

Inception Radio Network

UFO Headline News Weekend of
Saturday June 17th/Sunday June 18th,
2017

1
00:00:06,019 --> 00:00:03,080
hello it's the weekend of Saturday June

2
00:00:08,390 --> 00:00:06,029
17th and Sunday June 18th you are

3
00:00:10,790 --> 00:00:08,400
listening to inception Radio Network

4
00:00:15,350 --> 00:00:10,800
home of the fringe majority this is

5
00:00:18,439 --> 00:00:15,360
Carol Karl with the UFO headline news so

6
00:00:20,390 --> 00:00:18,449
how about a few astronomy essentials for

7
00:00:23,150 --> 00:00:20,400
the weekend the folks at earth sky

8
00:00:25,820 --> 00:00:23,160
dot-org serve this up it gets a byline

9
00:00:29,390 --> 00:00:25,830
for larry sessions and the headline is

10
00:00:31,130 --> 00:00:29,400
the guardians of the pole well it's

11
00:00:33,889 --> 00:00:31,140
those two stars we talked about last

12
00:00:36,380 --> 00:00:33,899
week coach our band / Cod they're part

13
00:00:39,200 --> 00:00:36,390

of the famous Little Dipper asterism in

14

00:00:42,229 --> 00:00:39,210

that constellation Ursa Minor the lesser

15

00:00:45,020 --> 00:00:42,239

bear they mark the outer part of the cup

16

00:00:47,260 --> 00:00:45,030

or ladle of the Little Dipper that part

17

00:00:50,209 --> 00:00:47,270

farthest from Polaris the North Star

18

00:00:53,720 --> 00:00:50,219

coach up is designated officially as

19

00:00:56,930 --> 00:00:53,730

beta Ursa my Norris and for God is gamma

20

00:00:58,819 --> 00:00:56,940

Ursa my Norris their proximity to that

21

00:01:01,639 --> 00:00:58,829

famous Polaris might cause you to

22

00:01:05,000 --> 00:01:01,649

overlook them but coach oven fur cod

23

00:01:07,280 --> 00:01:05,010

have their own claims to fame but before

24

00:01:09,859 --> 00:01:07,290

we get to said claims here's how to see

25

00:01:12,140 --> 00:01:09,869

them because they're so close to Polaris

26
00:01:14,450 --> 00:01:12,150
and the North celestial Pole coach oven

27
00:01:16,249 --> 00:01:14,460
fur Cod can be observed every night of

28
00:01:18,130 --> 00:01:16,259
the year even from the heavily populated

29
00:01:20,450 --> 00:01:18,140
areas of the northern hemisphere

30
00:01:23,719 --> 00:01:20,460
sometimes they can be seen as far south

31
00:01:25,940 --> 00:01:23,729
as brazil much of africa and far

32
00:01:28,190 --> 00:01:25,950
northern australia for northern

33
00:01:30,440 --> 00:01:28,200
observers these stars can be seen at any

34
00:01:32,300 --> 00:01:30,450
hour of the night any night of the year

35
00:01:36,109 --> 00:01:32,310
but they're best seen when they're high

36
00:01:38,780 --> 00:01:36,119
overhead on midsummer evenings finding

37
00:01:41,420 --> 00:01:38,790
this pair is easy if you look first for

38
00:01:43,520 --> 00:01:41,430

the Big Dipper and then Polaris using

39

00:01:44,030 --> 00:01:43,530

the two outer stars in the bowl of the

40

00:01:46,490 --> 00:01:44,040

Big Dipper

41

00:01:48,920 --> 00:01:46,500

you find Polaris and that marks the end

42

00:01:52,010 --> 00:01:48,930

of the handle of the Little Dipper

43

00:01:54,080 --> 00:01:52,020

hang on Coach oven for COD are in the

44

00:01:56,810 --> 00:01:54,090

bowl of the Little Dipper

45

00:01:59,569 --> 00:01:56,820

along with Polaris coach oven for COD

46

00:02:01,389 --> 00:01:59,579

are the only stars of Ursa Minor easily

47

00:02:04,219 --> 00:02:01,399

visible from most urban locations

48

00:02:07,249 --> 00:02:04,229

interestingly these two stars were used

49

00:02:10,040 --> 00:02:07,259

in early times as a timepiece circling

50

00:02:12,250 --> 00:02:10,050

steadily as they do around Polaris just

51
00:02:13,970 --> 00:02:12,260
like the hands of a celestial clock

52
00:02:16,339 --> 00:02:13,980
although they appear

53
00:02:19,640 --> 00:02:16,349
together in our sky coach oven for COD

54
00:02:22,430 --> 00:02:19,650
aren't related in any way in space cow

55
00:02:24,589 --> 00:02:22,440
job lies about 130 light-years distance

56
00:02:25,280 --> 00:02:24,599
while fur Cod is nearly four times

57
00:02:28,640 --> 00:02:25,290
farther

58
00:02:31,670 --> 00:02:28,650
that's about 480 light-years both are

59
00:02:34,100 --> 00:02:31,680
giant stars larger and brighter than our

60
00:02:36,979 --> 00:02:34,110
Sun but they're not as hot as the Sun

61
00:02:41,000 --> 00:02:36,989
Coe job is roughly 40 times larger in

62
00:02:44,150 --> 00:02:41,010
diameter and 500 times more energetic in

63
00:02:47,240 --> 00:02:44,160

fact if Co job was placed where our Sun

64

00:02:49,940 --> 00:02:47,250

is now it would extend halfway to the

65

00:02:52,250 --> 00:02:49,950

planet Mercury there's a researcher

66

00:02:54,470 --> 00:02:52,260

David darling he says that Co job has

67

00:02:57,559 --> 00:02:54,480

exhausted its core supply of hydrogen

68

00:03:00,590 --> 00:02:57,569

and he thinks it's an evolving orange

69

00:03:03,770 --> 00:03:00,600

giant star possibly at that stage of

70

00:03:06,860 --> 00:03:03,780

helium burning for Cod's not as large

71

00:03:09,259 --> 00:03:06,870

it's a mere 15 times larger than our Sun

72

00:03:12,259 --> 00:03:09,269

but because it's much more massive and

73

00:03:16,520 --> 00:03:12,269

hotter than our star it pumps out energy

74

00:03:19,310 --> 00:03:16,530

at 1,100 times the rate actually we

75

00:03:21,590 --> 00:03:19,320

should refer to it as fer cod a says

76

00:03:25,160 --> 00:03:21,600

Larry sessions to distinguish it from a

77

00:03:28,099 --> 00:03:25,170

nearby faint star for Cod B these two

78

00:03:30,920 --> 00:03:28,109

aren't related gravitationally either by

79

00:03:33,470 --> 00:03:30,930

the way for COD B is barely visible to

80

00:03:37,490 --> 00:03:33,480

the unaided eye even under very good

81

00:03:41,090 --> 00:03:37,500

dark sky conditions visually Co job is a

82

00:03:45,050 --> 00:03:41,100

magnitude 2.07 and for COD is more than

83

00:03:47,060 --> 00:03:45,060

twice as dim just a magnitude 3 both are

84

00:03:49,160 --> 00:03:47,070

easily seen from dark locations if

85

00:03:51,530 --> 00:03:49,170

you've got low light pollution that's

86

00:03:54,110 --> 00:03:51,540

key now here's something about the

87

00:03:56,870 --> 00:03:54,120

history and mythology of Co job and per

88

00:03:59,750 --> 00:03:56,880

Cod since they continually circle around

89

00:04:02,120 --> 00:03:59,760

Polaris near that celestial North Pole

90

00:04:05,509 --> 00:04:02,130

kocha band / Cod are often called

91

00:04:08,030 --> 00:04:05,519

guardians of the pole the name Co job

92

00:04:10,400 --> 00:04:08,040

it's Arabic it's derived from a title

93

00:04:12,979 --> 00:04:10,410

apparently referring to its nearness to

94

00:04:15,860 --> 00:04:12,989

the North celestial Pole and in fact

95

00:04:19,129 --> 00:04:15,870

about 3,000 years ago it was closer to

96

00:04:21,379 --> 00:04:19,139

the pole than Polaris at times

97

00:04:24,110 --> 00:04:21,389

coach oven for COD were seen as two

98

00:04:26,360 --> 00:04:24,120

calves because they keep as close to the

99

00:04:27,740 --> 00:04:26,370

pole as calves do to their mother

100

00:04:30,850 --> 00:04:27,750

the name Furka

101
00:04:33,320 --> 00:04:30,860
and by the way that spelled Phe RK ad

102
00:04:37,280 --> 00:04:33,330
appears to be derived from an Arabic

103
00:04:38,300 --> 00:04:37,290
term for CAF so there we go so here's

104
00:04:41,120 --> 00:04:38,310
the bottom line

105
00:04:43,670 --> 00:04:41,130
coach AB and for COD are part of that

106
00:04:46,580 --> 00:04:43,680
famous Little Dipper asterism in the

107
00:04:48,890 --> 00:04:46,590
constellation Ursa Minor the lesser bear

108
00:04:51,610 --> 00:04:48,900
it's the weekend see if you can find

109
00:04:55,250 --> 00:04:51,620
time to get out there and take a look

110
00:04:58,280 --> 00:04:55,260
speaking of things of antiquity let's do

111
00:05:00,950 --> 00:04:58,290
a slight shift of geolocation now and go

112
00:05:04,370 --> 00:05:00,960
from ancient Persia and the stars to

113
00:05:06,680 --> 00:05:04,380

ancient Egypt where Egyptian

114

00:05:10,490 --> 00:05:06,690

archaeologists just discovered 10

115

00:05:13,159 --> 00:05:10,500

ancient royal tombs and mummies this

116

00:05:15,680 --> 00:05:13,169

gets a byline for sage Lazaro she writes

117

00:05:18,860 --> 00:05:15,690

for The Observer this is one of two

118

00:05:21,590 --> 00:05:18,870

short articles very connected in the

119

00:05:23,710 --> 00:05:21,600

history of Egyptology so many ancient

120

00:05:26,510 --> 00:05:23,720

tombs have been located and identified

121

00:05:28,940 --> 00:05:26,520

that it was thought further fines would

122

00:05:31,340 --> 00:05:28,950

be rare but during the first week of

123

00:05:33,440 --> 00:05:31,350

June it was reported that a team of

124

00:05:36,409 --> 00:05:33,450

archaeologists just made a momentous

125

00:05:38,540 --> 00:05:36,419

discovery Egypt's Ministry of

126

00:05:41,469 --> 00:05:38,550

Antiquities has announced it has

127

00:05:43,820 --> 00:05:41,479

uncovered ten previously hidden tombs

128

00:05:46,460 --> 00:05:43,830

the tombs which are located near the

129

00:05:48,620 --> 00:05:46,470

Agha Konma Cilium on the west bank of

130

00:05:51,050 --> 00:05:48,630

the Aswan are from what is called

131

00:05:53,450 --> 00:05:51,060

Egypt's late period meaning they're

132

00:05:56,300 --> 00:05:53,460

likely around 2500 years old

133

00:05:59,300 --> 00:05:56,310

enter Nasser Salama he's general

134

00:06:01,670 --> 00:05:59,310

director of Aswan and Nubia antiquities

135

00:06:03,560 --> 00:06:01,680

he believes this newly found set of

136

00:06:06,440 --> 00:06:03,570

tombs could be part of something much

137

00:06:09,650 --> 00:06:06,450

bigger he has evidence to believe they

138

00:06:11,900 --> 00:06:09,660

could be an extension of the West as one

139

00:06:14,719 --> 00:06:11,910

necropolis which was discovered during

140

00:06:17,960 --> 00:06:14,729

the 20th century it houses several royal

141

00:06:21,170 --> 00:06:17,970

Aswin tombs from the old middle and new

142

00:06:22,940 --> 00:06:21,180

kingdoms and what's more these newly

143

00:06:23,980 --> 00:06:22,950

discovered tombs are quite similar to

144

00:06:27,140 --> 00:06:23,990

each other

145

00:06:29,450 --> 00:06:27,150

archaeologists Ayad Allawi notes that

146

00:06:32,480 --> 00:06:29,460

they have similar architectural designs

147

00:06:34,490 --> 00:06:32,490

which includes staircases carved into

148

00:06:37,520 --> 00:06:34,500

the rock that leads to the entrance of

149

00:06:40,850 --> 00:06:37,530

the tombs just inside that entrance were

150

00:06:42,020 --> 00:06:40,860

simple rooms several coffins and mummies

151
00:06:43,670 --> 00:06:42,030
on

152
00:06:46,730 --> 00:06:43,680
preliminary details have been released

153
00:06:49,070 --> 00:06:46,740
by the ministry and another excavation

154
00:06:50,690 --> 00:06:49,080
is going to be required the team's next

155
00:06:52,880 --> 00:06:50,700
mission will be to study what's been

156
00:06:55,300 --> 00:06:52,890
discovered inside the tombs and carry

157
00:06:58,070 --> 00:06:55,310
out all the necessary conservation work

158
00:06:59,450 --> 00:06:58,080
there's a slideshow you can flip through

159
00:07:02,060 --> 00:06:59,460
that's connected to this article

160
00:07:04,760 --> 00:07:02,070
there'll be a link later at UFO headline

161
00:07:07,310 --> 00:07:04,770
news calm and now for the companion

162
00:07:10,150 --> 00:07:07,320
piece also with credit for sage Lazaro

163
00:07:13,460 --> 00:07:10,160

also the observer Egyptian

164

00:07:17,680 --> 00:07:13,470

archaeologists discovered 2500 year old

165

00:07:20,650 --> 00:07:17,690

tomb with over 300 artifacts inside

166

00:07:23,540 --> 00:07:20,660

Egyptian archaeologists uncovered 10

167

00:07:26,990 --> 00:07:23,550

ancient royal tombs and even some

168

00:07:30,920 --> 00:07:27,000

mummies and now another discovery into

169

00:07:32,720 --> 00:07:30,930

ancient Egypt has been made Mahmud Afifi

170

00:07:35,020 --> 00:07:32,730

head of the ancient Egyptian antiquities

171

00:07:37,580 --> 00:07:35,030

sector of the Ministry of Antiquities

172

00:07:41,030 --> 00:07:37,590

announced that finding it's a

173

00:07:44,780 --> 00:07:41,040

Hellenistic tomb in the L shot B area in

174

00:07:47,090 --> 00:07:44,790

Alexandria what's more over 300

175

00:07:50,690 --> 00:07:47,100

artifacts including pottery vessels a

176

00:07:53,930 --> 00:07:50,700

terracotta statue and lamps made of clay

177

00:07:56,600 --> 00:07:53,940

were found inside the Hellenistic period

178

00:07:58,970 --> 00:07:56,610

refers to that time in ancient Greek and

179

00:08:02,030 --> 00:07:58,980

Mediterranean history between the death

180

00:08:05,030 --> 00:08:02,040

of Alexander the Great that was in 323

181

00:08:08,950 --> 00:08:05,040

BC and the emergence of the Roman Empire

182

00:08:12,230 --> 00:08:08,960

in 31 BC that makes this tomb at least

183

00:08:14,120 --> 00:08:12,240

2,500 years old the general director of

184

00:08:17,330 --> 00:08:14,130

Antiquities of Western Delta and

185

00:08:19,340 --> 00:08:17,340

Alexandria Mustafa Rushdie explained

186

00:08:21,860 --> 00:08:19,350

that the tomb was dated based on its

187

00:08:24,020 --> 00:08:21,870

architectural style and the remains of

188

00:08:25,790 --> 00:08:24,030

the pottery they found inside here's

189

00:08:28,910 --> 00:08:25,800

just a snippet from that official

190

00:08:30,830 --> 00:08:28,920

announcement quote Mustafa Rushdie said

191

00:08:33,380 --> 00:08:30,840

that the discovered tomb consists of

192

00:08:35,840 --> 00:08:33,390

four halls each one of them with some

193

00:08:38,240 --> 00:08:35,850

burial holes decorated with colorful

194

00:08:40,550 --> 00:08:38,250

decorative elements and writings in

195

00:08:43,670 --> 00:08:40,560

ancient Greek which showed funerary

196

00:08:45,980 --> 00:08:43,680

phrases and quotes now during the next

197

00:08:48,260 --> 00:08:45,990

archaeological season this mission is

198

00:08:51,350 --> 00:08:48,270

going to study those funerary phrases

199

00:08:54,920 --> 00:08:51,360

and try to identify the owners of the

200

00:08:56,000 --> 00:08:54,930

tombs we'll keep you posted and for

201

00:08:58,670 --> 00:08:56,010

those of you gentlemen

202

00:09:02,120 --> 00:08:58,680

who just can't get enough of pyramids

203

00:09:04,730 --> 00:09:02,130

well here are some more but this time

204

00:09:08,630 --> 00:09:04,740

well here's the headline this ancient

205

00:09:09,910 --> 00:09:08,640

Maya pyramid was destroyed to build a

206

00:09:12,500 --> 00:09:09,920

road

207

00:09:16,190 --> 00:09:12,510

Allison McNerney writes this for The

208

00:09:18,890 --> 00:09:16,200

Daily Beast if the road to hell is paved

209

00:09:21,320 --> 00:09:18,900

with good intentions then the road to

210

00:09:25,460 --> 00:09:21,330

progress is paved with the destruction

211

00:09:26,830 --> 00:09:25,470

of ancient civilizations back in May of

212

00:09:29,300 --> 00:09:26,840

2013

213

00:09:31,820 --> 00:09:29,310

archaeologists in Belize were horrified

214

00:09:35,060 --> 00:09:31,830

to discover that a construction crew had

215

00:09:38,270 --> 00:09:35,070

gutted a major Maya archeological site

216

00:09:41,330 --> 00:09:38,280

in order to use the pyramid stone for

217

00:09:43,430 --> 00:09:41,340

road work while authorities were aware

218

00:09:46,070 --> 00:09:43,440

that a small amount of looting had taken

219

00:09:47,600 --> 00:09:46,080

place they didn't realize the extent of

220

00:09:51,080 --> 00:09:47,610

the destruction until it was too late

221

00:09:54,500 --> 00:09:51,090

the largest pyramid on the site of nomal

222

00:09:57,620 --> 00:09:54,510

that spelled NO h mu l it's also known

223

00:10:00,380 --> 00:09:57,630

as no mole to words it was the most

224

00:10:04,000 --> 00:10:00,390

important Maya site in Belize now

225

00:10:07,040 --> 00:10:04,010

reduced to just a core of rubble over

226

00:10:08,870 --> 00:10:07,050

3,000 years ago the Maya inhabited a

227

00:10:11,480 --> 00:10:08,880

series of communities that encompassed

228

00:10:14,870 --> 00:10:11,490

much of the Yucatan Peninsula right down

229

00:10:16,790 --> 00:10:14,880

to present-day Central America where the

230

00:10:19,250 --> 00:10:16,800

Maya people settled in villages and

231

00:10:22,940 --> 00:10:19,260

developed agricultural methods as early

232

00:10:27,830 --> 00:10:22,950

as 1500 BC their civilization flourished

233

00:10:29,510 --> 00:10:27,840

from approximately 300 to 660 AD during

234

00:10:31,850 --> 00:10:29,520

the height of their reign they were one

235

00:10:34,310 --> 00:10:31,860

of the most advanced civilizations in

236

00:10:36,140 --> 00:10:34,320

the Western Hemisphere in addition to

237

00:10:38,690 --> 00:10:36,150

building complex architectural

238

00:10:40,990 --> 00:10:38,700

settlements like that of normal the Maya

239

00:10:43,790 --> 00:10:41,000

were also known for advanced astronomy

240

00:10:45,770 --> 00:10:43,800

their discoveries were often fused with

241

00:10:48,560 --> 00:10:45,780

their architectural designs in

242

00:10:50,570 --> 00:10:48,570

incredible ways they developed a system

243

00:10:53,930 --> 00:10:50,580

of written language and the creation of

244

00:10:57,680 --> 00:10:53,940

decorative arts they invented the idea

245

00:10:59,420 --> 00:10:57,690

of the number zero and developed many of

246

00:11:01,610 --> 00:10:59,430

the foods that modern-day Urbanists

247

00:11:06,080 --> 00:11:01,620

couldn't imagine living without think

248

00:11:08,360 --> 00:11:06,090

chocolate avocados and coffee normal was

249

00:11:10,310 --> 00:11:08,370

built early in the Maya period in the

250

00:11:13,340 --> 00:11:10,320

northern region of what is now

251
00:11:16,100 --> 00:11:13,350
on a limestone ridge overlooking the

252
00:11:18,620 --> 00:11:16,110
Honda River by the time the Maya were in

253
00:11:21,139 --> 00:11:18,630
the thick of regional domination normal

254
00:11:23,150 --> 00:11:21,149
had become a local hub of agriculture

255
00:11:25,579 --> 00:11:23,160
and commerce the site originally

256
00:11:28,129 --> 00:11:25,589
encompassed around 12 square miles but

257
00:11:31,129 --> 00:11:28,139
the center of community life was the

258
00:11:33,290 --> 00:11:31,139
Maya equivalent of a downtown a central

259
00:11:35,840 --> 00:11:33,300
area where all the best temples and

260
00:11:37,879 --> 00:11:35,850
architectural features were housed and a

261
00:11:40,970 --> 00:11:37,889
court where sports competitions were

262
00:11:43,939 --> 00:11:40,980
held historians believed normal was home

263
00:11:46,490 --> 00:11:43,949

to around 10,000 people during its peak

264

00:11:48,620 --> 00:11:46,500

and that by the time what was once

265

00:11:51,139 --> 00:11:48,630

largely an economically integrated

266

00:11:54,650 --> 00:11:51,149

community had become a divided one

267

00:11:56,930 --> 00:11:54,660

eventually the poor inhabitants settled

268

00:11:59,780 --> 00:11:56,940

in the agricultural outskirts while the

269

00:12:02,840 --> 00:11:59,790

elite clustered near the main ceremonial

270

00:12:05,120 --> 00:12:02,850

center and it was in this prestigious

271

00:12:07,610 --> 00:12:05,130

City Center that the main pyramid of

272

00:12:10,100 --> 00:12:07,620

normal was built early in the life of the

273

00:12:11,960 --> 00:12:10,110

village there are plenty of other

274

00:12:14,389 --> 00:12:11,970

ceremonial mounds in those two areas

275

00:12:16,670 --> 00:12:14,399

that comprise the central hub they were

276

00:12:19,340 --> 00:12:16,680

connected by an elevated walkway but of

277

00:12:23,180 --> 00:12:19,350

course they were small compared to this

278

00:12:25,759 --> 00:12:23,190

60-foot main temple archaeologists are

279

00:12:28,759 --> 00:12:25,769

imagining now that this building was the

280

00:12:30,920 --> 00:12:28,769

spiritual and ceremonial center of the

281

00:12:34,280 --> 00:12:30,930

community and that it probably contained

282

00:12:36,199 --> 00:12:34,290

multiple rooms some used as tombs others

283

00:12:39,170 --> 00:12:36,209

of which might have been occupied by

284

00:12:41,990 --> 00:12:39,180

important people in the village before

285

00:12:43,879 --> 00:12:42,000

the temple Aetna mol met its fate it was

286

00:12:48,019 --> 00:12:43,889

one of the largest existing Maya

287

00:12:50,300 --> 00:12:48,029

pyramids in belives James aw he's the

288

00:12:52,519 --> 00:12:50,310

director of the Belize Institute of

289

00:12:55,040 --> 00:12:52,529

Archaeology reflected on the

290

00:12:57,860 --> 00:12:55,050

significance of this he pointed out that

291

00:13:00,439 --> 00:12:57,870

it was incredible quote just to realize

292

00:13:02,449 --> 00:13:00,449

that the ancient Maya acquired all this

293

00:13:04,819 --> 00:13:02,459

building material to erect these

294

00:13:07,759 --> 00:13:04,829

buildings using nothing more than stone

295

00:13:09,590 --> 00:13:07,769

tools they queried the stone carrying

296

00:13:12,470 --> 00:13:09,600

the material on their heads

297

00:13:15,110 --> 00:13:12,480

end quote but this heroic effort meant

298

00:13:17,480 --> 00:13:15,120

nothing to that construction company who

299

00:13:21,620 --> 00:13:17,490

set their sights on some free Road work

300

00:13:23,240 --> 00:13:21,630

materials back in May of 2013 the main

301

00:13:26,870 --> 00:13:23,250

temple at normal stone

302

00:13:28,910 --> 00:13:26,880

for nearly 2,300 years surviving the

303

00:13:33,050 --> 00:13:28,920

relatively sudden and still debated

304

00:13:34,940 --> 00:13:33,060

decline of the Maya Empire in 1100 it

305

00:13:36,770 --> 00:13:34,950

withstood the invasion of European

306

00:13:40,100 --> 00:13:36,780

colonists and the rapid development

307

00:13:42,530 --> 00:13:40,110

that's occurred in modern times but what

308

00:13:45,140 --> 00:13:42,540

it couldn't weather was one companies

309

00:13:47,650 --> 00:13:45,150

need for a shortcut to acquiring some

310

00:13:50,450 --> 00:13:47,660

quick and easy limestone

311

00:13:53,060 --> 00:13:50,460

despite national laws protecting

312

00:13:56,720 --> 00:13:53,070

archaeological sites such as this normal

313

00:13:58,220 --> 00:13:56,730

sits on privately owned land while its

314

00:14:02,090 --> 00:13:58,230

historic contents were technically

315

00:14:04,790 --> 00:14:02,100

protected the land itself was not so

316

00:14:07,130 --> 00:14:04,800

when a crew of bulldozers and backhoes

317

00:14:10,520 --> 00:14:07,140

moved in they said about their nefarious

318

00:14:11,990 --> 00:14:10,530

deeds undetected for several days by the

319

00:14:14,570 --> 00:14:12,000

time their actions attracted the

320

00:14:18,220 --> 00:14:14,580

attention of local archaeologists it was

321

00:14:21,470 --> 00:14:18,230

too late the damage was irreversible

322

00:14:24,230 --> 00:14:21,480

archaeologist John Morris told 7 News

323

00:14:26,930 --> 00:14:24,240

Billy's quote this is one of the worst

324

00:14:29,510 --> 00:14:26,940

that I have seen in my entire 25 years

325

00:14:31,850 --> 00:14:29,520

of archaeology in Belize we can't

326

00:14:34,400 --> 00:14:31,860

salvage what's happened out here it is

327

00:14:37,430 --> 00:14:34,410

an incredible display of ignorance and

328

00:14:39,860 --> 00:14:37,440

quotes James awe had a much more

329

00:14:41,900 --> 00:14:39,870

visceral response equating the discovery

330

00:14:44,960 --> 00:14:41,910

of the theft to quote being punched in

331

00:14:47,180 --> 00:14:44,970

the stomach and quotes and continued to

332

00:14:49,220 --> 00:14:47,190

say quote these guys knew this was an

333

00:14:52,400 --> 00:14:49,230

ancient structure it's just bloody

334

00:14:55,940 --> 00:14:52,410

laziness and quotes the culprit turned

335

00:14:58,010 --> 00:14:55,950

out to be the DeMars stone company it's

336

00:15:00,890 --> 00:14:58,020

a local construction company headed by a

337

00:15:03,040 --> 00:15:00,900

husband-and-wife team the husband at one

338

00:15:05,420 --> 00:15:03,050

point had political ambitions

339

00:15:07,820 --> 00:15:05,430

despite their flagrant flouting of the

340

00:15:09,950 --> 00:15:07,830

law even after archaeologists caught on

341

00:15:12,230 --> 00:15:09,960

to their misdeeds and the continued

342

00:15:15,050 --> 00:15:12,240

denial of those owners that they were

343

00:15:17,540 --> 00:15:15,060

aware of what was going on I believes

344

00:15:19,850 --> 00:15:17,550

court brought charges against the

345

00:15:22,430 --> 00:15:19,860

responsible parties during the

346

00:15:24,710 --> 00:15:22,440

subsequent trial archaeologist John

347

00:15:27,770 --> 00:15:24,720

Morris testified that their actions had

348

00:15:30,800 --> 00:15:27,780

caused and quote incalculable and quotes

349

00:15:33,380 --> 00:15:30,810

loss on the country and the judge agreed

350

00:15:36,050 --> 00:15:33,390

he found them guilty of two of the three

351

00:15:37,040 --> 00:15:36,060

charges the judge was also willing to

352

00:15:40,639 --> 00:15:37,050

put a price tag on

353

00:15:42,860 --> 00:15:40,649

their crimes and on April 24 2016 the

354

00:15:46,820 --> 00:15:42,870

owners and their company's manager were

355

00:15:49,009 --> 00:15:46,830

fined a total of \$24,000 and while they

356

00:15:51,980 --> 00:15:49,019

didn't get away scot-free it's hard to

357

00:15:53,300 --> 00:15:51,990

imagine that this minimal sum serves as

358

00:15:55,639 --> 00:15:53,310

a deterrent for other companies

359

00:15:57,340 --> 00:15:55,649

scavengers who might be thinking about

360

00:15:59,960 --> 00:15:57,350

doing that same thing

361

00:16:03,110 --> 00:15:59,970

Milly's has a history of archaeological

362

00:16:04,490 --> 00:16:03,120

theft and limestone is a highly prized

363

00:16:07,460 --> 00:16:04,500

material when it comes to the

364

00:16:10,670 --> 00:16:07,470

construction of roads after all why take

365

00:16:12,889 --> 00:16:10,680

the time to query your own stone when

366

00:16:15,259 --> 00:16:12,899

you can just grab a dump truck and reap

367

00:16:18,949 --> 00:16:15,269

the benefits from the thousands of years

368

00:16:21,650 --> 00:16:18,959

old work of the Maya and as for no mole

369

00:16:24,819 --> 00:16:21,660

the site is still an archaeological ruin

370

00:16:26,870 --> 00:16:24,829

albeit one that is now more ruin than

371

00:16:29,259 --> 00:16:26,880

archeological when it comes to the

372

00:16:31,850 --> 00:16:29,269

building that used to be its centerpiece

373

00:16:33,920 --> 00:16:31,860

rather than being a testament to the

374

00:16:36,380 --> 00:16:33,930

rich culture and advanced civilizations

375

00:16:39,650 --> 00:16:36,390

of the Maya it holds a meaning of a

376

00:16:41,810 --> 00:16:39,660

different sort today said dr. Alan Moore

377

00:16:44,780 --> 00:16:41,820

an archaeologist at the institute of

378

00:16:47,660 --> 00:16:44,790

archaeology quote it's a monument of

379

00:16:50,389 --> 00:16:47,670

ignorance and unfortunately that's the

380

00:16:52,910 --> 00:16:50,399

way it is now we will probably have to

381

00:16:57,230 --> 00:16:52,920

look at this and say this is a good

382

00:17:00,110 --> 00:16:57,240

example of what not to do and quote okay

383

00:17:02,990 --> 00:17:00,120

so here's the part where we go off the

384

00:17:06,319 --> 00:17:03,000

beaten path even more let's transition

385

00:17:09,650 --> 00:17:06,329

from ancient civilizations to start up

386

00:17:13,640 --> 00:17:09,660

civilizations in space here's the

387

00:17:17,059 --> 00:17:13,650

headline space nation as Gardea will

388

00:17:19,669 --> 00:17:17,069

launch a satellite this summer this gets

389

00:17:22,370 --> 00:17:19,679

a byline for dave Mosier who writes it

390

00:17:24,949 --> 00:17:22,380

for Business Insider there are some

391

00:17:28,340 --> 00:17:24,959

bullet points to begin with a nonprofit

392

00:17:31,900 --> 00:17:28,350

organization called as Gardea is trying

393

00:17:37,310 --> 00:17:31,910

to form the first nation in space as

394

00:17:39,590 --> 00:17:37,320

Gardea and that spelled ASG AR dia will

395

00:17:42,710 --> 00:17:39,600

launch a small satellite in the summer

396

00:17:46,340 --> 00:17:42,720

of 2017 as a means of establishing its

397

00:17:48,110 --> 00:17:46,350

presence in orbit hundreds of thousands

398

00:17:50,690 --> 00:17:48,120

of people have registered to become

399

00:17:53,630 --> 00:17:50,700

citizens and will soon vote on a car

400

00:17:55,880 --> 00:17:53,640

institution however experts are

401
00:17:58,670 --> 00:17:55,890
uncertain if asgardian can be

402
00:18:01,730 --> 00:17:58,680
combination and it's unclear how it will

403
00:18:05,330 --> 00:18:01,740
fund or build that human space colony

404
00:18:07,160 --> 00:18:05,340
the space Kingdom of Oz Gardea has

405
00:18:09,950 --> 00:18:07,170
announced what might be a significant

406
00:18:13,820 --> 00:18:09,960
step towards becoming recognized as the

407
00:18:16,130 --> 00:18:13,830
first nation to orbit Earth the founders

408
00:18:19,040 --> 00:18:16,140
of as Gardea which is named after Norse

409
00:18:21,680 --> 00:18:19,050
mythology's city in the skies hoped to

410
00:18:24,530 --> 00:18:21,690
create a peaceful spacefaring nation

411
00:18:27,050 --> 00:18:24,540
that Minds asteroids and defends planet

412
00:18:31,220 --> 00:18:27,060
Earth from dangerous meteorites space

413
00:18:33,680 --> 00:18:31,230

debris and other threats the existence

414

00:18:37,190 --> 00:18:33,690

of as Gardea was announced in October of

415

00:18:39,350 --> 00:18:37,200

2016 and subsequently garnered hundreds

416

00:18:42,800 --> 00:18:39,360

of thousands of the citizenship

417

00:18:45,860 --> 00:18:42,810

applications for now as Gardea is a

418

00:18:48,530 --> 00:18:45,870

non-profit non-governmental organization

419

00:18:51,200 --> 00:18:48,540

based out of vienna austria the group

420

00:18:53,900 --> 00:18:51,210

aims to help its roughly 200,000 future

421

00:18:56,630 --> 00:18:53,910

citizens form a recognizable government

422

00:18:59,270 --> 00:18:56,640

though many complex steps remain before

423

00:19:03,020 --> 00:18:59,280

asgardian ever become a real nation if

424

00:19:05,030 --> 00:19:03,030

it ever does the founding members said

425

00:19:07,970 --> 00:19:05,040

during a June 13th press briefing in

426
00:19:11,840 --> 00:19:07,980
Hong Kong they'll soon launch as Gardea

427
00:19:14,390 --> 00:19:11,850
- one the proto nation's first satellite

428
00:19:17,180 --> 00:19:14,400
quote the first presence of the

429
00:19:19,880 --> 00:19:17,190
Asgardian nation we can now say will be

430
00:19:22,700 --> 00:19:19,890
in space this year and quotes that's

431
00:19:25,130 --> 00:19:22,710
from Jeffrey member the CEO of a

432
00:19:27,020 --> 00:19:25,140
satellite company called nano racks

433
00:19:29,390 --> 00:19:27,030
gentle listeners you may be familiar

434
00:19:32,690 --> 00:19:29,400
with that they also do contracts for

435
00:19:36,140 --> 00:19:32,700
NASA NanoRacks was contracted to lead

436
00:19:37,730 --> 00:19:36,150
the Asgardian - one project and they

437
00:19:40,040 --> 00:19:37,740
said during the briefing that the

438
00:19:42,830 --> 00:19:40,050

satellite quote may turn out to be the

439

00:19:45,710 --> 00:19:42,840

most important and lasting idea that

440

00:19:49,040 --> 00:19:45,720

we're working with and quotes the

441

00:19:51,710 --> 00:19:49,050

spacecraft well it's a nano satellite or

442

00:19:54,410 --> 00:19:51,720

a nano Sat it's going to be about half

443

00:19:56,750 --> 00:19:54,420

the size of a loaf of bread it'll weigh

444

00:19:59,780 --> 00:19:56,760

about as much as a newborn baby

445

00:20:02,840 --> 00:19:59,790

and carry data uploaded by Asgardian

446

00:20:04,490 --> 00:20:02,850

citizens this nano sat will launch

447

00:20:06,110 --> 00:20:04,500

aboard orbital

448

00:20:08,720 --> 00:20:06,120

TK's upcoming mission to the

449

00:20:12,260 --> 00:20:08,730

International Space Station on September

450

00:20:14,780 --> 00:20:12,270

12 2017 riding inside a cargo spacecraft

451
00:20:18,440 --> 00:20:14,790
that NASA has contracted to deliver

452
00:20:20,030 --> 00:20:18,450
supplies to astronauts in space once the

453
00:20:24,080 --> 00:20:20,040
spacecraft docks at the space station

454
00:20:28,010 --> 00:20:24,090
the crew will pop asgardian - one inside

455
00:20:30,800 --> 00:20:28,020
a special nano satis penser and ejected

456
00:20:33,500 --> 00:20:30,810
into orbit this effort is being

457
00:20:36,350 --> 00:20:33,510
bankrolled by asgardian finding member

458
00:20:39,530 --> 00:20:36,360
igor asher belly a russian aerospace

459
00:20:42,350 --> 00:20:39,540
engineer and billionaire and led in part

460
00:20:44,810 --> 00:20:42,360
by rahm jakku the director of McGill

461
00:20:48,070 --> 00:20:44,820
University's Institute of air and space

462
00:20:50,960 --> 00:20:48,080
law here's a quote from mr. jakku

463
00:20:53,750 --> 00:20:50,970

Asgardian II a space nation that is

464

00:20:57,350 --> 00:20:53,760

trans ethnic transnational trans

465

00:21:00,380 --> 00:20:57,360

religious ethical a peaceful entity

466

00:21:03,980 --> 00:21:00,390

trying to settle the humanity in space

467

00:21:05,900 --> 00:21:03,990

and quotes jakku added that as Gardea

468

00:21:08,780 --> 00:21:05,910

will start out as a constitutional

469

00:21:12,140 --> 00:21:08,790

monarchy a government with a legislative

470

00:21:17,270 --> 00:21:12,150

executive and judicial branches however

471

00:21:19,820 --> 00:21:17,280

it will carry a 512 - gb drive preloaded

472

00:21:24,140 --> 00:21:19,830

with data selected by as gardius first

473

00:21:26,210 --> 00:21:24,150

1.5 million citizens quote maybe the

474

00:21:29,030 --> 00:21:26,220

photo of your little cat or of your

475

00:21:31,760 --> 00:21:29,040

neighbor your mother or a child whatever

476

00:21:35,480 --> 00:21:31,770

comes to your mind this will be for as

477

00:21:38,810 --> 00:21:35,490

long as as Gardea exists in other words

478

00:21:42,470 --> 00:21:38,820

for ever end quotes that's a quote from

479

00:21:44,300 --> 00:21:42,480

Asher Bailey although as Guardian - one

480

00:21:46,790 --> 00:21:44,310

will slow down in Earth's upper

481

00:21:47,390 --> 00:21:46,800

atmosphere and burn up within about five

482

00:21:50,420 --> 00:21:47,400

years

483

00:21:53,030 --> 00:21:50,430

Igor Asher Bailey said this citizen data

484

00:21:55,430 --> 00:21:53,040

will be copied to any future Asgardian

485

00:21:58,340 --> 00:21:55,440

satellites and the spacecraft that go to

486

00:22:01,610 --> 00:21:58,350

quote the moon and anywhere else in the

487

00:22:04,330 --> 00:22:01,620

universe as Gardea will be there and

488

00:22:07,010 --> 00:22:04,340

quotes asher bailey said the first

489

00:22:09,920 --> 00:22:07,020

100,000 people to be verified through a

490

00:22:13,190 --> 00:22:09,930

four-stage process will each get 300

491

00:22:15,740 --> 00:22:13,200

kilobytes of space on the drive which is

492

00:22:17,340 --> 00:22:15,750

less than one frame of a typical DVD

493

00:22:20,159 --> 00:22:17,350

video by the way

494

00:22:23,490 --> 00:22:20,169

the next 400,000 citizens will each get

495

00:22:26,399 --> 00:22:23,500

200 kilobytes and the final million just

496

00:22:29,779 --> 00:22:26,409

get that little 100 kilobytes of space

497

00:22:32,940 --> 00:22:29,789

as part of the verification process

498

00:22:36,810 --> 00:22:32,950

candidates citizens have until June 18th

499

00:22:40,169 --> 00:22:36,820

to vote yes or abstain from voting on a

500

00:22:42,210 --> 00:22:40,179

new and preliminary Constitution if they

501
00:22:45,539 --> 00:22:42,220
vote they'll be permitted to upload

502
00:22:48,600 --> 00:22:45,549
their data to asgardian - 1 before the

503
00:22:52,129 --> 00:22:48,610
launch this summer quote without this

504
00:22:54,869 --> 00:22:52,139
constitution we would be a fake nation a

505
00:22:57,810 --> 00:22:54,879
sophisticated computer game and this is

506
00:23:00,299 --> 00:22:57,820
not what we want and quotes said Asha

507
00:23:02,580 --> 00:23:00,309
Bailey who will be as gardius head of

508
00:23:05,249 --> 00:23:02,590
nation until a means of electing a

509
00:23:08,450 --> 00:23:05,259
leader is determined he continued quote

510
00:23:11,850 --> 00:23:08,460
we want to build a serious legitimate

511
00:23:13,860 --> 00:23:11,860
independent first space nation which

512
00:23:16,440 --> 00:23:13,870
will be recognized by the earth States

513
00:23:19,560 --> 00:23:16,450

and the United Nations and which is

514

00:23:21,930 --> 00:23:19,570

facing towards space in its development

515

00:23:24,930 --> 00:23:21,940

and quotes and here's where that

516

00:23:27,590 --> 00:23:24,940

expected controversy comes in writer

517

00:23:29,879 --> 00:23:27,600

Mark Harris who works for motherboard

518

00:23:32,360 --> 00:23:29,889

noted that the United Nations might

519

00:23:35,159 --> 00:23:32,370

decline to bestow that recognition

520

00:23:37,259 --> 00:23:35,169

Business Insider previously contacted

521

00:23:41,730 --> 00:23:37,269

the United Nations office for outer

522

00:23:45,060 --> 00:23:41,740

space affairs yep it's real it's UN oo

523

00:23:47,039 --> 00:23:45,070

sa a great Google he wanted

524

00:23:49,049 --> 00:23:47,049

clarification on whether current space

525

00:23:51,690 --> 00:23:49,059

laws would permit the existence of a

526

00:23:53,759 --> 00:23:51,700

space nation but you know so it's

527

00:23:57,119 --> 00:23:53,769

representatives they didn't answer that

528

00:23:59,850 --> 00:23:57,129

query instead they directed them to the

529

00:24:02,330 --> 00:23:59,860

text of five United Nations treaties

530

00:24:04,289 --> 00:24:02,340

that govern activities in outer space

531

00:24:06,720 --> 00:24:04,299

franz von der Donck

532

00:24:09,360 --> 00:24:06,730

a space law expert at the university of

533

00:24:12,090 --> 00:24:09,370

nebraska in the united states said last

534

00:24:14,129 --> 00:24:12,100

year that quote as long as nobody's

535

00:24:16,799 --> 00:24:14,139

going into space you can have as many

536

00:24:20,700 --> 00:24:16,809

signatures as you want but you're not

537

00:24:22,980 --> 00:24:20,710

going to be a state and quotes it was

538

00:24:25,320 --> 00:24:22,990

also noted that storing private data in

539

00:24:28,110 --> 00:24:25,330

space might eventually open up legal and

540

00:24:30,750 --> 00:24:28,120

ethical issues for as Gardea the

541

00:24:31,260 --> 00:24:30,760

Constitution for example references

542

00:24:34,710 --> 00:24:31,270

quote

543

00:24:37,950 --> 00:24:34,720

the immunity of commercial secrets and

544

00:24:41,880 --> 00:24:37,960

quotes and allows the creation of its

545

00:24:44,400 --> 00:24:41,890

own laws mark sundel a professor of

546

00:24:46,500 --> 00:24:44,410

space law at cleveland marshall college

547

00:24:49,830 --> 00:24:46,510

of law said that this could allow

548

00:24:52,200 --> 00:24:49,840

asgardian to create domestic laws quote

549

00:24:54,390 --> 00:24:52,210

to protect their nationals from any

550

00:24:57,450 --> 00:24:54,400

subpoenas requesting bank information

551
00:24:59,810 --> 00:24:57,460
and quotes and that if this did come to

552
00:25:03,650 --> 00:24:59,820
pass it would quote become a rogue

553
00:25:06,780 --> 00:25:03,660
banking nation end quote in short as

554
00:25:09,740 --> 00:25:06,790
guardians citizens might be able to form

555
00:25:12,180 --> 00:25:09,750
a nation of space pirates

556
00:25:14,130 --> 00:25:12,190
Business Insider contacted a press

557
00:25:16,230 --> 00:25:14,140
representative for as Gardea with

558
00:25:19,260 --> 00:25:16,240
questions about these and other issues

559
00:25:22,590 --> 00:25:19,270
but there was no immediate receipt of

560
00:25:25,530 --> 00:25:22,600
response for as gardius launch however

561
00:25:27,570 --> 00:25:25,540
the satellite will be bound to United

562
00:25:30,810 --> 00:25:27,580
States law because Nano racks and

563
00:25:32,970 --> 00:25:30,820

orbital ATK are American companies and

564

00:25:37,049 --> 00:25:32,980

they're launching aboard a nasa-funded

565

00:25:39,480 --> 00:25:37,059

mission the Asgardian - one satellite is

566

00:25:41,820 --> 00:25:39,490

a small beginning for the proto nation

567

00:25:44,160 --> 00:25:41,830

its founders eventually want to put

568

00:25:47,160 --> 00:25:44,170

people on a craft that will serve as a

569

00:25:49,350 --> 00:25:47,170

foothold for habitation quote will start

570

00:25:51,750 --> 00:25:49,360

small and eventually people will be

571

00:25:54,570 --> 00:25:51,760

going there and working and having their

572

00:25:56,910 --> 00:25:54,580

own rules and regulations this facility

573

00:26:00,450 --> 00:25:56,920

will become an independent nation and

574

00:26:03,000 --> 00:26:00,460

quotes said jakku no public details

575

00:26:05,310 --> 00:26:03,010

exist yet as to what the early colony

576

00:26:08,640 --> 00:26:05,320

might look like how big it will be or

577

00:26:10,590 --> 00:26:08,650

what expenses it will incur however

578

00:26:13,500 --> 00:26:10,600

building space stations of any size or

579

00:26:15,870 --> 00:26:13,510

kind and putting people on them that's a

580

00:26:18,600 --> 00:26:15,880

very very expensive proposition

581

00:26:21,060 --> 00:26:18,610

the football-field-sized international

582

00:26:24,480 --> 00:26:21,070

space station for example took 18

583

00:26:27,450 --> 00:26:24,490

nations and about 100 billion dollars to

584

00:26:30,180 --> 00:26:27,460

build meanwhile the cheapest ride to

585

00:26:33,120 --> 00:26:30,190

orbit today that SpaceX's Falcon 9

586

00:26:35,970 --> 00:26:33,130

rocket those rides cost anywhere between

587

00:26:39,990 --> 00:26:35,980

43 million dollars and sixty-five

588

00:26:42,870 --> 00:26:40,000

million dollars per launch timothy wild

589

00:26:45,000 --> 00:26:42,880

and as gardius spokesperson previously

590

00:26:46,890 --> 00:26:45,010

told business insider it would not

591

00:26:49,920 --> 00:26:46,900

close the organization's funding plans

592

00:26:51,870 --> 00:26:49,930

or levels but claimed that igor asher

593

00:26:52,650 --> 00:26:51,880

bailey had put forth a substantial

594

00:26:55,800 --> 00:26:52,660

amount of money

595

00:26:58,410 --> 00:26:55,810

via his company aerospace international

596

00:27:01,680 --> 00:26:58,420

research center to get the asgardian

597

00:27:03,630 --> 00:27:01,690

project going jakku and as gardius

598

00:27:05,700 --> 00:27:03,640

organizers have drawn plenty of

599

00:27:09,330 --> 00:27:05,710

criticism and they've been compared to

600

00:27:11,490 --> 00:27:09,340

the fizzling Mars one project that was

601
00:27:13,770 --> 00:27:11,500
the effort to set astronauts down on the

602
00:27:17,240 --> 00:27:13,780
red planet multiple investigations

603
00:27:20,990 --> 00:27:17,250
suggested lacking funding manpower and

604
00:27:24,630 --> 00:27:21,000
expertise to pull off this feat however

605
00:27:26,880 --> 00:27:24,640
jakku and timothy wild pointed out that

606
00:27:28,500 --> 00:27:26,890
trying to form a first space nation a

607
00:27:30,800 --> 00:27:28,510
couple of hundred miles above Earth is

608
00:27:33,840 --> 00:27:30,810
different than trying to colonize Mars

609
00:27:37,220 --> 00:27:33,850
quote anyone who tries out-of-the-box

610
00:27:40,020 --> 00:27:37,230
things is initially ridiculed in quotes

611
00:27:43,140 --> 00:27:40,030
everything that's amazing quote starts

612
00:27:45,030 --> 00:27:43,150
with a crazy idea said jakku he

613
00:27:47,940 --> 00:27:45,040

continues after a while

614

00:27:50,910 --> 00:27:47,950

science fiction becomes science fact and

615

00:27:55,080 --> 00:27:50,920

this is an idea which is just being

616

00:27:57,870 --> 00:27:55,090

initiated end quote and for purposes of

617

00:28:00,810 --> 00:27:57,880

disclosure Dave Mosier who writes this

618

00:28:04,740 --> 00:28:00,820

notes the author of this post registered

619

00:28:08,460 --> 00:28:04,750

as a citizen of as Gardea as part of his

620

00:28:11,220 --> 00:28:08,470

reporting cool and here at UFO headline

621

00:28:15,390 --> 00:28:11,230

news calm inception radio network we

622

00:28:17,790 --> 00:28:15,400

will keep you posted on as Gardea and so

623

00:28:20,910 --> 00:28:17,800

gentle listeners we come to the end of

624

00:28:23,130 --> 00:28:20,920

off the beaten path that weekend edition

625

00:28:25,890 --> 00:28:23,140

of the UFO headline news here at

626

00:28:27,900 --> 00:28:25,900

inception radio network and here's the

627

00:28:30,600 --> 00:28:27,910

part where I get to remind you that the

628

00:28:33,900 --> 00:28:30,610

UFO headline news is now proud to say

629

00:28:36,180 --> 00:28:33,910

we're on YouTube yep you can hear us and

630

00:28:38,370 --> 00:28:36,190

find links to all the stories check it

631

00:28:41,670 --> 00:28:38,380

out but right now we got a bounce

632

00:28:44,340 --> 00:28:41,680

because that's a wrap thank you for

633

00:28:47,250 --> 00:28:44,350

listening to UFO headline News weekend

634

00:28:49,550 --> 00:28:47,260

edition off-the-beaten-path take care of

635

00:28:52,680 --> 00:28:49,560

each other we're all in this together
