

UFO Headline News Tuesday June 27th, 2017

Listen on

inceptionradionetwork.com

1
00:00:05,840 --> 00:00:01,240

[Music]

2
00:00:08,600 --> 00:00:05,850

hello it's Tuesday June 27th 2017 you

3
00:00:11,120 --> 00:00:08,610

are listening to Concepcion Radio

4
00:00:14,390 --> 00:00:11,130

Network voice of the fringe majority

5
00:00:18,170 --> 00:00:14,400

this is Carol Carl with UFO headline

6
00:00:19,460 --> 00:00:18,180

news here's the scoop for what's up

7
00:00:22,790 --> 00:00:19,470

today and tonight

8
00:00:26,390 --> 00:00:22,800

according to earth sky org the latest

9
00:00:28,099 --> 00:00:26,400

sunsets follow summer solstice for you

10
00:00:29,150 --> 00:00:28,109

guys living around 40 degrees north

11
00:00:31,880 --> 00:00:29,160

latitude

12
00:00:34,220 --> 00:00:31,890

the latest sunsets of the year happened

13
00:00:36,979 --> 00:00:34,230

in late June and in the southern

14

00:00:39,709 --> 00:00:36,989

hemisphere at 40 degrees south latitude

15

00:00:41,840 --> 00:00:39,719

it's the latest sunrises that happen

16

00:00:43,430 --> 00:00:41,850

about this time of year and that's in

17

00:00:45,410 --> 00:00:43,440

spite of the fact that the Northern

18

00:00:47,450 --> 00:00:45,420

Hemisphere's longest southern

19

00:00:49,819 --> 00:00:47,460

hemisphere's shortest day of the year

20

00:00:53,180 --> 00:00:49,829

fell about a week ago on the June

21

00:00:55,610 --> 00:00:53,190

solstice the year's latest sunset always

22

00:00:57,590 --> 00:00:55,620

comes after the summer solstice even

23

00:01:00,110 --> 00:00:57,600

though the exact dates of the latest

24

00:01:03,049 --> 00:01:00,120

sunset depends on your latitude the

25

00:01:05,450 --> 00:01:03,059

farther north say Seattle Washington the

26
00:01:06,740 --> 00:01:05,460
latest sunset happens a few days before

27
00:01:09,800 --> 00:01:06,750
June 27th

28
00:01:11,870 --> 00:01:09,810
farther south Mexico City Mexico the

29
00:01:14,240 --> 00:01:11,880
latest sunset won't happen till early

30
00:01:16,609 --> 00:01:14,250
July and if you want to know the date of

31
00:01:19,609 --> 00:01:16,619
your earliest sunset well there's a

32
00:01:22,070 --> 00:01:19,619
customized sunrise sunset calendar you

33
00:01:25,370 --> 00:01:22,080
can find that later with a link at UFO

34
00:01:28,100 --> 00:01:25,380
headline news the latest sunsets come

35
00:01:31,219 --> 00:01:28,110
after the summer solstice because that

36
00:01:33,620 --> 00:01:31,229
day is more than 24 hours long at that

37
00:01:37,039 --> 00:01:33,630
time of the year in June and July the

38
00:01:40,160 --> 00:01:37,049

day as measured by successive returns of

39

00:01:43,460 --> 00:01:40,170

the midday Sun well that's nearly 1/4

40

00:01:46,280 --> 00:01:43,470

minute longer than 24 hours Oh whatever

41

00:01:49,190 --> 00:01:46,290

shall we do with that time hence the

42

00:01:51,350 --> 00:01:49,200

midday Sun the solar noon comes later by

43

00:01:54,230 --> 00:01:51,360

the clock in late June than it does on

44

00:01:57,230 --> 00:01:54,240

the June solstice itself therefore the

45

00:02:00,170 --> 00:01:57,240

Sun and sunset times also come later by

46

00:02:02,420 --> 00:02:00,180

the clock if the Earth's axis stood

47

00:02:05,719 --> 00:02:02,430

upright as our world circled the Sun and

48

00:02:08,300 --> 00:02:05,729

if in addition the earth stayed the same

49

00:02:11,300 --> 00:02:08,310

distance from the Sun all year long then

50

00:02:13,610 --> 00:02:11,310

clock time and Sun time would always

51

00:02:16,759 --> 00:02:13,620

agree however

52

00:02:19,610 --> 00:02:16,769

the Earth's axis is tilted 23.4 T five

53

00:02:21,710 --> 00:02:19,620

degrees out of vertical and our distance

54

00:02:23,899 --> 00:02:21,720

from the Sun varies by about five

55

00:02:27,020 --> 00:02:23,909

million kilometers three million miles

56

00:02:30,050 --> 00:02:27,030

throughout the year at and around the

57

00:02:33,140 --> 00:02:30,060

equinoxes solar days are shorter than 24

58

00:02:36,949 --> 00:02:33,150

hours and yet at the solstices solar

59

00:02:39,979 --> 00:02:36,959

days are longer than 24 hours the latest

60

00:02:43,130 --> 00:02:39,989

Sun sets always come on or near June 27th

61

00:02:45,470 --> 00:02:43,140

at mid northern latitudes every year so

62

00:02:47,599 --> 00:02:45,480

here's the bottom line why don't the

63

00:02:50,809 --> 00:02:47,609

latest sunsets come on the longest or

64

00:02:52,610 --> 00:02:50,819

Sol's to stay in a nutshell according to

65

00:02:56,119 --> 00:02:52,620

Bruce McClure who writes this for earth

66

00:02:57,979 --> 00:02:56,129

sky org it's a discrepancy between the

67

00:03:00,619 --> 00:02:57,989

Sun and the clock

68

00:03:03,259 --> 00:03:00,629

thus for mid northern latitudes the

69

00:03:06,500 --> 00:03:03,269

latest Sun sets always come in late June

70

00:03:09,170 --> 00:03:06,510

and NASA is still struggling and

71

00:03:11,750 --> 00:03:09,180

efforting to get those launched vapor

72

00:03:14,180 --> 00:03:11,760

canisters into the air and make

73

00:03:17,000 --> 00:03:14,190

colourful clouds meanwhile here's a

74

00:03:18,949 --> 00:03:17,010

headline SpaceX nails two rocket

75

00:03:21,890 --> 00:03:18,959

launches in one weekend

76

00:03:26,270 --> 00:03:21,900

Jackie waddles wrote this for the Money

77

00:03:28,759 --> 00:03:26,280

Bureau at cnn.com there we go a SpaceX

78

00:03:30,740 --> 00:03:28,769

just capped off two successful missions

79

00:03:33,650 --> 00:03:30,750

to space this weekend the company's

80

00:03:35,240 --> 00:03:33,660

quickest launched turnaround yet after

81

00:03:37,699 --> 00:03:35,250

it launched a communication satellite

82

00:03:41,509 --> 00:03:37,709

into orbit from Kennedy Space Center in

83

00:03:43,849 --> 00:03:41,519

Florida on Friday Tesla CEO Elon Musk's

84

00:03:46,220 --> 00:03:43,859

private space outfit finished its run

85

00:03:49,159 --> 00:03:46,230

with a clean launch from California's

86

00:03:51,559 --> 00:03:49,169

Vandenberg Air Force Base on Sunday the

87

00:03:53,930 --> 00:03:51,569

sunday launch marked SpaceX is ninth so

88

00:03:55,640 --> 00:03:53,940

far this year the company has now

89

00:03:58,280 --> 00:03:55,650

surpassed the record for the most

90

00:04:02,030 --> 00:03:58,290

launches in a single year that record

91

00:04:03,920 --> 00:04:02,040

was set in 2016 the latest mission to

92

00:04:06,920 --> 00:04:03,930

deliver a group of satellites into orbit

93

00:04:08,569 --> 00:04:06,930

for a company called iridium those

94

00:04:11,509 --> 00:04:08,579

satellites will join a growing network

95

00:04:14,479 --> 00:04:11,519

dubbed the Iridium next system

96

00:04:17,089 --> 00:04:14,489

iridium next has many goals one of its

97

00:04:19,460 --> 00:04:17,099

most notable is to eliminate black zones

98

00:04:21,890 --> 00:04:19,470

where commercial airplanes can't be

99

00:04:24,469 --> 00:04:21,900

tracked by providing global real-time

100

00:04:26,719 --> 00:04:24,479

surveillance of all flights that means

101
00:04:27,350 --> 00:04:26,729
missing airplanes like the Malaysian

102
00:04:28,969 --> 00:04:27,360
Airlines

103
00:04:31,640 --> 00:04:28,979
light that vanished three years ago over

104
00:04:32,749 --> 00:04:31,650
the Indian Ocean could become a thing of

105
00:04:35,119 --> 00:04:32,759
the past

106
00:04:37,249 --> 00:04:35,129
it will take several more launches to

107
00:04:39,409 --> 00:04:37,259
get the full Network into orbit the

108
00:04:41,510 --> 00:04:39,419
launch on Sunday was SpaceX is second

109
00:04:43,670 --> 00:04:41,520
delivery it sent up the first ten

110
00:04:46,309 --> 00:04:43,680
satellites in January there are going to

111
00:04:47,469 --> 00:04:46,319
be six more iridium next missions over

112
00:04:50,300 --> 00:04:47,479
this next year

113
00:04:53,209 --> 00:04:50,310

Friday's mission was also noteworthy it

114

00:04:55,339 --> 00:04:53,219

marked the second time SpaceX has reused

115

00:04:58,159 --> 00:04:55,349

a first stage rocket booster which

116

00:05:00,409 --> 00:04:58,169

flings the payload toward orbit the

117

00:05:03,110 --> 00:05:00,419

booster was previously used in a January

118

00:05:05,420 --> 00:05:03,120

mission SpaceX wants to reuse its

119

00:05:07,550 --> 00:05:05,430

rockets so it can drastically slash the

120

00:05:10,040 --> 00:05:07,560

amount of single launch costs the

121

00:05:13,159 --> 00:05:10,050

sticker price for a customer sixty-two

122

00:05:15,379 --> 00:05:13,169

million dollars SpaceX is the only

123

00:05:17,779 --> 00:05:15,389

company that has recovered refurbished

124

00:05:20,510 --> 00:05:17,789

and then reef flown an orbital class

125

00:05:22,790 --> 00:05:20,520

rocket by completing its second mission

126
00:05:24,679 --> 00:05:22,800
with a used rocket SpaceX has again

127
00:05:27,920 --> 00:05:24,689
signaled to its customers that it can

128
00:05:29,899 --> 00:05:27,930
safely pull off this maneuver Sunday's

129
00:05:32,570 --> 00:05:29,909
mission didn't use a pre flown booster

130
00:05:34,369 --> 00:05:32,580
but SpaceX did manage to safely recover

131
00:05:37,700 --> 00:05:34,379
the first stage after that launch

132
00:05:40,579 --> 00:05:37,710
setting it up to fly again one day so

133
00:05:43,550 --> 00:05:40,589
far SpaceX has safely landed first stage

134
00:05:44,269 --> 00:05:43,560
rockets on land or a drone ship thirteen

135
00:05:48,950 --> 00:05:44,279
times

136
00:05:50,990 --> 00:05:48,960
yep that lucky 13 hmm this broadcaster

137
00:05:53,839 --> 00:05:51,000
just had a question occur to her

138
00:05:56,510 --> 00:05:53,849

regarding space junk well that question

139

00:05:58,850 --> 00:05:56,520

was triggered by this next up story

140

00:06:02,029 --> 00:05:58,860

we're just pondering how long it will be

141

00:06:06,050 --> 00:06:02,039

if at all before there will be a fine

142

00:06:08,570 --> 00:06:06,060

for littering in outer space hmm just a

143

00:06:10,999 --> 00:06:08,580

thought well here's the story from Matt

144

00:06:13,670 --> 00:06:11,009

Williams for Universe Today comm

145

00:06:17,959 --> 00:06:13,680

headline let's clean up the space junk

146

00:06:20,390 --> 00:06:17,969

with magnetic space tugs after 50 years

147

00:06:23,510 --> 00:06:20,400

of sending Rockets satellites and

148

00:06:27,079 --> 00:06:23,520

payloads into orbit humanity has created

149

00:06:29,170 --> 00:06:27,089

something of a space junk problem recent

150

00:06:32,600 --> 00:06:29,180

estimates indicate there are more than

151

00:06:34,909 --> 00:06:32,610

170 million pieces of debris up there

152

00:06:35,689 --> 00:06:34,919

ranging in size from less than one

153

00:06:39,230 --> 00:06:35,699

centimeter

154

00:06:41,330 --> 00:06:39,240

that's 0.4 inches to a few meters in

155

00:06:43,310 --> 00:06:41,340

diameter not only

156

00:06:45,439 --> 00:06:43,320

does this junk threaten spacecraft and

157

00:06:48,379 --> 00:06:45,449

the International Space Station but

158

00:06:51,080 --> 00:06:48,389

collisions between bits of debris can

159

00:06:54,200 --> 00:06:51,090

cause more to form it's a phenomenon

160

00:06:55,400 --> 00:06:54,210

known as the Kessler effect and thanks

161

00:06:57,500 --> 00:06:55,410

to the growth of the commercial

162

00:06:59,689 --> 00:06:57,510

aerospace industry and the development

163

00:07:02,120 --> 00:06:59,699

of small satellites things are not

164

00:07:03,439 --> 00:07:02,130

likely to get any less cluttered up

165

00:07:06,950 --> 00:07:03,449

there any time soon

166

00:07:09,159 --> 00:07:06,960

hence why multiple strategies are being

167

00:07:12,290 --> 00:07:09,169

explored to clean up the space lanes

168

00:07:15,260 --> 00:07:12,300

ranging from robotic arms and nets to

169

00:07:18,170 --> 00:07:15,270

harpoons but in what may be the most

170

00:07:20,780 --> 00:07:18,180

ambitious plan to date the European

171

00:07:24,500 --> 00:07:20,790

Space Agency is proposing to create

172

00:07:27,770 --> 00:07:24,510

space tugs with powerful magnets to yank

173

00:07:29,659 --> 00:07:27,780

debris out of orbit this concept comes

174

00:07:31,719 --> 00:07:29,669

from a million phobic er he's a

175

00:07:36,260 --> 00:07:31,729

researcher from the institut supérieur

176

00:07:39,080 --> 00:07:36,270

della a lunatic at delta space at the

177

00:07:42,110 --> 00:07:39,090

University of Toulouse France apologies

178

00:07:45,020 --> 00:07:42,120

to you French speakers his concept for a

179

00:07:46,960 --> 00:07:45,030

magnetic tug seeks to address one type

180

00:07:50,540 --> 00:07:46,970

of space debris in particular in

181

00:07:52,850 --> 00:07:50,550

operable satellites these uncontrolled

182

00:07:55,580 --> 00:07:52,860

rapidly spinning objects often weigh up

183

00:07:57,379 --> 00:07:55,590

to several tonnes and are therefore one

184

00:08:00,020 --> 00:07:57,389

of the most significant collision

185

00:08:02,600 --> 00:08:00,030

hazards there is when applied to the

186

00:08:05,570 --> 00:08:02,610

problem of orbital debris magnetic

187

00:08:07,850 --> 00:08:05,580

attraction is an attractive solution for

188

00:08:11,240 --> 00:08:07,860

the safety orbiting of space satellites

189

00:08:14,150 --> 00:08:11,250

who are spent for starters it relies on

190

00:08:16,129 --> 00:08:14,160

technology that is standard-issue aboard

191

00:08:19,400 --> 00:08:16,139

many low orbiting satellites it's

192

00:08:25,089 --> 00:08:19,410

something known as magnet or kurz that

193

00:08:27,440 --> 00:08:25,099

spelled ma g + ET o r qu ers these

194

00:08:29,360 --> 00:08:27,450

electromagnet s-- allow satellites to

195

00:08:30,770 --> 00:08:29,370

adjust their orientation using the

196

00:08:33,800 --> 00:08:30,780

Earth's magnetic field

197

00:08:35,800 --> 00:08:33,810

hence debris chasing satellites wouldn't

198

00:08:38,209 --> 00:08:35,810

need to be specially equipped in advance

199

00:08:40,550 --> 00:08:38,219

what's more this same magnetic

200

00:08:42,800 --> 00:08:40,560

attraction or repulsion technology is

201
00:08:45,410 --> 00:08:42,810
being considered as a safe method for

202
00:08:47,690 --> 00:08:45,420
allowing multiple satellites to maintain

203
00:08:49,760 --> 00:08:47,700
closed formations in space such

204
00:08:52,760 --> 00:08:49,770
satellites for instance NASA's

205
00:08:56,060 --> 00:08:52,770
magnetospheric multiscale mission the

206
00:08:57,980 --> 00:08:56,070
Landsat 7 and the earth observing one

207
00:09:01,340 --> 00:08:57,990
satellite and the European Space

208
00:09:03,530 --> 00:09:01,350
Agency's upcoming Lesa mission they're

209
00:09:06,650 --> 00:09:03,540
either operational or soon will be

210
00:09:08,630 --> 00:09:06,660
around the earth because of this this

211
00:09:10,730 --> 00:09:08,640
kind of magnetic attraction technology

212
00:09:13,400 --> 00:09:10,740
presents a safe and effective

213
00:09:16,550 --> 00:09:13,410

alternative for D orbiting space junk

214

00:09:18,980 --> 00:09:16,560

this wonderful article does continue and

215

00:09:21,710 --> 00:09:18,990

it gets rather technical just doesn't

216

00:09:24,079 --> 00:09:21,720

make good radio so we will provide a

217

00:09:26,630 --> 00:09:24,089

link for you gentle listeners later to

218

00:09:28,819 --> 00:09:26,640

peruse at your leisure you can find this

219

00:09:32,060 --> 00:09:28,829

article and all the rest of the content

220

00:09:35,120 --> 00:09:32,070

for UFO headline news later at UFO

221

00:09:38,210 --> 00:09:35,130

headline news comm let's see if we can

222

00:09:41,900 --> 00:09:38,220

go from space tugs and debris in space

223

00:09:45,050 --> 00:09:41,910

to a tug of a different kind of pull a

224

00:09:49,150 --> 00:09:45,060

desire of longing well if you have a

225

00:09:51,800 --> 00:09:49,160

longing to attend a UFO fest say o

226

00:09:53,449 --> 00:09:51,810

Roswell perhaps then you're going to

227

00:09:56,630 --> 00:09:53,459

like this next story

228

00:09:59,390 --> 00:09:56,640

it's from KRQE out of Albuquerque New

229

00:10:02,470 --> 00:09:59,400

Mexico headline influx of people

230

00:10:05,270 --> 00:10:02,480

expected during this weekend's UFO fest

231

00:10:08,630 --> 00:10:05,280

Allyson Martinez gets the byline here

232

00:10:10,850 --> 00:10:08,640

and she writes there is one New Mexico

233

00:10:14,569 --> 00:10:10,860

town that brings in tourists for a very

234

00:10:18,890 --> 00:10:14,579

specific reason it's the supposedly an

235

00:10:22,670 --> 00:10:18,900

invasion of 1947 as Roswell celebrates

236

00:10:24,530 --> 00:10:22,680

its UFO festival for the 70th year the

237

00:10:27,319 --> 00:10:24,540

city is preparing for what's expected to

238

00:10:29,360 --> 00:10:27,329

be its largest event ever business

239

00:10:31,400 --> 00:10:29,370

owners on Main streets are also gearing

240

00:10:33,890 --> 00:10:31,410

up for this year's event hotels are

241

00:10:36,110 --> 00:10:33,900

booked up and everyone's getting ready

242

00:10:38,170 --> 00:10:36,120

for this influx of people expected to

243

00:10:41,269 --> 00:10:38,180

invade town this weekend

244

00:10:44,240 --> 00:10:41,279

alien street lights alien dolls and

245

00:10:45,860 --> 00:10:44,250

alien headbands well that's just a few

246

00:10:48,680 --> 00:10:45,870

of the alien things you're going to see

247

00:10:51,019 --> 00:10:48,690

this weekend during UFO fest said Jim

248

00:10:53,449 --> 00:10:51,029

Hill an employee at the International

249

00:10:55,600 --> 00:10:53,459

UFO museum quote I think we're gonna

250

00:10:59,540 --> 00:10:55,610

have a big crowd this year and quotes

251
00:11:02,090 --> 00:10:59,550
the city population 48,000 says it's

252
00:11:04,640 --> 00:11:02,100
expecting more than 50,000 visitors

253
00:11:06,850 --> 00:11:04,650
during the 70th anniversary event which

254
00:11:08,000 --> 00:11:06,860
would surpass its 50th year anniversary

255
00:11:10,760 --> 00:11:08,010
celebration

256
00:11:13,940 --> 00:11:10,770
quote we'll be at capacity this weekend

257
00:11:16,450 --> 00:11:13,950
somewhere close to 3,000 a day end

258
00:11:19,760 --> 00:11:16,460
quotes and that's also from Jim he'll

259
00:11:22,220 --> 00:11:19,770
said Jesse Payne an employee at a lien

260
00:11:24,560 --> 00:11:22,230
zone quote definitely some high

261
00:11:26,540 --> 00:11:24,570
expectations here I've seen some really

262
00:11:28,220 --> 00:11:26,550
cool advertisements and posters and

263
00:11:29,990 --> 00:11:28,230

they're really trying to put more of an

264

00:11:32,750 --> 00:11:30,000

effort towards making the festival

265

00:11:34,820 --> 00:11:32,760

really big this year end quotes and of

266

00:11:38,330 --> 00:11:34,830

course with the visitors comes the

267

00:11:40,490 --> 00:11:38,340

revenue in fact many businesses say they

268

00:11:43,790 --> 00:11:40,500

make most of their revenue just this

269

00:11:46,340 --> 00:11:43,800

weekend alone quote it's pretty much our

270

00:11:48,740 --> 00:11:46,350

Christmas every year we survive most of

271

00:11:51,020 --> 00:11:48,750

our year off of the UFO festival end

272

00:11:54,440 --> 00:11:51,030

quotes said Jeff Cooke an employee at

273

00:11:56,960 --> 00:11:54,450

alien invasion along with all the alien

274

00:11:59,570 --> 00:11:56,970

gear there will be many sharing their

275

00:12:04,790 --> 00:11:59,580

hypotheses on what exactly happened on

276

00:12:07,580 --> 00:12:04,800

July 7 1947 quote we all think that the

277

00:12:10,040 --> 00:12:07,590

UFO came because of the nuclear test

278

00:12:12,260 --> 00:12:10,050

that we set off at Trinity Test Site and

279

00:12:12,860 --> 00:12:12,270

quotes that's from Donna mills Gore

280

00:12:15,590 --> 00:12:12,870

Ellis

281

00:12:17,870 --> 00:12:15,600

she's a visitor to Roswell people of all

282

00:12:20,750 --> 00:12:17,880

ages are already pouring into town to

283

00:12:22,730 --> 00:12:20,760

enjoy the alien vibes quote it's really

284

00:12:25,520 --> 00:12:22,740

cool there are lots of things to do

285

00:12:28,070 --> 00:12:25,530

involving aliens and quotes that's from

286

00:12:30,500 --> 00:12:28,080

another visitor to Roswell and yet

287

00:12:32,780 --> 00:12:30,510

another visitor Rupert Quillin said

288

00:12:35,090 --> 00:12:32,790

quote it's nice that someone wants to

289

00:12:37,910 --> 00:12:35,100

believe in that like good for them and

290

00:12:40,310 --> 00:12:37,920

quotes visitors will be coming from all

291

00:12:42,890 --> 00:12:40,320

over the world to invade Roswell as the

292

00:12:45,860 --> 00:12:42,900

festival kicks off on Thursday at noon

293

00:12:48,470 --> 00:12:45,870

so many hotels are already booked for

294

00:12:50,750 --> 00:12:48,480

the weekend and the city is asking local

295

00:12:53,150 --> 00:12:50,760

visitors to bring a camper and stay at

296

00:12:56,150 --> 00:12:53,160

bottomless lakes State Park to

297

00:12:58,070 --> 00:12:56,160

accommodate out-of-state visitors Monday

298

00:13:00,280 --> 00:12:58,080

city officials were out sprucing up Main

299

00:13:03,320 --> 00:13:00,290

Street making final plans for the event

300

00:13:05,600 --> 00:13:03,330

the temperatures in Roswell will be in

301
00:13:07,790 --> 00:13:05,610
the high 90s this weekend with events

302
00:13:11,300 --> 00:13:07,800
taking place both indoors and outdoors

303
00:13:13,880 --> 00:13:11,310
and while we're in that particular geo

304
00:13:16,280 --> 00:13:13,890
location we want to set and heartfelt

305
00:13:18,830 --> 00:13:16,290
concerns and prayers to everybody living

306
00:13:21,920 --> 00:13:18,840
in the fire zones in the great Southwest

307
00:13:23,930 --> 00:13:21,930
United States lots of fires lots of

308
00:13:27,290 --> 00:13:23,940
tossed out of their houses temporarily

309
00:13:29,930 --> 00:13:27,300
we help now hang on we're going to shift

310
00:13:32,240 --> 00:13:29,940
our trajectory and geolocation

311
00:13:34,940 --> 00:13:32,250
from the southwest of the United States

312
00:13:38,060 --> 00:13:34,950
to the East Coast through roughly

313
00:13:40,250 --> 00:13:38,070

Marietta Georgia that's the setting for

314

00:13:42,620 --> 00:13:40,260

MUFON sighting number eight four six

315

00:13:46,430 --> 00:13:42,630

three three the date of this sighting

316

00:13:50,120 --> 00:13:46,440

June 27th 2017 and it got a same-day

317

00:13:52,630 --> 00:13:50,130

report here's the summary a friend and I

318

00:13:56,330 --> 00:13:52,640

observed a light in the sky that moved

319

00:13:57,700 --> 00:13:56,340

stopped and then moved again in a

320

00:14:00,410 --> 00:13:57,710

different location

321

00:14:03,800 --> 00:14:00,420

citing specifics offer a viewing

322

00:14:06,430 --> 00:14:03,810

distance unknown as is the altitude the

323

00:14:09,680 --> 00:14:06,440

sighting duration 1 hour and 30 minutes

324

00:14:12,110 --> 00:14:09,690

object features none an object flight

325

00:14:14,450 --> 00:14:12,120

path path with directional change and

326

00:14:16,070 --> 00:14:14,460

this object is reported to have been

327

00:14:18,380 --> 00:14:16,080

shaped like a star

328

00:14:20,690 --> 00:14:18,390

there isn't any weather except for the

329

00:14:23,060 --> 00:14:20,700

notation that Marietta Georgia was not

330

00:14:25,940 --> 00:14:23,070

experiencing any abnormal weather

331

00:14:29,690 --> 00:14:25,950

conditions at the time here's the

332

00:14:31,640 --> 00:14:29,700

account first person sitting outside a

333

00:14:34,370 --> 00:14:31,650

couple of friends and I were talking and

334

00:14:36,950 --> 00:14:34,380

having cigarettes I was observing the

335

00:14:40,850 --> 00:14:36,960

constellations when I noticed what

336

00:14:43,250 --> 00:14:40,860

looked like a star in movement I pointed

337

00:14:45,590 --> 00:14:43,260

up and called it out at which point one

338

00:14:47,770 --> 00:14:45,600

of my friends saw it as well so we

339

00:14:51,980 --> 00:14:47,780

watched this thing for about a minute

340

00:14:53,960 --> 00:14:51,990

when it came to a stop we almost lost

341

00:14:56,870 --> 00:14:53,970

sight of it because of how similar to a

342

00:14:59,840 --> 00:14:56,880

star it was but this thing changed

343

00:15:02,780 --> 00:14:59,850

direction and began moving in some

344

00:15:04,520 --> 00:15:02,790

manner I can definitely celebrate the

345

00:15:06,950 --> 00:15:04,530

holiday with great savings during lows

346

00:15:08,750 --> 00:15:06,960

go forth event make your patio a happen

347

00:15:11,300 --> 00:15:08,760

and hang out for family and friends with

348

00:15:13,520 --> 00:15:11,310

up to 25% off select patio furniture and

349

00:15:15,860 --> 00:15:13,530

outdoor decor and your guests are gonna

350

00:15:17,930 --> 00:15:15,870

be hungry so be prepared to grill with a

351
00:15:20,480 --> 00:15:17,940
2-pack of Kingsford Charcoal now for

352
00:15:20,900 --> 00:15:20,490
just 988 all projects have a starting

353
00:15:23,060 --> 00:15:20,910
point

354
00:15:24,460 --> 00:15:23,070
start with Lowe's patio and charcoal

355
00:15:26,290 --> 00:15:24,470
offers valid while supplies last

356
00:15:31,360 --> 00:15:26,300
us-only charcoal offer limited to two

357
00:15:33,910 --> 00:15:31,370
bags per customer six 28 through 75 at

358
00:15:36,460 --> 00:15:33,920
least say it was not a shooting star it

359
00:15:39,460 --> 00:15:36,470
was too slow it was not an airplane

360
00:15:42,280 --> 00:15:39,470
there were no left and right lights no

361
00:15:42,790 --> 00:15:42,290
red green no sound and it wasn't a

362
00:15:45,700 --> 00:15:42,800
meteor

363
00:15:48,580 --> 00:15:45,710

there was no tail it was either high in

364

00:15:52,270 --> 00:15:48,590

the sky meaning it was huge and moving

365

00:15:54,910 --> 00:15:52,280

fast or it was closer and tiny which I

366

00:15:58,060 --> 00:15:54,920

doubt very much to be honest this is not

367

00:16:00,940 --> 00:15:58,070

my first encounter it's the fourth in

368

00:16:02,590 --> 00:16:00,950

this area however this is the second

369

00:16:05,950 --> 00:16:02,600

time in this location that I've had a

370

00:16:07,630 --> 00:16:05,960

witness I have no pictures but if

371

00:16:10,060 --> 00:16:07,640

anybody's interested I can provide

372

00:16:12,010 --> 00:16:10,070

additional information I want to know

373

00:16:15,820 --> 00:16:12,020

how many people have experienced this

374

00:16:17,980 --> 00:16:15,830

and our witness goes on to say he would

375

00:16:20,950 --> 00:16:17,990

like some help with this from MUFON and

376

00:16:23,830 --> 00:16:20,960

he would like to be contacted and thanks

377

00:16:26,890 --> 00:16:23,840

for our time well in this case MUFON x'

378

00:16:28,330 --> 00:16:26,900

time and poor old MUFON in this case

379

00:16:30,040 --> 00:16:28,340

stretched to the limit

380

00:16:32,830 --> 00:16:30,050

volunteer wise like many organizations

381

00:16:35,230 --> 00:16:32,840

and as we understand it they're

382

00:16:38,350 --> 00:16:35,240

undergoing a bit of housekeeping within

383

00:16:40,540 --> 00:16:38,360

the organization itself but still lots

384

00:16:43,570 --> 00:16:40,550

of fine people doing lots of fine work

385

00:16:46,240 --> 00:16:43,580

and along with the folks at UFO stalker

386

00:16:49,780 --> 00:16:46,250

comm they bring us articles like this

387

00:16:53,020 --> 00:16:49,790

UFO sighting in Kelowna British Columbia

388

00:16:56,020 --> 00:16:53,030

it's MUFON case number eight for six to

389

00:16:58,510 --> 00:16:56,030

eight the sighting took place June 24th

390

00:17:01,720 --> 00:16:58,520

this year but wasn't reported till two

391

00:17:05,680 --> 00:17:01,730

days later here's the summary object

392

00:17:10,030 --> 00:17:05,690

hovered reflective another reflective

393

00:17:13,630 --> 00:17:10,040

object flew up stayed in formation then

394

00:17:16,060 --> 00:17:13,640

ascended sighting specifics categories

395

00:17:18,970 --> 00:17:16,070

in this case give us an unknown viewing

396

00:17:20,980 --> 00:17:18,980

distance the altitude was over 500 feet

397

00:17:23,560 --> 00:17:20,990

and there didn't seem to be any cloud

398

00:17:27,100 --> 00:17:23,570

cover at the time the sighting duration

399

00:17:30,460 --> 00:17:27,110

was 20 minutes object features vexing

400

00:17:32,830 --> 00:17:30,470

Lee simply described as none the object

401
00:17:35,640 --> 00:17:32,840
flight path was hovering and then path

402
00:17:38,050 --> 00:17:35,650
and this object was shaped like a sphere

403
00:17:39,670 --> 00:17:38,060
several sightings in Cal

404
00:17:44,920 --> 00:17:39,680
we hope we're pronouncing that right

405
00:17:47,830 --> 00:17:44,930
Kelowna Kelowna its Kelo WMA it's an

406
00:17:50,890 --> 00:17:47,840
area of activity so here's the account

407
00:17:53,080 --> 00:17:50,900
from this particular case of activity

408
00:17:56,400 --> 00:17:53,090
two of my friends and I were outside

409
00:18:00,070 --> 00:17:56,410
when one of them noticed a strange

410
00:18:02,730 --> 00:18:00,080
reflective object in the sky we thought

411
00:18:05,530 --> 00:18:02,740
at first it was a silver helium balloon

412
00:18:08,700 --> 00:18:05,540
but after a few minutes of observing it

413
00:18:11,500 --> 00:18:08,710

we noticed it wasn't moving at all

414

00:18:14,350 --> 00:18:11,510

another similar looking object appeared

415

00:18:17,710 --> 00:18:14,360

then and it flew up to the hovering one

416

00:18:19,630 --> 00:18:17,720

at a fairly high speed and then the two

417

00:18:21,610 --> 00:18:19,640

objects hovered for a couple more

418

00:18:24,880 --> 00:18:21,620

minutes at that same distance from each

419

00:18:27,580 --> 00:18:24,890

other eventually both objects started

420

00:18:30,850 --> 00:18:27,590

slowly ascending until they became very

421

00:18:32,830 --> 00:18:30,860

faint and we just could not see them it

422

00:18:35,290 --> 00:18:32,840

was hard for us to judge the size and

423

00:18:38,530 --> 00:18:35,300

altitude of these objects but our best

424

00:18:40,360 --> 00:18:38,540

guess would be over 5,000 feet I'm not

425

00:18:42,880 --> 00:18:40,370

sure what they could have been they did

426

00:18:46,780 --> 00:18:42,890

not look or act like helicopters or

427

00:18:50,050 --> 00:18:46,790

drones interesting strangely behaving

428

00:18:53,290 --> 00:18:50,060

objects it's the stopping part that we

429

00:18:54,850 --> 00:18:53,300

find the most strange very cool more

430

00:18:57,070 --> 00:18:54,860

than one witness here

431

00:18:59,970 --> 00:18:57,080

let's stay North we're still in Canada

432

00:19:04,480 --> 00:18:59,980

this time we're in Collingwood Ontario

433

00:19:06,880 --> 00:19:04,490

Canada for MUFON case number 8 for 6:05

434

00:19:11,170 --> 00:19:06,890

the date of this sighting is June 24th

435

00:19:14,800 --> 00:19:11,180

it got a next day report yup 2017 is the

436

00:19:18,490 --> 00:19:14,810

year the summary Tzipi white lights over

437

00:19:21,340 --> 00:19:18,500

Georgian Bay viewing distance over one

438

00:19:24,640 --> 00:19:21,350

mile altitude over five hundred feet and

439

00:19:26,410 --> 00:19:24,650

under a cloud cover and then later over

440

00:19:27,250 --> 00:19:26,420

five hundred feet in that cloud cover

441

00:19:30,340 --> 00:19:27,260

was gone

442

00:19:33,310 --> 00:19:30,350

sighting duration 45 seconds object

443

00:19:35,680 --> 00:19:33,320

features unknown the flight path past

444

00:19:37,780 --> 00:19:35,690

with directional change at some point

445

00:19:40,330 --> 00:19:37,790

and the shape of this object is simply

446

00:19:43,450 --> 00:19:40,340

listed as unknown there isn't any

447

00:19:47,050 --> 00:19:43,460

weather let's just jump right into it on

448

00:19:50,860 --> 00:19:47,060

June 24th 2017 at approximately 10:45

449

00:19:51,910 --> 00:19:50,870

p.m. Eastern Standard Time myself and

450

00:19:54,400 --> 00:19:51,920

five other family

451
00:19:57,400 --> 00:19:54,410
numbers were out on the patio we were

452
00:20:00,160 --> 00:19:57,410
stargazing and then we noticed a very

453
00:20:02,830 --> 00:20:00,170
bright white light streaking across a

454
00:20:05,470 --> 00:20:02,840
short section of the sky we were facing

455
00:20:07,570 --> 00:20:05,480
north looking out over Georgian Bay when

456
00:20:10,000 --> 00:20:07,580
we first saw this light they came from

457
00:20:12,580 --> 00:20:10,010
the West at first we all thought this

458
00:20:14,980 --> 00:20:12,590
was a shooting star until it blinked out

459
00:20:18,250 --> 00:20:14,990
and then appeared slightly to the east

460
00:20:21,040 --> 00:20:18,260
of where we had seen it previously this

461
00:20:23,830 --> 00:20:21,050
object repeated this action another four

462
00:20:26,350 --> 00:20:23,840
or so times each time heading more

463
00:20:27,180 --> 00:20:26,360

eastward heading directly away from our

464

00:20:30,430 --> 00:20:27,190

line of sight

465

00:20:32,440 --> 00:20:30,440

there was a slight zigzag when it would

466

00:20:34,350 --> 00:20:32,450

appear and disappear they wasn't

467

00:20:37,030 --> 00:20:34,360

traveling in a perfectly straight line

468

00:20:39,850 --> 00:20:37,040

it was difficult for us to tell whether

469

00:20:42,520 --> 00:20:39,860

this was moving slightly up or down or

470

00:20:45,070 --> 00:20:42,530

perhaps left or right because of how

471

00:20:47,170 --> 00:20:45,080

fast it was moving we lost sight of this

472

00:20:50,020 --> 00:20:47,180

object as it was heading east towards

473

00:20:52,600 --> 00:20:50,030

Wasaga Beach it was here where we did

474

00:20:55,240 --> 00:20:52,610

not see it come back and overall this

475

00:20:58,630 --> 00:20:55,250

entire event only lasted 45 seconds or

476

00:21:01,120 --> 00:20:58,640

so the object made zero noise as it

477

00:21:03,340 --> 00:21:01,130

moved and also there were no other

478

00:21:06,880 --> 00:21:03,350

planes or satellites in this area at the

479

00:21:09,460 --> 00:21:06,890

time this object emitted a very white

480

00:21:12,310 --> 00:21:09,470

light which made it difficult to make

481

00:21:14,350 --> 00:21:12,320

out the exact shape and size at arm's

482

00:21:17,170 --> 00:21:14,360

length this would appear to be an inch

483

00:21:19,480 --> 00:21:17,180

in length I do not know if this was the

484

00:21:22,270 --> 00:21:19,490

size of the object or if this was the

485

00:21:25,750 --> 00:21:22,280

length of the streak the after image

486

00:21:27,820 --> 00:21:25,760

this object was leaving behind I've been

487

00:21:30,250 --> 00:21:27,830

an amateur astronomer or Sky Watcher

488

00:21:32,890 --> 00:21:30,260

since I was a child I've seen comets

489

00:21:36,340 --> 00:21:32,900

meteors satellites the International

490

00:21:40,470 --> 00:21:36,350

Space Station etc but I am at a loss to

491

00:21:43,300 --> 00:21:40,480

explain what it was exactly in the sky

492

00:21:46,030 --> 00:21:43,310

to us it's always more of a mystery when

493

00:21:49,030 --> 00:21:46,040

somebody is hip to what's up there and

494

00:21:50,230 --> 00:21:49,040

knows this is not the normal thing one

495

00:21:52,990 --> 00:21:50,240

sees up there

496

00:21:55,690 --> 00:21:53,000

speaking of up there we are still up

497

00:21:59,170 --> 00:21:55,700

there in Canada so let's grab this story

498

00:22:02,380 --> 00:21:59,180

from the Durham Region comm it's out of

499

00:22:05,020 --> 00:22:02,390

a sha WA and here's a headline a sha woo

500

00:22:05,570 --> 00:22:05,030

photographer captures unidentified

501
00:22:09,080 --> 00:22:05,580

flying

502
00:22:11,960 --> 00:22:09,090

object Ken rice said he's never seen

503
00:22:13,210 --> 00:22:11,970

anything like this and he has no idea

504
00:22:16,450 --> 00:22:13,220

what it is

505
00:22:18,740 --> 00:22:16,460

carvanha pasión gets the byline here and

506
00:22:21,470 --> 00:22:18,750

gentle listeners if you haven't yet

507
00:22:25,280 --> 00:22:21,480

trekked on over to UFO headline news

508
00:22:27,830 --> 00:22:25,290

calm Oh a perfect opportunity we have no

509
00:22:30,080 --> 00:22:27,840

way to really describe this photograph

510
00:22:32,900 --> 00:22:30,090

or the subject of the photograph

511
00:22:36,140 --> 00:22:32,910

specifically it sort of resembles the

512
00:22:39,590 --> 00:22:36,150

bottom part of a sunflower with all the

513
00:22:42,380 --> 00:22:39,600

petals removed or an inflated apple pie

514

00:22:44,180 --> 00:22:42,390

with a tentacle oh you're just going to

515

00:22:46,700 --> 00:22:44,190

have to see it for yourselves make your

516

00:22:49,760 --> 00:22:46,710

own deduction to this broadcaster it

517

00:22:53,210 --> 00:22:49,770

somehow looks organic but here's the

518

00:22:55,460 --> 00:22:53,220

story wildlife photographer Ken rice was

519

00:22:57,980 --> 00:22:55,470

out shooting photos on Saturday when

520

00:23:01,010 --> 00:22:57,990

something unusual suddenly appeared in

521

00:23:01,730 --> 00:23:01,020

his camera lens quote it came out of

522

00:23:04,430 --> 00:23:01,740

nowhere

523

00:23:06,920 --> 00:23:04,440

this thing and quotes said the Oshawa

524

00:23:08,110 --> 00:23:06,930

resident who was at the marsh area near

525

00:23:10,760 --> 00:23:08,120

the General Motors of Canada

526
00:23:14,630 --> 00:23:10,770
headquarters that's located on Colonel

527
00:23:17,600 --> 00:23:14,640
Sam drive it was about 7:45 p.m. on June

528
00:23:20,750 --> 00:23:17,610
17th when ken rice noticed this object

529
00:23:22,820 --> 00:23:20,760
off in the distance quote I was walking

530
00:23:26,330 --> 00:23:22,830
back to my car and I just saw something

531
00:23:29,090 --> 00:23:26,340
pop out of nowhere way up high far away

532
00:23:31,580 --> 00:23:29,100
in the sky end quotes he said quote I

533
00:23:33,560 --> 00:23:31,590
thought it was a big turkey vulture so I

534
00:23:36,620 --> 00:23:33,570
just shot a picture of it anyway and

535
00:23:39,040 --> 00:23:36,630
then it kind of hovered it sat there for

536
00:23:41,870 --> 00:23:39,050
a minute and then it took off end quotes

537
00:23:44,870 --> 00:23:41,880
after returning home rice took a closer

538
00:23:48,530 --> 00:23:44,880

look at this image and he says he has no

539

00:23:50,810 --> 00:23:48,540

idea what this could be quote a balloon

540

00:23:54,350 --> 00:23:50,820

wouldn't go that fast and disappear

541

00:23:56,300 --> 00:23:54,360

number one and it was too high nobody

542

00:23:58,850 --> 00:23:56,310

would have been flying a kite there it's

543

00:24:01,370 --> 00:23:58,860

just railroad tracks and the road there

544

00:24:04,130 --> 00:24:01,380

was there was nobody around I didn't see

545

00:24:04,700 --> 00:24:04,140

anybody and where did this thing go end

546

00:24:07,190 --> 00:24:04,710

quotes

547

00:24:10,040 --> 00:24:07,200

ken rice has shown the photo to several

548

00:24:12,740 --> 00:24:10,050

people even posted it on Facebook but so

549

00:24:16,100 --> 00:24:12,750

far nobody has been able to identify it

550

00:24:18,500 --> 00:24:16,110

quote it's just really odd I've never

551
00:24:18,890 --> 00:24:18,510
seen anything like that I looked on the

552
00:24:20,690 --> 00:24:18,900
intern

553
00:24:23,150 --> 00:24:20,700
to find weather balloons that kind of

554
00:24:24,920 --> 00:24:23,160
thing to see what it might be but none

555
00:24:28,010 --> 00:24:24,930
of the photos I found look anything like

556
00:24:30,500 --> 00:24:28,020
this and quotes he said he continued

557
00:24:33,710 --> 00:24:30,510
quote you hear people all the time with

558
00:24:35,990 --> 00:24:33,720
the UFO stuff but a UFO simply stands

559
00:24:38,900 --> 00:24:36,000
for unidentified flying object

560
00:24:41,840 --> 00:24:38,910
it doesn't mean aliens and to me it's an

561
00:24:45,410 --> 00:24:41,850
unidentified flying object I don't know

562
00:24:48,020 --> 00:24:45,420
what it is end quotes sad to say gentle

563
00:24:50,210 --> 00:24:48,030

listeners nor do we head on over check

564

00:24:53,390 --> 00:24:50,220

out that photograph but right now we've

565

00:24:55,580 --> 00:24:53,400

got a zoom because that's a wrap thank

566

00:24:58,280 --> 00:24:55,590

you for listening to inception Radio

567

00:25:01,610 --> 00:24:58,290

Network caller today's broadcast a UFO

568

00:25:03,860 --> 00:25:01,620

headline news calm loving kindness we're

569

00:25:04,900 --> 00:25:03,870

all in this together this is Carol
