

UFO Headline News Tuesday August 1st, 2017

Listen on

inceptionradionetwork.com

1
00:00:05,510 --> 00:00:02,470
by looking for the moon near the star

2
00:00:07,269 --> 00:00:05,520
antares both probably pretty easy to see

3
00:00:08,950 --> 00:00:07,279
weather permitting

4
00:00:11,509 --> 00:00:08,960
that bright star near the moon is

5
00:00:13,830 --> 00:00:11,519
antares in the constellation scorpius

6
00:00:16,310 --> 00:00:13,840
the scorpion you've got about another

7
00:00:18,630 --> 00:00:16,320
month or so to see this uniquely summer

8
00:00:20,550 --> 00:00:18,640
star for us in the northern hemisphere

9
00:00:23,109 --> 00:00:20,560
and that's during of course the evening

10
00:00:25,509 --> 00:00:23,119
hours antares is the brightest star near

11
00:00:27,750 --> 00:00:25,519
the moon tonight while the other nearby

12
00:00:28,790 --> 00:00:27,760
bright beauty that would be planet

13
00:00:30,550 --> 00:00:28,800

saturn

14

00:00:32,709 --> 00:00:30,560

if you're in the northern hemisphere

15

00:00:35,270 --> 00:00:32,719

antares and saturn are visible in the

16

00:00:37,030 --> 00:00:35,280

southern to southwest sky as night

17

00:00:40,150 --> 00:00:37,040

begins if you're in the southern

18

00:00:42,310 --> 00:00:40,160

hemisphere they're more overhead for you

19

00:00:44,869 --> 00:00:42,320

the moon has now passed that first

20

00:00:47,670 --> 00:00:44,879

quarter phase and exhibits a curvature

21

00:00:50,069 --> 00:00:47,680

on its terminator line that line between

22

00:00:53,350 --> 00:00:50,079

the dark and the light on the moon the

23

00:00:56,150 --> 00:00:53,360

moon phase well that's waxing gibbous we

24

00:00:59,029 --> 00:00:56,160

went there yesterday the waxing gibbous

25

00:01:01,189 --> 00:00:59,039

moon antares and saturn will drift

26
00:01:03,590 --> 00:01:01,199
westward through the night to set after

27
00:01:06,230 --> 00:01:03,600
midnight at mid-northern latitudes

28
00:01:08,630 --> 00:01:06,240
like all stars antares set some four

29
00:01:11,030 --> 00:01:08,640
minutes earlier with each passing night

30
00:01:13,830 --> 00:01:11,040
two hours earlier with each passing

31
00:01:15,750 --> 00:01:13,840
month by october this star will be tough

32
00:01:17,270 --> 00:01:15,760
to spot in the southwestern twilight

33
00:01:20,070 --> 00:01:17,280
after sunset

34
00:01:22,149 --> 00:01:20,080
in ancient chinese thought the summer

35
00:01:25,030 --> 00:01:22,159
season was associated with the word

36
00:01:28,070 --> 00:01:25,040
south with the element fire and with the

37
00:01:30,149 --> 00:01:28,080
color red it's no wonder then that this

38
00:01:32,789 --> 00:01:30,159

reddish star in the south each summer

39

00:01:35,910 --> 00:01:32,799

beautiful antares was considered the

40

00:01:38,390 --> 00:01:35,920

fire star of the ancient chinese

41

00:01:41,109 --> 00:01:38,400

antares appears as a bright reddish star

42

00:01:44,390 --> 00:01:41,119

what ptolemy called sub rofa or

43

00:01:45,910 --> 00:01:44,400

slightly red and it rides relatively low

44

00:01:46,870 --> 00:01:45,920

in the south throughout our northern

45

00:01:49,789 --> 00:01:46,880

summer

46

00:01:52,830 --> 00:01:49,799

we know it is a great ball of gases a

47

00:01:55,109 --> 00:01:52,840

thermonuclear cauldron radiating

48

00:01:57,990 --> 00:01:55,119

unimaginable amounts of energy into the

49

00:02:00,870 --> 00:01:58,000

blackness and vastness of space

50

00:02:03,190 --> 00:02:00,880

and yet to us as to the ancient chinese

51
00:02:05,030 --> 00:02:03,200
antares appears so near the southern

52
00:02:07,670 --> 00:02:05,040
horizon that we must view it through

53
00:02:09,669 --> 00:02:07,680
that great thickness of air

54
00:02:12,630 --> 00:02:09,679
the air through which we view antares

55
00:02:14,710 --> 00:02:12,640
causes the star to twinkle rapidly

56
00:02:17,270 --> 00:02:14,720
on any summer evening if you see a

57
00:02:20,790 --> 00:02:17,280
bright red star low in the south that's

58
00:02:23,190 --> 00:02:20,800
twinkling fiercely it's probably antares

59
00:02:26,390 --> 00:02:23,200
so here's the bottom line the bright

60
00:02:29,990 --> 00:02:26,400
star near the moon on august 1 2017

61
00:02:31,990 --> 00:02:30,000
that's tonight is antares brightest star

62
00:02:34,309 --> 00:02:32,000
in the constellation scorpius the

63
00:02:37,509 --> 00:02:34,319

scorpion this star can be seen near the

64

00:02:40,070 --> 00:02:37,519

moon tonight from around the world

65

00:02:42,309 --> 00:02:40,080

from around the world and just about as

66

00:02:45,030 --> 00:02:42,319

long as there has been recorded history

67

00:02:46,229 --> 00:02:45,040

there have been myths and legends about

68

00:02:48,550 --> 00:02:46,239

the moon

69

00:02:50,470 --> 00:02:48,560

one of those recorders of history is the

70

00:02:52,150 --> 00:02:50,480

famous farmer's almanac

71

00:02:54,710 --> 00:02:52,160

that's an annual north american

72

00:02:58,390 --> 00:02:54,720

periodical that has been in continuous

73

00:03:01,270 --> 00:02:58,400

publication since 1818. published by

74

00:03:03,509 --> 00:03:01,280

geiger of lewiston maine it's famous for

75

00:03:05,910 --> 00:03:03,519

its long-range weather predictions

76
00:03:08,869 --> 00:03:05,920
astronomical data along with a blend of

77
00:03:11,670 --> 00:03:08,879
humor trivia and advice on gardening

78
00:03:13,509 --> 00:03:11,680
cooking fishing and human interest in

79
00:03:16,070 --> 00:03:13,519
addition to the popular united states

80
00:03:18,710 --> 00:03:16,080
version there's also a canadian farmer's

81
00:03:20,869 --> 00:03:18,720
almanac by the way still in print in a

82
00:03:22,550 --> 00:03:20,879
form you can hold in your hands in fact

83
00:03:25,350 --> 00:03:22,560
they're publishing their farmer's

84
00:03:27,750 --> 00:03:25,360
almanac for the year 2018.

85
00:03:30,710 --> 00:03:27,760
here's an article by beth hermann eight

86
00:03:32,789 --> 00:03:30,720
myths and legends about the moon

87
00:03:36,070 --> 00:03:32,799
almost from the beginning of history

88
00:03:38,630 --> 00:03:36,080

time tides animals and man have been

89

00:03:41,509 --> 00:03:38,640

impacted by the moon both scientifically

90

00:03:44,229 --> 00:03:41,519

and perhaps just as often by fairy tales

91

00:03:46,949 --> 00:03:44,239

fables myths and legends

92

00:03:50,070 --> 00:03:46,959

battles have been planned won and lost

93

00:03:51,110 --> 00:03:50,080

by the available or unavailable light of

94

00:03:53,030 --> 00:03:51,120

the moon

95

00:03:54,949 --> 00:03:53,040

native americans have names for the full

96

00:03:57,830 --> 00:03:54,959

moons of each month for instance

97

00:04:00,869 --> 00:03:57,840

january's full wolf moon september has

98

00:04:03,670 --> 00:04:00,879

the full harvest moon october's got the

99

00:04:04,789 --> 00:04:03,680

full hunter's moon dictated by what they

100

00:04:07,589 --> 00:04:04,799

signify

101

00:04:09,670 --> 00:04:07,599

moon myths abound in inuit and maori

102

00:04:12,470 --> 00:04:09,680

cultures as they do in literature and

103

00:04:15,190 --> 00:04:12,480

film from moonlight dependent werewolves

104

00:04:17,830 --> 00:04:15,200

to jewels verne's prescient 1965

105

00:04:18,710 --> 00:04:17,840

literary journey from the earth to the

106

00:04:23,749 --> 00:04:18,720

moon

107

00:04:26,070 --> 00:04:23,759

just about anyone with a modicum of

108

00:04:29,430 --> 00:04:26,080

imagination can gaze up toward the

109

00:04:31,749 --> 00:04:29,440

heavens and see that proverbial man in

110

00:04:32,950 --> 00:04:31,759

the moon although its origins are not

111

00:04:35,110 --> 00:04:32,960

well known

112

00:04:37,510 --> 00:04:35,120

in europe people believed a man was

113

00:04:39,749 --> 00:04:37,520

vanquished to the moon for a crime

114

00:04:41,430 --> 00:04:39,759

according to sources some germanic

115

00:04:43,830 --> 00:04:41,440

cultures believed it was a man caught

116

00:04:45,990 --> 00:04:43,840

stealing from his neighbor's hedgerow

117

00:04:46,870 --> 00:04:46,000

whereas roman legend calls him a sheep

118

00:04:49,830 --> 00:04:46,880

thief

119

00:04:51,590 --> 00:04:49,840

in chinese mythology the goddess change

120

00:04:54,710 --> 00:04:51,600

is stranded upon the moon after

121

00:04:55,749 --> 00:04:54,720

consuming a double dose of immortality

122

00:04:57,670 --> 00:04:55,759

potion

123

00:04:59,749 --> 00:04:57,680

shakespeare did it with a midsummer

124

00:05:02,469 --> 00:04:59,759

night's dream the man in the moon was

125

00:05:04,790 --> 00:05:02,479

called moonshine he kept that moniker

126
00:05:05,990 --> 00:05:04,800
throughout the renaissance and carried a

127
00:05:08,710 --> 00:05:06,000
lantern

128
00:05:11,029 --> 00:05:08,720
then there's number two the blue moon

129
00:05:13,830 --> 00:05:11,039
that expression once in a blue moon is

130
00:05:16,150 --> 00:05:13,840
derived from the rarity of the event as

131
00:05:18,870 --> 00:05:16,160
it is a second full moon in any calendar

132
00:05:20,710 --> 00:05:18,880
month it occurs every two or three years

133
00:05:22,710 --> 00:05:20,720
however the writer of this article has

134
00:05:25,670 --> 00:05:22,720
found sources which tell her that the

135
00:05:27,990 --> 00:05:25,680
blue color was misinterpreted when the

136
00:05:28,909 --> 00:05:28,000
two full moon phenomenon was reported in

137
00:05:32,230 --> 00:05:28,919
the march

138
00:05:34,870 --> 00:05:32,240

1946 issue of the periodical sky and

139

00:05:37,350 --> 00:05:34,880

telescope that color can occur with any

140

00:05:39,830 --> 00:05:37,360

moon any time depending on atmospheric

141

00:05:41,749 --> 00:05:39,840

conditions such as fires and volcanic

142

00:05:43,990 --> 00:05:41,759

eruptions on earth

143

00:05:45,749 --> 00:05:44,000

oh then there's green cheese that's

144

00:05:47,830 --> 00:05:45,759

number three while the thought of

145

00:05:49,510 --> 00:05:47,840

consuming green cheese isn't exactly a

146

00:05:51,350 --> 00:05:49,520

culinary coup

147

00:05:53,749 --> 00:05:51,360

the concept of the moon being made of

148

00:05:54,870 --> 00:05:53,759

green cheese has roots in fable and

149

00:05:57,749 --> 00:05:54,880

proverb

150

00:06:00,469 --> 00:05:57,759

according to accounts a simpleton sees

151
00:06:03,110 --> 00:06:00,479
the moon's reflection in the green water

152
00:06:05,350 --> 00:06:03,120
and then he considers this a wheel of

153
00:06:07,670 --> 00:06:05,360
cheese or the green cheese in the

154
00:06:09,830 --> 00:06:07,680
reflection might imply cheese that just

155
00:06:12,950 --> 00:06:09,840
hasn't matured yet

156
00:06:16,309 --> 00:06:12,960
number four little green men

157
00:06:18,870 --> 00:06:16,319
in 1970 michael vazon and alexander

158
00:06:21,990 --> 00:06:18,880
chebakov of the former soviet academy of

159
00:06:25,350 --> 00:06:22,000
sciences posited that the moon may in

160
00:06:28,309 --> 00:06:25,360
fact be an alien spacecraft believing it

161
00:06:31,510 --> 00:06:28,319
was hollowed out a planetoid created by

162
00:06:33,830 --> 00:06:31,520
beings with superior technology

163
00:06:35,909 --> 00:06:33,840

yes as we think of it the moon whatever

164

00:06:39,029 --> 00:06:35,919

it is it's shiny

165

00:06:41,430 --> 00:06:39,039

and then number five the moon diet

166

00:06:44,390 --> 00:06:41,440

inhabiting alaska greenland and the

167

00:06:47,670 --> 00:06:44,400

arctic the inuit tribe called the moon

168

00:06:49,350 --> 00:06:47,680

god anagan and the sun goddess molina

169

00:06:51,350 --> 00:06:49,360

that's anagan's sister

170

00:06:53,990 --> 00:06:51,360

according to their legend after a

171

00:06:56,950 --> 00:06:54,000

sibling quarrel melina stormed off and

172

00:06:59,110 --> 00:06:56,960

her brother followed always in pursuit

173

00:07:00,790 --> 00:06:59,120

or perhaps to apologize depending on

174

00:07:03,990 --> 00:07:00,800

one's interpretation

175

00:07:06,469 --> 00:07:04,000

anagan forgets to eat and grows thinner

176

00:07:08,070 --> 00:07:06,479

explaining the moon's waning phase

177

00:07:11,029 --> 00:07:08,080

when the moon appears to disappear

178

00:07:12,550 --> 00:07:11,039

completely inuit believe anagan has gone

179

00:07:14,150 --> 00:07:12,560

to find food

180

00:07:17,270 --> 00:07:14,160

when he ultimately catches up to his

181

00:07:20,070 --> 00:07:17,280

sister a rare celestial event the result

182

00:07:21,990 --> 00:07:20,080

causes a solar eclipse so it looks as

183

00:07:25,029 --> 00:07:22,000

though that chase between brother and

184

00:07:26,309 --> 00:07:25,039

sister is still going on august 21st

185

00:07:28,469 --> 00:07:26,319

wait for it

186

00:07:31,830 --> 00:07:28,479

number six moon dance

187

00:07:34,070 --> 00:07:31,840

in africa ma wu the moon god is said to

188

00:07:35,189 --> 00:07:34,080

be linked forever with the sun goddess

189

00:07:37,430 --> 00:07:35,199

lisa

190

00:07:40,150 --> 00:07:37,440

solar and lunar eclipses are said to be

191

00:07:42,230 --> 00:07:40,160

related to their conjugal times

192

00:07:44,790 --> 00:07:42,240

and number seven the moon child

193

00:07:47,430 --> 00:07:44,800

inevitably sometimes controversially

194

00:07:49,990 --> 00:07:47,440

associated with fertility many believe

195

00:07:52,950 --> 00:07:50,000

the moon's influence over love sex and

196

00:07:55,670 --> 00:07:52,960

reproduction is part of a rhythm seen in

197

00:07:57,990 --> 00:07:55,680

the natural world when the moon waxes

198

00:08:00,950 --> 00:07:58,000

life is said to grow and abundance is

199

00:08:02,790 --> 00:08:00,960

present whereas desire diminishes during

200

00:08:05,350 --> 00:08:02,800

its waning cycle

201
00:08:07,589 --> 00:08:05,360
in new zealand maori myth says that a

202
00:08:09,749 --> 00:08:07,599
young girl named rona displeased the

203
00:08:12,790 --> 00:08:09,759
moon so that he seized her and took her

204
00:08:15,270 --> 00:08:12,800
far away with him grabbing onto a tree

205
00:08:17,830 --> 00:08:15,280
she dragged the tree with her and that

206
00:08:21,110 --> 00:08:17,840
tree now symbolizes fertility

207
00:08:23,589 --> 00:08:21,120
and number eight moon attics

208
00:08:25,990 --> 00:08:23,599
psychiatric facilities have reported

209
00:08:27,029 --> 00:08:26,000
patients become more unruly during a

210
00:08:29,270 --> 00:08:27,039
full moon

211
00:08:30,469 --> 00:08:29,280
individuals say pain increases during

212
00:08:32,630 --> 00:08:30,479
that time

213
00:08:34,870 --> 00:08:32,640

so given that choice this article

214

00:08:38,310 --> 00:08:34,880

suggests maybe that's not the time to

215

00:08:41,190 --> 00:08:38,320

opt for root canal etc not during that

216

00:08:44,149 --> 00:08:41,200

waning moon and although police

217

00:08:47,430 --> 00:08:44,159

departments nationwide don't admit there

218

00:08:48,790 --> 00:08:47,440

is any uptick in reports behavior etc

219

00:08:50,710 --> 00:08:48,800

during a full moon

220

00:08:54,070 --> 00:08:50,720

there are others who might take issue

221

00:08:56,870 --> 00:08:54,080

with that just a bit of fun moon stuff

222

00:08:57,790 --> 00:08:56,880

to take us into the month of august

223

00:09:03,110 --> 00:08:57,800

from

224

00:09:06,310 --> 00:09:03,120

waner here's a headline nasa will get to

225

00:09:08,389 --> 00:09:06,320

test its planetary defense system way

226

00:09:10,710 --> 00:09:08,399

sooner than we thought

227

00:09:13,110 --> 00:09:10,720

nasa is extremely interested in building

228

00:09:15,269 --> 00:09:13,120

a true asteroid defense network that

229

00:09:17,590 --> 00:09:15,279

could spring into action as soon as a

230

00:09:20,310 --> 00:09:17,600

threat is detected destroying or

231

00:09:22,949 --> 00:09:20,320

diverting a space rock before it can do

232

00:09:25,110 --> 00:09:22,959

any damage here on earth the actual

233

00:09:27,670 --> 00:09:25,120

development of a protection system is

234

00:09:29,590 --> 00:09:27,680

still in its infancy with many proposed

235

00:09:32,550 --> 00:09:29,600

plans for dealing with troublesome

236

00:09:34,630 --> 00:09:32,560

asteroids but no real world testing to

237

00:09:37,110 --> 00:09:34,640

back any of them but that's not going to

238

00:09:39,110 --> 00:09:37,120

stop nasa from testing its detection

239

00:09:42,470 --> 00:09:39,120

capabilities during an upcoming

240

00:09:44,310 --> 00:09:42,480

near-earth asteroid flyby in october

241

00:09:48,070 --> 00:09:44,320

here's how it's going to work

242

00:09:49,829 --> 00:09:48,080

the asteroid named 2012 tc4

243

00:09:52,389 --> 00:09:49,839

is going to make its closest approach to

244

00:09:54,150 --> 00:09:52,399

earth october 12th coming incredibly

245

00:09:55,990 --> 00:09:54,160

close to our planet

246

00:09:58,550 --> 00:09:56,000

at its nearest point the rock is

247

00:09:59,910 --> 00:09:58,560

expected to be as close as 4 200 miles

248

00:10:02,310 --> 00:09:59,920

from our planet

249

00:10:05,430 --> 00:10:02,320

compare that with our moon's orbit which

250

00:10:07,829 --> 00:10:05,440

is around 240 000 miles and you have a

251
00:10:09,190 --> 00:10:07,839
good idea how insanely close the space

252
00:10:13,030 --> 00:10:09,200
rock will be

253
00:10:15,670 --> 00:10:13,040
a close call makes 2012 tc4 a fantastic

254
00:10:17,430 --> 00:10:15,680
guinea pig for nasa's asteroid detection

255
00:10:19,590 --> 00:10:17,440
network which will require the

256
00:10:22,069 --> 00:10:19,600
cooperation between many scientists and

257
00:10:24,630 --> 00:10:22,079
observatories acting in concert to

258
00:10:27,190 --> 00:10:24,640
establish the asteroid's exact path

259
00:10:29,350 --> 00:10:27,200
at present researchers know enough about

260
00:10:32,710 --> 00:10:29,360
the asteroids path to be confident that

261
00:10:35,030 --> 00:10:32,720
it poses no threat to us but figuring

262
00:10:37,350 --> 00:10:35,040
out exactly where it will pass that's

263
00:10:39,750 --> 00:10:37,360

the real test of this system here's a

264

00:10:41,430 --> 00:10:39,760

quote from professor vishnu reddy of the

265

00:10:44,310 --> 00:10:41,440

university of arizona's lunar and

266

00:10:46,389 --> 00:10:44,320

planetary laboratory quote this is a

267

00:10:48,550 --> 00:10:46,399

team effort that involves more than a

268

00:10:50,710 --> 00:10:48,560

dozen observatories universities and

269

00:10:52,870 --> 00:10:50,720

labs across the globe so that we can

270

00:10:55,190 --> 00:10:52,880

collectively learn the strengths and

271

00:10:58,069 --> 00:10:55,200

limitations of our near-earth object

272

00:11:01,910 --> 00:10:58,079

observation capabilities the goal of the

273

00:11:05,829 --> 00:11:01,920

tc4 campaign is to recover track and

274

00:11:08,470 --> 00:11:05,839

characterize 2012 tc4 this effort will

275

00:11:11,030 --> 00:11:08,480

exercise that entire system to include

276

00:11:13,750 --> 00:11:11,040

the initial and follow-up observations

277

00:11:16,630 --> 00:11:13,760

precise orbit determination and

278

00:11:18,389 --> 00:11:16,640

international communications end quotes

279

00:11:21,350 --> 00:11:18,399

it's good to know people like professor

280

00:11:24,870 --> 00:11:21,360

vishnu reddy are at the ready

281

00:11:27,829 --> 00:11:24,880

from asteroids to well more asteroids

282

00:11:30,790 --> 00:11:27,839

here's a headline luxembourg's asteroid

283

00:11:32,230 --> 00:11:30,800

mining law takes effect august 1st

284

00:11:35,190 --> 00:11:32,240

that's today

285

00:11:36,870 --> 00:11:35,200

mariella moon's son that's her name

286

00:11:39,670 --> 00:11:36,880

wrote this story

287

00:11:42,389 --> 00:11:39,680

luxembourg's parliament has voted in

288

00:11:44,949 --> 00:11:42,399

favor of passing an asteroid mining law

289

00:11:48,389 --> 00:11:44,959

that gives companies ownership of what

290

00:11:50,069 --> 00:11:48,399

they extract from those celestial bodies

291

00:11:52,389 --> 00:11:50,079

the european country has been working on

292

00:11:54,790 --> 00:11:52,399

the bill since 2016 and originally

293

00:11:57,670 --> 00:11:54,800

intended to pass it earlier this year

294

00:11:59,990 --> 00:11:57,680

it took a bit more time to iron things

295

00:12:02,310 --> 00:12:00,000

out but in the end it's gotten an

296

00:12:04,470 --> 00:12:02,320

overwhelmingly unanimous vote and it's

297

00:12:05,750 --> 00:12:04,480

now scheduled to take effect today

298

00:12:08,069 --> 00:12:05,760

august 1st

299

00:12:09,829 --> 00:12:08,079

luxembourg's law is pretty similar to

300

00:12:12,870 --> 00:12:09,839

the one president obama signed back in

301
00:12:14,550 --> 00:12:12,880
2015 it gives mining companies the right

302
00:12:16,389 --> 00:12:14,560
to keep their loot

303
00:12:19,190 --> 00:12:16,399
both of them can also take advantage of

304
00:12:21,750 --> 00:12:19,200
a loophole in the united nations outer

305
00:12:24,310 --> 00:12:21,760
space treaty that treaty states nations

306
00:12:26,150 --> 00:12:24,320
can't claim and occupy the moon and

307
00:12:28,470 --> 00:12:26,160
other celestial bodies

308
00:12:31,350 --> 00:12:28,480
they don't however give companies

309
00:12:34,069 --> 00:12:31,360
ownership of asteroids after all just

310
00:12:35,910 --> 00:12:34,079
the minerals they extract and after they

311
00:12:38,310 --> 00:12:35,920
have extracted it

312
00:12:40,389 --> 00:12:38,320
unlike the united states version though

313
00:12:42,550 --> 00:12:40,399

a company's major stakeholders don't

314

00:12:44,870 --> 00:12:42,560

need to be based in luxembourg to enjoy

315

00:12:46,949 --> 00:12:44,880

its protection they only need to have an

316

00:12:49,590 --> 00:12:46,959

office in that country

317

00:12:51,829 --> 00:12:49,600

that said any space core interested in

318

00:12:54,230 --> 00:12:51,839

operating from the grand duchy that is

319

00:12:56,870 --> 00:12:54,240

luxembourg must have obtained written

320

00:12:58,870 --> 00:12:56,880

permission from the country and must not

321

00:13:01,110 --> 00:12:58,880

have major shareholders who take money

322

00:13:02,870 --> 00:13:01,120

from any terrorist groups

323

00:13:05,670 --> 00:13:02,880

the move didn't come out of left field

324

00:13:08,550 --> 00:13:05,680

for the tiny but wealthy european nation

325

00:13:11,269 --> 00:13:08,560

luxembourg made its first big space bet

326

00:13:13,509 --> 00:13:11,279

back in 1985 when it supported europe's

327

00:13:15,910 --> 00:13:13,519

first private satellite operator which

328

00:13:18,710 --> 00:13:15,920

eventually became the largest in the

329

00:13:20,870 --> 00:13:18,720

world in addition the grand duchy has

330

00:13:23,750 --> 00:13:20,880

been investing in asteroid mining for

331

00:13:26,470 --> 00:13:23,760

years even teaming up with deep space

332

00:13:29,030 --> 00:13:26,480

industries that corporation to design an

333

00:13:30,870 --> 00:13:29,040

experimental aircraft meant to test its

334

00:13:32,949 --> 00:13:30,880

mining technologies

335

00:13:35,110 --> 00:13:32,959

it might take decades before anybody

336

00:13:37,910 --> 00:13:35,120

actually starts digging up minerals from

337

00:13:40,790 --> 00:13:37,920

asteroids but by having a law that makes

338

00:13:44,310 --> 00:13:40,800

it clear where miners stand the first in

339

00:13:46,230 --> 00:13:44,320

europe luxembourg is securing its future

340

00:13:48,949 --> 00:13:46,240

in the industry

341

00:13:52,069 --> 00:13:48,959

a science fiction sounding industry

342

00:13:53,190 --> 00:13:52,079

indeed but it's moved beyond speculative

343

00:13:55,509 --> 00:13:53,200

fiction

344

00:13:58,069 --> 00:13:55,519

let's move from asteroids down to

345

00:14:00,949 --> 00:13:58,079

cornwall in the united kingdom where

346

00:14:03,430 --> 00:14:00,959

there's an update on that series of ufo

347

00:14:07,030 --> 00:14:03,440

sightings interestingly this is picked

348

00:14:09,350 --> 00:14:07,040

up by cnet they usually don't cover the

349

00:14:11,030 --> 00:14:09,360

likes of this amanda cooser gets the

350

00:14:13,350 --> 00:14:11,040

byline

351

00:14:15,829 --> 00:14:13,360

here's her headline mystery ufo

352

00:14:17,269 --> 00:14:15,839

sightings in cornwall have earthly

353

00:14:19,910 --> 00:14:17,279

explanation

354

00:14:21,990 --> 00:14:19,920

a bizarre swarming ufo appeared in

355

00:14:24,069 --> 00:14:22,000

multiple places over the english coastal

356

00:14:26,470 --> 00:14:24,079

peninsula but it's not a sign of

357

00:14:29,350 --> 00:14:26,480

impending alien invasion

358

00:14:31,189 --> 00:14:29,360

that's her sub-headline here's the story

359

00:14:33,189 --> 00:14:31,199

if you've been following social media

360

00:14:35,750 --> 00:14:33,199

posts from people in cornwall over the

361

00:14:37,910 --> 00:14:35,760

last week or as we say if you've been

362

00:14:39,910 --> 00:14:37,920

listening to ufo headline news here at

363

00:14:41,750 --> 00:14:39,920

inception radio network

364

00:14:44,069 --> 00:14:41,760

then you may think the alien invasion of

365

00:14:46,069 --> 00:14:44,079

earth together we can make your blonde

366

00:14:48,150 --> 00:14:46,079

blonde sheer blonde go blonder

367

00:14:50,150 --> 00:14:48,160

collection by john frieda lightens and

368

00:14:53,189 --> 00:14:50,160

brightens hair two full shades to give

369

00:14:54,949 --> 00:14:53,199

you your best blind every day hair talks

370

00:14:57,110 --> 00:14:54,959

make your statement with sheer blanco

371

00:15:00,310 --> 00:14:57,120

blunder collection only from john frieda

372

00:15:02,470 --> 00:15:00,320

has begun in that english peninsula

373

00:15:05,269 --> 00:15:02,480

multiple seemingly unconnected people

374

00:15:08,230 --> 00:15:05,279

posted videos over twitter and instagram

375

00:15:10,629 --> 00:15:08,240

showing a strange swarming formation

376

00:15:13,829 --> 00:15:10,639

hovering in the sky a hashtag ufo

377

00:15:16,870 --> 00:15:13,839

cornwall but it wasn't aliens it was

378

00:15:18,870 --> 00:15:16,880

likely the work of eden project

379

00:15:22,230 --> 00:15:18,880

well we've touched on this before here's

380

00:15:24,790 --> 00:15:22,240

a little bit more about the eden project

381

00:15:27,350 --> 00:15:24,800

it's a series of massive greenhouses in

382

00:15:30,150 --> 00:15:27,360

cornwall with connected transparent

383

00:15:32,870 --> 00:15:30,160

domes filled with exotic plants

384

00:15:35,509 --> 00:15:32,880

it's a visually stunning place and it's

385

00:15:38,310 --> 00:15:35,519

about to launch a new attraction called

386

00:15:40,310 --> 00:15:38,320

journey into space which includes an

387

00:15:42,710 --> 00:15:40,320

astronaut academy an astronomy

388

00:15:46,069 --> 00:15:42,720

photography exhibit and something called

389

00:15:49,030 --> 00:15:46,079

a quote alien encounter end quotes

390

00:15:51,990 --> 00:15:49,040

so the swarming ufo videos seem to have

391

00:15:54,949 --> 00:15:52,000

been orchestrated by the eden project

392

00:15:57,829 --> 00:15:54,959

yes that looked likely last week as a

393

00:16:00,550 --> 00:15:57,839

publicity stunt tied to the alien-themed

394

00:16:03,110 --> 00:16:00,560

part of their experience the eden

395

00:16:05,430 --> 00:16:03,120

project describes the alien encounter as

396

00:16:08,150 --> 00:16:05,440

quote an alien spaceship has

397

00:16:10,470 --> 00:16:08,160

crash-landed at eden and its inhabitants

398

00:16:12,230 --> 00:16:10,480

are stranded here we're working on a way

399

00:16:14,870 --> 00:16:12,240

to communicate with these mysterious

400

00:16:17,670 --> 00:16:14,880

life forms can you help us decode their

401
00:16:19,350 --> 00:16:17,680
signals and language end quotes and

402
00:16:22,629 --> 00:16:19,360
according to amanda coozer who wrote

403
00:16:23,910 --> 00:16:22,639
this it sounds a bit like the 2016 movie

404
00:16:26,790 --> 00:16:23,920
arrival

405
00:16:30,470 --> 00:16:26,800
a tweet on monday included a short video

406
00:16:32,470 --> 00:16:30,480
showing the swarm ufo beaming down to

407
00:16:35,269 --> 00:16:32,480
the eden project and that seems to

408
00:16:36,389 --> 00:16:35,279
confirm the origin for the social media

409
00:16:38,629 --> 00:16:36,399
videos

410
00:16:41,110 --> 00:16:38,639
the eden project has not yet responded

411
00:16:42,470 --> 00:16:41,120
to any request for comment

412
00:16:44,389 --> 00:16:42,480
well this broadcaster found some

413
00:16:46,870 --> 00:16:44,399

response earlier this week but it was

414

00:16:49,990 --> 00:16:46,880

rather cryptic as far as marketing

415

00:16:51,829 --> 00:16:50,000

stunts go the ufo sightings a decent one

416

00:16:54,230 --> 00:16:51,839

the eden project had the good sense to

417

00:16:56,790 --> 00:16:54,240

create an interesting looking presence

418

00:16:59,509 --> 00:16:56,800

that mimics natural phenomena like

419

00:17:03,829 --> 00:16:59,519

insect swarms or that thing called a

420

00:17:06,630 --> 00:17:03,839

starling murmuration yep enormous flocks

421

00:17:08,630 --> 00:17:06,640

of birds generally starlings moving and

422

00:17:11,990 --> 00:17:08,640

twisting forming and unforming in the

423

00:17:13,189 --> 00:17:12,000

sky it just doesn't look like anything

424

00:17:14,710 --> 00:17:13,199

natural

425

00:17:17,590 --> 00:17:14,720

some people will be disappointed to

426

00:17:20,069 --> 00:17:17,600

discover this hoax but never fear says

427

00:17:23,029 --> 00:17:20,079

amanda cooser there will always be more

428

00:17:24,870 --> 00:17:23,039

ufo sightings to enjoy

429

00:17:27,189 --> 00:17:24,880

we have a little bit of mixed emotion

430

00:17:29,190 --> 00:17:27,199

regarding this story being covered at

431

00:17:30,870 --> 00:17:29,200

all by cnet

432

00:17:34,470 --> 00:17:30,880

the long and the short of it it's kind

433

00:17:37,590 --> 00:17:34,480

of a main streamish website the gist of

434

00:17:40,310 --> 00:17:37,600

it is no this wasn't a ufo move along

435

00:17:42,630 --> 00:17:40,320

folks uh so it goes

436

00:17:45,430 --> 00:17:42,640

let's move along and go to spokane

437

00:17:48,630 --> 00:17:45,440

washington our source here is television

438

00:17:50,150 --> 00:17:48,640

station kqh and their website

439

00:17:53,909 --> 00:17:50,160

here's the story

440

00:17:56,470 --> 00:17:53,919

was there a ufo sighting at sky fest

441

00:17:59,669 --> 00:17:56,480

well hold on first of all what is sky

442

00:18:02,070 --> 00:17:59,679

fest okay here it is the fairchild sky

443

00:18:04,710 --> 00:18:02,080

fest it was held july 29th through the

444

00:18:07,750 --> 00:18:04,720

30th free admission to the public it was

445

00:18:10,310 --> 00:18:07,760

the air force's 70th anniversary and

446

00:18:12,310 --> 00:18:10,320

fairchild air force base's 75th

447

00:18:15,270 --> 00:18:12,320

anniversary what we found on their

448

00:18:17,510 --> 00:18:15,280

website was amazing lists of performers

449

00:18:19,430 --> 00:18:17,520

the united states air force thunderbirds

450

00:18:22,230 --> 00:18:19,440

the united states air force academy

451
00:18:24,549 --> 00:18:22,240
wings of blue parachute team the third

452
00:18:26,470 --> 00:18:24,559
strike wing walkers that sounds

453
00:18:28,710 --> 00:18:26,480
extraordinary and something sounding

454
00:18:31,750 --> 00:18:28,720
enormous a kc-135

455
00:18:34,630 --> 00:18:31,760
strato tanker we have no idea there were

456
00:18:36,630 --> 00:18:34,640
demonstrations and static displays

457
00:18:39,430 --> 00:18:36,640
groups from whiteman air force base out

458
00:18:43,510 --> 00:18:39,440
of missouri joint base elmendorf out of

459
00:18:45,029 --> 00:18:43,520
arkansas etc the list goes on but there

460
00:18:48,230 --> 00:18:45,039
might have been visitors who weren't on

461
00:18:50,710 --> 00:18:48,240
that official list here's the article

462
00:18:53,190 --> 00:18:50,720
were you at sky fest this past weekend

463
00:18:55,590 --> 00:18:53,200

and did you see a ufo

464

00:18:57,669 --> 00:18:55,600

at least one man claims he did and

465

00:18:59,909 --> 00:18:57,679

believes he has the video evidence to

466

00:19:01,990 --> 00:18:59,919

support his case yep you can link to

467

00:19:04,310 --> 00:19:02,000

that video later gentlelisteners at

468

00:19:06,310 --> 00:19:04,320

ufoheadlinenews.com

469

00:19:09,270 --> 00:19:06,320

said john whitslow quote

470

00:19:11,270 --> 00:19:09,280

never have i captured anything like this

471

00:19:12,870 --> 00:19:11,280

ever end quotes

472

00:19:14,710 --> 00:19:12,880

john whitlow just thought he was

473

00:19:17,270 --> 00:19:14,720

recording the thunderbirds at that

474

00:19:19,669 --> 00:19:17,280

airshow in fairchild air force base but

475

00:19:22,230 --> 00:19:19,679

when he watched the video back he

476
00:19:24,950 --> 00:19:22,240
noticed two different unidentified

477
00:19:25,830 --> 00:19:24,960
flying objects in the frame

478
00:19:27,510 --> 00:19:25,840
quote

479
00:19:29,909 --> 00:19:27,520
it would seem like it was moving

480
00:19:33,029 --> 00:19:29,919
incredibly fast since the announcer said

481
00:19:35,590 --> 00:19:33,039
those jets were going 500 miles per hour

482
00:19:38,230 --> 00:19:35,600
and they looked slow by comparison

483
00:19:40,710 --> 00:19:38,240
some people talk about meteors or birds

484
00:19:43,270 --> 00:19:40,720
or bugs close to the camera

485
00:19:45,669 --> 00:19:43,280
i looked at it so closely i don't think

486
00:19:48,230 --> 00:19:45,679
it's any of those end quotes

487
00:19:49,350 --> 00:19:48,240
the video shows a white object at five

488
00:19:51,270 --> 00:19:49,360

seconds in

489

00:19:54,470 --> 00:19:51,280

darting by the frame before the

490

00:19:56,950 --> 00:19:54,480

thunderbirds pass each other later 36

491

00:19:59,110 --> 00:19:56,960

seconds in you can see a smaller black

492

00:20:02,310 --> 00:19:59,120

object come through the frame following

493

00:20:04,470 --> 00:20:02,320

behind the ascending thunderbird

494

00:20:06,789 --> 00:20:04,480

quote carl sagan said there are more

495

00:20:09,750 --> 00:20:06,799

stars out there than grains of sand on

496

00:20:12,070 --> 00:20:09,760

the beach said which though quote and if

497

00:20:13,590 --> 00:20:12,080

there are that many stars and many are

498

00:20:15,750 --> 00:20:13,600

older than ours

499

00:20:17,590 --> 00:20:15,760

well it seems since i believe we'll get

500

00:20:20,070 --> 00:20:17,600

to the stars someday why not the

501
00:20:22,470 --> 00:20:20,080
possibility that someone has gotten here

502
00:20:25,110 --> 00:20:22,480
already end quotes

503
00:20:26,710 --> 00:20:25,120
station khq called the national ufo

504
00:20:29,830 --> 00:20:26,720
reporting center that's peter

505
00:20:32,390 --> 00:20:29,840
davenport's place in davenport iowa to

506
00:20:35,270 --> 00:20:32,400
ask if the object was a possible sign of

507
00:20:37,590 --> 00:20:35,280
intelligent life peter davenport did not

508
00:20:39,909 --> 00:20:37,600
comment at the time saying he'd like to

509
00:20:41,190 --> 00:20:39,919
see a little more evidence first

510
00:20:43,830 --> 00:20:41,200
wise

511
00:20:45,669 --> 00:20:43,840
a shift in trajectory now takes us to

512
00:20:48,390 --> 00:20:45,679
ufostalker.com

513
00:20:49,590 --> 00:20:48,400

and the great state of new york city of

514

00:20:51,669 --> 00:20:49,600

rochester

515

00:20:54,149 --> 00:20:51,679

it's the setting for mufon sighting

516

00:20:56,390 --> 00:20:54,159

number 85534

517

00:20:59,190 --> 00:20:56,400

this event took place on the 28th of

518

00:21:01,110 --> 00:20:59,200

july 2017. it wasn't reported till the

519

00:21:03,029 --> 00:21:01,120

31st of july

520

00:21:04,310 --> 00:21:03,039

here's what the witness says by way of

521

00:21:07,750 --> 00:21:04,320

summary

522

00:21:11,430 --> 00:21:07,760

four glowing orange lights pass directly

523

00:21:14,549 --> 00:21:11,440

overhead at five minute intervals

524

00:21:17,110 --> 00:21:14,559

there is video here it's fascinating

525

00:21:18,789 --> 00:21:17,120

video gentle listeners the narrative

526

00:21:21,350 --> 00:21:18,799

provided by the witness especially in

527

00:21:24,390 --> 00:21:21,360

video number two well you just have to

528

00:21:26,870 --> 00:21:24,400

see it we do not think this is a hoax

529

00:21:30,310 --> 00:21:26,880

the viewing distance here is unknown the

530

00:21:32,789 --> 00:21:30,320

altitude is over 500 feet nope no cloud

531

00:21:35,270 --> 00:21:32,799

cover the citing duration here was 20

532

00:21:37,350 --> 00:21:35,280

minutes however those two videos are

533

00:21:39,350 --> 00:21:37,360

short they sum it up

534

00:21:42,310 --> 00:21:39,360

the object features none

535

00:21:43,909 --> 00:21:42,320

the flight path straight line path

536

00:21:46,470 --> 00:21:43,919

well this broadcaster might take a

537

00:21:48,789 --> 00:21:46,480

little issue with that it did a lot of

538

00:21:50,630 --> 00:21:48,799

ziggy zaggy stuff and the witness

539

00:21:51,830 --> 00:21:50,640

reports the object was shaped like a

540

00:21:54,310 --> 00:21:51,840

disc

541

00:21:56,230 --> 00:21:54,320

weather-wise in rochester new york

542

00:21:59,190 --> 00:21:56,240

maximum temperature at the time of the

543

00:22:02,230 --> 00:21:59,200

sighting 72 degrees fahrenheit 22

544

00:22:05,510 --> 00:22:02,240

degrees celsius minimum temperature 56

545

00:22:07,270 --> 00:22:05,520

degrees fahrenheit 13 degrees celsius

546

00:22:09,669 --> 00:22:07,280

weather conditions don't seem to play

547

00:22:12,149 --> 00:22:09,679

any part here other than the temperature

548

00:22:15,430 --> 00:22:12,159

and visibility here's the sighting in

549

00:22:18,310 --> 00:22:15,440

the first person words of our witness

550

00:22:20,950 --> 00:22:18,320

after a late dinner myself my fiance and

551
00:22:22,710 --> 00:22:20,960
my sister who was visiting from florida

552
00:22:24,390 --> 00:22:22,720
were sitting on our mother's screened in

553
00:22:25,990 --> 00:22:24,400
porch having some drinks and

554
00:22:28,390 --> 00:22:26,000
conversation

555
00:22:30,549 --> 00:22:28,400
i noticed the first light come into view

556
00:22:32,950 --> 00:22:30,559
above a nearby tree

557
00:22:34,789 --> 00:22:32,960
it appeared to be moving towards us and

558
00:22:37,669 --> 00:22:34,799
it passed overhead

559
00:22:39,110 --> 00:22:37,679
i noted the unusual orange light seemed

560
00:22:41,029 --> 00:22:39,120
to glimmer

561
00:22:43,110 --> 00:22:41,039
but i dismissed this as an aircraft's

562
00:22:44,149 --> 00:22:43,120
lighting being distorted by the porches

563
00:22:46,149 --> 00:22:44,159

screening

564

00:22:48,870 --> 00:22:46,159

the viewable sky between the top of the

565

00:22:50,789 --> 00:22:48,880

tree and the top of the porch allowed

566

00:22:51,990 --> 00:22:50,799

for approximately five to ten seconds of

567

00:22:53,750 --> 00:22:52,000

viewing

568

00:22:56,070 --> 00:22:53,760

the greater rochester international

569

00:22:58,390 --> 00:22:56,080

airport is nearby and aircraft can

570

00:22:59,590 --> 00:22:58,400

routinely and readily be seen in this

571

00:23:02,390 --> 00:22:59,600

area

572

00:23:05,270 --> 00:23:02,400

after approximately five minutes another

573

00:23:07,750 --> 00:23:05,280

orange light appeared at the same spot

574

00:23:09,750 --> 00:23:07,760

in the sky moving in the exact same

575

00:23:11,830 --> 00:23:09,760

trajectory as the first

576
00:23:13,750 --> 00:23:11,840
i went outside the porch so that i could

577
00:23:14,789 --> 00:23:13,760
obtain an unobstructed view of this

578
00:23:20,789 --> 00:23:14,799
light

579
00:23:23,350 --> 00:23:20,799
as if it was fire like there was no

580
00:23:24,630 --> 00:23:23,360
smoke there was no tail trailing behind

581
00:23:26,390 --> 00:23:24,640
the light

582
00:23:29,590 --> 00:23:26,400
as i observed this light it passed

583
00:23:31,909 --> 00:23:29,600
nearly straight overhead and the closer

584
00:23:34,470 --> 00:23:31,919
it came to being overhead the glowing

585
00:23:37,669 --> 00:23:34,480
orange light seemed to dim it seemed to

586
00:23:40,390 --> 00:23:37,679
disappear as a car headlights would as

587
00:23:42,390 --> 00:23:40,400
it passed i was able to capture two cell

588
00:23:45,510 --> 00:23:42,400

phone videos of those lights lights

589

00:23:47,430 --> 00:23:45,520

number two and three they're 21 and 58

590

00:23:49,669 --> 00:23:47,440

seconds respectively

591

00:23:52,070 --> 00:23:49,679

i retrieved a small pair of eight by

592

00:23:53,669 --> 00:23:52,080

binoculars from my truck and was able to

593

00:23:55,590 --> 00:23:53,679

more closely observe the approach of

594

00:23:58,230 --> 00:23:55,600

light number four

595

00:24:00,870 --> 00:23:58,240

the orange light appears more fire like

596

00:24:03,750 --> 00:24:00,880

with the binoculars it wasn't glaring it

597

00:24:05,110 --> 00:24:03,760

was more like a shimmering glow

598

00:24:07,590 --> 00:24:05,120

i followed the light through the

599

00:24:10,789 --> 00:24:07,600

binoculars as it passed overhead and the

600

00:24:13,830 --> 00:24:10,799

light again dimmed and could not be seen

601
00:24:17,430 --> 00:24:13,840
it was then that i could see a form a

602
00:24:19,269 --> 00:24:17,440
shape it appeared to be a disk

603
00:24:21,269 --> 00:24:19,279
from my perspective and through my

604
00:24:23,350 --> 00:24:21,279
binoculars i gauged it to be

605
00:24:25,990 --> 00:24:23,360
approximately the diameter of my

606
00:24:28,149 --> 00:24:26,000
thumbnail held at arm's length

607
00:24:30,070 --> 00:24:28,159
this disc appeared to be faintly

608
00:24:32,549 --> 00:24:30,080
illuminated by the lights of the city

609
00:24:34,070 --> 00:24:32,559
from below and it also blocked the stars

610
00:24:35,909 --> 00:24:34,080
as i followed it

611
00:24:38,470 --> 00:24:35,919
i was only able to observe this object

612
00:24:39,590 --> 00:24:38,480
for a few seconds before a house blocked

613
00:24:41,590 --> 00:24:39,600

my view

614

00:24:43,909 --> 00:24:41,600

it was very difficult to judge the

615

00:24:46,470 --> 00:24:43,919

altitude of this disc

616

00:24:48,390 --> 00:24:46,480

the sky was clear my best guess would be

617

00:24:49,750 --> 00:24:48,400

between five thousand feet and eight

618

00:24:52,470 --> 00:24:49,760

thousand feet

619

00:24:55,190 --> 00:24:52,480

likewise the speed is also difficult it

620

00:24:57,750 --> 00:24:55,200

was an unknown altitude again

621

00:25:00,710 --> 00:24:57,760

my best guess on the speed would be 100

622

00:25:02,870 --> 00:25:00,720

miles per hour to 200 miles per hour it

623

00:25:05,350 --> 00:25:02,880

took approximately one minute for the

624

00:25:07,190 --> 00:25:05,360

lights to transit approximately 70

625

00:25:09,430 --> 00:25:07,200

degrees of sky

626

00:25:11,750 --> 00:25:09,440

i've been a licensed private pilot

627

00:25:14,870 --> 00:25:11,760

although not currently current since

628

00:25:16,710 --> 00:25:14,880

2003 i'm very familiar with aircraft of

629

00:25:18,149 --> 00:25:16,720

all types and their operational

630

00:25:20,789 --> 00:25:18,159

characteristics

631

00:25:23,110 --> 00:25:20,799

at no time were navigational or

632

00:25:25,029 --> 00:25:23,120

anti-collision lights visible

633

00:25:27,510 --> 00:25:25,039

i used off-center viewing trying to

634

00:25:29,830 --> 00:25:27,520

ascertain any especially when i was able

635

00:25:31,669 --> 00:25:29,840

to view this object after the passing of

636

00:25:34,549 --> 00:25:31,679

light number four

637

00:25:37,990 --> 00:25:34,559

at no time was there any aircraft sound

638

00:25:41,190 --> 00:25:38,000

heard again i'm very familiar with jet

639

00:25:43,430 --> 00:25:41,200

piston and rotor noises

640

00:25:47,590 --> 00:25:43,440

that is the uncanny part of this to this

641

00:25:49,750 --> 00:25:47,600

broadcaster the lack of sound yikes

642

00:25:52,390 --> 00:25:49,760

we're about to experience a silent

643

00:25:53,669 --> 00:25:52,400

running situation here we gotta bounce
