

Inception Radio Network

UFO Headline News Monday June 12th,
2017

1
00:00:07,820 --> 00:00:05,570
hello it's Monday June 12th 2017 you are

2
00:00:10,669 --> 00:00:07,830
listening to inception Radio Network

3
00:00:15,289 --> 00:00:10,679
voice of the fringe majority this is

4
00:00:17,420 --> 00:00:15,299
Carol Carl with UFO headline news how

5
00:00:20,240 --> 00:00:17,430
about a little Big Dipper viewing in the

6
00:00:23,929 --> 00:00:20,250
sky tonight well you can do that Deborah

7
00:00:25,460 --> 00:00:23,939
bird from Earth sky org offers tonight

8
00:00:27,769 --> 00:00:25,470
assuming you're in the northern

9
00:00:30,740 --> 00:00:27,779
hemisphere you can find the legendary

10
00:00:32,540 --> 00:00:30,750
Big Dipper asterism it says here that

11
00:00:35,420 --> 00:00:32,550
you gentle listeners across the pond

12
00:00:37,520 --> 00:00:35,430
call it the plow it's a familiar star

13
00:00:39,369 --> 00:00:37,530

pattern high in the North during the

14

00:00:41,900 --> 00:00:39,379

evening hours in the month of June

15

00:00:43,490 --> 00:00:41,910

although the Big Dipper can also be seen

16

00:00:46,010 --> 00:00:43,500

from the southern tropics at nightfall

17

00:00:48,170 --> 00:00:46,020

it's going to reside much lower in the

18

00:00:51,260 --> 00:00:48,180

northern sky closer to the horizon

19

00:00:53,330 --> 00:00:51,270

Polaris that North Star disappears

20

00:00:54,229 --> 00:00:53,340

beneath the horizon once you get south

21

00:00:56,240 --> 00:00:54,239

of the earth's equator

22

00:00:59,090 --> 00:00:56,250

you can following the Big Dipper pretty

23

00:01:00,770 --> 00:00:59,100

easily because unlike the shapes one

24

00:01:03,049 --> 00:01:00,780

season a lot of asterisms and

25

00:01:06,200 --> 00:01:03,059

constellations in this case the Big

26
00:01:08,810 --> 00:01:06,210
Dipper really resembles a Dipper less

27
00:01:10,910 --> 00:01:08,820
familiar tougher to find is that Little

28
00:01:14,000 --> 00:01:10,920
Dipper and here's how you can find that

29
00:01:15,859 --> 00:01:14,010
from the northerly latitudes locate the

30
00:01:18,230 --> 00:01:15,869
Big Dipper in the northern sky during

31
00:01:21,859 --> 00:01:18,240
the evening hours notice the Big Dipper

32
00:01:24,020 --> 00:01:21,869
has two parts a bowl and a handle see

33
00:01:26,179 --> 00:01:24,030
the two outer stars in that bowl those

34
00:01:27,469 --> 00:01:26,189
stars are called the pointers because

35
00:01:29,929 --> 00:01:27,479
they point to the North Star

36
00:01:32,179 --> 00:01:29,939
also known as Polaris once you found

37
00:01:35,330 --> 00:01:32,189
Polaris you can find the Little Dipper

38
00:01:38,210 --> 00:01:35,340

Polaris marks the end of the handle of

39

00:01:40,490 --> 00:01:38,220

that Little Dipper and as this article

40

00:01:42,499 --> 00:01:40,500

notes you're going to need a dark sky to

41

00:01:44,480 --> 00:01:42,509

see that Little Dipper in full because

42

00:01:46,819 --> 00:01:44,490

it's so much fainter than its larger

43

00:01:49,370 --> 00:01:46,829

brighter counterpart and so the bottom

44

00:01:52,429 --> 00:01:49,380

line here look for the Big Dipper high

45

00:01:55,340 --> 00:01:52,439

in the north at nightfall something else

46

00:01:58,249 --> 00:01:55,350

very high in the sky it's a moon for the

47

00:02:00,620 --> 00:01:58,259

third-largest dwarf planet this is also

48

00:02:02,690 --> 00:02:00,630

from Earth's sky calm Deborah bird

49

00:02:06,289 --> 00:02:02,700

writes this for their science division

50

00:02:10,880 --> 00:02:06,299

so many moons with the discovery of a

51
00:02:13,130 --> 00:02:10,890
moon for 2007 or 10 it seems evident that

52
00:02:14,000 --> 00:02:13,140
most known dwarf planets in the Kuiper

53
00:02:16,550 --> 00:02:14,010
belt

54
00:02:20,149 --> 00:02:16,560
larger than 600 miles across are known

55
00:02:22,490 --> 00:02:20,159
now to have companions astronomers have

56
00:02:26,300 --> 00:02:22,500
found a moon for the Kuiper belt object

57
00:02:28,759 --> 00:02:26,310
known as 2007 Oh our 10 this object is

58
00:02:31,160 --> 00:02:28,769
one of several of the uncounted icy

59
00:02:33,199 --> 00:02:31,170
bodies in that region of space beyond

60
00:02:35,420 --> 00:02:33,209
the outermost major planet Neptune

61
00:02:38,000 --> 00:02:35,430
that's been categorized as a dwarf

62
00:02:40,369 --> 00:02:38,010
planet that's because it's relatively

63
00:02:43,220 --> 00:02:40,379

big the third biggest dwarf planet known

64

00:02:45,259 --> 00:02:43,230

after Pluto and Eris the new moons

65

00:02:47,390 --> 00:02:45,269

discovery means that most of the known

66

00:02:50,240 --> 00:02:47,400

dwarf planets in the Kuiper belt larger

67

00:02:53,750 --> 00:02:50,250

than 600 miles or 1,000 kilometers

68

00:02:55,160 --> 00:02:53,760

across do have companions astronomers

69

00:02:57,619 --> 00:02:55,170

are using this discovery as a

70

00:02:59,509 --> 00:02:57,629

springboard for contemplating what must

71

00:03:01,910 --> 00:02:59,519

have been happening billions of years

72

00:03:03,920 --> 00:03:01,920

ago when our Sun and it's planets were

73

00:03:06,080 --> 00:03:03,930

young they're thinking about how

74

00:03:08,509 --> 00:03:06,090

collisions between solar system bodies

75

00:03:10,970 --> 00:03:08,519

which often create craters like those we

76

00:03:14,420 --> 00:03:10,980

see on Earth's moon can also create

77

00:03:18,589 --> 00:03:14,430

binary objects that is planets or dwarf

78

00:03:20,059 --> 00:03:18,599

planets or even asteroids with moons the

79

00:03:22,129 --> 00:03:20,069

team's results appear in a new

80

00:03:24,020 --> 00:03:22,139

peer-reviewed expressed journal that

81

00:03:25,909 --> 00:03:24,030

lets authors publish on a shorter than

82

00:03:28,449 --> 00:03:25,919

usual timeframe it's in the

83

00:03:32,000 --> 00:03:28,459

Astrophysical Journal Letters

84

00:03:33,979 --> 00:03:32,010

observation taken of 2007 Oh our ten by

85

00:03:35,869 --> 00:03:33,989

the famous planet-hunting Kepler space

86

00:03:38,420 --> 00:03:35,879

telescope first tipped off the

87

00:03:41,180 --> 00:03:38,430

astronomers of the possibility of a moon

88

00:03:44,689 --> 00:03:41,190

circling it Kepler had revealed an

89

00:03:48,530 --> 00:03:44,699

unusually slow rotation period 45 hours

90

00:03:52,629 --> 00:03:48,540

for 2007 oh are can enter an individual

91

00:03:56,780 --> 00:03:52,639

named Shaba kiss that spelled c s a BA

92

00:03:58,099 --> 00:03:56,790

kis s kiss is of the conchal observatory

93

00:04:00,229 --> 00:03:58,109

in Budapest Hungary

94

00:04:02,259 --> 00:04:00,239

lead author of the paper announcing the

95

00:04:05,180 --> 00:04:02,269

moon's discovery here's the quote

96

00:04:08,240 --> 00:04:05,190

typical rotation periods for Kuiper belt

97

00:04:09,979 --> 00:04:08,250

objects are under 24 hours the slower

98

00:04:12,949 --> 00:04:09,989

rotation period could have been caused

99

00:04:15,770 --> 00:04:12,959

by the gravitational tug of a moon and

100

00:04:17,479 --> 00:04:15,780

quotes so the astronomers then search

101
00:04:19,969 --> 00:04:17,489
for that moon in the Hubble Space

102
00:04:24,320 --> 00:04:19,979
Telescope's archival images they were

103
00:04:26,870 --> 00:04:24,330
looking for 2007 o r10 and that's when

104
00:04:27,890 --> 00:04:26,880
they spotted it in two separate Hubble

105
00:04:30,170 --> 00:04:27,900
observations by

106
00:04:33,920 --> 00:04:30,180
a year apart the images show that the

107
00:04:36,710 --> 00:04:33,930
moon is gravitationally bound to 2007 o

108
00:04:39,020 --> 00:04:36,720
r10 because it moves with the dwarf

109
00:04:41,719 --> 00:04:39,030
planet as seen against a background of

110
00:04:45,350 --> 00:04:41,729
stars later the astronomers calculated

111
00:04:48,200 --> 00:04:45,360
the diameters of both 2007 Oh are 10 and

112
00:04:50,570 --> 00:04:48,210
its moon based on observations in far

113
00:04:53,180 --> 00:04:50,580

infrared light and they use the Herschel

114

00:04:56,390 --> 00:04:53,190

Space Observatory for that the dwarf

115

00:04:58,790 --> 00:04:56,400

planet is about 950 miles 1,500

116

00:05:02,390 --> 00:04:58,800

kilometers across and the moon is

117

00:05:04,909 --> 00:05:02,400

estimated to be 150 miles to 250 miles

118

00:05:08,029 --> 00:05:04,919

that's up to about 400 kilometers in

119

00:05:10,040 --> 00:05:08,039

diameter earth and contrast is about

120

00:05:12,620 --> 00:05:10,050

eight thousand miles or thirteen

121

00:05:16,279 --> 00:05:12,630

thousand miles across we did not know

122

00:05:18,969 --> 00:05:16,289

that and hikes so here is ye olde bottom

123

00:05:22,820 --> 00:05:18,979

line with the discovery of a moon for

124

00:05:23,779 --> 00:05:22,830

2007 Oh our 10 most known dwarf planets

125

00:05:26,510 --> 00:05:23,789

in the Kuiper belt

126

00:05:30,230 --> 00:05:26,520

larger than 600 miles across now are

127

00:05:33,740 --> 00:05:30,240

known to have companions companions to

128

00:05:36,320 --> 00:05:33,750

ease that loneliness of space how about

129

00:05:38,870 --> 00:05:36,330

we make that the littered loneliness of

130

00:05:42,350 --> 00:05:38,880

space that'll segue right into this next

131

00:05:45,710 --> 00:05:42,360

headline if we don't act soon space junk

132

00:05:47,480 --> 00:05:45,720

might trap us on earth the tiny pieces

133

00:05:50,360 --> 00:05:47,490

of junk orbiting the Earth could have a

134

00:05:52,909 --> 00:05:50,370

major impact on space exploration

135

00:05:55,129 --> 00:05:52,919

oh we think there's a pun embedded in

136

00:05:57,230 --> 00:05:55,139

that second headline but this gets a

137

00:06:00,409 --> 00:05:57,240

byline for Sophie Weiner Popular

138

00:06:02,510 --> 00:06:00,419

Mechanics calm space division not

139

00:06:05,810 --> 00:06:02,520

everything we send into space comes back

140

00:06:08,420 --> 00:06:05,820

down in fact there are millions of

141

00:06:11,360 --> 00:06:08,430

pieces of junk ranging from tiny flecks

142

00:06:12,860 --> 00:06:11,370

of paint to entire satellites currently

143

00:06:16,219 --> 00:06:12,870

taking up space around the Earth's

144

00:06:20,240 --> 00:06:16,229

atmosphere as of now space agencies are

145

00:06:23,240 --> 00:06:20,250

already tracking 750,000 pieces of space

146

00:06:26,000 --> 00:06:23,250

debris orbiting the Earth this space

147

00:06:28,430 --> 00:06:26,010

pollution is a major problem because of

148

00:06:31,129 --> 00:06:28,440

how fast objects orbiting Earth travel

149

00:06:33,110 --> 00:06:31,139

even a paint Fleck a few millimeters

150

00:06:35,750 --> 00:06:33,120

long can cause serious damage when it

151
00:06:37,670 --> 00:06:35,760
hits something the more that this space

152
00:06:40,399 --> 00:06:37,680
junk proliferate the harder and harder

153
00:06:41,210 --> 00:06:40,409
it will be to send anything up into

154
00:06:43,250 --> 00:06:41,220
space

155
00:06:45,980 --> 00:06:43,260
we could literally trap ourselves on

156
00:06:47,750 --> 00:06:45,990
earth if we're not careful luckily

157
00:06:49,880 --> 00:06:47,760
scientists are working on ways to

158
00:06:52,760 --> 00:06:49,890
prevent this there's a NASA program

159
00:06:55,100 --> 00:06:52,770
called space debris elimination that

160
00:06:57,860 --> 00:06:55,110
program proposes shooting atmospheric

161
00:07:00,050 --> 00:06:57,870
gases into space to destabilize the

162
00:07:01,760 --> 00:07:00,060
debris x' orbit and send it plummeting

163
00:07:04,250 --> 00:07:01,770

back to earth where it will burn up in

164

00:07:06,950 --> 00:07:04,260

our atmosphere another proposal from the

165

00:07:09,020 --> 00:07:06,960

European Space Agency tackles the larger

166

00:07:11,900 --> 00:07:09,030

pieces of debris the old satellites

167

00:07:15,830 --> 00:07:11,910

their idea is to send a machine into

168

00:07:18,200 --> 00:07:15,840

space called the E - D orbit which would

169

00:07:19,910 --> 00:07:18,210

literally shoot a net at old satellites

170

00:07:23,120 --> 00:07:19,920

and drag them back into the atmosphere

171

00:07:25,190 --> 00:07:23,130

using a small rocket neither of these

172

00:07:27,320 --> 00:07:25,200

solutions would address the millions of

173

00:07:29,990 --> 00:07:27,330

tiny bits of trash floating around the

174

00:07:33,170 --> 00:07:30,000

earth so the best idea for now is to

175

00:07:35,510 --> 00:07:33,180

prevent more from building up if not

176
00:07:37,850 --> 00:07:35,520
according to this article by Sophie

177
00:07:40,940 --> 00:07:37,860
Weiner we could find ourselves trapped

178
00:07:43,580 --> 00:07:40,950
in a prison of our own making and in

179
00:07:44,660 --> 00:07:43,590
other space news we grabbed an article

180
00:07:48,500 --> 00:07:44,670
from MarketWatch

181
00:07:50,450 --> 00:07:48,510
byline for Eureka do shmulik mining this

182
00:07:53,810 --> 00:07:50,460
asteroid between Mars and Jupiter

183
00:07:55,570 --> 00:07:53,820
could net hold on 10-thousand

184
00:07:58,610 --> 00:07:55,580
quadrillion dollars

185
00:08:02,080 --> 00:07:58,620
well Eureka describes that as ten

186
00:08:04,100 --> 00:08:02,090
thousand with 15 zeros after it

187
00:08:07,400 --> 00:08:04,110
scientists are interested in the

188
00:08:09,770 --> 00:08:07,410

metallic composition of the 16 Saiki

189

00:08:13,670 --> 00:08:09,780

asteroid and of course that's like

190

00:08:15,350 --> 00:08:13,680

psyche the goddess psyche psy CH II NASA

191

00:08:18,290 --> 00:08:15,360

said this asteroid is made of rock

192

00:08:20,060 --> 00:08:18,300

metals and other elements a common

193

00:08:21,590 --> 00:08:20,070

element of course in science fiction

194

00:08:23,630 --> 00:08:21,600

films is asteroids

195

00:08:26,659 --> 00:08:23,640

you're either blowing them up landing on

196

00:08:29,450 --> 00:08:26,669

them living inside them or mining them

197

00:08:31,640 --> 00:08:29,460

for profit that last cliché might

198

00:08:33,709 --> 00:08:31,650

actually become reality in the near

199

00:08:37,670 --> 00:08:33,719

future next to one of the latest NASA

200

00:08:39,860 --> 00:08:37,680

missions which is to research 16 psyche

201
00:08:42,260 --> 00:08:39,870
that asteroid orbiting the Sun between

202
00:08:45,770 --> 00:08:42,270
Mars and Jupiter this asteroid has a

203
00:08:47,750 --> 00:08:45,780
diameter of about 135 miles and it's

204
00:08:50,150 --> 00:08:47,760
mostly comprised of precious metals

205
00:08:53,660 --> 00:08:50,160
which makes it a veritable treasure

206
00:08:54,740 --> 00:08:53,670
trove if all of its metals nickel iron

207
00:08:58,190 --> 00:08:54,750
platinum

208
00:09:01,040 --> 00:08:58,200
iridium and rhenium that spelled Rhen I

209
00:09:03,640 --> 00:09:01,050
um could somehow be extracted and sold

210
00:09:08,000 --> 00:09:03,650
on earth they would fetch a price of

211
00:09:11,870 --> 00:09:08,010
10000 quadrillion how much is that well

212
00:09:13,850 --> 00:09:11,880
add 15 zeroes to ten thousand and you're

213
00:09:15,830 --> 00:09:13,860

there unfortunately

214

00:09:17,810 --> 00:09:15,840

bringing all that bling to earth is out

215

00:09:19,670 --> 00:09:17,820

of the question first we still don't

216

00:09:22,130 --> 00:09:19,680

have the technology that would enable us

217

00:09:24,710 --> 00:09:22,140

to haul that mass and land it safely on

218

00:09:26,690 --> 00:09:24,720

earth the very mining of the asteroid

219

00:09:28,660 --> 00:09:26,700

and then the transporting of it in

220

00:09:31,850 --> 00:09:28,670

chunks might also prove problematic

221

00:09:35,000 --> 00:09:31,860

since we haven't invented space mines

222

00:09:37,250 --> 00:09:35,010

yet finally even if we found a way to

223

00:09:39,860 --> 00:09:37,260

haul it all back to earth the sudden

224

00:09:42,320 --> 00:09:39,870

rise in supply on the market would cause

225

00:09:44,060 --> 00:09:42,330

prices to plummet which would severely

226

00:09:45,890 --> 00:09:44,070

affect the bottom line of the space

227

00:09:47,860 --> 00:09:45,900

miners and put the long-term

228

00:09:51,350 --> 00:09:47,870

profitability of the entire operation

229

00:09:53,660 --> 00:09:51,360

into question and that's why NASA isn't

230

00:09:56,210 --> 00:09:53,670

really considering profits as a main

231

00:09:58,340 --> 00:09:56,220

motivation for this mission scientists

232

00:10:01,640 --> 00:09:58,350

are nevertheless interested in the

233

00:10:03,740 --> 00:10:01,650

metallic composition of 16 Saiki because

234

00:10:07,579 --> 00:10:03,750

its structure closely resembles the one

235

00:10:11,090 --> 00:10:07,589

found within planetary nuclei 16 psyche

236

00:10:13,700 --> 00:10:11,100

might actually be a metallic core of a

237

00:10:16,090 --> 00:10:13,710

planet twice its diameter that for some

238

00:10:18,920 --> 00:10:16,100

reason just didn't finish its formation

239

00:10:21,200 --> 00:10:18,930

another curiosity here is the presence

240

00:10:23,030 --> 00:10:21,210

of water the most likely source of which

241

00:10:25,579 --> 00:10:23,040

may be frequent collisions with smaller

242

00:10:27,860 --> 00:10:25,589

asteroids containing hydrogen carbon or

243

00:10:29,990 --> 00:10:27,870

ice the proposed research would be

244

00:10:33,110 --> 00:10:30,000

conducted by using a robotic vehicle

245

00:10:35,000 --> 00:10:33,120

dubbed psyche orbiter the spacecraft

246

00:10:37,460 --> 00:10:35,010

would orbit the asteroid for six months

247

00:10:39,140 --> 00:10:37,470

study its topography gravity magnetism

248

00:10:43,310 --> 00:10:39,150

and other features

249

00:10:45,260 --> 00:10:43,320

this research is invaluable much of what

250

00:10:47,840 --> 00:10:45,270

we know about our own planets metallic

251
00:10:50,329 --> 00:10:47,850
core which is unreachable below rocky

252
00:10:53,960 --> 00:10:50,339
Mantle's and crust that's still mainly

253
00:10:56,329 --> 00:10:53,970
theoretical by studying 16 psyche which

254
00:10:58,430 --> 00:10:56,339
actually could be an exposed planetary

255
00:11:00,710 --> 00:10:58,440
core scientists would gain an

256
00:11:03,260 --> 00:11:00,720
unprecedented insight into complex

257
00:11:06,260 --> 00:11:03,270
processes associated with the formation

258
00:11:08,600 --> 00:11:06,270
of terrestrial planets this mission is

259
00:11:11,030 --> 00:11:08,610
scheduled to launch in 2022

260
00:11:14,269 --> 00:11:11,040
and the arrival at 16 psyche is expected

261
00:11:16,519 --> 00:11:14,279
in 4.6 years or 2026

262
00:11:19,220 --> 00:11:16,529
the entire observation period should

263
00:11:21,680 --> 00:11:19,230

last 20 months and will include orbiting

264

00:11:24,199 --> 00:11:21,690

mapping and studying the asteroids

265

00:11:26,769 --> 00:11:24,209

properties just another example of

266

00:11:30,019 --> 00:11:26,779

science fiction becoming science fact

267

00:11:32,990 --> 00:11:30,029

here's just a snippet of an article from

268

00:11:36,650 --> 00:11:33,000

the Northern Territory news headline

269

00:11:40,090 --> 00:11:36,660

Northern Territory in dry spell for UFO

270

00:11:43,160 --> 00:11:40,100

sightings Judith ace Thor wrote this

271

00:11:46,090 --> 00:11:43,170

Australia's self-proclaimed UFO capital

272

00:11:49,100 --> 00:11:46,100

white cliff well hasn't had a single

273

00:11:51,470 --> 00:11:49,110

extraterrestrial visitor in a year with

274

00:11:54,500 --> 00:11:51,480

what's called the dry season uppercase D

275

00:11:56,900 --> 00:11:54,510

uppercase s in Australia historically

276

00:11:59,980 --> 00:11:56,910

the prime time for UFO sightings in the

277

00:12:02,410 --> 00:11:59,990

Northern Territory upon them the lack of

278

00:12:05,030 --> 00:12:02,420

extraterrestrial visitors is concerning

279

00:12:06,949 --> 00:12:05,040

only three UFO encounters have been

280

00:12:09,350 --> 00:12:06,959

brought to the attention of the Northern

281

00:12:12,800 --> 00:12:09,360

Territory news in the past year the most

282

00:12:14,199 --> 00:12:12,810

recent being MLA Gerry woods encounter

283

00:12:17,660 --> 00:12:14,209

in February

284

00:12:19,550 --> 00:12:17,670

mr. wood said as dawn broke he saw a

285

00:12:22,069 --> 00:12:19,560

white light about the brightness of a

286

00:12:24,400 --> 00:12:22,079

star it was heading north from Virginia

287

00:12:27,319 --> 00:12:24,410

towards Howard Springs in Australia

288

00:12:30,259 --> 00:12:27,329

according to wycliffe well holiday park

289

00:12:32,720 --> 00:12:30,269

manager karthik mayanna in the year he'd

290

00:12:34,460 --> 00:12:32,730

worked there not one extraterrestrial

291

00:12:37,550 --> 00:12:34,470

visitor had shown themselves to him or

292

00:12:39,650 --> 00:12:37,560

any of the parks residents Australian

293

00:12:42,350 --> 00:12:39,660

UFO Research Association spokesman Doug

294

00:12:44,329 --> 00:12:42,360

Moffat said in the past six months there

295

00:12:46,579 --> 00:12:44,339

had been an increase in reported

296

00:12:47,930 --> 00:12:46,589

sightings across the world but Doug

297

00:12:50,980 --> 00:12:47,940

Moffett couldn't explain why the

298

00:12:54,380 --> 00:12:50,990

territory was lacking in reports of UFOs

299

00:12:57,439 --> 00:12:54,390

he suggests people are seeing UFOs but

300

00:12:59,689 --> 00:12:57,449

simply not reporting them quote once you

301
00:13:01,699 --> 00:12:59,699
get out into the Northern Territory the

302
00:13:03,829 --> 00:13:01,709
western parts of the country areas you

303
00:13:06,620 --> 00:13:03,839
get a much higher percentage of Close

304
00:13:08,509 --> 00:13:06,630
Encounters and quotes he said on the

305
00:13:11,360 --> 00:13:08,519
Sydney Australia based groups website

306
00:13:14,870 --> 00:13:11,370
only one territory encounter in Kathryn

307
00:13:16,790 --> 00:13:14,880
last year in July has been listed Doug

308
00:13:19,630 --> 00:13:16,800
Moffett believes we're currently in the

309
00:13:21,740 --> 00:13:19,640
initial stages for first contact of

310
00:13:22,430 --> 00:13:21,750
extraterrestrials he links that to the

311
00:13:25,520 --> 00:13:22,440
global in

312
00:13:27,920 --> 00:13:25,530
recent sightings he says quote if we see

313
00:13:30,470 --> 00:13:27,930

a spike in the next 6 or 12 months in

314

00:13:33,980 --> 00:13:30,480

close encounter sightings I think that

315

00:13:35,450 --> 00:13:33,990

is the lead up to first contact I'm not

316

00:13:38,030 --> 00:13:35,460

getting too excited because we're only

317

00:13:40,640 --> 00:13:38,040

at phase 1 which is the increase of

318

00:13:43,280 --> 00:13:40,650

sightings and quotes paradoxical a

319

00:13:46,520 --> 00:13:43,290

decrease in the reported sightings and

320

00:13:49,130 --> 00:13:46,530

yet a worldwide increase acacia Hills

321

00:13:51,740 --> 00:13:49,140

UFO hunter Allen Ferguson closed down

322

00:13:55,190 --> 00:13:51,750

his legendary website which was UFO

323

00:13:58,190 --> 00:13:55,200

territory calm a you he closed it down

324

00:14:01,580 --> 00:13:58,200

last year citing a quote mindset change

325

00:14:03,950 --> 00:14:01,590

end quote Allen Ferguson said on Twitter

326

00:14:06,800 --> 00:14:03,960

he was still involved but quote behind

327

00:14:09,380 --> 00:14:06,810

the scenes end quotes there's a local

328

00:14:11,600 --> 00:14:09,390

astronomer Jeff car he doesn't believe

329

00:14:14,750 --> 00:14:11,610

in aliens but he cannot say for certain

330

00:14:16,250 --> 00:14:14,760

that they don't exist he said many of

331

00:14:20,090 --> 00:14:16,260

the sightings could be put down to

332

00:14:22,910 --> 00:14:20,100

aircraft drones or weather-related we'll

333

00:14:25,130 --> 00:14:22,920

keep our eyes on the land down under so

334

00:14:28,070 --> 00:14:25,140

gentle listeners we're in that relative

335

00:14:30,350 --> 00:14:28,080

geolocation let's head on over to New

336

00:14:33,530 --> 00:14:30,360

South Wales where there was a UFO

337

00:14:38,180 --> 00:14:33,540

sighting in Crescent head move on wise

338

00:14:41,240 --> 00:14:38,190

this has a case number 8 for 3:03 this

339

00:14:44,270 --> 00:14:41,250

took place on the 4th of June 2017 was

340

00:14:47,210 --> 00:14:44,280

reported on the 10th of June here's what

341

00:14:50,240 --> 00:14:47,220

our witness offers by way of summary six

342

00:14:54,680 --> 00:14:50,250

white lights on object which then spun

343

00:14:57,950 --> 00:14:54,690

flashed red green moved slightly citing

344

00:15:01,340 --> 00:14:57,960

specifics give us a viewing distance 101

345

00:15:04,490 --> 00:15:01,350

to 500 feet the altitude was over 500

346

00:15:07,850 --> 00:15:04,500

feet and there was cloud cover the

347

00:15:10,870 --> 00:15:07,860

sighting duration 3 hours the object

348

00:15:13,820 --> 00:15:10,880

features are reported as being a dome

349

00:15:16,610 --> 00:15:13,830

the flight path hovering then paths and

350

00:15:18,730 --> 00:15:16,620

then a path with directional change and

351

00:15:21,560 --> 00:15:18,740

this object was shaped like a sphere

352

00:15:23,620 --> 00:15:21,570

there's no mention of meteorology let's

353

00:15:25,850 --> 00:15:23,630

just jump right into the sighting

354

00:15:29,660 --> 00:15:25,860

camping at Point Plummer

355

00:15:32,420 --> 00:15:29,670

let's bail PLO M er looked out of the

356

00:15:35,750 --> 00:15:32,430

roof of the tent it had a sky roof at 4

357

00:15:36,170 --> 00:15:35,760

a.m. and I saw a bright star like object

358

00:15:39,019 --> 00:15:36,180

which

359

00:15:42,980 --> 00:15:39,029

was moving occasionally within a defined

360

00:15:45,560 --> 00:15:42,990

area and then smaller star-like objects

361

00:15:48,019 --> 00:15:45,570

started to come out of this bright

362

00:15:48,680 --> 00:15:48,029

object and fly away quickly in different

363

00:15:51,800 --> 00:15:48,690

directions

364

00:15:54,620 --> 00:15:51,810

I also saw at least five shooting stars

365

00:15:57,829 --> 00:15:54,630

at this time one of which moved in an

366

00:16:00,620 --> 00:15:57,839

arc i sat up after watching this for 30

367

00:16:03,470 --> 00:16:00,630

minutes and saw a large bright object

368

00:16:06,019 --> 00:16:03,480

about 400 meters from our tent it was

369

00:16:08,570 --> 00:16:06,029

hovering it was about 50 meters above

370

00:16:11,870 --> 00:16:08,580

the sand to the northeast and then it

371

00:16:14,060 --> 00:16:11,880

began to come closer it then changed

372

00:16:17,329 --> 00:16:14,070

from one bright light to six smaller

373

00:16:19,910 --> 00:16:17,339

lights for example the lights changed if

374

00:16:22,010 --> 00:16:19,920

it had been a car it was as if the car

375

00:16:25,970 --> 00:16:22,020

went from high beams to parking lights

376

00:16:28,910 --> 00:16:25,980

and then they moved away over two hours

377

00:16:31,490 --> 00:16:28,920

it moved away slowly it stayed there

378

00:16:33,550 --> 00:16:31,500

until sunrise it was there until the Sun

379

00:16:37,130 --> 00:16:33,560

was so bright we could no longer see it

380

00:16:39,470 --> 00:16:37,140

up in the night sky I saw 20-plus of

381

00:16:41,620 --> 00:16:39,480

these objects some of which flashed red

382

00:16:44,000 --> 00:16:41,630

and some would disappear and reappear

383

00:16:47,510 --> 00:16:44,010

some of these things oome off at

384

00:16:49,250 --> 00:16:47,520

incredible speeds since then we

385

00:16:51,410 --> 00:16:49,260

continued to see the bright hovering

386

00:16:53,960 --> 00:16:51,420

lights up in the East Coast for the past

387

00:16:55,940 --> 00:16:53,970

week this is a different sighting I

388

00:16:58,820 --> 00:16:55,950

noticed at first by the bright light

389

00:17:01,670 --> 00:16:58,830

moving then other lights emerging from

390

00:17:04,460 --> 00:17:01,680

it these lights flashed red and large

391

00:17:06,590 --> 00:17:04,470

they were spinning these could not be

392

00:17:09,610 --> 00:17:06,600

explained they were too large too fast

393

00:17:12,740 --> 00:17:09,620

to be a drone and there was no noise in

394

00:17:14,990 --> 00:17:12,750

both occasions I did not have a feeling

395

00:17:18,020 --> 00:17:15,000

of being threatened more that these

396

00:17:19,699 --> 00:17:18,030

things were just there to observe also

397

00:17:23,390 --> 00:17:19,709

this object didn't seem to be bothered

398

00:17:26,960 --> 00:17:23,400

by being found it was so prominent and

399

00:17:28,910 --> 00:17:26,970

it did not appear to leave quickly let's

400

00:17:31,130 --> 00:17:28,920

quickly shift our trajectory to

401
00:17:33,650 --> 00:17:31,140
California in the United States to the

402
00:17:35,930 --> 00:17:33,660
city of Mariposa or Mariposa

403
00:17:38,900 --> 00:17:35,940
it's butterfly in Spanish no matter how

404
00:17:41,990 --> 00:17:38,910
you say it this is case number 8 for two

405
00:17:45,680 --> 00:17:42,000
six zero from the MUFON database in

406
00:17:49,190 --> 00:17:45,690
summary looked like dumbbell both ends

407
00:17:49,850 --> 00:17:49,200
bright red the connector black moved in

408
00:17:53,090 --> 00:17:49,860
sky

409
00:17:55,130 --> 00:17:53,100
for several minutes citing specifics

410
00:17:58,160 --> 00:17:55,140
give a viewing distance of over one mile

411
00:18:00,650 --> 00:17:58,170
the altitude was over 500 feet without

412
00:18:02,840 --> 00:18:00,660
cloud cover the duration of this

413
00:18:04,610 --> 00:18:02,850

sighting was 10 minutes the object

414

00:18:08,000 --> 00:18:04,620

features though just get described

415

00:18:10,640 --> 00:18:08,010

vaguely as other object flight path was

416

00:18:13,340 --> 00:18:10,650

path with directional change paths then

417

00:18:16,850 --> 00:18:13,350

hovering and this object was shaped like

418

00:18:18,650 --> 00:18:16,860

a dumbbell also called a barbell not one

419

00:18:21,380 --> 00:18:18,660

of the most common sighting shapes

420

00:18:23,870 --> 00:18:21,390

reported the maximum temperature over

421

00:18:26,870 --> 00:18:23,880

Mariposa California was 88 degrees

422

00:18:30,020 --> 00:18:26,880

Fahrenheit 31 degrees Celsius down to a

423

00:18:33,049 --> 00:18:30,030

mean chilly for California 55 degrees

424

00:18:35,360 --> 00:18:33,059

Fahrenheit 13 degrees Celsius the

425

00:18:39,080 --> 00:18:35,370

maximum mean and minimum visibility

426

00:18:41,210 --> 00:18:39,090

factors all stood the same 10 miles 16

427

00:18:44,060 --> 00:18:41,220

kilometers there seemed to be nothing

428

00:18:47,150 --> 00:18:44,070

abnormal about the weather here's the

429

00:18:49,820 --> 00:18:47,160

account sitting outside to have a smoke

430

00:18:52,820 --> 00:18:49,830

I usually go out two to three times each

431

00:18:55,039 --> 00:18:52,830

evening to look at the night sky I saw

432

00:18:58,010 --> 00:18:55,049

this object moving from west to

433

00:19:01,400 --> 00:18:58,020

northwest it was large in the sky it

434

00:19:04,280 --> 00:19:01,410

looked like a large dumbbell with both

435

00:19:07,280 --> 00:19:04,290

ends bright red it was kind of pulsing

436

00:19:11,090 --> 00:19:07,290

it had a black connector between those

437

00:19:13,250 --> 00:19:11,100

two ends and that was pitch black first

438

00:19:15,169 --> 00:19:13,260

saw this in the West moving from left to

439

00:19:17,390 --> 00:19:15,179

right and then I went into the house and

440

00:19:20,150 --> 00:19:17,400

got my wife to come out she took one

441

00:19:22,940 --> 00:19:20,160

look and said so what a big red thingy

442

00:19:25,610 --> 00:19:22,950

flying around in the sky she went back

443

00:19:27,530 --> 00:19:25,620

into the house I watched for about two

444

00:19:30,350 --> 00:19:27,540

minutes more as it moved up and down

445

00:19:33,799 --> 00:19:30,360

left and right and then it just took off

446

00:19:36,470 --> 00:19:33,809

very fast much faster than any jets it

447

00:19:39,289 --> 00:19:36,480

made not a sound it headed north west

448

00:19:41,120 --> 00:19:39,299

disappearing over the mountains this

449

00:19:43,730 --> 00:19:41,130

thing was traveling so fast it appeared

450

00:19:45,950 --> 00:19:43,740

to go right through the mountain I see

451
00:19:48,289 --> 00:19:45,960
many strange things in the night sky up

452
00:19:50,630 --> 00:19:48,299
here mostly things that look like a

453
00:19:53,210 --> 00:19:50,640
camera flash in the upper atmosphere I

454
00:19:55,520 --> 00:19:53,220
see them quite often sometimes they'll

455
00:19:58,159 --> 00:19:55,530
be just one but oftentimes there will be

456
00:20:01,190 --> 00:19:58,169
several there always a white bright

457
00:20:02,980 --> 00:20:01,200
flash got to look quick one night I saw

458
00:20:05,830 --> 00:20:02,990
four of them and

459
00:20:09,220 --> 00:20:05,840
a fifth although that fifth one was only

460
00:20:11,950 --> 00:20:09,230
red the only time I ever saw a red one

461
00:20:14,320 --> 00:20:11,960
it appeared to be an energy burst just

462
00:20:16,990 --> 00:20:14,330
outside our atmosphere this definitely

463
00:20:19,720 --> 00:20:17,000

was not a plane or helicopter it was way

464

00:20:22,830 --> 00:20:19,730

too high up could this have been a ship

465

00:20:25,150 --> 00:20:22,840

entering or leaving hyperspace

466

00:20:27,220 --> 00:20:25,160

interesting yes it was a confirmed

467

00:20:29,470 --> 00:20:27,230

sighting by another set of eyes another

468

00:20:31,840 --> 00:20:29,480

brain but a brain that doesn't quite see

469

00:20:34,270 --> 00:20:31,850

the connection to a big red thingy

470

00:20:37,660 --> 00:20:34,280

flying around in the sky being unusual

471

00:20:40,390 --> 00:20:37,670

oh well give her time we are still in

472

00:20:42,250 --> 00:20:40,400

the golden state of California so let's

473

00:20:42,970 --> 00:20:42,260

pick up this sighting from Studio City

474

00:20:45,430 --> 00:20:42,980

California

475

00:20:48,040 --> 00:20:45,440

it's MUFON case number eight four two

476

00:20:50,620 --> 00:20:48,050

eight one the date of this sighting is

477

00:20:52,419 --> 00:20:50,630

the 9th of June it got a same-day report

478

00:20:55,600 --> 00:20:52,429

and that's 2017

479

00:20:57,370 --> 00:20:55,610

in summary me and others witnessed many

480

00:21:00,790 --> 00:20:57,380

UFOs above us

481

00:21:02,980 --> 00:21:00,800

orbs sighting specifics give us an

482

00:21:05,650 --> 00:21:02,990

unknown viewing distance and unknown

483

00:21:08,260 --> 00:21:05,660

altitude a sighting duration however

484

00:21:12,280 --> 00:21:08,270

that's 30 minutes the object features

485

00:21:15,100 --> 00:21:12,290

other and unknown this flight path was

486

00:21:17,049 --> 00:21:15,110

stationary hovering and then path and

487

00:21:19,690 --> 00:21:17,059

this particular object seemed to be

488

00:21:22,299 --> 00:21:19,700

shaped like a circle there isn't any

489

00:21:24,010 --> 00:21:22,309

meteorology it's usually sunny in

490

00:21:27,580 --> 00:21:24,020

California but here's the account

491

00:21:30,880 --> 00:21:27,590

first-person unedited just witnessed

492

00:21:35,110 --> 00:21:30,890

along with three of my neighbors over 20

493

00:21:37,840 --> 00:21:35,120

white or black UFOs perhaps about 20,000

494

00:21:40,330 --> 00:21:37,850

feet up over the Moorpark street address

495

00:21:42,970 --> 00:21:40,340

Studio City California near Coldwater

496

00:21:45,970 --> 00:21:42,980

Canyon these things were all hovering

497

00:21:48,880 --> 00:21:45,980

floating and on seven occasions one

498

00:21:51,520 --> 00:21:48,890

would travel and touch another all in

499

00:21:53,710 --> 00:21:51,530

the exact way and they repeated this I

500

00:21:56,320 --> 00:21:53,720

was the first who noticed them it was

501
00:21:59,169 --> 00:21:56,330
about 4:45 p.m. I was watching a large

502
00:22:01,660 --> 00:21:59,179
aircraft fly overhead and then I noticed

503
00:22:04,690 --> 00:22:01,670
two of them near it then I saw the

504
00:22:07,390 --> 00:22:04,700
others several neighbors saw me and then

505
00:22:10,240 --> 00:22:07,400
they looked up and also stared we all

506
00:22:12,130 --> 00:22:10,250
wondered what these things were many

507
00:22:14,470 --> 00:22:12,140
were in clusters close to each other

508
00:22:16,930 --> 00:22:14,480
separated from the other clusters and

509
00:22:20,320 --> 00:22:16,940
for the thirty minutes we watched them

510
00:22:22,600 --> 00:22:20,330
they barely moved I also reported this

511
00:22:25,060 --> 00:22:22,610
to the Facebook move on I have no

512
00:22:27,850 --> 00:22:25,070
feelings at the time emotionally just a

513
00:22:30,760 --> 00:22:27,860

sense of wonder they all reminded me of

514

00:22:32,770 --> 00:22:30,770

the fleet reporting's in Mexico these

515

00:22:34,960 --> 00:22:32,780

things were too high up for a picture to

516

00:22:37,150 --> 00:22:34,970

even make anything out I asked a

517

00:22:39,180 --> 00:22:37,160

neighbor to try with her iPhone but they

518

00:22:41,800 --> 00:22:39,190

could barely be seen through the phone

519

00:22:44,080 --> 00:22:41,810

after 30 minutes of watching them they

520

00:22:47,080 --> 00:22:44,090

were drifting east they were not

521

00:22:49,540 --> 00:22:47,090

balloons as seven of them traveled to

522

00:22:51,250 --> 00:22:49,550

each other on separate occasions they

523

00:22:54,610 --> 00:22:51,260

were touching each other in the same

524

00:22:57,670 --> 00:22:54,620

exact manner same exact pattern exact

525

00:23:02,140 --> 00:22:57,680

same touch seven different times and

526

00:23:05,050 --> 00:23:02,150

there were over 20 of these things to

527

00:23:06,790 --> 00:23:05,060

which we can only say what the heck we

528

00:23:08,710 --> 00:23:06,800

just can't leave the state of California

529

00:23:10,840 --> 00:23:08,720

here's a sighting from the northern part

530

00:23:13,270 --> 00:23:10,850

of the state city of Bakersfield

531

00:23:15,640 --> 00:23:13,280

MUFON gave this case number eight four

532

00:23:18,400 --> 00:23:15,650

three three one for those tracking and

533

00:23:21,130 --> 00:23:18,410

identification processes the date of the

534

00:23:23,380 --> 00:23:21,140

sighting is the 10th of June 2017 it got

535

00:23:25,570 --> 00:23:23,390

a next day report those sighting

536

00:23:29,560 --> 00:23:25,580

specifics offer a viewing distance of

537

00:23:33,280 --> 00:23:29,570

101 feet to 500 feet the altitude 500

538

00:23:35,860 --> 00:23:33,290

feet or less and then over 500 feet and

539

00:23:37,960 --> 00:23:35,870

underneath a cloud cover the sighting

540

00:23:40,540 --> 00:23:37,970

duration was seven minutes object

541

00:23:43,810 --> 00:23:40,550

features dome object flight path

542

00:23:46,480 --> 00:23:43,820

hovering then path then path then

543

00:23:49,030 --> 00:23:46,490

hovering and this object is described as

544

00:23:51,370 --> 00:23:49,040

looking like a fireball as far as the

545

00:23:54,010 --> 00:23:51,380

shape is concerned there is some weather

546

00:23:57,100 --> 00:23:54,020

the maximum temperature 79 degrees

547

00:24:00,100 --> 00:23:57,110

Fahrenheit 26 degrees Celsius minimum

548

00:24:02,680 --> 00:24:00,110

temperature 61 degrees Fahrenheit 16

549

00:24:05,290 --> 00:24:02,690

degrees Celsius those visibility factors

550

00:24:08,590 --> 00:24:05,300

all three of the maximum mean and

551
00:24:11,740 --> 00:24:08,600
minimum the same 10 miles 16 kilometers

552
00:24:14,050 --> 00:24:11,750
and California very rarely has abnormal

553
00:24:15,820 --> 00:24:14,060
weather there wasn't any at the time of

554
00:24:19,000 --> 00:24:15,830
this sighting it seemed to go something

555
00:24:22,000 --> 00:24:19,010
like this my fiance and I were in our

556
00:24:24,370 --> 00:24:22,010
backyard observing numerous fireball

557
00:24:27,700 --> 00:24:24,380
like UFOs these things were slowly

558
00:24:30,130 --> 00:24:27,710
moving across the sky fairly close they

559
00:24:30,820 --> 00:24:30,140
were above our neighbor's houses I told

560
00:24:32,769 --> 00:24:30,830
her to run

561
00:24:35,080 --> 00:24:32,779
have the phone record this as this is

562
00:24:37,570 --> 00:24:35,090
the second events we've witnessed in the

563
00:24:40,090 --> 00:24:37,580

last few months and we failed to capture

564

00:24:42,220 --> 00:24:40,100

it the first time our thoughts initially

565

00:24:44,529 --> 00:24:42,230

were these could be some new kind of

566

00:24:46,899 --> 00:24:44,539

memorial balloons something that we

567

00:24:50,230 --> 00:24:46,909

weren't aware of they moved across the

568

00:24:53,980 --> 00:24:50,240

sky similar to hot-air balloons but they

569

00:24:55,779 --> 00:24:53,990

seemed to be made entirely of fire the

570

00:24:58,539 --> 00:24:55,789

first time we saw one of these was a few

571

00:25:01,240 --> 00:24:58,549

months ago we saw it up very close

572

00:25:04,180 --> 00:25:01,250

it rose directly over our neighbor's

573

00:25:07,750 --> 00:25:04,190

house I would describe this has a large

574

00:25:10,480 --> 00:25:07,760

sack of fire being carried by some type

575

00:25:14,169 --> 00:25:10,490

of curved black claw type structure

576

00:25:16,930 --> 00:25:14,179

directly above it and yet another kind

577

00:25:19,870 --> 00:25:16,940

of description a sack of fire and a

578

00:25:23,409 --> 00:25:19,880

black claw type object on that note

579

00:25:25,690 --> 00:25:23,419

we've got to say that's a wrap thank you

580

00:25:28,539 --> 00:25:25,700

for listening to inception radio network

581

00:25:31,120 --> 00:25:28,549

follow today's broadcast at UFO headline

582

00:25:33,279 --> 00:25:31,130

news calm and look for us on YouTube as

583

00:25:35,259 --> 00:25:33,289

well take care of each other we're all
