520

Southwest sky just as soon as darkness

53

00:02:12,930 --> 00:02:10,440

falls if you're in the southern

54

00:02:15,570 --> 00:02:12,940

hemisphere or mid latitudes do

55

00:02:18,420 --> 00:02:15,580

Twitter appears high overhead or high in

56

00:02:20,790 --> 00:02:18,430

the northern sky at evening fall far

57

00:02:22,770 --> 00:02:20,800

brighter than any star this blazing

58

00:02:25,080 --> 00:02:22,780

world is even visible from a light

59

00:02:27,180 --> 00:02:25,090

polluted city you might even see the

60

00:02:29,670 --> 00:02:27,190

bright star speaker that will be just to

61

00:02:32,520 --> 00:02:29,680

the east of Jupiter Jupiter is the fifth

62

00:02:34,590 --> 00:02:32,530

planet outward from the Sun while earth

63

00:02:37,500 --> 00:02:34,600

of course is the third planet outward in

64

00:02:40,620 --> 00:02:37,510

the language of astronomers Jupiter is a

65

00:02:43,200 --> 00:02:40,630

superior planet in their outward order

66

00:02:46,590 --> 00:02:43,210

from the Sun the superior or exterior

67

00:02:49,620 --> 00:02:46,600

planets are Mars Jupiter Saturn Uranus

68

00:02:51,930 --> 00:02:49,630

and Neptune like all the planets Jupiter

69

00:02:54,150 --> 00:02:51,940

always goes eastward in its orbit or

70

00:02:55,860 --> 00:02:54,160

counterclockwise if you're viewing from

71

00:02:58,920 --> 00:02:55,870

north of the solar system

72

00:03:01,200 --> 00:02:58,930

however as seen from Earth all superior

73

00:03:03,180 --> 00:03:01,210

planets spend a portion of each year

74

00:03:06,060 --> 00:03:03,190

moving westward in front of a backdrop

75

00:03:07,800 --> 00:03:06,070

of stars there's a very good chart that

76

00:03:10,170 --> 00:03:07,810

explains all of this much better than

77

00:03:13,740 --> 00:03:10,180

the spoken word can do you can find that

78

00:03:15,900 --> 00:03:13,750

chart later at UFO headline news calm it

79

00:03:18,330 --> 00:03:15,910

seems that when the earth in its smaller

80

00:03:21,030 --> 00:03:18,340

and swifter orbit swings by any superior

81

00:03:23,970 --> 00:03:21,040

planet that planet appears to be going

82

00:03:26,310 --> 00:03:23,980

backwards in its orbit relative to the

83

00:03:28,440 --> 00:03:26,320

backdrop of stars of the zodiac and this

84

00:03:30,690 --> 00:03:28,450

goes on for several months it's

85

00:03:33,270 --> 00:03:30,700

comparable to passing a car on the

86

00:03:35,670 --> 00:03:33,280

highway with that car appearing to be

87

00:03:38,040 --> 00:03:35,680

going backward relative to distant

88

00:03:40,500 --> 00:03:38,050

background of course you know that car

89

00:03:42,840 --> 00:03:40,510

isn't really going in Reverse neither is

90

00:03:45,030 --> 00:03:42,850

Jupiter during its time of retrograde

91

00:03:47,100 --> 00:03:45,040

motion starting June 10th

92

00:03:49,800 --> 00:03:47,110

Jupiter is going to be moving eastward

93

00:03:51,690 --> 00:03:49,810

along the ecliptic again going towards

94

00:03:54,300 --> 00:03:51,700

speaka that brightest star in the

95

00:03:57,270 --> 00:03:54,310

constellation Virgo you probably won't

96

00:03:59,160 --> 00:03:57,280

discern much if any movement of jupiter

97

00:04:01,229 --> 00:03:59,170

in front of that stellar background for

98

00:04:03,840 --> 00:04:01,239

the next week or two but keep watching

99

00:04:05,820 --> 00:04:03,850

as jupiter moves toward speaka it's

100

00:04:09,509 --> 00:04:05,830

going to pass three degrees north of the

101
00:04:13,110 --> 00:04:09,519
star September 5th bottom line Jupiter

102
00:04:15,479 --> 00:04:13,120
ends retrograde motion June 10th 2017

103
00:04:18,870 --> 00:04:15,489
this means the best time to see Jupiter

104
00:04:20,729 --> 00:04:18,880
in 2017 is now passed but you won't

105
00:04:21,120 --> 00:04:20,739
believe it if you gaze at the planet

106
00:04:26,130 --> 00:04:21,130
tonight

107
00:04:26,940 --> 00:04:26,140
yes that planet sparkles plenty from BGR

108
00:04:29,490 --> 00:04:26,950
news.com

109
00:04:33,150 --> 00:04:29,500
mic Waner brings us this rather stunning

110
00:04:37,110 --> 00:04:33,160
headline something in space is killing

111
00:04:38,790 --> 00:04:37,120
off entire galaxies when we think about

112
00:04:41,520 --> 00:04:38,800
the survival of the human race

113
00:04:44,430 --> 00:04:41,530

we often focus on making sure our planet

114

00:04:47,010 --> 00:04:44,440

stays alive and habitable but out there

115

00:04:49,770 --> 00:04:47,020

in the depths of space there are entire

116

00:04:52,320 --> 00:04:49,780

galaxies being killed off in a manner

117

00:04:54,720 --> 00:04:52,330

that is utterly perplexing to scientists

118

00:04:57,180 --> 00:04:54,730

so here comes a new paper it's a PDF

119

00:04:59,190 --> 00:04:57,190

from researchers working at the

120

00:05:02,100 --> 00:04:59,200

International Centre for radio astronomy

121

00:05:04,650 --> 00:05:02,110

research they address the odd and

122

00:05:07,350 --> 00:05:04,660

extremely troubling trend and attempt to

123

00:05:09,630 --> 00:05:07,360

propose an answer for what exactly is

124

00:05:12,780 --> 00:05:09,640

leading literally thousands of galaxies

125

00:05:16,410 --> 00:05:12,790

to die premature deaths after studying a

126
00:05:19,050 --> 00:05:16,420
whopping 11,000 galaxies in the general

127
00:05:21,360 --> 00:05:19,060
vicinity of our own scientists now

128
00:05:24,390 --> 00:05:21,370
believe that a process called Ram

129
00:05:26,330 --> 00:05:24,400
pressure stripping is leading the alien

130
00:05:28,770 --> 00:05:26,340
galaxies to be purged of their gas

131
00:05:31,080 --> 00:05:28,780
preventing new stars from forming and

132
00:05:33,300 --> 00:05:31,090
leading them to sputter out far faster

133
00:05:36,090 --> 00:05:33,310
than would be expected without adequate

134
00:05:38,510 --> 00:05:36,100
gas to power new star formation the

135
00:05:41,370 --> 00:05:38,520
galaxies simply get cold and die

136
00:05:43,590 --> 00:05:41,380
according to Tobey Brown the PhD

137
00:05:45,930 --> 00:05:43,600
candidate who headed this study during

138
00:05:48,600 --> 00:05:45,940

their lifetimes galaxies can inhabit

139

00:05:51,270 --> 00:05:48,610

halos of different sizes ranging from

140

00:05:54,020 --> 00:05:51,280

masses typical of our own Milky Way to

141

00:05:57,630 --> 00:05:54,030

halos thousands of times more massive

142

00:06:00,000 --> 00:05:57,640

Toby Brown continues quote as galaxies

143

00:06:03,060 --> 00:06:00,010

fall through these larger halos the

144

00:06:06,060 --> 00:06:03,070

superheated intergalactic plasma between

145

00:06:08,220 --> 00:06:06,070

them removes their gas and a fast-acting

146

00:06:11,880 --> 00:06:08,230

process called Ram pressure stripping

147

00:06:14,940 --> 00:06:11,890

and quotes he also says you can think of

148

00:06:17,340 --> 00:06:14,950

it like quote a giant cosmic broom that

149

00:06:19,920 --> 00:06:17,350

comes through and physically sweeps the

150

00:06:21,870 --> 00:06:19,930

gas from the galaxies if you remove the

151
00:06:24,930 --> 00:06:21,880
fuel for star formation then you

152
00:06:27,540 --> 00:06:24,940
effectively kill that galaxy and turn it

153
00:06:30,270 --> 00:06:27,550
into a dead object end quote

154
00:06:32,460 --> 00:06:30,280
that's a disturbing notion says Mike

155
00:06:35,790 --> 00:06:32,470
Weiner who writes this but he also says

156
00:06:37,710 --> 00:06:35,800
there's good ish news the process can

157
00:06:40,140 --> 00:06:37,720
take tens of millions of years to

158
00:06:40,679 --> 00:06:40,150
actually occur so even if you were

159
00:06:43,139 --> 00:06:40,689
living in

160
00:06:45,629 --> 00:06:43,149
galaxy where Ram pressure stripping was

161
00:06:47,219 --> 00:06:45,639
occurring you'd be long dead before it

162
00:06:48,749 --> 00:06:47,229
could actually affect you in any way

163
00:06:53,309 --> 00:06:48,759

that's reassuring

164

00:06:55,469 --> 00:06:53,319

right reassuring and mysterious speaking

165

00:06:58,429 --> 00:06:55,479

of mysteries let's segue to this

166

00:07:01,439 --> 00:06:58,439

striking headline caught on video

167

00:07:04,229 --> 00:07:01,449

mystery creature spotted prowling the

168

00:07:07,199 --> 00:07:04,239

foothills in the La Crescenta California

169

00:07:10,589 --> 00:07:07,209

area we picked this up from television

170

00:07:13,169 --> 00:07:10,599

station ktla.com this story carries a

171

00:07:16,469 --> 00:07:13,179

byline for Tracy bloom and John Fenoglio

172

00:07:19,229 --> 00:07:16,479

here we go the California Department of

173

00:07:22,109 --> 00:07:19,239

Fish and Wildlife is investigating after

174

00:07:24,359 --> 00:07:22,119

a mysterious ape-like creature was

175

00:07:26,639 --> 00:07:24,369

captured on cell phone video recently in

176

00:07:29,189 --> 00:07:26,649

the foothills near a hiking trail in La

177

00:07:33,119 --> 00:07:29,199

Crescenta not far from the 210 freeway

178

00:07:36,899 --> 00:07:33,129

Jake Gardner and Jake spells at G AR di

179

00:07:38,489 --> 00:07:36,909

n er who works near the area spotted the

180

00:07:40,499 --> 00:07:38,499

animal while taking a stroll in the

181

00:07:43,529 --> 00:07:40,509

woods during his lunch break last week

182

00:07:46,379 --> 00:07:43,539

quote at first I heard a bunch of

183

00:07:48,389 --> 00:07:46,389

strange noises in the trees figured it

184

00:07:49,109 --> 00:07:48,399

was just some type of bird or something

185

00:07:51,419 --> 00:07:49,119

like that

186

00:07:54,079 --> 00:07:51,429

end quote that's what Gardner told KTLA

187

00:07:57,329 --> 00:07:54,089

in an interview on Tuesday a still

188

00:07:59,089 --> 00:07:57,339

uneasiness though came over him he began

189

00:08:02,459 --> 00:07:59,099

to feel like something was out there

190

00:08:05,399 --> 00:08:02,469

watching him so Jake Gardner pulled out

191

00:08:07,259 --> 00:08:05,409

his cell phone and began recording as he

192

00:08:09,719 --> 00:08:07,269

tried to determine whether anything was

193

00:08:12,029 --> 00:08:09,729

out there at first he couldn't see

194

00:08:13,859 --> 00:08:12,039

anything out of the ordinary it wasn't

195

00:08:16,079 --> 00:08:13,869

until he checked the footage for a

196

00:08:18,809 --> 00:08:16,089

second time that he noticed something

197

00:08:21,239 --> 00:08:18,819

unusual however he wasn't quite sure

198

00:08:24,119 --> 00:08:21,249

what it was he'd captured on this video

199

00:08:27,059 --> 00:08:24,129

quote you can definitely see a torso and

200

00:08:29,489 --> 00:08:27,069

four limbs moving around and swinging

201
00:08:31,290 --> 00:08:29,499
around and quotes Gardner said he

202
00:08:35,069 --> 00:08:31,300
continued quote it's a pretty obvious

203
00:08:37,980 --> 00:08:35,079
kind of motion and quotes yes it is and

204
00:08:39,600 --> 00:08:37,990
at the time of this posting officials

205
00:08:41,819 --> 00:08:39,610
from the state's Department of Fish and

206
00:08:44,699 --> 00:08:41,829
Wildlife don't know what exactly the

207
00:08:46,980 --> 00:08:44,709
animal is either but they have an idea

208
00:08:49,259 --> 00:08:46,990
quote we think it's a pretty good

209
00:08:51,600 --> 00:08:49,269
possibility that it is some kind of ape

210
00:08:53,280 --> 00:08:51,610
end quotes that's a quote from Andrew

211
00:08:54,060 --> 00:08:53,290
Hugin he's the spokesman for the

212
00:08:56,999 --> 00:08:54,070
department

213
00:08:59,280 --> 00:08:57,009

if the creature is in fact an ape it

214

00:09:01,230 --> 00:08:59,290

could represent a serious public safety

215

00:09:03,900 --> 00:09:01,240

concern according to officials quote

216

00:09:06,210 --> 00:09:03,910

these animals are incredibly strong and

217

00:09:08,519 --> 00:09:06,220

they can very easily kill or seriously

218

00:09:10,710 --> 00:09:08,529

injure a person because if this does

219

00:09:13,650 --> 00:09:10,720

turn out to be an ape this animal is

220

00:09:16,079 --> 00:09:13,660

scared hungry out of its elements end

221

00:09:18,389 --> 00:09:16,089

quote and that's more quotes from Andrew

222

00:09:21,090 --> 00:09:18,399

Hugin the article goes on to say that

223

00:09:23,309 --> 00:09:21,100

it's possible this was someone's illegal

224

00:09:25,350 --> 00:09:23,319

pet at some point which would explain

225

00:09:25,879 --> 00:09:25,360

how this ape could have ended up in the

226

00:09:28,769 --> 00:09:25,889

area

227

00:09:31,650 --> 00:09:28,779

Andrew Hugin said quote people import

228

00:09:34,499 --> 00:09:31,660

the animals as illegal exotic pets now

229

00:09:36,960 --> 00:09:34,509

that's not great but what happens is the

230

00:09:39,509 --> 00:09:36,970

animals can get out of control and they

231

00:09:43,280 --> 00:09:39,519

either escape or they get too unruly and

232

00:09:45,360 --> 00:09:43,290

the owners just let them go end quote

233

00:09:46,110 --> 00:09:45,370

officials say while there's no reason to

234

00:09:48,509 --> 00:09:46,120

be alarmed

235

00:09:50,850 --> 00:09:48,519

they are still warning people not to go

236

00:09:53,490 --> 00:09:50,860

into the wooded area looking for the

237

00:09:55,800 --> 00:09:53,500

creature yes so there are plenty of

238

00:09:58,410 --> 00:09:55,810

other woodland trails to hike in the

239

00:10:00,569 --> 00:09:58,420

area folks just don't pick that one not

240

00:10:03,840 --> 00:10:00,579

till they find out what this creature is

241

00:10:05,939 --> 00:10:03,850

and if this broadcaster is accurate at

242

00:10:08,160 --> 00:10:05,949

all we're thinking there are lots of

243

00:10:11,850 --> 00:10:08,170

folks out there who are saying oh please

244

00:10:14,340 --> 00:10:11,860

let it be Sasquatch Bigfoot yes fossils

245

00:10:18,329 --> 00:10:14,350

anyone here's an article written by

246

00:10:21,449 --> 00:10:18,339

Hannah Osbourne for Newsweek calm ninety

247

00:10:24,710 --> 00:10:21,459

nine million year old baby bird trapped

248

00:10:27,600 --> 00:10:24,720

in amber discovered in Myanmar

249

00:10:31,800 --> 00:10:27,610

researchers in Myanmar have discovered a

250

00:10:34,710 --> 00:10:31,810

99 million year old baby bird encased in

251
00:10:36,990 --> 00:10:34,720
amber the ancient hatchling died when it

252
00:10:39,720 --> 00:10:37,000
was just a few days or weeks old

253
00:10:42,929 --> 00:10:39,730
after a blob of sticky tree resin fell

254
00:10:46,650 --> 00:10:42,939
on it leaving half of its body frozen in

255
00:10:49,920 --> 00:10:46,660
time enter Jing Lida from the China

256
00:10:51,870 --> 00:10:49,930
University of geosciences Lida led an

257
00:10:54,870 --> 00:10:51,880
international team of researchers in

258
00:10:56,670 --> 00:10:54,880
analyzing this three inch specimen their

259
00:11:01,139 --> 00:10:56,680
study which was published in the journal

260
00:11:03,389 --> 00:11:01,149
bond wanna research that spell gon D waa

261
00:11:05,910 --> 00:11:03,399
and a will help scientists better

262
00:11:06,720 --> 00:11:05,920
understand the tooth birds that lived

263
00:11:08,940 --> 00:11:06,730

alongside

264

00:11:12,060 --> 00:11:08,950

dinosaurs and how they differ from birds

265

00:11:15,480 --> 00:11:12,070

living today the amber in cases the bird

266

00:11:17,910 --> 00:11:15,490

skull neck a partial wing a hind limb

267

00:11:19,410 --> 00:11:17,920

and one foot the hatchling would have

268

00:11:21,200 --> 00:11:19,420

belonged to a group of birds with the

269

00:11:22,890 --> 00:11:21,210

hard-to-pronounce name called

270

00:11:28,580 --> 00:11:22,900

enantiornithine

271

00:11:32,460 --> 00:11:28,590

oh let's spell that e n a n T I o r n A I

272

00:11:36,300 --> 00:11:32,470

thi n es those guys were around during

273

00:11:38,970 --> 00:11:36,310

the Cretaceous period 145 to 65 million

274

00:11:40,740 --> 00:11:38,980

years ago they died out during the mass

275

00:11:43,230 --> 00:11:40,750

extinction event that killed off the

276

00:11:46,230 --> 00:11:43,240

dinosaurs the National Geographic

277

00:11:48,390 --> 00:11:46,240

society's expeditions Council partially

278

00:11:51,690 --> 00:11:48,400

funded this research the fossil was

279

00:11:54,960 --> 00:11:51,700

mined from the Quang Valley spelled hu

280

00:11:57,990 --> 00:11:54,970

ka w ng that's located in northern

281

00:12:00,090 --> 00:11:58,000

Myanmar scientists discovered the bird

282

00:12:02,130 --> 00:12:00,100

was unusual in several ways the

283

00:12:04,830 --> 00:12:02,140

structure of its wings was very similar

284

00:12:06,480 --> 00:12:04,840

to those seen in modern flying birds but

285

00:12:09,030 --> 00:12:06,490

it retained some features that are seen

286

00:12:10,920 --> 00:12:09,040

in more primitive theropods that group

287

00:12:14,520 --> 00:12:10,930

of dinosaurs from which modern birds

288

00:12:16,830 --> 00:12:14,530

eventually emerged Chen Guang curator of

289

00:12:19,560 --> 00:12:16,840

a museum in Yunnan an owner of the

290

00:12:21,720 --> 00:12:19,570

specimen told Jing hua the newspaper

291

00:12:24,540 --> 00:12:21,730

quote many people thought this was a

292

00:12:27,120 --> 00:12:24,550

lizard but the scales the thread like

293

00:12:29,160 --> 00:12:27,130

feathers and sharp claws on the feet

294

00:12:30,870 --> 00:12:29,170

were so noticeable that I thought they

295

00:12:33,690 --> 00:12:30,880

must belong to a bird

296

00:12:35,400 --> 00:12:33,700

end quote the team says its analysis

297

00:12:37,770 --> 00:12:35,410

indicates this bird would have been able

298

00:12:40,350 --> 00:12:37,780

to fly from birth meaning it was less

299

00:12:43,020 --> 00:12:40,360

dependent on its parents for care this

300

00:12:45,030 --> 00:12:43,030

is in contrast to modern birds today our

301
00:12:47,420 --> 00:12:45,040
most hatchlings remain in the nest

302
00:12:50,550 --> 00:12:47,430
before developing that ability to fly

303
00:12:52,770 --> 00:12:50,560
same Kauai from the University of Taipei

304
00:12:55,740 --> 00:12:52,780
said the bird appears to have been out

305
00:12:58,410 --> 00:12:55,750
hunting at the time of death vote there

306
00:13:00,660 --> 00:12:58,420
were no obvious signs of struggle the

307
00:13:03,780 --> 00:13:00,670
overall posture of the bird resembled

308
00:13:06,600 --> 00:13:03,790
hunting with its lifted body open claws

309
00:13:09,270 --> 00:13:06,610
and beak and spread wings it was

310
00:13:11,940 --> 00:13:09,280
possibly engulfed by falling resin at

311
00:13:14,250 --> 00:13:11,950
that exact moment it was hunting and

312
00:13:16,440 --> 00:13:14,260
quotes researchers believe the specimen

313
00:13:18,660 --> 00:13:16,450

provides the most complete view of a

314

00:13:20,519 --> 00:13:18,670

hatchlings plumage from the Cretaceous

315

00:13:21,929 --> 00:13:20,529

period discovered to date

316

00:13:24,090 --> 00:13:21,939

and that it provides an excellent

317

00:13:26,429 --> 00:13:24,100

reference point for comparisons with the

318

00:13:29,759 --> 00:13:26,439

body forms of other fossilized birds and

319

00:13:32,340 --> 00:13:29,769

feathers also found in amber they wrote

320

00:13:35,249 --> 00:13:32,350

in the study quote overall this new

321

00:13:37,319 --> 00:13:35,259

specimen brings a new level of detail to

322

00:13:39,929 --> 00:13:37,329

our understanding of the anatomy of the

323

00:13:43,199 --> 00:13:39,939

juvenile stages of the most species-rich

324

00:13:46,670 --> 00:13:43,209

clad of pre-modern Birds and contributes

325

00:13:49,619 --> 00:13:46,680

to mounting data that enantiornithine

326

00:13:53,040 --> 00:13:49,629

developed drastically differently from

327

00:13:54,629 --> 00:13:53,050

that of modern birds and quotes now

328

00:13:57,389 --> 00:13:54,639

let's see gentle listeners if it's

329

00:14:00,629 --> 00:13:57,399

possible to make a segue from an ancient

330

00:14:04,230 --> 00:14:00,639

baby bird trapped in amber to Egyptian

331

00:14:07,379 --> 00:14:04,240

mummy DNA well we think we can anyway

332

00:14:09,780 --> 00:14:07,389

here it goes headline scientists thought

333

00:14:13,710 --> 00:14:09,790

ancient Egyptian mummies didn't have any

334

00:14:17,670 --> 00:14:13,720

DNA left they were wrong Lizzie Wade

335

00:14:19,799 --> 00:14:17,680

wrote this for science Magog ancient

336

00:14:22,679 --> 00:14:19,809

Egyptian mummies preserve many details

337

00:14:26,150 --> 00:14:22,689

of the deceased facial features signs of

338

00:14:30,150 --> 00:14:26,160

illness even tattoos but not it seemed

339

00:14:32,069 --> 00:14:30,160

DNA after trying repeatedly to extract

340

00:14:34,889 --> 00:14:32,079

it many scientists were convinced that

341

00:14:36,470 --> 00:14:34,899

the hot desert climate and perhaps the

342

00:14:39,629 --> 00:14:36,480

chemicals used in mummification

343

00:14:43,559 --> 00:14:39,639

destroyed any genetic material long ago

344

00:14:45,990 --> 00:14:43,569

now a team of ancient DNA specialists

345

00:14:49,170 --> 00:14:46,000

has successfully sequenced genomes from

346

00:14:51,090 --> 00:14:49,180

90 ancient Egyptian mummies the

347

00:14:53,490 --> 00:14:51,100

game-changing results give scientists

348

00:14:56,670 --> 00:14:53,500

their first insight into the genetics of

349

00:14:58,679 --> 00:14:56,680

ordinary ancient Egyptians which change

350

00:15:01,290 --> 00:14:58,689

surprisingly little through centuries of

351

00:15:03,179 --> 00:15:01,300

conquests this sequencing success

352

00:15:05,999 --> 00:15:03,189

reported this week in Nature

353

00:15:08,790 --> 00:15:06,009

communications quote finally proves to

354

00:15:11,579 --> 00:15:08,800

everyone that there's DNA preserved in

355

00:15:12,540 --> 00:15:11,589

ancient Egyptian mummies and quotes that

356

00:15:14,910 --> 00:15:12,550

Albert Zink

357

00:15:17,669 --> 00:15:14,920

is a biological anthropologist at the

358

00:15:20,730 --> 00:15:17,679

Institute for mummy studies in bolzano

359

00:15:23,939 --> 00:15:20,740

italy he participated in a 2010 study

360

00:15:27,299 --> 00:15:23,949

that identified DNA sequences from 16

361

00:15:29,579 --> 00:15:27,309

ancient Egyptian royal mummies including

362

00:15:32,669 --> 00:15:29,589

Tutankhamun but that study used

363

00:15:34,199 --> 00:15:32,679

polymerase chain reaction a method that

364

00:15:36,569 --> 00:15:34,209

efficiently finds and

365

00:15:38,970 --> 00:15:36,579

structs targeted DNA fragments but

366

00:15:41,489 --> 00:15:38,980

cannot always reliably distinguish

367

00:15:43,829 --> 00:15:41,499

between ancient DNA and modern

368

00:15:46,410 --> 00:15:43,839

contamination the new study which was

369

00:15:48,569 --> 00:15:46,420

led by Johannes Kraus a geneticist at

370

00:15:51,090 --> 00:15:48,579

the Max Planck Institute for science in

371

00:15:53,759 --> 00:15:51,100

human history in Jena Germany used

372

00:15:56,609 --> 00:15:53,769

next-generation sequencing methods to

373

00:15:59,040 --> 00:15:56,619

read stretches of any DNA present in a

374

00:16:02,340 --> 00:15:59,050

sample and fish out those that resembled

375

00:16:04,619 --> 00:16:02,350

human DNA the complete reads allowed the

376

00:16:07,079 --> 00:16:04,629

team to spot telltale damage patterns

377

00:16:09,509 --> 00:16:07,089

associated only with ancient DNA

378

00:16:11,460 --> 00:16:09,519

according to Hannes Schroeder an ancient

379

00:16:14,069 --> 00:16:11,470

DNA researcher from the University of

380

00:16:17,040 --> 00:16:14,079

Copenhagen quote that makes the new

381

00:16:19,109 --> 00:16:17,050

analysis much more reliable it succeeds

382

00:16:21,809 --> 00:16:19,119

where previous studies on Egyptian

383

00:16:24,689 --> 00:16:21,819

mummies have failed or fallen short and

384

00:16:27,210 --> 00:16:24,699

quotes Johannes Kraus who has studied

385

00:16:29,639 --> 00:16:27,220

the DNA of Neanderthals Denisovans and

386

00:16:32,340 --> 00:16:29,649

prehistoric migrants to Europe recently

387

00:16:33,989 --> 00:16:32,350

gravitated toward ancient Egyptian

388

00:16:36,989 --> 00:16:33,999

mummies because of the Empire's

389

00:16:38,879 --> 00:16:36,999

tumultuous political history at various

390

00:16:41,340 --> 00:16:38,889

points it was conquered by Assyrians

391

00:16:44,309 --> 00:16:41,350

from the Near East Nubians from farther

392

00:16:47,970 --> 00:16:44,319

south along the Nile Persians Greeks and

393

00:16:50,400 --> 00:16:47,980

Romans among others but our question was

394

00:16:53,850 --> 00:16:50,410

did those foreign conquests have a

395

00:16:57,179 --> 00:16:53,860

genetic impact and quotes Kraus turned

396

00:16:59,669 --> 00:16:57,189

to a collection of 151 mummy heads from

397

00:17:02,309 --> 00:16:59,679

the ancient settlement of aboo-seer el

398

00:17:04,860 --> 00:17:02,319

Malik about 100 miles south of Cairo

399

00:17:07,079 --> 00:17:04,870

along the Nile the settlement was

400

00:17:09,750 --> 00:17:07,089

devoted to Osiris the god of the dead

401
00:17:12,630 --> 00:17:09,760
making it a popular burial spot for many

402
00:17:15,090 --> 00:17:12,640
centuries these heads were excavated and

403
00:17:17,429 --> 00:17:15,100
removed from their bodies in the early

404
00:17:19,679 --> 00:17:17,439
20th century they now reside in two

405
00:17:21,929 --> 00:17:19,689
collections in Germany one at the

406
00:17:24,740 --> 00:17:21,939
University of Tübingen and Berlin's

407
00:17:27,419 --> 00:17:24,750
Museum of prehistory and early history

408
00:17:30,120 --> 00:17:27,429
radiocarbon dating shows the mummies

409
00:17:32,370 --> 00:17:30,130
span 1,300 years of ancient Egyptian

410
00:17:34,860 --> 00:17:32,380
history during many of the foreign

411
00:17:36,960 --> 00:17:34,870
conquests and ultimately Egypt's

412
00:17:39,779 --> 00:17:36,970
incorporation into first the Greek and

413
00:17:42,180 --> 00:17:39,789

then the Roman empires whereas the

414

00:17:45,149 --> 00:17:42,190

mummies soft tissue contained almost no

415

00:17:48,090 --> 00:17:45,159

DNA the bones and teeth were chock-full

416

00:17:51,480 --> 00:17:48,100

of genetic material 90 of the

417

00:17:53,700 --> 00:17:51,490

the DNA once housed in mitochondria the

418

00:17:56,370 --> 00:17:53,710

power plants of cells mitochondria

419

00:17:58,380 --> 00:17:56,380

carries only a few genes but they're so

420

00:18:01,110 --> 00:17:58,390

plentiful that it's often easier to find

421

00:18:04,470 --> 00:18:01,120

their DNA than the single full human

422

00:18:06,630 --> 00:18:04,480

genome of a cell's nucleus still because

423

00:18:09,450 --> 00:18:06,640

mitochondrial DNA is passed down from

424

00:18:12,570 --> 00:18:09,460

mother to child it leaves out the story

425

00:18:15,360 --> 00:18:12,580

of the father's DNA the nuclear genome

426

00:18:16,970 --> 00:18:15,370

which contains DNA from both parents as

427

00:18:19,620 --> 00:18:16,980

far more informative

428

00:18:21,630 --> 00:18:19,630

unfortunately says Krause only a few of

429

00:18:24,450 --> 00:18:21,640

the mummies nuclear genomes were well

430

00:18:27,240 --> 00:18:24,460

preserved and even fewer passed the

431

00:18:29,130 --> 00:18:27,250

strict contamination tests his team

432

00:18:31,200 --> 00:18:29,140

ended up with nuclear genome samples

433

00:18:34,140 --> 00:18:31,210

from only three mummies each from a

434

00:18:36,450 --> 00:18:34,150

different time period and then Krauss's

435

00:18:39,539 --> 00:18:36,460

team compared the mummies mitochondrial

436

00:18:41,750 --> 00:18:39,549

and nuclear DNA to ancient and modern

437

00:18:44,970 --> 00:18:41,760

populations in the Near East and Africa

438

00:18:47,370 --> 00:18:44,980

they discovered that ancient Egyptians

439

00:18:49,770 --> 00:18:47,380

closely resembled ancient and modern

440

00:18:51,360 --> 00:18:49,780

Near Eastern populations especially

441

00:18:54,060 --> 00:18:51,370

those in the Levant

442

00:18:56,610 --> 00:18:54,070

what's more the genetics of the mummies

443

00:18:58,980 --> 00:18:56,620

remained remarkably consistent even as

444

00:19:02,399 --> 00:18:58,990

different powers conquered the Empire

445

00:19:05,070 --> 00:19:02,409

so says Yehia GAD a molecular geneticist

446

00:19:07,500 --> 00:19:05,080

at the National Research Center in Cairo

447

00:19:11,580 --> 00:19:07,510

and a founder of the Egyptian museum's

448

00:19:14,039 --> 00:19:11,590

ancient DNA lab quote it's possible that

449

00:19:16,080 --> 00:19:14,049

the mitochondrial genome simply don't

450

00:19:19,890 --> 00:19:16,090

record the genetic contributions of

451
00:19:22,380 --> 00:19:19,900
foreign fathers and quotes the three

452
00:19:25,020 --> 00:19:22,390
mummies with nuclear genome also show

453
00:19:27,899 --> 00:19:25,030
striking genetic continuity it's pointed

454
00:19:30,510 --> 00:19:27,909
out later however something did alter

455
00:19:33,270 --> 00:19:30,520
the genomes of Egyptians although the

456
00:19:36,360 --> 00:19:33,280
mummies contain almost no DNA from

457
00:19:39,120 --> 00:19:36,370
sub-saharan Africa some 15 to 20 percent

458
00:19:42,960 --> 00:19:39,130
of modern Egyptians mitochondrial DNA

459
00:19:44,880 --> 00:19:42,970
does reflect sub-saharan ancestry says

460
00:19:47,549 --> 00:19:44,890
Johannes Krauss quote it's really

461
00:19:51,000 --> 00:19:47,559
unexpected when we see this very late

462
00:19:53,610 --> 00:19:51,010
shift and quote cross suspects increased

463
00:19:56,100 --> 00:19:53,620

trade along the Nile including slave

464

00:19:57,810 --> 00:19:56,110

trade or the spread of Islam in the

465

00:20:01,149 --> 00:19:57,820

Middle Ages might have intensified

466

00:20:04,509 --> 00:20:01,159

contact between northern and sub-saharan

467

00:20:06,609 --> 00:20:04,519

Rikka a geneticist yosef Lazaridis of

468

00:20:09,279 --> 00:20:06,619

Harvard Medical School in Boston who

469

00:20:12,399 --> 00:20:09,289

studies how and when ancient populations

470

00:20:15,789 --> 00:20:12,409

mixed calls the new results quote a big

471

00:20:19,180 --> 00:20:15,799

accomplishment and quotes but he wonders

472

00:20:21,190 --> 00:20:19,190

how representative about Tsar L Malik is

473

00:20:24,339 --> 00:20:21,200

of ancient Egypt as a whole

474

00:20:26,950 --> 00:20:24,349

vote Egypt is a big place and quotes he

475

00:20:29,109 --> 00:20:26,960

says other regions may have experienced

476
00:20:31,869 --> 00:20:29,119
these conquests in different ways some

477
00:20:33,759 --> 00:20:31,879
perhaps with more genetic mixing but

478
00:20:36,820 --> 00:20:33,769
these researchers now are hoping for

479
00:20:38,739 --> 00:20:36,830
more revelations to come quote now that

480
00:20:41,409 --> 00:20:38,749
it's been proven that it's possible to

481
00:20:44,259 --> 00:20:41,419
sample from mummies well there are

482
00:20:47,070 --> 00:20:44,269
literally thousands of mummies and

483
00:20:50,499 --> 00:20:47,080
quotes let's look at some of those

484
00:20:52,749 --> 00:20:50,509
thousands of UFO reports shall we well

485
00:20:56,289 --> 00:20:52,759
we'll start with one it's out of Tucson

486
00:20:59,399 --> 00:20:56,299
Arizona UFO stalker calm brings us this

487
00:21:02,830 --> 00:20:59,409
it's got a move on case number eight for

488
00:21:05,109 --> 00:21:02,840

279 for purposes of identification and

489

00:21:07,839 --> 00:21:05,119

tracking this event took place on the

490

00:21:11,909 --> 00:21:07,849

9th of June 2017 it got a same-day

491

00:21:14,739 --> 00:21:11,919

report in summary our witness offers

492

00:21:17,979 --> 00:21:14,749

intermittently white-green point of

493

00:21:21,159 --> 00:21:17,989

light observed hovering darting in a

494

00:21:24,430 --> 00:21:21,169

relatively confined part of sky above

495

00:21:27,029 --> 00:21:24,440

treeline sighting specifics go something

496

00:21:30,700 --> 00:21:27,039

like this the viewing distance unknown

497

00:21:33,639 --> 00:21:30,710

altitude treetop sighting duration seven

498

00:21:36,159 --> 00:21:33,649

minutes but the features on the object

499

00:21:38,080 --> 00:21:36,169

are simply described as unknown the

500

00:21:41,700 --> 00:21:38,090

flight path of this object was hovering

501
00:21:44,169 --> 00:21:41,710
then path and its shape was also unknown

502
00:21:46,690 --> 00:21:44,179
the witness has wonderfully put together

503
00:21:49,210 --> 00:21:46,700
this account in points one through six

504
00:21:50,440 --> 00:21:49,220
so that's the best way for us to read

505
00:21:53,769 --> 00:21:50,450
them to you here we go

506
00:21:55,710 --> 00:21:53,779
point one I was on my apartments balcony

507
00:21:59,349 --> 00:21:55,720
the coordinates available on request

508
00:22:02,440 --> 00:21:59,359
looking south west towards Sentinel peak

509
00:22:05,200 --> 00:22:02,450
it was visible in the distance the point

510
00:22:07,359 --> 00:22:05,210
two movements of this point of light

511
00:22:10,869 --> 00:22:07,369
caught my attention out of the corner of

512
00:22:13,570 --> 00:22:10,879
my eye point three at first I assumed

513
00:22:14,060 --> 00:22:13,580

this was a meteor but it didn't burn out

514

00:22:16,070 --> 00:22:14,070

or

515

00:22:18,800 --> 00:22:16,080

at the ground rather it stopped

516

00:22:21,290 --> 00:22:18,810

completely it hovered there for a few

517

00:22:25,100 --> 00:22:21,300

seconds and then it darted up and to the

518

00:22:28,100 --> 00:22:25,110

right point for this point of light was

519

00:22:30,260 --> 00:22:28,110

alternating between white and green very

520

00:22:33,140 --> 00:22:30,270

bright and it shone like a typical

521

00:22:36,170 --> 00:22:33,150

aircraft anti-collision lights while it

522

00:22:38,450 --> 00:22:36,180

was white now the green variation may

523

00:22:41,390 --> 00:22:38,460

suggest it's marking that starboard side

524

00:22:44,210 --> 00:22:41,400

of the aircraft however I never saw it

525

00:22:46,730 --> 00:22:44,220

turn red on the port side based on its

526
00:22:49,460 --> 00:22:46,740
flight manoeuvres I assumed I would see

527
00:22:52,250 --> 00:22:49,470
both sides of the craft its actions

528
00:22:55,910 --> 00:22:52,260
included hovering darting in a straight

529
00:22:58,880 --> 00:22:55,920
line and random abrupt yet smooth in

530
00:23:01,370 --> 00:22:58,890
other words a rigid 90 degree turn for

531
00:23:04,970 --> 00:23:01,380
example I observed it darting along the

532
00:23:08,450 --> 00:23:04,980
x and y axes I was not able to determine

533
00:23:10,460 --> 00:23:08,460
the z axis movement if any this is too

534
00:23:13,010 --> 00:23:10,470
technical for this broadcaster we need a

535
00:23:15,320 --> 00:23:13,020
reference book beside us but our witness

536
00:23:17,360 --> 00:23:15,330
continues this thing's flight activity

537
00:23:20,540 --> 00:23:17,370
was confined to below the tree line and

538
00:23:23,600 --> 00:23:20,550

not visible to up above 20 degrees above

539

00:23:26,900 --> 00:23:23,610

the horizon it was confined to the same

540

00:23:28,520 --> 00:23:26,910

roughly 10 degree area of the sky all of

541

00:23:31,640 --> 00:23:28,530

its flight activity occurred in that

542

00:23:33,500 --> 00:23:31,650

same small part of the sky with Sentinel

543

00:23:35,720 --> 00:23:33,510

peak showing directly behind it in the

544

00:23:38,180 --> 00:23:35,730

distance from my vantage point my

545

00:23:43,340 --> 00:23:38,190

observation lasted from exactly 140 to

546

00:23:46,100 --> 00:23:43,350

147 a.m. Pacific Daylight Time 0.5 what

547

00:23:48,620 --> 00:23:46,110

I felt was mainly curiosity it didn't

548

00:23:51,320 --> 00:23:48,630

seem real it was different than how I

549

00:23:53,990 --> 00:23:51,330

imagined a drone is able to fly it

550

00:23:56,510 --> 00:23:54,000

seemed to be too fast with odd movements

551
00:23:59,720 --> 00:23:56,520
it wasn't like a helicopter and it made

552
00:24:02,240 --> 00:23:59,730
no sound this thing turned green then it

553
00:24:04,640 --> 00:24:02,250
turned back to white I could not get a

554
00:24:08,120 --> 00:24:04,650
good read on the distance my best guess

555
00:24:10,910 --> 00:24:08,130
is point 25 miles I tried to record it

556
00:24:12,320 --> 00:24:10,920
on a very old iPhone but it didn't pick

557
00:24:15,650 --> 00:24:12,330
up this dot of light

558
00:24:17,960 --> 00:24:15,660
point 6 it dropped down the final time

559
00:24:21,290 --> 00:24:17,970
below the tree line could this be

560
00:24:23,390 --> 00:24:21,300
someone's toy I watched that small part

561
00:24:26,780 --> 00:24:23,400
of sky for another 40 or so minutes and

562
00:24:27,690 --> 00:24:26,790
it never reappeared indeed gentle

563
00:24:30,840 --> 00:24:27,700

listeners

564

00:24:33,720 --> 00:24:30,850

bad or indifferent drones are among us

565

00:24:35,870 --> 00:24:33,730

certainly creating a new wrinkle in the

566

00:24:39,030 --> 00:24:35,880

what is that we're seeing in the sky

567

00:24:42,230 --> 00:24:39,040

category here's a sighting from Denali

568

00:24:44,520 --> 00:24:42,240

National Park and Preserve in Alaska

569

00:24:47,370 --> 00:24:44,530

MUFON Case number eight four two eight

570

00:24:50,370 --> 00:24:47,380

zero this took place actually last year

571

00:24:53,280 --> 00:24:50,380

2016 on the 24th of May

572

00:24:56,670 --> 00:24:53,290

could this be yet another anniversary

573

00:24:58,410 --> 00:24:56,680

ish sighting trigger something that says

574

00:25:01,830 --> 00:24:58,420

inside the witness got to get this

575

00:25:03,510 --> 00:25:01,840

reported well here's the summary one is

576
00:25:07,290 --> 00:25:03,520
the lights that appear above the clouds

577
00:25:09,480 --> 00:25:07,300
second is I don't know what it is there

578
00:25:11,670 --> 00:25:09,490
are photos and that's what the witness

579
00:25:14,400 --> 00:25:11,680
was referring to the viewing distance

580
00:25:17,310 --> 00:25:14,410
under sighting specifics and altitude

581
00:25:19,290 --> 00:25:17,320
object features flight path shape all of

582
00:25:22,470 --> 00:25:19,300
those things simply are labeled unknown

583
00:25:24,390 --> 00:25:22,480
here's the account my husband and I were

584
00:25:26,790 --> 00:25:24,400
driving along the roads toward Denali

585
00:25:29,640 --> 00:25:26,800
National Park I took a picture of the

586
00:25:31,920 --> 00:25:29,650
clouds and mountains later while I was

587
00:25:34,770 --> 00:25:31,930
looking at these pictures I saw the two

588
00:25:36,930 --> 00:25:34,780

bright lights above the clouds there

589

00:25:39,930 --> 00:25:36,940

were no planes in the area and the light

590

00:25:41,280 --> 00:25:39,940

wasn't reflecting off of anything it

591

00:25:43,770 --> 00:25:41,290

seemed as though these looked like

592

00:25:47,070 --> 00:25:43,780

headlights the lights disappeared

593

00:25:48,900 --> 00:25:47,080

quickly in the second picture and I sent

594

00:25:51,180 --> 00:25:48,910

an email to the National Park and never

595

00:25:51,810 --> 00:25:51,190

got a response but you can see it for

596

00:25:54,210 --> 00:25:51,820

yourself

597

00:25:58,320 --> 00:25:54,220

determine what you think this could be

598

00:26:01,410 --> 00:25:58,330

it looks like some sort of craft with

599

00:26:04,110 --> 00:26:01,420

legs I thought maybe this could be some

600

00:26:06,600 --> 00:26:04,120

sort of Observatory this broadcaster

601
00:26:08,820 --> 00:26:06,610
tosses in yes there's a round white dome

602
00:26:12,180 --> 00:26:08,830
shape to this thing in one of the photos

603
00:26:14,490 --> 00:26:12,190
back to the story I wrote to the park I

604
00:26:17,220 --> 00:26:14,500
sent a copy of the attached picture but

605
00:26:18,750 --> 00:26:17,230
they did not respond to my inquiry at

606
00:26:21,330 --> 00:26:18,760
first I thought maybe this could be a

607
00:26:23,250 --> 00:26:21,340
campground but then I don't believe

608
00:26:26,010 --> 00:26:23,260
people camp but this height in the

609
00:26:28,200 --> 00:26:26,020
mountains judge for yourself in the

610
00:26:30,660 --> 00:26:28,210
third shot we were flying over the

611
00:26:33,810 --> 00:26:30,670
mountains we noticed extremely bright

612
00:26:35,460 --> 00:26:33,820
shining objects on the ground again we

613
00:26:36,990 --> 00:26:35,470

didn't know if there was something on

614

00:26:39,600 --> 00:26:37,000

the mountain that could reflect that

615

00:26:41,070 --> 00:26:39,610

light our plane wasn't in the path of

616

00:26:42,960 --> 00:26:41,080

these reflective objects

617

00:26:44,850 --> 00:26:42,970

and the witness suggests then if we blow

618

00:26:47,999 --> 00:26:44,860

up the pictures we can see these

619

00:26:50,729 --> 00:26:48,009

mentioned items yes see them you can

620

00:26:54,840 --> 00:26:50,739

they are mysterious check them out via

621

00:26:57,180 --> 00:26:54,850

link at UFO headline news calm what

622

00:26:59,519 --> 00:26:57,190

we've checked out all the time zones all

623

00:27:02,970 --> 00:26:59,529

these clocks on the wall indicate we've

624

00:27:04,950 --> 00:27:02,980

got to fly because that's a wrap thank

625

00:27:07,769 --> 00:27:04,960

you for listening to inception Radio

626

00:27:09,419 --> 00:27:07,779

Network and off the beaten path our

627

00:27:11,759 --> 00:27:09,429

regular weekend feature here at

628

00:27:13,950 --> 00:27:11,769

inception radio network take care of
