

UFO Headline News Tuesday July 11th, 2017

Listen on

inceptionradionetwork.com

1
00:00:06,889 --> 00:00:04,670
hello it's Tuesday July 11 2017 you are

2
00:00:09,770 --> 00:00:06,899
listening to inception Radio Network

3
00:00:14,810 --> 00:00:09,780
voice of the fringe majority this is

4
00:00:16,760 --> 00:00:14,820
Carol Karl with UFO headline news every

5
00:00:19,670 --> 00:00:16,770
so often as we bring you information

6
00:00:22,340 --> 00:00:19,680
from earth sky dot-org to start our

7
00:00:23,990 --> 00:00:22,350
broadcast here at UFO headline news we

8
00:00:25,130 --> 00:00:24,000
think about the folks who would put this

9
00:00:27,890 --> 00:00:25,140
all together

10
00:00:31,460 --> 00:00:27,900
well it's Deborah bird time here's her

11
00:00:35,770 --> 00:00:31,470
bio she created earth sky radio series

12
00:00:37,040 --> 00:00:35,780
back in 1991 and earth sky dot-org in

13
00:00:39,470 --> 00:00:37,050

1994

14

00:00:42,229 --> 00:00:39,480

today she serves as editor-in-chief of

15

00:00:44,180 --> 00:00:42,239

this website she's won a galaxy of

16

00:00:46,639 --> 00:00:44,190

awards from the broadcasting and science

17

00:00:50,779 --> 00:00:46,649

communities including having an asteroid

18

00:00:54,740 --> 00:00:50,789

named three 5:05 bird she spells that be

19

00:00:56,860 --> 00:00:54,750

y r-d in her honor how cool is that

20

00:01:00,500 --> 00:00:56,870

a science commentator and educator since

21

00:01:02,990 --> 00:01:00,510

1976 Deborah bird believes in science as

22

00:01:05,719 --> 00:01:03,000

a force for good in the world and a

23

00:01:08,330 --> 00:01:05,729

vital tool for the 21st century quote

24

00:01:10,789 --> 00:01:08,340

being an earth sky editor is like

25

00:01:14,240 --> 00:01:10,799

hosting a big global party for cool

26

00:01:16,190 --> 00:01:14,250

nature lovers and quotes she says so

27

00:01:19,399 --> 00:01:16,200

here's what she says about tonight's sky

28

00:01:22,399 --> 00:01:19,409

oh it's those handy dandy ways to find

29

00:01:24,380 --> 00:01:22,409

the Big Dipper and the North Star again

30

00:01:26,749 --> 00:01:24,390

it goes something like this

31

00:01:28,969 --> 00:01:26,759

you can use the Big Dipper which is in

32

00:01:31,940 --> 00:01:28,979

the constellation Ursa Major the Great

33

00:01:34,760 --> 00:01:31,950

Bear to find the skies northern pole

34

00:01:37,130 --> 00:01:34,770

star Polaris this is the star around

35

00:01:39,410 --> 00:01:37,140

which the whole northern celestial

36

00:01:41,569 --> 00:01:39,420

sphere appears to turn throughout the

37

00:01:43,789 --> 00:01:41,579

night that's because this star is

38

00:01:47,149 --> 00:01:43,799

located nearly above Earth's northern

39

00:01:49,190 --> 00:01:47,159

axis in times past Wanderers on the

40

00:01:52,130 --> 00:01:49,200

northern face of Earth used Polaris to

41

00:01:54,859 --> 00:01:52,140

stay on course once you find it you can

42

00:01:58,700 --> 00:01:54,869

also look for tubing or Ubben it's

43

00:02:01,760 --> 00:01:58,710

spelled th uban it's that famous star in

44

00:02:04,999 --> 00:02:01,770

the constellation Draco the dragon so

45

00:02:08,059 --> 00:02:05,009

how do you find Polaris again well

46

00:02:10,760 --> 00:02:08,069

simply draw that imaginary line through

47

00:02:13,040 --> 00:02:10,770

the big dipper's pointer stars the guys

48

00:02:14,990 --> 00:02:13,050

named Dube and

49

00:02:17,270 --> 00:02:15,000

that line will point to Polaris the

50

00:02:19,880 --> 00:02:17,280

North Star you can use this trick to

51
00:02:22,640 --> 00:02:19,890
find Polaris any evening no matter how

52
00:02:26,240 --> 00:02:22,650
the dipper is oriented with respect to

53
00:02:29,240 --> 00:02:26,250
your northern horizon okay now once

54
00:02:31,490 --> 00:02:29,250
you've got Polaris if your sky is dark

55
00:02:34,250 --> 00:02:31,500
enough you might be able to see the

56
00:02:35,420 --> 00:02:34,260
Little Dipper asterism it's harder to

57
00:02:37,700 --> 00:02:35,430
spot than the Big Dipper

58
00:02:40,160 --> 00:02:37,710
it needs a dark sky if you're going to

59
00:02:42,410 --> 00:02:40,170
see it there's a chart to tell you how

60
00:02:46,010 --> 00:02:42,420
to do these things you can find that

61
00:02:48,230 --> 00:02:46,020
chart later at UFO headline news calm in

62
00:02:50,720 --> 00:02:48,240
other words the Big Dipper the Little

63
00:02:52,940 --> 00:02:50,730

Dipper the star Polaris the Little

64

00:02:55,760 --> 00:02:52,950

Dipper isn't the entire constellation

65

00:02:58,790 --> 00:02:55,770

it's just a noticeable pattern within

66

00:03:00,260 --> 00:02:58,800

the constellation are some minor the

67

00:03:03,670 --> 00:03:00,270

smaller bear

68

00:03:07,550 --> 00:03:03,680

yikes bears and little dippers and

69

00:03:09,260 --> 00:03:07,560

asterisms oh my Polaris isn't the

70

00:03:12,140 --> 00:03:09,270

brightest star in the sky as it's

71

00:03:14,870 --> 00:03:12,150

commonly supposed it's only the fiftieth

72

00:03:17,300 --> 00:03:14,880

brightest torso still Polaris is bright

73

00:03:20,990 --> 00:03:17,310

enough to be seen with relative ease on

74

00:03:24,170 --> 00:03:21,000

a dark clear night now back to Toobin t

75

00:03:26,330 --> 00:03:24,180

hu ba and we're just gonna call it Tobin

76
00:03:30,200 --> 00:03:26,340
and its constellation Draco the dragon

77
00:03:32,150 --> 00:03:30,210
as night deepens the fainter stars of

78
00:03:34,250 --> 00:03:32,160
the Little Dipper spring into view and

79
00:03:37,190 --> 00:03:34,260
those of you with dark enough skies can

80
00:03:39,740 --> 00:03:37,200
expect to see a winding stream of stars

81
00:03:42,770 --> 00:03:39,750
going between the Big Dipper and Little

82
00:03:45,740 --> 00:03:42,780
Dipper this winding stream that would be

83
00:03:48,260 --> 00:03:45,750
your constellation Draco the star Thuban

84
00:03:50,600 --> 00:03:48,270
is one of the stars here part of the

85
00:03:52,790 --> 00:03:50,610
tale of the legendary constellation

86
00:03:55,760 --> 00:03:52,800
Draco the dragon a fixture of the

87
00:03:58,160 --> 00:03:55,770
northern skies Debra Burt always finds

88
00:03:59,720 --> 00:03:58,170

Toobin by remembering that it's between

89

00:04:03,710 --> 00:03:59,730

the big and the little

90

00:04:07,990 --> 00:04:03,720

dippers Toobin has fame it served as a

91

00:04:10,430 --> 00:04:08,000

pole star around 3000 BC and this date

92

00:04:13,430 --> 00:04:10,440

coincides with the beginning of the

93

00:04:15,740 --> 00:04:13,440

building of the pyramids in Egypt it is

94

00:04:18,680 --> 00:04:15,750

said that the descending passage of the

95

00:04:22,159 --> 00:04:18,690

Great Pyramid of Khufu at Giza was built

96

00:04:26,170 --> 00:04:22,169

to point directly at Toobin so our

97

00:04:28,960 --> 00:04:26,180

ancestors knew and celebrated this star

98

00:04:31,330 --> 00:04:28,970

so here's the bottom line draw an

99

00:04:33,670 --> 00:04:31,340

imaginary line through the Big Dipper

100

00:04:36,520 --> 00:04:33,680

pointer stars you'll find Polaris the

101
00:04:39,790 --> 00:04:36,530
North Star if your sky is dark enough

102
00:04:41,560 --> 00:04:39,800
look for Toobin in the tail of Draco the

103
00:04:44,790 --> 00:04:41,570
dragon good luck

104
00:04:48,550 --> 00:04:44,800
how long is the tail of Draco the dragon

105
00:04:52,300 --> 00:04:48,560
no here's one how long is a day on the

106
00:04:54,730 --> 00:04:52,310
moon the universe today.com answers that

107
00:04:58,240 --> 00:04:54,740
for us it's an article written by Matt

108
00:05:02,170 --> 00:04:58,250
Williams and the headline reads how long

109
00:05:04,090 --> 00:05:02,180
is a day on the moon the moon has been

110
00:05:06,520 --> 00:05:04,100
around since the earliest days of the

111
00:05:09,159 --> 00:05:06,530
solar system to human beings there's

112
00:05:11,650 --> 00:05:09,169
never been a time when we couldn't look

113
00:05:14,350 --> 00:05:11,660

up in the night sky and either see the

114

00:05:17,230 --> 00:05:14,360

moon hanging there or know that it would

115

00:05:19,689 --> 00:05:17,240

be back the very next night an example

116

00:05:21,490 --> 00:05:19,699

the new moon and thanks to the

117

00:05:24,040 --> 00:05:21,500

development of modern astronomy and

118

00:05:26,589 --> 00:05:24,050

space exploration our understanding of

119

00:05:28,930 --> 00:05:26,599

the moon has grown immensely for

120

00:05:31,779 --> 00:05:28,940

instance we know that the moon formed

121

00:05:33,400 --> 00:05:31,789

early in Earth's history and that it may

122

00:05:36,370 --> 00:05:33,410

have played an important role in the

123

00:05:37,779 --> 00:05:36,380

development of life here on earth we

124

00:05:40,150 --> 00:05:37,789

also have learned that the moon is

125

00:05:42,460 --> 00:05:40,160

tidally locked with earth which means

126

00:05:46,510 --> 00:05:42,470

that one side is constantly facing

127

00:05:49,060 --> 00:05:46,520

towards it but how long is a day on the

128

00:05:52,080 --> 00:05:49,070

moon with one side facing the earth and

129

00:05:55,270 --> 00:05:52,090

the other side facing out what

130

00:05:58,960 --> 00:05:55,280

constitutes a single day on the lunar

131

00:06:02,620 --> 00:05:58,970

surface to break it down simply a day on

132

00:06:06,490 --> 00:06:02,630

the moon lasts as long as 29.5 earth

133

00:06:09,089 --> 00:06:06,500

days in other words if you were standing

134

00:06:13,120 --> 00:06:09,099

on the surface of the Moon it would take

135

00:06:15,550 --> 00:06:13,130

29.5 days for the Sun to move all the

136

00:06:19,450 --> 00:06:15,560

way across the sky and return to its

137

00:06:21,450 --> 00:06:19,460

original position again however as with

138

00:06:23,350 --> 00:06:21,460

all bodies in the solar system

139

00:06:25,990 --> 00:06:23,360

distinguishing between different types

140

00:06:30,149 --> 00:06:26,000

of days based on different types of

141

00:06:33,070 --> 00:06:30,159

periods is necessary since ancient times

142

00:06:36,129 --> 00:06:33,080

lunar calendars have been based on 13

143

00:06:37,149 --> 00:06:36,139

months of 28 days each reflecting the

144

00:06:39,999 --> 00:06:37,159

lunar cycle

145

00:06:41,769 --> 00:06:40,009

but as astronomers have discovered from

146

00:06:44,950 --> 00:06:41,779

centuries of studying the moon's

147

00:06:47,109 --> 00:06:44,960

behavior the moon's orbital period in

148

00:06:49,510 --> 00:06:47,119

other words the time it takes for the

149

00:06:52,450 --> 00:06:49,520

moon to complete a single orbit around

150

00:06:57,939 --> 00:06:52,460

planet Earth is actually the equivalent

151
00:07:00,760 --> 00:06:57,949
of about 27.3 Earth days or 27 days 7

152
00:07:03,279 --> 00:07:00,770
hours and 43 minutes oh and don't forget

153
00:07:06,549 --> 00:07:03,289
those eleven point five seconds to be

154
00:07:09,339 --> 00:07:06,559
precise and while the moon rotates on

155
00:07:12,129 --> 00:07:09,349
its own axis the speed at which it

156
00:07:16,420 --> 00:07:12,139
rotates in other words its sidereal

157
00:07:20,079 --> 00:07:16,430
rotation is very slow in fact it takes

158
00:07:23,110 --> 00:07:20,089
the moon the equivalent of 27.3 Earth

159
00:07:25,540 --> 00:07:23,120
days to complete a single rotation on

160
00:07:27,579 --> 00:07:25,550
its axis the same amount of time it

161
00:07:31,749 --> 00:07:27,589
takes to complete a single orbit around

162
00:07:36,189 --> 00:07:31,759
Earth what this means is the moon is

163
00:07:39,040 --> 00:07:36,199

tidally locked with earth in more other

164

00:07:41,589 --> 00:07:39,050

words the moon always points the same

165

00:07:43,689 --> 00:07:41,599

face towards the earth which is why

166

00:07:46,689 --> 00:07:43,699

human beings are so familiar with that

167

00:07:49,570 --> 00:07:46,699

face of the moon and refer to the side

168

00:07:52,629 --> 00:07:49,580

that faces away from us as the dark side

169

00:07:54,309 --> 00:07:52,639

and therefore if you were standing on

170

00:07:56,860 --> 00:07:54,319

the surface of the Moon you would always

171

00:07:59,409 --> 00:07:56,870

see the earth in exactly the same

172

00:08:01,540 --> 00:07:59,419

position while the Stars and the Sun

173

00:08:05,309 --> 00:08:01,550

would continue to move around in the sky

174

00:08:08,259 --> 00:08:05,319

and here comes that however the moon's

175

00:08:11,889 --> 00:08:08,269

sidereal rotation is not where we get

176

00:08:14,139 --> 00:08:11,899

the value of a single lunar day while it

177

00:08:16,839 --> 00:08:14,149

takes twenty seven point three days for

178

00:08:19,179 --> 00:08:16,849

it to orbit the earth we must keep in

179

00:08:22,149 --> 00:08:19,189

mind that the earth is also orbiting the

180

00:08:27,009 --> 00:08:22,159

Sun the earth returns to its same

181

00:08:29,199 --> 00:08:27,019

position in orbit every 365 days so in

182

00:08:31,959 --> 00:08:29,209

order for the Sun to catch up to its

183

00:08:35,189 --> 00:08:31,969

position in the sky from the perspective

184

00:08:38,949 --> 00:08:35,199

of the moon it has to turn a little more

185

00:08:41,920 --> 00:08:38,959

the extra two point two days is the time

186

00:08:44,590 --> 00:08:41,930

it takes for the moon to catch up in its

187

00:08:46,750 --> 00:08:44,600

rotation and while the amount of time

188

00:08:49,600 --> 00:08:46,760

the moon takes to complete one turn on

189

00:08:51,960 --> 00:08:49,610

its axis with respect to the Stars is

190

00:08:55,230 --> 00:08:51,970

twenty seven point three days

191

00:08:57,059 --> 00:08:55,240

that constitutes a sidereal the day the

192

00:08:59,340 --> 00:08:57,069

amount of time it takes for the Sun to

193

00:09:03,030 --> 00:08:59,350

return to that same position in the sky

194

00:09:06,480 --> 00:09:03,040

is something called a sidereal day

195

00:09:09,749 --> 00:09:06,490

sidereal is how that spelled and that's

196

00:09:11,009 --> 00:09:09,759

what takes twenty nine point five days

197

00:09:14,879 --> 00:09:11,019

whew

198

00:09:17,699 --> 00:09:14,889

again no tests no pop quizzes here we

199

00:09:19,740 --> 00:09:17,709

absolutely stand by that but it's

200

00:09:24,119 --> 00:09:19,750

interesting information to sort of get a

201
00:09:27,269 --> 00:09:24,129
scan a sense of we think and as the

202
00:09:30,119 --> 00:09:27,279
writer continues Matt Williams says ergo

203
00:09:32,220 --> 00:09:30,129
a single day on the moon with respect to

204
00:09:34,710 --> 00:09:32,230
the Sun returning to the same position

205
00:09:39,540 --> 00:09:34,720
in the sky it's actually about as long

206
00:09:41,160 --> 00:09:39,550
as an average month here on earth so if

207
00:09:43,259 --> 00:09:41,170
people are planning on living there

208
00:09:45,540 --> 00:09:43,269
someday and they aren't living in the

209
00:09:47,040 --> 00:09:45,550
permanently shadowed craters that exists

210
00:09:49,920 --> 00:09:47,050
in the southern and northern polar

211
00:09:53,189 --> 00:09:49,930
regions that's something they might have

212
00:09:55,139 --> 00:09:53,199
to get used to as with all the bodies of

213
00:09:58,439 --> 00:09:55,149

the solar system it comes down to a

214

00:10:00,780 --> 00:09:58,449

matter of perspective and if you're

215

00:10:03,480 --> 00:10:00,790

living on the moon your perspective on

216

00:10:05,579 --> 00:10:03,490

what constitutes a day will be vastly

217

00:10:09,329 --> 00:10:05,589

different from that of a person who was

218

00:10:11,519 --> 00:10:09,339

born on earth hmm we can only ponder

219

00:10:16,290 --> 00:10:11,529

what that's going to do to circadian

220

00:10:19,530 --> 00:10:16,300

rhythms etc let's get in the rhythm of a

221

00:10:22,710 --> 00:10:19,540

UFO sighting in Sequoia National Park in

222

00:10:25,350 --> 00:10:22,720

the golden state of California shall we

223

00:10:28,710 --> 00:10:25,360

this comes to us by way of UFO stalker

224

00:10:31,439 --> 00:10:28,720

calm its MUFON case number eight for

225

00:10:34,740 --> 00:10:31,449

eight nine eight the date of this

226

00:10:37,889 --> 00:10:34,750

sighting is July 6th 2017 it was

227

00:10:40,889 --> 00:10:37,899

submitted for examination etc on the

228

00:10:42,449 --> 00:10:40,899

seventh of July in the same year under

229

00:10:45,749 --> 00:10:42,459

sighting basics here's the summary

230

00:10:49,040 --> 00:10:45,759

provided by the witness three white

231

00:10:53,429 --> 00:10:49,050

lights triangle formation hovering

232

00:10:56,970 --> 00:10:53,439

ascending over california highway 198 in

233

00:11:00,809 --> 00:10:56,980

Sequoia National Park citing specifics

234

00:11:03,689 --> 00:11:00,819

provide a viewing distance 101 feet to

235

00:11:05,700 --> 00:11:03,699

500 feet eventually an altitude

236

00:11:07,590 --> 00:11:05,710

described as treetop

237

00:11:10,470 --> 00:11:07,600

the sighting duration was two minutes

238

00:11:14,100 --> 00:11:10,480

the object features are carrying that

239

00:11:16,710 --> 00:11:14,110

report unknown the flight path hovering

240

00:11:18,720 --> 00:11:16,720

and then path and according to the

241

00:11:21,540 --> 00:11:18,730

witness this object was shaped like a

242

00:11:23,340 --> 00:11:21,550

sphere there's no weather listed so

243

00:11:25,949 --> 00:11:23,350

we're guessing the weather was not

244

00:11:28,980 --> 00:11:25,959

particularly impactful to this event

245

00:11:32,730 --> 00:11:28,990

here is the event rough unedited

246

00:11:34,290 --> 00:11:32,740

first-person words of the witness I was

247

00:11:37,230 --> 00:11:34,300

in the car with my girlfriend when

248

00:11:39,780 --> 00:11:37,240

scanning the road for hazards and pretty

249

00:11:42,870 --> 00:11:39,790

views upon our exit from Sequoia

250

00:11:45,389 --> 00:11:42,880

National Park I was leaning forward

251
00:11:47,790 --> 00:11:45,399
looking at the treetops which were about

252
00:11:49,949 --> 00:11:47,800
200 feet off the ground when the road

253
00:11:53,670 --> 00:11:49,959
straightened out from its previously

254
00:11:56,519 --> 00:11:53,680
curvy path immediately I saw three white

255
00:11:58,590 --> 00:11:56,529
lights in the air they were roughly at

256
00:12:01,829 --> 00:11:58,600
my elevation due to the fact that we

257
00:12:03,570 --> 00:12:01,839
were coming from up hill my girlfriend

258
00:12:05,970 --> 00:12:03,580
was on the phone talking to her sister

259
00:12:08,240 --> 00:12:05,980
at the time I cut her off I exclaimed

260
00:12:11,280 --> 00:12:08,250
look at that look at it right now I

261
00:12:13,470 --> 00:12:11,290
continued to force her to look at it so

262
00:12:16,110 --> 00:12:13,480
that I wouldn't be the only witness I am

263
00:12:18,840 --> 00:12:16,120

convinced that other cars that had been

264

00:12:22,470 --> 00:12:18,850

in front of me and behind me saw this as

265

00:12:24,780 --> 00:12:22,480

well this object was hovering just above

266

00:12:28,590 --> 00:12:24,790

the treetops a short distance to the

267

00:12:31,829 --> 00:12:28,600

south of highway 198 it was a slow

268

00:12:34,829 --> 00:12:31,839

aircraft speed visually I estimate it to

269

00:12:38,010 --> 00:12:34,839

be about 80 miles per hour these three

270

00:12:41,730 --> 00:12:38,020

lights were in a triangle shape on a

271

00:12:43,860 --> 00:12:41,740

shadow the shadow looked circular I'm

272

00:12:47,490 --> 00:12:43,870

unsure of the shape of this craft as the

273

00:12:49,860 --> 00:12:47,500

middle lights rotated about the x-axis

274

00:12:52,380 --> 00:12:49,870

of the shape while the two outer lights

275

00:12:55,110 --> 00:12:52,390

stay put the individual lights were

276

00:12:57,420 --> 00:12:55,120

circular they were bright white this

277

00:12:59,519 --> 00:12:57,430

craft rotated to face the general

278

00:13:02,670 --> 00:12:59,529

direction of the road all the while it

279

00:13:05,790 --> 00:13:02,680

continued moving higher and further away

280

00:13:08,610 --> 00:13:05,800

from where we first saw it my girlfriend

281

00:13:11,610 --> 00:13:08,620

is in agreement with what I saw both of

282

00:13:14,819 --> 00:13:11,620

us are mentally healthy I'm sure this

283

00:13:17,370 --> 00:13:14,829

was not a civilian or military aircraft

284

00:13:18,350 --> 00:13:17,380

it did not have any of those distinct

285

00:13:21,530 --> 00:13:18,360

light patterns

286

00:13:23,449 --> 00:13:21,540

a company such aircraft I'm sure that we

287

00:13:25,190 --> 00:13:23,459

did not just witness the aircraft from

288

00:13:28,250 --> 00:13:25,200

an angle at which it would be

289

00:13:31,460 --> 00:13:28,260

unrecognizable my father is a pilot I

290

00:13:33,800 --> 00:13:31,470

have flown planes myself since age 10

291

00:13:35,960 --> 00:13:33,810

under my father's instruction and I've

292

00:13:36,740 --> 00:13:35,970

lived near a military airbase since I

293

00:13:39,500 --> 00:13:36,750

was born

294

00:13:41,900 --> 00:13:39,510

living near that airbase has exposed me

295

00:13:44,120 --> 00:13:41,910

to aircraft every day for as long as

296

00:13:46,460 --> 00:13:44,130

I've lived I can recognize which

297

00:13:48,650 --> 00:13:46,470

aircraft is what simply by its

298

00:13:51,130 --> 00:13:48,660

silhouette its lights its flight

299

00:13:54,259 --> 00:13:51,140

patterns my experience with this object

300

00:13:57,019 --> 00:13:54,269

lasted approximately two minutes this is

301
00:13:59,600 --> 00:13:57,029
perhaps an estimate as my adrenaline and

302
00:14:03,889 --> 00:13:59,610
fear were rushing through me while I

303
00:14:06,319 --> 00:14:03,899
left the location fascinating our

304
00:14:08,720 --> 00:14:06,329
reporting witness knows what's up there

305
00:14:12,290 --> 00:14:08,730
and pretty much has for his entire life

306
00:14:15,199 --> 00:14:12,300
and yet there was a sense of God and get

307
00:14:16,850 --> 00:14:15,209
out of here very interesting we can only

308
00:14:20,329 --> 00:14:16,860
wonder whether or not the girlfriend

309
00:14:23,060 --> 00:14:20,339
felt that same sentiment but we're off

310
00:14:26,389 --> 00:14:23,070
already we're hovering over Scottsdale

311
00:14:29,689 --> 00:14:26,399
Arizona where MUFON case number 8 for 8

312
00:14:32,660 --> 00:14:29,699
to 9 took place this happened on the 4th

313
00:14:35,420 --> 00:14:32,670

of July this year and got a next day

314

00:14:38,870 --> 00:14:35,430

report here's what the witnesses in

315

00:14:42,980 --> 00:14:38,880

summary three objects hovering while

316

00:14:48,050 --> 00:14:42,990

dropping metallic sparks they'd move and

317

00:14:51,800 --> 00:14:48,060

then drift before fading out yes the 4th

318

00:14:54,439 --> 00:14:51,810

of July fireworks possibly will read you

319

00:14:56,720 --> 00:14:54,449

do the discerning part gentle listeners

320

00:15:00,110 --> 00:14:56,730

the sighting specifics were a viewing

321

00:15:02,000 --> 00:15:00,120

distance of over one mile the app you're

322

00:15:03,889 --> 00:15:02,010

listening to love advice with LeAnn

323

00:15:05,780 --> 00:15:03,899

caller you're on the air

324

00:15:08,569 --> 00:15:05,790

hi LeeAnn longtime listener first-time

325

00:15:10,910 --> 00:15:08,579

caller why in your professional opinion

326

00:15:11,990 --> 00:15:10,920

do you never take my calls off the air

327

00:15:14,630 --> 00:15:12,000

is this Carl

328

00:15:17,389 --> 00:15:14,640

yep it's Carl I mean we had a few dates

329

00:15:20,449 --> 00:15:17,399

everything was great I thought well you

330

00:15:21,790 --> 00:15:20,459

know when you switch to Geico you could

331

00:15:23,420 --> 00:15:21,800

save a lot of money on car insurance

332

00:15:25,579 --> 00:15:23,430

okay awesome

333

00:15:27,380 --> 00:15:25,589

you should call them I will Geico

334

00:15:29,480 --> 00:15:27,390

because saving 15% or more on car

335

00:15:32,240 --> 00:15:29,490

insurance is always a great answer

336

00:15:34,760 --> 00:15:32,250

attitude over 500 feet no cloud

337

00:15:37,130 --> 00:15:34,770

the sighting duration was five minutes

338

00:15:40,400 --> 00:15:37,140

the object features are described as

339

00:15:43,010 --> 00:15:40,410

none the flight path here is described

340

00:15:46,780 --> 00:15:43,020

as hovering and then path and then

341

00:15:49,760 --> 00:15:46,790

ultimately other the object shape flash

342

00:15:53,090 --> 00:15:49,770

here are the words of our witness

343

00:15:55,550 --> 00:15:53,100

I was driving north on 64th Street ad

344

00:15:58,490 --> 00:15:55,560

cactus and I noticed what appeared to be

345

00:15:59,900 --> 00:15:58,500

fireworks in the distance at about one

346

00:16:02,540 --> 00:15:59,910

o'clock due north

347

00:16:05,000 --> 00:16:02,550

I thought this was the princess hotels

348

00:16:07,070 --> 00:16:05,010

fireworks display so I kept heading

349

00:16:09,950 --> 00:16:07,080

north it didn't occur to me that the

350

00:16:12,920 --> 00:16:09,960

princess hotel was not directly in front

351

00:16:16,960 --> 00:16:12,930

of me but off to my right at about two

352

00:16:19,910 --> 00:16:16,970

o'clock I watched as this ball firework

353

00:16:22,970 --> 00:16:19,920

hovered in the air it was a solid

354

00:16:25,370 --> 00:16:22,980

pill-shaped light as I got closer to it

355

00:16:27,980 --> 00:16:25,380

crossing thunderbird road about a minute

356

00:16:30,620 --> 00:16:27,990

later i noticed that this object was

357

00:16:34,130 --> 00:16:30,630

dripping what appeared to be molten

358

00:16:38,450 --> 00:16:34,140

metal this metal was falling off the

359

00:16:40,760 --> 00:16:38,460

object at a large rate I kept driving to

360

00:16:42,650 --> 00:16:40,770

see if I could get under it I called a

361

00:16:45,740 --> 00:16:42,660

friend in the area twice to see if he

362

00:16:47,840 --> 00:16:45,750

saw it but he didn't answer I tried to

363

00:16:50,030 --> 00:16:47,850

pull over and get a picture but the

364

00:16:52,850 --> 00:16:50,040

objects were not bright enough through

365

00:16:55,100 --> 00:16:52,860

my windshield and headlights I thought

366

00:16:58,010 --> 00:16:55,110

it could be a drone with a sparkler but

367

00:17:01,400 --> 00:16:58,020

I couldn't get close enough and whatever

368

00:17:04,610 --> 00:17:01,410

this was it was seen over two miles away

369

00:17:06,860 --> 00:17:04,620

it was that bright as I got through the

370

00:17:09,290 --> 00:17:06,870

Thunderbird stoplight the princess

371

00:17:11,840 --> 00:17:09,300

fireworks show came into view through

372

00:17:16,010 --> 00:17:11,850

the trees they were on the horizon at

373

00:17:19,340 --> 00:17:16,020

about 2:30 the drone lights whatever it

374

00:17:22,160 --> 00:17:19,350

was fizzled out and immediately a second

375

00:17:25,730 --> 00:17:22,170

one lit up about five degrees below the

376

00:17:28,610 --> 00:17:25,740

first this time the molten area was

377

00:17:32,450 --> 00:17:28,620

facing to the west when the first one

378

00:17:34,850 --> 00:17:32,460

came on again a third one lit up below

379

00:17:38,060 --> 00:17:34,860

the second and these molten parts were

380

00:17:40,280 --> 00:17:38,070

facing west east west dropping down

381

00:17:42,020 --> 00:17:40,290

about five times the distance of the

382

00:17:44,840 --> 00:17:42,030

heights of the object

383

00:17:46,130 --> 00:17:44,850

I approached a Safeway store on Greenway

384

00:17:48,650 --> 00:17:46,140

in 64th Street

385

00:17:51,980 --> 00:17:48,660

all three of these lights went out

386

00:17:54,470 --> 00:17:51,990

simultaneously if there are fireworks

387

00:17:56,960 --> 00:17:54,480

that hover that high in the sky I'd love

388

00:18:00,580 --> 00:17:56,970

to know where to buy them we can't have

389

00:18:02,840 --> 00:18:00,590

aerial fireworks in Arizona by the way I

390

00:18:03,830 --> 00:18:02,850

wanted to report this while it was still

391

00:18:06,320 --> 00:18:03,840

fresh in my mind

392

00:18:09,410 --> 00:18:06,330

so the details wouldn't be lost I'm

393

00:18:12,230 --> 00:18:09,420

available to answer questions any time

394

00:18:14,930 --> 00:18:12,240

that apparently the witness reporting

395

00:18:18,830 --> 00:18:14,940

has left contact information with MUFON

396

00:18:21,380 --> 00:18:18,840

and UFO stalker comm again if you're

397

00:18:23,690 --> 00:18:21,390

hearing this and you go oh my gosh I saw

398

00:18:26,960 --> 00:18:23,700

that there's a space below every

399

00:18:28,880 --> 00:18:26,970

sighting report at UFO stalker calm it's

400

00:18:33,020 --> 00:18:28,890

a wonderful sense of community

401
00:18:34,730 --> 00:18:33,030
confirmation like mine saying yes I saw

402
00:18:38,230 --> 00:18:34,740
that and here's what it looked like from

403
00:18:39,950 --> 00:18:38,240
my POV let's head north to Chicago

404
00:18:42,440 --> 00:18:39,960
Illinois

405
00:18:43,460 --> 00:18:42,450
MUFON case number eight five zero two

406
00:18:46,160 --> 00:18:43,470
four

407
00:18:49,250 --> 00:18:46,170
it's another sighting carrying the date

408
00:18:52,070 --> 00:18:49,260
of the 4th of July 2017 it wasn't

409
00:18:55,130 --> 00:18:52,080
reported till the 10th of July here's

410
00:18:58,100 --> 00:18:55,140
the summary observed bright orange solid

411
00:19:02,600 --> 00:18:58,110
light traveling south slowed down

412
00:19:05,120 --> 00:19:02,610
hovered then regained speed there is a

413
00:19:07,490 --> 00:19:05,130

photograph and video submitted with this

414

00:19:10,550 --> 00:19:07,500

account check it out gentle listeners

415

00:19:13,310 --> 00:19:10,560

it's rather stunning hard to explain so

416

00:19:14,870 --> 00:19:13,320

we won't the sighting specifics provided

417

00:19:18,500 --> 00:19:14,880

by our witness include a viewing

418

00:19:21,440 --> 00:19:18,510

distance of 501 feet to one mile the

419

00:19:24,200 --> 00:19:21,450

altitude unknown the sighting duration

420

00:19:27,380 --> 00:19:24,210

was two minutes the object features are

421

00:19:30,380 --> 00:19:27,390

reported as unknown the flight path was

422

00:19:32,600 --> 00:19:30,390

a path with directional change and this

423

00:19:35,810 --> 00:19:32,610

object is reported to have been shaped

424

00:19:38,480 --> 00:19:35,820

like a sphere there's a bit of weather

425

00:19:40,910 --> 00:19:38,490

the maximum temperature over Chicago

426

00:19:44,180 --> 00:19:40,920

Illinois at the time was 83 degrees

427

00:19:46,730 --> 00:19:44,190

Fahrenheit 28 degrees Celsius down to a

428

00:19:50,090 --> 00:19:46,740

minimum temperature of 64 degrees

429

00:19:52,130 --> 00:19:50,100

Fahrenheit 18 degrees Celsius the

430

00:19:55,190 --> 00:19:52,140

maximum visibility was 10 miles 16

431

00:19:58,730 --> 00:19:55,200

kilometers down to a minimum of nine

432

00:20:00,740 --> 00:19:58,740

miles 14 kilometers and at the

433

00:20:03,520 --> 00:20:00,750

time of this curious occurrence there

434

00:20:07,160 --> 00:20:03,530

was nothing abnormal about the weather

435

00:20:09,290 --> 00:20:07,170

here's what happened I had just arrived

436

00:20:14,510 --> 00:20:09,300

home from work in front of my house it

437

00:20:17,150 --> 00:20:14,520

was about 12:45 a.m. July 4th 2017 I was

438

00:20:19,730 --> 00:20:17,160

carrying a suit bag and case in my hands

439

00:20:22,400 --> 00:20:19,740

as I walked from my car toward my house

440

00:20:25,669 --> 00:20:22,410

I suddenly saw what I first thought to

441

00:20:28,160 --> 00:20:25,679

be an airplane flying south it appeared

442

00:20:29,810 --> 00:20:28,170

from behind the neighbors roof and it

443

00:20:32,630 --> 00:20:29,820

looked to be about the distance of

444

00:20:35,060 --> 00:20:32,640

possibly two to six blocks west of me I

445

00:20:38,330 --> 00:20:35,070

didn't know how exactly to estimate the

446

00:20:42,049 --> 00:20:38,340

altitude immediately I noticed something

447

00:20:45,049 --> 00:20:42,059

strange this object had no blinking

448

00:20:48,049 --> 00:20:45,059

lights it only had a bright orange glow

449

00:20:51,470 --> 00:20:48,059

to it that never changed intensity or

450

00:20:52,940 --> 00:20:51,480

color and the light looked spherical it

451
00:20:55,640 --> 00:20:52,950
made no sound

452
00:20:57,470 --> 00:20:55,650
I dropped my suit bag in case on the

453
00:20:59,900 --> 00:20:57,480
sidewalk and turned back to my car to

454
00:21:02,690 --> 00:20:59,910
grab my eyeglasses which were on the

455
00:21:05,810 --> 00:21:02,700
same passenger seat I closed the car

456
00:21:07,760 --> 00:21:05,820
door and put my glasses on the object

457
00:21:10,669 --> 00:21:07,770
was on the same flight path in a

458
00:21:14,210 --> 00:21:10,679
straight line going south but by this

459
00:21:16,880 --> 00:21:14,220
time it had slowed down it didn't lose

460
00:21:21,710 --> 00:21:16,890
altitude it didn't move up or down

461
00:21:24,799 --> 00:21:21,720
they just slowed almost to a hover but

462
00:21:26,870 --> 00:21:24,809
then it slowly regained speed again and

463
00:21:30,500 --> 00:21:26,880

continued in a perfectly straight line

464

00:21:32,870 --> 00:21:30,510

south I had snapped a photo with my cell

465

00:21:34,990 --> 00:21:32,880

phone and then I proceeded to turn on

466

00:21:37,400 --> 00:21:35,000

the video camera on the phone I

467

00:21:39,860 --> 00:21:37,410

continued to photograph this object for

468

00:21:41,990 --> 00:21:39,870

about another half a minute at that

469

00:21:45,799 --> 00:21:42,000

point it seemed to make a right angle

470

00:21:48,260 --> 00:21:45,809

turn west and move due west as it

471

00:21:51,890 --> 00:21:48,270

continued west it faded out within 15

472

00:21:52,990 --> 00:21:51,900

seconds and I simply couldn't see it

473

00:21:56,090 --> 00:21:53,000

anymore

474

00:21:59,660 --> 00:21:56,100

it sounds perhaps more like something

475

00:22:02,630 --> 00:21:59,670

drone like than fireworks the turning

476
00:22:05,510 --> 00:22:02,640
the slowing down of the date of course

477
00:22:08,720 --> 00:22:05,520
is the 4th of July so we're going to

478
00:22:11,299 --> 00:22:08,730
have to leave that as an unknown let's

479
00:22:12,320 --> 00:22:11,309
head off to the East Coast now to the

480
00:22:15,200 --> 00:22:12,330
state of mass

481
00:22:17,480 --> 00:22:15,210
Shusett city of Medford that's where

482
00:22:20,960 --> 00:22:17,490
MUFON Case number eight five zero to

483
00:22:23,510 --> 00:22:20,970
five took place it took a while for this

484
00:22:26,900 --> 00:22:23,520
case to get a report it happened June

485
00:22:30,260 --> 00:22:26,910
11th 2017 and it wasn't reported till

486
00:22:32,780 --> 00:22:30,270
just about a month later here's what the

487
00:22:36,200 --> 00:22:32,790
witness says in summary noticed an

488
00:22:39,800 --> 00:22:36,210

object too bright to be star changed

489

00:22:43,160 --> 00:22:39,810

shapes as I arrived home late in the

490

00:22:45,230 --> 00:22:43,170

evening there are photos accompanying

491

00:22:48,230 --> 00:22:45,240

this report as well and you can do your

492

00:22:51,620 --> 00:22:48,240

own analysis of these later at UFO

493

00:22:54,710 --> 00:22:51,630

headline news comm citing specifics

494

00:22:57,950 --> 00:22:54,720

offer a viewing distance unknown the

495

00:23:00,230 --> 00:22:57,960

altitude over five hundred feet no there

496

00:23:02,840 --> 00:23:00,240

wasn't any cloud cover that night over

497

00:23:05,390 --> 00:23:02,850

Medford Massachusetts the sighting

498

00:23:07,550 --> 00:23:05,400

duration was 15 minutes the object

499

00:23:10,520 --> 00:23:07,560

features are described as other the

500

00:23:13,970 --> 00:23:10,530

flight path was stationary hovering and

501
00:23:16,820 --> 00:23:13,980
then path and then a path and then more

502
00:23:20,540 --> 00:23:16,830
hovering and this object was shaped like

503
00:23:22,820 --> 00:23:20,550
a sphere it was hot over Medford

504
00:23:26,180 --> 00:23:22,830
Massachusetts that day maximum

505
00:23:28,760 --> 00:23:26,190
temperature 92 degrees Fahrenheit 33

506
00:23:31,850 --> 00:23:28,770
degrees Celsius dropping down to a more

507
00:23:35,360 --> 00:23:31,860
comfy minimum temperature of 66 degrees

508
00:23:37,430 --> 00:23:35,370
Fahrenheit 19 degrees Celsius all of the

509
00:23:41,330 --> 00:23:37,440
visibility factors were the same that

510
00:23:43,990 --> 00:23:41,340
standard 10 miles 16 kilometers and this

511
00:23:46,850 --> 00:23:44,000
event had nothing abnormal

512
00:23:49,190 --> 00:23:46,860
meteorological II here is the event

513
00:23:49,790 --> 00:23:49,200

itself in the first person words of our

514

00:23:52,460 --> 00:23:49,800

witness

515

00:23:55,160 --> 00:23:52,470

I left my friend's house in Tewksbury

516

00:23:57,380 --> 00:23:55,170

Massachusetts around 11:35 p.m. I

517

00:24:01,040 --> 00:23:57,390

arrived home and parked in the driveway

518

00:24:03,470 --> 00:24:01,050

just past 12:00 midnight as I got out of

519

00:24:06,020 --> 00:24:03,480

my vehicle I happened to look up and

520

00:24:07,300 --> 00:24:06,030

take notice of a nearly full moon and

521

00:24:10,130 --> 00:24:07,310

its brightness

522

00:24:14,270 --> 00:24:10,140

immediately I noticed at first a blue

523

00:24:17,510 --> 00:24:14,280

blurry object just below the moon it was

524

00:24:20,210 --> 00:24:17,520

hovering and then it moved its motion

525

00:24:23,030 --> 00:24:20,220

went from left to right but it stayed

526

00:24:23,450 --> 00:24:23,040

within the vicinity of the direction of

527

00:24:34,159 --> 00:24:23,460

the

528

00:24:36,320 --> 00:24:34,169

than a star so I put on my glasses for

529

00:24:39,919 --> 00:24:36,330

distance and began taking cell phone

530

00:24:43,130 --> 00:24:39,929

pictures Izu in and out to try to give

531

00:24:46,190 --> 00:24:43,140

this thing scale as I began taking the

532

00:24:48,549 --> 00:24:46,200

pictures my observation was that the

533

00:24:51,760 --> 00:24:48,559

object was going through a blurry

534

00:24:54,710 --> 00:24:51,770

transformation of shape and color and

535

00:24:56,810 --> 00:24:54,720

while I could not be certain what was

536

00:24:58,880 --> 00:24:56,820

taking place I was positive that

537

00:25:01,669 --> 00:24:58,890

whatever this was it had to be

538

00:25:04,730 --> 00:25:01,679

significant in size because the distance

539

00:25:08,090 --> 00:25:04,740

looked many miles away and high above

540

00:25:10,130 --> 00:25:08,100

the horizon up in the sky after 10

541

00:25:12,500 --> 00:25:10,140

minutes I went into the house to get my

542

00:25:14,510 --> 00:25:12,510

roommate to take a look at this and when

543

00:25:17,840 --> 00:25:14,520

we went back outside it had disappeared

544

00:25:20,750 --> 00:25:17,850

from view there was no opportunity to

545

00:25:24,019 --> 00:25:20,760

witness this as it left the vicinity

546

00:25:26,090 --> 00:25:24,029

where I had originally seen it I went

547

00:25:29,060 --> 00:25:26,100

into the house I downloaded the pictures

548

00:25:31,490 --> 00:25:29,070

onto my computer to verify what I might

549

00:25:34,820 --> 00:25:31,500

have taken pictures of and I was

550

00:25:38,779 --> 00:25:34,830

astounded at the change that took place

551
00:25:41,180 --> 00:25:38,789
before my eyes knowing that I had taken

552
00:25:44,180 --> 00:25:41,190
all of these pictures in under a minute

553
00:25:46,279 --> 00:25:44,190
at one point it looked a cylindrical and

554
00:25:49,909 --> 00:25:46,289
then it changed again into an unknown

555
00:25:53,149 --> 00:25:49,919
shape as it hovered it made no sound at

556
00:25:55,789 --> 00:25:53,159
the time I observed it to note all of

557
00:25:58,490 --> 00:25:55,799
the stars in the sky were faint and they

558
00:26:01,100 --> 00:25:58,500
didn't even show up in any of the photos

559
00:26:04,880 --> 00:26:01,110
from what I can tell so I have no idea

560
00:26:09,590 --> 00:26:04,890
exactly what this was other than by

561
00:26:13,810 --> 00:26:09,600
definition a UFO oh yeah

562
00:26:14,930 --> 00:26:13,820
it was an unidentified flying object

563
00:26:17,450 --> 00:26:14,940

specifics

564

00:26:20,690 --> 00:26:17,460

well those will have to wait for another

565

00:26:24,139 --> 00:26:20,700

time our time for today has vanished got

566

00:26:26,269 --> 00:26:24,149

a fly because that's a wrap thank you

567

00:26:29,210 --> 00:26:26,279

for listening to inception radio network

568

00:26:30,380 --> 00:26:29,220

follow today's broadcast at UFO headline

569

00:26:33,320 --> 00:26:30,390

news

570

00:26:34,940 --> 00:26:33,330

or YouTube or I Heart Radio to take care
