

UFO Headline News Monday July 10th, 2017

Listen on

inceptionradionetwork.com

1
00:00:06,070 --> 00:00:03,830
hello it's monday july 10th 2017.

2
00:00:09,110 --> 00:00:06,080
you are listening to inception radio

3
00:00:11,669 --> 00:00:09,120
network voice of the fringe majority

4
00:00:14,549 --> 00:00:11,679
this is carol carl with ufo headline

5
00:00:19,510 --> 00:00:17,029
at the time we assembled all the content

6
00:00:21,750 --> 00:00:19,520
for this broadcast gentle listeners it

7
00:00:24,470 --> 00:00:21,760
looked as though there were 11 different

8
00:00:26,550 --> 00:00:24,480
states in the predominantly western area

9
00:00:29,589 --> 00:00:26,560
of the united states experiencing

10
00:00:31,189 --> 00:00:29,599
tremendous wildfires that means people

11
00:00:33,350 --> 00:00:31,199
tossed from their homes hopefully

12
00:00:35,510 --> 00:00:33,360
temporarily and hopefully they'll have

13
00:00:37,830 --> 00:00:35,520

something to return to

14

00:00:40,069 --> 00:00:37,840

the most recent rainy season brought

15

00:00:42,229 --> 00:00:40,079

relief to some degree to the drought in

16

00:00:44,790 --> 00:00:42,239

many states on the other hand there's

17

00:00:47,350 --> 00:00:44,800

that cycle of water growth

18

00:00:51,110 --> 00:00:47,360

more dryness just due to temperatures

19

00:00:54,389 --> 00:00:51,120

and summer and here come the wildfires

20

00:00:56,950 --> 00:00:54,399

according to the nifc.gov

21

00:00:59,430 --> 00:00:56,960

that's the national interagency fire

22

00:01:02,069 --> 00:00:59,440

center the national level of

23

00:01:05,270 --> 00:01:02,079

preparedness stood at level three that

24

00:01:07,350 --> 00:01:05,280

was dictated as of june 28th at 2 p.m

25

00:01:09,510 --> 00:01:07,360

mountain daylight time

26
00:01:11,910 --> 00:01:09,520
the reports state they're updated monday

27
00:01:14,390 --> 00:01:11,920
through friday however we were not able

28
00:01:15,350 --> 00:01:14,400
to find anything more recent than july

29
00:01:17,350 --> 00:01:15,360
7th

30
00:01:19,590 --> 00:01:17,360
it says having trouble understanding the

31
00:01:22,469 --> 00:01:19,600
numbers between the incident management

32
00:01:24,630 --> 00:01:22,479
situation reports and the fire news and

33
00:01:26,230 --> 00:01:24,640
the large incidence map

34
00:01:28,149 --> 00:01:26,240
no we're having a little trouble

35
00:01:30,550 --> 00:01:28,159
understanding why these agencies don't

36
00:01:32,870 --> 00:01:30,560
get it together better so that people

37
00:01:35,109 --> 00:01:32,880
involved in critical areas who still

38
00:01:38,630 --> 00:01:35,119

have their power lines up and running

39

00:01:41,030 --> 00:01:38,640

can find out where things stand via ye

40

00:01:45,030 --> 00:01:41,040

old internet and sites such as the

41

00:01:47,190 --> 00:01:45,040

national interagency fire center

42

00:01:49,109 --> 00:01:47,200

let's switch now to when the smoke

43

00:01:51,190 --> 00:01:49,119

clears what you might be able to see in

44

00:01:54,550 --> 00:01:51,200

your daytime skies

45

00:01:57,910 --> 00:01:54,560

it's a daytime moon this week beginning

46

00:02:00,630 --> 00:01:57,920

tuesday morning june 11 2017 you can

47

00:02:03,510 --> 00:02:00,640

watch for the daytime moon

48

00:02:06,310 --> 00:02:03,520

no matter where you are on earth look

49

00:02:09,669 --> 00:02:06,320

generally westward after sunrise and see

50

00:02:12,790 --> 00:02:09,679

the moon in a clear blue daytime sky

51
00:02:15,510 --> 00:02:12,800
and it does beg the question why can you

52
00:02:17,990 --> 00:02:15,520
see the moon in the daytime now

53
00:02:20,470 --> 00:02:18,000
the full moon took place this weekend

54
00:02:22,949 --> 00:02:20,480
and that means the moon is now in a

55
00:02:25,190 --> 00:02:22,959
waning gibbous phase rising after

56
00:02:27,589 --> 00:02:25,200
nightfall and setting in a westward

57
00:02:29,589 --> 00:02:27,599
direction after sunrise

58
00:02:31,430 --> 00:02:29,599
if you look for the moon at the same

59
00:02:33,350 --> 00:02:31,440
time every morning you'll see it

60
00:02:36,229 --> 00:02:33,360
appearing higher and higher in the

61
00:02:37,110 --> 00:02:36,239
western sky early each morning all week

62
00:02:39,990 --> 00:02:37,120
long

63
00:02:42,150 --> 00:02:40,000

to understand why all you have to do is

64

00:02:43,190 --> 00:02:42,160

think about where the sun is in early

65

00:02:45,350 --> 00:02:43,200

morning

66

00:02:47,990 --> 00:02:45,360

the moon is moving in its orbit around

67

00:02:51,670 --> 00:02:48,000

earth drawing closer and closer to the

68

00:02:54,710 --> 00:02:51,680

earth sun line in fact by july 16th the

69

00:02:57,190 --> 00:02:54,720

moon will be at the last quarter phase

70

00:03:00,229 --> 00:02:57,200

rising around midnight and southward

71

00:03:03,350 --> 00:03:00,239

around dawn by july 23rd the moon will

72

00:03:06,149 --> 00:03:03,360

be new located most nearly on the earth

73

00:03:08,710 --> 00:03:06,159

sun line crossing the sky with the sun

74

00:03:10,390 --> 00:03:08,720

during the day and so not generally

75

00:03:13,670 --> 00:03:10,400

visible in our sky

76
00:03:16,309 --> 00:03:13,680
but next month a major exception to this

77
00:03:18,229 --> 00:03:16,319
general rule people in the united states

78
00:03:20,790 --> 00:03:18,239
will actually get to witness the new

79
00:03:24,070 --> 00:03:20,800
moon swinging in front of the sun

80
00:03:27,030 --> 00:03:24,080
causing that total solar eclipse yep

81
00:03:29,430 --> 00:03:27,040
august 21st 2017.

82
00:03:31,270 --> 00:03:29,440
as that date swings closer gentle

83
00:03:34,070 --> 00:03:31,280
listeners you can count on us right here

84
00:03:37,030 --> 00:03:34,080
at ufo headline news on inception radio

85
00:03:40,390 --> 00:03:37,040
network to keep you in the loop

86
00:03:42,070 --> 00:03:40,400
but meanwhile back at the daytime moon

87
00:03:45,910 --> 00:03:42,080
people have wondered about this for

88
00:03:48,830 --> 00:03:45,920

centuries asked about it and in fact at

89

00:03:52,070 --> 00:03:48,840

one point someone who was a reader of

90

00:03:54,070 --> 00:03:52,080

earthsky.org regular columns wrote in

91

00:03:56,710 --> 00:03:54,080

she lived in kansas city she said that

92

00:03:59,509 --> 00:03:56,720

to her the children's moon was

93

00:04:00,390 --> 00:03:59,519

describing that moon visible during the

94

00:04:02,229 --> 00:04:00,400

day

95

00:04:04,390 --> 00:04:02,239

the name to her stemmed from the idea

96

00:04:06,630 --> 00:04:04,400

that children can't stay up at night

97

00:04:09,830 --> 00:04:06,640

late enough to see the moon when it

98

00:04:12,270 --> 00:04:09,840

appears only in darkness which prompted

99

00:04:14,390 --> 00:04:12,280

another response from another

100

00:04:16,710 --> 00:04:14,400

earthsky.org fan

101
00:04:19,189 --> 00:04:16,720
quote i heard a daytime moon was called

102
00:04:21,670 --> 00:04:19,199
a children's moon because their eyes

103
00:04:23,909 --> 00:04:21,680
were sharp enough to pick it out whereas

104
00:04:25,990 --> 00:04:23,919
the old folks with fading vision

105
00:04:27,110 --> 00:04:26,000
couldn't tell it from the clouds end

106
00:04:30,310 --> 00:04:27,120
quotes

107
00:04:31,990 --> 00:04:30,320
and so deborah bird asks us can you see

108
00:04:34,950 --> 00:04:32,000
the daytime moon on the next few

109
00:04:37,430 --> 00:04:34,960
mornings bottom line in the days after

110
00:04:40,710 --> 00:04:37,440
every full moon the moon appears to the

111
00:04:43,430 --> 00:04:40,720
west after sunrise in a blue sky watch

112
00:04:46,310 --> 00:04:43,440
for it here's something the folks at

113
00:04:48,870 --> 00:04:46,320

nasa are watching for using the hubble

114

00:04:52,950 --> 00:04:48,880

space telescope here's the headline

115

00:04:56,030 --> 00:04:52,960

uranus may have odd strobe-like magnetic

116

00:04:57,749 --> 00:04:56,040

field anika vitering writes this for

117

00:05:00,629 --> 00:04:57,759

space.com

118

00:05:01,909 --> 00:05:00,639

the planet uranus just keeps getting

119

00:05:04,469 --> 00:05:01,919

weirder

120

00:05:07,189 --> 00:05:04,479

the icy gas world that strangely orbits

121

00:05:09,909 --> 00:05:07,199

the sun on its side may also have a

122

00:05:12,870 --> 00:05:09,919

wonky magnetic field that constantly

123

00:05:14,150 --> 00:05:12,880

flickers on and off according to new

124

00:05:15,990 --> 00:05:14,160

research

125

00:05:17,590 --> 00:05:16,000

magnetic fields around planets or

126

00:05:20,150 --> 00:05:17,600

magnetospheres

127

00:05:22,710 --> 00:05:20,160

create shields against the bombardment

128

00:05:24,390 --> 00:05:22,720

of radiation from the sun known as the

129

00:05:26,790 --> 00:05:24,400

solar wind

130

00:05:28,230 --> 00:05:26,800

on earth for example the magnetosphere

131

00:05:31,110 --> 00:05:28,240

lines up pretty closely with the

132

00:05:33,350 --> 00:05:31,120

planet's axis of rotation and magnetic

133

00:05:34,950 --> 00:05:33,360

field lines emerge from earth's north

134

00:05:37,909 --> 00:05:34,960

and south poles

135

00:05:40,230 --> 00:05:37,919

on uranus however the magnetosphere is a

136

00:05:43,590 --> 00:05:40,240

bit more chaotic

137

00:05:47,029 --> 00:05:43,600

uranus's spin axis is tilted by a

138

00:05:49,430 --> 00:05:47,039

whopping 98 degrees and the planet's

139

00:05:53,830 --> 00:05:49,440

off-center magnetic field is tilted by

140

00:05:56,909 --> 00:05:53,840

another 60 degrees so every time the

141

00:06:00,629 --> 00:05:56,919

planet rotates which is about every

142

00:06:03,029 --> 00:06:00,639

17.24 hours this lopsided magnetic field

143

00:06:06,150 --> 00:06:03,039

tumbles around opening and closing

144

00:06:09,110 --> 00:06:06,160

periodically as the magnetic field lines

145

00:06:11,350 --> 00:06:09,120

disconnect and reconnect according to

146

00:06:13,830 --> 00:06:11,360

this latest study

147

00:06:15,830 --> 00:06:13,840

researchers at georgia tech that's the

148

00:06:18,710 --> 00:06:15,840

georgia institute of technology in

149

00:06:21,510 --> 00:06:18,720

atlanta figured this out by simulating

150

00:06:24,150 --> 00:06:21,520

uranus's messy magnetosphere using

151
00:06:26,790 --> 00:06:24,160
numerical models and data from nasa's

152
00:06:29,189 --> 00:06:26,800
voyager 2 spacecraft it flew by the

153
00:06:31,430 --> 00:06:29,199
planet in 1986

154
00:06:33,189 --> 00:06:31,440
here's a quote from carol patty she's an

155
00:06:35,909 --> 00:06:33,199
associate professor at georgia tech's

156
00:06:39,510 --> 00:06:35,919
school of earth and atmospheric sciences

157
00:06:42,390 --> 00:06:39,520
and co-author of the study quote uranus

158
00:06:44,950 --> 00:06:42,400
is a geometric nightmare

159
00:06:47,590 --> 00:06:44,960
the magnetic field tumbles very fast

160
00:06:49,350 --> 00:06:47,600
like a child cartwheeling down a hill

161
00:06:51,270 --> 00:06:49,360
head over heels

162
00:06:53,909 --> 00:06:51,280
when the magnetized solar wind meets

163
00:06:56,469 --> 00:06:53,919

this tumbling field in the right way it

164

00:06:59,350 --> 00:06:56,479

can reconnect and so uranus's

165

00:07:03,589 --> 00:06:59,360

magnetosphere goes from open to closed

166

00:07:05,589 --> 00:07:03,599

to open on a daily basis end quotes

167

00:07:08,150 --> 00:07:05,599

when the magnetosphere opens up it

168

00:07:10,950 --> 00:07:08,160

allows solar particles to bombard the

169

00:07:13,830 --> 00:07:10,960

planet and then when the magnetic field

170

00:07:16,870 --> 00:07:13,840

lines reconnect this natural shield can

171

00:07:19,430 --> 00:07:16,880

continue to block the solar wind

172

00:07:21,589 --> 00:07:19,440

this process might be related to auroras

173

00:07:23,749 --> 00:07:21,599

witnessed on uranus just like the

174

00:07:26,150 --> 00:07:23,759

auroras on earth and other planets

175

00:07:28,469 --> 00:07:26,160

uranus's atmosphere lights up when

176

00:07:31,189 --> 00:07:28,479

particles from the solar wind enter it

177

00:07:32,870 --> 00:07:31,199

and interact with gases such as nitrogen

178

00:07:34,550 --> 00:07:32,880

and oxygen

179

00:07:37,189 --> 00:07:34,560

nasa's hubble space telescope has

180

00:07:39,430 --> 00:07:37,199

previously observed auroras on uranus

181

00:07:41,670 --> 00:07:39,440

but astronomers faced difficulties in

182

00:07:43,749 --> 00:07:41,680

studying how these auroras interact with

183

00:07:47,430 --> 00:07:43,759

the magnetosphere because the planet is

184

00:07:51,110 --> 00:07:47,440

so far away it's nearly 2 billion miles

185

00:07:52,629 --> 00:07:51,120

or 3.2 billion kilometers from earth

186

00:07:54,790 --> 00:07:52,639

the space agency is currently

187

00:07:57,270 --> 00:07:54,800

considering sending another spacecraft

188

00:07:59,510 --> 00:07:57,280

to uranus and neptune to investigate

189

00:08:00,950 --> 00:07:59,520

those planets magnetic fields among

190

00:08:04,070 --> 00:08:00,960

other things

191

00:08:05,990 --> 00:08:04,080

jin cow a phd candidate at georgia tech

192

00:08:08,309 --> 00:08:06,000

who led the study said that studying

193

00:08:10,550 --> 00:08:08,319

uranus can teach scientists a lot about

194

00:08:13,670 --> 00:08:10,560

planets outside of the solar system

195

00:08:15,749 --> 00:08:13,680

quote the majority of exoplanets worlds

196

00:08:19,270 --> 00:08:15,759

outside the solar system that have been

197

00:08:20,629 --> 00:08:19,280

discovered appear to also be ice giants

198

00:08:22,950 --> 00:08:20,639

in size

199

00:08:26,390 --> 00:08:22,960

perhaps what we see on uranus and

200

00:08:29,110 --> 00:08:26,400

neptune is the norm for planets very

201
00:08:31,589 --> 00:08:29,120
unique magnetospheres and less aligned

202
00:08:34,310 --> 00:08:31,599
magnetic fields understanding how these

203
00:08:36,550 --> 00:08:34,320
complex magnetospheres shield exoplanets

204
00:08:39,350 --> 00:08:36,560
from stellar radiation is of key

205
00:08:41,829 --> 00:08:39,360
importance for studying the habitability

206
00:08:43,670 --> 00:08:41,839
of these newly discovered worlds end

207
00:08:45,910 --> 00:08:43,680
quotes cow added

208
00:08:48,949 --> 00:08:45,920
and indeed

209
00:08:51,350 --> 00:08:48,959
what is the norm for new discoveries

210
00:08:53,590 --> 00:08:51,360
precisely at any rate the results of

211
00:08:56,070 --> 00:08:53,600
this study were published june 27th in

212
00:08:59,509 --> 00:08:56,080
the journal of geophysical research

213
00:09:02,310 --> 00:08:59,519

space physics and if you want to know

214

00:09:04,389 --> 00:09:02,320

more there are tasty tech details

215

00:09:06,949 --> 00:09:04,399

available via link later at

216

00:09:10,389 --> 00:09:06,959

ufoheadlinenews.com

217

00:09:12,470 --> 00:09:10,399

let's head on over to openminds.tv

218

00:09:14,470 --> 00:09:12,480

and check out this headline posted by

219

00:09:18,150 --> 00:09:14,480

alejandro rojas

220

00:09:21,990 --> 00:09:18,160

ufo witnesses capture shining disk on

221

00:09:24,949 --> 00:09:22,000

video near toronto harbor front

222

00:09:27,269 --> 00:09:24,959

a couple celebrating canada day which we

223

00:09:30,150 --> 00:09:27,279

believe is the first of july at

224

00:09:33,750 --> 00:09:30,160

toronto's harbor front recorded a video

225

00:09:35,110 --> 00:09:33,760

of a mysterious quote white shining disk

226

00:09:37,670 --> 00:09:35,120

end quote

227

00:09:40,870 --> 00:09:37,680

the reporting witness couple was lucky

228

00:09:43,670 --> 00:09:40,880

enough to get a video of this object you

229

00:09:46,630 --> 00:09:43,680

can find that later via link it shows a

230

00:09:50,630 --> 00:09:46,640

round object with what appears to be a

231

00:09:52,630 --> 00:09:50,640

clear or a dark center hard to say

232

00:09:55,190 --> 00:09:52,640

the object cannot be seen throughout the

233

00:09:56,550 --> 00:09:55,200

video it appears and then disappears

234

00:09:58,949 --> 00:09:56,560

several times

235

00:10:02,470 --> 00:09:58,959

the object looks disc shaped perhaps

236

00:10:06,070 --> 00:10:02,480

even a disc with the center cut out like

237

00:10:09,750 --> 00:10:06,080

an old vinyl record oh yeah we were

238

00:10:13,590 --> 00:10:09,760

thinking a flat doughnut but an old 45

239

00:10:16,069 --> 00:10:13,600

rpm recording yeah we can see that

240

00:10:17,670 --> 00:10:16,079

in the report the witness wrote quote me

241

00:10:20,470 --> 00:10:17,680

and my girlfriend were celebrating

242

00:10:23,910 --> 00:10:20,480

canada day weekend at harbourfront on

243

00:10:26,310 --> 00:10:23,920

sunday july 2nd 2017. i looked up in the

244

00:10:29,509 --> 00:10:26,320

sky for no particular reason and noticed

245

00:10:31,430 --> 00:10:29,519

this circular white shining disk

246

00:10:34,230 --> 00:10:31,440

as you can see on the video i say to my

247

00:10:37,030 --> 00:10:34,240

girlfriend what do you think that is

248

00:10:39,030 --> 00:10:37,040

she then witnesses this too

249

00:10:42,310 --> 00:10:39,040

i was thinking it was either a kite or a

250

00:10:44,389 --> 00:10:42,320

drone thinking drones are everywhere

251
00:10:47,030 --> 00:10:44,399
but once she started looking at it and

252
00:10:48,790 --> 00:10:47,040
then saw the video she realized this

253
00:10:51,030 --> 00:10:48,800
wasn't a drone

254
00:10:53,750 --> 00:10:51,040
when looking at the object i noticed the

255
00:10:56,790 --> 00:10:53,760
glaring shininess of this disc and how

256
00:10:58,870 --> 00:10:56,800
it moved across in a circular motion

257
00:11:01,829 --> 00:10:58,880
and then it just disappeared in the

258
00:11:03,910 --> 00:11:01,839
clouds we watched for it for quite a

259
00:11:06,389 --> 00:11:03,920
while but didn't see it again

260
00:11:08,949 --> 00:11:06,399
at that point then we witnessed a black

261
00:11:10,470 --> 00:11:08,959
helicopter and thought maybe it's

262
00:11:12,550 --> 00:11:10,480
following it

263
00:11:13,750 --> 00:11:12,560

i was shocked witnessing all of this i

264

00:11:16,230 --> 00:11:13,760

was puzzled

265

00:11:19,590 --> 00:11:16,240

my girlfriend was skeptical at first but

266

00:11:21,110 --> 00:11:19,600

realized it might have not been a drone

267

00:11:23,430 --> 00:11:21,120

after all

268

00:11:26,470 --> 00:11:23,440

and now here's what alejandro rojas

269

00:11:29,030 --> 00:11:26,480

offers drones often of the quadcopter

270

00:11:31,350 --> 00:11:29,040

variety have appendages that hold the

271

00:11:33,829 --> 00:11:31,360

rotors and zip through the sky this

272

00:11:36,389 --> 00:11:33,839

object does not demonstrate that sort of

273

00:11:38,949 --> 00:11:36,399

behavior nor does it appear to have

274

00:11:41,910 --> 00:11:38,959

rotors so the witness is likely right

275

00:11:43,829 --> 00:11:41,920

that a drone is not what they filmed

276

00:11:46,710 --> 00:11:43,839

balloons are often set afloat during

277

00:11:49,430 --> 00:11:46,720

celebrations and they move with the wind

278

00:11:52,470 --> 00:11:49,440

however balloons do not appear and

279

00:11:54,710 --> 00:11:52,480

disappear as this object does

280

00:11:57,509 --> 00:11:54,720

if the balloon is somehow going into and

281

00:11:59,269 --> 00:11:57,519

out of shadows then it could appear as

282

00:12:00,550 --> 00:11:59,279

though it is indeed disappearing and

283

00:12:03,350 --> 00:12:00,560

reappearing

284

00:12:05,190 --> 00:12:03,360

however this object is high in the sky

285

00:12:07,829 --> 00:12:05,200

and doesn't appear to be anything that

286

00:12:10,870 --> 00:12:07,839

could cause shadows at that height

287

00:12:12,710 --> 00:12:10,880

and still a balloon might not be able to

288

00:12:14,550 --> 00:12:12,720

be ruled out

289

00:12:15,990 --> 00:12:14,560

we're looking at a close-up still shot

290

00:12:19,430 --> 00:12:16,000

of this object

291

00:12:21,910 --> 00:12:19,440

er we're not seeing balloon here

292

00:12:24,629 --> 00:12:21,920

alejandro rojas also closes the article

293

00:12:27,670 --> 00:12:24,639

by saying the vast majority of ufo

294

00:12:30,230 --> 00:12:27,680

sightings turn out to be mundane objects

295

00:12:32,710 --> 00:12:30,240

but once in a while there are sightings

296

00:12:34,389 --> 00:12:32,720

that are much more difficult to explain

297

00:12:36,550 --> 00:12:34,399

and he notes that mufon conducts

298

00:12:39,350 --> 00:12:36,560

investigations on sightings submitted to

299

00:12:42,629 --> 00:12:39,360

their website and they share conclusions

300

00:12:45,190 --> 00:12:42,639

and if they do on this one alejandro

301
00:12:47,829 --> 00:12:45,200
rojas and the folks at openminds.tv

302
00:12:51,269 --> 00:12:47,839
promise they will let us know

303
00:12:54,230 --> 00:12:51,279
let's shift our ufo stalking itinerary

304
00:12:56,790 --> 00:12:54,240
now and go to cairo

305
00:12:59,750 --> 00:12:56,800
nope not the one in egypt there's a

306
00:13:03,590 --> 00:12:59,760
cairo new york as well and that's the

307
00:13:05,350 --> 00:13:03,600
setting for mufon sighting number 84981

308
00:13:08,710 --> 00:13:05,360
the date of the sighting is the 4th of

309
00:13:12,069 --> 00:13:08,720
july this year but nobody reported this

310
00:13:14,629 --> 00:13:12,079
sighting to mufon until the 9th of july

311
00:13:17,670 --> 00:13:14,639
where they gave this summary saw

312
00:13:21,030 --> 00:13:17,680
blinking light 10 minutes

313
00:13:24,949 --> 00:13:21,040

moved 20 degrees quickly saw two red

314

00:13:28,069 --> 00:13:24,959

lights with rapid ascension

315

00:13:30,629 --> 00:13:28,079

yep time to use the mind's eye to try to

316

00:13:34,069 --> 00:13:30,639

sort out whether or not this could be

317

00:13:36,069 --> 00:13:34,079

fireworks the date is the fourth of july

318

00:13:39,509 --> 00:13:36,079

the sighting specifics offer a viewing

319

00:13:42,470 --> 00:13:39,519

distance of over 1 mile an altitude over

320

00:13:44,629 --> 00:13:42,480

500 feet no cloud cover the sighting

321

00:13:47,190 --> 00:13:44,639

duration was 20 minutes

322

00:13:49,110 --> 00:13:47,200

but the object's features are simply

323

00:13:51,110 --> 00:13:49,120

reported as none

324

00:13:54,790 --> 00:13:51,120

the flight path was hovering and then

325

00:13:56,230 --> 00:13:54,800

path and this object shape is defined as

326

00:13:58,550 --> 00:13:56,240

flash

327

00:14:00,470 --> 00:13:58,560

the maximum temperature over cairo new

328

00:14:03,750 --> 00:14:00,480

york that night was 82 degrees

329

00:14:07,030 --> 00:14:03,760

fahrenheit 28 degrees celsius down to a

330

00:14:08,550 --> 00:14:07,040

minimum of 56 degrees fahrenheit 13

331

00:14:10,870 --> 00:14:08,560

degrees celsius

332

00:14:13,910 --> 00:14:10,880

the visibility factors were all the same

333

00:14:16,470 --> 00:14:13,920

10 miles 16 kilometers

334

00:14:18,470 --> 00:14:16,480

here's the account first person

335

00:14:20,870 --> 00:14:18,480

i went to observe the fourth of july

336

00:14:23,269 --> 00:14:20,880

fireworks in cairo new york

337

00:14:25,590 --> 00:14:23,279

i was facing west when i noticed a

338

00:14:27,590 --> 00:14:25,600

blinking white light

339

00:14:29,110 --> 00:14:27,600

i watched this light for approximately

340

00:14:31,350 --> 00:14:29,120

10 minutes

341

00:14:33,269 --> 00:14:31,360

i assumed it was a helicopter watching

342

00:14:35,030 --> 00:14:33,279

fireworks from above

343

00:14:37,269 --> 00:14:35,040

i didn't have any point of reference for

344

00:14:39,829 --> 00:14:37,279

this light except the mountains below it

345

00:14:40,710 --> 00:14:39,839

it appeared to be a mile or so above the

346

00:14:42,230 --> 00:14:40,720

earth

347

00:14:44,949 --> 00:14:42,240

and then suddenly

348

00:14:46,870 --> 00:14:44,959

this thing moved about 20 degrees north

349

00:14:48,310 --> 00:14:46,880

in less than one second

350

00:14:50,310 --> 00:14:48,320

if i had to guess

351
00:14:53,430 --> 00:14:50,320
it was approximately a distance of one

352
00:14:54,710 --> 00:14:53,440
to two miles and that really got my

353
00:14:57,189 --> 00:14:54,720
interest

354
00:14:59,590 --> 00:14:57,199
this object then continued to blink

355
00:15:01,350 --> 00:14:59,600
it blinked a white light for about

356
00:15:03,990 --> 00:15:01,360
you're listening to love advice with

357
00:15:05,990 --> 00:15:04,000
leanne caller you're on the air uh hi

358
00:15:07,030 --> 00:15:06,000
leanne long time listener first time

359
00:15:08,949 --> 00:15:07,040
caller

360
00:15:11,110 --> 00:15:08,959
why in your professional opinion do you

361
00:15:14,150 --> 00:15:11,120
never take my calls off the air is this

362
00:15:16,230 --> 00:15:14,160
carl yep it's carl i mean we had a few

363
00:15:18,230 --> 00:15:16,240

dates everything was great i thought uh

364

00:15:20,069 --> 00:15:18,240

well you know

365

00:15:22,150 --> 00:15:20,079

when you switched to geico you could

366

00:15:24,790 --> 00:15:22,160

save a lot of money on car insurance

367

00:15:27,269 --> 00:15:24,800

okay awesome you should call them i will

368

00:15:29,269 --> 00:15:27,279

geico because saving 15 or more on car

369

00:15:31,590 --> 00:15:29,279

insurance is always the great answer

370

00:15:34,230 --> 00:15:31,600

five minutes and then approximately

371

00:15:35,430 --> 00:15:34,240

another minute and then the white light

372

00:15:37,430 --> 00:15:35,440

stopped

373

00:15:40,550 --> 00:15:37,440

and two red lights appeared very close

374

00:15:43,350 --> 00:15:40,560

together these lights did not blink then

375

00:15:46,470 --> 00:15:43,360

the white lights reappeared they blinked

376

00:15:48,389 --> 00:15:46,480

again for another five minutes

377

00:15:51,189 --> 00:15:48,399

as the fireworks i was watching went

378

00:15:54,870 --> 00:15:51,199

into the grand finale these lights

379

00:15:57,269 --> 00:15:54,880

stayed until the fireworks were over

380

00:15:59,910 --> 00:15:57,279

and then they took off in an extremely

381

00:16:01,670 --> 00:15:59,920

quick streak just a micro second they

382

00:16:04,389 --> 00:16:01,680

disappeared

383

00:16:06,230 --> 00:16:04,399

after observing what i did i asked an

384

00:16:09,189 --> 00:16:06,240

older gentleman who was sitting nearby

385

00:16:12,710 --> 00:16:09,199

if he saw those other lights as well he

386

00:16:15,110 --> 00:16:12,720

told me yes he had also noticed them

387

00:16:17,670 --> 00:16:15,120

it is my opinion there's nothing that i

388

00:16:19,670 --> 00:16:17,680

know of that can move that fast

389

00:16:23,350 --> 00:16:19,680

nothing that can take off that quickly

390

00:16:25,990 --> 00:16:23,360

or stop that fast i believe we were

391

00:16:28,790 --> 00:16:26,000

being observed by this craft

392

00:16:31,910 --> 00:16:28,800

and i believe it was possibly an alien

393

00:16:35,430 --> 00:16:31,920

entity or possibly a military slash

394

00:16:38,629 --> 00:16:35,440

experimental aircraft observing us

395

00:16:41,189 --> 00:16:38,639

fascinating account from this witness

396

00:16:43,670 --> 00:16:41,199

and he wasn't alone in seeing this other

397

00:16:46,949 --> 00:16:43,680

light how many other people saw it and

398

00:16:50,389 --> 00:16:46,959

just didn't or wouldn't talk about it

399

00:16:53,670 --> 00:16:50,399

again a case of conscious contacts

400

00:16:56,310 --> 00:16:53,680

and again it's the 4th of july and what

401
00:16:57,110 --> 00:16:56,320
is that all about from et's point of

402
00:16:59,509 --> 00:16:57,120
view

403
00:17:01,590 --> 00:16:59,519
and certainly we have many more people

404
00:17:03,350 --> 00:17:01,600
in the united states looking up at the

405
00:17:07,990 --> 00:17:03,360
night sky

406
00:17:11,029 --> 00:17:08,000
on the 4th of july over annapolis

407
00:17:12,110 --> 00:17:11,039
maryland shall we mufon gave it a case

408
00:17:13,829 --> 00:17:12,120
number

409
00:17:16,470 --> 00:17:13,839
84867

410
00:17:18,470 --> 00:17:16,480
again this took place on the 4th of july

411
00:17:19,990 --> 00:17:18,480
not reported till the 5th

412
00:17:21,990 --> 00:17:20,000
here's the summary

413
00:17:25,429 --> 00:17:22,000

while watching fireworks

414

00:17:27,750 --> 00:17:25,439

objects appear from the south-south east

415

00:17:31,350 --> 00:17:27,760

heading north northwest

416

00:17:33,830 --> 00:17:31,360

bright orange and yellow nowhere near

417

00:17:35,750 --> 00:17:33,840

the fireworks different direction

418

00:17:38,070 --> 00:17:35,760

entirely

419

00:17:41,190 --> 00:17:38,080

citing specifics here include a viewing

420

00:17:43,190 --> 00:17:41,200

distance that's simply listed as unknown

421

00:17:45,909 --> 00:17:43,200

as is the altitude

422

00:17:48,390 --> 00:17:45,919

the witnesses watch this object these

423

00:17:50,630 --> 00:17:48,400

objects for four minutes the object

424

00:17:53,190 --> 00:17:50,640

features are reported as none

425

00:17:55,270 --> 00:17:53,200

the flight path was a path and then at

426
00:17:57,510 --> 00:17:55,280
some point directional change

427
00:17:59,590 --> 00:17:57,520
and the object shapes are reported to

428
00:18:02,070 --> 00:17:59,600
have been fireball

429
00:18:05,190 --> 00:18:02,080
maximum temperature that night was 86

430
00:18:07,270 --> 00:18:05,200
degrees fahrenheit 30 degrees celsius

431
00:18:10,390 --> 00:18:07,280
minimum temperature 73 degrees

432
00:18:13,110 --> 00:18:10,400
fahrenheit 23 degrees celsius

433
00:18:15,430 --> 00:18:13,120
the maximum visibility in the area of

434
00:18:18,150 --> 00:18:15,440
annapolis maryland that night was 10

435
00:18:20,310 --> 00:18:18,160
miles 16 kilometers dropping down to a

436
00:18:23,110 --> 00:18:20,320
minimum that isn't even listed because

437
00:18:25,270 --> 00:18:23,120
it was foggy and raining

438
00:18:28,470 --> 00:18:25,280

here is the event

439

00:18:30,630 --> 00:18:28,480

about 20 guests were looking northwards

440

00:18:32,710 --> 00:18:30,640

toward the fireworks in the distance

441

00:18:35,590 --> 00:18:32,720

this fireworks display was taking place

442

00:18:37,909 --> 00:18:35,600

over the gibson island mcgothie river

443

00:18:40,230 --> 00:18:37,919

arnold maryland area

444

00:18:42,950 --> 00:18:40,240

once the fireworks display ended an

445

00:18:45,909 --> 00:18:42,960

object appeared in the sky it was to our

446

00:18:47,909 --> 00:18:45,919

right coming from the east perhaps the

447

00:18:50,070 --> 00:18:47,919

south southeast

448

00:18:52,549 --> 00:18:50,080

this object was in a straight line

449

00:18:56,150 --> 00:18:52,559

pattern heading north northwest

450

00:18:58,070 --> 00:18:56,160

it passed over our heads relatively fast

451
00:19:00,310 --> 00:18:58,080
we were all on the south shore of the

452
00:19:03,830 --> 00:19:00,320
mcgothey river we noticed this object

453
00:19:06,150 --> 00:19:03,840
because it was a circle an orb a ball

454
00:19:07,750 --> 00:19:06,160
and the color of it was yellow orange

455
00:19:09,270 --> 00:19:07,760
from our perspective

456
00:19:11,590 --> 00:19:09,280
this thing could have been larger than a

457
00:19:13,990 --> 00:19:11,600
golf ball could have been smaller than a

458
00:19:16,470 --> 00:19:14,000
basketball but whatever it was it was

459
00:19:18,950 --> 00:19:16,480
not a plane

460
00:19:22,310 --> 00:19:18,960
the object seemingly escalated up into

461
00:19:24,789 --> 00:19:22,320
the sky and disappeared into the clouds

462
00:19:27,350 --> 00:19:24,799
this object was nowhere near any of the

463
00:19:29,430 --> 00:19:27,360

fireworks that were being shot off

464

00:19:32,710 --> 00:19:29,440

and then about five minutes later two

465

00:19:36,230 --> 00:19:32,720

additional circles of the same size and

466

00:19:38,950 --> 00:19:36,240

color appeared in the same location they

467

00:19:41,990 --> 00:19:38,960

traveled the same path at the same speed

468

00:19:45,830 --> 00:19:42,000

moving from east south southeast to

469

00:19:48,390 --> 00:19:45,840

north northwest one behind the other

470

00:19:51,669 --> 00:19:48,400

these objects also escalated up into the

471

00:19:54,070 --> 00:19:51,679

sky disappearing into the clouds

472

00:19:56,070 --> 00:19:54,080

we're in a rural area there aren't any

473

00:19:58,230 --> 00:19:56,080

city lights there isn't anything that

474

00:19:59,909 --> 00:19:58,240

could affect the night sky

475

00:20:01,029 --> 00:19:59,919

usually we can see the stars quite

476
00:20:03,190 --> 00:20:01,039
clearly

477
00:20:05,590 --> 00:20:03,200
we also think that we might have heard a

478
00:20:07,510 --> 00:20:05,600
slight noise connected with this event

479
00:20:10,230 --> 00:20:07,520
but we're not sure

480
00:20:11,510 --> 00:20:10,240
the evening had heavy clouds as earlier

481
00:20:14,230 --> 00:20:11,520
in the night there had been a rain

482
00:20:15,990 --> 00:20:14,240
shower and it was quite humid

483
00:20:18,390 --> 00:20:16,000
how we felt

484
00:20:20,630 --> 00:20:18,400
well everyone started joking about what

485
00:20:21,669 --> 00:20:20,640
these things were and joking about what

486
00:20:23,270 --> 00:20:21,679
we saw

487
00:20:25,750 --> 00:20:23,280
nobody knew

488
00:20:27,830 --> 00:20:25,760

we all thought it was quite weird

489

00:20:30,230 --> 00:20:27,840

we live on the water so we're always

490

00:20:31,590 --> 00:20:30,240

looking up into the night sky we often

491

00:20:34,870 --> 00:20:31,600

see planes

492

00:20:38,390 --> 00:20:34,880

but this wasn't any plane none of us had

493

00:20:41,110 --> 00:20:38,400

ever seen anything like this before

494

00:20:43,990 --> 00:20:41,120

and we note back to the beginning 20

495

00:20:46,149 --> 00:20:44,000

guests lots of people lots of witnesses

496

00:20:49,110 --> 00:20:46,159

still an unknown but you know you

497

00:20:52,230 --> 00:20:49,120

weren't alone in your sighting

498

00:20:55,270 --> 00:20:52,240

let's pick up a black triangle sighting

499

00:20:58,070 --> 00:20:55,280

shall we from vincennes indiana

500

00:21:00,390 --> 00:20:58,080

mufon gave it a case number it's number

501
00:21:02,549 --> 00:21:00,400
84982

502
00:21:05,190 --> 00:21:02,559
it took place on the 8th of july this

503
00:21:06,390 --> 00:21:05,200
year was not reported till the 9th of

504
00:21:08,710 --> 00:21:06,400
july

505
00:21:11,430 --> 00:21:08,720
here's the report in summary

506
00:21:13,510 --> 00:21:11,440
triangular shaped light viewed over

507
00:21:15,909 --> 00:21:13,520
vincennes indiana

508
00:21:19,350 --> 00:21:15,919
citing specifics give a viewing distance

509
00:21:22,390 --> 00:21:19,360
in this case of 101 feet initially and

510
00:21:24,630 --> 00:21:22,400
then eventually becoming 500 feet

511
00:21:27,270 --> 00:21:24,640
the altitude was treetop

512
00:21:29,590 --> 00:21:27,280
citing duration just one minute

513
00:21:32,470 --> 00:21:29,600

object features none

514

00:21:36,070 --> 00:21:32,480

object flight path path with directional

515

00:21:37,990 --> 00:21:36,080

change and pretty obviously as we heard

516

00:21:41,029 --> 00:21:38,000

in the headline for this story the

517

00:21:43,270 --> 00:21:41,039

object shape was triangle

518

00:21:46,470 --> 00:21:43,280

the temperature over vincennes indiana

519

00:21:49,669 --> 00:21:46,480

that night was 85 degrees fahrenheit 29

520

00:21:53,190 --> 00:21:49,679

degrees celsius minimum temperature 65

521

00:21:55,750 --> 00:21:53,200

degrees fahrenheit 18 degrees celsius

522

00:21:58,470 --> 00:21:55,760

as far as the reports of visibility

523

00:22:01,590 --> 00:21:58,480

factors for this event the maximum was

524

00:22:04,630 --> 00:22:01,600

the standard 10 miles 16 kilometers the

525

00:22:06,149 --> 00:22:04,640

minimum down to one mile one kilometer

526

00:22:09,149 --> 00:22:06,159

and according to these notes there

527

00:22:10,710 --> 00:22:09,159

wasn't anything abnormal going on

528

00:22:13,750 --> 00:22:10,720

meteorologically

529

00:22:16,630 --> 00:22:13,760

however here's what was happening in the

530

00:22:17,830 --> 00:22:16,640

sky overhead as our reporting witness

531

00:22:20,310 --> 00:22:17,840

was

532

00:22:21,990 --> 00:22:20,320

driving northbound on united states

533

00:22:24,230 --> 00:22:22,000

highway 41

534

00:22:26,789 --> 00:22:24,240

it was a full moon night and we were

535

00:22:30,230 --> 00:22:26,799

passing through vincennes indiana

536

00:22:32,149 --> 00:22:30,240

i saw this object through the windshield

537

00:22:36,470 --> 00:22:32,159

as we were coming to where united states

538

00:22:39,669 --> 00:22:36,480

highway 41 splits off to the u.s 50.

539

00:22:40,630 --> 00:22:39,679

this object was ahead of us up above the

540

00:22:43,669 --> 00:22:40,640

trees

541

00:22:45,750 --> 00:22:43,679

almost above where the csx train tracks

542

00:22:47,830 --> 00:22:45,760

come from the south heading north to

543

00:22:50,149 --> 00:22:47,840

terre haute indiana

544

00:22:52,870 --> 00:22:50,159

this object had white and green steady

545

00:22:55,909 --> 00:22:52,880

lights at points of the triangle there

546

00:22:57,990 --> 00:22:55,919

was no rotating no flashing light

547

00:23:00,950 --> 00:22:58,000

as we turned west heading toward red

548

00:23:04,149 --> 00:23:00,960

skelton bridge which crosses the wabash

549

00:23:06,549 --> 00:23:04,159

river this object dropped behind the

550

00:23:08,470 --> 00:23:06,559

trees that were to our right but i could

551
00:23:09,669 --> 00:23:08,480
still see the lights at times between

552
00:23:12,310 --> 00:23:09,679
the trees

553
00:23:15,190 --> 00:23:12,320
as we drove and approached the river

554
00:23:17,750 --> 00:23:15,200
this object came up over the trees on

555
00:23:20,310 --> 00:23:17,760
the east bank of the wabash river and

556
00:23:23,029 --> 00:23:20,320
then dropped down toward the river and

557
00:23:25,270 --> 00:23:23,039
then up again over the trees over

558
00:23:26,149 --> 00:23:25,280
robeson hill on the west bank of the

559
00:23:28,630 --> 00:23:26,159
river

560
00:23:31,029 --> 00:23:28,640
that's when we lost sight of it

561
00:23:33,350 --> 00:23:31,039
when viewing this i was turned in the

562
00:23:35,029 --> 00:23:33,360
passenger seat so that i could see this

563
00:23:37,590 --> 00:23:35,039

directly

564

00:23:38,390 --> 00:23:37,600

and what a sight to see that must have

565

00:23:41,110 --> 00:23:38,400

been

566

00:23:43,110 --> 00:23:41,120

dancing up and down around the river

567

00:23:46,630 --> 00:23:43,120

again it's that connection between an

568

00:23:49,590 --> 00:23:46,640

object in the sky and a body of water in

569

00:23:52,549 --> 00:23:49,600

this case a substantial flowing body of

570

00:23:54,950 --> 00:23:52,559

water that wabash river

571

00:23:57,750 --> 00:23:54,960

but we can see where the river has taken

572

00:23:59,590 --> 00:23:57,760

us the river of time that is we've got

573

00:24:00,710 --> 00:23:59,600

to get going because the current is

574

00:24:03,110 --> 00:24:00,720

saying

575

00:24:05,909 --> 00:24:03,120

that's a wrap thank you for listening to

576

00:24:07,940 --> 00:24:05,919

inception radio network follow today's

577

00:24:09,190 --> 00:24:07,950

broadcast at ufoheadlinenews.com

578

00:24:11,269 --> 00:24:09,200

[Music]

579

00:24:13,590 --> 00:24:11,279

take care of each other we're all in

580

00:24:17,430 --> 00:24:13,600

this together this is carol carl see you

581

00:24:22,870 --> 00:24:19,909

okay kevin for the grand prize of one
