

UFO Headline News the Weekend of July 22nd/July 23rd, 2017

 Listen on
inceptionradionetwork.com

1
00:00:05,720 --> 00:00:02,510
oh it's the weekend Saturday July 22nd

2
00:00:07,880 --> 00:00:05,730
and Sunday July 23rd 2017 you are

3
00:00:10,100 --> 00:00:07,890
listening to inception Radio Network

4
00:00:12,410 --> 00:00:10,110
voice of the fringe majority this is

5
00:00:16,099 --> 00:00:12,420
Carol Karl off the beaten path for the

6
00:00:18,470 --> 00:00:16,109
UFO have used celestial displays don't

7
00:00:21,410 --> 00:00:18,480
get the weekend off and here's what you

8
00:00:23,810 --> 00:00:21,420
can see this weekend from Earth sky org

9
00:00:27,410 --> 00:00:23,820
here's the headline see Corona borealis

10
00:00:30,050 --> 00:00:27,420
the northern crown tonight look for the

11
00:00:32,659 --> 00:00:30,060
constellation Corona borealis which is

12
00:00:34,790 --> 00:00:32,669
also called the northern crown you're

13
00:00:36,920 --> 00:00:34,800

going to need a dark sky to see it but

14

00:00:39,170 --> 00:00:36,930

if you've got one this constellation is

15

00:00:42,200 --> 00:00:39,180

fairly easy to pick out because it makes

16

00:00:44,569 --> 00:00:42,210

the shape of the letter C do see this

17

00:00:46,279 --> 00:00:44,579

famous C shaped assemblage of stars from

18

00:00:48,470 --> 00:00:46,289

the northern hemisphere during the

19

00:00:51,049 --> 00:00:48,480

evening hours in July you'll have to be

20

00:00:52,160 --> 00:00:51,059

looking high overhead for you gentle

21

00:00:54,680 --> 00:00:52,170

listeners in the southern hemisphere

22

00:00:56,920 --> 00:00:54,690

this constellation is low in the

23

00:00:59,420 --> 00:00:56,930

northern sky Corona borealis

24

00:01:02,420 --> 00:00:59,430

constellation is distinctive it looks

25

00:01:04,969 --> 00:01:02,430

like a half circle hence that C shape in

26

00:01:07,370 --> 00:01:04,979

the middle of which is a white jewel of

27

00:01:11,620 --> 00:01:07,380

a star called alphecca or gemma

28

00:01:14,000 --> 00:01:11,630

o let's spell alphecca it's al phe CCA

29

00:01:16,520 --> 00:01:14,010

Gemma well that's pretty easy

30

00:01:18,920 --> 00:01:16,530

two more bright stars are added to this

31

00:01:20,770 --> 00:01:18,930

crown in fact the crown is located more

32

00:01:23,480 --> 00:01:20,780

or less along a line between them

33

00:01:26,120 --> 00:01:23,490

Arcturus in the constellation Bootes the

34

00:01:28,490 --> 00:01:26,130

herdsman and Vega in the constellation

35

00:01:28,999 --> 00:01:28,500

Lyra the harp Arcturus has already

36

00:01:30,560 --> 00:01:29,009

passed

37

00:01:33,109 --> 00:01:30,570

its highest point in the evening this

38

00:01:35,539 --> 00:01:33,119

time of year and it's slowly descending

39

00:01:35,899 --> 00:01:35,549

to the west Vega is still high in the

40

00:01:38,240 --> 00:01:35,909

east

41

00:01:40,609 --> 00:01:38,250

on July evenings and with dark skies

42

00:01:42,499 --> 00:01:40,619

you'll notice the orange color of our

43

00:01:45,499 --> 00:01:42,509

Taurus and Vega's bright blue-white

44

00:01:47,569 --> 00:01:45,509

tinge Corona borealis can be found

45

00:01:50,510 --> 00:01:47,579

between these two stars although it's

46

00:01:52,249 --> 00:01:50,520

actually closer to Vega by the way the

47

00:01:55,130 --> 00:01:52,259

meaning of the Latin star named Gemma

48

00:01:57,920 --> 00:01:55,140

should be obvious this star is the gem

49

00:02:00,469 --> 00:01:57,930

of the northern crown but the star is

50

00:02:03,080 --> 00:02:00,479

also called alphecca from an ancient

51
00:02:06,380 --> 00:02:03,090
Arabic phrase meaning the bright one of

52
00:02:09,529 --> 00:02:06,390
the dish Jemma aka alphecca

53
00:02:11,750 --> 00:02:09,539
is an eclipsing binary system it

54
00:02:13,699 --> 00:02:11,760
consists of a smaller sun-like star that

55
00:02:16,970 --> 00:02:13,709
passes in front of a brighter star

56
00:02:18,530 --> 00:02:16,980
every 17.4 days has seen from our

57
00:02:21,349 --> 00:02:18,540
earthly vantage point

58
00:02:23,780 --> 00:02:21,359
so here's ye olde bottom line that earth

59
00:02:25,940 --> 00:02:23,790
sky always provides on these July

60
00:02:28,610 --> 00:02:25,950
evenings look for Corona borealis is

61
00:02:31,459 --> 00:02:28,620
graceful semicircle of stars in between

62
00:02:34,039 --> 00:02:31,469
those two bright stars Arcturus and Vega

63
00:02:37,220 --> 00:02:34,049

see if you can include in your weekend a

64

00:02:40,309 --> 00:02:37,230

glimpse at that night sky here's this

65

00:02:42,289 --> 00:02:40,319

for all of us Google Earth enthusiasts

66

00:02:45,229 --> 00:02:42,299

it's from the Washington Post comm

67

00:02:48,050 --> 00:02:45,239

headline Google Streetview latest

68

00:02:50,839 --> 00:02:48,060

destination the International Space

69

00:02:53,539 --> 00:02:50,849

Station that comprehensive terrestrial

70

00:02:56,119 --> 00:02:53,549

mapping system Google's space has gone

71

00:02:58,039 --> 00:02:56,129

extra-terrestrial allowing users to

72

00:03:01,399 --> 00:02:58,049

appear inside the International Space

73

00:03:06,050 --> 00:03:01,409

Station from their computer 248 miles

74

00:03:09,409 --> 00:03:06,060

below you've got 360 degree panoramic

75

00:03:11,209 --> 00:03:09,419

views the street image it's that thing

76

00:03:13,459 --> 00:03:11,219

where you can get the up-close was

77

00:03:15,080 --> 00:03:13,469

captured by frenchman thomas pesquet

78

00:03:17,149 --> 00:03:15,090

they asked her not with the european

79

00:03:19,430 --> 00:03:17,159

space agency he just spent six months

80

00:03:21,649 --> 00:03:19,440

aboard the ISS before returning to Earth

81

00:03:23,689 --> 00:03:21,659

and June a Google Streetview

82

00:03:25,819 --> 00:03:23,699

that you may or may not be familiar with

83

00:03:28,520 --> 00:03:25,829

is featured in Google Maps and Google

84

00:03:30,649 --> 00:03:28,530

world it was launched in 2007 and

85

00:03:33,080 --> 00:03:30,659

quickly expanded locations around the

86

00:03:35,719 --> 00:03:33,090

globe including places as remote as

87

00:03:38,179 --> 00:03:35,729

Mount Everest base camp and his offbeat

88

00:03:40,849 --> 00:03:38,189

as Scotland's Loch Ness hmm

89

00:03:42,800 --> 00:03:40,859

monster watching the vast majority of

90

00:03:45,319 --> 00:03:42,810

street views photography is shot by a

91

00:03:48,140 --> 00:03:45,329

vehicle whose movement is available to

92

00:03:50,839 --> 00:03:48,150

fans online oh and speaking of lost Ness

93

00:03:53,899 --> 00:03:50,849

yep that search can move online now

94

00:03:56,059 --> 00:03:53,909

thanks to Google Google's foray into

95

00:03:58,640 --> 00:03:56,069

space is the first time Street View

96

00:04:01,159 --> 00:03:58,650

imagery was captured beyond planet Earth

97

00:04:03,649 --> 00:04:01,169

in a blog post about his experience

98

00:04:06,140 --> 00:04:03,659

thomas pesquet wrote that quote it was

99

00:04:08,119 --> 00:04:06,150

difficult to find the words or take a

100

00:04:10,909 --> 00:04:08,129

picture that accurately describes the

101
00:04:13,280 --> 00:04:10,919
feeling of being in space working with

102
00:04:15,229 --> 00:04:13,290
Google on my latest mission I captured

103
00:04:16,969 --> 00:04:15,239
Street View imagery to show what the

104
00:04:19,460 --> 00:04:16,979
International Space Station looks like

105
00:04:21,860 --> 00:04:19,470
from the inside and share what it's like

106
00:04:24,920 --> 00:04:21,870
to look down on Earth from space and

107
00:04:26,750 --> 00:04:24,930
quotes the virtual tour allows users to

108
00:04:30,290 --> 00:04:26,760
peek into areas where astronauts

109
00:04:32,990 --> 00:04:30,300
eat exercise work and even bathe Thomas

110
00:04:35,000 --> 00:04:33,000
baskets imagery reveals an environment

111
00:04:37,880 --> 00:04:35,010
that may look a bit cramped and chaotic

112
00:04:40,250 --> 00:04:37,890
if not altogether dizzying to humans

113
00:04:41,840 --> 00:04:40,260

anchored on earth but some of the scenes

114

00:04:45,200 --> 00:04:41,850

from inside the International Space

115

00:04:47,180 --> 00:04:45,210

Station are down right mesmerizing this

116

00:04:50,630 --> 00:04:47,190

broadcaster confesses to spending way

117

00:04:53,540 --> 00:04:50,640

too much time there yesterday the images

118

00:04:55,850 --> 00:04:53,550

were captured using the DSLR cameras and

119

00:04:58,670 --> 00:04:55,860

then stitched together back on earth

120

00:05:01,250 --> 00:04:58,680

to create those panoramic views pass cat

121

00:05:03,680 --> 00:05:01,260

noted that the ISS is a busy place with

122

00:05:06,950 --> 00:05:03,690

six crew members working in researching

123

00:05:09,170 --> 00:05:06,960

12 hours a day he wrote quote there are

124

00:05:11,420 --> 00:05:09,180

a lot of obstacles up there and we had

125

00:05:13,280 --> 00:05:11,430

limited time to capture the imagery so

126
00:05:15,470 --> 00:05:13,290
we had to be confident that our approach

127
00:05:18,340 --> 00:05:15,480
would work oh and then there's that

128
00:05:20,570 --> 00:05:18,350
whole zero-gravity thing and quotes

129
00:05:23,030 --> 00:05:20,580
floating through the International Space

130
00:05:25,250 --> 00:05:23,040
Station online you'll notice clickable

131
00:05:26,840 --> 00:05:25,260
dots with detailed descriptions of that

132
00:05:28,640 --> 00:05:26,850
space and its object

133
00:05:31,070 --> 00:05:28,650
that'll help viewers understand what

134
00:05:33,290 --> 00:05:31,080
they're looking at pass cat notice this

135
00:05:35,720 --> 00:05:33,300
is the first time annotations those

136
00:05:38,570 --> 00:05:35,730
quote helpful little notes that pop up

137
00:05:41,450 --> 00:05:38,580
as you explore the ISS end quotes have

138
00:05:44,360 --> 00:05:41,460

been added to Street View imagery the

139

00:05:46,490 --> 00:05:44,370

ISS is a quote large spacecraft and

140

00:05:48,620 --> 00:05:46,500

quotes that orbits around the earth it

141

00:05:51,530 --> 00:05:48,630

goes at more than seventeen hundred and

142

00:05:53,960 --> 00:05:51,540

five thousand miles per hour home for

143

00:05:56,300 --> 00:05:53,970

astronauts from around the world it's

144

00:05:58,190 --> 00:05:56,310

made up of many pieces those pieces were

145

00:06:02,030 --> 00:05:58,200

constructed by astronauts beginning in

146

00:06:04,220 --> 00:06:02,040

1998 by 2000 as more pieces of the

147

00:06:07,010 --> 00:06:04,230

station were added the station was ready

148

00:06:08,960 --> 00:06:07,020

for people according to NASA portions of

149

00:06:12,200 --> 00:06:08,970

the station are connected via modules

150

00:06:15,020 --> 00:06:12,210

known as nodes quote the first crew

151
00:06:17,120 --> 00:06:15,030
arrived November 2nd 2000 NASA writes

152
00:06:19,820 --> 00:06:17,130
people have lived on a space station

153
00:06:21,890 --> 00:06:19,830
ever since over time more pieces have

154
00:06:24,550 --> 00:06:21,900
been added NASA and its partners around

155
00:06:28,640 --> 00:06:24,560
the world finished the space station in

156
00:06:30,230 --> 00:06:28,650
2011 and quotes NASA compares the inside

157
00:06:32,600 --> 00:06:30,240
of the station to the inside of a house

158
00:06:35,210 --> 00:06:32,610
noting that the structure which weighs

159
00:06:37,610 --> 00:06:35,220
almost 1 million pounds and covers an

160
00:06:40,159 --> 00:06:37,620
area the size of a football field has

161
00:06:43,700 --> 00:06:40,169
five bedrooms two bathrooms a

162
00:06:46,790 --> 00:06:43,710
nay's IAM and a big bay window watch no

163
00:06:49,040 --> 00:06:46,800

fireplace the station houses labs from

164

00:06:51,619 --> 00:06:49,050

the United States Russia Japan and

165

00:06:53,629 --> 00:06:51,629

Europe says pass cat quote we can

166

00:06:56,390 --> 00:06:53,639

collect data on the Earth's oceans

167

00:06:58,219 --> 00:06:56,400

atmosphere and land surface we can

168

00:07:00,649 --> 00:06:58,229

conduct experiments and studies that we

169

00:07:02,209 --> 00:07:00,659

wouldn't be able to do from Earth things

170

00:07:05,480 --> 00:07:02,219

like monitoring how the human body

171

00:07:08,119 --> 00:07:05,490

reacts to microgravity solving mysteries

172

00:07:10,369 --> 00:07:08,129

of the immune system studying cyclones

173

00:07:12,739 --> 00:07:10,379

to alert populations and governments

174

00:07:15,769 --> 00:07:12,749

when a storm is approaching or even

175

00:07:17,600 --> 00:07:15,779

monitoring marine litter that rapidly

176
00:07:20,149 --> 00:07:17,610
increasing amount of waste found in our

177
00:07:22,610 --> 00:07:20,159
oceans and quotes several times a week

178
00:07:24,679 --> 00:07:22,620
Mission Control at NASA's Johnson Space

179
00:07:26,600 --> 00:07:24,689
Center in Houston determines where

180
00:07:29,420 --> 00:07:26,610
Earthlings can spot the station from the

181
00:07:31,459 --> 00:07:29,430
ground below from thousands of locations

182
00:07:33,709 --> 00:07:31,469
all over the globe to find out the best

183
00:07:36,079 --> 00:07:33,719
time to see the station from your town

184
00:07:39,230 --> 00:07:36,089
you can click a link that you'll find

185
00:07:41,179 --> 00:07:39,240
later at UFO headline news calm what a

186
00:07:44,149 --> 00:07:41,189
great way to spend part of your weekend

187
00:07:46,610 --> 00:07:44,159
and joy yep it's the weekend it's off

188
00:07:49,070 --> 00:07:46,620

the beaten path for the UFO headline

189

00:07:51,679 --> 00:07:49,080

news we do the stories that are slightly

190

00:07:52,399 --> 00:07:51,689

outside the box a little off the beaten

191

00:07:54,409 --> 00:07:52,409

path

192

00:07:56,360 --> 00:07:54,419

in other words of our regular weekly

193

00:07:59,420 --> 00:07:56,370

coverage for the UFO headline news

194

00:08:01,670 --> 00:07:59,430

although we do have that sense as we're

195

00:08:04,159 --> 00:08:01,680

sure lots of gentle listeners do but

196

00:08:07,550 --> 00:08:04,169

everything is pretty much connected oh

197

00:08:10,790 --> 00:08:07,560

here's a Hollywood connection headline

198

00:08:12,879 --> 00:08:10,800

in valerian and the city of a thousand

199

00:08:16,730 --> 00:08:12,889

planets the International Space Station

200

00:08:19,129 --> 00:08:16,740

evolves into interstellar metropolis oh

201

00:08:22,070 --> 00:08:19,139

what a perfect segue from that last

202

00:08:25,189 --> 00:08:22,080

story this one is written by Doris Elin

203

00:08:27,529 --> 00:08:25,199

Salazar she writes for space comm in the

204

00:08:30,019 --> 00:08:27,539

new adventure movie valerian and the

205

00:08:33,350 --> 00:08:30,029

city of a thousand planets directed by

206

00:08:35,809 --> 00:08:33,360

Luc Besson the title city alpha has a

207

00:08:36,649 --> 00:08:35,819

present-day origin the International

208

00:08:39,769 --> 00:08:36,659

Space Station

209

00:08:41,680 --> 00:08:39,779

the opening of valerian a film inspired

210

00:08:45,019 --> 00:08:41,690

by the popular French comic series

211

00:08:47,629 --> 00:08:45,029

valerian at lolene created by pia

212

00:08:49,850 --> 00:08:47,639

kristen and jean-claude messi ice has a

213

00:08:51,980 --> 00:08:49,860

scene that showcases the International

214

00:08:53,450 --> 00:08:51,990

Space Station as it grows into a

215

00:08:55,520 --> 00:08:53,460

galactic United

216

00:08:57,620 --> 00:08:55,530

nation's hosting meet and greets with

217

00:08:58,700 --> 00:08:57,630

representatives from earth and later

218

00:09:01,340 --> 00:08:58,710

aliens

219

00:09:02,960 --> 00:09:01,350

it grows physically too until it is

220

00:09:06,140 --> 00:09:02,970

large enough that it needs to be moved

221

00:09:08,480 --> 00:09:06,150

out of low Earth orbit the International

222

00:09:10,310 --> 00:09:08,490

Space Station's evolution is a plausible

223

00:09:12,080 --> 00:09:10,320

one the station has a history of

224

00:09:15,530 --> 00:09:12,090

bringing cultures together to build

225

00:09:17,720 --> 00:09:15,540

itself and to exchange ideas in valerian

226

00:09:19,670 --> 00:09:17,730

the first greeting in the montage takes

227

00:09:22,490 --> 00:09:19,680

place in the not-too-distant year of

228

00:09:24,890 --> 00:09:22,500

2020 where two human astronauts are

229

00:09:27,710 --> 00:09:24,900

shown embracing their colleagues and

230

00:09:30,650 --> 00:09:27,720

lovers and as we advance in time we see

231

00:09:32,870 --> 00:09:30,660

increasingly strange aliens introduce

232

00:09:35,270 --> 00:09:32,880

themselves to humans on board the

233

00:09:37,010 --> 00:09:35,280

station certainly the International

234

00:09:39,950 --> 00:09:37,020

crews that have continuously occupied

235

00:09:42,110 --> 00:09:39,960

the existing ISS since 2000 would have

236

00:09:44,360 --> 00:09:42,120

milder reactions to meeting foreign

237

00:09:46,910 --> 00:09:44,370

astronauts than hypothetically meeting

238

00:09:48,500 --> 00:09:46,920

alien life-forms however the

239

00:09:50,960 --> 00:09:48,510

International Space Station was

240

00:09:53,840 --> 00:09:50,970

nevertheless groundbreaking in its

241

00:09:55,730 --> 00:09:53,850

ability to unite five space agencies to

242

00:09:58,550 --> 00:09:55,740

expand scientific research possibilities

243

00:10:00,860 --> 00:09:58,560

and to mend older nationalistic

244

00:10:03,260 --> 00:10:00,870

divisions many of the space programs

245

00:10:06,650 --> 00:10:03,270

involved with the station NASA United

246

00:10:09,620 --> 00:10:06,660

States Rose cosmos Russia CSA Canada

247

00:10:12,470 --> 00:10:09,630

JAXA Japan and the European Space Agency

248

00:10:14,770 --> 00:10:12,480

Europe include countries that have ward

249

00:10:17,600 --> 00:10:14,780

with one another in the last century

250

00:10:19,520 --> 00:10:17,610

early concepts for the ISS had the space

251
00:10:22,310 --> 00:10:19,530
station taking the shape of a giant

252
00:10:24,350 --> 00:10:22,320
wheel Verner von braun developed the

253
00:10:28,520 --> 00:10:24,360
international space station concept back

254
00:10:30,410 --> 00:10:28,530
in 1952 his concept was round in order

255
00:10:33,500 --> 00:10:30,420
to provide simulated gravity through

256
00:10:36,170 --> 00:10:33,510
rotation with a capacity to house dozens

257
00:10:38,000 --> 00:10:36,180
of scientists science fiction story

258
00:10:41,300 --> 00:10:38,010
tellers were clearly inspired by these

259
00:10:44,750 --> 00:10:41,310
concepts and a few years later in 1968

260
00:10:47,360 --> 00:10:44,760
Stanley Kubrick's film 2001 a Space

261
00:10:49,490 --> 00:10:47,370
Odyssey developed a model for a space

262
00:10:53,300 --> 00:10:49,500
station that was in that similar wheel

263
00:10:55,580 --> 00:10:53,310

shape the year before 1967 the first

264

00:10:57,980 --> 00:10:55,590

issue of the Leon and Laura lein was

265

00:11:00,410 --> 00:10:57,990

published and according to valerian film

266

00:11:02,810 --> 00:11:00,420

representatives Point central in the

267

00:11:05,510 --> 00:11:02,820

comic a vast space station that lies at

268

00:11:06,889 --> 00:11:05,520

the crossroads of space inspired alpha

269

00:11:09,290 --> 00:11:06,899

in this film adaptation

270

00:11:12,619 --> 00:11:09,300

that concept actually appeared a few

271

00:11:16,850 --> 00:11:12,629

years later in the 1975 comic velaryon

272

00:11:19,069 --> 00:11:16,860

volume 6 ambassador of the shadows right

273

00:11:21,410 --> 00:11:19,079

now NASA and United States officials

274

00:11:22,850 --> 00:11:21,420

have only promised to fund the ISS

275

00:11:25,429 --> 00:11:22,860

through 2024

276

00:11:28,189 --> 00:11:25,439

so it's uncertain what the future will

277

00:11:30,499 --> 00:11:28,199

hold for the orbiting lab but as crews

278

00:11:32,569 --> 00:11:30,509

from around the world work together to

279

00:11:34,790 --> 00:11:32,579

research and live in space science

280

00:11:36,889 --> 00:11:34,800

fiction writers have inspiration to

281

00:11:39,259 --> 00:11:36,899

continue writing tales of the

282

00:11:41,720 --> 00:11:39,269

International Space Station expanding

283

00:11:45,350 --> 00:11:41,730

someday into that kind of vibrant

284

00:11:47,749 --> 00:11:45,360

metropolis vibrant that's a great word

285

00:11:51,559 --> 00:11:47,759

to use to describe the trailer this

286

00:11:54,710 --> 00:11:51,569

broadcaster watched in awe unbelievable

287

00:11:57,049 --> 00:11:54,720

concepts incredible imagery check it out

288

00:12:00,590 --> 00:11:57,059

you'll find a link later at UFO headline

289

00:12:01,999 --> 00:12:00,600

news calm oh we should add that Justin

290

00:12:05,299 --> 00:12:02,009

Chang the film critic for the Los

291

00:12:08,689 --> 00:12:05,309

Angeles Times didn't really take to this

292

00:12:10,759 --> 00:12:08,699

film as they say his comment was pick up

293

00:12:13,460 --> 00:12:10,769

your 3d glasses at the door with one

294

00:12:15,889 --> 00:12:13,470

hand and drop your brain off with the

295

00:12:19,249 --> 00:12:15,899

other in other words for him there was

296

00:12:21,499 --> 00:12:19,259

lots of vivid quality to look at but not

297

00:12:24,590 --> 00:12:21,509

much in the content go figure

298

00:12:27,619 --> 00:12:24,600

here's something to figure a few weeks

299

00:12:30,019 --> 00:12:27,629

ago we covered the story in Florida the

300

00:12:33,019 --> 00:12:30,029

headline was a woman discovers treasure

301
00:12:33,559 --> 00:12:33,029
trove of rare space documents in the

302
00:12:36,559 --> 00:12:33,569
trash

303
00:12:38,660 --> 00:12:36,569
oh let's recap it our Navy veteran

304
00:12:41,090 --> 00:12:38,670
accidentally stumbled upon a number of

305
00:12:43,429 --> 00:12:41,100
rare documents and images from the

306
00:12:45,470 --> 00:12:43,439
height of the space age in the trash

307
00:12:47,869 --> 00:12:45,480
outside of a home in Florida

308
00:12:50,090 --> 00:12:47,879
former aviation electrician Yvette Quinn

309
00:12:54,169 --> 00:12:50,100
discovered the documents and turned them

310
00:12:55,699 --> 00:12:54,179
over to WKMG news six in Florida she was

311
00:12:58,970 --> 00:12:55,709
concerned that the information had been

312
00:13:01,160 --> 00:12:58,980
just left on the curb the documents

313
00:13:03,650 --> 00:13:01,170

contained notes and images from a

314

00:13:06,650 --> 00:13:03,660

variety of projects including early

315

00:13:08,840 --> 00:13:06,660

drones early renderings of lunar modules

316

00:13:10,999 --> 00:13:08,850

the Space Shuttle and a Martian

317

00:13:13,579 --> 00:13:11,009

spacecraft we're not sure what that

318

00:13:17,150 --> 00:13:13,589

means exactly in addition to such items

319

00:13:19,549 --> 00:13:17,160

as a rare Gemini Titan to press manual

320

00:13:20,660 --> 00:13:19,559

these documents and images in question

321

00:13:22,970 --> 00:13:20,670

originated

322

00:13:24,980 --> 00:13:22,980

Martin Marietta corporation which

323

00:13:27,350 --> 00:13:24,990

specialized in aerospace engineering

324

00:13:29,570 --> 00:13:27,360

chemicals electronics during the height

325

00:13:31,090 --> 00:13:29,580

of the space race the company later

326

00:13:33,530 --> 00:13:31,100

merged with Lockheed corporation

327

00:13:36,800 --> 00:13:33,540

Lockheed Martin is how we know it now

328

00:13:38,900 --> 00:13:36,810

that happened in 1994 the station has

329

00:13:41,000 --> 00:13:38,910

since donated these items found by

330

00:13:44,150 --> 00:13:41,010

Evette Quinn to the American Space

331

00:13:45,640 --> 00:13:44,160

Museum in Titusville Florida it turns

332

00:13:47,960 --> 00:13:45,650

out there really wasn't anything that

333

00:13:49,940 --> 00:13:47,970

classified well there's nothing

334

00:13:52,700 --> 00:13:49,950

classified in this but some things

335

00:13:56,390 --> 00:13:52,710

happen again here's the headline old

336

00:13:59,540 --> 00:13:56,400

NASA computers tapes found in dead man's

337

00:14:02,480 --> 00:13:59,550

basement if this source is highly

338

00:14:04,550 --> 00:14:02,490

respectable it's space.com and this is

339

00:14:08,300 --> 00:14:04,560

written by Mike Wall who is their senior

340

00:14:11,480 --> 00:14:08,310

writer two huge Apollo era NASA

341

00:14:13,490 --> 00:14:11,490

computers and more than 300 data

342

00:14:15,890 --> 00:14:13,500

recording tapes were found in the

343

00:14:19,010 --> 00:14:15,900

Pittsburg basement of a dead engineer

344

00:14:21,740 --> 00:14:19,020

this happened actually in late 2015 but

345

00:14:25,970 --> 00:14:21,750

for some reason it's only breaking now

346

00:14:27,950 --> 00:14:25,980

in November of 2015 a scrap dealer was

347

00:14:30,830 --> 00:14:27,960

invited to clear out the basement of a

348

00:14:32,930 --> 00:14:30,840

recently deceased IBM engineer who did

349

00:14:36,770 --> 00:14:32,940

some work for NASA at the height of the

350

00:14:39,320 --> 00:14:36,780

space race the dealer found about 325

351

00:14:41,720 --> 00:14:39,330

magnetic data tapes and two giant

352

00:14:45,380 --> 00:14:41,730

computers both of which were marked

353

00:14:47,600 --> 00:14:45,390

quote NASA property and quotes the scrap

354

00:14:50,390 --> 00:14:47,610

dealer contacted NASA to inform the

355

00:14:52,190 --> 00:14:50,400

agency of his find and NASA's Office of

356

00:14:55,280 --> 00:14:52,200

the Inspector General performed an

357

00:14:57,350 --> 00:14:55,290

investigation what happened next was the

358

00:14:58,910 --> 00:14:57,360

publication Ars Technica

359

00:15:00,710 --> 00:14:58,920

they obtained the Office of the

360

00:15:02,860 --> 00:15:00,720

Inspector okay keep your eyes closed

361

00:15:10,120 --> 00:15:02,870

okay I want to show you my first ever

362

00:15:13,010 --> 00:15:10,130

painting all right okay colors and

363

00:15:16,460 --> 00:15:13,020

shades so be honest what do you think

364

00:15:17,750 --> 00:15:16,470

well I like how if you switch to Geico

365

00:15:18,560 --> 00:15:17,760

you could save hundreds of dollars on

366

00:15:21,830 --> 00:15:18,570

car insurance

367

00:15:24,080 --> 00:15:21,840

oh yeah that's that's true yeah here why

368

00:15:24,680 --> 00:15:24,090

don't I hold your paintbrush while you

369

00:15:27,170 --> 00:15:24,690

call them

370

00:15:29,450 --> 00:15:27,180

Geico because saving 15% or more on car

371

00:15:31,610 --> 00:15:29,460

insurance is always a great answer

372

00:15:34,519 --> 00:15:31,620

generals report through a Freedom of

373

00:15:36,980 --> 00:15:34,529

Information Act request this dis

374

00:15:39,470 --> 00:15:36,990

East Engineers err told the scrap dealer

375

00:15:42,290 --> 00:15:39,480

quote please tell NASA these items were

376

00:15:44,860 --> 00:15:42,300

not stolen they belonged to IBM

377

00:15:49,819 --> 00:15:44,870

Allegheny Center Pittsburgh Pennsylvania

378

00:15:51,860 --> 00:15:49,829

during the 1968 to 1972 timeframe IBM

379

00:15:53,780 --> 00:15:51,870

was getting rid of the items so the

380

00:15:55,730 --> 00:15:53,790

engineer asked if he could have them and

381

00:15:58,759 --> 00:15:55,740

he was told he couldn't have them and

382

00:16:00,679 --> 00:15:58,769

quotes the relevant names here have been

383

00:16:02,110 --> 00:16:00,689

redacted in the Office of Inspector

384

00:16:04,280 --> 00:16:02,120

General's report

385

00:16:06,559 --> 00:16:04,290

NASA officials told the deceased

386

00:16:08,780 --> 00:16:06,569

engineers family the agency doesn't need

387

00:16:11,179 --> 00:16:08,790

the computers back after further

388

00:16:13,790 --> 00:16:11,189

investigation an agency archivist

389

00:16:16,189 --> 00:16:13,800
determined that 93 of these tapes

390

00:16:18,949 --> 00:16:16,199
contained data from Pioneer 10 or

391

00:16:20,960 --> 00:16:18,959
pioneer 11 those flyby missions to

392

00:16:23,960 --> 00:16:20,970
Jupiter and Saturn they launched in the

393

00:16:26,480 --> 00:16:23,970
early 1970s a few of the other tapes

394

00:16:30,139 --> 00:16:26,490
recorded from the Pioneer 8 Pioneer 9

395

00:16:33,290 --> 00:16:30,149
Helios one and Intelsat four missions

396

00:16:36,710 --> 00:16:33,300
but most of the tapes about 215 of them

397

00:16:38,509 --> 00:16:36,720
just couldn't be identified an archivist

398

00:16:40,910 --> 00:16:38,519
recommended that all the tapes which

399

00:16:43,519 --> 00:16:40,920
were moldy and in generally poor

400

00:16:45,949 --> 00:16:43,529
condition be destroyed because they

401
00:16:48,619 --> 00:16:45,959
didn't contain anything of historical

402
00:16:50,420 --> 00:16:48,629
significance there'll be a link to that

403
00:16:52,910 --> 00:16:50,430
NASA office of the inspector general

404
00:16:55,429 --> 00:16:52,920
report and the full story from the

405
00:16:58,179 --> 00:16:55,439
fellows at ARS technica find those links

406
00:17:01,040 --> 00:16:58,189
later at UFO headline news com

407
00:17:03,650 --> 00:17:01,050
speaking of NASA here's a striking

408
00:17:06,319 --> 00:17:03,660
headline from the Charlotte Observer out

409
00:17:09,500 --> 00:17:06,329
of North Carolina North Carolina's

410
00:17:12,439 --> 00:17:09,510
islands mysterious birth appears on NASA

411
00:17:15,110 --> 00:17:12,449
satellite images mark price gets the

412
00:17:18,020 --> 00:17:15,120
byline here nASA has released satellite

413
00:17:21,529 --> 00:17:18,030

images that show North Carolina's newly

414

00:17:23,480 --> 00:17:21,539

formed Shelly island born in November

415

00:17:26,659 --> 00:17:23,490

the photographs acquired by the

416

00:17:29,930 --> 00:17:26,669

operational land imager on the Landsat 8

417

00:17:32,210 --> 00:17:29,940

satellite shows the sands that grew into

418

00:17:33,740 --> 00:17:32,220

the island that first registered in

419

00:17:36,520 --> 00:17:33,750

November of 2016

420

00:17:39,380 --> 00:17:36,530

off the shoal area off Cape Point

421

00:17:40,159 --> 00:17:39,390

there's a second image taken January of

422

00:17:43,340 --> 00:17:40,169

2017

423

00:17:45,169 --> 00:17:43,350

it shows waves were clearly breaking on

424

00:17:48,150 --> 00:17:45,179

the shallow region off the Cape stick

425

00:17:50,730 --> 00:17:48,160

the site of those breakers is where that

426

00:17:52,530 --> 00:17:50,740

and eventually formed there's a third

427

00:17:55,050 --> 00:17:52,540

image taken just this month

428

00:17:58,440 --> 00:17:55,060

it shows the island clearly formed and

429

00:18:00,900 --> 00:17:58,450

nearly a mile in length quote what

430

00:18:03,720 --> 00:18:00,910

exactly causes a shallow region to

431

00:18:05,370 --> 00:18:03,730

become exposed is a deep question and is

432

00:18:08,100 --> 00:18:05,380

one that's difficult to speculate on

433

00:18:10,290 --> 00:18:08,110

without exact observations and quotes

434

00:18:13,770 --> 00:18:10,300

that's from geomorphologist Andrew

435

00:18:15,900 --> 00:18:13,780

Ashton he reported on this for NASA one

436

00:18:18,270 --> 00:18:15,910

possibility he said is quote water

437

00:18:20,490 --> 00:18:18,280

levels going down after storm driven

438

00:18:23,040 --> 00:18:20,500

waters pile up sediment too near the

439

00:18:24,600 --> 00:18:23,050

surface shelley island came to the

440

00:18:27,060 --> 00:18:24,610

nation's attention about two months ago

441

00:18:29,610 --> 00:18:27,070

it's become known for being mysterious

442

00:18:32,460 --> 00:18:29,620

and forbidding including the news on

443

00:18:35,610 --> 00:18:32,470

january 13th that a world war ii era

444

00:18:38,430 --> 00:18:35,620

military training device washed up on

445

00:18:41,190 --> 00:18:38,440

shore that device was shaped like a

446

00:18:43,470 --> 00:18:41,200

torpedo it prompted an evacuation of the

447

00:18:45,840 --> 00:18:43,480

island which is popular with tourists

448

00:18:48,600 --> 00:18:45,850

the island got its name by the way

449

00:18:50,100 --> 00:18:48,610

unofficially shelley island because it's

450

00:18:52,200 --> 00:18:50,110

littered with numerous and well

451

00:18:54,450 --> 00:18:52,210

preserved shells but it's also a

452

00:18:56,370 --> 00:18:54,460

treacherous place to visit with a deadly

453

00:18:58,500 --> 00:18:56,380

current separating it from cape point

454

00:19:01,040 --> 00:18:58,510

the waters in this channel are known to

455

00:19:03,450 --> 00:19:01,050

be popular with sharks by the way

456

00:19:05,340 --> 00:19:03,460

experts say the island could be swept

457

00:19:08,700 --> 00:19:05,350

away by the next big storm off the coast

458

00:19:10,950 --> 00:19:08,710

and until then the property is under the

459

00:19:14,940 --> 00:19:10,960

jurisdiction of Dare County North

460

00:19:17,940 --> 00:19:14,950

Carolina a new island that is something

461

00:19:20,550 --> 00:19:17,950

new indeed here's a headline we couldn't

462

00:19:22,800 --> 00:19:20,560

resist yes it's the New York Post calm

463

00:19:25,950 --> 00:19:22,810

but here we go

464

00:19:28,470 --> 00:19:25,960

ancient religious stones hiding secret

465

00:19:31,200 --> 00:19:28,480

message only visible at night

466

00:19:34,830 --> 00:19:31,210

there isn't any byline here but we'll

467

00:19:36,660 --> 00:19:34,840

read it anyway mysterious messages that

468

00:19:39,030 --> 00:19:36,670

are only visible at night have been

469

00:19:41,430 --> 00:19:39,040

found at an ancient British religious

470

00:19:43,800 --> 00:19:41,440

site the incredible find suggests that

471

00:19:47,070 --> 00:19:43,810

our Stone Age ancestors left behind

472

00:19:49,920 --> 00:19:47,080

hidden carvings designed to be viewed in

473

00:19:52,650 --> 00:19:49,930

the darkness however we don't yet know

474

00:19:54,680 --> 00:19:52,660

what these messages symbolize and why

475

00:19:57,570 --> 00:19:54,690

they were carved on the rocks

476
00:20:00,260 --> 00:19:57,580
archaeologists led by dr. Andy Jones of

477
00:20:01,380 --> 00:20:00,270
the Cornwall archaeological unit found

478
00:20:03,810 --> 00:20:01,390
105

479
00:20:06,950 --> 00:20:03,820
I've engravings on an act shaped stone

480
00:20:10,500 --> 00:20:06,960
called a quoit that spelled the qu oit

481
00:20:13,080 --> 00:20:10,510
which lies in Hendra burnick down near

482
00:20:15,000 --> 00:20:13,090
David's toe the site appears to have

483
00:20:16,919 --> 00:20:15,010
been used during the late Neolithic era

484
00:20:19,230 --> 00:20:16,929
which is regarded as the end of the

485
00:20:22,919 --> 00:20:19,240
Stone Age as well as during the early

486
00:20:26,190 --> 00:20:22,929
Bronze Age about 4000 to 6000 years ago

487
00:20:29,400 --> 00:20:26,200
it was used for strange rituals

488
00:20:32,100 --> 00:20:29,410

involving the Smashing of quartz blocks

489

00:20:34,200 --> 00:20:32,110

well during the fieldwork it became

490

00:20:36,120 --> 00:20:34,210

apparent that the rock art was far more

491

00:20:38,310 --> 00:20:36,130

extensive than had been first thought

492

00:20:41,039 --> 00:20:38,320

and that it was most evident when viewed

493

00:20:43,169 --> 00:20:41,049

in low sunlight from the southwest or by

494

00:20:45,270 --> 00:20:43,179

moonlight and quotes that's what the

495

00:20:48,900 --> 00:20:45,280

academics wrote in their journal time

496

00:20:51,720 --> 00:20:48,910

and mind it continues quote it is

497

00:20:53,310 --> 00:20:51,730

suggested that the smashed vein quartz

498

00:20:57,090 --> 00:20:53,320

may have been used during nighttime

499

00:20:58,980 --> 00:20:57,100

rituals photogrammetric recording making

500

00:21:01,530 --> 00:20:58,990

detailed measurements using a series of

501
00:21:03,600 --> 00:21:01,540
photos reveal the site to be the most

502
00:21:05,610 --> 00:21:03,610
decorated stone in southern Britain and

503
00:21:08,970 --> 00:21:05,620
that suggests that rather than being

504
00:21:11,669 --> 00:21:08,980
pre-planned the art accreted over time

505
00:21:13,049 --> 00:21:11,679
and quotes ancient cultures often

506
00:21:15,180 --> 00:21:13,059
associate a darkness with the

507
00:21:17,669 --> 00:21:15,190
supernatural and the heightening of the

508
00:21:19,860 --> 00:21:17,679
senses meaning that Henry Burnett quite

509
00:21:22,680 --> 00:21:19,870
could have played house to strange pagan

510
00:21:25,350 --> 00:21:22,690
religious rituals Jones also found

511
00:21:27,240 --> 00:21:25,360
fragments of quartz at that site when

512
00:21:29,659 --> 00:21:27,250
two pieces of quartz are smashed

513
00:21:32,789 --> 00:21:29,669

together they emit a brief glowing light

514

00:21:34,350 --> 00:21:32,799

quote the smashed court said Henry

515

00:21:36,240 --> 00:21:34,360

Burnett could have been used as part of

516

00:21:38,610 --> 00:21:36,250

a nighttime activity on the site in

517

00:21:40,560 --> 00:21:38,620

order to release the luminescent

518

00:21:42,539 --> 00:21:40,570

properties of the quartz around the

519

00:21:45,180 --> 00:21:42,549

monument revealing this art in a

520

00:21:47,280 --> 00:21:45,190

particular way after the ritual the

521

00:21:49,470 --> 00:21:47,290

broken pieces once they'd fallen to the

522

00:21:52,380 --> 00:21:49,480

ground could have effectively formed a

523

00:21:54,240 --> 00:21:52,390

wider platform an arc which would have

524

00:21:57,120 --> 00:21:54,250

continued to glisten around it in the

525

00:21:59,940 --> 00:21:57,130

moonlight thereby adding to the aura of

526
00:22:02,310 --> 00:21:59,950
the site and quotes Henry burnick down

527
00:22:04,230 --> 00:22:02,320
is the source of the river camel which

528
00:22:07,020 --> 00:22:04,240
may have made it a potent spiritual and

529
00:22:09,919 --> 00:22:07,030
symbolic site the carvings on the Fallen

530
00:22:12,480 --> 00:22:09,929
stone are known as cup and ring marks

531
00:22:14,909 --> 00:22:12,490
and rubberneck Coit has been at the

532
00:22:15,150 --> 00:22:14,919
center of a long controversy because

533
00:22:17,220 --> 00:22:15,160
some

534
00:22:20,490 --> 00:22:17,230
academics believe it's an ancient Long

535
00:22:22,650 --> 00:22:20,500
Barrow used to bury the dead but other

536
00:22:25,260 --> 00:22:22,660
experts believe the stone is a natural

537
00:22:27,360 --> 00:22:25,270
formation and still others believe it

538
00:22:30,660 --> 00:22:27,370

was actually a dumping ground used

539

00:22:33,060 --> 00:22:30,670

during medieval times dr. Andy Jones and

540

00:22:35,850 --> 00:22:33,070

his team found a layer of slate beneath

541

00:22:37,830 --> 00:22:35,860

the 35,000 pound coin indicating it was

542

00:22:40,820 --> 00:22:37,840

dragged there from a site down the river

543

00:22:42,090 --> 00:22:40,830

valley and is not a natural formation

544

00:22:43,920 --> 00:22:42,100

quotes

545

00:22:46,890 --> 00:22:43,930

were found across the ancient world and

546

00:22:49,530 --> 00:22:46,900

often feature an indentation surrounded

547

00:22:51,540 --> 00:22:49,540

by concentric circles although this one

548

00:22:54,030 --> 00:22:51,550

this Cornish one looks slightly

549

00:22:56,130 --> 00:22:54,040

different the markings were mostly

550

00:22:57,750 --> 00:22:56,140

located in northern Europe but similar

551
00:23:00,060 --> 00:22:57,760
patterns have been spotted as far away

552
00:23:03,120 --> 00:23:00,070
as Hawaii and Australia

553
00:23:04,980 --> 00:23:03,130
dr. Jones told The Telegraph that he

554
00:23:08,040 --> 00:23:04,990
expects similar markings to be found out

555
00:23:09,930 --> 00:23:08,050
other British sites quote I think the

556
00:23:12,690 --> 00:23:09,940
new marks show that this ancient site

557
00:23:15,300 --> 00:23:12,700
was used at night and it is likely that

558
00:23:17,940 --> 00:23:15,310
other sites were as well Stonehenge does

559
00:23:19,230 --> 00:23:17,950
have markings and I think that many more

560
00:23:22,200 --> 00:23:19,240
would be found at sites across the

561
00:23:25,230 --> 00:23:22,210
country if people were to look for them

562
00:23:27,240 --> 00:23:25,240
at different light but we might say

563
00:23:31,380 --> 00:23:27,250

that's a very bright idea

564

00:23:34,050 --> 00:23:31,390

so remember normy that monster emerging

565

00:23:36,690 --> 00:23:34,060

from Lake Norman in Mecklenburg County

566

00:23:38,550 --> 00:23:36,700

North Carolina well here's an update

567

00:23:42,120 --> 00:23:38,560

this is from the Charlotte Observer

568

00:23:46,020 --> 00:23:42,130

written by Mark price headline another

569

00:23:49,140 --> 00:23:46,030

clue emerges on Lake Norman monster with

570

00:23:51,840 --> 00:23:49,150

reports of quote enormous fish and

571

00:23:54,780 --> 00:23:51,850

quotes a report this month that yet

572

00:23:57,390 --> 00:23:54,790

another person saw a dinosaur and the

573

00:23:59,340 --> 00:23:57,400

murky waters of man-made Lake Norman has

574

00:24:01,320 --> 00:23:59,350

prompted someone else to step forward

575

00:24:04,440 --> 00:24:01,330

with a clue about what this creature

576

00:24:07,170 --> 00:24:04,450

might be in a July 14th posting on the

577

00:24:09,840 --> 00:24:07,180

official Lake Norman monster comm

578

00:24:12,150 --> 00:24:09,850

website a diver from Clemmons North

579

00:24:15,840 --> 00:24:12,160

Carolina claims to have seen an enormous

580

00:24:17,970 --> 00:24:15,850

fish in the lake 20 years ago that diver

581

00:24:19,860 --> 00:24:17,980

who didn't give his name said he was

582

00:24:21,510 --> 00:24:19,870

looking for old bottles among the

583

00:24:22,700 --> 00:24:21,520

buildings that were submerged when the

584

00:24:26,160 --> 00:24:22,710

lake was first created

585

00:24:28,890 --> 00:24:26,170

adding to the creepiness factor his

586

00:24:31,140 --> 00:24:28,900

light found the fish in the black water

587

00:24:34,440 --> 00:24:31,150

inside one of those submerged buildings

588

00:24:36,900 --> 00:24:34,450

here's what he writes quote it was at

589

00:24:39,660 --> 00:24:36,910

least eight feet long and three feet

590

00:24:41,670 --> 00:24:39,670

across the mouth we hovered in the water

591

00:24:43,890 --> 00:24:41,680

for a good 5 minutes with our lights on

592

00:24:46,440 --> 00:24:43,900

it not believing what we were seeing

593

00:24:49,230 --> 00:24:46,450

I've never seen a freshwater fish that

594

00:24:51,750 --> 00:24:49,240

big the only thing it did was to pump

595

00:24:54,600 --> 00:24:51,760

its gills and open and shut its mouth

596

00:24:57,270 --> 00:24:54,610

slowly almost as if he didn't even see

597

00:24:59,850 --> 00:24:57,280

us and quotes he guesses it might have

598

00:25:02,700 --> 00:24:59,860

been a catfish but a damn big scary one

599

00:25:06,000 --> 00:25:02,710

- end quotes but he suggested it could

600

00:25:07,830 --> 00:25:06,010

be the monster he said quote that fish

601
00:25:11,130 --> 00:25:07,840
might be a lot bigger in the 20 odd

602
00:25:12,870 --> 00:25:11,140
years since then and quotes speculation

603
00:25:15,420 --> 00:25:12,880
of the possible origin of this famed

604
00:25:18,180 --> 00:25:15,430
monster has increased over the past week

605
00:25:20,610 --> 00:25:18,190
after a website called cryptozoology

606
00:25:23,310 --> 00:25:20,620
comm reported that a 35 year old

607
00:25:25,590 --> 00:25:23,320
Mecklenburg County man claimed he saw a

608
00:25:28,260 --> 00:25:25,600
dinosaur like creature two weeks ago

609
00:25:30,150 --> 00:25:28,270
traveling on a boat with friends the man

610
00:25:31,470 --> 00:25:30,160
described that creature as splashing

611
00:25:34,650 --> 00:25:31,480
around in the water

612
00:25:37,560 --> 00:25:34,660
10 feet long reminiscent of the mythical

613
00:25:39,270 --> 00:25:37,570

Loch Ness monster Nessie this thing was

614

00:25:41,700 --> 00:25:39,280

visible for about a minute before it

615

00:25:43,590 --> 00:25:41,710

dropped below the surface doubters

616

00:25:46,200 --> 00:25:43,600

believe the creature if there is one at

617

00:25:48,600 --> 00:25:46,210

all is a giant catfish or even an

618

00:25:51,900 --> 00:25:48,610

alligator or maybe something called an

619

00:25:54,480 --> 00:25:51,910

alligator gar fish one skeptic on the

620

00:25:57,330 --> 00:25:54,490

Lake Norman monster comm asks couldn't

621

00:26:00,210 --> 00:25:57,340

this be a sturgeon they get massive and

622

00:26:03,630 --> 00:26:00,220

who closely resemble a crocodile spines

623

00:26:05,460 --> 00:26:03,640

on their back large bumpy scales the

624

00:26:07,620 --> 00:26:05,470

observer has covered the ongoing Lake

625

00:26:09,000 --> 00:26:07,630

Norman sightings they date back nearly

626
00:26:11,190 --> 00:26:09,010
50 years

627
00:26:13,700 --> 00:26:11,200
a few dozen witnesses have posted

628
00:26:16,020 --> 00:26:13,710
sightings at Lake Norman monster calm

629
00:26:18,570 --> 00:26:16,030
descriptions range from a dinosaur light

630
00:26:21,110 --> 00:26:18,580
creature to a giant snake with fins oh

631
00:26:23,910 --> 00:26:21,120
and don't forget those thick whiskers

632
00:26:26,520 --> 00:26:23,920
most describe the creature Normie as

633
00:26:29,220 --> 00:26:26,530
looking like Nessie that famed Loch Ness

634
00:26:31,860 --> 00:26:29,230
monster that allegedly inhabits Loch

635
00:26:33,630 --> 00:26:31,870
Ness in the Scottish islands quote

636
00:26:35,850 --> 00:26:33,640
descriptions of noir may vary from

637
00:26:38,340 --> 00:26:35,860
sighting - sighting and range from a

638
00:26:41,100 --> 00:26:38,350

crocodilian like creature to the more

639

00:26:42,790 --> 00:26:41,110

classic three humps serpent most that

640

00:26:44,350 --> 00:26:42,800

have seen the Lake Norman monster

641

00:26:47,230 --> 00:26:44,360

seemed to agree the Beast is more

642

00:26:50,560 --> 00:26:47,240

fish-like with a slender body think

643

00:26:53,890 --> 00:26:50,570

whisker like appendages flippers oh and

644

00:26:56,290 --> 00:26:53,900

that raggedy-looking dorsal fin will

645

00:26:59,650 --> 00:26:56,300

keep our eyes on the area of Mecklenburg

646

00:27:00,940 --> 00:26:59,660

County and again see what surfaces at

647

00:27:04,480 --> 00:27:00,950

Lake Norman

648

00:27:06,310 --> 00:27:04,490

let's go from North Carolina now just a

649

00:27:08,800 --> 00:27:06,320

little bit east a little bit south and

650

00:27:12,640 --> 00:27:08,810

we won't stop till we come to st. Louis

651
00:27:14,590 --> 00:27:12,650
Missouri or st. Louis Missouri oh you

652
00:27:17,800 --> 00:27:14,600
decide gentle listeners it's a black

653
00:27:20,890 --> 00:27:17,810
triangle sighting it's MUFON case number

654
00:27:25,000 --> 00:27:20,900
eight five two one six it's an older one

655
00:27:28,270 --> 00:27:25,010
it happened 2010 on November 24th but it

656
00:27:31,660 --> 00:27:28,280
didn't get reported till July 19 2017

657
00:27:34,690 --> 00:27:31,670
hmm in summary the witness says dark

658
00:27:37,090 --> 00:27:34,700
triangle with three green lights on the

659
00:27:40,330 --> 00:27:37,100
corners that are red pulsating lights on

660
00:27:42,760 --> 00:27:40,340
the rear end citing specifics offer us a

661
00:27:45,190 --> 00:27:42,770
viewing distance unknown the altitude

662
00:27:47,830 --> 00:27:45,200
was over 500 feet and there wasn't any

663
00:27:51,310 --> 00:27:47,840

cloud cover the sighting duration was 10

664

00:27:52,900 --> 00:27:51,320

seconds long and so understandably the

665

00:27:56,050 --> 00:27:52,910

object features get that vague

666

00:27:58,660 --> 00:27:56,060

description of none object flight path

667

00:28:01,120 --> 00:27:58,670

is straight flying path and quite

668

00:28:04,180 --> 00:28:01,130

obviously this thing was shaped like a

669

00:28:07,030 --> 00:28:04,190

triangle here's the account in the first

670

00:28:09,310 --> 00:28:07,040

person unedited words of our witness I

671

00:28:11,500 --> 00:28:09,320

was outside my apartment looking for

672

00:28:14,440 --> 00:28:11,510

satellites when I saw the object it was

673

00:28:16,690 --> 00:28:14,450

dark triangle-shaped three greenish

674

00:28:19,780 --> 00:28:16,700

white lights on the corners and a red

675

00:28:22,390 --> 00:28:19,790

pulsating light on the back end it made

676
00:28:25,720 --> 00:28:22,400
no noise it was flying across the sky in

677
00:28:28,120 --> 00:28:25,730
a straight line effortlessly it reminded

678
00:28:31,090 --> 00:28:28,130
me of how an air hockey puck slides

679
00:28:32,640 --> 00:28:31,100
across an air hockey table it appeared

680
00:28:35,980 --> 00:28:32,650
to be flying fairly low to the ground

681
00:28:38,590 --> 00:28:35,990
green lights not very bright this thing

682
00:28:41,470 --> 00:28:38,600
had a fuzzy haze around the edge that

683
00:28:43,060 --> 00:28:41,480
made it hard to look at I watched it for

684
00:28:45,390 --> 00:28:43,070
eight to ten seconds until it appeared

685
00:28:48,100 --> 00:28:45,400
to vanish into thin air

686
00:28:51,700 --> 00:28:48,110
shook up I went inside and locked all my

687
00:28:53,470 --> 00:28:51,710
doors a few years later I started a job

688
00:28:56,860 --> 00:28:53,480

inspecting aerospace parts mostly

689

00:28:59,710 --> 00:28:56,870

military for cracks under UV

690

00:29:03,400 --> 00:28:59,720

it recently dawned on me when inspecting

691

00:29:06,190 --> 00:29:03,410

titanium parts under a UV light I see

692

00:29:09,400 --> 00:29:06,200

that same fuzzy haze effect that this

693

00:29:11,590 --> 00:29:09,410

object had the fuzz effect is very hard

694

00:29:15,040 --> 00:29:11,600

on the eyes so we use UV blocking

695

00:29:17,080 --> 00:29:15,050

glasses to inspect titanium parts if the

696

00:29:19,090 --> 00:29:17,090

lights on this craft were UV and the

697

00:29:21,040 --> 00:29:19,100

craft was made of titanium

698

00:29:23,170 --> 00:29:21,050

that would explain this far as I

699

00:29:25,450 --> 00:29:23,180

witnessed I thought what I saw that

700

00:29:28,450 --> 00:29:25,460

night could very possibly be military

701

00:29:32,710 --> 00:29:28,460

cool sighting reported rather late or

702

00:29:36,460 --> 00:29:32,720

not titanium and UV that's worth Google

703

00:29:38,980 --> 00:29:36,470

but now we've got a fly because that's a

704

00:29:41,290 --> 00:29:38,990

wrap thank you for listening to off the

705

00:29:44,260 --> 00:29:41,300

beaten path for the UFO headline news

706

00:29:46,690 --> 00:29:44,270

follow today's broadcast at UFO headline

707

00:29:48,880 --> 00:29:46,700

news calm take care of each other we're

708

00:29:49,770 --> 00:29:48,890

all in this together this is Carol Parr
