

UFO Headline News Thursday July 27th, 2017

Listen on

inceptionradionetwork.com

1
00:00:06,710 --> 00:00:04,070
day july 27 2017 you are listening to

2
00:00:09,509 --> 00:00:06,720
inception radio network voice of the

3
00:00:13,430 --> 00:00:09,519
fringe majority this is carol carl with

4
00:00:16,870 --> 00:00:15,270
how about this for a headline from

5
00:00:19,269 --> 00:00:16,880
earthsky.org

6
00:00:22,310 --> 00:00:19,279
written by bruce mcclure go someplace

7
00:00:23,910 --> 00:00:22,320
dark and watch meteors exclamation mark

8
00:00:26,150 --> 00:00:23,920
well that sounds like something one

9
00:00:28,550 --> 00:00:26,160
might want to consider tonight and in

10
00:00:31,429 --> 00:00:28,560
the coming nights treat yourself to one

11
00:00:33,750 --> 00:00:31,439
of nature's spectacles this time of year

12
00:00:36,389 --> 00:00:33,760
and into august people look forward to

13
00:00:39,350 --> 00:00:36,399

the perseid meteor shower and it's

14

00:00:41,750 --> 00:00:39,360

wonderful with rates of about 60 meteors

15

00:00:43,750 --> 00:00:41,760

per hour at its peak we've been talking

16

00:00:46,869 --> 00:00:43,760

about the perseids a lot lately they're

17

00:00:49,350 --> 00:00:46,879

gearing up even now so if you go outside

18

00:00:51,910 --> 00:00:49,360

between midnight and dawn tonight or

19

00:00:53,990 --> 00:00:51,920

maybe this weekend you might see some

20

00:00:56,150 --> 00:00:54,000

but there's another meteor shower

21

00:00:58,630 --> 00:00:56,160

happening too we've also talked about

22

00:01:01,990 --> 00:00:58,640

that we'll remind you it's the delta

23

00:01:03,830 --> 00:01:02,000

aquarid meteor shower the delta aquarius

24

00:01:07,030 --> 00:01:03,840

don't have as definite a peak as the

25

00:01:09,350 --> 00:01:07,040

perseids instead that shower produces a

26
00:01:12,710 --> 00:01:09,360
steady supply of meteors for some weeks

27
00:01:15,030 --> 00:01:12,720
in late july and early august so tonight

28
00:01:17,190 --> 00:01:15,040
and this weekend those are good times to

29
00:01:19,670 --> 00:01:17,200
watch because the moon is in a waxing

30
00:01:21,910 --> 00:01:19,680
crescent phase this means the moon sets

31
00:01:24,550 --> 00:01:21,920
in the early evening in other words we

32
00:01:26,870 --> 00:01:24,560
have deliciously dark skies for watching

33
00:01:30,310 --> 00:01:26,880
these delta aquarids which are at their

34
00:01:31,749 --> 00:01:30,320
best in those dark hours before dawn oh

35
00:01:35,190 --> 00:01:31,759
bring the coffee

36
00:01:37,109 --> 00:01:35,200
those meteors are beautiful and tonight

37
00:01:40,310 --> 00:01:37,119
under a dark sky between midnight and

38
00:01:42,310 --> 00:01:40,320

dawn you might see as many as 10 to 15

39

00:01:44,469 --> 00:01:42,320

meteors per hour

40

00:01:46,870 --> 00:01:44,479

most will be somewhat faint so try to

41

00:01:49,670 --> 00:01:46,880

find as dark a sky as you can now let's

42

00:01:52,149 --> 00:01:49,680

talk radiant points shall we the delta

43

00:01:54,630 --> 00:01:52,159

aquarid radiant point is close to the

44

00:01:55,590 --> 00:01:54,640

ecliptic or the sun's path across our

45

00:01:57,990 --> 00:01:55,600

sky

46

00:02:00,230 --> 00:01:58,000

if you trace the path of a delta-aquarid

47

00:02:02,630 --> 00:02:00,240

meteor backwards you're going to find

48

00:02:05,990 --> 00:02:02,640

that radiant point and you'll find that

49

00:02:09,190 --> 00:02:06,000

star delta aquarii also called scat

50

00:02:12,150 --> 00:02:09,200

spelled s-k-a-t that nearly coincides

51
00:02:15,589 --> 00:02:12,160
with the radiant oh delta aquarii that's

52
00:02:17,990 --> 00:02:15,599
spelled a-q-u-a-r-i-i

53
00:02:19,430 --> 00:02:18,000
two eyes and you're gonna need two eyes

54
00:02:22,309 --> 00:02:19,440
to see this

55
00:02:23,990 --> 00:02:22,319
eyes on perseid now that shower is

56
00:02:26,470 --> 00:02:24,000
supposed to produce the greatest number

57
00:02:29,190 --> 00:02:26,480
of meteors on the night of august 11th

58
00:02:31,430 --> 00:02:29,200
through the 13th however the waning

59
00:02:33,750 --> 00:02:31,440
gibbous moon is going to be bright in

60
00:02:36,790 --> 00:02:33,760
the hours after midnight so look out for

61
00:02:38,790 --> 00:02:36,800
that pesky moonlight but late july and

62
00:02:40,710 --> 00:02:38,800
early august might be a better time to

63
00:02:43,589 --> 00:02:40,720

watch those meteors this year before the

64

00:02:45,670 --> 00:02:43,599

moonlight becomes too overpowering the

65

00:02:47,830 --> 00:02:45,680

perseids are known to rise to a peak

66

00:02:49,589 --> 00:02:47,840

gradually so they'll be increasing in

67

00:02:52,470 --> 00:02:49,599

numbers every night over the coming

68

00:02:54,710 --> 00:02:52,480

weeks although at the same time the moon

69

00:02:57,670 --> 00:02:54,720

will be increasing in brilliance and

70

00:02:59,910 --> 00:02:57,680

edging into that post-midnight sky

71

00:03:03,270 --> 00:02:59,920

meanwhile those delta aquarids will be

72

00:03:04,949 --> 00:03:03,280

raining down steadily night after night

73

00:03:07,750 --> 00:03:04,959

so you can watch them from the southern

74

00:03:10,309 --> 00:03:07,760

hemisphere too yes the delta aquarids

75

00:03:12,790 --> 00:03:10,319

especially are a good shower for you the

76
00:03:14,470 --> 00:03:12,800
delta aquarids fall more abundantly in

77
00:03:17,270 --> 00:03:14,480
fact in the southern hemisphere

78
00:03:21,030 --> 00:03:17,280
featuring perhaps 15 delta aquarid

79
00:03:23,430 --> 00:03:21,040
meteors per hour in an inky dark sky

80
00:03:25,350 --> 00:03:23,440
all around the world the radiance of the

81
00:03:28,790 --> 00:03:25,360
showers climbs highest for the night

82
00:03:30,789 --> 00:03:28,800
around 2 to 3 a.m local time and if you

83
00:03:33,190 --> 00:03:30,799
are someplace where daylight time is

84
00:03:36,149 --> 00:03:33,200
observed that would be three to four am

85
00:03:37,750 --> 00:03:36,159
for you but the radiant soars way higher

86
00:03:39,990 --> 00:03:37,760
in the southern hemisphere than at

87
00:03:42,710 --> 00:03:40,000
comparable latitudes for the northern

88
00:03:44,789 --> 00:03:42,720

hemisphere and here's another celestial

89

00:03:47,430 --> 00:03:44,799

treat tossed our way tonight if you go

90

00:03:49,430 --> 00:03:47,440

outside tonight and you notice a bright

91

00:03:52,550 --> 00:03:49,440

star near the moon

92

00:03:55,190 --> 00:03:52,560

well that's no star it's planet jupiter

93

00:03:57,750 --> 00:03:55,200

king planet jupiter the moon and jupiter

94

00:04:00,309 --> 00:03:57,760

will be even closer tomorrow night and

95

00:04:03,190 --> 00:04:00,319

nearby is that bright star spika in the

96

00:04:05,509 --> 00:04:03,200

constellation virgo the maiden

97

00:04:08,070 --> 00:04:05,519

so get ready for the bottom line

98

00:04:10,630 --> 00:04:08,080

given dark skies you won't see as many

99

00:04:13,110 --> 00:04:10,640

meteors in late july and early august as

100

00:04:15,509 --> 00:04:13,120

you will at the perseid meteor shower

101
00:04:19,110 --> 00:04:15,519
peak and that's august 11th through the

102
00:04:22,150 --> 00:04:19,120
13th but this year in 2017 you won't

103
00:04:25,110 --> 00:04:22,160
have much moon free time for viewing the

104
00:04:27,430 --> 00:04:25,120
perseids ah blame the moon

105
00:04:29,430 --> 00:04:27,440
now let's segue from the moon to well

106
00:04:31,310 --> 00:04:29,440
the moon here's a headline written by

107
00:04:32,870 --> 00:04:31,320
mike weiner for

108
00:04:35,670 --> 00:04:32,880
bgrnews.com

109
00:04:38,150 --> 00:04:35,680
there might be a whole bunch of water

110
00:04:39,990 --> 00:04:38,160
hiding inside the moon

111
00:04:42,150 --> 00:04:40,000
with how much attention humanity is

112
00:04:44,390 --> 00:04:42,160
devoted to studying earth's moon over

113
00:04:46,390 --> 00:04:44,400

the centuries you'd think we'd have a

114

00:04:48,950 --> 00:04:46,400

good handle on just about everything

115

00:04:49,830 --> 00:04:48,960

there is to know about our nearest

116

00:04:52,710 --> 00:04:49,840

neighbor

117

00:04:55,430 --> 00:04:52,720

some extremely interesting new research

118

00:04:57,590 --> 00:04:55,440

suggests that's simply not the case and

119

00:04:59,430 --> 00:04:57,600

if the scientific team comprised of

120

00:05:02,710 --> 00:04:59,440

researchers from the university of

121

00:05:05,990 --> 00:05:02,720

hawaii as well as brown holds water the

122

00:05:08,710 --> 00:05:06,000

moon might be a great deal more wet

123

00:05:10,629 --> 00:05:08,720

inside than previously thought

124

00:05:12,870 --> 00:05:10,639

scientists have known for some time that

125

00:05:14,790 --> 00:05:12,880

there's at least some water on the moon

126

00:05:17,189 --> 00:05:14,800

however the complete lack of an

127

00:05:18,790 --> 00:05:17,199

atmosphere and the ravages of our sun

128

00:05:19,909 --> 00:05:18,800

was blamed for its almost complete

129

00:05:22,790 --> 00:05:19,919

depletion

130

00:05:24,790 --> 00:05:22,800

but now the idea that a greater amount

131

00:05:26,870 --> 00:05:24,800

of water might be hiding underneath the

132

00:05:29,590 --> 00:05:26,880

moon's surface is beginning to look

133

00:05:32,469 --> 00:05:29,600

quite plausible and after detecting tiny

134

00:05:34,070 --> 00:05:32,479

bits of water encased in volcanic glass

135

00:05:36,469 --> 00:05:34,080

within the moon rocks brought back to

136

00:05:39,270 --> 00:05:36,479

earth from the apollo missions this new

137

00:05:41,029 --> 00:05:39,280

research effort is looking deeper

138

00:05:43,029 --> 00:05:41,039

combining the previous discoveries with

139

00:05:45,590 --> 00:05:43,039

extremely accurate temperature readings

140

00:05:48,629 --> 00:05:45,600

of the moon's surface the team suggests

141

00:05:50,870 --> 00:05:48,639

that water-rich deposits are hiding just

142

00:05:53,270 --> 00:05:50,880

below that dusty landscape

143

00:05:55,510 --> 00:05:53,280

the readings point to pockets of water

144

00:05:57,749 --> 00:05:55,520

trapped within long dormant volcanic

145

00:05:59,909 --> 00:05:57,759

areas and while the team hasn't ventured

146

00:06:02,150 --> 00:05:59,919

a guess as to how the water originally

147

00:06:04,870 --> 00:06:02,160

got on the moon in the first place

148

00:06:07,110 --> 00:06:04,880

they're fairly certain that it is indeed

149

00:06:09,270 --> 00:06:07,120

there with several planned missions

150

00:06:11,590 --> 00:06:09,280

aimed at further manned explorations of

151
00:06:14,629 --> 00:06:11,600
the lunar surface and even the potential

152
00:06:17,110 --> 00:06:14,639
of moon bases the presence of water and

153
00:06:20,390 --> 00:06:17,120
the possibility of utilizing it will

154
00:06:22,150 --> 00:06:20,400
surely be explored before long this

155
00:06:25,029 --> 00:06:22,160
broadcaster is left with that haunting

156
00:06:27,590 --> 00:06:25,039
question how did the water get there in

157
00:06:31,150 --> 00:06:27,600
the first place

158
00:06:33,909 --> 00:06:31,160
from water on the moon to air in space

159
00:06:35,990 --> 00:06:33,919
npr.org brings us this headline with a

160
00:06:39,430 --> 00:06:36,000
byline for joe palka

161
00:06:42,790 --> 00:06:39,440
after a year in space the air hasn't

162
00:06:45,270 --> 00:06:42,800
gone out of nasa's inflated module

163
00:06:46,790 --> 00:06:45,280

a prototype of what could be the next

164

00:06:49,510 --> 00:06:46,800

generation of space stations is

165

00:06:52,070 --> 00:06:49,520

currently in orbit around the earth the

166

00:06:53,990 --> 00:06:52,080

prototype is unusual

167

00:06:56,870 --> 00:06:54,000

instead of arriving in space fully

168

00:06:59,270 --> 00:06:56,880

assembled it arrived folded up and was

169

00:07:00,230 --> 00:06:59,280

only expanded to its full size once in

170

00:07:02,629 --> 00:07:00,240

orbit

171

00:07:06,870 --> 00:07:02,639

the module yes familiar to you gentle

172

00:07:09,990 --> 00:07:06,880

listeners called beam beam the bigelow

173

00:07:12,390 --> 00:07:10,000

expandable activity module what we

174

00:07:14,390 --> 00:07:12,400

mirthfully refer to as the bounce house

175

00:07:16,629 --> 00:07:14,400

in space it's been attached to the

176
00:07:18,070 --> 00:07:16,639
international space station since april

177
00:07:20,870 --> 00:07:18,080
of last year

178
00:07:23,189 --> 00:07:20,880
expandable modules allow nasa to pack a

179
00:07:25,510 --> 00:07:23,199
large volume into a smaller space for

180
00:07:28,790 --> 00:07:25,520
launch they're not made of metal but

181
00:07:31,270 --> 00:07:28,800
instead use tough materials like kevlar

182
00:07:33,589 --> 00:07:31,280
that stuff found in bulletproof vests

183
00:07:36,150 --> 00:07:33,599
the station crew used air pressure to

184
00:07:38,550 --> 00:07:36,160
unfold and expand the beam but it's

185
00:07:40,710 --> 00:07:38,560
wrong to think about beam as expanding

186
00:07:42,390 --> 00:07:40,720
like a balloon that could go pop if

187
00:07:44,629 --> 00:07:42,400
something punctured it

188
00:07:46,950 --> 00:07:44,639

nasa's jason cruson says there's a

189

00:07:49,990 --> 00:07:46,960

better analogy quote it's much like the

190

00:07:52,390 --> 00:07:50,000

tire of your car end quotes

191

00:07:54,790 --> 00:07:52,400

even with no air in a tire that tire

192

00:07:58,309 --> 00:07:54,800

retains its tire-like shape

193

00:08:00,550 --> 00:07:58,319

when beam unfolded in orbit it adopted

194

00:08:03,350 --> 00:08:00,560

its more natural shape something

195

00:08:05,430 --> 00:08:03,360

resembling a stumpy watermelon

196

00:08:08,150 --> 00:08:05,440

even if it was to lose all its internal

197

00:08:10,070 --> 00:08:08,160

air quote it still has structure to it

198

00:08:12,150 --> 00:08:10,080

end quote says croissant

199

00:08:14,629 --> 00:08:12,160

of course nasa would prefer beam not

200

00:08:16,710 --> 00:08:14,639

lose all its air so there are many

201
00:08:18,710 --> 00:08:16,720
layers of shielding to prevent things

202
00:08:21,430 --> 00:08:18,720
like meteorites or other space debris

203
00:08:23,909 --> 00:08:21,440
from poking a hole in beam

204
00:08:26,390 --> 00:08:23,919
said crusade quote we do believe we've

205
00:08:28,869 --> 00:08:26,400
taken at least one hit very small in

206
00:08:31,589 --> 00:08:28,879
nature and actually we can't even see

207
00:08:33,430 --> 00:08:31,599
visually where it's at end quotes

208
00:08:35,350 --> 00:08:33,440
croissant said there was no loss of

209
00:08:38,070 --> 00:08:35,360
pressure from that hit

210
00:08:40,230 --> 00:08:38,080
nasa isn't actually using beam for

211
00:08:43,110 --> 00:08:40,240
anything it's just there to see how it

212
00:08:45,430 --> 00:08:43,120
behaves in space but jason cruson says

213
00:08:47,509 --> 00:08:45,440

the space station crew does indeed go

214

00:08:50,310 --> 00:08:47,519

inside every once in a while to check

215

00:08:53,269 --> 00:08:50,320

sensors inside that module he says crew

216

00:08:55,190 --> 00:08:53,279

members seem to like visiting beam quote

217

00:08:57,509 --> 00:08:55,200

we've actually had up to six crew

218

00:09:00,949 --> 00:08:57,519

members at a time inside it it's about

219

00:09:03,190 --> 00:09:00,959

15 to 16 cubic meters inside

220

00:09:05,670 --> 00:09:03,200

end quotes that translates to something

221

00:09:08,790 --> 00:09:05,680

like the interior space of a modest

222

00:09:10,710 --> 00:09:08,800

sized school bus the original plan was

223

00:09:13,110 --> 00:09:10,720

to detach beam after two years and let

224

00:09:16,230 --> 00:09:13,120

it burn up as it re-enters earth's

225

00:09:19,269 --> 00:09:16,240

atmosphere but there's been a change

226

00:09:21,350 --> 00:09:19,279

here's how jason crewson of nasa put it

227

00:09:22,949 --> 00:09:21,360

because of its performance and it's

228

00:09:24,949 --> 00:09:22,959

doing extremely well

229

00:09:26,710 --> 00:09:24,959

there's really no reason to throw it

230

00:09:29,190 --> 00:09:26,720

away end quotes

231

00:09:31,750 --> 00:09:29,200

since storage is at a premium aboard the

232

00:09:34,790 --> 00:09:31,760

space station nasa now plans to use beam

233

00:09:36,150 --> 00:09:34,800

as a kind of a storage shed and keep it

234

00:09:38,070 --> 00:09:36,160

in space as long as the station

235

00:09:40,310 --> 00:09:38,080

continues to operate

236

00:09:42,870 --> 00:09:40,320

the company that made beam bigelow

237

00:09:45,990 --> 00:09:42,880

aerospace has big plans for expandable

238

00:09:49,190 --> 00:09:46,000

modules including a stand-alone space

239

00:09:53,430 --> 00:09:49,200

station that's called the b330

240

00:09:55,110 --> 00:09:53,440

the b-330 is 20 times larger than beam

241

00:09:57,110 --> 00:09:55,120

but company president robert bigelow

242

00:09:59,350 --> 00:09:57,120

remains cautious despite the good

243

00:10:02,870 --> 00:09:59,360

performance of beam here's a quote from

244

00:10:07,190 --> 00:10:02,880

robert bigelow no i worry too much he

245

00:10:08,310 --> 00:10:07,200

says the b330 is much more complex than

246

00:10:10,230 --> 00:10:08,320

the beam

247

00:10:13,190 --> 00:10:10,240

he says quote it has two propulsion

248

00:10:15,829 --> 00:10:13,200

systems it has a very large solar array

249

00:10:17,829 --> 00:10:15,839

set a full suite of environmental life

250

00:10:19,509 --> 00:10:17,839

support systems and quotes

251

00:10:21,829 --> 00:10:19,519

these are all things that have to work

252

00:10:25,430 --> 00:10:21,839

flawlessly if you want to keep a crew of

253

00:10:27,350 --> 00:10:25,440

humans alive and happy in space

254

00:10:30,150 --> 00:10:27,360

he said quote that's why i walk around

255

00:10:31,670 --> 00:10:30,160

perpetually with a frown

256

00:10:33,829 --> 00:10:31,680

it's just because there's so much to

257

00:10:36,389 --> 00:10:33,839

think about and to be concerned about

258

00:10:38,870 --> 00:10:36,399

and quotes says robert bigelow

259

00:10:40,710 --> 00:10:38,880

despite his concerns bigelow says his

260

00:10:43,030 --> 00:10:40,720

new space stations may be in orbit

261

00:10:45,509 --> 00:10:43,040

before too long his company plans to

262

00:10:48,470 --> 00:10:45,519

have two b330s

263

00:10:50,550 --> 00:10:48,480

ready for launch in 2020

264

00:10:52,870 --> 00:10:50,560

and here at ufo headline news on

265

00:10:55,990 --> 00:10:52,880

inception radio network we will keep you

266

00:10:58,470 --> 00:10:56,000

in that space loop all righty then

267

00:11:01,269 --> 00:10:58,480

buckle up we've got a bunch of ufo

268

00:11:04,150 --> 00:11:01,279

sightings stacked up and hovering we'll

269

00:11:07,910 --> 00:11:04,160

start with this over assateague island

270

00:11:10,389 --> 00:11:07,920

maryland three massive orange red balls

271

00:11:12,389 --> 00:11:10,399

hover low in sky

272

00:11:16,069 --> 00:11:12,399

our source for this sighting william

273

00:11:17,750 --> 00:11:16,079

puckett's ufos northwest.com excellent

274

00:11:20,870 --> 00:11:17,760

site check it out

275

00:11:23,350 --> 00:11:20,880

this sighting took place july 10th 2017.

276

00:11:25,509 --> 00:11:23,360

the time of the sighting was 10 30 p.m

277

00:11:27,670 --> 00:11:25,519

eastern daylight time

278

00:11:30,230 --> 00:11:27,680

it's right out on the coast there's a

279

00:11:32,870 --> 00:11:30,240

google map it looks like it's right

280

00:11:35,350 --> 00:11:32,880

beside the ocean well it is an island

281

00:11:37,750 --> 00:11:35,360

here's a description of this sighting

282

00:11:40,550 --> 00:11:37,760

on tuesday night my girlfriend and i

283

00:11:43,430 --> 00:11:40,560

were in our tent in the e-loop of the

284

00:11:45,910 --> 00:11:43,440

maryland state park at assateague island

285

00:11:48,630 --> 00:11:45,920

it was about 10 30 p.m

286

00:11:52,230 --> 00:11:48,640

i looked outside the tent there were

287

00:11:55,670 --> 00:11:52,240

three massive orange red balls

288

00:11:57,509 --> 00:11:55,680

canted 20 degrees hovering slowly and

289

00:11:59,269 --> 00:11:57,519

low to the ground

290

00:12:01,829 --> 00:11:59,279

they were covering all that we could see

291

00:12:03,910 --> 00:12:01,839

from inside the tent

292

00:12:06,230 --> 00:12:03,920

previously i have been an imagery

293

00:12:08,470 --> 00:12:06,240

interpreter in the air force i was

294

00:12:09,590 --> 00:12:08,480

trained to identify every aircraft in

295

00:12:11,829 --> 00:12:09,600

the world

296

00:12:13,590 --> 00:12:11,839

i also lived on hickam air force base

297

00:12:15,910 --> 00:12:13,600

for six years

298

00:12:18,470 --> 00:12:15,920

each of the orbs i saw that night was

299

00:12:21,030 --> 00:12:18,480

larger than any aircraft i have ever

300

00:12:22,629 --> 00:12:21,040

seen no aircraft has anywhere near that

301
00:12:25,190 --> 00:12:22,639
size of diameter

302
00:12:27,350 --> 00:12:25,200
and we heard no sound

303
00:12:30,069 --> 00:12:27,360
it was very close to us it was less than

304
00:12:31,430 --> 00:12:30,079
a mile and less than 200 feet above the

305
00:12:33,509 --> 00:12:31,440
ground

306
00:12:37,030 --> 00:12:33,519
eventually these things pulled away from

307
00:12:39,590 --> 00:12:37,040
sight and we sat there dumbfounded in my

308
00:12:42,710 --> 00:12:39,600
opinion this was a flying object not

309
00:12:46,150 --> 00:12:42,720
some strange astronomical occurrence

310
00:12:48,150 --> 00:12:46,160
we watched this for roughly five minutes

311
00:12:50,389 --> 00:12:48,160
it's extra interesting we always think

312
00:12:52,870 --> 00:12:50,399
when there's a witness who is trained in

313
00:12:55,269 --> 00:12:52,880

aerial vehicle identification it's that

314

00:12:57,509 --> 00:12:55,279

process of elimination thing they may

315

00:13:00,069 --> 00:12:57,519

not know what it is but they certainly

316

00:13:01,910 --> 00:13:00,079

can tally what it isn't

317

00:13:03,829 --> 00:13:01,920

we'll keep our trajectory over the

318

00:13:05,509 --> 00:13:03,839

eastern seaboard of the united states

319

00:13:08,629 --> 00:13:05,519

now and pick up this sighting from

320

00:13:11,110 --> 00:13:08,639

arlington virginia it comes by way of

321

00:13:14,949 --> 00:13:11,120

ufostalker.com

322

00:13:17,030 --> 00:13:14,959

mufon gave it a case number 85359

323

00:13:20,150 --> 00:13:17,040

the date of this sighting is the 25th of

324

00:13:22,949 --> 00:13:20,160

july and it got a same-day report here's

325

00:13:26,389 --> 00:13:22,959

what our witness says in summary

326

00:13:30,230 --> 00:13:26,399

looked like star then it separated part

327

00:13:32,550 --> 00:13:30,240

of it dropping as if it was a balloon

328

00:13:35,509 --> 00:13:32,560

the viewing distance over one mile

329

00:13:37,750 --> 00:13:35,519

altitude unknown citing duration two

330

00:13:40,150 --> 00:13:37,760

minutes the object features are simply

331

00:13:42,389 --> 00:13:40,160

listed as other the flight path was

332

00:13:45,190 --> 00:13:42,399

stationary and other

333

00:13:48,389 --> 00:13:45,200

the object shape star-like sit back and

334

00:13:50,949 --> 00:13:48,399

relax gentle listeners this is a juicy

335

00:13:53,030 --> 00:13:50,959

sighting as they say here we go

336

00:13:55,590 --> 00:13:53,040

it was dusk and i'd been outside for

337

00:13:57,670 --> 00:13:55,600

about an hour or so observing passing

338

00:13:59,189 --> 00:13:57,680

air traffic using my high-powered

339

00:14:01,430 --> 00:13:59,199

binoculars

340

00:14:04,230 --> 00:14:01,440

as it was dusk i started to look for

341

00:14:07,110 --> 00:14:04,240

stars and planets first finding jupiter

342

00:14:09,269 --> 00:14:07,120

to my west southwest in fact jupiter was

343

00:14:10,710 --> 00:14:09,279

the only space object i'd seen so far

344

00:14:13,829 --> 00:14:10,720

that night

345

00:14:17,030 --> 00:14:13,839

continuing to scan the skies i turned

346

00:14:17,990 --> 00:14:17,040

about 360 degrees to see what i could

347

00:14:20,470 --> 00:14:18,000

see

348

00:14:22,870 --> 00:14:20,480

i spotted with my naked eye what

349

00:14:24,389 --> 00:14:22,880

appeared to me to be a brighter than

350

00:14:25,670 --> 00:14:24,399

jupiter object

351

00:14:27,910 --> 00:14:25,680

and so i took a look through my

352

00:14:29,269 --> 00:14:27,920

binoculars focusing on the object as

353

00:14:31,670 --> 00:14:29,279

best i could

354

00:14:33,350 --> 00:14:31,680

i reckoned it to be a planet

355

00:14:35,509 --> 00:14:33,360

and then i was going inside to check my

356

00:14:38,150 --> 00:14:35,519

astronomy software so i could try and

357

00:14:40,949 --> 00:14:38,160

determine what i was observing

358

00:14:43,750 --> 00:14:40,959

but before i could do that i watched as

359

00:14:46,069 --> 00:14:43,760

this object separated for lack of a

360

00:14:47,350 --> 00:14:46,079

better word that's the best way i can

361

00:14:49,670 --> 00:14:47,360

describe it

362

00:14:51,910 --> 00:14:49,680

it was a balloon perhaps of some type

363

00:14:55,829 --> 00:14:51,920

and a portion of it perhaps like the

364

00:14:57,590 --> 00:14:55,839

gondola dropped away from the balloon

365

00:14:59,670 --> 00:14:57,600

this object i witnessed falling was

366

00:15:01,350 --> 00:14:59,680

leaving a if you have a lowe's advantage

367

00:15:03,350 --> 00:15:01,360

card you can get an extra five percent

368

00:15:04,949 --> 00:15:03,360

off every day on items big or small so

369

00:15:06,790 --> 00:15:04,959

you can save an extra five percent on a

370

00:15:08,710 --> 00:15:06,800

new coat of paint updating appliances

371

00:15:10,389 --> 00:15:08,720

replacing the flooring and even save an

372

00:15:12,150 --> 00:15:10,399

extra five percent on little things like

373

00:15:14,310 --> 00:15:12,160

cleaning supplies laundry detergent and

374

00:15:16,150 --> 00:15:14,320

air filters the big to-do's to the

375

00:15:17,910 --> 00:15:16,160

everyday essentials you get an extra

376

00:15:19,590 --> 00:15:17,920

five percent savings every day when you

377

00:15:21,829 --> 00:15:19,600

use your lowe's advantage card if you

378

00:15:23,670 --> 00:15:21,839

don't have one apply today all projects

379

00:15:25,030 --> 00:15:23,680

have a starting point start with lows

380

00:15:26,310 --> 00:15:25,040

subject to credit approval and can't be

381

00:15:27,990 --> 00:15:26,320

combined with any other credit offers

382

00:15:30,710 --> 00:15:28,000

exclusions apply c store for details us

383

00:15:31,910 --> 00:15:30,720

only trail presumably of smoke and

384

00:15:35,189 --> 00:15:31,920

whatnot

385

00:15:37,189 --> 00:15:35,199

also the falling object was lit up so

386

00:15:39,509 --> 00:15:37,199

much so that it appeared to me to be of

387

00:15:41,590 --> 00:15:39,519

the same brightness as i'd initially

388

00:15:42,949 --> 00:15:41,600

observed it when i first spotted this

389

00:15:47,590 --> 00:15:42,959

object

390

00:15:50,550 --> 00:15:47,600

falling my attention was drawn away to

391

00:15:52,629 --> 00:15:50,560

what appeared to be two aircraft flying

392

00:15:55,189 --> 00:15:52,639

almost within the field of view of my

393

00:15:57,990 --> 00:15:55,199

binoculars that is i could almost see

394

00:16:00,230 --> 00:15:58,000

both the airplanes and the falling

395

00:16:03,189 --> 00:16:00,240

object through my non-zoom type

396

00:16:06,389 --> 00:16:03,199

binoculars the airplanes look to me like

397

00:16:08,470 --> 00:16:06,399

b-52 strato fortresses

398

00:16:11,509 --> 00:16:08,480

perfectly lined up so that it looked

399

00:16:13,350 --> 00:16:11,519

like one plane with two sets of wings

400

00:16:15,110 --> 00:16:13,360

these airplanes were headed east

401
00:16:17,509 --> 00:16:15,120
northeast

402
00:16:20,870 --> 00:16:17,519
returning my visual focus to the object

403
00:16:23,509 --> 00:16:20,880
i originally observed well i didn't see

404
00:16:25,430 --> 00:16:23,519
it i looked through my binoculars and

405
00:16:26,470 --> 00:16:25,440
with my naked eyes

406
00:16:28,629 --> 00:16:26,480
nothing

407
00:16:29,829 --> 00:16:28,639
and now the airplanes were also out of

408
00:16:32,389 --> 00:16:29,839
view

409
00:16:34,150 --> 00:16:32,399
regarding these airplanes my best guess

410
00:16:35,509 --> 00:16:34,160
on their altitude would be less than ten

411
00:16:38,389 --> 00:16:35,519
thousand feet

412
00:16:40,710 --> 00:16:38,399
and i say this because i think i recall

413
00:16:43,110 --> 00:16:40,720

hearing the airplanes which is why my

414

00:16:45,430 --> 00:16:43,120

attention was diverted to them and given

415

00:16:48,870 --> 00:16:45,440

the airplane gazing i've been doing just

416

00:16:50,710 --> 00:16:48,880

before i know what an airplane say at 30

417

00:16:51,590 --> 00:16:50,720

thousand to forty thousand feet looks

418

00:16:53,910 --> 00:16:51,600

like

419

00:16:56,629 --> 00:16:53,920

and they're nowhere as large as the

420

00:16:58,870 --> 00:16:56,639

object or objects i saw

421

00:17:01,030 --> 00:16:58,880

as far as this other object is concerned

422

00:17:02,470 --> 00:17:01,040

i estimate its altitude to be about that

423

00:17:04,949 --> 00:17:02,480

same range

424

00:17:07,350 --> 00:17:04,959

i say this partly because of how quickly

425

00:17:10,069 --> 00:17:07,360

the one object was falling

426
00:17:11,590 --> 00:17:10,079
my considered opinion is that the object

427
00:17:14,230 --> 00:17:11,600
would not have appeared to me to be

428
00:17:15,669 --> 00:17:14,240
moving so quickly had it been at a much

429
00:17:18,069 --> 00:17:15,679
higher altitude

430
00:17:20,150 --> 00:17:18,079
following my failed effort to visually

431
00:17:22,789 --> 00:17:20,160
reacquire the falling object and the

432
00:17:25,750 --> 00:17:22,799
parent object i looked to see if i could

433
00:17:28,390 --> 00:17:25,760
spot the airplanes but i could not they

434
00:17:31,110 --> 00:17:28,400
had become blocked by a building

435
00:17:34,230 --> 00:17:31,120
thank you says the witness oh witness we

436
00:17:36,390 --> 00:17:34,240
thank you what an interesting report

437
00:17:42,230 --> 00:17:36,400
that's pretty unique that description of

438
00:17:45,029 --> 00:17:42,240

two b-52 strato fortress looking planes

439

00:17:47,990 --> 00:17:45,039

from strange planes and other objects to

440

00:17:49,270 --> 00:17:48,000

a black triangle sighting in congress

441

00:17:51,669 --> 00:17:49,280

arizona

442

00:17:53,750 --> 00:17:51,679

mufon has given this sighting a number

443

00:17:56,510 --> 00:17:53,760

for purposes of tracking and

444

00:17:58,070 --> 00:17:56,520

identification that number

445

00:17:59,909 --> 00:17:58,080

85318

446

00:18:03,909 --> 00:17:59,919

this is an older sighting it took place

447

00:18:05,990 --> 00:18:03,919

in 2015 on may 20th but for some reason

448

00:18:08,710 --> 00:18:06,000

the witness did not report it until the

449

00:18:09,990 --> 00:18:08,720

24th of july and that's why we're

450

00:18:12,310 --> 00:18:10,000

hearing it now

451
00:18:13,350 --> 00:18:12,320
here's what the witness offers as a

452
00:18:16,870 --> 00:18:13,360
summary

453
00:18:19,750 --> 00:18:16,880
a giant triangle-shaped craft slowly

454
00:18:22,630 --> 00:18:19,760
flew across the clear night sky

455
00:18:26,150 --> 00:18:22,640
viewing distance over one mile altitude

456
00:18:29,110 --> 00:18:26,160
over 500 feet nope no cloud cover

457
00:18:31,029 --> 00:18:29,120
the siding duration five minutes object

458
00:18:33,909 --> 00:18:31,039
features unknown

459
00:18:37,029 --> 00:18:33,919
object flight path path with directional

460
00:18:39,270 --> 00:18:37,039
change and quite obviously this object

461
00:18:41,029 --> 00:18:39,280
was shaped like a triangle

462
00:18:43,669 --> 00:18:41,039
that night in congress arizona the

463
00:18:46,630 --> 00:18:43,679

maximum temperature was 73 degrees

464

00:18:49,590 --> 00:18:46,640

fahrenheit 23 degrees celsius dropping

465

00:18:52,549 --> 00:18:49,600

down to a desert chill of 41 degrees

466

00:18:55,190 --> 00:18:52,559

fahrenheit 5 degrees celsius

467

00:18:58,150 --> 00:18:55,200

all of those visibility factors noted

468

00:19:01,110 --> 00:18:58,160

maximum mean and minimum the same 10

469

00:19:03,510 --> 00:19:01,120

miles 16 kilometers and at the time of

470

00:19:05,909 --> 00:19:03,520

this sighting there was nothing abnormal

471

00:19:08,470 --> 00:19:05,919

about the arizona weather

472

00:19:10,789 --> 00:19:08,480

here's the sighting itself first person

473

00:19:12,789 --> 00:19:10,799

in the words of our witness

474

00:19:14,470 --> 00:19:12,799

my friend has a house on the outskirts

475

00:19:15,830 --> 00:19:14,480

of congress arizona

476

00:19:18,789 --> 00:19:15,840

from the front yard you can see the

477

00:19:21,190 --> 00:19:18,799

milky way and a good amount of stars

478

00:19:23,590 --> 00:19:21,200

there are no city lights

479

00:19:27,029 --> 00:19:23,600

looking up as i was smoking a cigarette

480

00:19:28,310 --> 00:19:27,039

i noticed a light slowly moving across

481

00:19:29,669 --> 00:19:28,320

the sky

482

00:19:32,230 --> 00:19:29,679

at first i was thinking it was a

483

00:19:33,750 --> 00:19:32,240

satellite because it seemed too far up

484

00:19:37,029 --> 00:19:33,760

to be a plane

485

00:19:38,390 --> 00:19:37,039

plus the light was just a white light

486

00:19:40,310 --> 00:19:38,400

if it hadn't moved

487

00:19:43,510 --> 00:19:40,320

it would have looked like a star

488

00:19:46,230 --> 00:19:43,520

and then as i was watching it i noticed

489

00:19:48,310 --> 00:19:46,240

another one directly below it moving in

490

00:19:50,150 --> 00:19:48,320

perfect formation

491

00:19:53,110 --> 00:19:50,160

as i looked at the two lights i noticed

492

00:19:55,110 --> 00:19:53,120

a third one in front moving perfectly

493

00:19:57,510 --> 00:19:55,120

with the other two

494

00:19:59,110 --> 00:19:57,520

and then i could see these were moving

495

00:20:01,830 --> 00:19:59,120

across the sky

496

00:20:05,430 --> 00:20:01,840

and as they moved the stars were being

497

00:20:07,190 --> 00:20:05,440

blacked out inside a triangle shape

498

00:20:09,830 --> 00:20:07,200

i ran inside and told my friend to come

499

00:20:10,950 --> 00:20:09,840

and look at this ufo moving across the

500

00:20:13,350 --> 00:20:10,960

sky

501
00:20:15,190 --> 00:20:13,360
he came out and when he did i caught

502
00:20:18,070 --> 00:20:15,200
sight of it again

503
00:20:21,669 --> 00:20:18,080
it turned from moving westward and moved

504
00:20:25,350 --> 00:20:21,679
straight up very smoothly and slowly and

505
00:20:27,590 --> 00:20:25,360
then it just faded into the stars

506
00:20:30,310 --> 00:20:27,600
my friend has been on that property and

507
00:20:32,630 --> 00:20:30,320
his family before him he said that stuff

508
00:20:35,350 --> 00:20:32,640
doesn't even faze him anymore

509
00:20:37,270 --> 00:20:35,360
his dad and he have seen countless

510
00:20:39,190 --> 00:20:37,280
unexplained things in the night

511
00:20:42,470 --> 00:20:39,200
regarding this sighting from what i

512
00:20:43,430 --> 00:20:42,480
could tell whatever it was was very very

513
00:20:48,789 --> 00:20:43,440

big

514

00:20:51,510 --> 00:20:48,799

cloudless that night my guess on the

515

00:20:55,510 --> 00:20:51,520

size of this object these objects would

516

00:20:58,310 --> 00:20:55,520

be at least the size of a small city

517

00:20:59,909 --> 00:20:58,320

yep that's what it says right here a

518

00:21:02,549 --> 00:20:59,919

small city

519

00:21:05,110 --> 00:21:02,559

ponder that gentle listeners let's

520

00:21:07,830 --> 00:21:05,120

change our trajectory zoom all the way

521

00:21:10,470 --> 00:21:07,840

across the continental united states and

522

00:21:12,630 --> 00:21:10,480

hover over dana point california right

523

00:21:15,029 --> 00:21:12,640

on the coast it's mufon case number

524

00:21:17,029 --> 00:21:15,039

85358

525

00:21:19,909 --> 00:21:17,039

the date of this sighting it's also an

526

00:21:23,110 --> 00:21:19,919

older one the year is 2015 the month of

527

00:21:26,390 --> 00:21:23,120

may the day the 26th it didn't get

528

00:21:30,070 --> 00:21:26,400

reported till july 25th this year once

529

00:21:34,149 --> 00:21:30,080

again some delay in reporting the

530

00:21:38,950 --> 00:21:34,159

summary black object came around a cloud

531

00:21:41,750 --> 00:21:38,960

disappeared into cloud did not re-emerge

532

00:21:45,830 --> 00:21:41,760

cloud eventually disappeared as if

533

00:21:48,630 --> 00:21:45,840

absorbed or taken by the object

534

00:21:50,710 --> 00:21:48,640

our witness reports a sighting specific

535

00:21:53,350 --> 00:21:50,720

viewing distance unknown

536

00:21:55,029 --> 00:21:53,360

the altitude was over 500 feet and there

537

00:21:57,110 --> 00:21:55,039

was cloud cover

538

00:22:00,230 --> 00:21:57,120

the sighting duration was 20 minutes

539

00:22:01,990 --> 00:22:00,240

long but the object features are merely

540

00:22:04,390 --> 00:22:02,000

reported as none

541

00:22:05,350 --> 00:22:04,400

the flight path path with directional

542

00:22:08,470 --> 00:22:05,360

change

543

00:22:10,470 --> 00:22:08,480

this object had a shape like a sphere

544

00:22:12,710 --> 00:22:10,480

somebody went back and listed the

545

00:22:13,990 --> 00:22:12,720

weather that night over dana point

546

00:22:15,990 --> 00:22:14,000

california

547

00:22:18,789 --> 00:22:16,000

maximum temperature 70 degrees

548

00:22:21,830 --> 00:22:18,799

fahrenheit 21 degrees celsius

549

00:22:24,230 --> 00:22:21,840

a coastal chill of 61 degrees fahrenheit

550

00:22:27,110 --> 00:22:24,240

16 degrees celsius

551
00:22:29,669 --> 00:22:27,120
the visibility factors maximum mean

552
00:22:32,870 --> 00:22:29,679
minimum they all stood the same that

553
00:22:35,590 --> 00:22:32,880
standard 10 miles 16 kilometers

554
00:22:37,669 --> 00:22:35,600
and at the time of this particular event

555
00:22:40,630 --> 00:22:37,679
in dana point california there wasn't

556
00:22:43,190 --> 00:22:40,640
anything unusual about the weather

557
00:22:46,390 --> 00:22:43,200
here is the sighting once again in the

558
00:22:47,990 --> 00:22:46,400
first person words of our witness

559
00:22:49,669 --> 00:22:48,000
i was working on the dana point

560
00:22:52,470 --> 00:22:49,679
headlands preserve

561
00:22:54,870 --> 00:22:52,480
within the city of dana point california

562
00:22:56,950 --> 00:22:54,880
my boss was also there but did not

563
00:22:58,710 --> 00:22:56,960

witness this event he was speaking to

564

00:23:00,149 --> 00:22:58,720

someone else

565

00:23:02,710 --> 00:23:00,159

i looked up

566

00:23:05,110 --> 00:23:02,720

and noticed a black spot

567

00:23:07,430 --> 00:23:05,120

of what at first i thought was a turkey

568

00:23:10,549 --> 00:23:07,440

vulture circling the sky to the

569

00:23:12,470 --> 00:23:10,559

southeast the southwest it was circling

570

00:23:13,750 --> 00:23:12,480

over the camp pendleton marine corps

571

00:23:16,230 --> 00:23:13,760

base

572

00:23:18,710 --> 00:23:16,240

i noted the black spot which i thought

573

00:23:22,630 --> 00:23:18,720

was a turkey vulture circled to the

574

00:23:24,630 --> 00:23:22,640

north then and it traveled into a cloud

575

00:23:28,789 --> 00:23:24,640

i thought this was odd behavior for a

576
00:23:31,669 --> 00:23:28,799
turkey vulture to fly into a cloud

577
00:23:33,909 --> 00:23:31,679
i waited for the bird to exit the cloud

578
00:23:37,909 --> 00:23:33,919
but it never did

579
00:23:39,750 --> 00:23:37,919
and then the cloud started to shrink

580
00:23:42,470 --> 00:23:39,760
slowly at first

581
00:23:44,870 --> 00:23:42,480
but as it got smaller it shrank faster

582
00:23:47,029 --> 00:23:44,880
and faster until this cloud was

583
00:23:50,149 --> 00:23:47,039
completely gone

584
00:23:53,270 --> 00:23:50,159
it did not move up it did not move down

585
00:23:56,470 --> 00:23:53,280
or sideways it just disappeared

586
00:23:58,310 --> 00:23:56,480
i never saw the black spot again

587
00:24:00,870 --> 00:23:58,320
it was too late now to point out my

588
00:24:02,630 --> 00:24:00,880

observation to my boss as there was

589

00:24:04,470 --> 00:24:02,640

nothing to see

590

00:24:05,909 --> 00:24:04,480

this perturbed me

591

00:24:09,029 --> 00:24:05,919

i started to think

592

00:24:11,830 --> 00:24:09,039

why would an object go into a cloud

593

00:24:14,710 --> 00:24:11,840

and then why would the cloud dissipate

594

00:24:16,870 --> 00:24:14,720

the first thought i had was water

595

00:24:19,110 --> 00:24:16,880

harvesting possibly through an

596

00:24:22,549 --> 00:24:19,120

inter-dimensional portal

597

00:24:23,909 --> 00:24:22,559

but over an active military base very

598

00:24:25,830 --> 00:24:23,919

strange

599

00:24:27,909 --> 00:24:25,840

i tried to submit this information years

600

00:24:31,269 --> 00:24:27,919

ago but because of technical

601
00:24:34,149 --> 00:24:31,279
difficulties i wasn't able to do so but

602
00:24:36,310 --> 00:24:34,159
i am reporting it now

603
00:24:38,070 --> 00:24:36,320
and we're glad to read this report

604
00:24:41,029 --> 00:24:38,080
shrinking clouds

605
00:24:43,909 --> 00:24:41,039
probably safe to say that was no turkey

606
00:24:45,669 --> 00:24:43,919
vulture and don't they usually fly in

607
00:24:48,310 --> 00:24:45,679
flocks hmm

608
00:24:49,830 --> 00:24:48,320
well at any rate we've gotta fly out of

609
00:24:52,230 --> 00:24:49,840
here because

610
00:24:54,470 --> 00:24:52,240
that's a wrap follow today's broadcast

611
00:24:57,350 --> 00:24:54,480
at ufoheadlinenews.com

612
00:24:59,990 --> 00:24:57,360
youtube or iheartradio take care of each
