

UFO Headline News Thursday July 20th, 2017

Listen on

inceptionradionetwork.com

1
00:00:01,350 --> 00:00:00,890
dancer

2
00:00:05,349 --> 00:00:01,360
[Music]

3
00:00:08,230 --> 00:00:05,359
hello it's thursday july 20th 2017. you

4
00:00:10,230 --> 00:00:08,240
are listening to inception radio network

5
00:00:12,870 --> 00:00:10,240
voice of the fringe majority

6
00:00:15,589 --> 00:00:12,880
this is carol carl with ufo headline

7
00:00:19,750 --> 00:00:17,269
for today's broadcast we're going to

8
00:00:21,990 --> 00:00:19,760
jump shark somewhat change our usual

9
00:00:23,910 --> 00:00:22,000
form our opening with what's in the sky

10
00:00:27,429 --> 00:00:23,920
tonight we're going to talk about what

11
00:00:30,710 --> 00:00:27,439
was up on the moon 48 years ago today

12
00:00:33,990 --> 00:00:30,720
july 20th 1969

13
00:00:37,030 --> 00:00:34,000

one giant leap for mankind we got this

14

00:00:38,790 --> 00:00:37,040

story from the official nasa government

15

00:00:42,869 --> 00:00:38,800

mission site

16

00:00:44,389 --> 00:00:42,879

let's go back in time july 1969 it's a

17

00:00:46,869 --> 00:00:44,399

little over eight years since the

18

00:00:49,270 --> 00:00:46,879

flights of gagarin and shepard followed

19

00:00:51,670 --> 00:00:49,280

quickly by president kennedy's challenge

20

00:00:53,510 --> 00:00:51,680

to put a man on the moon before the

21

00:00:55,270 --> 00:00:53,520

decade is out

22

00:00:58,310 --> 00:00:55,280

it is only seven months since nasa's

23

00:01:00,229 --> 00:00:58,320

made a bold decision to send apollo 8

24

00:01:02,709 --> 00:01:00,239

all the way to the moon on the first

25

00:01:04,789 --> 00:01:02,719

manned flight of the massive saturn v

26

00:01:07,270 --> 00:01:04,799

rocket the saturn v

27

00:01:10,230 --> 00:01:07,280

now on the morning of july 16th apollo

28

00:01:12,950 --> 00:01:10,240

11 astronauts neil armstrong buzz aldrin

29

00:01:16,469 --> 00:01:12,960

and michael collins sit atop another

30

00:01:19,230 --> 00:01:16,479

saturn v at launch complex 39a at the

31

00:01:23,109 --> 00:01:19,240

kennedy space center the three-stage

32

00:01:25,109 --> 00:01:23,119

363-foot rocket will use its 7.5 million

33

00:01:27,830 --> 00:01:25,119

pounds of thrust to propel them into

34

00:01:30,789 --> 00:01:27,840

space and into history

35

00:01:33,270 --> 00:01:30,799

at 9 32 a.m eastern daylight time the

36

00:01:36,710 --> 00:01:33,280

engines fire and apollo 11 clears the

37

00:01:38,710 --> 00:01:36,720

tower about 11 minutes later the crew is

38

00:01:40,390 --> 00:01:38,720

in earth orbit

39

00:01:43,350 --> 00:01:40,400
after one and a half of those earth

40

00:01:45,910 --> 00:01:43,360
orbits apollo 11 gets a go for what

41

00:01:48,550 --> 00:01:45,920
mission controllers call translunar

42

00:01:50,310 --> 00:01:48,560
injection in other words it's time to

43

00:01:52,789 --> 00:01:50,320
head for the moon

44

00:01:53,749 --> 00:01:52,799
three days later the crew is in lunar

45

00:01:56,149 --> 00:01:53,759
orbit

46

00:01:59,030 --> 00:01:56,159
a day after that armstrong and aldrin

47

00:02:01,350 --> 00:01:59,040
climb into the lunar module eagle and

48

00:02:03,749 --> 00:02:01,360
begin their descent while collins orbits

49

00:02:06,230 --> 00:02:03,759
in the command module columbia

50

00:02:08,869 --> 00:02:06,240
collins would later write that eagle is

51
00:02:11,670 --> 00:02:08,879
quote the weirdest looking contraption i

52
00:02:13,350 --> 00:02:11,680
have ever seen in the sky end quotes but

53
00:02:15,430 --> 00:02:13,360
it will prove its worth

54
00:02:18,070 --> 00:02:15,440
when it comes time to set eagle down in

55
00:02:20,790 --> 00:02:18,080
the sea of tranquility armstrong

56
00:02:23,750 --> 00:02:20,800
improvises manually piloting the ship

57
00:02:25,510 --> 00:02:23,760
past an area littered with boulders

58
00:02:28,390 --> 00:02:25,520
during the final seconds of descent

59
00:02:30,229 --> 00:02:28,400
eagle's computer is sounding alarms

60
00:02:32,630 --> 00:02:30,239
it turns out to be a simple case of the

61
00:02:34,949 --> 00:02:32,640
computer trying to do too many things at

62
00:02:37,670 --> 00:02:34,959
once but as aldrin will later point out

63
00:02:39,589 --> 00:02:37,680

quote unfortunately it came up when we

64

00:02:42,470 --> 00:02:39,599

did not want to be trying to solve these

65

00:02:45,670 --> 00:02:42,480

particular problems end quotes

66

00:02:48,710 --> 00:02:45,680

when the lunar module lands at 4 18 pm

67

00:02:51,589 --> 00:02:48,720

eastern daylight time only 30 seconds of

68

00:02:53,350 --> 00:02:51,599

fuel remain here's a snippet of the

69

00:02:56,309 --> 00:02:53,360

radio transmission

70

00:02:57,589 --> 00:02:56,319

tranquility base here the eagle has

71

00:02:59,910 --> 00:02:57,599

landed

72

00:03:01,990 --> 00:02:59,920

mission control erupts in celebration as

73

00:03:03,990 --> 00:03:02,000

the tension breaks and a controller

74

00:03:05,670 --> 00:03:04,000

tells the crew you got a bunch of guys

75

00:03:07,750 --> 00:03:05,680

about to turn blue

76

00:03:09,270 --> 00:03:07,760

we're breathing again

77

00:03:11,430 --> 00:03:09,280

armstrong will later confirm that

78

00:03:14,309 --> 00:03:11,440

landing was his biggest concern saying

79

00:03:16,229 --> 00:03:14,319

quote the unknowns were rampant end

80

00:03:18,470 --> 00:03:16,239

quotes and quote there were just a

81

00:03:22,470 --> 00:03:18,480

thousand things to worry about and

82

00:03:24,949 --> 00:03:22,480

quotes at 10 56 pm eastern daylight time

83

00:03:27,750 --> 00:03:24,959

armstrong is ready to plant the first

84

00:03:29,509 --> 00:03:27,760

human foot on another world

85

00:03:32,149 --> 00:03:29,519

with more than half a billion people

86

00:03:34,949 --> 00:03:32,159

watching on television he climbs down

87

00:03:37,910 --> 00:03:34,959

the ladder and proclaims quote that's

88

00:03:40,470 --> 00:03:37,920

one small step for man one giant leap

89

00:03:42,550 --> 00:03:40,480

for mankind end quote

90

00:03:44,630 --> 00:03:42,560

aldrin joins him shortly and offers a

91

00:03:46,470 --> 00:03:44,640

simple but powerful description of the

92

00:03:49,990 --> 00:03:46,480

lunar surface

93

00:03:51,910 --> 00:03:50,000

magnificent desolation end quotes

94

00:03:54,390 --> 00:03:51,920

they explore the surface for two and a

95

00:03:55,750 --> 00:03:54,400

half hours collecting samples and taking

96

00:03:58,229 --> 00:03:55,760

photographs

97

00:04:00,869 --> 00:03:58,239

they leave behind an american flag a

98

00:04:04,470 --> 00:04:00,879

patch honoring the fallen apollo 11 1

99

00:04:06,070 --> 00:04:04,480

crew and a plaque on one of eagle's legs

100

00:04:08,869 --> 00:04:06,080

that plaque reads

101
00:04:13,190 --> 00:04:08,879
here men from the planet earth first set

102
00:04:16,469 --> 00:04:13,200
foot upon the moon july 1969 a.d

103
00:04:18,949 --> 00:04:16,479
we came in peace for all mankind

104
00:04:20,789 --> 00:04:18,959
armstrong and alden blast off and docked

105
00:04:22,390 --> 00:04:20,799
with collins in colombia

106
00:04:24,710 --> 00:04:22,400
collins later says that quote for the

107
00:04:27,590 --> 00:04:24,720
first time i felt that we were really

108
00:04:29,670 --> 00:04:27,600
going to carry this thing off and quotes

109
00:04:33,030 --> 00:04:29,680
the crew splashes down off hawaii on

110
00:04:33,909 --> 00:04:33,040
july 24th kennedy's challenge had been

111
00:04:35,670 --> 00:04:33,919
met

112
00:04:37,830 --> 00:04:35,680
men from earth have walked on the moon

113
00:04:39,990 --> 00:04:37,840

and returned safely home

114

00:04:42,469 --> 00:04:40,000

in an interview years later armstrong

115

00:04:45,110 --> 00:04:42,479

praises the quote hundreds of thousands

116

00:04:47,030 --> 00:04:45,120

and quotes of people behind the project

117

00:04:49,350 --> 00:04:47,040

he said quote every guy that's setting

118

00:04:52,150 --> 00:04:49,360

up the tests cranking the torque wrench

119

00:04:53,990 --> 00:04:52,160

and so on as saying man or woman quote

120

00:04:56,390 --> 00:04:54,000

if anything goes wrong here it's not

121

00:04:58,150 --> 00:04:56,400

going to be my fault end quotes

122

00:04:59,749 --> 00:04:58,160

in a post-flight press conference

123

00:05:02,550 --> 00:04:59,759

armstrong calls the flight quote a

124

00:05:04,550 --> 00:05:02,560

beginning of a new age and quotes while

125

00:05:05,670 --> 00:05:04,560

collins talks about future journeys to

126
00:05:07,749 --> 00:05:05,680
mars

127
00:05:09,110 --> 00:05:07,759
over the next three and a half years ten

128
00:05:11,590 --> 00:05:09,120
astronauts will follow in their

129
00:05:13,909 --> 00:05:11,600
footsteps gene cernan commander of the

130
00:05:16,469 --> 00:05:13,919
last apollo mission leaves the lunar

131
00:05:19,430 --> 00:05:16,479
surface with these words quote

132
00:05:22,310 --> 00:05:19,440
we leave as we came and god willing as

133
00:05:24,950 --> 00:05:22,320
we shall return with peace and hope for

134
00:05:27,189 --> 00:05:24,960
all mankind end quotes

135
00:05:30,070 --> 00:05:27,199
yes we live on a planet where there is

136
00:05:32,310 --> 00:05:30,080
talk conspiracy talk but lots of people

137
00:05:35,110 --> 00:05:32,320
say it that we never did this we never

138
00:05:37,749 --> 00:05:35,120

went to the moon or conversely there are

139

00:05:40,150 --> 00:05:37,759

those who say oh yes we did that but way

140

00:05:42,390 --> 00:05:40,160

before the general public realized it

141

00:05:44,310 --> 00:05:42,400

years before it was publicized and that

142

00:05:47,110 --> 00:05:44,320

we're still there

143

00:05:49,430 --> 00:05:47,120

well going back still there you decide

144

00:05:52,390 --> 00:05:49,440

gentle listeners we're just sticking to

145

00:05:55,749 --> 00:05:52,400

the nasa story for today now let's see

146

00:05:57,749 --> 00:05:55,759

what's in our skies for tonight oh first

147

00:06:00,629 --> 00:05:57,759

a quick correction this broadcaster made

148

00:06:02,550 --> 00:06:00,639

a major gaffe yesterday we ended the

149

00:06:04,150 --> 00:06:02,560

earth sky segment of our broadcast by

150

00:06:08,150 --> 00:06:04,160

saying that we should all get ready to

151
00:06:10,710 --> 00:06:08,160
watch the pleiades meteor shower oh no

152
00:06:12,390 --> 00:06:10,720
it's another p word it's the perseid

153
00:06:14,870 --> 00:06:12,400
meteor shower and there's a bit of

154
00:06:17,029 --> 00:06:14,880
controversy over when one can begin to

155
00:06:19,350 --> 00:06:17,039
watch that there are those who say yup

156
00:06:21,590 --> 00:06:19,360
it started already and while others say

157
00:06:23,350 --> 00:06:21,600
that it's the beginning of august that

158
00:06:25,070 --> 00:06:23,360
it really gets going

159
00:06:27,270 --> 00:06:25,080
so here's a story from

160
00:06:30,469 --> 00:06:27,280
popularmechanics.com their space bureau

161
00:06:33,590 --> 00:06:30,479
with a byline for jay bennett headline

162
00:06:35,830 --> 00:06:33,600
the perseid meteor shower starts now

163
00:06:37,830 --> 00:06:35,840

sub-headline the perseids are one of the

164

00:06:39,510 --> 00:06:37,840

brightest and most prolific meteor

165

00:06:41,670 --> 00:06:39,520

showers of the year

166

00:06:43,830 --> 00:06:41,680

the perseid meteor shower one of the

167

00:06:47,270 --> 00:06:43,840

brightest and most active meteor showers

168

00:06:49,110 --> 00:06:47,280

of the year began yesterday july 17th

169

00:06:51,510 --> 00:06:49,120

that means the earth has moved into a

170

00:06:54,469 --> 00:06:51,520

trail of debris left in the wake of the

171

00:06:56,150 --> 00:06:54,479

comet swift tuttle for more than a month

172

00:06:58,550 --> 00:06:56,160

you will be able to catch sight of

173

00:07:01,270 --> 00:06:58,560

meteors in the night sky as chunks of

174

00:07:03,749 --> 00:07:01,280

rock and ice in that debris trail enter

175

00:07:05,909 --> 00:07:03,759

the earth's atmosphere and burn up

176
00:07:09,110 --> 00:07:05,919
during the peak the perseids can produce

177
00:07:11,110 --> 00:07:09,120
more than 60 visible meteors per hour

178
00:07:13,670 --> 00:07:11,120
this year however there will be that

179
00:07:15,990 --> 00:07:13,680
bright waning gibbous moon rising in the

180
00:07:18,629 --> 00:07:16,000
sky a few hours after nightfall on the

181
00:07:20,390 --> 00:07:18,639
very peak nights of the perseids the

182
00:07:22,710 --> 00:07:20,400
moon's lights will block out some of the

183
00:07:24,950 --> 00:07:22,720
dimmer meteors but the perseids are

184
00:07:26,710 --> 00:07:24,960
known for being particularly bright so

185
00:07:29,110 --> 00:07:26,720
you should still be able to spot some

186
00:07:31,990 --> 00:07:29,120
streaking across the night sky

187
00:07:33,749 --> 00:07:32,000
by august 21st it will be a new moon so

188
00:07:35,749 --> 00:07:33,759

the night skies will be particularly

189

00:07:38,070 --> 00:07:35,759

dark and it might be the best time to

190

00:07:40,870 --> 00:07:38,080

get outside catch the end of the meteor

191

00:07:42,790 --> 00:07:40,880

shower by this time earth will be moving

192

00:07:45,189 --> 00:07:42,800

out of the trail of debris that breaks

193

00:07:46,950 --> 00:07:45,199

off behind swift tuttle at that point

194

00:07:48,390 --> 00:07:46,960

meteors will not be as common as during

195

00:07:51,029 --> 00:07:48,400

the peak nights

196

00:07:53,029 --> 00:07:51,039

however the sky will be much darker and

197

00:07:54,710 --> 00:07:53,039

even though meteors won't be as frequent

198

00:07:56,790 --> 00:07:54,720

you could catch some particularly

199

00:08:00,469 --> 00:07:56,800

spectacular ones in the dark hours

200

00:08:03,189 --> 00:08:00,479

before dawn august 21st or 22nd august

201

00:08:04,950 --> 00:08:03,199

24th is officially the end of the

202

00:08:07,189 --> 00:08:04,960

perseid meteor shower

203

00:08:09,430 --> 00:08:07,199

if you want to catch this celestial show

204

00:08:11,830 --> 00:08:09,440

make sure that you can get as far away

205

00:08:14,309 --> 00:08:11,840

from towns and other light pollution as

206

00:08:17,110 --> 00:08:14,319

possible and be patient

207

00:08:19,990 --> 00:08:17,120

your eyes take a full 15 to 30 minutes

208

00:08:22,390 --> 00:08:20,000

to adjust but after they do you will be

209

00:08:24,869 --> 00:08:22,400

able to see much more in the night sky

210

00:08:27,189 --> 00:08:24,879

there can also be extended lulls between

211

00:08:29,909 --> 00:08:27,199

meteors but if you stay patient and

212

00:08:31,510 --> 00:08:29,919

vigilant you will be rewarded the

213

00:08:33,670 --> 00:08:31,520

meteors will come from the direction of

214

00:08:35,829 --> 00:08:33,680

the constellation perseus for which the

215

00:08:38,469 --> 00:08:35,839

annual shower is named but they should

216

00:08:41,990 --> 00:08:38,479

be visible across all of the night sky

217

00:08:44,230 --> 00:08:42,000

and so from now till august 24th if you

218

00:08:46,630 --> 00:08:44,240

find yourself up and about late at night

219

00:08:48,230 --> 00:08:46,640

or early in the morning don't forget to

220

00:08:51,910 --> 00:08:48,240

look up

221

00:08:53,829 --> 00:08:51,920

good advice meteor shower or no

222

00:08:57,430 --> 00:08:53,839

while visiting space check out these

223

00:08:59,750 --> 00:08:57,440

stellar winds on trappist-1 planets

224

00:09:02,389 --> 00:08:59,760

or maybe that's not a good idea here's

225

00:09:05,829 --> 00:09:02,399

the headline stellar winds could be bad

226

00:09:08,870 --> 00:09:05,839

news for life on trappist-1 planets

227

00:09:11,509 --> 00:09:08,880

mike wahl writes this for space.com

228

00:09:13,750 --> 00:09:11,519

two new studies suggest this system's

229

00:09:16,790 --> 00:09:13,760

potentially habitable planets could have

230

00:09:18,630 --> 00:09:16,800

lost their atmospheres long ago

231

00:09:21,269 --> 00:09:18,640

the potentially earth-like planets in

232

00:09:23,670 --> 00:09:21,279

that trappist-1 system may not be so

233

00:09:26,150 --> 00:09:23,680

conducive to life after all this is

234

00:09:28,630 --> 00:09:26,160

reported in two new studies

235

00:09:30,949 --> 00:09:28,640

intense radiation and particles

236

00:09:33,990 --> 00:09:30,959

streaming from their host star have

237

00:09:35,829 --> 00:09:34,000

likely taken a huge toll on all seven of

238

00:09:37,829 --> 00:09:35,839

these worlds even the three that

239

00:09:40,550 --> 00:09:37,839

apparently lie within that goldilocks

240

00:09:42,790 --> 00:09:40,560

zone the habitable zone where liquid

241

00:09:44,389 --> 00:09:42,800

water could theoretically exist on a

242

00:09:46,710 --> 00:09:44,399

planet's surface

243

00:09:49,509 --> 00:09:46,720

quote because of the onslaught by the

244

00:09:51,670 --> 00:09:49,519

star's radiation our results suggest the

245

00:09:54,870 --> 00:09:51,680

atmosphere on planets in the trappist-1

246

00:09:57,190 --> 00:09:54,880

system would largely be destroyed end

247

00:09:59,750 --> 00:09:57,200

quotes that's from avi loeb he's a

248

00:10:01,990 --> 00:09:59,760

co-author of one of these studies

249

00:10:05,030 --> 00:10:02,000

he continued quote this would hurt the

250

00:10:06,230 --> 00:10:05,040

chances of life forming or persisting

251
00:10:07,829 --> 00:10:06,240
end quotes

252
00:10:09,990 --> 00:10:07,839
loeb chairs harvard's astronomy

253
00:10:12,630 --> 00:10:10,000
department and also works at the harvard

254
00:10:15,350 --> 00:10:12,640
smithsonian center for astrophysics

255
00:10:17,750 --> 00:10:15,360
in may of 2016 astronomers announced the

256
00:10:19,990 --> 00:10:17,760
discovery of three roughly earth-sized

257
00:10:22,790 --> 00:10:20,000
planets circling the red dwarf star

258
00:10:25,350 --> 00:10:22,800
trappist-1 which is just 8 percent as

259
00:10:27,190 --> 00:10:25,360
massive as the sun and lies about 39

260
00:10:28,790 --> 00:10:27,200
light-years from earth

261
00:10:31,670 --> 00:10:28,800
further observation revealed that the

262
00:10:34,949 --> 00:10:31,680
star hosts seven rocky planets three of

263
00:10:37,910 --> 00:10:34,959

which seemed to be in a habitable zone

264

00:10:40,310 --> 00:10:37,920

otherwise known as h z but just being in

265

00:10:42,630 --> 00:10:40,320

that h z doesn't necessarily make a

266

00:10:45,030 --> 00:10:42,640

planet habitable there are many more

267

00:10:47,590 --> 00:10:45,040

factors involved stressed loeb and the

268

00:10:48,870 --> 00:10:47,600

study's lead author manozvi lingam also

269

00:10:50,630 --> 00:10:48,880

of harvard

270

00:10:53,590 --> 00:10:50,640

one of these factors is something called

271

00:10:56,389 --> 00:10:53,600

stellar radiation trappist-1 is quite

272

00:10:57,190 --> 00:10:56,399

dim so its habitable zone is very close

273

00:10:59,350 --> 00:10:57,200

in

274

00:11:02,389 --> 00:10:59,360

even the most far-flung trappist-1

275

00:11:05,269 --> 00:11:02,399

worlds orbit a mere 5.6 million miles 9

276

00:11:07,829 --> 00:11:05,279

million kilometers or so from the star

277

00:11:10,630 --> 00:11:07,839

as comparison the innermost planet in

278

00:11:13,430 --> 00:11:10,640

earth's solar system mercury lies 36

279

00:11:15,670 --> 00:11:13,440

million miles or 58 million kilometers

280

00:11:17,750 --> 00:11:15,680

from the sun on average

281

00:11:20,790 --> 00:11:17,760

because of this proximity the trappist-1

282

00:11:23,430 --> 00:11:20,800

planets are likely barraged by radiation

283

00:11:25,829 --> 00:11:23,440

said lingam and loeb their modeling work

284

00:11:28,230 --> 00:11:25,839

suggests that these worlds receive far

285

00:11:29,030 --> 00:11:28,240

higher ultraviolet fluxes than earth

286

00:11:31,269 --> 00:11:29,040

does

287

00:11:35,030 --> 00:11:31,279

so much in fact that the exoplanet's

288

00:11:37,350 --> 00:11:35,040

atmospheres may have been stripped away

289

00:11:39,030 --> 00:11:37,360

the same reasoning holds for a proxima b

290

00:11:41,910 --> 00:11:39,040

that potentially earth-like world that

291

00:11:45,030 --> 00:11:41,920

orbits a red dwarf just 4.3 light years

292

00:11:47,829 --> 00:11:45,040

from earth quote earth-sized planets in

293

00:11:50,470 --> 00:11:47,839

the hz around m dwarfs that's another

294

00:11:53,269 --> 00:11:50,480

name for red dwarfs are presumably much

295

00:11:55,590 --> 00:11:53,279

less likely to be habitable conceivably

296

00:11:57,509 --> 00:11:55,600

by several orders of magnitude when

297

00:12:00,150 --> 00:11:57,519

compared with the earth's sun system end

298

00:12:01,750 --> 00:12:00,160

quotes that's also from lingman loeb

299

00:12:03,590 --> 00:12:01,760

it's in their study which was published

300

00:12:06,069 --> 00:12:03,600

this month in the international journal

301
00:12:07,750 --> 00:12:06,079
of astrobiology the second study

302
00:12:11,030 --> 00:12:07,760
published by the harvard smithsonian

303
00:12:13,430 --> 00:12:11,040
center for astrophysics or cfa and the

304
00:12:15,509 --> 00:12:13,440
university of massachusetts at lowell

305
00:12:17,430 --> 00:12:15,519
reached similar conclusions

306
00:12:19,829 --> 00:12:17,440
modeling work by this team suggested

307
00:12:22,310 --> 00:12:19,839
that the stellar wind that stream of

308
00:12:24,310 --> 00:12:22,320
particles flowing constantly from a star

309
00:12:26,310 --> 00:12:24,320
exerts pressures on the trappist-1

310
00:12:28,949 --> 00:12:26,320
worlds that are one thousand to one

311
00:12:31,190 --> 00:12:28,959
hundred thousand times greater than the

312
00:12:33,670 --> 00:12:31,200
solar wind exerts on earth

313
00:12:36,230 --> 00:12:33,680

but it gets worse because the trappist-1

314

00:12:38,790 --> 00:12:36,240

system is so tightly packed the star's

315

00:12:41,190 --> 00:12:38,800

magnetic field has likely connected with

316

00:12:43,910 --> 00:12:41,200

those of the planets allowing stellar

317

00:12:46,069 --> 00:12:43,920

wind particles to flow directly onto

318

00:12:47,990 --> 00:12:46,079

these world's atmospheres

319

00:12:50,470 --> 00:12:48,000

this has probably caused atmospheric

320

00:12:53,350 --> 00:12:50,480

degradation and the worlds may even have

321

00:12:55,750 --> 00:12:53,360

lost their air entirely

322

00:12:57,829 --> 00:12:55,760

here's a quote from cecilia garafo who

323

00:13:00,069 --> 00:12:57,839

is a part of that same study quote the

324

00:13:02,389 --> 00:13:00,079

earth's magnetic field acts like a

325

00:13:04,230 --> 00:13:02,399

shield against the potentially damaging

326

00:13:06,389 --> 00:13:04,240

effects of the solar wind

327

00:13:08,629 --> 00:13:06,399

if earth were much closer to the sun and

328

00:13:11,350 --> 00:13:08,639

subjected to the onslaught of particles

329

00:13:13,509 --> 00:13:11,360

like the trappist-1 star delivers our

330

00:13:15,430 --> 00:13:13,519

planetary shield would fail pretty

331

00:13:17,509 --> 00:13:15,440

quickly end quotes

332

00:13:19,430 --> 00:13:17,519

the goropho-led study has been published

333

00:13:21,829 --> 00:13:19,440

also in the astrophysical journal

334

00:13:24,870 --> 00:13:21,839

letters and you can read it now if you'd

335

00:13:28,230 --> 00:13:24,880

like at that unpronounceable website ar

336

00:13:31,910 --> 00:13:30,150

while these results aren't great news

337

00:13:34,310 --> 00:13:31,920

for people hoping that life exists in

338

00:13:36,870 --> 00:13:34,320

the trappist-1 system they don't rule

339

00:13:37,750 --> 00:13:36,880

out the possibility researchers insist

340

00:13:42,790 --> 00:13:37,760

this

341

00:13:44,710 --> 00:13:42,800

jeremy drake quote but our work and the

342

00:13:46,870 --> 00:13:44,720

work of our colleagues show that we

343

00:13:49,750 --> 00:13:46,880

should also target as many stars as

344

00:13:50,870 --> 00:13:49,760

possible that are more like our sun end

345

00:13:52,870 --> 00:13:50,880

quotes

346

00:13:54,470 --> 00:13:52,880

down in earth's atmosphere and

347

00:13:56,550 --> 00:13:54,480

specifically over the community of

348

00:13:58,790 --> 00:13:56,560

cornwall in the united kingdom

349

00:14:02,150 --> 00:13:58,800

something's up in the skies here's the

350

00:14:04,949 --> 00:14:02,160

headline sightings of suspected ufo

351

00:14:07,590 --> 00:14:04,959

caught on film across cornwall

352

00:14:08,870 --> 00:14:07,600

this is from the cornwall live.com

353

00:14:11,110 --> 00:14:08,880

publication

354

00:14:12,710 --> 00:14:11,120

people have been taking to social media

355

00:14:15,670 --> 00:14:12,720

with startling footage of what looks

356

00:14:17,350 --> 00:14:15,680

suspiciously like a ufo over various

357

00:14:19,670 --> 00:14:17,360

spots in cornwall

358

00:14:22,230 --> 00:14:19,680

over the last couple of days the strange

359

00:14:25,590 --> 00:14:22,240

shimmering black object has been spotted

360

00:14:28,069 --> 00:14:25,600

over truro city center carluden clay tip

361

00:14:30,790 --> 00:14:28,079

fistral beach in new kay above roche

362

00:14:32,629 --> 00:14:30,800

point and also by a server above the sea

363

00:14:34,790 --> 00:14:32,639

off the cornish coast

364

00:14:36,790 --> 00:14:34,800

the first to spot it was actually surfer

365

00:14:39,269 --> 00:14:36,800

kiefer krishnan he caught it on his

366

00:14:41,750 --> 00:14:39,279

gopro camera and posted it on his

367

00:14:44,069 --> 00:14:41,760

instagram account but of course a

368

00:14:45,910 --> 00:14:44,079

photographer named shane house spotted

369

00:14:48,949 --> 00:14:45,920

the weird object which appears to

370

00:14:52,629 --> 00:14:48,959

disappear and then re-materialize over

371

00:14:54,870 --> 00:14:52,639

the a-30 also on monday he filmed it and

372

00:14:56,629 --> 00:14:54,880

then declared on twitter quote what the

373

00:15:00,230 --> 00:14:56,639

question mark is this an alien

374

00:15:02,470 --> 00:15:00,240

spacecraft over the a30 end quotes and

375

00:15:05,110 --> 00:15:02,480

then you're listening to love advice

376

00:15:07,350 --> 00:15:05,120

with leanne caller you're on the air uh

377

00:15:08,389 --> 00:15:07,360

hi leanne long time listener first time

378

00:15:10,310 --> 00:15:08,399

caller

379

00:15:12,550 --> 00:15:10,320

why in your professional opinion do you

380

00:15:13,590 --> 00:15:12,560

never take my calls off the air is this

381

00:15:18,230 --> 00:15:13,600

carl

382

00:15:19,590 --> 00:15:18,240

everything was great i thought uh well

383

00:15:21,430 --> 00:15:19,600

you know

384

00:15:23,509 --> 00:15:21,440

when you switched to geico you could

385

00:15:26,150 --> 00:15:23,519

save a lot of money on car insurance

386

00:15:28,629 --> 00:15:26,160

okay awesome you should call them i will

387

00:15:31,030 --> 00:15:28,639

geico because saving 15 or more on car

388

00:15:33,030 --> 00:15:31,040

insurance is always the great answer on

389

00:15:35,269 --> 00:15:33,040

the following thursday this week there

390

00:15:37,750 --> 00:15:35,279

were three more sightings the first was

391

00:15:39,990 --> 00:15:37,760

by a woman named trudy who lives in kent

392

00:15:43,269 --> 00:15:40,000

she posted footage over roche rock near

393

00:15:46,230 --> 00:15:43,279

saint austal on her instagram she wrote

394

00:15:48,470 --> 00:15:46,240

what on earth is this in the sky it

395

00:15:50,230 --> 00:15:48,480

looks like some kind of craft to me has

396

00:15:52,310 --> 00:15:50,240

anyone else seen this

397

00:15:54,949 --> 00:15:52,320

the final sighting so far was by someone

398

00:15:56,949 --> 00:15:54,959

named steph who caught the odd object on

399

00:15:58,949 --> 00:15:56,959

her phone above churro while on the way

400

00:16:00,550 --> 00:15:58,959

to a hair appointment

401
00:16:02,470 --> 00:16:00,560
cornwall live has approached various

402
00:16:05,110 --> 00:16:02,480
agencies about these sightings but no

403
00:16:07,269 --> 00:16:05,120
one has any answers we then realized

404
00:16:09,350 --> 00:16:07,279
that something called the eden project

405
00:16:12,150 --> 00:16:09,360
launches its new journey into space

406
00:16:14,230 --> 00:16:12,160
attraction on thursday hmm sounds like a

407
00:16:16,310 --> 00:16:14,240
theme park and we wondered if these

408
00:16:17,110 --> 00:16:16,320
supposed ufos had anything to do with

409
00:16:19,030 --> 00:16:17,120
that

410
00:16:21,430 --> 00:16:19,040
so they contacted a spokesman for eden

411
00:16:23,269 --> 00:16:21,440
who replied quote it's true we have a

412
00:16:25,910 --> 00:16:23,279
galaxy of ways to tell the story of

413
00:16:28,629 --> 00:16:25,920

space at eden this summer to coin a

414

00:16:29,590 --> 00:16:28,639

phrase quote the truth is out there end

415

00:16:31,269 --> 00:16:29,600

quotes

416

00:16:33,350 --> 00:16:31,279

well this article concludes by saying

417

00:16:36,389 --> 00:16:33,360

stranger and stranger someone call

418

00:16:38,870 --> 00:16:36,399

mulder and scully in on this case

419

00:16:41,749 --> 00:16:38,880

in this case this particular broadcaster

420

00:16:43,990 --> 00:16:41,759

has a wonky memory several years ago we

421

00:16:46,790 --> 00:16:44,000

came upon a series of photographs taken

422

00:16:48,310 --> 00:16:46,800

over field settings pastoral settings in

423

00:16:51,430 --> 00:16:48,320

the united kingdom

424

00:16:53,910 --> 00:16:51,440

these shots featured flocks of birds

425

00:16:55,910 --> 00:16:53,920

twisting and turning dozens and dozens

426

00:16:57,749 --> 00:16:55,920

perhaps hundreds of them

427

00:17:00,949 --> 00:16:57,759

what it looked like was nothing other

428

00:17:02,870 --> 00:17:00,959

than a mysterious object in the sky

429

00:17:05,429 --> 00:17:02,880

we bookmarked those shots and of course

430

00:17:07,350 --> 00:17:05,439

could not find the link but check it out

431

00:17:09,829 --> 00:17:07,360

and we suggest perhaps it's time for

432

00:17:12,470 --> 00:17:09,839

them to call in an ornithologist rather

433

00:17:13,750 --> 00:17:12,480

than a ufologist just saying

434

00:17:15,590 --> 00:17:13,760

head on over later to

435

00:17:17,990 --> 00:17:15,600

ufoheadlinenews.com

436

00:17:19,990 --> 00:17:18,000

you'll find links to the story and while

437

00:17:22,309 --> 00:17:20,000

you're at it sleuth around on ye old

438

00:17:25,029 --> 00:17:22,319

internet see if you can find shots of

439

00:17:27,110 --> 00:17:25,039

huge flocks of birds

440

00:17:29,830 --> 00:17:27,120

let's head across the pond and to the

441

00:17:32,789 --> 00:17:29,840

united states the state of new jersey an

442

00:17:35,350 --> 00:17:32,799

undisclosed city its mufon case number

443

00:17:38,789 --> 00:17:35,360

85169

444

00:17:41,110 --> 00:17:38,799

the date of this sighting is 7 16 2017.

445

00:17:44,789 --> 00:17:41,120

it got a next day report

446

00:17:47,590 --> 00:17:44,799

in summary a chrome object lots of pipe

447

00:17:49,909 --> 00:17:47,600

like tube appendages

448

00:17:52,950 --> 00:17:49,919

well again this is one of those shots

449

00:17:55,750 --> 00:17:52,960

that sort of has a creepy overlay to it

450

00:17:58,150 --> 00:17:55,760

it is unique if it's a hoax well we'll

451
00:18:00,310 --> 00:17:58,160
just have to stay tuned for that there

452
00:18:02,230 --> 00:18:00,320
are photos accompanying this article you

453
00:18:04,470 --> 00:18:02,240
might want to check those out

454
00:18:06,390 --> 00:18:04,480
under citing specifics the witness lists

455
00:18:09,750 --> 00:18:06,400
a viewing distance unknown

456
00:18:13,750 --> 00:18:09,760
an altitude likewise unknown this object

457
00:18:15,909 --> 00:18:13,760
features windows appendages and other

458
00:18:17,590 --> 00:18:15,919
its flight path was stationary and

459
00:18:19,669 --> 00:18:17,600
according to the reporting witness the

460
00:18:21,350 --> 00:18:19,679
object shape does not apply

461
00:18:22,870 --> 00:18:21,360
and when you see the shots you'll

462
00:18:24,470 --> 00:18:22,880
understand that part they are

463
00:18:26,549 --> 00:18:24,480

indescribable

464

00:18:29,430 --> 00:18:26,559

the weather details in this undisclosed

465

00:18:31,669 --> 00:18:29,440

location in new jersey at the time or a

466

00:18:34,549 --> 00:18:31,679

maximum temperature of 66 degrees

467

00:18:37,909 --> 00:18:34,559

fahrenheit 19 degrees celsius down to a

468

00:18:40,870 --> 00:18:37,919

minimum of 63 degrees fahrenheit 17

469

00:18:43,750 --> 00:18:40,880

degrees celsius the maximum visibility

470

00:18:46,310 --> 00:18:43,760

mean and minimum visibility all the same

471

00:18:47,990 --> 00:18:46,320

two miles three kilometers and at the

472

00:18:51,110 --> 00:18:48,000

time of this sighting there was nothing

473

00:18:52,310 --> 00:18:51,120

abnormal weather-wise here's the short

474

00:18:54,630 --> 00:18:52,320

report

475

00:18:57,029 --> 00:18:54,640

my brother and i were outside when we

476
00:18:58,230 --> 00:18:57,039
noticed what we thought to be a star in

477
00:19:00,470 --> 00:18:58,240
the sky

478
00:19:02,390 --> 00:19:00,480
it was a shiny speck

479
00:19:05,830 --> 00:19:02,400
so we both ran inside and grabbed my

480
00:19:07,590 --> 00:19:05,840
camera which has a 250 x zoom lens with

481
00:19:09,669 --> 00:19:07,600
18 megapixels

482
00:19:12,150 --> 00:19:09,679
we took four photos and then we went

483
00:19:13,350 --> 00:19:12,160
back inside to look at these shots

484
00:19:15,830 --> 00:19:13,360
in awe

485
00:19:19,830 --> 00:19:15,840
we realized these were shaped oddly they

486
00:19:22,070 --> 00:19:19,840
had pipes this wasn't a star at all

487
00:19:24,630 --> 00:19:22,080
thinking this was a ufo we then went

488
00:19:28,230 --> 00:19:24,640

back outside to take more pictures and

489

00:19:31,430 --> 00:19:28,240

it was already gone it's that ufo magic

490

00:19:33,830 --> 00:19:31,440

the now you see it now you don't

491

00:19:36,630 --> 00:19:33,840

how about a trip to the big apple oh

492

00:19:38,870 --> 00:19:36,640

let's do that new york new york case

493

00:19:41,350 --> 00:19:38,880

number 85317

494

00:19:44,310 --> 00:19:41,360

mufon wise the date of this sighting was

495

00:19:47,029 --> 00:19:44,320

the 16th of july it was reported on july

496

00:19:48,310 --> 00:19:47,039

19th both 2017

497

00:19:52,630 --> 00:19:48,320

the summary

498

00:19:55,669 --> 00:19:52,640

cylinder-shaped ufo rotating on axis

499

00:19:58,150 --> 00:19:55,679

had at least four lights windows

500

00:20:02,150 --> 00:19:58,160

rotated like a drill followed by three

501
00:20:04,230 --> 00:20:02,160
to four saucer sphere type ufos

502
00:20:06,390 --> 00:20:04,240
there are shots and there's a video that

503
00:20:07,990 --> 00:20:06,400
accompanies this check it out

504
00:20:12,150 --> 00:20:08,000
the sighting specifics are a viewing

505
00:20:15,590 --> 00:20:12,160
distance 101 to 500 feet and then later

506
00:20:18,390 --> 00:20:15,600
500 feet and eventually one mile

507
00:20:19,669 --> 00:20:18,400
the altitude was over 500 feet without

508
00:20:22,070 --> 00:20:19,679
cloud cover

509
00:20:24,789 --> 00:20:22,080
this sighting duration was five minutes

510
00:20:26,230 --> 00:20:24,799
and the object features are described as

511
00:20:28,230 --> 00:20:26,240
windows

512
00:20:30,630 --> 00:20:28,240
its flight path was a path that included

513
00:20:33,590 --> 00:20:30,640

directional change and this object is

514

00:20:35,990 --> 00:20:33,600

said to have been shaped like a cylinder

515

00:20:38,710 --> 00:20:36,000

weather-wise the maximum temperature

516

00:20:41,750 --> 00:20:38,720

over new york new york was 87 degrees

517

00:20:44,870 --> 00:20:41,760

fahrenheit 31 degrees celsius down to a

518

00:20:46,390 --> 00:20:44,880

minimum of 68 degrees fahrenheit 20

519

00:20:49,430 --> 00:20:46,400

degrees celsius

520

00:20:52,710 --> 00:20:49,440

standard visibility factors maximum mean

521

00:20:53,990 --> 00:20:52,720

and minimum all the same 10 miles 16

522

00:20:55,750 --> 00:20:54,000

kilometers

523

00:20:58,789 --> 00:20:55,760

and at the time of this event there was

524

00:21:01,029 --> 00:20:58,799

nothing abnormal in the meteorology

525

00:21:03,029 --> 00:21:01,039

here's what happened

526

00:21:05,190 --> 00:21:03,039

i was at my local gym in new york city

527

00:21:07,830 --> 00:21:05,200

doing pilates on my mat

528

00:21:10,950 --> 00:21:07,840

i was staring out the huge windows when

529

00:21:12,070 --> 00:21:10,960

a large cylinder-shaped ufo appeared in

530

00:21:14,470 --> 00:21:12,080

the sky

531

00:21:17,590 --> 00:21:14,480

it was moving towards the east it was

532

00:21:20,070 --> 00:21:17,600

overhead and rotating like a drill

533

00:21:22,230 --> 00:21:20,080

with four lights on one side

534

00:21:24,870 --> 00:21:22,240

these would show only on that side after

535

00:21:27,350 --> 00:21:24,880

it made a full rotation soon after this

536

00:21:31,110 --> 00:21:27,360

object appeared three or four small

537

00:21:34,470 --> 00:21:31,120

saucer or sphere type ufos were blipping

538

00:21:36,950 --> 00:21:34,480

in and out around it and following it

539

00:21:39,190 --> 00:21:36,960

this thing was clear as day

540

00:21:41,350 --> 00:21:39,200

what i saw looked exactly like the ufo

541

00:21:42,549 --> 00:21:41,360

that was filmed in the united kingdom by

542

00:21:45,270 --> 00:21:42,559

officers

543

00:21:47,830 --> 00:21:45,280

this thing rotated just like that object

544

00:21:49,750 --> 00:21:47,840

on and off an axis the same light

545

00:21:51,590 --> 00:21:49,760

pattern as it rotated

546

00:21:52,630 --> 00:21:51,600

this thing had to be hundreds of feet

547

00:21:54,870 --> 00:21:52,640

long

548

00:21:57,430 --> 00:21:54,880

it definitely was in the sky i viewed it

549

00:21:59,029 --> 00:21:57,440

for over five minutes and then after it

550

00:22:00,149 --> 00:21:59,039

passed overhead i couldn't see it

551
00:22:03,110 --> 00:22:00,159
anymore

552
00:22:05,750 --> 00:22:03,120
i do have videos and photos but man

553
00:22:08,070 --> 00:22:05,760
iphone doesn't explain the vividness of

554
00:22:09,830 --> 00:22:08,080
what my eyes saw

555
00:22:11,190 --> 00:22:09,840
rather breathtaking the concept that

556
00:22:14,950 --> 00:22:11,200
something like this would be in the

557
00:22:17,590 --> 00:22:14,960
skies over such a population dense area

558
00:22:20,630 --> 00:22:17,600
and only one report so far we'll keep

559
00:22:23,350 --> 00:22:20,640
our eyes on the big apple skies

560
00:22:27,190 --> 00:22:23,360
with a slight adjustment in trajectory

561
00:22:31,590 --> 00:22:27,200
we head west now to the city of okoboji

562
00:22:35,110 --> 00:22:31,600
iowa they spell that o-k-o-b-o-j-i

563
00:22:38,149 --> 00:22:35,120

it's move on case number 8517 this event

564

00:22:40,390 --> 00:22:38,159

took place on the 2nd of june 2017 but

565

00:22:42,549 --> 00:22:40,400

nobody got around to reporting it till

566

00:22:46,149 --> 00:22:42,559

the 18th of july

567

00:22:49,190 --> 00:22:46,159

in summary saw an orange orb or ball

568

00:22:50,710 --> 00:22:49,200

moved southwest to northeast made no

569

00:22:52,549 --> 00:22:50,720

noise

570

00:22:55,750 --> 00:22:52,559

citing specifics offer us a viewing

571

00:22:59,270 --> 00:22:55,760

distance in this case of 501 feet to one

572

00:23:00,789 --> 00:22:59,280

mile the altitude 500 feet or less

573

00:23:03,830 --> 00:23:00,799

the sighting duration here was two

574

00:23:06,630 --> 00:23:03,840

minutes the object features however are

575

00:23:09,110 --> 00:23:06,640

simply vaguely described as none

576

00:23:11,750 --> 00:23:09,120

the flight path was a straight-line path

577

00:23:14,549 --> 00:23:11,760

and this object was shaped like a sphere

578

00:23:16,630 --> 00:23:14,559

it was hot that night in okoboji the

579

00:23:19,750 --> 00:23:16,640

maximum temperature was 93 degrees

580

00:23:22,070 --> 00:23:19,760

fahrenheit 34 degrees celsius down to a

581

00:23:25,110 --> 00:23:22,080

sensible minimum of 59 degrees

582

00:23:27,830 --> 00:23:25,120

fahrenheit 15 degrees celsius the

583

00:23:30,710 --> 00:23:27,840

visibility factors nothing unusual the

584

00:23:33,110 --> 00:23:30,720

standard visibility maximum mean and

585

00:23:35,990 --> 00:23:33,120

minimum visibility read the same 10

586

00:23:39,110 --> 00:23:36,000

miles 16 kilometers and at the time

587

00:23:41,510 --> 00:23:39,120

there was no strange weather happening

588

00:23:44,549 --> 00:23:41,520

but here's what was happening

589

00:23:47,190 --> 00:23:44,559

i was fishing lake okoboji and initially

590

00:23:50,549 --> 00:23:47,200

noticed what i thought looked like venus

591

00:23:52,230 --> 00:23:50,559

but it was in the southwest at 1 am and

592

00:23:54,470 --> 00:23:52,240

it shouldn't have been there

593

00:23:56,149 --> 00:23:54,480

i caught a fish so my back was turned to

594

00:23:57,510 --> 00:23:56,159

the object for approximately three to

595

00:23:59,590 --> 00:23:57,520

four minutes

596

00:24:02,149 --> 00:23:59,600

after i put my line back out and sat

597

00:24:04,549 --> 00:24:02,159

back down the object had closed this

598

00:24:06,470 --> 00:24:04,559

distance it was now over the south edge

599

00:24:08,710 --> 00:24:06,480

of the lake and quickly moved to the

600

00:24:10,230 --> 00:24:08,720

northeast side of the lake

601
00:24:11,830 --> 00:24:10,240
this thing was out of sight within one

602
00:24:13,909 --> 00:24:11,840
to two minutes

603
00:24:16,390 --> 00:24:13,919
at the closest the object was maybe one

604
00:24:18,470 --> 00:24:16,400
third to one half a mile away

605
00:24:21,510 --> 00:24:18,480
this thing had the color of the embers

606
00:24:24,710 --> 00:24:21,520
of a campfire it seemed to be maybe 50

607
00:24:26,230 --> 00:24:24,720
feet in diameter at first i dismissed it

608
00:24:27,110 --> 00:24:26,240
as a drone or something along those

609
00:24:29,190 --> 00:24:27,120
lines

610
00:24:31,430 --> 00:24:29,200
but this thing speed and distance and

611
00:24:32,950 --> 00:24:31,440
there was no noise well that made me

612
00:24:36,789 --> 00:24:32,960
wonder

613
00:24:40,630 --> 00:24:36,799

one month later on july 2nd similar time

614

00:24:42,390 --> 00:24:40,640

after 1am i saw a similar orb or a ball

615

00:24:45,350 --> 00:24:42,400

this was at a greater distance it seemed

616

00:24:47,190 --> 00:24:45,360

to be south of royal iowa i was

617

00:24:49,269 --> 00:24:47,200

attempting to get a video with my cell

618

00:24:51,510 --> 00:24:49,279

phone but this object completely

619

00:24:53,350 --> 00:24:51,520

disappeared i didn't see which direction

620

00:24:55,750 --> 00:24:53,360

or speed it left at

621

00:24:57,830 --> 00:24:55,760

i'm curious if anyone else has seen

622

00:25:00,310 --> 00:24:57,840

something along these same lines in

623

00:25:02,549 --> 00:25:00,320

northwest iowa it seemed to be strange

624

00:25:06,549 --> 00:25:02,559

that i saw something june 2nd and then

625

00:25:10,149 --> 00:25:08,269

oh it's just that monthly

626

00:25:12,390 --> 00:25:10,159

extraterrestrial visit

627

00:25:14,549 --> 00:25:12,400

what's going to happen august 2nd we

628

00:25:18,149 --> 00:25:14,559

can't wait we'll keep looking to the

629

00:25:20,149 --> 00:25:18,159

area of okoboji iowa but now we look to

630

00:25:22,630 --> 00:25:20,159

the area of time

631

00:25:23,669 --> 00:25:22,640

we don't have any so we've gotta fly

632

00:25:25,909 --> 00:25:23,679

because

633

00:25:28,470 --> 00:25:25,919

that's a wrap thank you for listening to

634

00:25:31,750 --> 00:25:28,480

inception radio network follow today's

635

00:25:33,830 --> 00:25:31,760

stories at ufoheadlinenews.com
