

# UFO Headline News Tuesday July 18th, 2017

Listen on

[inceptionradionetwork.com](http://inceptionradionetwork.com)

1  
00:00:05,910 --> 00:00:02,950  
tonight we've got stuff in the sky to

2  
00:00:08,230 --> 00:00:05,920  
look at but of course and deneb and

3  
00:00:11,350 --> 00:00:08,240  
cygnus this one are still up there but

4  
00:00:14,629 --> 00:00:11,360  
today's forecast is for tomorrow before

5  
00:00:16,550 --> 00:00:14,639  
dawn oh yawn grab that coffee or

6  
00:00:18,630 --> 00:00:16,560  
whatever wakes you up in the morning go

7  
00:00:20,470 --> 00:00:18,640  
out and see if you can see this if

8  
00:00:22,630 --> 00:00:20,480  
you're an early riser look for the

9  
00:00:25,429 --> 00:00:22,640  
waning crescent moon near the sky's

10  
00:00:28,630 --> 00:00:25,439  
brightest planet venus and that red star

11  
00:00:30,950 --> 00:00:28,640  
aldebaran this star is the brightest in

12  
00:00:33,910 --> 00:00:30,960  
the constellation taurus the bull it

13  
00:00:36,150 --> 00:00:33,920

represents the bull's fiery eye the july

14

00:00:38,630 --> 00:00:36,160

19th morning moon is also in the

15

00:00:41,510 --> 00:00:38,640

vicinity of the pleiades star cluster

16

00:00:42,869 --> 00:00:41,520

also known as the seven sisters and also

17

00:00:45,270 --> 00:00:42,879

in taurus

18

00:00:47,190 --> 00:00:45,280

if you go out too close to the sunrise

19

00:00:49,510 --> 00:00:47,200

you might not see aldebaran or the

20

00:00:52,069 --> 00:00:49,520

pleiades your sky will already be too

21

00:00:54,470 --> 00:00:52,079

bright but she'll easily spot the moon

22

00:00:56,869 --> 00:00:54,480

and venus both of which are shining in

23

00:00:59,670 --> 00:00:56,879

front of taurus the bull right now

24

00:01:01,830 --> 00:00:59,680

after all the moon and venus rate as the

25

00:01:04,710 --> 00:01:01,840

second brightest and third brightest

26  
00:01:05,590 --> 00:01:04,720  
celestial objects respectively after our

27  
00:01:08,469 --> 00:01:05,600  
sun

28  
00:01:10,630 --> 00:01:08,479  
aldebaran is a bright red star but it's

29  
00:01:13,510 --> 00:01:10,640  
not the only bright red star in our

30  
00:01:17,030 --> 00:01:13,520  
night sky aldebaran shines virtually

31  
00:01:20,070 --> 00:01:17,040  
opposite 180 degrees of the red super

32  
00:01:21,749 --> 00:01:20,080  
giant star antares the bright red star

33  
00:01:22,950 --> 00:01:21,759  
in the constellation scorpius the

34  
00:01:26,630 --> 00:01:22,960  
scorpion

35  
00:01:28,149 --> 00:01:26,640  
heart

36  
00:01:30,310 --> 00:01:28,159  
because they're opposite each other on

37  
00:01:33,030 --> 00:01:30,320  
the dome of sky though you won't see

38  
00:01:35,990 --> 00:01:33,040

aldebaran and antares in the same sky

39

00:01:38,630 --> 00:01:36,000

together for example aldebaran won't be

40

00:01:41,429 --> 00:01:38,640

visible tonight meanwhile aldebaran's

41

00:01:43,590 --> 00:01:41,439

counterpart antares pops into view just

42

00:01:46,389 --> 00:01:43,600

as soon as darkness falls

43

00:01:48,630 --> 00:01:46,399

with each successive day antares sets

44

00:01:52,149 --> 00:01:48,640

four minutes earlier while aldebaran

45

00:01:54,630 --> 00:01:52,159

rises two hours earlier so as the days

46

00:01:57,270 --> 00:01:54,640

and weeks roll by antares spends less

47

00:01:59,670 --> 00:01:57,280

time in the evening sky after sunset

48

00:02:02,069 --> 00:01:59,680

while aldebaran spends more in the

49

00:02:04,709 --> 00:02:02,079

morning sky before sunrise

50

00:02:07,510 --> 00:02:04,719

by the time december finally arrives

51  
00:02:10,070 --> 00:02:07,520  
aldebaran will be out all night long and

52  
00:02:11,510 --> 00:02:10,080  
antares will just be lost in the glare

53  
00:02:13,589 --> 00:02:11,520  
of the sun

54  
00:02:15,990 --> 00:02:13,599  
we in the northern hemisphere associate

55  
00:02:18,309 --> 00:02:16,000  
antares with the hot season because we

56  
00:02:20,869 --> 00:02:18,319  
see this star on summer evenings and in

57  
00:02:24,070 --> 00:02:20,879  
winter we associate aldebaran with the

58  
00:02:26,550 --> 00:02:24,080  
cold season because well yup we see this

59  
00:02:28,309 --> 00:02:26,560  
star on winter evenings

60  
00:02:31,030 --> 00:02:28,319  
in the southern hemisphere of course the

61  
00:02:33,670 --> 00:02:31,040  
opposite is true antares is a winter

62  
00:02:35,270 --> 00:02:33,680  
star for those guys and aldebaran is

63  
00:02:36,470 --> 00:02:35,280

their summer star

64

00:02:39,910 --> 00:02:36,480

bottom line

65

00:02:42,070 --> 00:02:39,920

the moon is waning in the pre-dawn sky

66

00:02:44,550 --> 00:02:42,080

it's close to the pleiades star cluster

67

00:02:47,670 --> 00:02:44,560

the red star aldebaran and the planet

68

00:02:50,949 --> 00:02:47,680

venus before dawn july 19th tomorrow

69

00:02:53,190 --> 00:02:50,959

2017. so if you hit the hay extra early

70

00:02:54,790 --> 00:02:53,200

tonight well you can roll out of bed

71

00:02:56,550 --> 00:02:54,800

early enough to see that tomorrow

72

00:02:58,070 --> 00:02:56,560

morning good luck

73

00:03:01,110 --> 00:02:58,080

speaking of luck it looks as though

74

00:03:03,430 --> 00:03:01,120

nasa's citizen science program is a

75

00:03:06,550 --> 00:03:03,440

success at least so far here's a

76  
00:03:09,270 --> 00:03:06,560  
headline citizen scientists discover new

77  
00:03:11,509 --> 00:03:09,280  
brown dwarf this gets a byline for

78  
00:03:14,550 --> 00:03:11,519  
brooks hayes who writes it for united

79  
00:03:16,470 --> 00:03:14,560  
press international quote i'm not a

80  
00:03:19,110 --> 00:03:16,480  
professional i'm just an amateur

81  
00:03:21,670 --> 00:03:19,120  
astronomer appreciating the night sky

82  
00:03:25,190 --> 00:03:21,680  
and quotes that's from citizen scientist

83  
00:03:27,830 --> 00:03:25,200  
rosa castro here's the story astronomers

84  
00:03:29,910 --> 00:03:27,840  
inventory of brown dwarfs is growing

85  
00:03:32,630 --> 00:03:29,920  
thanks to the diligent work of citizen

86  
00:03:36,229 --> 00:03:32,640  
scientists as part of the nasa-funded

87  
00:03:38,390 --> 00:03:36,239  
backyard world's planet nine project

88  
00:03:41,110 --> 00:03:38,400

four citizen scientists helped identify

89

00:03:44,949 --> 00:03:41,120

a new brown dwarf it's called

90

00:03:52,070 --> 00:03:47,670

and the numbers and letters are these

91

00:03:57,589 --> 00:03:53,789

plus

92

00:04:00,390 --> 00:03:57,599

54005 2.8 that was detailed this week in

93

00:04:02,309 --> 00:04:00,400

the astrophysical journal letters the

94

00:04:03,750 --> 00:04:02,319

four amateur astronomers are listed as

95

00:04:05,670 --> 00:04:03,760

co-authors

96

00:04:08,949 --> 00:04:05,680

one of the citizen scientists is rosa

97

00:04:11,030 --> 00:04:08,959

castro rosa by day is a therapist but

98

00:04:13,670 --> 00:04:11,040

she spends many nights scanning flip

99

00:04:14,789 --> 00:04:13,680

books those time lapse space image

100

00:04:16,710 --> 00:04:14,799

collections

101

00:04:18,469 --> 00:04:16,720

like the hundreds of other citizen

102

00:04:20,789 --> 00:04:18,479

scientists working on the backyard

103

00:04:23,030 --> 00:04:20,799

worlds project rosa castro is looking

104

00:04:25,670 --> 00:04:23,040

for even the slightest anomaly among the

105

00:04:27,990 --> 00:04:25,680

space images a sign that nasa's

106

00:04:31,030 --> 00:04:28,000

wide-field infrared survey explorer

107

00:04:33,350 --> 00:04:31,040

that's the wise part infrared images may

108

00:04:34,870 --> 00:04:33,360

have documented the transit of a fast

109

00:04:36,150 --> 00:04:34,880

moving object

110

00:04:38,070 --> 00:04:36,160

here's her quote

111

00:04:39,990 --> 00:04:38,080

i am not a professional i'm just an

112

00:04:42,870 --> 00:04:40,000

amateur astronomer appreciating the

113

00:04:45,590 --> 00:04:42,880

night sky if i see something odd i'll

114

00:04:47,990 --> 00:04:45,600

admire and enjoy it end quotes

115

00:04:50,310 --> 00:04:48,000

the nasa backyard world project was

116

00:04:53,430 --> 00:04:50,320

originally drafted to aid the search for

117

00:04:55,430 --> 00:04:53,440

a mysterious object that possible ninth

118

00:04:56,469 --> 00:04:55,440

planet located beyond the orbit of

119

00:04:58,310 --> 00:04:56,479

neptune

120

00:05:01,110 --> 00:04:58,320

quote we realized we could do a much

121

00:05:03,670 --> 00:05:01,120

better job identifying planet nine if we

122

00:05:05,990 --> 00:05:03,680

opened this search to the public that's

123

00:05:08,070 --> 00:05:06,000

from research leader mark kuchner an

124

00:05:10,950 --> 00:05:08,080

astrophysicist at nasa's goddard space

125

00:05:13,110 --> 00:05:10,960

flight center in greenbelt maryland he

126

00:05:15,510 --> 00:05:13,120

continued quote along the way we're

127

00:05:18,710 --> 00:05:15,520

hoping to find thousands of interesting

128

00:05:20,310 --> 00:05:18,720

brown dwarfs end quotes and yes as you

129

00:05:22,310 --> 00:05:20,320

might have figured the computer

130

00:05:24,950 --> 00:05:22,320

algorithms do most of the searching for

131

00:05:27,749 --> 00:05:24,960

exoplanets but even the best analytical

132

00:05:30,310 --> 00:05:27,759

models are still not all that efficient

133

00:05:32,550 --> 00:05:30,320

however scanning hundreds of thousands

134

00:05:36,230 --> 00:05:32,560

of images just isn't feasible for a

135

00:05:38,390 --> 00:05:36,240

full-time astronomer enter crowdsourcing

136

00:05:40,870 --> 00:05:38,400

citizen scientists can devote as much or

137

00:05:41,909 --> 00:05:40,880

as little time into scanning images as

138

00:05:43,909 --> 00:05:41,919

they want

139

00:05:45,670 --> 00:05:43,919

when they see something peculiar they

140

00:05:47,990 --> 00:05:45,680

can make a note for astronomers to check

141

00:05:50,469 --> 00:05:48,000

it out the project has already helped

142

00:05:52,469 --> 00:05:50,479

astronomers identify dozens of brown

143

00:05:54,790 --> 00:05:52,479

dwarf candidates here's a quote from

144

00:05:57,510 --> 00:05:54,800

adam schneider he's an astronomer out of

145

00:05:59,909 --> 00:05:57,520

arizona state university quote what's

146

00:06:01,670 --> 00:05:59,919

special about this object besides the

147

00:06:04,550 --> 00:06:01,680

way it was discovered is that it's

148

00:06:06,870 --> 00:06:04,560

unusually faint that means our citizen

149

00:06:09,830 --> 00:06:06,880

scientists are probing much deeper than

150

00:06:11,590 --> 00:06:09,840

anyone has before end quotes

151  
00:06:14,309 --> 00:06:11,600  
researchers hope the citizen scientists

152  
00:06:17,670 --> 00:06:14,319  
project will soon locate a rare group of

153  
00:06:19,430 --> 00:06:17,680  
small cold brown dwarfs they're called

154  
00:06:21,830 --> 00:06:19,440  
wide dwarfs

155  
00:06:23,909 --> 00:06:21,840  
quote they're so faint that it's quite a

156  
00:06:25,909 --> 00:06:23,919  
bit of work to pull them from the images

157  
00:06:28,150 --> 00:06:25,919  
and that's where this project will help

158  
00:06:30,070 --> 00:06:28,160  
immensely end quotes that's from adam

159  
00:06:32,790 --> 00:06:30,080  
burgasser he's a researcher from the

160  
00:06:34,950 --> 00:06:32,800  
university of california san diego he

161  
00:06:36,790 --> 00:06:34,960  
continued quote anytime you get a

162  
00:06:39,189 --> 00:06:36,800  
diverse set of people looking at the

163  
00:06:41,990 --> 00:06:39,199

data they'll bring unique perspectives

164

00:06:45,590 --> 00:06:42,000

that can lead to unexpected discoveries

165

00:06:47,270 --> 00:06:45,600

and quotes so the backyard world project

166

00:06:49,270 --> 00:06:47,280

there'll be a link embedded in this

167

00:06:51,670 --> 00:06:49,280

article if you're inclined to get

168

00:06:54,710 --> 00:06:51,680

involved do it you can find that link

169

00:06:57,110 --> 00:06:54,720

later at ufoheadlinenews.com

170

00:06:59,990 --> 00:06:57,120

yes yes it's radio and we don't have the

171

00:07:02,870 --> 00:07:00,000

visuals for you but we do have the links

172

00:07:05,350 --> 00:07:02,880

to this headline colorful photos show

173

00:07:08,150 --> 00:07:05,360

auroras dancing in skies around the

174

00:07:10,150 --> 00:07:08,160

world last weekend miriam cramer writes

175

00:07:12,550 --> 00:07:10,160

this for mashable

176

00:07:14,309 --> 00:07:12,560

green and purple curtains of light

177

00:07:17,110 --> 00:07:14,319

danced in the skies around the world

178

00:07:19,830 --> 00:07:17,120

last weekend the strong aurora showing

179

00:07:22,550 --> 00:07:19,840

was sparked by a mass of hot plasma

180

00:07:24,950 --> 00:07:22,560

burped from the sun and sent on a crash

181

00:07:27,029 --> 00:07:24,960

course with earth and while the auroras

182

00:07:28,710 --> 00:07:27,039

weren't particularly strong in the new

183

00:07:30,710 --> 00:07:28,720

england states and some other parts of

184

00:07:33,110 --> 00:07:30,720

the united states these curtains of

185

00:07:34,950 --> 00:07:33,120

lights did put on a good show for people

186

00:07:37,430 --> 00:07:34,960

in the high altitudes of the southern

187

00:07:39,510 --> 00:07:37,440

and northern hemispheres in fact

188

00:07:41,510 --> 00:07:39,520

scientists at research stations in

189

00:07:42,870 --> 00:07:41,520

antarctica even caught sight of these

190

00:07:45,350 --> 00:07:42,880

southern lights

191

00:07:47,430 --> 00:07:45,360

auroras occur when streams of charged

192

00:07:49,430 --> 00:07:47,440

particles are sent out from the sun to

193

00:07:51,670 --> 00:07:49,440

the rest of the solar system these

194

00:07:53,830 --> 00:07:51,680

particles can impact earth's magnetic

195

00:07:55,830 --> 00:07:53,840

field and get drawn down into the

196

00:07:58,070 --> 00:07:55,840

planet's upper atmosphere

197

00:08:00,150 --> 00:07:58,080

once in that atmosphere these solar

198

00:08:02,629 --> 00:08:00,160

particles can interact with neutral

199

00:08:04,309 --> 00:08:02,639

particles creating the glowing lights we

200

00:08:06,150 --> 00:08:04,319

call auroras

201  
00:08:07,909 --> 00:08:06,160  
most of the time auroras can only be

202  
00:08:10,469 --> 00:08:07,919  
seen in a relatively small part of the

203  
00:08:12,950 --> 00:08:10,479  
world because the bits of solar plasma

204  
00:08:15,670 --> 00:08:12,960  
are drawn down along magnetic field

205  
00:08:18,150 --> 00:08:15,680  
lines but sometimes when solar storms

206  
00:08:20,790 --> 00:08:18,160  
are more intense the oval of the aurora

207  
00:08:24,230 --> 00:08:20,800  
can become larger bathing other parts of

208  
00:08:26,309 --> 00:08:24,240  
the world in green purple and red light

209  
00:08:29,909 --> 00:08:26,319  
well red light here on earth means stop

210  
00:08:32,630 --> 00:08:29,919  
green light is a go and japan has a go

211  
00:08:35,190 --> 00:08:32,640  
with this here's the headline japan made

212  
00:08:38,149 --> 00:08:35,200  
a floating camera for the space station

213  
00:08:40,469 --> 00:08:38,159

and it sure is adorable

214

00:08:42,949 --> 00:08:40,479

it the int ball looks like it walked

215

00:08:45,910 --> 00:08:42,959

right out of the film wall-e

216

00:08:47,430 --> 00:08:45,920

and into your heart says andrew moseman

217

00:08:49,269 --> 00:08:47,440

who writes this article for

218

00:08:51,030 --> 00:08:49,279

popularmechanics.com

219

00:08:53,590 --> 00:08:51,040

the space division

220

00:08:55,910 --> 00:08:53,600

this cute floating orb and of course

221

00:08:58,150 --> 00:08:55,920

there will be photos of said cute

222

00:09:00,470 --> 00:08:58,160

floating orb you can find them later at

223

00:09:03,110 --> 00:09:00,480

ufoheadlinenews.com

224

00:09:07,550 --> 00:09:03,120

this orb is an astronaut's new best

225

00:09:10,389 --> 00:09:07,560

friend the int ball that's spelled int

226

00:09:13,829 --> 00:09:10,399

b-a-l-l made by the japanese space

227

00:09:15,910 --> 00:09:13,839

agency jaxa moves autonomously around

228

00:09:18,150 --> 00:09:15,920

the international space station

229

00:09:20,389 --> 00:09:18,160

jaxa people on the ground can remotely

230

00:09:23,269 --> 00:09:20,399

drive the little ball too and use it to

231

00:09:25,509 --> 00:09:23,279

capture life aboard the station in fact

232

00:09:26,630 --> 00:09:25,519

they just released the first images and

233

00:09:28,470 --> 00:09:26,640

video

234

00:09:31,190 --> 00:09:28,480

international space station astronauts

235

00:09:34,550 --> 00:09:31,200

spend a surprising amount of their time

236

00:09:36,630 --> 00:09:34,560

jaxa says 10 percent overall filming and

237

00:09:38,870 --> 00:09:36,640

photographing things because they need

238

00:09:40,470 --> 00:09:38,880

to track the progress on a project or

239

00:09:42,790 --> 00:09:40,480

check the status of something that might

240

00:09:45,269 --> 00:09:42,800

need to be fixed for example

241

00:09:47,430 --> 00:09:45,279

if a friendly floating robot can do that

242

00:09:50,150 --> 00:09:47,440

job the thinking goes then astronauts

243

00:09:52,790 --> 00:09:50,160

have far more time for something else

244

00:09:56,310 --> 00:09:52,800

well how does little int bot move around

245

00:09:59,269 --> 00:09:56,320

you say well engadget says this quote

246

00:10:01,190 --> 00:09:59,279

the cube-shaped brain converses with 12

247

00:10:03,750 --> 00:10:01,200

fans positioned near the surface of the

248

00:10:04,790 --> 00:10:03,760

robot which adjust its position in zero

249

00:10:07,750 --> 00:10:04,800

gravity

250

00:10:11,269 --> 00:10:07,760

a navigation camera looks out for pink

251  
00:10:13,110 --> 00:10:11,279  
quote 3d target makers end quotes which

252  
00:10:13,990 --> 00:10:13,120  
serve as reference points on board the

253  
00:10:15,670 --> 00:10:14,000  
ship

254  
00:10:18,150 --> 00:10:15,680  
the recording camera meanwhile is

255  
00:10:20,630 --> 00:10:18,160  
located between the two eyes so that

256  
00:10:22,550 --> 00:10:20,640  
astronauts can easily identify what it's

257  
00:10:24,389 --> 00:10:22,560  
looking at and quotes

258  
00:10:26,870 --> 00:10:24,399  
little int ball hitched a ride to the

259  
00:10:29,590 --> 00:10:26,880  
space station in june aboard a japanese

260  
00:10:31,750 --> 00:10:29,600  
capsule propelled by a spacex rocket

261  
00:10:35,190 --> 00:10:31,760  
and andrew moseman closes this article

262  
00:10:37,269 --> 00:10:35,200  
by saying have fun up there little guy

263  
00:10:39,430 --> 00:10:37,279

here's something that could be fun down

264

00:10:42,069 --> 00:10:39,440

here it's an article written by nat

265

00:10:44,790 --> 00:10:42,079

berman for a wonderful website called

266

00:10:47,990 --> 00:10:44,800

tvovermind.com

267

00:10:50,710 --> 00:10:48,000

he's talking about the show ufo files

268

00:10:52,630 --> 00:10:50,720

revisited here we go

269

00:10:56,550 --> 00:10:52,640

what can you expect from the television

270

00:10:58,069 --> 00:10:56,560

show and title ufo files revisited

271

00:11:00,470 --> 00:10:58,079

if you happen to be interested in this

272

00:11:02,790 --> 00:11:00,480

sort of thing oh yes gentle listeners

273

00:11:04,870 --> 00:11:02,800

aren't we all you will probably be

274

00:11:06,790 --> 00:11:04,880

interested in watching the show

275

00:11:08,870 --> 00:11:06,800

obviously the show is going to deal with

276

00:11:11,110 --> 00:11:08,880

some of the most widely known cases of

277

00:11:13,350 --> 00:11:11,120

ufo sightings looking at different

278

00:11:15,590 --> 00:11:13,360

possibilities for why these sightings

279

00:11:18,069 --> 00:11:15,600

have occurred and why they continue to

280

00:11:20,710 --> 00:11:18,079

happen all over the world

281

00:11:23,110 --> 00:11:20,720

first and foremost understand that this

282

00:11:24,790 --> 00:11:23,120

is a show that's similar in nature to a

283

00:11:25,910 --> 00:11:24,800

lot of the other television shows of

284

00:11:27,430 --> 00:11:25,920

this type

285

00:11:30,630 --> 00:11:27,440

some people are willing to say that

286

00:11:32,230 --> 00:11:30,640

these shows have no merit whatsoever and

287

00:11:33,829 --> 00:11:32,240

that everything is made up from

288

00:11:36,150 --> 00:11:33,839

beginning to end

289

00:11:38,150 --> 00:11:36,160

others are more inclined to argue about

290

00:11:40,630 --> 00:11:38,160

that point of view saying that the shows

291

00:11:43,509 --> 00:11:40,640

are actually here to educate the public

292

00:11:46,230 --> 00:11:43,519

while simultaneously entertaining them

293

00:11:48,069 --> 00:11:46,240

without a doubt this is a television

294

00:11:49,990 --> 00:11:48,079

show that talks about real incidents

295

00:11:51,829 --> 00:11:50,000

that have been reported

296

00:11:53,269 --> 00:11:51,839

if you really want to know more about

297

00:11:55,350 --> 00:11:53,279

the way that these incidents have been

298

00:11:57,990 --> 00:11:55,360

investigated you can always do some of

299

00:12:00,470 --> 00:11:58,000

your own research to either back up or

300

00:12:03,350 --> 00:12:00,480

debunk the claims made by this show

301  
00:12:05,190 --> 00:12:03,360  
oh they're on the same page as we are by

302  
00:12:07,430 --> 00:12:05,200  
all accounts this is a show that seems

303  
00:12:09,670 --> 00:12:07,440  
to take things in a step-by-step fashion

304  
00:12:11,670 --> 00:12:09,680  
while trying to make some type of sense

305  
00:12:13,350 --> 00:12:11,680  
out of the ufo encounters that people

306  
00:12:15,110 --> 00:12:13,360  
claim to have had

307  
00:12:17,110 --> 00:12:15,120  
therefore you can expect individuals

308  
00:12:18,629 --> 00:12:17,120  
that report encounters to be interviewed

309  
00:12:20,629 --> 00:12:18,639  
in this show along with some

310  
00:12:22,829 --> 00:12:20,639  
reenactments to make the show itself

311  
00:12:25,509 --> 00:12:22,839  
more entertaining so you don't lose

312  
00:12:27,190 --> 00:12:25,519  
interest like most shows of its type

313  
00:12:29,269 --> 00:12:27,200

expect to have some individuals that are

314

00:12:31,590 --> 00:12:29,279

considered experts on the subject to

315

00:12:33,430 --> 00:12:31,600

provide some commentary even including

316

00:12:34,949 --> 00:12:33,440

information that they uncovered while

317

00:12:37,110 --> 00:12:34,959

doing research

318

00:12:39,110 --> 00:12:37,120

in some cases the people that actually

319

00:12:40,550 --> 00:12:39,120

have the sighting are interviewed and in

320

00:12:42,069 --> 00:12:40,560

other cases there are those

321

00:12:44,550 --> 00:12:42,079

re-enactments

322

00:12:46,790 --> 00:12:44,560

yep dramatic recreations done when

323

00:12:48,150 --> 00:12:46,800

people would prefer not to be in front

324

00:12:50,069 --> 00:12:48,160

of the camera

325

00:12:52,150 --> 00:12:50,079

therefore you can find a mixture of

326

00:12:54,150 --> 00:12:52,160

something that is both entertaining and

327

00:12:56,069 --> 00:12:54,160

educational not to mention being

328

00:12:58,710 --> 00:12:56,079

somewhat different from the typical

329

00:13:00,389 --> 00:12:58,720

things you might find on television

330

00:13:02,710 --> 00:13:00,399

if you really like to follow what's

331

00:13:04,710 --> 00:13:02,720

going on in the ufo community this is a

332

00:13:07,190 --> 00:13:04,720

good way to get your feet wet see what

333

00:13:08,949 --> 00:13:07,200

it's all about by the same token it

334

00:13:10,629 --> 00:13:08,959

works just as well if you're looking for

335

00:13:12,389 --> 00:13:10,639

something that's just a little bit

336

00:13:14,470 --> 00:13:12,399

different and you're bored with the

337

00:13:15,829 --> 00:13:14,480

things that you typically find on

338

00:13:17,509 --> 00:13:15,839

television

339

00:13:20,310 --> 00:13:17,519

however if you're looking for something

340

00:13:22,389 --> 00:13:20,320

that's based on hardcore science says

341

00:13:24,230 --> 00:13:22,399

nat vermin you're probably going to be

342

00:13:26,230 --> 00:13:24,240

skeptical about the show

343

00:13:27,910 --> 00:13:26,240

with that being said people that fit

344

00:13:30,389 --> 00:13:27,920

into this category are typically

345

00:13:33,509 --> 00:13:30,399

skeptical about any show that deals with

346

00:13:35,750 --> 00:13:33,519

anything like ufos the paranormal or

347

00:13:37,350 --> 00:13:35,760

anything else that's remotely fit into

348

00:13:38,790 --> 00:13:37,360

that category

349

00:13:41,110 --> 00:13:38,800

however that doesn't mean that you can't

350

00:13:43,350 --> 00:13:41,120

tune in anyway get a decent dose of

351

00:13:45,030 --> 00:13:43,360

entertainment for your time

352

00:13:47,590 --> 00:13:45,040

all in all you can expect a more

353

00:13:49,910 --> 00:13:47,600

detailed and in-depth version of

354

00:13:52,150 --> 00:13:49,920

previous shows of this type when it's

355

00:13:54,150 --> 00:13:52,160

all said and done you might be able to

356

00:13:57,829 --> 00:13:54,160

learn something new

357

00:13:59,350 --> 00:13:57,839

yup ufo files revisited we'll give it a

358

00:14:02,230 --> 00:13:59,360

watch why not

359

00:14:04,790 --> 00:14:02,240

keep an eye on your local listings

360

00:14:08,230 --> 00:14:04,800

here's a listing it's a ufo sighting

361

00:14:11,269 --> 00:14:08,240

from the folks at ufoalker.com

362

00:14:15,269 --> 00:14:11,279

this one takes place in grapevine texas

363

00:14:17,350 --> 00:14:15,279

mufon gave it a case number 85172

364

00:14:20,069 --> 00:14:17,360

the date of this sighting is the 15th of

365

00:14:21,990 --> 00:14:20,079

july 2017. it didn't get reported till

366

00:14:23,750 --> 00:14:22,000

july 17th

367

00:14:28,069 --> 00:14:23,760

here's the summary

368

00:14:31,430 --> 00:14:28,079

ufo overhaul johnston road and the 121

369

00:14:33,670 --> 00:14:31,440

in texas forgive this crazy video i was

370

00:14:36,230 --> 00:14:33,680

totally flabbergasted

371

00:14:39,150 --> 00:14:36,240

i was at the salon of my hair stylist we

372

00:14:41,189 --> 00:14:39,160

were talking about our favorite topics

373

00:14:45,110 --> 00:14:41,199

extraterrestrials when out of the clear

374

00:14:47,350 --> 00:14:45,120

blue sky we spotted this flying object

375

00:14:49,590 --> 00:14:47,360

it's time for optimum's red hot sail get

376

00:14:51,430 --> 00:14:49,600

200 meg internet tv with over 260

377

00:14:53,430 --> 00:14:51,440

channels and unlimited home phone all

378

00:14:55,509 --> 00:14:53,440

for 69.99 a month for one year

379

00:14:57,269 --> 00:14:55,519

guaranteed and for a limited time hbo

380

00:14:58,710 --> 00:14:57,279

and showtime are included for one year

381

00:15:00,389 --> 00:14:58,720

switch today click for details and

382

00:15:02,550 --> 00:15:00,399

special web-only offers

383

00:15:05,189 --> 00:15:02,560

yep that's the summary there's video

384

00:15:06,870 --> 00:15:05,199

included and a still shot the sighting

385

00:15:09,990 --> 00:15:06,880

specifics here include an unknown

386

00:15:12,389 --> 00:15:10,000

viewing distance an altitude of over 500

387

00:15:14,470 --> 00:15:12,399

feet underneath cloud cover the sighting

388

00:15:17,269 --> 00:15:14,480

duration was 11 seconds

389

00:15:18,470 --> 00:15:17,279

and the object features are described as

390

00:15:21,350 --> 00:15:18,480

unknown

391

00:15:23,750 --> 00:15:21,360

oh boy howdy as they say in texas are

392

00:15:26,069 --> 00:15:23,760

they unknown the flight path was

393

00:15:28,710 --> 00:15:26,079

hovering and then path and then a path

394

00:15:32,470 --> 00:15:28,720

with directional change and this object

395

00:15:34,470 --> 00:15:32,480

had a shape that's described as other

396

00:15:37,430 --> 00:15:34,480

the weather details include a maximum

397

00:15:40,310 --> 00:15:37,440

temperature in grapevine texas of 94

398

00:15:42,949 --> 00:15:40,320

degrees fahrenheit 34 degrees celsius

399

00:15:45,829 --> 00:15:42,959

down to a minimum of 79 degrees

400

00:15:48,230 --> 00:15:45,839

fahrenheit 26 degrees celsius the

401  
00:15:51,269 --> 00:15:48,240  
visibility factor is nothing unusual the

402  
00:15:54,790 --> 00:15:51,279  
standard 10 miles 16 kilometers down to

403  
00:15:57,910 --> 00:15:54,800  
a minimum of 7 miles 11 kilometers

404  
00:15:59,910 --> 00:15:57,920  
here's the short but intriguing account

405  
00:16:02,790 --> 00:15:59,920  
i was getting my hair styled and the

406  
00:16:05,269 --> 00:16:02,800  
suite has large plate glass windows my

407  
00:16:07,350 --> 00:16:05,279  
hair stylist spotted the object first

408  
00:16:10,230 --> 00:16:07,360  
and then we both walked up to the window

409  
00:16:12,949 --> 00:16:10,240  
and i began filming this object

410  
00:16:15,910 --> 00:16:12,959  
it reminded me in fact of a dementor

411  
00:16:18,470 --> 00:16:15,920  
from the harry potter films it changed

412  
00:16:21,350 --> 00:16:18,480  
shapes and then direction and at one

413  
00:16:22,629 --> 00:16:21,360

point it resembled a huge creature with

414

00:16:24,230 --> 00:16:22,639

wings

415

00:16:26,870 --> 00:16:24,240

we both walked outside to continue

416

00:16:28,389 --> 00:16:26,880

watching this object it moved west until

417

00:16:31,110 --> 00:16:28,399

it was out of our view

418

00:16:33,430 --> 00:16:31,120

we both were awestruck

419

00:16:35,509 --> 00:16:33,440

oh gentle listeners as we heard in the

420

00:16:39,350 --> 00:16:35,519

summary they were talking about their

421

00:16:40,389 --> 00:16:39,360

favorite topic ufos and aliens that's

422

00:16:42,550 --> 00:16:40,399

timing

423

00:16:44,389 --> 00:16:42,560

we think that this particular sighting

424

00:16:47,829 --> 00:16:44,399

is a good candidate to toss into that

425

00:16:49,829 --> 00:16:47,839

basket we mark conscious contact take a

426  
00:16:52,710 --> 00:16:49,839  
look at the visuals form your own

427  
00:16:56,389 --> 00:16:52,720  
conclusion our trajectory now shifts to

428  
00:16:58,590 --> 00:16:56,399  
the state of oklahoma the city of tulsa

429  
00:17:01,189 --> 00:16:58,600  
that's where mufon case number

430  
00:17:03,269 --> 00:17:01,199  
85173 took place the date of this

431  
00:17:06,069 --> 00:17:03,279  
sighting was back in june the 10th of

432  
00:17:07,990 --> 00:17:06,079  
june this year nobody reported it until

433  
00:17:09,750 --> 00:17:08,000  
the 17th of july

434  
00:17:11,909 --> 00:17:09,760  
here's the summary

435  
00:17:14,630 --> 00:17:11,919  
i was sitting on my porch and observed

436  
00:17:17,429 --> 00:17:14,640  
an object flying upward i started

437  
00:17:19,909 --> 00:17:17,439  
recording the object with my cell phone

438  
00:17:21,750 --> 00:17:19,919

yup there is video footage recorded from

439

00:17:24,470 --> 00:17:21,760

this event you can find it later at

440

00:17:26,870 --> 00:17:24,480

ufoheadlinenews.com

441

00:17:30,390 --> 00:17:26,880

citing specifics give a viewing distance

442

00:17:32,710 --> 00:17:30,400

unknown the altitude was over 500 feet

443

00:17:34,710 --> 00:17:32,720

and there wasn't any cloud cover

444

00:17:36,150 --> 00:17:34,720

the siding duration was one minute and

445

00:17:38,789 --> 00:17:36,160

20 seconds

446

00:17:40,549 --> 00:17:38,799

and yet the object features get that

447

00:17:42,630 --> 00:17:40,559

unknown report

448

00:17:44,230 --> 00:17:42,640

the flight path was a path that included

449

00:17:47,750 --> 00:17:44,240

directional change

450

00:17:50,070 --> 00:17:47,760

and this object was shaped like an egg

451  
00:17:52,789 --> 00:17:50,080  
the weather in tulsa oklahoma at that

452  
00:17:55,830 --> 00:17:52,799  
time maximum temperature 89 degrees

453  
00:17:59,430 --> 00:17:55,840  
fahrenheit 32 degrees celsius a minimum

454  
00:18:02,549 --> 00:17:59,440  
temperature of 69 degrees fahrenheit 21

455  
00:18:04,870 --> 00:18:02,559  
degrees celsius those visibility factors

456  
00:18:08,070 --> 00:18:04,880  
all three of them maximum mean and

457  
00:18:10,549 --> 00:18:08,080  
minimum tracked the same 10 miles 16

458  
00:18:12,710 --> 00:18:10,559  
kilometers and at the time of this event

459  
00:18:13,750 --> 00:18:12,720  
there was nothing abnormal about the

460  
00:18:16,549 --> 00:18:13,760  
weather

461  
00:18:18,549 --> 00:18:16,559  
here is the event in the first person

462  
00:18:20,950 --> 00:18:18,559  
words from our witness

463  
00:18:22,870 --> 00:18:20,960

on june 10th 2017

464

00:18:25,270 --> 00:18:22,880

i was at home sitting on my porch

465

00:18:27,909 --> 00:18:25,280

looking at the stars in the sky

466

00:18:31,029 --> 00:18:27,919

i then noticed a big ball of light

467

00:18:33,430 --> 00:18:31,039

ascending upward into the sky

468

00:18:36,950 --> 00:18:33,440

at first i thought it was a star until i

469

00:18:39,029 --> 00:18:36,960

noticed that it was flying and very fast

470

00:18:40,390 --> 00:18:39,039

so i took out my cell phone and started

471

00:18:43,110 --> 00:18:40,400

to record

472

00:18:45,830 --> 00:18:43,120

the object was big it looked like a ball

473

00:18:47,750 --> 00:18:45,840

of glowing solid light

474

00:18:50,630 --> 00:18:47,760

i watched the object fly upwards for

475

00:18:53,190 --> 00:18:50,640

about 20 seconds and then it disappeared

476  
00:18:55,990 --> 00:18:53,200  
and then it reappeared after two seconds

477  
00:18:58,070 --> 00:18:56,000  
it was going in a different direction i

478  
00:18:59,110 --> 00:18:58,080  
continued to record this object flying

479  
00:19:01,430 --> 00:18:59,120  
again

480  
00:19:03,430 --> 00:19:01,440  
every time it disappeared it would stay

481  
00:19:05,590 --> 00:19:03,440  
disappeared for about three seconds and

482  
00:19:08,150 --> 00:19:05,600  
then reappear

483  
00:19:09,590 --> 00:19:08,160  
this object seemed to stop it changed

484  
00:19:12,150 --> 00:19:09,600  
directions

485  
00:19:14,310 --> 00:19:12,160  
on my video you can actually see another

486  
00:19:16,630 --> 00:19:14,320  
object that seems to be flying in

487  
00:19:18,870 --> 00:19:16,640  
different directions as well almost as

488  
00:19:21,350 --> 00:19:18,880

if these two objects were playing with

489

00:19:23,190 --> 00:19:21,360

each other i then continued to record

490

00:19:25,510 --> 00:19:23,200

until the big ball of light disappeared

491

00:19:29,110 --> 00:19:25,520

for good after the object disappeared

492

00:19:31,029 --> 00:19:29,120

for the last time i sat on my porch

493

00:19:34,230 --> 00:19:31,039

looking in the sky waiting for this

494

00:19:36,470 --> 00:19:34,240

object to reappear but it never did

495

00:19:38,470 --> 00:19:36,480

i really couldn't believe what i had

496

00:19:40,310 --> 00:19:38,480

just witnessed

497

00:19:42,789 --> 00:19:40,320

that's when it's cool to have something

498

00:19:45,270 --> 00:19:42,799

like a shot a photograph a still shot

499

00:19:49,110 --> 00:19:45,280

video something so that you can look at

500

00:19:51,830 --> 00:19:49,120

it study it and say yep i did see this

501  
00:19:55,110 --> 00:19:51,840  
at warp speed let's go from oklahoma to

502  
00:19:58,390 --> 00:19:55,120  
north carolina raleigh north carolina

503  
00:20:00,630 --> 00:19:58,400  
mufon case number 85087

504  
00:20:04,710 --> 00:20:00,640  
the date of this sighting is the 13th of

505  
00:20:07,430 --> 00:20:04,720  
july and it got a next day report 2017

506  
00:20:10,470 --> 00:20:07,440  
is the year here's the summary

507  
00:20:13,270 --> 00:20:10,480  
weird flying saucer-shaped orbs hovering

508  
00:20:14,710 --> 00:20:13,280  
off the coast of emerald isle north

509  
00:20:17,190 --> 00:20:14,720  
carolina

510  
00:20:18,950 --> 00:20:17,200  
and indeed there are photos of this

511  
00:20:21,750 --> 00:20:18,960  
event you can find them later at

512  
00:20:23,669 --> 00:20:21,760  
ufoheadlinenews.com

513  
00:20:26,630 --> 00:20:23,679

citing specifics give us a viewing

514

00:20:27,830 --> 00:20:26,640

distance unknown also an altitude

515

00:20:30,870 --> 00:20:27,840

unknown

516

00:20:31,909 --> 00:20:30,880

the sighting duration was 1 hour and 20

517

00:20:33,669 --> 00:20:31,919

minutes

518

00:20:37,029 --> 00:20:33,679

these object features are described as

519

00:20:39,510 --> 00:20:37,039

domes wings and unknown

520

00:20:42,549 --> 00:20:39,520

its flight path was stationary and then

521

00:20:45,830 --> 00:20:42,559

hovering and then path and this object

522

00:20:47,510 --> 00:20:45,840

had a shape described as saturn-like

523

00:20:49,830 --> 00:20:47,520

here's the account

524

00:20:51,909 --> 00:20:49,840

my family and family friends and i were

525

00:20:52,870 --> 00:20:51,919

sitting on our deck looking out over the

526  
00:20:54,750 --> 00:20:52,880  
ocean

527  
00:20:57,430 --> 00:20:54,760  
when we noticed a glowing

528  
00:20:58,870 --> 00:20:57,440  
spaceship-shaped row of lights hovering

529  
00:21:00,630 --> 00:20:58,880  
above the ocean

530  
00:21:02,310 --> 00:21:00,640  
it was in front of us

531  
00:21:03,430 --> 00:21:02,320  
another set of lights appeared out of

532  
00:21:05,110 --> 00:21:03,440  
nowhere

533  
00:21:07,510 --> 00:21:05,120  
and the two sets of lights looked like

534  
00:21:08,710 --> 00:21:07,520  
two different objects hovering close to

535  
00:21:11,110 --> 00:21:08,720  
each other

536  
00:21:13,510 --> 00:21:11,120  
after a while they disappeared later on

537  
00:21:14,470 --> 00:21:13,520  
they reappeared further and to the left

538  
00:21:16,390 --> 00:21:14,480

of us

539

00:21:17,909 --> 00:21:16,400

they were closer to the pier and yet

540

00:21:19,990 --> 00:21:17,919

they looked about the same distance as

541

00:21:22,149 --> 00:21:20,000

they were before

542

00:21:24,390 --> 00:21:22,159

this usually would start with one set of

543

00:21:26,470 --> 00:21:24,400

lights and then another appearing

544

00:21:28,830 --> 00:21:26,480

and we've seen this before

545

00:21:31,190 --> 00:21:28,840

but this time after the second set

546

00:21:34,149 --> 00:21:31,200

disappeared one set of lights

547

00:21:36,470 --> 00:21:34,159

disconnected and started hovering one a

548

00:21:38,710 --> 00:21:36,480

little far above the other the one on

549

00:21:40,549 --> 00:21:38,720

the bottom seemed to have fallen into

550

00:21:42,070 --> 00:21:40,559

the ocean and then the other one

551  
00:21:44,230 --> 00:21:42,080  
disappeared

552  
00:21:46,870 --> 00:21:44,240  
then again these things show up later

553  
00:21:49,029 --> 00:21:46,880  
three other people drove to the pier we

554  
00:21:50,789 --> 00:21:49,039  
walked to the end of it where there were

555  
00:21:53,270 --> 00:21:50,799  
many people fishing we asked some of the

556  
00:21:55,270 --> 00:21:53,280  
people what they thought we saw

557  
00:21:56,230 --> 00:21:55,280  
and they said it was probably a barge

558  
00:21:58,470 --> 00:21:56,240  
ship

559  
00:22:00,549 --> 00:21:58,480  
even after we explained to them that

560  
00:22:03,430 --> 00:22:00,559  
these things we watched were far above

561  
00:22:05,029 --> 00:22:03,440  
the water flying over the ocean and we

562  
00:22:08,070 --> 00:22:05,039  
told them how the lights disappeared and

563  
00:22:09,830 --> 00:22:08,080

reappeared in different spots

564

00:22:11,909 --> 00:22:09,840

some people were looking but most

565

00:22:13,909 --> 00:22:11,919

weren't paying any attention to the odd

566

00:22:15,669 --> 00:22:13,919

hovering disappearing lights they just

567

00:22:17,430 --> 00:22:15,679

kept fishing

568

00:22:18,630 --> 00:22:17,440

after these lights disappeared again we

569

00:22:21,270 --> 00:22:18,640

went home

570

00:22:23,909 --> 00:22:21,280

we found out later it's common to see

571

00:22:27,029 --> 00:22:23,919

mysterious glowing lights and orbs in

572

00:22:29,029 --> 00:22:27,039

the sky in emerald isle north carolina

573

00:22:31,350 --> 00:22:29,039

and that seems odd because there's loud

574

00:22:32,789 --> 00:22:31,360

jets that fly by often

575

00:22:35,350 --> 00:22:32,799

i'm guessing these jets come from a

576

00:22:37,190 --> 00:22:35,360

government base nearby and maybe these

577

00:22:38,310 --> 00:22:37,200

lights are associated with the

578

00:22:40,710 --> 00:22:38,320

government

579

00:22:42,950 --> 00:22:40,720

i'm not sure but this is the weirdest

580

00:22:45,510 --> 00:22:42,960

thing i've ever seen and some people on

581

00:22:46,310 --> 00:22:45,520

the pier acted as if nothing was going

582

00:22:47,590 --> 00:22:46,320

on

583

00:22:49,830 --> 00:22:47,600

most of them were saying these things

584

00:22:53,270 --> 00:22:49,840

were boats even though the lights were

585

00:22:55,590 --> 00:22:53,280

clearly far above the horizon and also

586

00:22:58,549 --> 00:22:55,600

they show up terrible in pictures they

587

00:23:00,390 --> 00:22:58,559

looked a lot bigger in person

588

00:23:03,029 --> 00:23:00,400

it's fascinating to this broadcaster the

589

00:23:05,750 --> 00:23:03,039

locals just don't pay much attention to

590

00:23:09,190 --> 00:23:05,760

flashing dancing lights over emerald

591

00:23:11,750 --> 00:23:09,200

isle north carolina that is a mystery

592

00:23:14,470 --> 00:23:11,760

for another time perhaps we can see by

593

00:23:17,190 --> 00:23:14,480

all the clocks all the time zones in the

594

00:23:19,590 --> 00:23:17,200

world we've gotta fly because

595

00:23:21,909 --> 00:23:19,600

that's a wrap thank you for listening to

596

00:23:25,110 --> 00:23:21,919

inception radio network follow this

597

00:23:26,950 --> 00:23:25,120

broadcast at [ufoheadlinenews.com](http://ufoheadlinenews.com)

598

00:23:29,430 --> 00:23:26,960

take care of each other we're all in
