

▶ Scott Mardis & William Dranginis

Listen on

inceptionradionetwork.com

1
00:00:26,390 --> 00:00:02,260
network superior wisconsin

2
00:00:26,400 --> 00:00:45,590
is

3
00:00:45,600 --> 00:00:59,349
oh

4
00:01:03,590 --> 00:01:01,270
hello everyone welcome to periversal

5
00:01:04,950 --> 00:01:03,600
universe on the inception radio network

6
00:01:06,870 --> 00:01:04,960
brought to you by the northern wisconsin

7
00:01:08,950 --> 00:01:06,880
paranormal society limited in the

8
00:01:10,950 --> 00:01:08,960
northwoods paranormal resource center

9
00:01:13,030 --> 00:01:10,960
here in rhylander wisconsin

10
00:01:14,630 --> 00:01:13,040
we're your hosts kevin jennifer mallon

11
00:01:16,630 --> 00:01:14,640
hello everyone

12
00:01:18,710 --> 00:01:16,640
and hello to everyone in the iron chat

13
00:01:21,149 --> 00:01:18,720

room we look forward to your questions

14

00:01:23,270 --> 00:01:21,159

and comments as always

15

00:01:27,429 --> 00:01:23,280

ironchat.com is the link

16

00:01:29,590 --> 00:01:27,439

for the chat room so come join us there

17

00:01:31,429 --> 00:01:29,600

this next category is cryptozoology

18

00:01:33,429 --> 00:01:31,439

aquatic cryptozoology to be more

19

00:01:35,590 --> 00:01:33,439

specific

20

00:01:36,550 --> 00:01:35,600

tonight's topic is the lake monster

21

00:01:40,310 --> 00:01:36,560

champ

22

00:01:42,069 --> 00:01:40,320

earlier this year we did a show about

23

00:01:43,910 --> 00:01:42,079

the 2017

24

00:01:45,429 --> 00:01:43,920

expedition they were planning in lake

25

00:01:49,030 --> 00:01:45,439

campaign

26
00:01:51,429 --> 00:01:49,040
well tonight's show is about that update

27
00:01:53,510 --> 00:01:51,439
from that same expedition which has been

28
00:01:56,550 --> 00:01:53,520
concluded

29
00:01:57,910 --> 00:01:56,560
this will be the topic for the next hour

30
00:01:59,830 --> 00:01:57,920
champ for real

31
00:02:01,030 --> 00:01:59,840
today's guests have collected possible

32
00:02:04,789 --> 00:02:01,040
evidence

33
00:02:06,830 --> 00:02:04,799
as creatures existence uh

34
00:02:09,430 --> 00:02:06,840
which we'll be talking about with

35
00:02:11,670 --> 00:02:09,440
cryptozoologists scott mardis and

36
00:02:13,589 --> 00:02:11,680
william dranginess

37
00:02:15,510 --> 00:02:13,599
in a minute uh right before we do

38
00:02:18,309 --> 00:02:15,520

tonight's shout outs

39

00:02:21,350 --> 00:02:18,319

shout outs go to those folks

40

00:02:23,910 --> 00:02:21,360

and paranormal teams who have shared our

41

00:02:25,350 --> 00:02:23,920

show banners and archives this week on

42

00:02:28,710 --> 00:02:25,360

social media

43

00:02:31,910 --> 00:02:28,720

uh so jenny who do we have okay so

44

00:02:33,990 --> 00:02:31,920

we have robert mulder

45

00:02:36,630 --> 00:02:34,000

lake champlain

46

00:02:39,830 --> 00:02:36,640

research

47

00:02:42,229 --> 00:02:39,840

zombie plesiosaur society

48

00:02:45,350 --> 00:02:42,239

lake monstrosities

49

00:02:47,110 --> 00:02:45,360

lake champlain mystery animals

50

00:02:50,710 --> 00:02:47,120

beverly bonen

51
00:02:53,990 --> 00:02:50,720
walter brooks author of thought christos

52
00:02:56,150 --> 00:02:54,000
jason bland of paranormal soup

53
00:02:58,949 --> 00:02:56,160
jose taker

54
00:03:01,430 --> 00:02:58,959
debbie grassberger schmoll

55
00:03:02,869 --> 00:03:01,440
howard yodel of the rift

56
00:03:05,110 --> 00:03:02,879
cindy lou

57
00:03:08,390 --> 00:03:05,120
of bizarro world

58
00:03:09,990 --> 00:03:08,400
and ufologist jose cullen

59
00:03:12,790 --> 00:03:10,000
and of course

60
00:03:15,589 --> 00:03:12,800
everyone in the chat room

61
00:03:16,550 --> 00:03:15,599
awesome thank you so much

62
00:03:18,949 --> 00:03:16,560
for

63
00:03:21,190 --> 00:03:18,959

sharing our banners we very much

64

00:03:23,750 --> 00:03:21,200

appreciate it

65

00:03:24,790 --> 00:03:23,760

so if you have this if anybody has any

66

00:03:26,149 --> 00:03:24,800

questions

67

00:03:28,589 --> 00:03:26,159

for our guests

68

00:03:31,190 --> 00:03:28,599

drop those in the chat room at

69

00:03:33,910 --> 00:03:31,200

ironchat.com and jennifer will ask our

70

00:03:35,030 --> 00:03:33,920

guests for you during the show

71

00:03:36,149 --> 00:03:35,040

uh

72

00:03:37,910 --> 00:03:36,159

as i said our guests are

73

00:03:40,949 --> 00:03:37,920

cryptozoologists with the zombie

74

00:03:42,710 --> 00:03:40,959

plesiosaur society scott marquis who has

75

00:03:44,630 --> 00:03:42,720

been on the show before and william

76

00:03:46,630 --> 00:03:44,640

drangines

77

00:03:47,830 --> 00:03:46,640

who's with us for the first time hello

78

00:03:50,630 --> 00:03:47,840

gentlemen

79

00:03:53,190 --> 00:03:50,640

welcome to paradise

80

00:03:54,710 --> 00:03:53,200

good evening thank you

81

00:03:57,429 --> 00:03:54,720

yes thanks for joining us this evening

82

00:04:01,589 --> 00:03:58,830

it's good to have you back

83

00:04:03,830 --> 00:04:01,599

on i would like to say that will and i

84

00:04:07,110 --> 00:04:03,840

have worked on and off together

85

00:04:09,589 --> 00:04:07,120

since 2009.

86

00:04:11,270 --> 00:04:09,599

yeah yeah it's been a while i guess i'll

87

00:04:14,390 --> 00:04:11,280

i guess i'll let him fill you out on

88

00:04:18,229 --> 00:04:16,710

well i guess uh i know there's a lot you

89

00:04:20,550 --> 00:04:18,239

guys want to talk about

90

00:04:23,110 --> 00:04:20,560

and here uh

91

00:04:24,150 --> 00:04:23,120

why don't we start with the beginning

92

00:04:25,510 --> 00:04:24,160

um

93

00:04:26,950 --> 00:04:25,520

actually you know if you guys want to

94

00:04:28,390 --> 00:04:26,960

give us a little history about uh

95

00:04:29,749 --> 00:04:28,400

yourselves

96

00:04:32,870 --> 00:04:29,759

quicken the zombie please restore

97

00:04:39,350 --> 00:04:32,880

society and leading up to that

98

00:04:44,070 --> 00:04:41,030

well will is

99

00:04:46,390 --> 00:04:44,080

an electrical engineer

100

00:04:48,790 --> 00:04:46,400

and has actually engineered a lot of the

101
00:04:50,310 --> 00:04:48,800
technology that we've been using

102
00:04:51,830 --> 00:04:50,320
over the years

103
00:04:55,270 --> 00:04:51,840
i'll let him

104
00:04:58,950 --> 00:04:56,710
sure um

105
00:05:01,270 --> 00:04:58,960
yeah i've been uh in the uh

106
00:05:02,870 --> 00:05:01,280
actually a scientific community i'm a

107
00:05:04,390 --> 00:05:02,880
science technologist for a company

108
00:05:05,510 --> 00:05:04,400
called patel they're out of columbus

109
00:05:06,790 --> 00:05:05,520
ohio

110
00:05:08,950 --> 00:05:06,800
um

111
00:05:11,430 --> 00:05:08,960
as well as a facility manager for one of

112
00:05:12,550 --> 00:05:11,440
their uh offices here

113
00:05:14,390 --> 00:05:12,560

um

114

00:05:16,070 --> 00:05:14,400

i've been doing the uh

115

00:05:17,189 --> 00:05:16,080

the lake stuff for a number of years now

116

00:05:19,110 --> 00:05:17,199

but um

117

00:05:20,390 --> 00:05:19,120

what interests me is the actually

118

00:05:23,189 --> 00:05:20,400

getting in

119

00:05:24,390 --> 00:05:23,199

to the environment and somehow trying to

120

00:05:26,390 --> 00:05:24,400

record

121

00:05:28,310 --> 00:05:26,400

um interactions with with these

122

00:05:30,230 --> 00:05:28,320

creatures um everything that really got

123

00:05:31,830 --> 00:05:30,240

me started was a bigfoot sighting back

124

00:05:33,670 --> 00:05:31,840

in 1995

125

00:05:35,270 --> 00:05:33,680

while metal detecting with two fbi

126
00:05:36,310 --> 00:05:35,280
agents in the woods of culpepper

127
00:05:39,189 --> 00:05:36,320
virginia

128
00:05:40,790 --> 00:05:39,199
um we were 75 feet from the creature saw

129
00:05:41,909 --> 00:05:40,800
it as clear as day it was during the

130
00:05:43,510 --> 00:05:41,919
daytime

131
00:05:45,670 --> 00:05:43,520
um

132
00:05:47,350 --> 00:05:45,680
had a really really good sighting of it

133
00:05:49,749 --> 00:05:47,360
uh ran in front of us the whole sighting

134
00:05:51,430 --> 00:05:49,759
lasted about 12-13 seconds

135
00:05:54,070 --> 00:05:51,440
um so when you see something like that

136
00:05:56,390 --> 00:05:54,080
uh jump out of a

137
00:05:58,310 --> 00:05:56,400
book of mythology um

138
00:05:59,749 --> 00:05:58,320

and into your real life it really shakes

139

00:06:01,510 --> 00:05:59,759

you to the core so

140

00:06:03,430 --> 00:06:01,520

i spent many years um

141

00:06:05,350 --> 00:06:03,440

studying the the bigfoot creatures

142

00:06:07,830 --> 00:06:05,360

developing camera systems

143

00:06:10,070 --> 00:06:07,840

covert sam camera systems to

144

00:06:13,110 --> 00:06:10,080

try to catch them

145

00:06:15,430 --> 00:06:13,120

had some interesting uh photos videos

146

00:06:18,070 --> 00:06:15,440

things like that but nothing inclusive

147

00:06:19,909 --> 00:06:18,080

but learned quite a bit and

148

00:06:21,350 --> 00:06:19,919

i still do that research but uh the

149

00:06:23,590 --> 00:06:21,360

champ um

150

00:06:25,110 --> 00:06:23,600

research caught my eye uh that was back

151
00:06:27,110 --> 00:06:25,120
in 2009

152
00:06:29,590 --> 00:06:27,120
with uh scott and elizabeth von

153
00:06:31,350 --> 00:06:29,600
luggenthaler um i was very interested in

154
00:06:33,590 --> 00:06:31,360
that research and

155
00:06:34,469 --> 00:06:33,600
i thought uh wow i love boats i love

156
00:06:35,990 --> 00:06:34,479
water

157
00:06:38,710 --> 00:06:36,000
why not

158
00:06:40,870 --> 00:06:38,720
start the research on that too so

159
00:06:42,469 --> 00:06:40,880
one thing led to another met with scott

160
00:06:43,830 --> 00:06:42,479
and elizabeth

161
00:06:45,670 --> 00:06:43,840
and had a

162
00:06:46,550 --> 00:06:45,680
really good time up there in new york

163
00:06:49,270 --> 00:06:46,560

state

164

00:06:51,110 --> 00:06:49,280

in vermont and um

165

00:06:52,230 --> 00:06:51,120

this is sort of a continuation of that

166

00:06:54,790 --> 00:06:52,240

really

167

00:06:56,790 --> 00:06:54,800

um there's it's a big lake

168

00:06:59,430 --> 00:06:56,800

but um

169

00:07:01,670 --> 00:06:59,440

i don't think as in the bigfoot creature

170

00:07:02,950 --> 00:07:01,680

that wants to evade

171

00:07:04,469 --> 00:07:02,960

detection

172

00:07:07,029 --> 00:07:04,479

i don't think these creatures in lake

173

00:07:08,629 --> 00:07:07,039

champlain are out to evade detection at

174

00:07:12,150 --> 00:07:08,639

all i think they're there and they're

175

00:07:14,550 --> 00:07:12,160

just a little difficult to find but

176

00:07:15,909 --> 00:07:14,560

it's been an interesting ride and

177

00:07:17,430 --> 00:07:15,919

that's what we're doing at the lake is

178

00:07:19,029 --> 00:07:17,440

to try to

179

00:07:21,270 --> 00:07:19,039

locate these creatures and come up with

180

00:07:23,029 --> 00:07:21,280

some some hard evidence

181

00:07:24,029 --> 00:07:23,039

well you know you have to think they've

182

00:07:26,469 --> 00:07:24,039

got

183

00:07:29,110 --> 00:07:26,479

129 miles

184

00:07:31,350 --> 00:07:29,120

of lake with something like 400 miles of

185

00:07:32,950 --> 00:07:31,360

meandering shoreline

186

00:07:35,589 --> 00:07:32,960

and there's a large chunk of the lake

187

00:07:36,950 --> 00:07:35,599

they're hiding under 200 300 400 feet of

188

00:07:39,430 --> 00:07:36,960

water

189

00:07:43,270 --> 00:07:41,270

to me the obvious answer is you get to

190

00:07:44,629 --> 00:07:43,280

go down where they're living most of the

191

00:07:48,150 --> 00:07:44,639

time

192

00:07:51,510 --> 00:07:49,430

and they may

193

00:07:54,469 --> 00:07:51,520

die down there as well and that's a good

194

00:07:57,270 --> 00:07:54,479

place to look for bones or

195

00:07:58,869 --> 00:07:57,280

you know physical remains of some kind

196

00:08:01,830 --> 00:07:58,879

so let's talk about

197

00:08:04,550 --> 00:08:01,840

so this year okay i

198

00:08:06,550 --> 00:08:04,560

like every time we go out uh we just

199

00:08:08,469 --> 00:08:06,560

want to do new stuff or try something to

200

00:08:10,710 --> 00:08:08,479

do last time or maybe tweak something we

201
00:08:12,950 --> 00:08:10,720
didn't do before or

202
00:08:15,189 --> 00:08:12,960
uh i guess

203
00:08:17,749 --> 00:08:15,199
the first question uh

204
00:08:19,990 --> 00:08:17,759
i have is what was the game plan and

205
00:08:23,189 --> 00:08:20,000
what were the goals going into this

206
00:08:28,710 --> 00:08:25,350
well um

207
00:08:31,189 --> 00:08:28,720
one thing i wanted to concentrate on

208
00:08:33,029 --> 00:08:31,199
was like i said the search for

209
00:08:34,389 --> 00:08:33,039
physical remains

210
00:08:37,269 --> 00:08:34,399
and

211
00:08:41,990 --> 00:08:39,909
roughly 10 000 years ago what is now

212
00:08:45,110 --> 00:08:42,000
lake champlain

213
00:08:48,150 --> 00:08:45,120

was a fiord of a much larger

214

00:08:50,550 --> 00:08:48,160

sea called the champlain sea

215

00:08:53,030 --> 00:08:50,560

that was eventually cut off

216

00:08:55,030 --> 00:08:53,040

from the gulf of st lawrence

217

00:08:57,829 --> 00:08:55,040

and the water level was a lot deeper

218

00:08:59,670 --> 00:08:57,839

than it was 150 feet deeper than it is

219

00:09:00,550 --> 00:08:59,680

now

220

00:09:04,230 --> 00:09:00,560

and

221

00:09:06,710 --> 00:09:04,240

now that the water level has gone down

222

00:09:08,230 --> 00:09:06,720

there are a couple of caves

223

00:09:10,389 --> 00:09:08,240

that would have been underwater during

224

00:09:11,670 --> 00:09:10,399

the champlain sea that are above ground

225

00:09:14,870 --> 00:09:11,680

now

226

00:09:16,470 --> 00:09:14,880

uh the two that i am most familiar with

227

00:09:18,550 --> 00:09:16,480

are

228

00:09:21,030 --> 00:09:18,560

uh the one on cave island in malletts

229

00:09:23,350 --> 00:09:21,040

bay lake champlain

230

00:09:24,550 --> 00:09:23,360

and then there's one called the donahue

231

00:09:27,110 --> 00:09:24,560

sea cave

232

00:09:29,750 --> 00:09:27,120

off north avenue in burlington

233

00:09:32,630 --> 00:09:29,760

and these 2ks were carved out by wave

234

00:09:34,630 --> 00:09:32,640

action during the champlain sea

235

00:09:37,750 --> 00:09:34,640

and the idea is

236

00:09:39,030 --> 00:09:37,760

that perhaps there may still be caves of

237

00:09:41,030 --> 00:09:39,040

this nature

238

00:09:42,870 --> 00:09:41,040

they're not very deep

239

00:09:44,790 --> 00:09:42,880

and not very big but they're big enough

240

00:09:47,910 --> 00:09:44,800

for something to hide in

241

00:09:50,710 --> 00:09:47,920

and they know that sea turtles

242

00:09:52,070 --> 00:09:50,720

occasionally go into caves either to die

243

00:09:54,790 --> 00:09:52,080

on purpose

244

00:09:57,430 --> 00:09:54,800

or they blundered into them and get lost

245

00:09:59,190 --> 00:09:57,440

and die inside of them so the idea is

246

00:10:00,790 --> 00:09:59,200

it's possible

247

00:10:02,870 --> 00:10:00,800

that you know

248

00:10:05,590 --> 00:10:02,880

if champ exists whatever they are they

249

00:10:08,630 --> 00:10:05,600

may occasionally go into these caves and

250

00:10:10,630 --> 00:10:08,640

get stuck and die and it's possible

251

00:10:13,509 --> 00:10:10,640

there could be bones

252

00:10:16,230 --> 00:10:13,519

of individual specimens

253

00:10:17,030 --> 00:10:16,240

in caves if we could find the caves

254

00:10:20,069 --> 00:10:17,040

so

255

00:10:23,509 --> 00:10:20,079

these type of caves are only formed

256

00:10:25,750 --> 00:10:23,519

in uh sedimentary rock

257

00:10:28,389 --> 00:10:25,760

there is a geologic map of the lake that

258

00:10:30,790 --> 00:10:28,399

shows isolated deposits of sedimentary

259

00:10:33,350 --> 00:10:30,800

rock around the rim of the lake

260

00:10:36,069 --> 00:10:33,360

and uh the idea was is to try to go

261

00:10:39,590 --> 00:10:36,079

investigate these places with the um

262

00:10:41,350 --> 00:10:39,600

side scan sonar to see if we could find

263

00:10:43,829 --> 00:10:41,360

any caves like that that are still

264

00:10:45,430 --> 00:10:43,839

underwater now um

265

00:10:48,230 --> 00:10:45,440

we tried to do a little bit of that but

266

00:10:50,069 --> 00:10:48,240

we've just we had a lot of uh mechanical

267

00:10:51,750 --> 00:10:50,079

and technical problems and weather

268

00:10:53,670 --> 00:10:51,760

problems

269

00:10:56,630 --> 00:10:53,680

uh the other

270

00:11:00,470 --> 00:10:56,640

main thing i wanted to try to do

271

00:11:02,710 --> 00:11:00,480

is there seems to be three really good

272

00:11:04,790 --> 00:11:02,720

video pieces of evidence for the

273

00:11:08,470 --> 00:11:04,800

existence of these animals

274

00:11:10,550 --> 00:11:08,480

that would be sandra manzi's famous 1977

275

00:11:12,470 --> 00:11:10,560

photograph

276

00:11:14,310 --> 00:11:12,480

which was taken up somewhere around the

277

00:11:15,750 --> 00:11:14,320

albert passage in the northern end of

278

00:11:18,470 --> 00:11:15,760

the lake

279

00:11:22,150 --> 00:11:18,480

probably between

280

00:11:25,590 --> 00:11:22,160

north hero island and albert

281

00:11:29,910 --> 00:11:25,600

somewhere up in that area

282

00:11:35,030 --> 00:11:32,949

believes he may have found the spot

283

00:11:37,269 --> 00:11:35,040

based on certain

284

00:11:39,910 --> 00:11:37,279

features that he sees in the background

285

00:11:41,430 --> 00:11:39,920

of the of the photograph so

286

00:11:44,470 --> 00:11:41,440

one of the goals was to go up there and

287

00:11:47,509 --> 00:11:44,480

investigate that and the other two

288

00:11:48,870 --> 00:11:47,519

uh pieces of film that i'm talking about

289

00:11:52,630 --> 00:11:48,880

are

290

00:11:55,990 --> 00:11:52,640

the buddha video shot in 2005 near the

291

00:11:58,470 --> 00:11:56,000

ausable river over in new york

292

00:12:01,750 --> 00:11:58,480

and the olsen video shot at oak ledge

293

00:12:03,030 --> 00:12:01,760

park in burlington in 2009

294

00:12:04,630 --> 00:12:03,040

so

295

00:12:07,269 --> 00:12:04,640

one thing that we were able to do we

296

00:12:10,310 --> 00:12:07,279

were able to spend two nights

297

00:12:12,550 --> 00:12:10,320

or a night and two days over at the

298

00:12:13,829 --> 00:12:12,560

location that the beaudette video

299

00:12:17,110 --> 00:12:13,839

was filmed

300

00:12:19,190 --> 00:12:17,120

and the best results that we had

301
00:12:21,110 --> 00:12:19,200
uh for this trip

302
00:12:22,550 --> 00:12:21,120
happened over there we got some kind of

303
00:12:31,509 --> 00:12:22,560
a

304
00:12:34,230 --> 00:12:31,519
13 feet long

305
00:12:35,910 --> 00:12:34,240
swam under the boat

306
00:12:37,509 --> 00:12:35,920
and we also

307
00:12:38,590 --> 00:12:37,519
i heard a few

308
00:12:41,190 --> 00:12:38,600
uh

309
00:12:43,269 --> 00:12:41,200
echolocation-like clicking sounds

310
00:12:44,949 --> 00:12:43,279
on the hydrophones over there so that's

311
00:12:46,949 --> 00:12:44,959
the major

312
00:12:48,870 --> 00:12:46,959
uh evidence we were able to get this

313
00:12:50,230 --> 00:12:48,880

trip you know it's still we're still in

314

00:12:52,870 --> 00:12:50,240

the process

315

00:12:54,949 --> 00:12:52,880

of trying to analyze it but those are

316

00:12:56,870 --> 00:12:54,959

the two most promising things

317

00:12:58,470 --> 00:12:56,880

that we got so far

318

00:13:00,389 --> 00:12:58,480

so william like

319

00:13:02,790 --> 00:13:00,399

what equipment what's the exciting

320

00:13:04,550 --> 00:13:02,800

equipment that you guys brought

321

00:13:06,550 --> 00:13:04,560

i should say uh because i know you guys

322

00:13:09,590 --> 00:13:06,560

have uh like

323

00:13:12,470 --> 00:13:09,600

drones and and uh you know underwater

324

00:13:14,710 --> 00:13:12,480

cameras and and all kinds of cool stuff

325

00:13:16,389 --> 00:13:14,720

i wanted to hear about it

326

00:13:18,550 --> 00:13:16,399

yeah well some of the um

327

00:13:20,389 --> 00:13:18,560

some of the equipment was um used in

328

00:13:23,110 --> 00:13:20,399

previous years the

329

00:13:26,629 --> 00:13:23,120

the igacha h2o which is a

330

00:13:28,710 --> 00:13:26,639

sort of an autonomous time lapse camera

331

00:13:31,269 --> 00:13:28,720

that worked well in the past

332

00:13:32,629 --> 00:13:31,279

unfortunately for the two weeks prior to

333

00:13:34,790 --> 00:13:32,639

our

334

00:13:37,030 --> 00:13:34,800

arriving at the lake they had rain just

335

00:13:39,350 --> 00:13:37,040

about every day and every night and uh

336

00:13:40,629 --> 00:13:39,360

the water was so cloudy

337

00:13:43,190 --> 00:13:40,639

um

338

00:13:45,829 --> 00:13:43,200

visibility was about three to three to

339

00:13:47,670 --> 00:13:45,839

six feet uh we measured

340

00:13:49,670 --> 00:13:47,680

um so and that was all the way through

341

00:13:50,629 --> 00:13:49,680

the bottom too it didn't get any better

342

00:13:53,190 --> 00:13:50,639

at all

343

00:13:54,710 --> 00:13:53,200

um so we did deploy the cameras uh the

344

00:13:56,230 --> 00:13:54,720

underwater cameras the time lapse

345

00:13:57,990 --> 00:13:56,240

cameras and those were

346

00:14:00,150 --> 00:13:58,000

designed to be silhouette cameras where

347

00:14:01,110 --> 00:14:00,160

they would be placed um anchored to the

348

00:14:03,509 --> 00:14:01,120

bottom

349

00:14:05,590 --> 00:14:03,519

uh they'd be floating about two to three

350

00:14:08,150 --> 00:14:05,600

four feet above the surface

351
00:14:09,430 --> 00:14:08,160
or above the uh the bottom of the lake

352
00:14:12,069 --> 00:14:09,440
looking up

353
00:14:13,670 --> 00:14:12,079
and what they would do is use the sky as

354
00:14:15,350 --> 00:14:13,680
a background and it would take a

355
00:14:17,910 --> 00:14:15,360
snapshot a photo

356
00:14:19,829 --> 00:14:17,920
every five seconds um

357
00:14:21,990 --> 00:14:19,839
so if you're looking at it from from the

358
00:14:24,230 --> 00:14:22,000
bottom it's a wide-angle lens you're

359
00:14:26,150 --> 00:14:24,240
looking up and seeing the white sky and

360
00:14:28,629 --> 00:14:26,160
anything that swims above it would be a

361
00:14:32,389 --> 00:14:28,639
dark silhouette

362
00:14:33,910 --> 00:14:32,399
we had two of those there at the lake um

363
00:14:35,509 --> 00:14:33,920

the problem was

364

00:14:38,150 --> 00:14:35,519

you didn't see anything

365

00:14:39,350 --> 00:14:38,160

really any sunlight until we brought the

366

00:14:42,310 --> 00:14:39,360

cameras up

367

00:14:44,629 --> 00:14:42,320

um to about six to eight feet and it was

368

00:14:48,629 --> 00:14:44,639

just a very dull

369

00:14:50,150 --> 00:14:48,639

uh greenish brown murky water um

370

00:14:52,470 --> 00:14:50,160

it wasn't really conducive for

371

00:14:53,590 --> 00:14:52,480

underwater photography

372

00:14:55,910 --> 00:14:53,600

um

373

00:14:57,910 --> 00:14:55,920

you know so we we tried but

374

00:15:01,829 --> 00:14:57,920

conditions weren't there for that um

375

00:15:05,509 --> 00:15:01,839

daddy where do babies come from uh well

376

00:15:07,670 --> 00:15:05,519

uh honey mommy went to the store oh well

377

00:15:11,509 --> 00:15:07,680

you see um well there's a mommy and a

378

00:15:12,629 --> 00:15:11,519

daddy right right and c when they call

379

00:15:14,310 --> 00:15:12,639

geico

380

00:15:16,710 --> 00:15:14,320

they could save a bunch of money on car

381

00:15:19,110 --> 00:15:16,720

insurance oh really and that makes them

382

00:15:21,750 --> 00:15:19,120

happy yes that makes them very happy

383

00:15:23,430 --> 00:15:21,760

that's good yeah well i'm glad we could

384

00:15:25,829 --> 00:15:23,440

have this talk sunshine

385

00:15:28,790 --> 00:15:25,839

geico because saving 15 or more on car

386

00:15:30,310 --> 00:15:28,800

insurance is always a great answer

387

00:15:31,910 --> 00:15:30,320

you know i was really looking forward to

388

00:15:36,470 --> 00:15:31,920

that for those

389

00:15:38,550 --> 00:15:36,480
in 2014 down at button bay

390

00:15:40,790 --> 00:15:38,560
yeah the water was fairly clear

391

00:15:44,949 --> 00:15:40,800
yeah yeah the results were good there we

392

00:15:46,790 --> 00:15:44,959
had good clarity great images we had um

393

00:15:48,949 --> 00:15:46,800
actually shadows of airplanes that were

394

00:15:51,590 --> 00:15:48,959
coming in to land at the grass strip

395

00:15:54,150 --> 00:15:51,600
uh people with kayaks going over uh

396

00:15:56,629 --> 00:15:54,160
boats um i did some testing swimming

397

00:15:58,949 --> 00:15:56,639
over just so i had scale

398

00:16:00,310 --> 00:15:58,959
um to judge and you know it worked out

399

00:16:02,150 --> 00:16:00,320
really well so

400

00:16:04,310 --> 00:16:02,160
we tried this trip it just wasn't

401
00:16:05,670 --> 00:16:04,320
conducive for that type of thing

402
00:16:07,829 --> 00:16:05,680
we also had a

403
00:16:09,189 --> 00:16:07,839
deep 100 foot table with a camera

404
00:16:10,870 --> 00:16:09,199
attached

405
00:16:12,790 --> 00:16:10,880
for doing spot

406
00:16:14,150 --> 00:16:12,800
videography down below but again the

407
00:16:20,069 --> 00:16:14,160
same problem

408
00:16:22,069 --> 00:16:20,079
um we even had a 360 degree nikon camera

409
00:16:24,470 --> 00:16:22,079
that would be transmitting we actually

410
00:16:26,389 --> 00:16:24,480
use a wi-fi cable which attached right

411
00:16:29,030 --> 00:16:26,399
to the side of the camera camera it's

412
00:16:31,430 --> 00:16:29,040
also waterproof down to 100 feet um to

413
00:16:32,389 --> 00:16:31,440

view the end view the uh the video up

414

00:16:33,749 --> 00:16:32,399

top

415

00:16:35,670 --> 00:16:33,759

um

416

00:16:37,030 --> 00:16:35,680

using the virtual goggles but

417

00:16:38,790 --> 00:16:37,040

unfortunately it was the same thing

418

00:16:39,749 --> 00:16:38,800

there just there was no clarity in the

419

00:16:42,150 --> 00:16:39,759

water

420

00:16:44,389 --> 00:16:42,160

um that would have been

421

00:16:46,550 --> 00:16:44,399

great because of 360 view once you put

422

00:16:48,629 --> 00:16:46,560

the goggles on you could look around 360

423

00:16:49,590 --> 00:16:48,639

up in the boat just as if you were down

424

00:16:51,670 --> 00:16:49,600

below

425

00:16:53,590 --> 00:16:51,680

so there was a good investment in um

426

00:16:56,069 --> 00:16:53,600

equipment this year um

427

00:16:57,509 --> 00:16:56,079

basically for photography and underwater

428

00:16:59,509 --> 00:16:57,519

videography

429

00:17:00,550 --> 00:16:59,519

unfortunately it wasn't conducive for

430

00:17:03,269 --> 00:17:00,560

that

431

00:17:04,949 --> 00:17:03,279

we did have the hydrophone which worked

432

00:17:07,990 --> 00:17:04,959

really well

433

00:17:10,630 --> 00:17:08,000

we did get some pretty good audio

434

00:17:12,630 --> 00:17:10,640

i was able to pick up something actually

435

00:17:13,909 --> 00:17:12,640

chewing underwater it was very strange

436

00:17:15,990 --> 00:17:13,919

i've never heard anything like that

437

00:17:18,390 --> 00:17:16,000

before

438

00:17:20,069 --> 00:17:18,400

it's very definite of uh some

439

00:17:22,309 --> 00:17:20,079

something chewing it was a heavy chewing

440

00:17:23,669 --> 00:17:22,319

i'm not sure what it is that's why we're

441

00:17:25,590 --> 00:17:23,679

gonna have to take a little bit of time

442

00:17:28,150 --> 00:17:25,600

and go through this it's like

443

00:17:31,110 --> 00:17:28,160

there's like five hours of hydrophone

444

00:17:33,750 --> 00:17:31,120

recordings that i've yet to go through

445

00:17:35,110 --> 00:17:33,760

but i was able to isolate a two-minute

446

00:17:37,669 --> 00:17:35,120

sequence

447

00:17:38,470 --> 00:17:37,679

that we got the same day that we got the

448

00:17:41,110 --> 00:17:38,480

uh

449

00:17:45,510 --> 00:17:41,120

the blob on the sonar

450

00:17:47,510 --> 00:17:45,520

over at ausable uh river on july 4th

451

00:17:49,669 --> 00:17:47,520

can actually try to play that over the

452

00:17:51,270 --> 00:17:49,679

phone if you'd like to hear it i'm not

453

00:17:53,350 --> 00:17:51,280

sure how well

454

00:17:57,350 --> 00:17:53,360

it'll reproduce over the telephone but i

455

00:18:01,669 --> 00:17:59,750

well you can try i mean put it up yeah i

456

00:18:03,990 --> 00:18:01,679

mean

457

00:18:06,150 --> 00:18:04,000

well hang on here one of the other

458

00:18:10,230 --> 00:18:06,160

yeah you can go ahead and do that

459

00:18:11,750 --> 00:18:10,240

yeah let me just find it um sure

460

00:18:13,669 --> 00:18:11,760

i'll go ahead and fill in when you get

461

00:18:15,270 --> 00:18:13,679

it scott just holler and i'm going to

462

00:18:16,870 --> 00:18:15,280

fill in with a little bit of the sonar

463

00:18:18,310 --> 00:18:16,880

information

464

00:18:20,630 --> 00:18:18,320

all right

465

00:18:22,789 --> 00:18:20,640

that's okay

466

00:18:25,029 --> 00:18:22,799

the uh yeah one of the the biggest

467

00:18:27,669 --> 00:18:25,039

things was the boat too having the um a

468

00:18:29,430 --> 00:18:27,679

good-sized vessel on the water was key

469

00:18:31,669 --> 00:18:29,440

uh where we could live in it sleep in it

470

00:18:33,350 --> 00:18:31,679

um you know it was instead of going

471

00:18:34,230 --> 00:18:33,360

ashore camping out all that sort of

472

00:18:37,110 --> 00:18:34,240

thing

473

00:18:39,750 --> 00:18:37,120

um a larger boat does have its problems

474

00:18:42,150 --> 00:18:39,760

um had some issues trailering it up

475

00:18:43,750 --> 00:18:42,160

through albany where i lost a it was a

476
00:18:45,270 --> 00:18:43,760
triaxial trailer lost a left wheel

477
00:18:46,390 --> 00:18:45,280
bearing that took a day and a half to

478
00:18:50,070 --> 00:18:46,400
fix

479
00:18:52,470 --> 00:18:50,080
close to the fourth of july

480
00:18:54,470 --> 00:18:52,480
um but once the the boat got in the

481
00:18:56,710 --> 00:18:54,480
water we had some issues with steering

482
00:18:58,549 --> 00:18:56,720
was locked up finally uh it took about a

483
00:18:59,909 --> 00:18:58,559
half a day or so to get that

484
00:19:01,750 --> 00:18:59,919
repaired

485
00:19:02,950 --> 00:19:01,760
uh none of these problems happened uh

486
00:19:03,669 --> 00:19:02,960
prior so

487
00:19:07,350 --> 00:19:03,679
but

488
00:19:08,870 --> 00:19:07,360

the sonar is a garmin 840 xs

489

00:19:11,669 --> 00:19:08,880

and it's a

490

00:19:13,270 --> 00:19:11,679

it has a down view inside view sonar uh

491

00:19:15,270 --> 00:19:13,280

the whole system costs about five

492

00:19:17,190 --> 00:19:15,280

thousand dollars that's sort of a sort

493

00:19:19,430 --> 00:19:17,200

of high end for

494

00:19:20,950 --> 00:19:19,440

for that type of application um there's

495

00:19:22,870 --> 00:19:20,960

other sonars out there that are in the

496

00:19:23,669 --> 00:19:22,880

forty to fifty thousand dollar range but

497

00:19:25,830 --> 00:19:23,679

um

498

00:19:28,390 --> 00:19:25,840

the technology has advanced the last

499

00:19:30,630 --> 00:19:28,400

four three to four years uh that this is

500

00:19:33,669 --> 00:19:30,640

pretty good stuff for what we're doing

501
00:19:35,029 --> 00:19:33,679
um and i have the uh view

502
00:19:36,390 --> 00:19:35,039
you got it

503
00:19:38,710 --> 00:19:36,400
yep

504
00:19:41,990 --> 00:19:38,720
okay all right let's roll this is like

505
00:19:43,190 --> 00:19:42,000
two minutes so hang in there here you go

506
00:19:53,190 --> 00:19:43,200
okay

507
00:19:53,200 --> 00:20:14,290
so

508
00:20:14,300 --> 00:20:20,950
[Applause]

509
00:20:59,830 --> 00:20:23,050
okay

510
00:21:10,950 --> 00:21:02,590
thank

511
00:21:10,960 --> 00:21:20,549
club

512
00:21:26,230 --> 00:21:23,190
yeah the clicks are barely audible

513
00:21:29,110 --> 00:21:26,240

because of the waves i i said i was

514

00:21:32,310 --> 00:21:29,120

like i was like i was able to filter out

515

00:21:34,789 --> 00:21:32,320

there was a engine of a power boat i was

516

00:21:36,070 --> 00:21:34,799

able to filter out that

517

00:21:37,350 --> 00:21:36,080

so i don't know if you could hear that

518

00:21:38,549 --> 00:21:37,360

very good but

519

00:21:40,310 --> 00:21:38,559

oh actually

520

00:21:42,070 --> 00:21:40,320

there was there was a couple times in

521

00:21:44,070 --> 00:21:42,080

there there was a couple times in there

522

00:21:46,710 --> 00:21:44,080

where i could hear something clicking

523

00:21:48,789 --> 00:21:46,720

yeah the and what i'm talking about

524

00:21:50,390 --> 00:21:48,799

that's right that's very similar

525

00:21:52,390 --> 00:21:50,400

to the sounds that were recorded by

526
00:21:55,029 --> 00:21:52,400
lisbon mugginstaller

527
00:21:56,710 --> 00:21:55,039
at lake champlain in 2003

528
00:21:59,510 --> 00:21:56,720
which you probably saw on the monster

529
00:22:01,430 --> 00:21:59,520
quest episode most most of that stuff in

530
00:22:03,190 --> 00:22:01,440
there wasn't uh

531
00:22:05,510 --> 00:22:03,200
or it was uh

532
00:22:07,110 --> 00:22:05,520
like what can you say possible

533
00:22:08,470 --> 00:22:07,120
but there was there was a couple times

534
00:22:10,789 --> 00:22:08,480
in there where you can actually tell it

535
00:22:12,630 --> 00:22:10,799
it sounded very much like at the

536
00:22:15,110 --> 00:22:12,640
location how they click like that and

537
00:22:17,510 --> 00:22:15,120
then yeah well it's the same

538
00:22:19,590 --> 00:22:17,520

the same kind of clicks

539

00:22:21,430 --> 00:22:19,600

and that's suspended in the water very

540

00:22:23,750 --> 00:22:21,440

very faint so

541

00:22:24,870 --> 00:22:23,760

i would assume that

542

00:22:27,350 --> 00:22:24,880

not bad

543

00:22:28,549 --> 00:22:27,360

you know it was far away much further

544

00:22:29,510 --> 00:22:28,559

away

545

00:22:31,430 --> 00:22:29,520

than

546

00:22:35,270 --> 00:22:31,440

whatever the source of the sounds that

547

00:22:37,190 --> 00:22:35,280

was mugging taller recorded in 2003. now

548

00:22:39,430 --> 00:22:37,200

we actually went

549

00:22:40,950 --> 00:22:39,440

to one of the places that she recorded

550

00:22:43,990 --> 00:22:40,960

her sounds

551
00:22:45,190 --> 00:22:44,000
in 2003 at the place called town farm

552
00:22:47,270 --> 00:22:45,200
bay

553
00:22:48,789 --> 00:22:47,280
and it's right out from

554
00:22:50,630 --> 00:22:48,799
the marina we were staying out in

555
00:22:52,230 --> 00:22:50,640
charlotte vermont

556
00:22:54,870 --> 00:22:52,240
we went out there and put the underwater

557
00:22:56,870 --> 00:22:54,880
cameras down and i also listened with

558
00:22:59,350 --> 00:22:56,880
the hydrophones but

559
00:23:00,789 --> 00:22:59,360
i didn't get anything at town farm bay

560
00:23:03,190 --> 00:23:00,799
all the sounds

561
00:23:04,870 --> 00:23:03,200
that i was able to hear were over at the

562
00:23:08,549 --> 00:23:04,880
australia river where the buddha video

563
00:23:15,510 --> 00:23:11,350

so we just head up on our chat screen

564

00:23:17,750 --> 00:23:15,520

picture of the sonar radar

565

00:23:19,029 --> 00:23:17,760

and uh

566

00:23:20,950 --> 00:23:19,039

let's talk about that for a couple

567

00:23:22,390 --> 00:23:20,960

minutes because that's really cool

568

00:23:23,270 --> 00:23:22,400

you're talking about the blob that we

569

00:23:25,270 --> 00:23:23,280

got

570

00:23:26,549 --> 00:23:25,280

yeah well it's bob

571

00:23:27,430 --> 00:23:26,559

blob yeah

572

00:23:29,669 --> 00:23:27,440

well

573

00:23:32,789 --> 00:23:29,679

whatever it was it was

574

00:23:32,799 --> 00:23:37,510

messy shaped or plesiosaurus shaped

575

00:23:41,990 --> 00:23:40,149

one oddball thing about it

576
00:23:44,149 --> 00:23:42,000
if it was

577
00:23:45,870 --> 00:23:44,159
a plesiosaur

578
00:23:47,190 --> 00:23:45,880
you would expect to see

579
00:23:50,710 --> 00:23:47,200
[Music]

580
00:23:52,789 --> 00:23:50,720
flippers in a long tail probably with a

581
00:23:53,990 --> 00:23:52,799
tail fin because

582
00:23:55,909 --> 00:23:54,000
you know what they know about

583
00:23:57,430 --> 00:23:55,919
reconstructing plesiosaurs that's what

584
00:23:59,510 --> 00:23:57,440
they look like

585
00:24:01,590 --> 00:23:59,520
you know you might could say that well

586
00:24:02,950 --> 00:24:01,600
the flippers could be held up against

587
00:24:04,470 --> 00:24:02,960
the body

588
00:24:07,430 --> 00:24:04,480

or underneath you would think you would

589

00:24:11,110 --> 00:24:07,440

see a tail there of some sort but

590

00:24:13,990 --> 00:24:11,120

essentially the blob you see there

591

00:24:15,750 --> 00:24:14,000

is shaped like a giant snail

592

00:24:17,750 --> 00:24:15,760

in essence which you know some people

593

00:24:19,350 --> 00:24:17,760

have theorized

594

00:24:21,029 --> 00:24:19,360

that these creatures could be

595

00:24:22,230 --> 00:24:21,039

invertebrates

596

00:24:24,870 --> 00:24:22,240

rather than

597

00:24:27,590 --> 00:24:24,880

some kind of a reptilian animal

598

00:24:29,750 --> 00:24:27,600

um which is not impossible i think it's

599

00:24:31,190 --> 00:24:29,760

less likely

600

00:24:32,630 --> 00:24:31,200

you know there's no

601
00:24:33,830 --> 00:24:32,640
known fossil

602
00:24:35,269 --> 00:24:33,840
uh

603
00:24:37,750 --> 00:24:35,279
slug that's

604
00:24:38,950 --> 00:24:37,760
got that big that we know about um how

605
00:24:40,630 --> 00:24:38,960
big is that

606
00:24:43,350 --> 00:24:40,640
what size is that

607
00:24:44,830 --> 00:24:43,360
13 feet long 12 or 13 feet long i

608
00:24:47,430 --> 00:24:44,840
figured out

609
00:24:50,950 --> 00:24:47,440
because if you look at the original

610
00:24:52,390 --> 00:24:50,960
if you look at the original uh sonar

611
00:24:53,669 --> 00:24:52,400
uh

612
00:24:56,470 --> 00:24:53,679
screen

613
00:24:59,029 --> 00:24:56,480

you can see on the right side uh it goes

614

00:25:01,830 --> 00:24:59,039

from like zero to 25 feet and then it

615

00:25:04,230 --> 00:25:01,840

goes down to like 62 feet

616

00:25:06,390 --> 00:25:04,240

on the chart and if you take that

617

00:25:07,590 --> 00:25:06,400

image and turn it sideways and lay it up

618

00:25:10,149 --> 00:25:07,600

against there

619

00:25:12,549 --> 00:25:10,159

it comes out to about 13 feet long you

620

00:25:14,710 --> 00:25:12,559

know which is fairly large

621

00:25:18,390 --> 00:25:14,720

that's larger than the known

622

00:25:21,190 --> 00:25:18,400

sturgeons and the like they they can get

623

00:25:22,310 --> 00:25:21,200

uh seven feet long so

624

00:25:24,549 --> 00:25:22,320

you know

625

00:25:26,070 --> 00:25:24,559

that's and and that's interesting that's

626

00:25:28,950 --> 00:25:26,080

that's amazing

627

00:25:31,269 --> 00:25:28,960

yeah um

628

00:25:33,750 --> 00:25:31,279

there are there are you know large

629

00:25:35,750 --> 00:25:33,760

pieces of wood debris

630

00:25:37,669 --> 00:25:35,760

in the lake i mean i've seen logs

631

00:25:39,990 --> 00:25:37,679

sitting on the beach

632

00:25:41,110 --> 00:25:40,000

20 feet long you know so there's really

633

00:25:42,710 --> 00:25:41,120

large

634

00:25:45,110 --> 00:25:42,720

logs floating around the lake you look

635

00:25:46,070 --> 00:25:45,120

around the rim of the lake everywhere

636

00:25:48,310 --> 00:25:46,080

and there's

637

00:25:50,310 --> 00:25:48,320

large pieces of wood debris and some of

638

00:25:53,590 --> 00:25:50,320

those wood debris pieces

639

00:25:57,909 --> 00:25:53,600

are regularly monster shapes so we can't

640

00:26:00,149 --> 00:25:57,919

necessarily rule out it being a large

641

00:26:03,430 --> 00:26:00,159

piece of wood debris but the the eyeball

642

00:26:05,669 --> 00:26:03,440

thing concerning that idea

643

00:26:07,110 --> 00:26:05,679

is that this thing showed up on the

644

00:26:07,990 --> 00:26:07,120

sonar

645

00:26:12,070 --> 00:26:08,000

and

646

00:26:14,390 --> 00:26:12,080

the time we we didn't even know how to

647

00:26:17,029 --> 00:26:14,400

get a screen chat capture

648

00:26:18,870 --> 00:26:17,039

on the sd card so we only think we

649

00:26:20,630 --> 00:26:18,880

needed to do was to take a photograph of

650

00:26:23,029 --> 00:26:20,640

the screen

651
00:26:24,710 --> 00:26:23,039
and we got like i think will took like

652
00:26:26,630 --> 00:26:24,720
five of them

653
00:26:28,549 --> 00:26:26,640
and if you look at the time sequence and

654
00:26:30,710 --> 00:26:28,559
all the different photographs

655
00:26:33,909 --> 00:26:30,720
this whole thing happened in like

656
00:26:36,789 --> 00:26:33,919
two seconds and it was gone

657
00:26:37,510 --> 00:26:36,799
and we were we were anchored at the time

658
00:26:40,070 --> 00:26:37,520
so

659
00:26:42,950 --> 00:26:40,080
it's not like we drifted away from it

660
00:26:46,230 --> 00:26:42,960
this thing was in the water column

661
00:26:49,669 --> 00:26:46,240
and left now whether it was an inanimate

662
00:26:52,870 --> 00:26:49,679
object that got swept out by currents

663
00:26:54,710 --> 00:26:52,880

and disappeared or if it was alive and

664

00:26:56,630 --> 00:26:54,720

hailed ass and left

665

00:26:57,669 --> 00:26:56,640

i don't know but that's what really

666

00:27:01,029 --> 00:26:57,679

happened

667

00:27:04,390 --> 00:27:01,039

and the fact that it disappeared so fast

668

00:27:06,149 --> 00:27:04,400

you know and that we didn't see it again

669

00:27:08,230 --> 00:27:06,159

and we were anchored there for a long

670

00:27:09,590 --> 00:27:08,240

time we eventually drifted later in the

671

00:27:12,390 --> 00:27:09,600

evening

672

00:27:14,710 --> 00:27:12,400

the anchorage came loose but but for

673

00:27:15,990 --> 00:27:14,720

several hours after we got the sonar

674

00:27:18,070 --> 00:27:16,000

contact

675

00:27:20,710 --> 00:27:18,080

we stayed in the same area

676

00:27:22,470 --> 00:27:20,720

in like 48 feet of water so

677

00:27:23,909 --> 00:27:22,480

this thing was gone and we didn't see it

678

00:27:25,029 --> 00:27:23,919

again so

679

00:27:27,029 --> 00:27:25,039

you know

680

00:27:29,269 --> 00:27:27,039

that fact right there argues that it

681

00:27:33,269 --> 00:27:29,279

could have been something alive but i

682

00:27:36,950 --> 00:27:35,510

yeah there was some one of the things we

683

00:27:38,630 --> 00:27:36,960

that i noticed was

684

00:27:41,350 --> 00:27:38,640

what i'm what i would call the neck

685

00:27:42,950 --> 00:27:41,360

again it's speculative at best

686

00:27:46,230 --> 00:27:42,960

um there are some differences in

687

00:27:48,710 --> 00:27:46,240

measurement um as it went through the uh

688

00:27:52,230 --> 00:27:48,720

the the sonar um

689

00:27:54,710 --> 00:27:52,240

wave it did seem to move a little bit um

690

00:27:56,389 --> 00:27:54,720

but that could also be if it was a log

691

00:27:58,710 --> 00:27:56,399

it could have been rotation

692

00:27:59,750 --> 00:27:58,720

um and we were just catching that

693

00:28:01,269 --> 00:27:59,760

um

694

00:28:02,470 --> 00:28:01,279

so it's it's

695

00:28:03,750 --> 00:28:02,480

you know it

696

00:28:05,830 --> 00:28:03,760

it's up for

697

00:28:08,070 --> 00:28:05,840

the bait but um it was a good it was a

698

00:28:09,350 --> 00:28:08,080

good solid hit um i do know that some

699

00:28:11,190 --> 00:28:09,360

fish and

700

00:28:14,070 --> 00:28:11,200

uh sturgeon things like that a lot of

701
00:28:16,310 --> 00:28:14,080
those uh will reflect a good signal back

702
00:28:18,230 --> 00:28:16,320
um but yeah i was concerned too that we

703
00:28:20,630 --> 00:28:18,240
didn't see any of the flippers

704
00:28:22,149 --> 00:28:20,640
um but it was just like scott said it

705
00:28:23,669 --> 00:28:22,159
was there and

706
00:28:26,870 --> 00:28:23,679
you know we were sort of caught off by

707
00:28:28,710 --> 00:28:26,880
surprise um i don't i don't think it was

708
00:28:31,269 --> 00:28:28,720
a school of fish because it appeared to

709
00:28:33,510 --> 00:28:31,279
be one solid object

710
00:28:35,830 --> 00:28:33,520
yes yeah definitely not a school

711
00:28:36,950 --> 00:28:35,840
you know it had a classic almost messy

712
00:28:39,110 --> 00:28:36,960
profile

713
00:28:40,310 --> 00:28:39,120

it had a round body

714

00:28:42,630 --> 00:28:40,320

and then this

715

00:28:45,990 --> 00:28:42,640

intersection coming up that that could

716

00:28:48,549 --> 00:28:46,000

you know be interpreted as a a neck

717

00:28:50,789 --> 00:28:48,559

and possibly a small head and there was

718

00:28:52,870 --> 00:28:50,799

even a possible indication

719

00:28:54,870 --> 00:28:52,880

of what were like horns you know you

720

00:28:55,990 --> 00:28:54,880

hear you know these these animals were

721

00:28:58,630 --> 00:28:56,000

known

722

00:29:00,870 --> 00:28:58,640

by the indians in their mythology as the

723

00:29:03,430 --> 00:29:00,880

great horned serpent

724

00:29:05,190 --> 00:29:03,440

and there are you know isolated reports

725

00:29:07,669 --> 00:29:05,200

of people seeing

726

00:29:09,669 --> 00:29:07,679

horns of snorkel-like objects on top of

727

00:29:12,630 --> 00:29:09,679

the head

728

00:29:14,549 --> 00:29:12,640

so you know that also ties in

729

00:29:16,549 --> 00:29:14,559

with the controversial underwater

730

00:29:18,630 --> 00:29:16,559

photograph taken in loch ness back in

731

00:29:20,870 --> 00:29:18,640

1975

732

00:29:23,510 --> 00:29:20,880

of what appears to be

733

00:29:24,549 --> 00:29:23,520

a head with horns or snorkels on top of

734

00:29:27,110 --> 00:29:24,559

it

735

00:29:29,350 --> 00:29:27,120

taken by the academy of applied science

736

00:29:31,269 --> 00:29:29,360

and robert ryan's and his people

737

00:29:33,110 --> 00:29:31,279

and people have debated ever since

738

00:29:36,389 --> 00:29:33,120

whether that was a

739

00:29:39,110 --> 00:29:36,399

a log or a piece of wood they even

740

00:29:40,789 --> 00:29:39,120

recovered a piece of wood in 1987

741

00:29:42,470 --> 00:29:40,799

near where the photograph was taken that

742

00:29:43,750 --> 00:29:42,480

some people believe it's the object in

743

00:29:45,510 --> 00:29:43,760

the photograph

744

00:29:48,789 --> 00:29:45,520

and other people believe that it was the

745

00:29:50,789 --> 00:29:48,799

head of one of the loch ness monsters

746

00:29:52,630 --> 00:29:50,799

so you know this is

747

00:29:55,110 --> 00:29:52,640

similar to the shape of what you see on

748

00:29:57,350 --> 00:29:55,120

the sonar blob so

749

00:29:59,430 --> 00:29:57,360

okay everybody and with that it is time

750

00:30:01,510 --> 00:29:59,440

for our first commercial break you are

751
00:30:05,750 --> 00:30:01,520
listening to power personal universe on

752
00:30:10,070 --> 00:30:07,750
welcome back to reversal universe on the

753
00:30:11,990 --> 00:30:10,080
inception radio network we're your hosts

754
00:30:14,310 --> 00:30:12,000
kevin and jennifer malek and we're

755
00:30:17,750 --> 00:30:14,320
chatting with cryptozoologists

756
00:30:19,669 --> 00:30:17,760
scott margies and william ranginis

757
00:30:21,029 --> 00:30:19,679
but before we bring them back on we'd

758
00:30:23,830 --> 00:30:21,039
like to take a minute and thank

759
00:30:25,430 --> 00:30:23,840
everybody who makes periversal universe

760
00:30:27,269 --> 00:30:25,440
possible

761
00:30:28,549 --> 00:30:27,279
including graphic art designer lauren

762
00:30:31,029 --> 00:30:28,559
stimiza

763
00:30:33,990 --> 00:30:31,039

okay kevin for the grand prize of one

764

00:30:36,149 --> 00:30:34,000

million dollars what color is the white

765

00:30:38,710 --> 00:30:36,159

house um

766

00:30:41,510 --> 00:30:38,720

i know this i know this i know this

767

00:30:43,110 --> 00:30:41,520

um five seconds oh

768

00:30:45,350 --> 00:30:43,120

switching to geico could save you a

769

00:30:46,389 --> 00:30:45,360

bunch of money on car insurance

770

00:30:48,070 --> 00:30:46,399

okay

771

00:30:50,070 --> 00:30:48,080

judges

772

00:30:53,590 --> 00:30:50,080

that's true kevin they'll allow it

773

00:30:55,990 --> 00:30:53,600

congratulations you're a winner

774

00:30:58,630 --> 00:30:56,000

geico because saving 15 or more on car

775

00:31:00,870 --> 00:30:58,640

insurance is always a great answer

776

00:31:03,190 --> 00:31:00,880

who's in the house tonight

777

00:31:05,350 --> 00:31:03,200

announcer william pritchard

778

00:31:08,789 --> 00:31:05,360

music by matt stems

779

00:31:11,430 --> 00:31:08,799

producer michael m j lucas

780

00:31:13,029 --> 00:31:11,440

webmaster joe champion

781

00:31:14,950 --> 00:31:13,039

and of course to god for granting us

782

00:31:17,029 --> 00:31:14,960

this wonderful show and opportunity here

783

00:31:18,789 --> 00:31:17,039

to be with you all

784

00:31:21,669 --> 00:31:18,799

this segment is brought to you by lucas

785

00:31:25,990 --> 00:31:21,679

wellness the ufo wisconsin research team

786

00:31:27,590 --> 00:31:26,000

and the zombie plesiosaur society

787

00:31:31,110 --> 00:31:27,600

we also have three periversal universe

788

00:31:33,190 --> 00:31:31,120

like pages uh so check those out

789

00:31:35,350 --> 00:31:33,200

as well as uh

790

00:31:36,710 --> 00:31:35,360

jennifer's like page

791

00:31:39,830 --> 00:31:36,720

uh

792

00:31:41,350 --> 00:31:39,840

jennifer malek psychic demonologist

793

00:31:44,230 --> 00:31:41,360

and the northern wisconsin paranormal

794

00:31:45,909 --> 00:31:44,240

society limited like page

795

00:31:48,310 --> 00:31:45,919

uh we also have two group pages worth

796

00:31:49,830 --> 00:31:48,320

noting lake monstrosities

797

00:31:52,070 --> 00:31:49,840

which is the largest group page on

798

00:31:54,549 --> 00:31:52,080

facebook for aquatic mysteries and

799

00:31:56,710 --> 00:31:54,559

finally ultimate conspiracies which is

800

00:31:58,470 --> 00:31:56,720

pretty much self-explanatory

801
00:32:02,310 --> 00:31:58,480
uh if you have any questions

802
00:32:04,789 --> 00:32:02,320
for a guest go to ironchat.com

803
00:32:06,310 --> 00:32:04,799
uh to go to our live iron chat room

804
00:32:07,669 --> 00:32:06,320
where you can post questions and make

805
00:32:10,870 --> 00:32:07,679
comments

806
00:32:12,549 --> 00:32:10,880
uh general pass those along

807
00:32:15,509 --> 00:32:12,559
next week

808
00:32:17,750 --> 00:32:15,519
on reversal universe is the paranormal

809
00:32:19,990 --> 00:32:17,760
blender newshour

810
00:32:22,549 --> 00:32:20,000
uh at the end of every month we do a

811
00:32:25,830 --> 00:32:22,559
newscast uh covering

812
00:32:29,430 --> 00:32:25,840
uh the paranormal supernatural esoteric

813
00:32:31,430 --> 00:32:29,440

14 and ultra bizarre

814

00:32:33,269 --> 00:32:31,440

so check that out that will be for the

815

00:32:34,230 --> 00:32:33,279

month of july

816

00:32:36,549 --> 00:32:34,240

okay

817

00:32:38,950 --> 00:32:36,559

let's bring our guests back

818

00:32:41,750 --> 00:32:38,960

ready yes

819

00:32:43,750 --> 00:32:41,760

are you guys still with us

820

00:32:44,710 --> 00:32:43,760

yes still here

821

00:32:45,430 --> 00:32:44,720

awesome

822

00:32:47,509 --> 00:32:45,440

so

823

00:32:51,110 --> 00:32:47,519

uh right when we went to commercial

824

00:32:53,509 --> 00:32:51,120

uh we were talking uh during the break

825

00:32:55,110 --> 00:32:53,519

and uh why don't we uh

826

00:32:56,630 --> 00:32:55,120

start with that

827

00:32:58,389 --> 00:32:56,640

um

828

00:33:00,310 --> 00:32:58,399

i'll go ahead

829

00:33:03,190 --> 00:33:00,320

yeah um one of the things i we i'd like

830

00:33:05,430 --> 00:33:03,200

to add also um you know we're not just

831

00:33:06,310 --> 00:33:05,440

taking uh pictures with the sonar

832

00:33:08,710 --> 00:33:06,320

um

833

00:33:10,549 --> 00:33:08,720

and scott and i are are you know we're

834

00:33:13,029 --> 00:33:10,559

pretty knowledgeable about sonar and the

835

00:33:15,830 --> 00:33:13,039

frequencies and things like that um but

836

00:33:18,389 --> 00:33:15,840

we realize that uh there's there's some

837

00:33:19,269 --> 00:33:18,399

other possible things in that uh sonar

838

00:33:21,029 --> 00:33:19,279

image

839

00:33:23,350 --> 00:33:21,039

um so what we're doing is actually

840

00:33:26,149 --> 00:33:23,360

taking the images and going right to

841

00:33:27,750 --> 00:33:26,159

garmin i have a contact through garmin

842

00:33:29,029 --> 00:33:27,760

he's going to bring it up the chain of

843

00:33:29,750 --> 00:33:29,039

command there

844

00:33:31,669 --> 00:33:29,760

so we're going to have some

845

00:33:33,909 --> 00:33:31,679

professionals look at it and try to give

846

00:33:35,430 --> 00:33:33,919

us a better estimate of what it is

847

00:33:39,110 --> 00:33:35,440

uh the density

848

00:33:40,950 --> 00:33:39,120

of the object of the sonar hit so um you

849

00:33:42,630 --> 00:33:40,960

know even though we've got the photos

850

00:33:44,389 --> 00:33:42,640

and things like that we're still trying

851
00:33:46,230 --> 00:33:44,399
to figure out exactly what it is so we

852
00:33:48,310 --> 00:33:46,240
could determine

853
00:33:49,430 --> 00:33:48,320
the makeup and structure and things like

854
00:33:51,029 --> 00:33:49,440
that so we're bringing it right to

855
00:33:53,430 --> 00:33:51,039
garmin to let them

856
00:33:55,509 --> 00:33:53,440
um determine what those those radar hits

857
00:33:57,430 --> 00:33:55,519
are the interpretive process is every

858
00:33:59,350 --> 00:33:57,440
bit as important as the data gathering

859
00:34:00,310 --> 00:33:59,360
process

860
00:34:02,389 --> 00:34:00,320
right

861
00:34:04,149 --> 00:34:02,399
yeah and the same thing with the

862
00:34:05,669 --> 00:34:04,159
go ahead

863
00:34:07,269 --> 00:34:05,679

no just that that's awesome that's

864

00:34:08,470 --> 00:34:07,279

awesome to hear that and that's the

865

00:34:10,710 --> 00:34:08,480

thing to do yeah you're right that's

866

00:34:13,829 --> 00:34:10,720

absolutely the thing yeah

867

00:34:15,589 --> 00:34:13,839

and we're also going to be the evidence

868

00:34:18,149 --> 00:34:15,599

in order for the evidence to really mean

869

00:34:20,230 --> 00:34:18,159

something it's got to be properly vetted

870

00:34:22,710 --> 00:34:20,240

and all possible alternative

871

00:34:24,629 --> 00:34:22,720

interpretations other than an animal

872

00:34:26,389 --> 00:34:24,639

have to be explored before you can make

873

00:34:30,069 --> 00:34:26,399

the case for it being

874

00:34:32,629 --> 00:34:30,079

an animal that we haven't found yet

875

00:34:35,430 --> 00:34:32,639

which is good solid yeah

876

00:34:37,750 --> 00:34:35,440

yeah and also the audio um that we have

877

00:34:39,510 --> 00:34:37,760

from the hydrophones uh that's gonna be

878

00:34:42,470 --> 00:34:39,520

turned over to a professional because we

879

00:34:44,790 --> 00:34:42,480

do have um wave sounds hitting the boat

880

00:34:46,710 --> 00:34:44,800

uh wind sounds from the antennas things

881

00:34:48,470 --> 00:34:46,720

like that also that were transferred

882

00:34:50,950 --> 00:34:48,480

into the water

883

00:34:52,389 --> 00:34:50,960

engine sounds from a distant boat

884

00:34:53,909 --> 00:34:52,399

so we're actually going to have a

885

00:34:56,710 --> 00:34:53,919

professional do that

886

00:34:58,630 --> 00:34:56,720

and try to clean it up even better than

887

00:35:00,390 --> 00:34:58,640

what scott did

888

00:35:03,750 --> 00:35:00,400

because the information is there it just

889

00:35:07,990 --> 00:35:03,760

has to be extracted yeah the fishes in

890

00:35:13,510 --> 00:35:11,430

right the freshwater drum fish makes

891

00:35:15,670 --> 00:35:13,520

sounds that sounds like a giant bullfrog

892

00:35:17,510 --> 00:35:15,680

croaking

893

00:35:20,150 --> 00:35:17,520

sturgeons can make sounds that sound

894

00:35:22,630 --> 00:35:20,160

like beluga whales chirping sounds

895

00:35:25,190 --> 00:35:22,640

so there's all sorts of you know

896

00:35:28,069 --> 00:35:25,200

possible uh red herrings

897

00:35:30,390 --> 00:35:28,079

in the lake that we know about you know

898

00:35:32,150 --> 00:35:30,400

right yep

899

00:35:33,829 --> 00:35:32,160

yeah we did have some issues

900

00:35:35,829 --> 00:35:33,839

initially with the um

901
00:35:37,829 --> 00:35:35,839
what what would have happened uh with

902
00:35:39,990 --> 00:35:37,839
the the sd card

903
00:35:42,390 --> 00:35:40,000
um i i thought i had put that into the

904
00:35:44,150 --> 00:35:42,400
unit to do the digital snapshots um from

905
00:35:45,270 --> 00:35:44,160
the onto the sd card right from the

906
00:35:48,069 --> 00:35:45,280
monitor

907
00:35:49,670 --> 00:35:48,079
um but i neglected to put that in i was

908
00:35:52,150 --> 00:35:49,680
planning on having at least a week to

909
00:35:53,109 --> 00:35:52,160
two weeks of sort of sea trials

910
00:35:55,670 --> 00:35:53,119
um

911
00:35:57,430 --> 00:35:55,680
to get used to the sonar

912
00:35:59,829 --> 00:35:57,440
but because of some

913
00:36:01,510 --> 00:35:59,839

maintenance work i had done

914

00:36:04,150 --> 00:36:01,520

they sort of messed up a little bit and

915

00:36:05,030 --> 00:36:04,160

i had to end up replacing the outdrive

916

00:36:07,270 --> 00:36:05,040

which

917

00:36:09,190 --> 00:36:07,280

cost about another two weeks

918

00:36:10,790 --> 00:36:09,200

so it was really once the boat work was

919

00:36:12,390 --> 00:36:10,800

done it was

920

00:36:14,230 --> 00:36:12,400

straight up to the lake i didn't have

921

00:36:16,310 --> 00:36:14,240

any time for any trials

922

00:36:18,550 --> 00:36:16,320

um so we sort of learned as we go but we

923

00:36:20,550 --> 00:36:18,560

learned quickly we did fix that problem

924

00:36:21,829 --> 00:36:20,560

we got the sd card in there and

925

00:36:24,710 --> 00:36:21,839

throughout the rest of the time of the

926

00:36:26,390 --> 00:36:24,720

lake we did get a lot of images

927

00:36:27,829 --> 00:36:26,400

screenshots

928

00:36:29,589 --> 00:36:27,839

through the rest of the lake so we got a

929

00:36:31,030 --> 00:36:29,599

lot of a lot of good stuff it's just a

930

00:36:33,349 --> 00:36:31,040

matter of going through it

931

00:36:35,349 --> 00:36:33,359

and having the professionals look at it

932

00:36:38,150 --> 00:36:35,359

and determine what those hits really

933

00:36:40,630 --> 00:36:38,160

really oddball bottom topography too in

934

00:36:42,390 --> 00:36:40,640

the deep part of the lake things that

935

00:36:44,310 --> 00:36:42,400

look like you know

936

00:36:46,630 --> 00:36:44,320

castles out of a science fiction movie

937

00:36:49,030 --> 00:36:46,640

or something

938

00:36:50,630 --> 00:36:49,040

you know i'm serious yeah that was that

939

00:36:52,230 --> 00:36:50,640

was pretty awesome

940

00:36:53,990 --> 00:36:52,240

yeah i mean they look like castles and

941

00:36:55,030 --> 00:36:54,000

all kinds of weird you know and it's

942

00:36:58,550 --> 00:36:55,040

it's not

943

00:37:00,390 --> 00:36:58,560

imagining some kind of sea monster

944

00:37:02,630 --> 00:37:00,400

sitting on top of this

945

00:37:05,510 --> 00:37:02,640

weird rock formation you know kind of

946

00:37:07,670 --> 00:37:05,520

romantic yeah

947

00:37:10,230 --> 00:37:07,680

yeah yeah we hit the

948

00:37:11,829 --> 00:37:10,240

thunderstorms lightning storms

949

00:37:13,990 --> 00:37:11,839

my god it was a

950

00:37:16,310 --> 00:37:14,000

an onslaught of environmental stuff

951
00:37:19,510 --> 00:37:16,320
going on up there it was um and remember

952
00:37:20,870 --> 00:37:19,520
pretty amazing weird fog bank

953
00:37:22,390 --> 00:37:20,880
yep

954
00:37:24,150 --> 00:37:22,400
yeah that was yeah that was that was

955
00:37:26,790 --> 00:37:24,160
intense that was uh

956
00:37:28,790 --> 00:37:26,800
actually that was really neat um we got

957
00:37:30,870 --> 00:37:28,800
some good video of that some snapshots

958
00:37:32,550 --> 00:37:30,880
uh that'll be coming out later but uh

959
00:37:34,390 --> 00:37:32,560
yeah we were totally immersed in the fog

960
00:37:36,790 --> 00:37:34,400
bank um

961
00:37:38,950 --> 00:37:36,800
it was it was just amazing how cool how

962
00:37:41,589 --> 00:37:38,960
cool the air turned once we got in there

963
00:37:43,030 --> 00:37:41,599

uh it was actually pretty cold but um

964

00:37:44,950 --> 00:37:43,040

very very eerie when you're when you're

965

00:37:47,510 --> 00:37:44,960

looking for a lake monster and you're in

966

00:37:49,270 --> 00:37:47,520

a fog bank it's it's a little scary but

967

00:37:51,349 --> 00:37:49,280

it was fun it was we were enjoyable we

968

00:37:54,069 --> 00:37:51,359

were out the deepest part of the lake i

969

00:37:56,150 --> 00:37:54,079

mean the 400 foot depths

970

00:37:58,150 --> 00:37:56,160

and then we we went to this this

971

00:37:59,829 --> 00:37:58,160

gigantic rock wall they called the

972

00:38:02,069 --> 00:37:59,839

palisades

973

00:38:03,670 --> 00:38:02,079

just breathtaking

974

00:38:07,349 --> 00:38:03,680

yeah

975

00:38:09,109 --> 00:38:07,359

lawrence demisa is saying uh that you

976

00:38:10,870 --> 00:38:09,119

guys haven't completed all the work

977

00:38:12,950 --> 00:38:10,880

you've done yet in the past few weeks

978

00:38:14,710 --> 00:38:12,960

it'll probably take you a couple uh uh

979

00:38:17,910 --> 00:38:14,720

another couple months to get the results

980

00:38:19,990 --> 00:38:17,920

back yeah exactly i just got back from

981

00:38:22,069 --> 00:38:20,000

vermont on wednesday

982

00:38:23,270 --> 00:38:22,079

two days ago so i'm just you know i

983

00:38:26,950 --> 00:38:23,280

spent

984

00:38:29,670 --> 00:38:26,960

uh all day today and probably

985

00:38:32,390 --> 00:38:29,680

half of wednesday

986

00:38:33,990 --> 00:38:32,400

or yesterday and most of the day and

987

00:38:36,390 --> 00:38:34,000

part of wednesday

988

00:38:39,510 --> 00:38:36,400

trying to to you know interpret some of

989

00:38:41,349 --> 00:38:39,520

this stuff to get ready for this program

990

00:38:43,670 --> 00:38:41,359

if you guys want to have us back on a

991

00:38:47,030 --> 00:38:43,680

couple of weeks i you know i'm game

992

00:38:51,430 --> 00:38:48,150

it was either

993

00:38:53,670 --> 00:38:51,440

get you on now this week or

994

00:38:55,349 --> 00:38:53,680

get you on in uh

995

00:38:57,190 --> 00:38:55,359

the middle of september

996

00:38:58,230 --> 00:38:57,200

because everything else is booked so

997

00:38:59,990 --> 00:38:58,240

that's why

998

00:39:01,589 --> 00:39:00,000

when i found out it's like oh you know

999

00:39:04,150 --> 00:39:01,599

it would be ideally right we should have

1000

00:39:05,430 --> 00:39:04,160

waited another one but we i understand

1001
00:39:06,950 --> 00:39:05,440
so yeah

1002
00:39:08,550 --> 00:39:06,960
at some point

1003
00:39:10,310 --> 00:39:08,560
well yeah well

1004
00:39:13,030 --> 00:39:10,320
well yeah you know whenever you guys

1005
00:39:15,670 --> 00:39:13,040
don't have us back on i'm sure we're

1006
00:39:16,710 --> 00:39:15,680
we're we're up for it so yeah at some

1007
00:39:19,190 --> 00:39:16,720
point

1008
00:39:21,190 --> 00:39:19,200
should have him back on for part two

1009
00:39:22,870 --> 00:39:21,200
oh we you know we uh

1010
00:39:25,270 --> 00:39:22,880
you guys are awesome zombie please just

1011
00:39:28,310 --> 00:39:25,280
search society um yeah

1012
00:39:30,790 --> 00:39:28,320
and uh yeah absolutely in fact we want

1013
00:39:32,390 --> 00:39:30,800

you know we want to also do uh

1014

00:39:34,630 --> 00:39:32,400

every year we do a late monstrosity show

1015

00:39:35,910 --> 00:39:34,640

where we just talk about what's going on

1016

00:39:37,030 --> 00:39:35,920

with uh

1017

00:39:39,190 --> 00:39:37,040

um

1018

00:39:43,510 --> 00:39:39,200

you know uh

1019

00:39:45,670 --> 00:39:43,520

your aquatic mysteries you know yeah 17

1020

00:39:48,150 --> 00:39:45,680

or whatever so uh

1021

00:39:49,270 --> 00:39:48,160

we usually gather a panel for that so

1022

00:39:52,150 --> 00:39:49,280

you know

1023

00:39:53,670 --> 00:39:52,160

whatever whatever this blob object was

1024

00:39:55,270 --> 00:39:53,680

it's very important to this whole

1025

00:39:58,150 --> 00:39:55,280

question because

1026

00:40:00,069 --> 00:39:58,160

you know it's it's shaped

1027

00:40:01,990 --> 00:40:00,079

like one of these like monsters if it is

1028

00:40:03,589 --> 00:40:02,000

when the lake monsters is an important

1029

00:40:06,230 --> 00:40:03,599

piece of evidence

1030

00:40:08,550 --> 00:40:06,240

if it's not one of these lake monsters

1031

00:40:09,430 --> 00:40:08,560

if it's a piece of wood debris it's

1032

00:40:12,550 --> 00:40:09,440

still

1033

00:40:15,670 --> 00:40:12,560

of coincidentally relevant shape

1034

00:40:17,829 --> 00:40:15,680

and is an example of

1035

00:40:20,950 --> 00:40:17,839

natural phenomena that can be mistaken

1036

00:40:23,190 --> 00:40:20,960

for a lake monster so either way

1037

00:40:25,270 --> 00:40:23,200

either interpretation makes it important

1038

00:40:27,589 --> 00:40:25,280

to this whole question

1039

00:40:30,150 --> 00:40:27,599

we totally applaud the effort you guys

1040

00:40:31,510 --> 00:40:30,160

have put into this oh yeah certainly

1041

00:40:33,109 --> 00:40:31,520

absolutely and people don't realize how

1042

00:40:34,790 --> 00:40:33,119

long it takes to go through evidence

1043

00:40:36,150 --> 00:40:34,800

once you go and collect it

1044

00:40:37,670 --> 00:40:36,160

uh yeah

1045

00:40:39,990 --> 00:40:37,680

yeah it's you know

1046

00:40:43,190 --> 00:40:40,000

you can go with the best

1047

00:40:44,710 --> 00:40:43,200

of equipment and technology and the best

1048

00:40:46,470 --> 00:40:44,720

preparations

1049

00:40:48,710 --> 00:40:46,480

and there's always some

1050

00:40:49,910 --> 00:40:48,720

you know unknown factor like mechanical

1051

00:40:54,470 --> 00:40:49,920

problems

1052

00:40:55,990 --> 00:40:54,480

all sorts of things

1053

00:40:57,910 --> 00:40:56,000

that can throw a monkey wrench and

1054

00:40:59,270 --> 00:40:57,920

everything you know

1055

00:41:00,790 --> 00:40:59,280

um

1056

00:41:02,710 --> 00:41:00,800

considering all the things that could

1057

00:41:08,390 --> 00:41:02,720

have gone wrong i thought we did pretty

1058

00:41:10,150 --> 00:41:09,190

yeah

1059

00:41:11,430 --> 00:41:10,160

um

1060

00:41:13,670 --> 00:41:11,440

and you never know when something's

1061

00:41:15,589 --> 00:41:13,680

gonna happen like the the japanese

1062

00:41:18,150 --> 00:41:15,599

expedition november

1063

00:41:21,030 --> 00:41:18,160

we got that weird footage of that blob

1064

00:41:23,030 --> 00:41:21,040

looking thing coming up trying to take

1065

00:41:24,230 --> 00:41:23,040

that piece of salmon

1066

00:41:26,069 --> 00:41:24,240

you know

1067

00:41:28,309 --> 00:41:26,079

we didn't know about that until we after

1068

00:41:29,750 --> 00:41:28,319

we got back

1069

00:41:31,750 --> 00:41:29,760

and looked at the underwater camera

1070

00:41:33,109 --> 00:41:31,760

footage you know we didn't see that live

1071

00:41:34,870 --> 00:41:33,119

we didn't know about it until after it

1072

00:41:37,430 --> 00:41:34,880

happened so

1073

00:41:40,950 --> 00:41:37,440

you just never know you know

1074

00:41:42,870 --> 00:41:40,960

you know just going just you know uh

1075

00:41:44,630 --> 00:41:42,880

getting the boat getting the gear

1076

00:41:46,230 --> 00:41:44,640

understanding how the gear works

1077

00:41:47,829 --> 00:41:46,240

understanding the photography of the

1078

00:41:50,230 --> 00:41:47,839

lake

1079

00:41:52,630 --> 00:41:50,240

all the factors that are involved going

1080

00:41:55,030 --> 00:41:52,640

out there doing the research

1081

00:41:57,910 --> 00:41:55,040

uh using all the equipment

1082

00:41:59,670 --> 00:41:57,920

uh collecting the data that's i mean

1083

00:42:02,309 --> 00:41:59,680

that that is uh

1084

00:42:04,150 --> 00:42:02,319

it's easier said than done and uh yeah

1085

00:42:07,190 --> 00:42:04,160

so we absolutely you know

1086

00:42:09,589 --> 00:42:07,200

we no we do we applaud you you know um

1087

00:42:13,349 --> 00:42:09,599

we have a uh

1088

00:42:16,390 --> 00:42:13,359

nwps paralogical uh a para crypto

1089

00:42:17,910 --> 00:42:16,400

geological expedition coming up and it

1090

00:42:19,030 --> 00:42:17,920

takes a lot of planning i mean them

1091

00:42:20,309 --> 00:42:19,040

things are

1092

00:42:21,990 --> 00:42:20,319

of course we're not on the water but

1093

00:42:24,230 --> 00:42:22,000

it's it's the same idea of just going

1094

00:42:25,670 --> 00:42:24,240

out and making sure you know trying to

1095

00:42:27,589 --> 00:42:25,680

troubleshoot anything that's gonna

1096

00:42:29,510 --> 00:42:27,599

happen and then you know collecting what

1097

00:42:31,030 --> 00:42:29,520

you can and bringing it back and and

1098

00:42:31,990 --> 00:42:31,040

hopefully

1099

00:42:37,270 --> 00:42:32,000

you'll

1100

00:42:40,790 --> 00:42:37,280

well november will mark

1101

00:42:43,030 --> 00:42:40,800

25 years since my first

1102

00:42:44,950 --> 00:42:43,040

trip to lake champlain so that will make

1103

00:42:45,910 --> 00:42:44,960

25 years i've been looking for this

1104

00:42:49,589 --> 00:42:45,920

thing

1105

00:42:52,710 --> 00:42:49,599

and i've only seen it i think one time

1106

00:42:53,510 --> 00:42:52,720

in 1994. i've never seen anything since

1107

00:42:55,910 --> 00:42:53,520

but

1108

00:42:58,069 --> 00:42:55,920

the one sighting i did have

1109

00:43:00,069 --> 00:42:58,079

you know remains with me and i believe

1110

00:43:02,550 --> 00:43:00,079

it was a weird animal so

1111

00:43:06,790 --> 00:43:04,150

yeah okay

1112

00:43:09,030 --> 00:43:06,800

um so

1113

00:43:10,790 --> 00:43:09,040

i'm sorry go ahead

1114

00:43:12,630 --> 00:43:10,800

oh okay yeah i'll be real quick one one

1115

00:43:14,710 --> 00:43:12,640

thing that was very important um one of

1116

00:43:16,470 --> 00:43:14,720

the main reasons too i went up

1117

00:43:18,950 --> 00:43:16,480

was i was very intrigued about the

1118

00:43:21,510 --> 00:43:18,960

beaudette footage um with the abc news

1119

00:43:23,109 --> 00:43:21,520

footage um i did some enhancements to

1120

00:43:25,109 --> 00:43:23,119

that um

1121

00:43:26,870 --> 00:43:25,119

determined that there was something some

1122

00:43:28,950 --> 00:43:26,880

type of creature down below

1123

00:43:32,230 --> 00:43:28,960

that had flippers they were about four

1124

00:43:34,550 --> 00:43:32,240

and a half to five feet long

1125

00:43:35,670 --> 00:43:34,560

they were actually very mobile and they

1126

00:43:38,309 --> 00:43:35,680

provided

1127

00:43:40,870 --> 00:43:38,319

propulsion and direction

1128

00:43:44,069 --> 00:43:40,880

in one in one thrust of the flipper

1129

00:43:45,670 --> 00:43:44,079

um but anyway i ended up calling up um

1130

00:43:47,910 --> 00:43:45,680

we got the number uh scott got the

1131

00:43:50,710 --> 00:43:47,920

number for the attorney i called him up

1132

00:43:52,950 --> 00:43:50,720

um after a few conversations he invited

1133

00:43:54,790 --> 00:43:52,960

me up to look at the video footage up at

1134

00:43:56,950 --> 00:43:54,800

his office in new jersey

1135

00:43:59,270 --> 00:43:56,960

um that was back in december of last

1136

00:44:00,950 --> 00:43:59,280

year and it it was about a three to four

1137

00:44:03,990 --> 00:44:00,960

hour trip to get up there

1138

00:44:05,510 --> 00:44:04,000

um spent about three hours um talking to

1139

00:44:06,630 --> 00:44:05,520

him and his wife and viewing the footage

1140

00:44:09,109 --> 00:44:06,640

and he let me

1141

00:44:10,470 --> 00:44:09,119

control the forward reverse stop all

1142

00:44:11,910 --> 00:44:10,480

that sort of stuff

1143

00:44:15,030 --> 00:44:11,920

um

1144

00:44:17,829 --> 00:44:15,040

it's the foot the footage is is okay

1145

00:44:20,150 --> 00:44:17,839

it's not that clear there's a lot of uh

1146

00:44:22,630 --> 00:44:20,160

camera movement in and out of focus the

1147

00:44:24,710 --> 00:44:22,640

autofocus was on and it was wasn't doing

1148

00:44:26,950 --> 00:44:24,720

a great job

1149

00:44:28,470 --> 00:44:26,960

the batteries were going low

1150

00:44:29,829 --> 00:44:28,480

there was a lot of factors involved they

1151

00:44:31,589 --> 00:44:29,839

weren't ready for something like that

1152

00:44:34,230 --> 00:44:31,599

they didn't have a

1153

00:44:35,589 --> 00:44:34,240

uv filter a polarizer filter on the

1154

00:44:37,589 --> 00:44:35,599

camera at all either it would have made

1155

00:44:39,510 --> 00:44:37,599

for much better footage

1156

00:44:40,630 --> 00:44:39,520

but that's that's underwater under the

1157

00:44:42,390 --> 00:44:40,640

bridge really

1158

00:44:43,750 --> 00:44:42,400

um but what i saw with the rest of the

1159

00:44:46,470 --> 00:44:43,760

video and i'm not going to go into the

1160

00:44:50,790 --> 00:44:46,480

exact details uh because i do respect

1161

00:44:55,030 --> 00:44:53,190

what i saw was some type of prehistoric

1162

00:44:57,589 --> 00:44:55,040

creature that looks very much like a

1163

00:44:59,430 --> 00:44:57,599

plesiosaur

1164

00:45:03,589 --> 00:44:59,440

and that's

1165

00:45:05,109 --> 00:45:03,599

different parts of the footage it's all

1166

00:45:07,670 --> 00:45:05,119

it's not like it comes out of the water

1167

00:45:09,990 --> 00:45:07,680

and you go wow there's a plesiosaur um

1168

00:45:12,790 --> 00:45:10,000

it's everything that's taken

1169

00:45:15,430 --> 00:45:12,800

um separately but once you add up the uh

1170

00:45:17,349 --> 00:45:15,440

the flipper wakes that it produces uh

1171

00:45:18,870 --> 00:45:17,359

the distance between the wakes uh the

1172

00:45:20,870 --> 00:45:18,880

head size the

1173

00:45:23,430 --> 00:45:20,880

the little bow wave

1174

00:45:24,470 --> 00:45:23,440

by the head and then also a another bow

1175

00:45:26,950 --> 00:45:24,480

wave

1176

00:45:28,390 --> 00:45:26,960

about a foot or so in front of it uh

1177

00:45:30,069 --> 00:45:28,400

meaning there's something else under the

1178

00:45:31,349 --> 00:45:30,079

water that's that's pushing through and

1179

00:45:33,589 --> 00:45:31,359

creating a wake

1180

00:45:35,510 --> 00:45:33,599

um these little things add up and the

1181

00:45:37,349 --> 00:45:35,520

dexterity of the flippers

1182

00:45:38,870 --> 00:45:37,359

to me was the

1183

00:45:41,109 --> 00:45:38,880

was the holy grail there because you

1184

00:45:43,109 --> 00:45:41,119

could see it move you could see it turn

1185

00:45:43,990 --> 00:45:43,119

uh you could see it cup itself and then

1186

00:45:47,190 --> 00:45:44,000

push

1187

00:45:49,190 --> 00:45:47,200

and from there um expressions and their

1188

00:45:51,030 --> 00:45:49,200

talking when it was coming towards them

1189

00:45:52,470 --> 00:45:51,040

you could you understood that the thing

1190

00:45:54,710 --> 00:45:52,480

was coming towards the boat and they

1191

00:45:57,030 --> 00:45:54,720

were scared and at the last minute it

1192

00:45:58,390 --> 00:45:57,040

used its flippers to push down to go

1193

00:46:00,710 --> 00:45:58,400

underneath the boat

1194

00:46:02,710 --> 00:46:00,720

and the body was still on one side of

1195

00:46:04,470 --> 00:46:02,720

the boat where the flippers were

1196

00:46:06,069 --> 00:46:04,480

and from what they said on the video

1197

00:46:08,470 --> 00:46:06,079

what looked like a head coming out the

1198

00:46:11,430 --> 00:46:08,480

other side had a neck uh the beam on

1199

00:46:13,430 --> 00:46:11,440

that boat is about eight feet um six to

1200

00:46:14,870 --> 00:46:13,440

probably around seven eight feet on that

1201

00:46:16,150 --> 00:46:14,880

particular boat so you're talking

1202

00:46:17,990 --> 00:46:16,160

something with a

1203

00:46:19,030 --> 00:46:18,000

six to eight foot long neck

1204

00:46:21,430 --> 00:46:19,040

um

1205

00:46:24,150 --> 00:46:21,440

which is amazing in itself so they they

1206

00:46:25,190 --> 00:46:24,160

thought it was about 18 to 20 feet long

1207

00:46:27,510 --> 00:46:25,200

um

1208

00:46:29,510 --> 00:46:27,520

they i i was going under the

1209

00:46:30,950 --> 00:46:29,520

assumption i tried to get them to let me

1210

00:46:32,630 --> 00:46:30,960

enhance it i do a lot of video

1211

00:46:35,109 --> 00:46:32,640

enhancement work and have some

1212

00:46:36,309 --> 00:46:35,119

specialized equipment for that

1213

00:46:38,630 --> 00:46:36,319

and that's what got me in the door in

1214

00:46:40,710 --> 00:46:38,640

the first place but once they sent the

1215

00:46:43,030 --> 00:46:40,720

nda agreement non-disclosure agreement

1216

00:46:46,790 --> 00:46:43,040

to me um

1217

00:46:48,870 --> 00:46:46,800

it was uh very direct and

1218

00:46:50,550 --> 00:46:48,880

um

1219

00:46:52,150 --> 00:46:50,560

it wasn't something i wanted to sign i

1220

00:46:53,670 --> 00:46:52,160

didn't feel comfortable doing it i'm in

1221

00:46:57,190 --> 00:46:53,680

this for

1222

00:46:58,790 --> 00:46:57,200

uh you know sort of the science but

1223

00:46:59,990 --> 00:46:58,800

you know when you when you sign a legal

1224

00:47:01,430 --> 00:47:00,000

document

1225

00:47:03,750 --> 00:47:01,440

anything could happen and i'm just not

1226

00:47:06,470 --> 00:47:03,760

going to put myself in jeopardy uh for

1227

00:47:09,270 --> 00:47:06,480

any reason um

1228

00:47:11,270 --> 00:47:09,280

uh and it was i was upset that i

1229

00:47:13,510 --> 00:47:11,280

couldn't sign it but i know how those

1230

00:47:16,870 --> 00:47:13,520

documents work and if if something leaks

1231

00:47:19,349 --> 00:47:16,880

out um you'll be the first one they uh

1232

00:47:21,829 --> 00:47:19,359

send the certified letters to so

1233

00:47:23,750 --> 00:47:21,839

um well maybe decline maybe with further

1234

00:47:26,950 --> 00:47:23,760

further negotiations you might be able

1235

00:47:29,349 --> 00:47:26,960

to work these problems out i hope so

1236

00:47:31,750 --> 00:47:29,359

yeah yeah i have the request in that i

1237

00:47:33,589 --> 00:47:31,760

could go up to use their computer

1238

00:47:36,309 --> 00:47:33,599

to do the enhancements and things so i

1239

00:47:38,150 --> 00:47:36,319

don't take any hard copies with me or

1240

00:47:39,750 --> 00:47:38,160

electronic files with me they stay right

1241

00:47:41,589 --> 00:47:39,760

there because that's the thing if

1242

00:47:43,190 --> 00:47:41,599

a file gets lost or

1243

00:47:45,190 --> 00:47:43,200

hacked or something it gets out there

1244

00:47:47,030 --> 00:47:45,200

and it has to do with that you know it's

1245

00:47:47,910 --> 00:47:47,040

a lawsuit and i don't want to go through

1246

00:47:49,829 --> 00:47:47,920

that

1247

00:47:51,990 --> 00:47:49,839

i don't blame you so but the door is

1248

00:47:53,589 --> 00:47:52,000

still open uh i let them know they they

1249

00:47:54,950 --> 00:47:53,599

know what they have

1250

00:47:56,550 --> 00:47:54,960

there's a few things that they didn't

1251

00:47:58,790 --> 00:47:56,560

know that were on the film that i

1252

00:48:00,230 --> 00:47:58,800

suggested and they were pretty excited

1253

00:48:01,349 --> 00:48:00,240

going wow we didn't even notice that

1254

00:48:02,150 --> 00:48:01,359

before

1255

00:48:04,069 --> 00:48:02,160

so

1256

00:48:06,069 --> 00:48:04,079

hopefully it will keep the door open and

1257

00:48:07,510 --> 00:48:06,079

be able to do some more um enhancement

1258

00:48:08,870 --> 00:48:07,520

with that footage but

1259

00:48:10,470 --> 00:48:08,880

um

1260

00:48:12,069 --> 00:48:10,480

it's and that's that was our thing to

1261

00:48:14,230 --> 00:48:12,079

try to get more footage

1262

00:48:17,109 --> 00:48:14,240

um unfortunately the the water clarity

1263

00:48:19,109 --> 00:48:17,119

was terrible and um the creatures didn't

1264

00:48:21,349 --> 00:48:19,119

present themselves but uh yeah we tried

1265

00:48:23,910 --> 00:48:21,359

we definitely gave it our best shot we

1266

00:48:26,069 --> 00:48:23,920

learned a lot

1267

00:48:28,150 --> 00:48:26,079

there's a lot of other possibilities um

1268

00:48:29,750 --> 00:48:28,160

designing

1269

00:48:31,670 --> 00:48:29,760

automated systems

1270

00:48:33,030 --> 00:48:31,680

uh autonomous recording systems that

1271

00:48:35,109 --> 00:48:33,040

could be dropped and left there for a

1272

00:48:38,470 --> 00:48:35,119

month or two which would be the way to

1273

00:48:39,670 --> 00:48:38,480

go for uh doing um hydrophone recording

1274

00:48:41,270 --> 00:48:39,680

where you don't have to be there

1275

00:48:43,190 --> 00:48:41,280

listening and recording on the boat you

1276

00:48:44,710 --> 00:48:43,200

just drop these things in the water come

1277

00:48:47,270 --> 00:48:44,720

back a month later retrieve them

1278

00:48:49,349 --> 00:48:47,280

download the audio and go from there so

1279

00:48:50,309 --> 00:48:49,359

it's it's been a learning curve

1280

00:48:52,150 --> 00:48:50,319

um

1281

00:48:54,230 --> 00:48:52,160

really getting out in the water is huge

1282

00:48:56,150 --> 00:48:54,240

uh instead of on the shore we learned

1283

00:48:57,829 --> 00:48:56,160

quite a bit uh we also hit all the

1284

00:48:58,870 --> 00:48:57,839

mechanical problems with the boat the

1285

00:49:01,190 --> 00:48:58,880

trailer

1286

00:49:02,870 --> 00:49:01,200

um but you know we ironed out a lot of

1287

00:49:04,870 --> 00:49:02,880

those things so

1288

00:49:06,470 --> 00:49:04,880

the evolution is there and

1289

00:49:08,390 --> 00:49:06,480

we're you know it's

1290

00:49:09,270 --> 00:49:08,400

it's got a bright future for research up

1291

00:49:11,510 --> 00:49:09,280

there

1292

00:49:12,790 --> 00:49:11,520

well the plan is to return at some point

1293

00:49:14,549 --> 00:49:12,800

maybe not

1294

00:49:16,390 --> 00:49:14,559

next year but

1295

00:49:18,710 --> 00:49:16,400

sometime the next couple of years

1296

00:49:19,910 --> 00:49:18,720

at the latest i would hope

1297

00:49:22,069 --> 00:49:19,920

yeah it would be a lot quicker if

1298

00:49:22,950 --> 00:49:22,079

somebody provided financing

1299

00:49:25,270 --> 00:49:22,960

um

1300

00:49:28,150 --> 00:49:25,280

yeah you know the the repairs for the

1301

00:49:29,829 --> 00:49:28,160

boat the um the trip up there the time

1302

00:49:31,829 --> 00:49:29,839

off of work

1303

00:49:33,670 --> 00:49:31,839

it's expensive it's very expensive to do

1304

00:49:35,670 --> 00:49:33,680

that type of research but

1305

00:49:37,190 --> 00:49:35,680

you know it was time it was time to go

1306

00:49:38,150 --> 00:49:37,200

up there the boat we had all the

1307

00:49:40,150 --> 00:49:38,160

equipment

1308

00:49:42,150 --> 00:49:40,160

everything was right

1309

00:49:44,790 --> 00:49:42,160

but still we lost about

1310

00:49:47,430 --> 00:49:44,800

50 of the time because of problems and

1311

00:49:48,870 --> 00:49:47,440

weather and things like that

1312

00:49:50,870 --> 00:49:48,880

we weren't able it was successful

1313

00:49:52,630 --> 00:49:50,880

overall

1314

00:49:55,430 --> 00:49:52,640

the place that dick rainer thought the

1315

00:49:57,030 --> 00:49:55,440

nancy picture was taken in the boat

1316

00:49:58,710 --> 00:49:57,040

but i was able to get up there with a

1317

00:50:00,549 --> 00:49:58,720

friend of mine with a drone camera and

1318

00:50:02,470 --> 00:50:00,559

we did fly over it

1319

00:50:04,470 --> 00:50:02,480

with a drone camera and got some

1320

00:50:06,069 --> 00:50:04,480

photographs and footage i'm still

1321

00:50:07,190 --> 00:50:06,079

waiting to get the video from him i've

1322

00:50:09,109 --> 00:50:07,200

got some of the

1323

00:50:11,910 --> 00:50:09,119

images

1324

00:50:14,710 --> 00:50:11,920

and the other thing is i was also able

1325

00:50:17,190 --> 00:50:14,720

to go down to where the olsen video was

1326

00:50:19,510 --> 00:50:17,200

filmed at oak ledge park

1327

00:50:20,470 --> 00:50:19,520

as the sun was coming up just in case to

1328

00:50:22,950 --> 00:50:20,480

see if

1329

00:50:25,349 --> 00:50:22,960

this thing might pop up again

1330

00:50:27,430 --> 00:50:25,359

because the original video was shot

1331

00:50:30,309 --> 00:50:27,440

around daybreak as the sun was coming up

1332

00:50:32,390 --> 00:50:30,319

so i did manage to

1333

00:50:33,430 --> 00:50:32,400

investigate both of those other two

1334

00:50:36,950 --> 00:50:33,440

areas

1335

00:50:38,549 --> 00:50:36,960

besides the beaudette location too so

1336

00:50:42,150 --> 00:50:38,559

yeah

1337

00:50:43,670 --> 00:50:42,160

so we have a question for you both from

1338

00:50:46,549 --> 00:50:43,680

the chat room

1339

00:50:51,109 --> 00:50:46,559

do they speak with other researchers i.e

1340

00:50:55,750 --> 00:50:53,829

i know about it i i haven't had any

1341

00:50:57,190 --> 00:50:55,760

contact with the researchers that are

1342

00:50:59,349 --> 00:50:57,200

working on it though

1343

00:51:01,270 --> 00:50:59,359

i was actually going to ask you guys uh

1344

00:51:03,750 --> 00:51:01,280

you know i think that's like norman

1345

00:51:06,710 --> 00:51:03,760

you're talking about right

1346

00:51:09,030 --> 00:51:06,720

yes it's like norman yep yeah this is

1347

00:51:10,470 --> 00:51:09,040

man-made by the way too

1348

00:51:13,109 --> 00:51:10,480

i was going to ask you guys yeah

1349

00:51:15,190 --> 00:51:13,119

reservoir i think it's maybe

1350

00:51:16,950 --> 00:51:15,200

60 years old

1351
00:51:18,150 --> 00:51:16,960
yeah something like that

1352
00:51:20,390 --> 00:51:18,160
yeah

1353
00:51:23,510 --> 00:51:20,400
i was gonna ask you guys if i

1354
00:51:24,870 --> 00:51:23,520
if you yeah have you ever talked about

1355
00:51:27,030 --> 00:51:24,880
uh possibly

1356
00:51:29,430 --> 00:51:27,040
um picking one another one of these

1357
00:51:32,710 --> 00:51:29,440
lakes and going after like uh uh you

1358
00:51:34,710 --> 00:51:32,720
know uh ogopogo or you know like the

1359
00:51:37,349 --> 00:51:34,720
north carolina

1360
00:51:39,109 --> 00:51:37,359
there are several places

1361
00:51:41,270 --> 00:51:39,119
here in florida

1362
00:51:44,309 --> 00:51:41,280
that i would like to investigate if i

1363
00:51:46,390 --> 00:51:44,319

can just hook up with the right people

1364

00:51:48,549 --> 00:51:46,400

cryptozoology people here in florida

1365

00:51:50,549 --> 00:51:48,559

like there's uh

1366

00:51:51,990 --> 00:51:50,559

the monster they call peaky of the saint

1367

00:51:53,510 --> 00:51:52,000

john's river

1368

00:51:56,309 --> 00:51:53,520

which sounds like a long-necked

1369

00:51:58,309 --> 00:51:56,319

plesiosaur type creature that may be

1370

00:52:00,150 --> 00:51:58,319

coming in at jacksonville from the ocean

1371

00:52:01,750 --> 00:52:00,160

and coming up occasionally into the st

1372

00:52:04,390 --> 00:52:01,760

john's river

1373

00:52:05,589 --> 00:52:04,400

and about 60 miles north of there in

1374

00:52:07,510 --> 00:52:05,599

georgia

1375

00:52:08,710 --> 00:52:07,520

is another river called the altamaha

1376

00:52:11,270 --> 00:52:08,720

river

1377

00:52:12,790 --> 00:52:11,280

where they also report a long-necked

1378

00:52:14,069 --> 00:52:12,800

plesiosaur-type

1379

00:52:15,750 --> 00:52:14,079

creature

1380

00:52:18,390 --> 00:52:15,760

that's seen there very often i'd like to

1381

00:52:20,630 --> 00:52:18,400

investigate both of those places at some

1382

00:52:22,549 --> 00:52:20,640

point but you know i've been doing the

1383

00:52:24,549 --> 00:52:22,559

champ thing for so long i'd like to

1384

00:52:27,589 --> 00:52:24,559

stick it at that is my main thing for

1385

00:52:29,510 --> 00:52:27,599

the time being you know but

1386

00:52:31,510 --> 00:52:29,520

um

1387

00:52:34,230 --> 00:52:31,520

at lake in montana i'd also like to

1388

00:52:36,309 --> 00:52:34,240

investigate it has a long history

1389

00:52:37,510 --> 00:52:36,319
of reports

1390

00:52:39,109 --> 00:52:37,520
we have uh

1391

00:52:40,630 --> 00:52:39,119
we have

1392

00:52:44,309 --> 00:52:40,640
pep pepe

1393

00:52:49,190 --> 00:52:46,950
which is essentially an enlargement of

1394

00:52:51,190 --> 00:52:49,200
the mississippi river

1395

00:52:51,990 --> 00:52:51,200
right right exactly yeah

1396

00:52:53,990 --> 00:52:52,000
yeah

1397

00:52:57,270 --> 00:52:54,000
of course you got like superior and like

1398

00:53:00,390 --> 00:52:57,280
lawrence is saying uh ohio in lake erie

1399

00:53:03,270 --> 00:53:00,400
of course blake erie bessie yeah long

1400

00:53:05,430 --> 00:53:03,280
history of sightings there too

1401

00:53:07,349 --> 00:53:05,440

so we had one time

1402

00:53:09,829 --> 00:53:07,359

the great lakes and the champlain sea

1403

00:53:11,589 --> 00:53:09,839

were all connected in one piece

1404

00:53:14,870 --> 00:53:11,599

and they were connected to a larger lake

1405

00:53:17,030 --> 00:53:14,880

to the west of that glacial lake agassiz

1406

00:53:20,470 --> 00:53:17,040

which stretched all the way to alberta

1407

00:53:22,549 --> 00:53:21,190

so

1408

00:53:25,430 --> 00:53:22,559

the last couple of minutes we have left

1409

00:53:27,030 --> 00:53:25,440

because time flies so fast too fast um

1410

00:53:29,430 --> 00:53:27,040

way too fast yes

1411

00:53:31,190 --> 00:53:29,440

uh we're going to ask now you guys do

1412

00:53:33,510 --> 00:53:31,200

have a a

1413

00:53:36,710 --> 00:53:33,520

page on facebook right a group page

1414

00:53:39,030 --> 00:53:36,720

group yes yes it's called uh

1415

00:53:40,829 --> 00:53:39,040

champ lake champlain monster research by

1416

00:53:43,589 --> 00:53:40,839

scott martis william

1417

00:53:45,750 --> 00:53:43,599

jorgensen okay and then you also have

1418

00:53:47,829 --> 00:53:45,760

zombie please resource society

1419

00:53:50,390 --> 00:53:47,839

yeah and then there's another

1420

00:53:52,710 --> 00:53:50,400

uh page called lake champlain mystery

1421

00:53:54,710 --> 00:53:52,720

animals which i started

1422

00:53:56,710 --> 00:53:54,720

probably about five years ago somewhere

1423

00:53:57,829 --> 00:53:56,720

in there

1424

00:54:02,470 --> 00:53:57,839

awesome

1425

00:54:06,470 --> 00:54:04,870

there's a documentary alexander petticov

1426

00:54:09,510 --> 00:54:06,480

is making for

1427

00:54:11,030 --> 00:54:09,520

uh small town monsters about champ and

1428

00:54:12,069 --> 00:54:11,040

we're gonna be on that there was some

1429

00:54:14,470 --> 00:54:12,079

footage

1430

00:54:17,190 --> 00:54:14,480

shot with us out on the lake

1431

00:54:21,589 --> 00:54:17,200

and i will also be speaking at creature

1432

00:54:24,950 --> 00:54:21,599

weekend in october and on cambridge ohio

1433

00:54:25,829 --> 00:54:24,960

oh nice yeah yeah awesome

1434

00:54:28,630 --> 00:54:25,839

yeah

1435

00:54:29,910 --> 00:54:28,640

um who was on the team

1436

00:54:31,990 --> 00:54:29,920

when you guys were out there was it just

1437

00:54:33,910 --> 00:54:32,000

you and william or

1438

00:54:35,589 --> 00:54:33,920

is there any uh what

1439

00:54:37,109 --> 00:54:35,599

i i i couldn't hear a part of that

1440

00:54:39,829 --> 00:54:37,119

what'd you say again

1441

00:54:41,510 --> 00:54:39,839

um your expedition team

1442

00:54:44,069 --> 00:54:41,520

uh were there any other members besides

1443

00:54:45,190 --> 00:54:44,079

you and william any shout outs

1444

00:54:47,349 --> 00:54:45,200

to uh

1445

00:54:50,150 --> 00:54:47,359

kenny elizabeth went out with us one day

1446

00:54:55,349 --> 00:54:52,950

yeah and my friend jason warfice who

1447

00:54:57,030 --> 00:54:55,359

does bigfoot research in vermont

1448

00:54:59,430 --> 00:54:57,040

assisted me

1449

00:55:00,790 --> 00:54:59,440

and also had some help from my friend

1450

00:55:02,630 --> 00:55:00,800

john cronin

1451
00:55:04,950 --> 00:55:02,640
who's also interested in bigfoot in

1452
00:55:08,390 --> 00:55:04,960
vermont he had a boat we went on his

1453
00:55:10,150 --> 00:55:08,400
boat one day to try to get over to cave

1454
00:55:13,910 --> 00:55:10,160
island

1455
00:55:16,390 --> 00:55:13,920
and uh we took a trip down to whitehall

1456
00:55:18,790 --> 00:55:16,400
new york to visit

1457
00:55:20,870 --> 00:55:18,800
paul bartholomew who investigates

1458
00:55:23,990 --> 00:55:20,880
bigfoot in white hall

1459
00:55:25,510 --> 00:55:24,000
and um we hit some various places

1460
00:55:27,589 --> 00:55:25,520
historical

1461
00:55:30,069 --> 00:55:27,599
champ sites

1462
00:55:33,030 --> 00:55:30,079
uh going down there and coming back like

1463
00:55:34,390 --> 00:55:33,040

we we stopped at a place called dresden

1464

00:55:35,910 --> 00:55:34,400

new york

1465

00:55:36,950 --> 00:55:35,920

which is down the southern end of the

1466

00:55:39,910 --> 00:55:36,960

lake

1467

00:55:41,109 --> 00:55:39,920

and in 1873 this is where the first

1468

00:55:43,430 --> 00:55:41,119

major

1469

00:55:46,470 --> 00:55:43,440

champ flap happened

1470

00:55:49,430 --> 00:55:46,480

it's just a little north of whitehall so

1471

00:55:51,430 --> 00:55:49,440

yeah you know um

1472

00:55:54,710 --> 00:55:51,440

but that was most most of the stuff out

1473

00:55:55,430 --> 00:55:54,720

on the boat was me and will yeah

1474

00:55:57,990 --> 00:55:55,440

well

1475

00:55:59,430 --> 00:55:58,000

it's awesome we're uh

1476
00:56:00,829 --> 00:55:59,440
william scott we're so glad that you

1477
00:56:03,349 --> 00:56:00,839
guys came on the show this

1478
00:56:05,430 --> 00:56:03,359
evening well thank you for having us

1479
00:56:07,030 --> 00:56:05,440
yes thank you very much yeah it was

1480
00:56:08,950 --> 00:56:07,040
great having you both on and thank you

1481
00:56:11,990 --> 00:56:08,960
for sharing all of your information we

1482
00:56:13,990 --> 00:56:12,000
really appreciate it yes and we will

1483
00:56:15,190 --> 00:56:14,000
we will find a way to get you guys back

1484
00:56:18,069 --> 00:56:15,200
on

1485
00:56:19,910 --> 00:56:18,079
for part two yeah for a part to it

1486
00:56:21,670 --> 00:56:19,920
sure that would be good to put a closure

1487
00:56:24,309 --> 00:56:21,680
to a lot of the research so

1488
00:56:26,309 --> 00:56:24,319

uh you know we could move on

1489

00:56:28,789 --> 00:56:26,319

sure absolutely

1490

00:56:31,910 --> 00:56:28,799

uh this week we have paranormal blender

1491

00:56:33,510 --> 00:56:31,920

which is uh paranormal news

1492

00:56:34,390 --> 00:56:33,520

and uh

1493

00:56:37,270 --> 00:56:34,400

so

1494

00:56:38,549 --> 00:56:37,280

join us for that that's at ten o'clock

1495

00:56:40,470 --> 00:56:38,559

uh

1496

00:56:44,150 --> 00:56:40,480

pm central time

1497

00:56:45,670 --> 00:56:44,160

friday night on inception radio network

1498

00:56:47,270 --> 00:56:45,680

to the

1499

00:56:48,950 --> 00:56:47,280

believe it or evidence is overwhelming

1500

00:56:49,990 --> 00:56:48,960

and to the skeptic there will never be

1501

00:56:52,069 --> 00:56:50,000

enough
