

# UFO Headline News Thursday July 6th, 2017

Listen on

[inceptionradionetwork.com](http://inceptionradionetwork.com)

1  
00:00:05,829 --> 00:00:03,110  
so what's up in the sky for this first

2  
00:00:06,510 --> 00:00:05,839  
thursday in the month of july according

3  
00:00:09,830 --> 00:00:06,520  
to

4  
00:00:11,270 --> 00:00:09,840  
earthsky.org we can see the moon closest

5  
00:00:13,430 --> 00:00:11,280  
to saturn

6  
00:00:16,150 --> 00:00:13,440  
the very bright waxing gibbous moon is

7  
00:00:19,029 --> 00:00:16,160  
going to erase many stars from the slate

8  
00:00:21,429 --> 00:00:19,039  
of night so the question is posed will

9  
00:00:22,790 --> 00:00:21,439  
you see the planet saturn just south of

10  
00:00:25,590 --> 00:00:22,800  
tonight's moon

11  
00:00:26,550 --> 00:00:25,600  
probably if you look and if clouds don't

12  
00:00:28,630 --> 00:00:26,560  
hide them

13  
00:00:31,349 --> 00:00:28,640

here's a clever suggestion from bruce

14

00:00:34,150 --> 00:00:31,359

mcclure who writes this try covering the

15

00:00:35,190 --> 00:00:34,160

moon with your finger to gaze at nearby

16

00:00:38,150 --> 00:00:35,200

saturn

17

00:00:40,389 --> 00:00:38,160

although the supergiant red antares is

18

00:00:42,229 --> 00:00:40,399

not bright as saturn it might be easier

19

00:00:43,590 --> 00:00:42,239

to see since it's farther from the

20

00:00:44,510 --> 00:00:43,600

moon's glare

21

00:00:51,190 --> 00:00:44,520

at

22

00:00:53,430 --> 00:00:51,200

lots more about those two celestial

23

00:00:56,310 --> 00:00:53,440

lights in the moon's vicinity tonight

24

00:00:58,709 --> 00:00:56,320

that would be antares and saturn saturn

25

00:01:00,790 --> 00:00:58,719

is the sixth planet out from the sun

26

00:01:03,110 --> 00:01:00,800

it's the farthest world you can easily

27

00:01:06,550 --> 00:01:03,120

see with your unaided eye

28

00:01:08,710 --> 00:01:06,560

it's ten astronomical units from the sun

29

00:01:11,750 --> 00:01:08,720

in other words ten times the earth's sun

30

00:01:13,830 --> 00:01:11,760

distance and right now it's about nine

31

00:01:16,710 --> 00:01:13,840

again here at inception radio network

32

00:01:19,109 --> 00:01:16,720

ufo headline news we offer our promise

33

00:01:23,109 --> 00:01:19,119

never to spring any kind of tests or pop

34

00:01:26,550 --> 00:01:23,119

quizzes but fyi one astronomical unit

35

00:01:30,230 --> 00:01:26,560

from earth equals about 93 million miles

36

00:01:32,149 --> 00:01:30,240

or 150 million kilometers

37

00:01:34,230 --> 00:01:32,159

saturn's often called the jewel of the

38

00:01:35,670 --> 00:01:34,240

solar system because of its gorgeous

39

00:01:38,069 --> 00:01:35,680

ring system

40

00:01:41,109 --> 00:01:38,079

saturn's rings are enormously expansive

41

00:01:43,350 --> 00:01:41,119

and wide but they're extremely thin

42

00:01:45,270 --> 00:01:43,360

the main rings extend nearly as far as

43

00:01:48,230 --> 00:01:45,280

the moon's distance from earth yet

44

00:01:50,789 --> 00:01:48,240

they're only about one kilometer thick

45

00:01:53,190 --> 00:01:50,799

with even a modest telescope you should

46

00:01:55,109 --> 00:01:53,200

be able to see saturn's rings easily for

47

00:01:58,069 --> 00:01:55,119

the whole month of july this year

48

00:02:00,230 --> 00:01:58,079

they're inclined at nearly 27 degrees

49

00:02:02,469 --> 00:02:00,240

from edge on

50

00:02:04,709 --> 00:02:02,479

saturn the second largest planet after

51  
00:02:08,229 --> 00:02:04,719  
jupiter has a diameter that's a good

52  
00:02:10,949 --> 00:02:08,239  
nine times greater than earth's like

53  
00:02:14,150 --> 00:02:10,959  
jupiter saturn is a gas giant world

54  
00:02:17,430 --> 00:02:14,160  
composed of mainly hydrogen and helium

55  
00:02:20,630 --> 00:02:17,440  
unlike those inner rocky planets mercury

56  
00:02:24,309 --> 00:02:20,640  
venus earth and mars saturn and jupiter

57  
00:02:26,070 --> 00:02:24,319  
have no solid surfaces on which to stand

58  
00:02:27,990 --> 00:02:26,080  
ponder that

59  
00:02:30,710 --> 00:02:28,000  
antares is the brightest star in the

60  
00:02:33,030 --> 00:02:30,720  
constellation scorpius the scorpion it's

61  
00:02:36,070 --> 00:02:33,040  
a red supergiant star

62  
00:02:39,350 --> 00:02:36,080  
in fact this star dwarfs the sun to

63  
00:02:40,390 --> 00:02:39,360

almost nothingness something else to

64

00:02:41,670 --> 00:02:40,400

ponder

65

00:02:44,470 --> 00:02:41,680

while the volume of the sun is

66

00:02:47,270 --> 00:02:44,480

approximately 1.3 million times that of

67

00:02:50,550 --> 00:02:47,280

our planet earth antares has a volume of

68

00:02:53,430 --> 00:02:50,560

hundreds of millions of suns

69

00:02:55,589 --> 00:02:53,440

as bruce mcclure puts it if by some bit

70

00:02:58,229 --> 00:02:55,599

of magic antares were suddenly

71

00:03:01,190 --> 00:02:58,239

substituted for our sun the surface of

72

00:03:03,589 --> 00:03:01,200

the star would extend well past the

73

00:03:06,229 --> 00:03:03,599

orbit of mars

74

00:03:08,149 --> 00:03:06,239

antares is classified as an m1

75

00:03:11,270 --> 00:03:08,159

supergiant star

76  
00:03:13,830 --> 00:03:11,280  
that m1 designation means that antares

77  
00:03:15,110 --> 00:03:13,840  
is reddish in color and cooler than many

78  
00:03:18,149 --> 00:03:15,120  
other stars

79  
00:03:21,430 --> 00:03:18,159  
its surface temperature about 3 500

80  
00:03:24,149 --> 00:03:21,440  
kelvins that's almost 5 800 degrees

81  
00:03:27,990 --> 00:03:24,159  
fahrenheit is in contrast to about 10

82  
00:03:30,070 --> 00:03:28,000  
000 degrees fahrenheit for our sun

83  
00:03:33,589 --> 00:03:30,080  
even though antares surface temperature

84  
00:03:35,910 --> 00:03:33,599  
is relatively low antares tremendous

85  
00:03:38,710 --> 00:03:35,920  
surface area the surface from which

86  
00:03:39,670 --> 00:03:38,720  
light can escape makes this star very

87  
00:03:43,589 --> 00:03:39,680  
bright

88  
00:03:46,949 --> 00:03:43,599

in fact antares approaches 11 000 times

89

00:03:49,589 --> 00:03:46,959

the brilliance of our puny sun which is

90

00:03:51,750 --> 00:03:49,599

by the way a g2 star

91

00:03:53,670 --> 00:03:51,760

but that's just in terms of visible

92

00:03:56,149 --> 00:03:53,680

light when all wavelengths of

93

00:03:59,270 --> 00:03:56,159

electromagnetic radiation are considered

94

00:04:02,550 --> 00:03:59,280

antares pumps out more than 60 thousand

95

00:04:03,830 --> 00:04:02,560

times the energy of our sun thank you

96

00:04:06,229 --> 00:04:03,840

very much

97

00:04:09,429 --> 00:04:06,239

so here's the bottom line take a look at

98

00:04:12,470 --> 00:04:09,439

the moon on july 6 2017 and you'll

99

00:04:14,630 --> 00:04:12,480

likely notice two nearby objects the

100

00:04:18,069 --> 00:04:14,640

closer object to tonight's moon the

101

00:04:20,390 --> 00:04:18,079

planet saturn the other side the star

102

00:04:22,469 --> 00:04:20,400

antares enjoy

103

00:04:25,749 --> 00:04:22,479

here's something else to enjoy dental

104

00:04:29,110 --> 00:04:25,759

listeners this just in via one of our

105

00:04:32,629 --> 00:04:29,120

station owners and producer joe champion

106

00:04:36,390 --> 00:04:32,639

aka the man who never sleeps

107

00:04:41,350 --> 00:04:36,400

irn inception radio network is now a

108

00:04:45,350 --> 00:04:41,360

presence on i heart radio yep that's i h

109

00:04:48,230 --> 00:04:45,360

e a r t radio or just that icon in the

110

00:04:50,710 --> 00:04:48,240

middle the big red heart i heart radio

111

00:04:53,670 --> 00:04:50,720

yet another way to listen to all the

112

00:04:56,629 --> 00:04:53,680

fine programming that is part and parcel

113

00:04:58,710 --> 00:04:56,639

of inception radio network voice of the

114

00:05:01,749 --> 00:04:58,720

fringe majority

115

00:05:03,590 --> 00:05:01,759

here's another article from earthsky.org

116

00:05:06,870 --> 00:05:03,600

we picked this up from their space

117

00:05:09,749 --> 00:05:06,880

department it's about juno that juno

118

00:05:12,310 --> 00:05:09,759

probe and its next task

119

00:05:14,469 --> 00:05:12,320

juno says the juno spacecraft which as

120

00:05:17,430 --> 00:05:14,479

of today has been in orbit around the

121

00:05:20,469 --> 00:05:17,440

giant planet jupiter for one year

122

00:05:24,710 --> 00:05:20,479

will fly directly over jupiter's famous

123

00:05:27,029 --> 00:05:24,720

great red spot on july 10 2017. probing

124

00:05:29,590 --> 00:05:27,039

for the spot's roots in the depths of

125

00:05:32,230 --> 00:05:29,600

the planet's cloud layers it'll be part

126

00:05:36,950 --> 00:05:32,240

of something called perijove7

127

00:05:40,950 --> 00:05:39,430

one of juno's periodic science flybys

128

00:05:44,230 --> 00:05:40,960

over jupiter in the course of the

129

00:05:48,390 --> 00:05:44,240

spacecraft's highly elliptical orbit

130

00:05:52,390 --> 00:05:48,400

the red spot it's a 10 000 mile wide 16

131

00:05:54,790 --> 00:05:52,400

000 kilometer wide storm on jupiter

132

00:05:58,390 --> 00:05:54,800

it's two to three times the size of our

133

00:06:01,110 --> 00:05:58,400

entire planet earth about 11 earths in

134

00:06:03,029 --> 00:06:01,120

fact could fit side by side in front of

135

00:06:05,350 --> 00:06:03,039

jupiter itself

136

00:06:07,590 --> 00:06:05,360

scott bolton principal investigator of

137

00:06:10,070 --> 00:06:07,600

juno for the southwest research

138

00:06:11,029 --> 00:06:10,080

institute in san antonio texas said

139

00:06:13,909 --> 00:06:11,039

quote

140

00:06:15,990 --> 00:06:13,919

jupiter's mysterious great red spot is

141

00:06:19,670 --> 00:06:16,000

probably the best known feature of

142

00:06:22,150 --> 00:06:19,680

jupiter this monumental storm has raged

143

00:06:23,430 --> 00:06:22,160

on the solar system's biggest planet for

144

00:06:26,150 --> 00:06:23,440

centuries

145

00:06:28,950 --> 00:06:26,160

now juno and her cloud penetrating

146

00:06:31,590 --> 00:06:28,960

science instruments will dive in to see

147

00:06:34,150 --> 00:06:31,600

how deep the roots of this storm go and

148

00:06:37,350 --> 00:06:34,160

help us understand how this giant storm

149

00:06:38,390 --> 00:06:37,360

works and what makes it so special end

150

00:06:40,710 --> 00:06:38,400

quotes

151  
00:06:43,110 --> 00:06:40,720  
juno's highly elliptical orbit is

152  
00:06:45,150 --> 00:06:43,120  
designed to avoid damage from jupiter's

153  
00:06:47,430 --> 00:06:45,160  
hazardous radiation belts and

154  
00:06:49,510 --> 00:06:47,440  
simultaneously bring it closer to

155  
00:06:51,029 --> 00:06:49,520  
jupiter than any other previous

156  
00:06:53,909 --> 00:06:51,039  
spacecraft

157  
00:06:56,629 --> 00:06:53,919  
perijove and that's the point at which

158  
00:07:00,469 --> 00:06:56,639  
an orbit comes closest to jupiter's

159  
00:07:04,710 --> 00:07:00,479  
center will be on monday july 10th at 6

160  
00:07:07,029 --> 00:07:04,720  
55 pm pacific daylight time that's 9 55

161  
00:07:09,749 --> 00:07:07,039  
p.m eastern daylight time

162  
00:07:10,870 --> 00:07:09,759  
at the time of perijove juno will be

163  
00:07:14,870 --> 00:07:10,880

about 2

164

00:07:18,309 --> 00:07:14,880

200 miles or 3 500 kilometers above the

165

00:07:20,790 --> 00:07:18,319

planet's cloud tops and then 11 minutes

166

00:07:23,309 --> 00:07:20,800

and 33 seconds later jupiter will have

167

00:07:26,189 --> 00:07:23,319

covered another 24

168

00:07:29,830 --> 00:07:26,199

713 miles 39

169

00:07:33,430 --> 00:07:29,840

771 kilometers and will be directly

170

00:07:35,990 --> 00:07:33,440

above that coiling crimson cloud top of

171

00:07:38,309 --> 00:07:36,000

jupiter's great red spot

172

00:07:41,510 --> 00:07:38,319

the spacecraft will pass about 5600

173

00:07:43,350 --> 00:07:41,520

miles 9000 kilometers above the giant

174

00:07:46,390 --> 00:07:43,360

red spot clouds

175

00:07:49,029 --> 00:07:46,400

juno has eight spacecraft instruments on

176  
00:07:51,909 --> 00:07:49,039  
board as well as its imager called

177  
00:07:53,270 --> 00:07:51,919  
junocam they'll all be on during this

178  
00:07:56,550 --> 00:07:53,280  
flyby

179  
00:07:59,670 --> 00:07:56,560  
juno launched august 5th 2011 from cape

180  
00:08:02,230 --> 00:07:59,680  
canaveral florida its mission to probe

181  
00:08:05,189 --> 00:08:02,240  
beneath jupiter's cloud cover to study

182  
00:08:07,749 --> 00:08:05,199  
its auroras with the overall goal of

183  
00:08:11,350 --> 00:08:07,759  
learning more about the planet's origins

184  
00:08:13,270 --> 00:08:11,360  
structure atmosphere and magnetosphere

185  
00:08:15,909 --> 00:08:13,280  
and of course we're waiting for those

186  
00:08:18,950 --> 00:08:15,919  
images expect new jupiter red spot

187  
00:08:21,749 --> 00:08:18,960  
images in the days following july 10th

188  
00:08:24,390 --> 00:08:21,759

and right here at ufo headline news on

189

00:08:25,749 --> 00:08:24,400

inception radio network we will keep you

190

00:08:28,909 --> 00:08:25,759

in the loop

191

00:08:32,550 --> 00:08:28,919

and it's time to loop on over to

192

00:08:33,589 --> 00:08:32,560

ufostalker.com for an assortment of ufo

193

00:08:35,190 --> 00:08:33,599

sightings

194

00:08:37,750 --> 00:08:35,200

there's an interesting one that comes

195

00:08:39,990 --> 00:08:37,760

out of denver colorado there's the

196

00:08:42,630 --> 00:08:40,000

sighting itself and then a comment

197

00:08:45,110 --> 00:08:42,640

posted after the sighting in that

198

00:08:46,829 --> 00:08:45,120

section we continue to remind you about

199

00:08:49,590 --> 00:08:46,839

gentlelisteners at

200

00:08:51,670 --> 00:08:49,600

ufostalker.com you can leave help with

201  
00:08:52,870 --> 00:08:51,680  
somebody's sighting or you can report

202  
00:08:55,590 --> 00:08:52,880  
your own

203  
00:08:57,829 --> 00:08:55,600  
and here's the case it's move on number

204  
00:08:59,910 --> 00:08:57,839  
84833

205  
00:09:04,870 --> 00:08:59,920  
the date of the sighting is july 4th

206  
00:09:07,350 --> 00:09:04,880  
2017. it was reported july 5th 2017

207  
00:09:11,430 --> 00:09:07,360  
in summary the witness describes this

208  
00:09:13,350 --> 00:09:11,440  
object as four teardrop objects moving

209  
00:09:15,430 --> 00:09:13,360  
in a circle

210  
00:09:17,829 --> 00:09:15,440  
under the categories that include citing

211  
00:09:21,350 --> 00:09:17,839  
specifics our witness lists a viewing

212  
00:09:24,310 --> 00:09:21,360  
distance over one mile an altitude over

213  
00:09:26,230 --> 00:09:24,320

500 feet no cloud cover the siding

214

00:09:29,269 --> 00:09:26,240

duration was two minutes

215

00:09:32,230 --> 00:09:29,279

the object features unknown its flight

216

00:09:35,110 --> 00:09:32,240

path path with directional change and

217

00:09:37,269 --> 00:09:35,120

the shapes involved in this event are

218

00:09:39,190 --> 00:09:37,279

described as teardrop

219

00:09:41,829 --> 00:09:39,200

there isn't any weather with this

220

00:09:44,870 --> 00:09:41,839

sighting here's the sighting itself yes

221

00:09:47,110 --> 00:09:44,880

we preface it with it was the 4th of

222

00:09:48,630 --> 00:09:47,120

july however

223

00:09:50,710 --> 00:09:48,640

here's the event

224

00:09:53,590 --> 00:09:50,720

my wife and i were viewing fireworks

225

00:09:56,230 --> 00:09:53,600

over the denver metropolitan area as we

226

00:09:57,670 --> 00:09:56,240

have done for over 40 years at this

227

00:10:01,750 --> 00:09:57,680

location

228

00:10:05,030 --> 00:10:01,760

my wife and i saw four teardrop objects

229

00:10:06,230 --> 00:10:05,040

moving in what appeared to be an oval

230

00:10:08,630 --> 00:10:06,240

shape

231

00:10:12,630 --> 00:10:08,640

the objects looked to be far to the east

232

00:10:16,230 --> 00:10:12,640

of denver thus 20 to 30 miles away

233

00:10:17,750 --> 00:10:16,240

they appeared one by one until all four

234

00:10:21,030 --> 00:10:17,760

were visible

235

00:10:22,230 --> 00:10:21,040

they seemed to turn and move in an oval

236

00:10:23,829 --> 00:10:22,240

path

237

00:10:27,110 --> 00:10:23,839

at times one or two of them would

238

00:10:29,590 --> 00:10:27,120

disappear and then reappear

239

00:10:31,910 --> 00:10:29,600

they were far above any of the fireworks

240

00:10:34,630 --> 00:10:31,920

we saw and they did not appear to behave

241

00:10:37,590 --> 00:10:34,640

like any fireworks i've ever seen

242

00:10:39,910 --> 00:10:37,600

and that's why they caught our attention

243

00:10:42,870 --> 00:10:39,920

i have viewed many aircraft at this very

244

00:10:45,590 --> 00:10:42,880

location for over 40 years they stayed

245

00:10:47,829 --> 00:10:45,600

at about the same level in the sky these

246

00:10:49,110 --> 00:10:47,839

things as they moved

247

00:10:52,310 --> 00:10:49,120

after a couple of minutes they

248

00:10:54,550 --> 00:10:52,320

disappeared one at a time

249

00:10:57,110 --> 00:10:54,560

we could not see any sign of smoke or

250

00:11:00,550 --> 00:10:57,120

exhaust near the objects the force

251  
00:11:03,030 --> 00:11:00,560  
seemed to move in some loose formation

252  
00:11:05,030 --> 00:11:03,040  
as they went in that oval

253  
00:11:07,670 --> 00:11:05,040  
we were looking east northeast from

254  
00:11:09,990 --> 00:11:07,680  
green mountain across the city of denver

255  
00:11:12,230 --> 00:11:10,000  
our location here our elevation is six

256  
00:11:14,630 --> 00:11:12,240  
thousand feet so we can see across

257  
00:11:16,630 --> 00:11:14,640  
denver to slightly beyond denver

258  
00:11:18,389 --> 00:11:16,640  
international airport

259  
00:11:21,670 --> 00:11:18,399  
these objects look to be somewhere

260  
00:11:23,750 --> 00:11:21,680  
between downtown denver and the horizon

261  
00:11:26,389 --> 00:11:23,760  
they were much bigger than any aircraft

262  
00:11:28,949 --> 00:11:26,399  
i've seen in that direction airplanes

263  
00:11:31,350 --> 00:11:28,959

and helicopter lights are much smaller

264

00:11:33,350 --> 00:11:31,360

than these objects compared to aircraft

265

00:11:36,550 --> 00:11:33,360

that we've seen at that distance these

266

00:11:38,470 --> 00:11:36,560

objects moved faster i wrote up my notes

267

00:11:39,750 --> 00:11:38,480

on the event right after the objects

268

00:11:42,230 --> 00:11:39,760

disappeared

269

00:11:44,870 --> 00:11:42,240

this event ended so quickly i did not

270

00:11:48,150 --> 00:11:44,880

have a chance to view it with binoculars

271

00:11:50,389 --> 00:11:48,160

or attempt to take a telephoto picture

272

00:11:53,430 --> 00:11:50,399

yes that seems to be part of this

273

00:11:55,670 --> 00:11:53,440

particular set of incidents where things

274

00:11:58,630 --> 00:11:55,680

happen so quickly one just sort of

275

00:12:01,110 --> 00:11:58,640

freezes and watches and thinks

276

00:12:02,990 --> 00:12:01,120

now here is something posted at the end

277

00:12:04,550 --> 00:12:03,000

of this sighting at

278

00:12:06,509 --> 00:12:04,560

ufostalker.com

279

00:12:08,150 --> 00:12:06,519

it's submitted by somebody called

280

00:12:09,750 --> 00:12:08,160

e-m-i-m-e

281

00:12:12,069 --> 00:12:09,760

and here it goes

282

00:12:14,790 --> 00:12:12,079

we thought we were seeing things we live

283

00:12:16,790 --> 00:12:14,800

against south table mountain and we

284

00:12:18,069 --> 00:12:16,800

watched these things move in from the

285

00:12:19,670 --> 00:12:18,079

northeast

286

00:12:21,910 --> 00:12:19,680

at first we thought they were planes

287

00:12:25,030 --> 00:12:21,920

getting in line to land at denver

288

00:12:28,790 --> 00:12:25,040

international airport they moved west

289

00:12:29,829 --> 00:12:28,800

from dia then curved south to hover over

290

00:12:32,389 --> 00:12:29,839

denver

291

00:12:33,990 --> 00:12:32,399

they were bright in the sky the crafts

292

00:12:36,389 --> 00:12:34,000

were illuminated

293

00:12:39,190 --> 00:12:36,399

helicopters have lights and these did

294

00:12:41,910 --> 00:12:39,200

not even though they were bright

295

00:12:44,550 --> 00:12:41,920

we watched as they spiraled blinked out

296

00:12:48,230 --> 00:12:44,560

and then blinked back on

297

00:12:49,829 --> 00:12:48,240

they moved smoothly almost like drones

298

00:12:52,150 --> 00:12:49,839

when they were flying south they were in

299

00:12:54,550 --> 00:12:52,160

a tight formation that loosened up once

300

00:12:56,710 --> 00:12:54,560

they got over the city of denver

301

00:12:59,110 --> 00:12:56,720

we filmed them for two minutes over

302

00:13:01,190 --> 00:12:59,120

denver wish we'd started filming when we

303

00:13:03,030 --> 00:13:01,200

first noticed them north of denver

304

00:13:04,069 --> 00:13:03,040

international airport

305

00:13:06,629 --> 00:13:04,079

we've heard they could have been

306

00:13:08,389 --> 00:13:06,639

parachuters hang gliders but their

307

00:13:11,030 --> 00:13:08,399

distance from the mountains and their

308

00:13:14,230 --> 00:13:11,040

closeness to denver and the fact that

309

00:13:15,990 --> 00:13:14,240

these crafts were perfectly lit white it

310

00:13:18,069 --> 00:13:16,000

just doesn't make sense

311

00:13:20,629 --> 00:13:18,079

we've also heard they could be drones

312

00:13:23,190 --> 00:13:20,639

they were way too big however in our

313

00:13:25,590 --> 00:13:23,200

minds to be drones and drones aren't

314

00:13:28,150 --> 00:13:25,600

usually bigger than say a dog and

315

00:13:30,310 --> 00:13:28,160

they're not allowed over denver

316

00:13:33,350 --> 00:13:30,320

international airport if these were

317

00:13:34,550 --> 00:13:33,360

drones we're talking secret military

318

00:13:37,509 --> 00:13:34,560

style

319

00:13:39,990 --> 00:13:37,519

in spite of this second witness from the

320

00:13:42,710 --> 00:13:40,000

denver area's mention of filming for two

321

00:13:45,190 --> 00:13:42,720

minutes over denver there isn't any link

322

00:13:46,949 --> 00:13:45,200

to film footage submitted we'll keep our

323

00:13:49,190 --> 00:13:46,959

eyes on that

324

00:13:53,190 --> 00:13:49,200

but there is something to look at with

325

00:13:55,829 --> 00:13:53,200

this case which undeniably is connected

326

00:13:58,790 --> 00:13:55,839

to the previous two you'll find video

327

00:14:02,470 --> 00:13:58,800

later at ufoheadlinenews.com

328

00:14:05,030 --> 00:14:02,480

it's mufon case number 84837

329

00:14:06,470 --> 00:14:05,040

the setting of this sighting is arvada

330

00:14:08,949 --> 00:14:06,480

colorado

331

00:14:12,949 --> 00:14:08,959

the sighting date is the 4th of july

332

00:14:16,389 --> 00:14:12,959

2017 and it got a next day report

333

00:14:18,870 --> 00:14:16,399

the summary says four orbs in sky over

334

00:14:21,189 --> 00:14:18,880

denver that's beginning to sound

335

00:14:24,230 --> 00:14:21,199

familiar the sighting specifics of

336

00:14:28,069 --> 00:14:24,240

viewing distance close 501 feet

337

00:14:30,230 --> 00:14:28,079

eventually one mile an altitude unknown

338

00:14:32,710 --> 00:14:30,240

the sighting duration is four minutes

339

00:14:35,670 --> 00:14:32,720

the object features unknown

340

00:14:37,590 --> 00:14:35,680

the flight path hovering then path

341

00:14:40,230 --> 00:14:37,600

and these objects are described as

342

00:14:42,629 --> 00:14:40,240

having been shaped like spheres

343

00:14:44,710 --> 00:14:42,639

it's a short report

344

00:14:46,870 --> 00:14:44,720

the video footage is absolutely

345

00:14:49,189 --> 00:14:46,880

astounding at metropcs we let the

346

00:14:51,430 --> 00:14:49,199

numbers do the talking four enjoy a

347

00:14:54,069 --> 00:14:51,440

reliable 4g lte network that's faster

348

00:14:56,629 --> 00:14:54,079

than sprint two get two free smartphones

349

00:14:58,389 --> 00:14:56,639

when you switch to metropcs 99. the

350

00:15:01,670 --> 00:14:58,399

store for details terms and conditions

361  
00:15:20,949 --> 00:15:18,639  
we have no idea what we're looking at

362  
00:15:23,509 --> 00:15:20,959  
here there are four objects they don't

363  
00:15:26,230 --> 00:15:23,519

seem to morph they change direction and

364

00:15:29,910 --> 00:15:26,240

they seem somehow connected but not

365

00:15:32,189 --> 00:15:29,920

attached if it's a hoax well we're not

366

00:15:34,150 --> 00:15:32,199

experts head on over later to

367

00:15:36,470 --> 00:15:34,160

ufoheadlinenews.com and do your own

368

00:15:38,470 --> 00:15:36,480

analysis here's the account from the

369

00:15:40,389 --> 00:15:38,480

witness first person

370

00:15:44,069 --> 00:15:40,399

we were watching fireworks

371

00:15:47,269 --> 00:15:44,079

and then saw four hovering orbs about 30

372

00:15:50,790 --> 00:15:47,279

to 45 seconds after seeing them i was

373

00:15:53,350 --> 00:15:50,800

able to get my camera out and record

374

00:15:56,790 --> 00:15:53,360

the orbs stayed in one spot for several

375

00:16:00,870 --> 00:15:56,800

seconds then they'd come together as one

376  
00:16:03,509 --> 00:16:00,880  
and then separate they formed a y shape

377  
00:16:05,430 --> 00:16:03,519  
and then a line before they disappeared

378  
00:16:07,590 --> 00:16:05,440  
one at a time

379  
00:16:10,069 --> 00:16:07,600  
these were not fireworks as they stayed

380  
00:16:12,710 --> 00:16:10,079  
in the sky for at least two minutes

381  
00:16:15,509 --> 00:16:12,720  
my video is one minute and 49 seconds

382  
00:16:17,990 --> 00:16:15,519  
long and it was at least 30 to 45

383  
00:16:20,470 --> 00:16:18,000  
seconds if not longer before i realized

384  
00:16:23,030 --> 00:16:20,480  
what was happening and even began to

385  
00:16:25,829 --> 00:16:23,040  
record on my phone

386  
00:16:27,910 --> 00:16:25,839  
this is fascinating footage it's sort of

387  
00:16:31,189 --> 00:16:27,920  
reminiscent to this broadcaster of that

388  
00:16:33,829 --> 00:16:31,199

amazing iconic scene in close encounters

389

00:16:35,910 --> 00:16:33,839

of the third kind as a matter of fact

390

00:16:39,110 --> 00:16:35,920

where everyone is sitting kind of camped

391

00:16:40,389 --> 00:16:39,120

out on that hillside waiting for the ufo

392

00:16:42,389 --> 00:16:40,399

contact

393

00:16:44,389 --> 00:16:42,399

in this case our witness sort of

394

00:16:46,629 --> 00:16:44,399

narrates what she's filming and she

395

00:16:48,870 --> 00:16:46,639

remarks that other people are also

396

00:16:51,030 --> 00:16:48,880

getting footage of this it's going to be

397

00:16:53,430 --> 00:16:51,040

interesting to see how this rolls out

398

00:16:56,069 --> 00:16:53,440

you can also see the fireworks much

399

00:16:59,350 --> 00:16:56,079

lower to the horizon hard to imagine

400

00:17:02,310 --> 00:16:59,360

these could be fireworks so eyes to

401  
00:17:05,270 --> 00:17:02,320  
those colorado skies everybody

402  
00:17:07,909 --> 00:17:05,280  
what say we win our way to kansas city

403  
00:17:12,470 --> 00:17:07,919  
missouri now for a black triangle

404  
00:17:15,350 --> 00:17:12,480  
sighting move on case number 84796

405  
00:17:17,990 --> 00:17:15,360  
this took place june 20th but nobody

406  
00:17:18,949 --> 00:17:18,000  
reported it till the 3rd of july this

407  
00:17:20,189 --> 00:17:18,959  
year

408  
00:17:23,510 --> 00:17:20,199  
in summary

409  
00:17:25,590 --> 00:17:23,520  
triangular lights spotted over downtown

410  
00:17:27,750 --> 00:17:25,600  
kansas city

411  
00:17:29,270 --> 00:17:27,760  
it's a different shape but another

412  
00:17:31,350 --> 00:17:29,280  
downtown

413  
00:17:32,710 --> 00:17:31,360

interesting there are photos submitted

414

00:17:34,710 --> 00:17:32,720

with this account

415

00:17:38,310 --> 00:17:34,720

the sighting specifics viewing distance

416

00:17:39,990 --> 00:17:38,320

over one mile altitude over 500 feet

417

00:17:42,310 --> 00:17:40,000

under cloud cover

418

00:17:45,110 --> 00:17:42,320

the object features unknown

419

00:17:48,470 --> 00:17:45,120

its flight path stationary and then

420

00:17:50,230 --> 00:17:48,480

unknown and of course it was shaped like

421

00:17:51,909 --> 00:17:50,240

a triangle

422

00:17:55,029 --> 00:17:51,919

the maximum temperature at the time of

423

00:17:57,990 --> 00:17:55,039

this sighting was rather warm 91 degrees

424

00:18:00,630 --> 00:17:58,000

fahrenheit in kansas city missouri 33

425

00:18:04,870 --> 00:18:00,640

degrees celsius the minimum temperature

426

00:18:07,510 --> 00:18:04,880

70 degrees fahrenheit 21 degrees celsius

427

00:18:10,470 --> 00:18:07,520

all the visibility factors the standard

428

00:18:12,549 --> 00:18:10,480

maximum mean and minimum were 10 miles

429

00:18:14,150 --> 00:18:12,559

16 kilometers

430

00:18:16,230 --> 00:18:14,160

and at the time of this event there

431

00:18:18,070 --> 00:18:16,240

didn't seem to be anything abnormal

432

00:18:20,390 --> 00:18:18,080

about the weather

433

00:18:22,470 --> 00:18:20,400

here's what happened

434

00:18:24,390 --> 00:18:22,480

i live in kansas city and while i was

435

00:18:27,029 --> 00:18:24,400

with a few of my friends at this spot

436

00:18:28,870 --> 00:18:27,039

that overlooks the city i took a picture

437

00:18:30,630 --> 00:18:28,880

on snapchat

438

00:18:32,950 --> 00:18:30,640

i swiped right a couple of times to find

439

00:18:34,470 --> 00:18:32,960

the right filter posted it and kind of

440

00:18:36,950 --> 00:18:34,480

forgot about it

441

00:18:38,470 --> 00:18:36,960

that is until i looked at the picture

442

00:18:40,390 --> 00:18:38,480

again in the morning

443

00:18:41,590 --> 00:18:40,400

and noticed something i hadn't seen

444

00:18:44,470 --> 00:18:41,600

before

445

00:18:47,029 --> 00:18:44,480

in the middle left just above the city

446

00:18:49,029 --> 00:18:47,039

you can see three faint lights in the

447

00:18:50,549 --> 00:18:49,039

shape of a triangle

448

00:18:53,190 --> 00:18:50,559

i'm 100

449

00:18:54,950 --> 00:18:53,200

positive these were not stars or a plane

450

00:18:56,789 --> 00:18:54,960

or anything like that

451  
00:18:58,070 --> 00:18:56,799  
we didn't even see the lights with our

452  
00:19:00,470 --> 00:18:58,080  
naked eyes

453  
00:19:03,029 --> 00:19:00,480  
there's proof it's not just a filter or

454  
00:19:05,190 --> 00:19:03,039  
a smudge or anything because you can see

455  
00:19:06,390 --> 00:19:05,200  
a plane in the upper right corner of the

456  
00:19:10,390 --> 00:19:06,400  
picture

457  
00:19:12,390 --> 00:19:10,400  
few other filters on an app on my

458  
00:19:13,270 --> 00:19:12,400  
desktop and i could make out a kind of

459  
00:19:16,630 --> 00:19:13,280  
rim

460  
00:19:18,310 --> 00:19:16,640  
that was connecting these lights

461  
00:19:21,190 --> 00:19:18,320  
although i'm not very proficient at

462  
00:19:22,630 --> 00:19:21,200  
photo editing what do you think our

463  
00:19:24,710 --> 00:19:22,640

witness asks

464

00:19:26,549 --> 00:19:24,720

i'm pretty spooked myself maybe somebody

465

00:19:28,310 --> 00:19:26,559

who's more photographically proficient

466

00:19:31,029 --> 00:19:28,320

could give it a crack and see if they

467

00:19:32,870 --> 00:19:31,039

can find something more

468

00:19:35,110 --> 00:19:32,880

i've attached the night picture that the

469

00:19:37,909 --> 00:19:35,120

object can be seen in as well as a

470

00:19:39,909 --> 00:19:37,919

daytime picture of the spot we were

471

00:19:41,990 --> 00:19:39,919

during the event

472

00:19:43,750 --> 00:19:42,000

they're very interesting shots and you

473

00:19:47,750 --> 00:19:43,760

know where to check them out dental

474

00:19:52,549 --> 00:19:49,669

our trajectory takes us next to the

475

00:19:54,070 --> 00:19:52,559

state of pennsylvania the city of

476

00:19:56,230 --> 00:19:54,080

harleysville

477

00:19:58,470 --> 00:19:56,240

oh well we're picturing everybody

478

00:20:00,870 --> 00:19:58,480

writing harley's but that's another

479

00:20:03,909 --> 00:20:00,880

story it's the setting for mufon case

480

00:20:05,830 --> 00:20:03,919

number 84773

481

00:20:11,029 --> 00:20:05,840

the date of this sighting was july 2nd

482

00:20:12,789 --> 00:20:11,039

2017. it was submitted july 3rd 2017.

483

00:20:14,070 --> 00:20:12,799

here's what our witness offers in

484

00:20:16,470 --> 00:20:14,080

summary

485

00:20:19,350 --> 00:20:16,480

leaving our car well there you see there

486

00:20:22,870 --> 00:20:19,360

goes that stereotype of the bike leaving

487

00:20:25,029 --> 00:20:22,880

our car to go into the house we saw four

488

00:20:28,710 --> 00:20:25,039

stationary red lights

489

00:20:30,070 --> 00:20:28,720

half circle arc shape in the sky across

490

00:20:31,750 --> 00:20:30,080

the street

491

00:20:32,710 --> 00:20:31,760

there's a photo submitted with this

492

00:20:35,350 --> 00:20:32,720

account

493

00:20:37,909 --> 00:20:35,360

the citing specifics also submitted

494

00:20:40,630 --> 00:20:37,919

indicative viewing distance unknown an

495

00:20:43,029 --> 00:20:40,640

altitude also unknown

496

00:20:45,350 --> 00:20:43,039

the sighting duration was 15 minutes

497

00:20:47,590 --> 00:20:45,360

object features unknown

498

00:20:50,549 --> 00:20:47,600

the flight path was other and this

499

00:20:53,750 --> 00:20:50,559

object was shaped like a circle

500

00:20:55,350 --> 00:20:53,760

there isn't any weather let's proceed to

501  
00:20:57,750 --> 00:20:55,360  
the sighting

502  
00:20:59,350 --> 00:20:57,760  
my husband and i had just come back home

503  
00:21:01,590 --> 00:20:59,360  
we were getting out of our car after

504  
00:21:03,029 --> 00:21:01,600  
having gone to see a fireworks display

505  
00:21:04,789 --> 00:21:03,039  
with our child

506  
00:21:07,510 --> 00:21:04,799  
we left early because our child was

507  
00:21:09,750 --> 00:21:07,520  
frightened of those booming sounds

508  
00:21:12,149 --> 00:21:09,760  
we had just gotten out of the car i was

509  
00:21:14,870 --> 00:21:12,159  
unbuckling the back seat belt when i

510  
00:21:17,669 --> 00:21:14,880  
noticed what looked like a half circle

511  
00:21:19,510 --> 00:21:17,679  
of bright red lights in the sky

512  
00:21:21,909 --> 00:21:19,520  
since we've just been at a fireworks

513  
00:21:23,750 --> 00:21:21,919

display i was thinking this could be a

514

00:21:25,190 --> 00:21:23,760

neighbor who'd purchased some sort of

515

00:21:27,909 --> 00:21:25,200

new firework

516

00:21:30,950 --> 00:21:27,919

but these lights just stayed motionless

517

00:21:33,750 --> 00:21:30,960

in one spot my husband and i then

518

00:21:37,029 --> 00:21:33,760

noticed the lights were slowly moving in

519

00:21:38,390 --> 00:21:37,039

unison in a circle to the left very

520

00:21:40,710 --> 00:21:38,400

slowly

521

00:21:42,549 --> 00:21:40,720

after a few minutes each one seemed to

522

00:21:44,470 --> 00:21:42,559

diminish or pull back

523

00:21:47,110 --> 00:21:44,480

and at that point i was thinking this

524

00:21:50,390 --> 00:21:47,120

must be some type of flare

525

00:21:52,549 --> 00:21:50,400

finally only one light remained visible

526

00:21:54,870 --> 00:21:52,559

and my husband tried to take a phone

527

00:21:57,350 --> 00:21:54,880

video he said it was too far away though

528

00:21:58,710 --> 00:21:57,360

and it just looked like a tiny dot on

529

00:22:00,390 --> 00:21:58,720

the screen

530

00:22:03,190 --> 00:22:00,400

after this the remaining light moved

531

00:22:05,110 --> 00:22:03,200

slowly to the left in a straight line

532

00:22:06,549 --> 00:22:05,120

and it seemed to fade like the other

533

00:22:09,350 --> 00:22:06,559

lights had

534

00:22:12,149 --> 00:22:09,360

my husband sent the video to our email

535

00:22:14,789 --> 00:22:12,159

i was surprised and very upset to see

536

00:22:15,590 --> 00:22:14,799

that three lights are still visible on

537

00:22:17,350 --> 00:22:15,600

it

538

00:22:19,590 --> 00:22:17,360

even though we both only observed one

539

00:22:22,470 --> 00:22:19,600

light at the time he was filming and the

540

00:22:24,149 --> 00:22:22,480

lights also appear white on the video

541

00:22:25,750 --> 00:22:24,159

the lights we were looking at were very

542

00:22:27,669 --> 00:22:25,760

bright red

543

00:22:30,390 --> 00:22:27,679

they didn't blink at all they just were

544

00:22:32,470 --> 00:22:30,400

a constant red color

545

00:22:34,870 --> 00:22:32,480

i also noticed some tiny flashes of

546

00:22:37,270 --> 00:22:34,880

light near the larger lights when i look

547

00:22:40,390 --> 00:22:37,280

at the video and i did not see or notice

548

00:22:41,990 --> 00:22:40,400

those at the time we took the video

549

00:22:43,270 --> 00:22:42,000

i'm trying to find out what this might

550

00:22:46,149 --> 00:22:43,280

have been

551  
00:22:48,630 --> 00:22:46,159  
i'm more skeptical than anything else i

552  
00:22:50,950 --> 00:22:48,640  
just can't figure out what we were

553  
00:22:52,870 --> 00:22:50,960  
looking at tonight

554  
00:22:56,149 --> 00:22:52,880  
fascinating sighting they didn't get the

555  
00:22:59,430 --> 00:22:56,159  
video but there is just that one shot

556  
00:23:02,310 --> 00:22:59,440  
photographic evidence of some sort

557  
00:23:05,270 --> 00:23:02,320  
oh we've got evidence that our time is

558  
00:23:07,350 --> 00:23:05,280  
up here for today at ufo headline news

559  
00:23:09,590 --> 00:23:07,360  
time to take off because

560  
00:23:11,590 --> 00:23:09,600  
that's a wrap thank you for listening to

561  
00:23:14,950 --> 00:23:11,600  
inception radio network and now you can

562  
00:23:17,909 --> 00:23:14,960  
hear us on iheartradio take care of each
