

Inception Radio Network

UFO Headline News Friday June 16th,
2017

1
00:00:07,460 --> 00:00:05,300
hello it's Friday June 16 2017 you are

2
00:00:10,370 --> 00:00:07,470
listening to inception Radio Network

3
00:00:15,110 --> 00:00:10,380
voice of the fringe majority this is

4
00:00:17,180 --> 00:00:15,120
Carol Karl with UFO headline news so

5
00:00:17,720 --> 00:00:17,190
what have we got to look at in the sky

6
00:00:20,480 --> 00:00:17,730
tonight

7
00:00:22,220 --> 00:00:20,490
well actually pretty much the same thing

8
00:00:24,830 --> 00:00:22,230
that was there last night we can look

9
00:00:27,130 --> 00:00:24,840
for that ringed planet Saturn it's going

10
00:00:30,200 --> 00:00:27,140
to be visible again from dusk till dawn

11
00:00:32,510 --> 00:00:30,210
the earth is flying between Saturn and

12
00:00:34,970 --> 00:00:32,520
the Sun and that thing called Saturn's

13
00:00:37,310 --> 00:00:34,980

opposition is occurring in other words

14

00:00:40,520 --> 00:00:37,320

Saturn being opposite the Sun in Earth's

15

00:00:42,590 --> 00:00:40,530

sky right now and it's a big milestone

16

00:00:45,950 --> 00:00:42,600

so that milestone carries over into

17

00:00:48,020 --> 00:00:45,960

today but for tomorrow night if you're

18

00:00:50,569 --> 00:00:48,030

looking for the moon and the evening sky

19

00:00:52,790 --> 00:00:50,579

you're not going to find it nothing

20

00:00:55,220 --> 00:00:52,800

mysterious here the moon reached its

21

00:00:58,819 --> 00:00:55,230

last quarter early in the morning of May

22

00:01:00,680 --> 00:00:58,829

29th so the last quarter moon rises in

23

00:01:02,779 --> 00:01:00,690

the middle of the night and shines in

24

00:01:05,090 --> 00:01:02,789

the morning sky the moon actually

25

00:01:08,920 --> 00:01:05,100

reaches its half illuminated last

26

00:01:11,570 --> 00:01:08,930

quarter phase June 17th 11:33 UTC

27

00:01:14,000 --> 00:01:11,580

although the last quarter moon happens

28

00:01:15,710 --> 00:01:14,010

at the same instant worldwide of course

29

00:01:17,410 --> 00:01:15,720

it's going to occur at different times

30

00:01:20,539 --> 00:01:17,420

by the clock depending on your time zone

31

00:01:22,520 --> 00:01:20,549

from around the world people will see

32

00:01:25,399 --> 00:01:22,530

the moon in the wee hours after midnight

33

00:01:27,590 --> 00:01:25,409

June 17th and no matter where you are on

34

00:01:30,530 --> 00:01:27,600

earth the moon will be highest up in

35

00:01:32,810 --> 00:01:30,540

your sky at roughly 6:00 a.m. your local

36

00:01:35,030 --> 00:01:32,820

time 7:00 a.m. if you're in daylight

37

00:01:37,760 --> 00:01:35,040

saving time it's going to look half

38

00:01:40,370 --> 00:01:37,770

illuminated although half lit it's

39

00:01:42,859 --> 00:01:40,380

called the last quarter or third quarter

40

00:01:45,020 --> 00:01:42,869

moon because the moon is three-quarters

41

00:01:47,719 --> 00:01:45,030

of the way in its journey from New Moon

42

00:01:49,490 --> 00:01:47,729

to New Moon if you're looking from the

43

00:01:52,460 --> 00:01:49,500

north side of the moon's orbital plane

44

00:01:54,859 --> 00:01:52,470

Earth rotates counterclockwise on its

45

00:01:57,920 --> 00:01:54,869

rotational axis and the moon revolves

46

00:02:00,499 --> 00:01:57,930

counterclockwise around Earth that's

47

00:02:02,209 --> 00:02:00,509

dizzying there's a cool video that

48

00:02:04,429 --> 00:02:02,219

accompanies this article it shows you

49

00:02:05,359 --> 00:02:04,439

the terminators those lines between

50

00:02:07,399 --> 00:02:05,369

light and dark

51
00:02:09,710 --> 00:02:07,409
on the Earth and Moon it shows that

52
00:02:12,589 --> 00:02:09,720
alignment at first quarter and last

53
00:02:13,340 --> 00:02:12,599
quarter moon half of that lunar disk is

54
00:02:16,070 --> 00:02:13,350
always in the

55
00:02:18,740 --> 00:02:16,080
by sunlight while the nighttime half is

56
00:02:21,560 --> 00:02:18,750
submerged in the moon's own shadow at

57
00:02:24,860 --> 00:02:21,570
last quarter moon we see half the moon's

58
00:02:27,080 --> 00:02:24,870
day side and half its night side that

59
00:02:29,030 --> 00:02:27,090
lunar Terminator it shows you where it's

60
00:02:31,940 --> 00:02:29,040
sunset on the last quarter moon as it

61
00:02:33,740 --> 00:02:31,950
waning toward new moon it's along that

62
00:02:35,780 --> 00:02:33,750
Terminator line that you've got your

63
00:02:38,360 --> 00:02:35,790

best three-dimensional views of the

64

00:02:40,640 --> 00:02:38,370

lunar terrain even through binoculars or

65

00:02:42,050 --> 00:02:40,650

especially telescopes their sky

66

00:02:44,540 --> 00:02:42,060

recommends looking in the morning

67

00:02:46,670 --> 00:02:44,550

Twilight when the sky isn't quite so

68

00:02:49,040 --> 00:02:46,680

dark to eliminate glare from the moon

69

00:02:52,250 --> 00:02:49,050

itself yes there is a morning Twilight

70

00:02:54,200 --> 00:02:52,260

also known as dawn approximately one

71

00:02:56,570 --> 00:02:54,210

week after the June seventeenth that's

72

00:02:59,420 --> 00:02:56,580

tomorrow last quarter moon it'll be a

73

00:03:01,880 --> 00:02:59,430

new moon in Earth's sky but a full Earth

74

00:03:04,670 --> 00:03:01,890

in the moon sky and you can see a

75

00:03:07,850 --> 00:03:04,680

graphic of that later at UFO headline

76
00:03:09,770 --> 00:03:07,860
news calm all the charts and skies your

77
00:03:12,860 --> 00:03:09,780
heart could want here's the bottom line

78
00:03:15,470 --> 00:03:12,870
enjoy the June 17th tomorrow last

79
00:03:17,750 --> 00:03:15,480
quarter moon and know that the Earth and

80
00:03:20,240 --> 00:03:17,760
Moon are like mirrors to each other in

81
00:03:23,450 --> 00:03:20,250
that when we see a last quarter moon in

82
00:03:26,900 --> 00:03:23,460
our sky those on the moon would see our

83
00:03:30,350 --> 00:03:26,910
first quarter earth cool thought here's

84
00:03:35,120 --> 00:03:30,360
a natural-born segue headline Jupiter

85
00:03:38,000 --> 00:03:35,130
now has 69 moons our local gas giant has

86
00:03:41,240 --> 00:03:38,010
two more natural satellites added to its

87
00:03:44,510 --> 00:03:41,250
roster Caleb Scharf has authored this

88
00:03:47,870 --> 00:03:44,520

for Scientific American calm a column

89

00:03:50,480 --> 00:03:47,880

called life unbounded indeed and the

90

00:03:54,680 --> 00:03:50,490

article begins the planet Jupiter is a

91

00:03:57,680 --> 00:03:54,690

beast 317 times the mass of the earth

92

00:04:00,080 --> 00:03:57,690

mostly made of metallic hydrogen and at

93

00:04:03,290 --> 00:04:00,090

the center of an astonishing collective

94

00:04:05,840 --> 00:04:03,300

of orbiting natural bodies in fact

95

00:04:09,050 --> 00:04:05,850

Jupiter's satellites form a shrunken

96

00:04:11,210 --> 00:04:09,060

version of a full planetary system from

97

00:04:13,400 --> 00:04:11,220

the tightly bound larger Galilean moons

98

00:04:16,760 --> 00:04:13,410

they're orbiting in something called the

99

00:04:19,160 --> 00:04:16,770

laplacian mean motion resonances and

100

00:04:22,400 --> 00:04:19,170

that's for instance akin to places like

101
00:04:23,570 --> 00:04:22,410
Trappist one to that remarkable array of

102
00:04:25,610 --> 00:04:23,580
smaller

103
00:04:29,179 --> 00:04:25,620
let's that encircle this world out to

104
00:04:31,249 --> 00:04:29,189
more than 30 million kilometers these

105
00:04:33,490 --> 00:04:31,259
bodies circled Jupiter in anywhere from

106
00:04:37,070 --> 00:04:33,500
about seven hours to an astonishing

107
00:04:39,200 --> 00:04:37,080
thousand days later gentle listeners you

108
00:04:41,809 --> 00:04:39,210
can find some graphics a fascinating set

109
00:04:44,929 --> 00:04:41,819
of time-lapse images of the large

110
00:04:48,110 --> 00:04:44,939
Galilean moons during Juno's approach in

111
00:04:51,499 --> 00:04:48,120
early 2016 until recently the catalogued

112
00:04:54,110 --> 00:04:51,509
satellites totaled 67 in number but only

113
00:04:56,809 --> 00:04:54,120

the innermost 15 of these orbit Jupiter

114

00:04:59,029 --> 00:04:56,819

in a pro grade sense in other words

115

00:05:02,779 --> 00:04:59,039

pro-grade the direction of the planet

116

00:05:04,969 --> 00:05:02,789

spin the rest are retro grade and likely

117

00:05:07,189 --> 00:05:04,979

captured object in other words other

118

00:05:09,439 --> 00:05:07,199

pieces of the solar system's solid

119

00:05:12,350 --> 00:05:09,449

inventory that strayed into Jupiter's

120

00:05:15,050 --> 00:05:12,360

gravitational grasp that population of

121

00:05:17,869 --> 00:05:15,060

outer moons is mostly small stuff only a

122

00:05:20,600 --> 00:05:17,879

few are 20 to 60 kilometers in diameter

123

00:05:23,869 --> 00:05:20,610

most are barely 1 to 2 kilometers in

124

00:05:27,649 --> 00:05:23,879

size and increasingly difficult to spot

125

00:05:30,200 --> 00:05:27,659

and now astronomers Scott Shepard David

126
00:05:32,330 --> 00:05:30,210
Tolin and chadwick trujillo have added

127
00:05:35,570 --> 00:05:32,340
two more that brings Jupiter's moon

128
00:05:38,689 --> 00:05:35,580
count to 69 these additions are also

129
00:05:40,850 --> 00:05:38,699
about one to two kilometers in size they

130
00:05:43,279 --> 00:05:40,860
were spotted in images as part of a

131
00:05:45,019 --> 00:05:43,289
survey for much more distant objects

132
00:05:47,959 --> 00:05:45,029
objects out in the Kuiper belt

133
00:05:50,450 --> 00:05:47,969
Jupiter just happened to be conveniently

134
00:05:53,360 --> 00:05:50,460
close in the sky at the time so some

135
00:05:59,050 --> 00:05:53,370
serendipity there these two new moons

136
00:06:02,570 --> 00:05:59,060
have names there s / 2016 j1 and s /

137
00:06:05,600 --> 00:06:02,580
2017 j1 they're about 21 million

138
00:06:08,659 --> 00:06:05,610

kilometres and 24 million kilometres

139

00:06:10,939 --> 00:06:08,669

from Jupiter by themselves these small

140

00:06:13,070 --> 00:06:10,949

satellites don't amount to much but they

141

00:06:15,559 --> 00:06:13,080

are a vivid reminder of the sheer

142

00:06:18,550 --> 00:06:15,569

abundance of material out there in our

143

00:06:22,100 --> 00:06:18,560

solar system and of Jupiter's royal

144

00:06:24,829 --> 00:06:22,110

gravitational status yep King Jupiter

145

00:06:27,379 --> 00:06:24,839

here's an update on what seems to be a

146

00:06:29,420 --> 00:06:27,389

continuing saga NASA trying to launch

147

00:06:29,930 --> 00:06:29,430

those colourful clouds over the East

148

00:06:32,540 --> 00:06:29,940

Coast

149

00:06:34,189 --> 00:06:32,550

well they've been working on it again

150

00:06:36,589 --> 00:06:34,199

weather hasn't cooperated

151
00:06:37,439 --> 00:06:36,599
we found an update written by Mike wal

152
00:06:41,159 --> 00:06:37,449
for space

153
00:06:43,439 --> 00:06:41,169
komm it's as of June 15th NASA's next

154
00:06:45,510 --> 00:06:43,449
attempt to launch a small sounding

155
00:06:48,329 --> 00:06:45,520
rocket to create glowing clouds in the

156
00:06:51,390 --> 00:06:48,339
night sky will occur no earlier than

157
00:06:53,820 --> 00:06:51,400
Saturday night that's the 17th liftoff

158
00:06:56,219 --> 00:06:53,830
from NASA's Wallops Flight Facility from

159
00:06:59,070 --> 00:06:56,229
Wallops Island Virginia is now scheduled

160
00:07:02,070 --> 00:06:59,080
for sometime between 905 p.m. Eastern

161
00:07:04,739 --> 00:07:02,080
Daylight Time and 9:20 p.m. Eastern

162
00:07:05,640 --> 00:07:04,749
Daylight Time originally if you recall

163
00:07:07,980 --> 00:07:05,650

gentle listeners

164

00:07:09,749 --> 00:07:07,990

there's a small NASA rocket they're

165

00:07:12,149 --> 00:07:09,759

going to try to create those colorful

166

00:07:14,429 --> 00:07:12,159

artificial clouds it looks as though the

167

00:07:17,100 --> 00:07:14,439

entire United States East Coast might

168

00:07:19,709 --> 00:07:17,110

get a treat provided this works the

169

00:07:22,290 --> 00:07:19,719

mission is designed to test a new multi

170

00:07:24,329 --> 00:07:22,300

canister ejection system that should

171

00:07:27,360 --> 00:07:24,339

allow researchers to gather data over a

172

00:07:28,920 --> 00:07:27,370

wider area than has been possible the

173

00:07:31,829 --> 00:07:28,930

Rockets total flight time will be about

174

00:07:34,189 --> 00:07:31,839

eight minutes missions main payload will

175

00:07:37,379 --> 00:07:34,199

hit the Atlantic Ocean about 90 miles

176

00:07:39,179 --> 00:07:37,389

145 kilometers off the Virginia coast

177

00:07:41,579 --> 00:07:39,189

they're not going to even try to recover

178

00:07:43,679 --> 00:07:41,589

it the mission has been trying to get

179

00:07:46,050 --> 00:07:43,689

off the ground for some time now we'll

180

00:07:48,719 --> 00:07:46,060

be following this and keep you posted at

181

00:07:51,389 --> 00:07:48,729

UFO headline news at inception radio

182

00:07:54,029 --> 00:07:51,399

network the esteemed journal ARS

183

00:07:58,079 --> 00:07:54,039

technica carries this article with

184

00:08:00,779 --> 00:07:58,089

credit for Erik Berger headline a spy

185

00:08:04,439 --> 00:08:00,789

satellite buzzed the space station this

186

00:08:06,869 --> 00:08:04,449

month and no one knows why about six

187

00:08:09,329 --> 00:08:06,879

weeks ago SpaceX launched a spy

188

00:08:11,850 --> 00:08:09,339

satellite into low-earth orbit from

189

00:08:15,179 --> 00:08:11,860

launch complex 39a at NASA's Kennedy

190

00:08:17,610 --> 00:08:15,189

Space Center as is normal for National

191

00:08:19,409 --> 00:08:17,620

Reconnaissance Office launches not much

192

00:08:22,170 --> 00:08:19,419

information was divulged about the

193

00:08:25,709 --> 00:08:22,180

satellites final orbit or its specific

194

00:08:27,300 --> 00:08:25,719

purpose in space however a dedicated

195

00:08:29,670 --> 00:08:27,310

group of ground-based observers

196

00:08:32,339 --> 00:08:29,680

continued to track the satellite after

197

00:08:35,610 --> 00:08:32,349

it reached outer space and then

198

00:08:38,250 --> 00:08:35,620

something curious happened in early June

199

00:08:40,610 --> 00:08:38,260

the satellite made an extremely close

200

00:08:43,170 --> 00:08:40,620

pass to the International Space Station

201
00:08:45,960 --> 00:08:43,180
one of the amateur satellite Watchers a

202
00:08:49,980 --> 00:08:45,970
fellow named Ted Moll skin' estimated

203
00:08:50,879 --> 00:08:49,990
that this pass on June 3rd ad to be 4.4

204
00:08:53,939 --> 00:08:50,889
kilometers

205
00:08:56,400 --> 00:08:53,949
above the station another marko long

206
00:08:59,189 --> 00:08:56,410
broke pegged the distance at 6.4

207
00:09:01,590 --> 00:08:59,199
kilometers moles can later wrote quote

208
00:09:05,400 --> 00:09:01,600
I'm inclined to believe that the close

209
00:09:06,919 --> 00:09:05,410
conjunctions between USA 276 and the

210
00:09:09,599 --> 00:09:06,929
International Space Station are

211
00:09:12,349 --> 00:09:09,609
intentional but this remains unproven

212
00:09:15,299 --> 00:09:12,359
and far from certain end quotes in

213
00:09:17,400 --> 00:09:15,309

recent days the journal Ars Technica has

214

00:09:19,889 --> 00:09:17,410

run these observations by several

215

00:09:22,289 --> 00:09:19,899

officials and informed sources they're

216

00:09:25,199 --> 00:09:22,299

credible these officials say and they're

217

00:09:27,030 --> 00:09:25,209

very curious indeed said one astronaut

218

00:09:30,329 --> 00:09:27,040

who's commanded the International Space

219

00:09:33,090 --> 00:09:30,339

Station quote this is strange I don't

220

00:09:34,530 --> 00:09:33,100

really believe in coincidences but I

221

00:09:36,509 --> 00:09:34,540

can't really think of anything that

222

00:09:39,599 --> 00:09:36,519

would be worth highlighting a close

223

00:09:41,819 --> 00:09:39,609

approach sent quotes one expert in

224

00:09:44,129 --> 00:09:41,829

satellite launches and tracking Jonathan

225

00:09:46,499 --> 00:09:44,139

McDowell said of the satellites close

226

00:09:48,319 --> 00:09:46,509

approach to the station quote it is not

227

00:09:51,090 --> 00:09:48,329

normal end quote

228

00:09:52,889 --> 00:09:51,100

while it remains possible that this near

229

00:09:54,840 --> 00:09:52,899

miss was a coincidence due to the

230

00:09:57,499 --> 00:09:54,850

satellite being launched into a similar

231

00:10:00,030 --> 00:09:57,509

orbit that would represent quote gross

232

00:10:01,650 --> 00:10:00,040

incompetence and quotes on the part of

233

00:10:04,139 --> 00:10:01,660

the National Reconnaissance Office he

234

00:10:06,600 --> 00:10:04,149

said like the astronaut McDowell

235

00:10:07,409 --> 00:10:06,610

downplayed the likelihood of it being a

236

00:10:11,159 --> 00:10:07,419

coincidence

237

00:10:14,639 --> 00:10:11,169

Erik Berger posits another possibility a

238

00:10:16,829 --> 00:10:14,649

deliberate close flyby perhaps to test

239

00:10:18,960 --> 00:10:16,839

or calibrate an onboard sensor to

240

00:10:20,970 --> 00:10:18,970

observe something or some kind of

241

00:10:23,970 --> 00:10:20,980

activity on the International Space

242

00:10:26,249 --> 00:10:23,980

Station quote the deliberate explanation

243

00:10:28,379 --> 00:10:26,259

seems more likely except that I would

244

00:10:30,479 --> 00:10:28,389

have expected the satellite to maneuver

245

00:10:32,699 --> 00:10:30,489

after the encounter end quotes McDowell

246

00:10:36,059 --> 00:10:32,709

said quote but it seems to have stayed

247

00:10:38,549 --> 00:10:36,069

in the same orbit and quotes another

248

00:10:40,529 --> 00:10:38,559

question if the maneuver was deliberate

249

00:10:42,629 --> 00:10:40,539

is whether the United States government

250

00:10:44,699 --> 00:10:42,639

informed Russia or other international

251
00:10:46,739 --> 00:10:44,709
partners on the space station the

252
00:10:49,349 --> 00:10:46,749
Russian segment of the station controls

253
00:10:51,449 --> 00:10:49,359
thrusters those thrusters generally are

254
00:10:53,909 --> 00:10:51,459
used to maneuver the station away from

255
00:10:57,150 --> 00:10:53,919
orbital debris so such coordination

256
00:10:59,639 --> 00:10:57,160
might seem prudent in regard to these

257
00:11:01,559 --> 00:10:59,649
questions so far the United States

258
00:11:04,560 --> 00:11:01,569
government has declined to provide

259
00:11:06,480 --> 00:11:04,570
answers a NASA spokesmen offered

260
00:11:09,330 --> 00:11:06,490
to look into the matter back on Monday

261
00:11:12,390 --> 00:11:09,340
but as of Wednesday of this week there

262
00:11:13,800 --> 00:11:12,400
was nothing to say a query sent to

263
00:11:16,340 --> 00:11:13,810

public affairs at the National

264

00:11:18,540 --> 00:11:16,350

Reconnaissance Office went unanswered

265

00:11:21,450 --> 00:11:18,550

Eric Berger is going to update this

266

00:11:24,180 --> 00:11:21,460

story upon receiving official response

267

00:11:26,580 --> 00:11:24,190

if any and we'll keep you posted

268

00:11:28,770 --> 00:11:26,590

Eric Berger is the senior space editor

269

00:11:31,620 --> 00:11:28,780

at ARS technica he covers everything

270

00:11:35,000 --> 00:11:31,630

from astronomy to private space to wonky

271

00:11:37,500 --> 00:11:35,010

NASA policy his words he's a certified

272

00:11:39,630 --> 00:11:37,510

meteorologist into the bargain living in

273

00:11:41,550 --> 00:11:39,640

Houston Texas you can follow him on

274

00:11:45,030 --> 00:11:41,560

Twitter and you'll find those links

275

00:11:46,770 --> 00:11:45,040

later at UFO headline news calm how

276

00:11:50,310 --> 00:11:46,780

about we buckle into that shuttle now

277

00:11:52,860 --> 00:11:50,320

and take our UFO stalker calm road trip

278

00:11:56,370 --> 00:11:52,870

for Friday it's a UFO sighting in

279

00:11:59,820 --> 00:11:56,380

Blackpool England that spelled BL ACK

280

00:12:03,090 --> 00:11:59,830

pol L move on gave it a case number

281

00:12:05,220 --> 00:12:03,100

eight four three four one the date of

282

00:12:07,110 --> 00:12:05,230

the sighting is the second of June but

283

00:12:09,890 --> 00:12:07,120

it didn't get reported till June 12th

284

00:12:13,910 --> 00:12:09,900

here's what the witness says in summary

285

00:12:17,600 --> 00:12:13,920

very bright round oval shaped object

286

00:12:21,050 --> 00:12:17,610

increased in brightness never going dull

287

00:12:24,120 --> 00:12:21,060

illuminating and extra white light

288

00:12:27,690 --> 00:12:24,130

observed over the horizon travelling

289

00:12:29,580 --> 00:12:27,700

inland constant straight path and that's

290

00:12:31,590 --> 00:12:29,590

just the summary under sighting

291

00:12:34,460 --> 00:12:31,600

specifics the viewing distance was

292

00:12:37,620 --> 00:12:34,470

rather close initially 501 feet

293

00:12:40,590 --> 00:12:37,630

eventually one mile the altitude of this

294

00:12:43,200 --> 00:12:40,600

object was over 500 feet and there was

295

00:12:45,840 --> 00:12:43,210

no cloud cover the sighting duration was

296

00:12:47,610 --> 00:12:45,850

10 minutes and four seconds but the

297

00:12:50,760 --> 00:12:47,620

object features are simply listed as

298

00:12:54,120 --> 00:12:50,770

none the object flight path straight

299

00:12:56,190 --> 00:12:54,130

line path its shape here is listed as

300

00:12:59,670 --> 00:12:56,200

sphere above in the summary we read

301
00:13:01,710 --> 00:12:59,680
round and oval pretty close and we must

302
00:13:03,990 --> 00:13:01,720
weather the weather whatever because

303
00:13:06,390 --> 00:13:04,000
there's none listed here but here's the

304
00:13:09,690 --> 00:13:06,400
account I had travelled to Blackpool

305
00:13:12,510 --> 00:13:09,700
with a friend on the Friday night of the

306
00:13:15,000 --> 00:13:12,520
6th of June after booking into the hotel

307
00:13:18,330 --> 00:13:15,010
we went for a drink in the hotel bar it

308
00:13:20,570 --> 00:13:18,340
was by then about 20 to 30 hours

309
00:13:22,920 --> 00:13:20,580
another guest was already in the bar I

310
00:13:25,590 --> 00:13:22,930
required a cigarette and so I went

311
00:13:28,380 --> 00:13:25,600
outside to the hotel front it was facing

312
00:13:30,840 --> 00:13:28,390
the sea facing the beach I could see

313
00:13:32,850 --> 00:13:30,850

that the sky was clear there was a full

314

00:13:35,550 --> 00:13:32,860

moon to my left and I presume it was

315

00:13:38,579 --> 00:13:35,560

Venus shining slightly lower to the left

316

00:13:41,670 --> 00:13:38,589

of the moon the sky had the usual stars

317

00:13:45,200 --> 00:13:41,680

twinkling away and I observed this odd

318

00:13:47,250 --> 00:13:45,210

high altitude plane or planes moving

319

00:13:50,250 --> 00:13:47,260

comparatively slowly going through the

320

00:13:52,320 --> 00:13:50,260

sky I was taken by the exceptionally

321

00:13:55,740 --> 00:13:52,330

bright object coming over the horizon

322

00:13:58,019 --> 00:13:55,750

then from the sea this object shone

323

00:14:00,990 --> 00:13:58,029

brilliantly it moved at a faster pace

324

00:14:03,570 --> 00:14:01,000

than the planes I'd seen earlier so I

325

00:14:05,130 --> 00:14:03,580

watched this for a minute or so the

326

00:14:07,560 --> 00:14:05,140

other guests came out for a smoke as

327

00:14:10,590 --> 00:14:07,570

well at that point and I showed this

328

00:14:12,750 --> 00:14:10,600

object to him and we both stood watching

329

00:14:15,269 --> 00:14:12,760

this thing coming over our heads

330

00:14:17,820 --> 00:14:15,279

it was round shape and then it would

331

00:14:20,190 --> 00:14:17,830

appear to be oval and it glowed with

332

00:14:23,070 --> 00:14:20,200

this intensity that out shown all the

333

00:14:25,860 --> 00:14:23,080

other stars above it it was at least $\frac{3}{4}$

334

00:14:28,230 --> 00:14:25,870

times brighter than the moon we could

335

00:14:30,480 --> 00:14:28,240

see planes flying high above this they

336

00:14:33,420 --> 00:14:30,490

were going at a snail's pace compared to

337

00:14:36,720 --> 00:14:33,430

how fast this object moved it maintained

338

00:14:38,640 --> 00:14:36,730

a constant pathway straight forwards the

339

00:14:40,380 --> 00:14:38,650

other guests surmised that it could be

340

00:14:43,020 --> 00:14:40,390

the space station traveling through the

341

00:14:43,680 --> 00:14:43,030

nighttime sky and although this is

342

00:14:46,350 --> 00:14:43,690

possible

343

00:14:49,170 --> 00:14:46,360

I felt the altitude was far too low for

344

00:14:51,870 --> 00:14:49,180

such a flight path we both continued to

345

00:14:54,270 --> 00:14:51,880

watch this object travel inwards until

346

00:14:58,350 --> 00:14:54,280

it was no longer visible so at that

347

00:15:01,079 --> 00:14:58,360

point we re-entered the hotel again

348

00:15:04,290 --> 00:15:01,089

no punch line but the confirmation of a

349

00:15:06,120 --> 00:15:04,300

mutual sighting always good hang on

350

00:15:08,720 --> 00:15:06,130

we're going to shift our trajectory

351

00:15:11,190 --> 00:15:08,730

across a lot of water and hover over

352

00:15:15,180 --> 00:15:11,200

Toronto Ontario Canada

353

00:15:17,010 --> 00:15:15,190

it's MUFON case number 8 4 3 9 9 for

354

00:15:19,350 --> 00:15:17,020

those tracking and identification

355

00:15:23,390 --> 00:15:19,360

purposes the date of this sighting was

356

00:15:27,329 --> 00:15:23,400

June 3rd 2017 it was reported June 15th

357

00:15:30,150 --> 00:15:27,339

2017 in summary witnessed a gray

358

00:15:32,160 --> 00:15:30,160

cylinder slowly rotate counterclockwise

359

00:15:35,250 --> 00:15:32,170

I was lying in a

360

00:15:37,590 --> 00:15:35,260

Park in downtown Ontario alerted two

361

00:15:41,280 --> 00:15:37,600

people I was with visually tracked

362

00:15:45,360 --> 00:15:41,290

object to northeast object reflected

363

00:15:48,150 --> 00:15:45,370

light as it spun citing specifics offer

364

00:15:51,360 --> 00:15:48,160

a viewing distance unknown the altitude

365

00:15:53,939 --> 00:15:51,370

over 500 feet the sky was clear no cloud

366

00:15:57,360 --> 00:15:53,949

cover sighting duration two minutes

367

00:16:00,150 --> 00:15:57,370

object features none object flight path

368

00:16:03,569 --> 00:16:00,160

straight line path and this object had a

369

00:16:06,480 --> 00:16:03,579

cylindrical shape again no weather but

370

00:16:08,400 --> 00:16:06,490

here's the sighting the three of us were

371

00:16:11,629 --> 00:16:08,410

in a Toronto Park that overlooks the

372

00:16:14,189 --> 00:16:11,639

downtown core I was lying on my back and

373

00:16:17,310 --> 00:16:14,199

directly above me spotted a gray

374

00:16:20,639 --> 00:16:17,320

cylinder in the sky it was slowly

375

00:16:22,769 --> 00:16:20,649

revolving backwards I wanted at the

376

00:16:25,860 --> 00:16:22,779

object with my arm and asked my friends

377

00:16:27,930 --> 00:16:25,870

what is that so my friends and I

378

00:16:31,579 --> 00:16:27,940

continued to visually track this object

379

00:16:34,769 --> 00:16:31,589

on its northward flight path the object

380

00:16:36,750 --> 00:16:34,779

rotated about every 10 seconds and we

381

00:16:39,389 --> 00:16:36,760

could clearly see the side reflecting

382

00:16:42,449 --> 00:16:39,399

light from the Sun I lost sight of the

383

00:16:43,710 --> 00:16:42,459

object over the horizon when it passed I

384

00:16:48,750 --> 00:16:43,720

asked what the time was

385

00:16:51,420 --> 00:16:48,760

it was 7:45 p.m. June 3rd 2017 and I

386

00:16:55,680 --> 00:16:51,430

then commented that we had just seen a

387

00:16:58,980 --> 00:16:55,690

UFO it was upsetting this thing defied

388

00:17:02,910 --> 00:16:58,990

all principles of flight it had no wings

389

00:17:04,890 --> 00:17:02,920

no sound no engine I could say this has

390

00:17:08,579 --> 00:17:04,900

been a life-changing event for me and

391

00:17:12,770 --> 00:17:08,589

now when I see photos of UFOs I have to

392

00:17:15,630 --> 00:17:12,780

believe these photos might be real Oh a

393

00:17:18,740 --> 00:17:15,640

life-changing incident a different point

394

00:17:22,409 --> 00:17:18,750

of view an unhinged paradigm perhaps

395

00:17:25,020 --> 00:17:22,419

fascinating from Canada let's swing on

396

00:17:27,900 --> 00:17:25,030

down to the state of Pennsylvania city

397

00:17:30,180 --> 00:17:27,910

of Yardley that's the location for MUFON

398

00:17:31,799 --> 00:17:30,190

case number eight four three four zero

399

00:17:35,460 --> 00:17:31,809

date of the sighting

400

00:17:40,470 --> 00:17:35,470

six eleven 2017 date submitted six

401
00:17:43,370 --> 00:17:40,480
twelve 2017 summary woke at 4:00 a.m.

402
00:17:45,930 --> 00:17:43,380
looked out window bright light in sky

403
00:17:49,019 --> 00:17:45,940
pulsing array of

404
00:17:52,740 --> 00:17:49,029
different colored lights hovered moved

405
00:17:56,549 --> 00:17:52,750
Southwest at 11:00 p.m. saw same light

406
00:17:58,379 --> 00:17:56,559
in sky again and there is video which

407
00:18:01,649 --> 00:17:58,389
you can find gentle listeners later at

408
00:18:04,279 --> 00:18:01,659
UFO headline news calm sighting

409
00:18:07,499 --> 00:18:04,289
specifics viewing distance over one mile

410
00:18:10,440 --> 00:18:07,509
altitude 500 feet or less sighting

411
00:18:13,379 --> 00:18:10,450
duration two hours but the object

412
00:18:15,269 --> 00:18:13,389
features are still listed as unknown the

413
00:18:17,850 --> 00:18:15,279

flight path is described as having been

414

00:18:20,519 --> 00:18:17,860

hovering and then path and this object

415

00:18:22,980 --> 00:18:20,529

was shaped like a disc there's weather

416

00:18:26,220 --> 00:18:22,990

the maximum temperature for Yardley

417

00:18:28,289 --> 00:18:26,230

Pennsylvania 92 degrees Fahrenheit 33

418

00:18:31,080 --> 00:18:28,299

degrees Celsius dropping down to a

419

00:18:33,629 --> 00:18:31,090

minimum temperature of 66 degrees

420

00:18:36,389 --> 00:18:33,639

Fahrenheit which translates to 19

421

00:18:39,389 --> 00:18:36,399

degrees Celsius those visibility factors

422

00:18:43,139 --> 00:18:39,399

they all stood the same 10 miles 16

423

00:18:45,869 --> 00:18:43,149

kilometers the conditions no abnormal

424

00:18:50,879 --> 00:18:45,879

weather conditions here's the account

425

00:18:53,789 --> 00:18:50,889

first person on 611 at 4:00 a.m. I woke

426
00:18:56,279 --> 00:18:53,799
and looked out a second-story window to

427
00:18:59,610 --> 00:18:56,289
see a very bright light I was thinking

428
00:19:02,850 --> 00:18:59,620
it was a planet I continued to watch as

429
00:19:05,340 --> 00:19:02,860
this object hovered slightly moving it

430
00:19:07,850 --> 00:19:05,350
seemed to pulse and at this point I knew

431
00:19:11,310 --> 00:19:07,860
it was too close to be a star or planet

432
00:19:14,149 --> 00:19:11,320
the sighting was very bright I believe I

433
00:19:17,879 --> 00:19:14,159
saw white red and blue green light

434
00:19:20,549 --> 00:19:17,889
rotating on this thing or pulsing the

435
00:19:22,560 --> 00:19:20,559
object looked disc like it was a good

436
00:19:25,320 --> 00:19:22,570
distance above the tree lines planes

437
00:19:27,840 --> 00:19:25,330
passed within that area and I could tell

438
00:19:30,180 --> 00:19:27,850

this wasn't a plane and it certainly was

439

00:19:33,419 --> 00:19:30,190

not a helicopter I could tell by the

440

00:19:36,389 --> 00:19:33,429

size and movement I woke my husband

441

00:19:39,240 --> 00:19:36,399

about 4:45 a.m. and he also thought this

442

00:19:41,519 --> 00:19:39,250

was very strange by this time the Sun

443

00:19:44,610 --> 00:19:41,529

was coming up the object was just as

444

00:19:47,850 --> 00:19:44,620

bright and visible we went to bed at 5

445

00:19:50,850 --> 00:19:47,860

a.m. and when I woke at 5:30 3:00 a.m.

446

00:19:53,129 --> 00:19:50,860

this object was further southwest I

447

00:19:56,549 --> 00:19:53,139

tried taking photos in video with an

448

00:19:58,910 --> 00:19:56,559

iPhone it didn't come out that well that

449

00:20:03,410 --> 00:19:58,920

evening my husband and I saw the same

450

00:20:05,090 --> 00:20:03,420

object in the same spot in the sky we're

451
00:20:08,030 --> 00:20:05,100
thinking this must be something

452
00:20:10,370 --> 00:20:08,040
explainable or we're losing it it was

453
00:20:13,820 --> 00:20:10,380
around 11:00 p.m. the object was there

454
00:20:16,610 --> 00:20:13,830
in the southeast sky again in that same

455
00:20:19,790 --> 00:20:16,620
spot it appeared very bright and it

456
00:20:21,830 --> 00:20:19,800
hovered I told my husband I couldn't

457
00:20:24,740 --> 00:20:21,840
take this it's too weird so I headed

458
00:20:28,220 --> 00:20:24,750
upstairs for bed as I got into bed and

459
00:20:30,770 --> 00:20:28,230
looked at this object it took off it

460
00:20:33,230 --> 00:20:30,780
flew unlike anything I've ever seen no

461
00:20:36,620 --> 00:20:33,240
plane and it seemed to go on its side

462
00:20:39,890 --> 00:20:36,630
and then go horizontal this thing moved

463
00:20:42,470 --> 00:20:39,900

very fast up and over our home and to

464

00:20:44,690 --> 00:20:42,480

the northwest my husband also saw this

465

00:20:48,200 --> 00:20:44,700

we both ran outside we could hear a

466

00:20:51,560 --> 00:20:48,210

faint humming buzzing sound and we are

467

00:20:54,200 --> 00:20:51,570

both in awe we chatted about this for a

468

00:20:56,510 --> 00:20:54,210

minute and went back to bed to my

469

00:21:00,830 --> 00:20:56,520

amazement I'm really crazy

470

00:21:03,800 --> 00:21:00,840

I saw the strangest part a very bright

471

00:21:06,560 --> 00:21:03,810

ball of whitish yellow light to the east

472

00:21:08,960 --> 00:21:06,570

of that original object in the sky it

473

00:21:11,420 --> 00:21:08,970

was big it was above the trees five

474

00:21:14,180 --> 00:21:11,430

hundred feet or so hovering moving

475

00:21:17,810 --> 00:21:14,190

irregularly up and then in a blink

476

00:21:19,820 --> 00:21:17,820

this disappeared all we can offer at

477

00:21:22,160 --> 00:21:19,830

this point gentle listeners if if this

478

00:21:24,380 --> 00:21:22,170

witness is losing it well the witness

479

00:21:26,780 --> 00:21:24,390

and her husband are in very good company

480

00:21:29,990 --> 00:21:26,790

lots and lots of folks are seeing things

481

00:21:33,140 --> 00:21:30,000

they just absolutely cannot explain by

482

00:21:35,510 --> 00:21:33,150

reality as we know it it's just a snap

483

00:21:38,270 --> 00:21:35,520

just a blink from Pennsylvania to the

484

00:21:41,210 --> 00:21:38,280

state of Ohio so let's do it let's we're

485

00:21:44,420 --> 00:21:41,220

move on case number 8 4 3 0 8 happened

486

00:21:47,210 --> 00:21:44,430

it happened on the 10th of June 2017 and

487

00:21:50,390 --> 00:21:47,220

got a same-day report here's what our

488

00:21:53,480 --> 00:21:50,400

witness offers by way of summary worked

489

00:21:56,570 --> 00:21:53,490

on jets seen them flying training at

490

00:22:00,170 --> 00:21:56,580

night this did not have proper wing

491

00:22:03,950 --> 00:22:00,180

lighting more than one object definitely

492

00:22:07,220 --> 00:22:03,960

not falling object path to straight no

493

00:22:08,780 --> 00:22:07,230

emissions there are photos and there's

494

00:22:10,520 --> 00:22:08,790

some video footage that will be

495

00:22:12,230 --> 00:22:10,530

available later connected with this

496

00:22:15,260 --> 00:22:12,240

sighting you can find it at you

497

00:22:17,750 --> 00:22:15,270

Oh headline news calm the viewing

498

00:22:20,210 --> 00:22:17,760

distance listed here is unknown as is

499

00:22:23,290 --> 00:22:20,220

the altitude this sighting duration was

500

00:22:25,820 --> 00:22:23,300

only 20 seconds the object features

501
00:22:28,460 --> 00:22:25,830
understandably get the report of unknown

502
00:22:31,610 --> 00:22:28,470
the flight path was a straight-line path

503
00:22:34,450 --> 00:22:31,620
and this object had a sphere shape it's

504
00:22:37,490 --> 00:22:34,460
a short report but here we go

505
00:22:40,549 --> 00:22:37,500
went out to grab the cellphone charger

506
00:22:44,210 --> 00:22:40,559
out of my scooter glovebox and saw this

507
00:22:46,700 --> 00:22:44,220
object or objects hauling ass across the

508
00:22:49,060 --> 00:22:46,710
sky I just had a little bit of time to

509
00:22:51,950 --> 00:22:49,070
snap the picture and just a bit of video

510
00:22:54,830 --> 00:22:51,960
but it appeared to be more than one

511
00:22:57,890 --> 00:22:54,840
object before I lost the sight line the

512
00:23:02,120 --> 00:22:57,900
trees got in the way and the move was

513
00:23:04,520 --> 00:23:02,130

fast I worked on f-16s I have enough

514

00:23:07,790 --> 00:23:04,530

knowledge of planes and helicopters to

515

00:23:11,299 --> 00:23:07,800

know this wasn't a plane and it was not

516

00:23:12,040 --> 00:23:11,309

arcing like falling space objects end of

517

00:23:14,630 --> 00:23:12,050

report

518

00:23:17,210 --> 00:23:14,640

once again we have that intriguing

519

00:23:20,150 --> 00:23:17,220

aspect to this report the witness has

520

00:23:22,610 --> 00:23:20,160

been around worked on f-16s at cetera

521

00:23:26,200 --> 00:23:22,620

knows planes and helicopters enough to

522

00:23:29,210 --> 00:23:26,210

rule this out as being any of those

523

00:23:32,150 --> 00:23:29,220

let's go to the state of Indiana city of

524

00:23:37,100 --> 00:23:32,160

go sport perhaps Gosport they spell it

525

00:23:39,250 --> 00:23:37,110

geo SPO RT it's the location for MUFON

526
00:23:42,260 --> 00:23:39,260
case number eight four three three nine

527
00:23:46,340 --> 00:23:42,270
this took place June 11th this year and

528
00:23:49,490 --> 00:23:46,350
was reported June 12th summary observed

529
00:23:52,520 --> 00:23:49,500
four or five star like spheres changing

530
00:23:55,570 --> 00:23:52,530
direction then stopping starting then

531
00:23:58,370 --> 00:23:55,580
changing direction at incredible speeds

532
00:23:59,030 --> 00:23:58,380
under the categories for citing

533
00:24:01,280 --> 00:23:59,040
specifics

534
00:24:04,870 --> 00:24:01,290
there's viewing distance in this case it

535
00:24:08,600 --> 00:24:04,880
was 501 feet to one mile altitude over

536
00:24:12,130 --> 00:24:08,610
500 feet nope no cloud cover sighting

537
00:24:15,140 --> 00:24:12,140
duration 10 seconds object features none

538
00:24:17,900 --> 00:24:15,150

object flight path path with directional

539

00:24:20,330 --> 00:24:17,910

change and this object shape is reported

540

00:24:23,530 --> 00:24:20,340

to have been star like there was weather

541

00:24:26,150 --> 00:24:23,540

over Gosport Indiana and it was recorded

542

00:24:29,330 --> 00:24:26,160

maximum temperature 89 degrees

543

00:24:32,300 --> 00:24:29,340

Fahrenheit 32 degrees Celsius minimum

544

00:24:35,540 --> 00:24:32,310

temperature 63 degrees Fahrenheit 17

545

00:24:38,240 --> 00:24:35,550

degrees Celsius the maximum mean and

546

00:24:41,060 --> 00:24:38,250

minimum visibilities all the same 10

547

00:24:42,440 --> 00:24:41,070

miles 16 kilometers and at the time of

548

00:24:44,570 --> 00:24:42,450

this event there didn't seem to be

549

00:24:46,970 --> 00:24:44,580

anything abnormal about the weather

550

00:24:47,900 --> 00:24:46,980

conditions it seemed to go something

551
00:24:51,620 --> 00:24:47,910
like this

552
00:24:53,390 --> 00:24:51,630
I was in Gosport Indiana I was taking my

553
00:24:56,900 --> 00:24:53,400
dog out to do her business

554
00:25:00,230 --> 00:24:56,910
I looked up toward the stars slightly

555
00:25:02,780 --> 00:25:00,240
east and almost straight above my head I

556
00:25:06,140 --> 00:25:02,790
caught sight of what at first I thought

557
00:25:10,670 --> 00:25:06,150
was a satellite moments later I observed

558
00:25:13,130 --> 00:25:10,680
3 or 4 more orbs in that same area of

559
00:25:16,370 --> 00:25:13,140
sky they seem to have no certain paths

560
00:25:18,470 --> 00:25:16,380
they change directions at will these

561
00:25:21,410 --> 00:25:18,480
objects did this for a matter of about

562
00:25:24,650 --> 00:25:21,420
five minutes and as I was watching him

563
00:25:27,830 --> 00:25:24,660

they disappeared one by one until only

564

00:25:30,800 --> 00:25:27,840

one remained now this one was on a

565

00:25:33,560 --> 00:25:30,810

heading towards the south it stopped and

566

00:25:36,050 --> 00:25:33,570

then it dimmed changed direction and

567

00:25:39,200 --> 00:25:36,060

started heading north as if toward

568

00:25:40,910 --> 00:25:39,210

Indianapolis at this point the thing

569

00:25:43,520 --> 00:25:40,920

looked as though it had landing lights

570

00:25:45,590 --> 00:25:43,530

as it proceeded north and after about a

571

00:25:48,800 --> 00:25:45,600

minute it became extremely bright

572

00:25:50,900 --> 00:25:48,810

brighter and bigger than any star in the

573

00:25:53,420 --> 00:25:50,910

night sky it stopped

574

00:25:56,630 --> 00:25:53,430

flickered a few times and then this

575

00:25:59,330 --> 00:25:56,640

object totally disappeared I have

576

00:26:01,370 --> 00:25:59,340

observed these same types of orbs at

577

00:26:05,300 --> 00:26:01,380

least five times in my life

578

00:26:07,490 --> 00:26:05,310

dating back to New Mexico in 1975 this

579

00:26:10,400 --> 00:26:07,500

is my first encounter here in the state

580

00:26:12,800 --> 00:26:10,410

of Indiana I wonder why this so

581

00:26:14,300 --> 00:26:12,810

frequently happens to me it seems

582

00:26:17,390 --> 00:26:14,310

sometimes as though they're putting on a

583

00:26:20,000 --> 00:26:17,400

show for me perhaps it's because of my

584

00:26:22,430 --> 00:26:20,010

love for the beauty of a night sky and I

585

00:26:26,630 --> 00:26:22,440

just look at the skies more often than

586

00:26:28,660 --> 00:26:26,640

most not sure oh what a wonderful report

587

00:26:31,580 --> 00:26:28,670

what an interesting set of experiences

588

00:26:33,590 --> 00:26:31,590

yep we count in the company of our

589

00:26:37,400 --> 00:26:33,600

friends some people who have observed

590

00:26:39,799 --> 00:26:37,410

orbs what we've observed is it's time to

591

00:26:42,529 --> 00:26:39,809

fly don't forget to join us tomorrow

592

00:26:45,469 --> 00:26:42,539

Saturday gentle listeners as we go off

593

00:26:48,019 --> 00:26:45,479

the beaten path with the UFO headline

594

00:26:50,149 --> 00:26:48,029

news here at inception radio network

595

00:26:53,869 --> 00:26:50,159

till then take care

596

00:26:56,180 --> 00:26:53,879

got a zip because that's a wrap thanks

597

00:26:58,459 --> 00:26:56,190

for listening to UFO headline news at

598

00:27:01,820 --> 00:26:58,469

inception radio network you can follow

599

00:27:05,060 --> 00:27:01,830

today's broadcast UFO headline news comm
