

UFO Headline News Wednesday August 2nd, 2017

Listen on

inceptionradionetwork.com

1
00:00:07,490 --> 00:00:04,610
hello it's Wednesday August 2nd 2017 you

2
00:00:10,190 --> 00:00:07,500
are listening to inception Radio Network

3
00:00:14,680 --> 00:00:10,200
voice of the fringe majority this is

4
00:00:17,480 --> 00:00:14,690
Carol Caro with UFO headline news

5
00:00:20,750 --> 00:00:17,490
the moon and the ringed planet Saturn

6
00:00:23,150 --> 00:00:20,760
pair up together at nightfall in the

7
00:00:25,880 --> 00:00:23,160
same vicinity of the sky you can note

8
00:00:28,730 --> 00:00:25,890
another bright celestial beauty that

9
00:00:30,800 --> 00:00:28,740
ruddy star and Taurus the brightest star

10
00:00:33,590 --> 00:00:30,810
in the constellation Scorpius the

11
00:00:37,010 --> 00:00:33,600
scorpion the writer of our article here

12
00:00:39,590 --> 00:00:37,020
Bruce McClure for Earth's sky org and he

13
00:00:41,600 --> 00:00:39,600

says clouded out tonight not to worry

14

00:00:45,139 --> 00:00:41,610

you watch for them tomorrow night as

15

00:00:47,060 --> 00:00:45,149

well Saturn and Antares are bright they

16

00:00:49,549 --> 00:00:47,070

both exhibit that first magnitude

17

00:00:51,590 --> 00:00:49,559

brightness but you can distinguish

18

00:00:54,860 --> 00:00:51,600

between these two celestial luminaries

19

00:00:57,560 --> 00:00:54,870

by color Saturn displays a golden hue

20

00:00:59,900 --> 00:00:57,570

and Antares as we know has that ruddy

21

00:01:02,000 --> 00:00:59,910

complexion if it's hard for you to

22

00:01:04,009 --> 00:01:02,010

discern the color try using a pair of

23

00:01:06,320 --> 00:01:04,019

binoculars if you can get your hands on

24

00:01:10,100 --> 00:01:06,330

them and that way you can see Saturn and

25

00:01:13,490 --> 00:01:10,110

Antares a little closer better yet try a

26
00:01:15,800 --> 00:01:13,500
telescope Oh devoutly to be sought you

27
00:01:19,070 --> 00:01:15,810
can view Saturn's glorious rings even

28
00:01:21,230 --> 00:01:19,080
with a modest backyard variety did you

29
00:01:24,020 --> 00:01:21,240
know that as seen from Earth the

30
00:01:27,440 --> 00:01:24,030
orientation of Saturn's rings appears to

31
00:01:29,810 --> 00:01:27,450
shift regularly over time we did not

32
00:01:32,359 --> 00:01:29,820
know that this happens as we orbit the

33
00:01:35,149 --> 00:01:32,369
Sun yearly while Saturn orbits once

34
00:01:38,690 --> 00:01:35,159
every twenty nine point five years this

35
00:01:40,850 --> 00:01:38,700
year 2017 as we gaze across space to

36
00:01:43,520 --> 00:01:40,860
Saturn we are seeing the North Face of

37
00:01:46,100 --> 00:01:43,530
Saturn's rings these rings are inclined

38
00:01:48,499 --> 00:01:46,110

at 27 degrees toward the earth this year

39

00:01:50,929 --> 00:01:48,509

which is about as wide open as they ever

40

00:01:53,090 --> 00:01:50,939

appear to us from our world we see the

41

00:01:55,429 --> 00:01:53,100

North Face of the Rings for about 15

42

00:01:57,830 --> 00:01:55,439

years and nine months and then the South

43

00:02:00,350 --> 00:01:57,840

Face for about thirteen years and nine

44

00:02:02,990 --> 00:02:00,360

months that difference the two years is

45

00:02:05,389 --> 00:02:03,000

due to Saturn's eccentric orbit with a

46

00:02:07,700 --> 00:02:05,399

planet traveling most swiftly at its

47

00:02:10,279 --> 00:02:07,710

perihelion and more slowly at its

48

00:02:12,860 --> 00:02:10,289

aphelion the north side of Saturn's

49

00:02:16,250 --> 00:02:12,870

rings will open up most fully October

50

00:02:19,870 --> 00:02:16,260

26th 20:17 at that point they'll exhibit

51
00:02:22,220 --> 00:02:19,880
that maximum inclination of 27 degrees

52
00:02:24,680 --> 00:02:22,230
thereafter the inclination of Saturn's

53
00:02:27,590 --> 00:02:24,690
rings will slowly but surely diminish

54
00:02:30,440 --> 00:02:27,600
until the Rings appear edge-on that's

55
00:02:33,350 --> 00:02:30,450
going to happen in 2025 a mark your

56
00:02:35,360 --> 00:02:33,360
calendar at this juncture Saturn's rings

57
00:02:36,890 --> 00:02:35,370
will appear invisible to earthly

58
00:02:39,770 --> 00:02:36,900
observers for about a month and a half

59
00:02:42,890 --> 00:02:39,780
that's because the Rings are so thin in

60
00:02:44,810 --> 00:02:42,900
contrast to their width backwards in

61
00:02:47,390 --> 00:02:44,820
time the astronomer Christiaan Huygens

62
00:02:53,300 --> 00:02:47,400
or Higgins some pronounce it that way

63
00:02:55,880 --> 00:02:53,310

it's spelled hu YG ENS in 1629 to 1695

64

00:02:57,650 --> 00:02:55,890

had an explanation for the periodic

65

00:03:00,890 --> 00:02:57,660

disappearance of Saturn's rings and

66

00:03:04,700 --> 00:03:00,900

something he titled Systema ass eternium

67

00:03:07,520 --> 00:03:04,710

that was published in 1659 if you're

68

00:03:09,560 --> 00:03:07,530

into the look of old writings old papers

69

00:03:11,450 --> 00:03:09,570

there's an incredible graphic that

70

00:03:14,060 --> 00:03:11,460

accompanies this story you can find a

71

00:03:17,270 --> 00:03:14,070

link to it later at UFO headline news

72

00:03:20,900 --> 00:03:17,280

calm it shows you a page from Higgins

73

00:03:25,370 --> 00:03:20,910

Systema Saturnian it's cool the bottom

74

00:03:27,500 --> 00:03:25,380

line on August 2nd 2017 use the moon to

75

00:03:30,920 --> 00:03:27,510

locate the ringed planet Saturn as

76

00:03:33,199 --> 00:03:30,930

darkness falls missing tonight try again

77

00:03:35,930 --> 00:03:33,209

tomorrow night and speaking of going

78

00:03:38,300 --> 00:03:35,940

back in time well it is way back

79

00:03:42,020 --> 00:03:38,310

Wednesday so coming up is part two of

80

00:03:44,620 --> 00:03:42,030

the alien shot dead by military police

81

00:03:47,720 --> 00:03:44,630

don't go away but now let's talk about

82

00:03:50,350 --> 00:03:47,730

Proxima be it's another article from

83

00:03:52,699 --> 00:03:50,360

earth sky org written by Deborah bird

84

00:03:55,160 --> 00:03:52,709

interestingly enough this article has

85

00:03:58,970 --> 00:03:55,170

two headlines we found one is an

86

00:04:01,100 --> 00:03:58,980

earth-like atmosphere for Proxima be but

87

00:04:04,820 --> 00:04:01,110

the other one is no earth like

88

00:04:07,460 --> 00:04:04,830

atmosphere for Proxima be so let's see

89

00:04:10,970 --> 00:04:07,470

how this works out here's the story in

90

00:04:12,740 --> 00:04:10,980

August 2016 when scientists announced

91

00:04:15,400 --> 00:04:12,750

the discovery of a planet orbiting the

92

00:04:18,650 --> 00:04:15,410

nearest known star Proxima Centauri

93

00:04:21,710 --> 00:04:18,660

people got excited that's largely

94

00:04:24,490 --> 00:04:21,720

because it's not just any planet it's a

95

00:04:27,030 --> 00:04:24,500

planet similar to size in earth-orbiting

96

00:04:29,860 --> 00:04:27,040

in its star's habitable zone that

97

00:04:34,630 --> 00:04:29,870

Goldilocks zone where everything is just

98

00:04:38,290 --> 00:04:34,640

right at 4.2 light-years or 25 trillion

99

00:04:40,240 --> 00:04:38,300

miles to earth Proxima B is vastly too

100

00:04:42,520 --> 00:04:40,250

far away to be explored in our lifetimes

101
00:04:44,530 --> 00:04:42,530
although that hasn't stopped dreamers

102
00:04:46,270 --> 00:04:44,540
and visionaries like the folks at

103
00:04:49,620 --> 00:04:46,280
breakthrough initiatives they're

104
00:04:52,090 --> 00:04:49,630
devising plans to explore this still

105
00:04:54,910 --> 00:04:52,100
theoretical studies are the order of the

106
00:04:59,320 --> 00:04:54,920
day for Proxima be a recent one suggests

107
00:05:01,630 --> 00:04:59,330
that Proxima be quote may not be able to

108
00:05:03,820 --> 00:05:01,640
keep a grip on its atmosphere leaving

109
00:05:06,460 --> 00:05:03,830
the surface exposed to harmful stellar

110
00:05:10,270 --> 00:05:06,470
radiation and reducing its potential for

111
00:05:12,490 --> 00:05:10,280
habitability end quote the habitable

112
00:05:14,920 --> 00:05:12,500
zone to astronomers means the potential

113
00:05:18,450 --> 00:05:14,930

for liquid water to exist on a planet's

114

00:05:20,980 --> 00:05:18,460

surface life as we know it needs water

115

00:05:24,040 --> 00:05:20,990

but an atmosphere is another essential

116

00:05:26,260 --> 00:05:24,050

ingredient for life the team statement

117

00:05:28,690 --> 00:05:26,270

said this quote having the right

118

00:05:30,790 --> 00:05:28,700

atmosphere allows for climate regulation

119

00:05:33,010 --> 00:05:30,800

the maintenance of a water friendly

120

00:05:35,950 --> 00:05:33,020

surface pressure and shielding from

121

00:05:38,380 --> 00:05:35,960

hazardous space weather and in addition

122

00:05:41,770 --> 00:05:38,390

the housing of life's chemical building

123

00:05:43,900 --> 00:05:41,780

blocks end quote this new computer model

124

00:05:46,810 --> 00:05:43,910

which was part of a NASA study was

125

00:05:48,490 --> 00:05:46,820

published July 24th 2017 in the

126

00:05:51,640 --> 00:05:48,500

peer-reviewed Astrophysical Journal

127

00:05:54,790 --> 00:05:51,650

Letters considered what would happen if

128

00:05:56,770 --> 00:05:54,800

earth orbited Proxima Centauri the study

129

00:05:58,810 --> 00:05:56,780

suggests Earth's atmosphere wouldn't

130

00:06:01,720 --> 00:05:58,820

survive in such close proximity to

131

00:06:04,320 --> 00:06:01,730

Proxima which is an active red dwarf

132

00:06:07,720 --> 00:06:04,330

star that emits high-energy extreme

133

00:06:09,970 --> 00:06:07,730

ultraviolet radiation this radiation has

134

00:06:12,580 --> 00:06:09,980

the potential to ionize gases in a

135

00:06:16,360 --> 00:06:12,590

planet's atmosphere that is it knocks

136

00:06:18,790 --> 00:06:16,370

electrons off atoms and produces a swath

137

00:06:21,700 --> 00:06:18,800

of electrically charged particles in

138

00:06:24,160 --> 00:06:21,710

this process the newly formed electrons

139

00:06:26,680 --> 00:06:24,170

gain enough energy that they can readily

140

00:06:29,800 --> 00:06:26,690

escape a planet's gravity and race out

141

00:06:32,470 --> 00:06:29,810

of the atmosphere on earth this clearly

142

00:06:35,260 --> 00:06:32,480

isn't happening but our Sun is a more

143

00:06:38,080 --> 00:06:35,270

sedate star than Proxima Kathryn Garcia

144

00:06:39,520 --> 00:06:38,090

sage a space scientist NASA's Goddard

145

00:06:42,280 --> 00:06:39,530

Space Flight Center in Greenbelt

146

00:06:44,080 --> 00:06:42,290

Maryland she and her colleagues used a

147

00:06:47,230 --> 00:06:44,090

computer model for Earth's atmosphere

148

00:06:50,560 --> 00:06:47,240

magnetic field and gravity as proxies

149

00:06:52,960 --> 00:06:50,570

for Proxima B they also calculated how

150

00:06:55,120 --> 00:06:52,970

much radiation Proxima Centauri produces

151
00:06:56,879 --> 00:06:55,130
on average based on observations

152
00:06:59,500 --> 00:06:56,889
gathered from NASA's Chandra x-ray

153
00:07:02,379 --> 00:06:59,510
Observatory in Proxima Centauri's

154
00:07:05,290 --> 00:07:02,389
habitable zone Proxima B encounters

155
00:07:07,390 --> 00:07:05,300
bouts of extreme ultraviolet radiation

156
00:07:09,610 --> 00:07:07,400
hundreds of times greater than Earth

157
00:07:12,340 --> 00:07:09,620
does from the Sun that radiation

158
00:07:15,159 --> 00:07:12,350
generates enough energy to strip away

159
00:07:18,340 --> 00:07:15,169
not just the lightest molecules hydrogen

160
00:07:21,219 --> 00:07:18,350
for instance but also over time heavier

161
00:07:23,320 --> 00:07:21,229
elements such as oxygen and nitrogen a

162
00:07:25,810 --> 00:07:23,330
space scientist at the University of

163
00:07:28,480 --> 00:07:25,820

Massachusetts in Lowell Oh for a cohen

164

00:07:31,360 --> 00:07:28,490

co-author of the study said this quote

165

00:07:33,640 --> 00:07:31,370

the question is how much of the

166

00:07:36,159 --> 00:07:33,650

atmosphere is lost and how quickly does

167

00:07:39,040 --> 00:07:36,169

this process occur if we estimate that

168

00:07:40,990 --> 00:07:39,050

time we can calculate how long it takes

169

00:07:43,270 --> 00:07:41,000

the atmosphere to completely escape and

170

00:07:46,450 --> 00:07:43,280

compare that to the planet's lifetime

171

00:07:49,029 --> 00:07:46,460

end quotes the model shows Proxima

172

00:07:51,250 --> 00:07:49,039

Centauri's powerful radiation drains the

173

00:07:54,279 --> 00:07:51,260

earth-like atmosphere as much as ten

174

00:07:57,430 --> 00:07:54,289

thousand times faster than what happens

175

00:07:59,950 --> 00:07:57,440

on earth here's how Garcia sage explains

176

00:08:02,440 --> 00:07:59,960

it quote this was a simple calculation

177

00:08:05,140 --> 00:08:02,450

based on average activity from the host

178

00:08:06,879 --> 00:08:05,150

star it doesn't consider variations like

179

00:08:09,580 --> 00:08:06,889

extreme heating in the stars atmosphere

180

00:08:12,400 --> 00:08:09,590

or violent stellar disturbances to the

181

00:08:14,710 --> 00:08:12,410

exoplanets magnetic field things that we

182

00:08:18,010 --> 00:08:14,720

would expect provide even more ionizing

183

00:08:19,870 --> 00:08:18,020

radiation and Atmospheric escape but

184

00:08:23,170 --> 00:08:19,880

it's orbital distance from its star

185

00:08:26,190 --> 00:08:23,180

Proxima Centauri the exoplanet Proxima

186

00:08:28,750 --> 00:08:26,200

be nearest known exoplanet to Earth

187

00:08:31,180 --> 00:08:28,760

likely could not sustain an earth-like

188

00:08:34,300 --> 00:08:31,190

atmosphere and this is according to this

189

00:08:35,649 --> 00:08:34,310

new theoretical study Jeremy Drake an

190

00:08:37,209 --> 00:08:35,659

astrophysicist at the

191

00:08:39,550 --> 00:08:37,219

harvard-smithsonian Center for

192

00:08:43,180 --> 00:08:39,560

Astrophysics how author of this study

193

00:08:45,510 --> 00:08:43,190

said quote things can get interesting if

194

00:08:48,760 --> 00:08:45,520

an exoplanet holds on to its atmosphere

195

00:08:50,290 --> 00:08:48,770

but Proxima bees atmospheric loss rates

196

00:08:52,900 --> 00:08:50,300

here are so high

197

00:08:55,030 --> 00:08:52,910

that habitability is implausible this

198

00:08:58,360 --> 00:08:55,040

questions the habitability of planets

199

00:09:01,360 --> 00:08:58,370

around such red dwarfs in general and

200

00:09:04,240 --> 00:09:01,370

quotes so here's the bottom line Proxima

201
00:09:07,240 --> 00:09:04,250
B is the nearest known exoplanet and it

202
00:09:09,880 --> 00:09:07,250
orbits in its star's habitable zone but

203
00:09:11,980 --> 00:09:09,890
a new study suggests it might not be

204
00:09:14,430 --> 00:09:11,990
able to hold on to its atmosphere long

205
00:09:17,079 --> 00:09:14,440
enough for life to develop

206
00:09:20,650 --> 00:09:17,089
let's see what's been developing over at

207
00:09:22,389 --> 00:09:20,660
ufos stalker comm shall we here's a UFO

208
00:09:25,990 --> 00:09:22,399
sighting from Green Valley Lake

209
00:09:29,350 --> 00:09:26,000
California its MUFON case number 85 for

210
00:09:31,840 --> 00:09:29,360
63 the date of the sighting is the 26th

211
00:09:36,000 --> 00:09:31,850
of July this year it was reported July

212
00:09:40,060 --> 00:09:36,010
29th here's the summary took pics of

213
00:09:43,720 --> 00:09:40,070

unusual pink and blue laced clouds later

214

00:09:46,240 --> 00:09:43,730

saw blue long object first picture

215

00:09:49,120 --> 00:09:46,250

breaks into four or five blue objects

216

00:09:52,569 --> 00:09:49,130

second picture object ascended in

217

00:09:54,519 --> 00:09:52,579

seconds there are photographs obviously

218

00:09:56,829 --> 00:09:54,529

submitted with this account and you can

219

00:10:00,370 --> 00:09:56,839

find them later for your own analysis at

220

00:10:03,370 --> 00:10:00,380

UFO headline news calm the viewing

221

00:10:07,000 --> 00:10:03,380

distance here was 501 feet eventually

222

00:10:09,699 --> 00:10:07,010

one mile the altitude was over 500 feet

223

00:10:12,250 --> 00:10:09,709

and at the time over Green Valley Lake

224

00:10:14,560 --> 00:10:12,260

California there was cloud cover the

225

00:10:17,079 --> 00:10:14,570

sighting duration one minute object

226

00:10:20,319 --> 00:10:17,089

features unknown object flight path

227

00:10:23,710 --> 00:10:20,329

likewise unknown this object was shaped

228

00:10:27,130 --> 00:10:23,720

like a cylinder the temperature at the

229

00:10:29,920 --> 00:10:27,140

time in California Green Valley Lake 77

230

00:10:32,470 --> 00:10:29,930

degrees Fahrenheit 25 degrees Celsius

231

00:10:35,290 --> 00:10:32,480

down to a minimum of 50 degrees

232

00:10:37,900 --> 00:10:35,300

Fahrenheit 10 degrees Celsius the

233

00:10:40,510 --> 00:10:37,910

minimum maximum mean visibility all

234

00:10:42,699 --> 00:10:40,520

stacked up the same 10 miles 16

235

00:10:45,220 --> 00:10:42,709

kilometers and there wasn't anything you

236

00:10:48,490 --> 00:10:45,230

have normal about the weather however

237

00:10:52,060 --> 00:10:48,500

this it was something not normal and

238

00:10:54,370 --> 00:10:52,070

here we go I was walking and praying on

239

00:10:56,650 --> 00:10:54,380

a Forest Service Road near my home in

240

00:10:58,900 --> 00:10:56,660

San Bernardino Mountains I was

241

00:11:00,910 --> 00:10:58,910

approximately 19 miles west of Big Bear

242

00:11:03,369 --> 00:11:00,920

Lake the elevation there is

243

00:11:06,669 --> 00:11:03,379

approximately 7,000 feet

244

00:11:09,669 --> 00:11:06,679

I looked up and noticed a beautiful pink

245

00:11:13,029 --> 00:11:09,679

and blue laced swirling cloud formation

246

00:11:15,900 --> 00:11:13,039

I took two pictures with my iPhone at

247

00:11:18,909 --> 00:11:15,910

that time I didn't see anything unusual

248

00:11:23,079 --> 00:11:18,919

but later while viewing these pictures I

249

00:11:24,849 --> 00:11:23,089

noticed a blue cigar shaped object from

250

00:11:27,669 --> 00:11:24,859

the first to the second picture this

251
00:11:30,909 --> 00:11:27,679
object ascended at that point it broke

252
00:11:34,239 --> 00:11:30,919
into four or five objects of the same

253
00:11:36,939 --> 00:11:34,249
color but different shapes I have never

254
00:11:39,669 --> 00:11:36,949
seen anything like it before we have had

255
00:11:42,369 --> 00:11:39,679
some intermittent monsoonal clouds this

256
00:11:45,039 --> 00:11:42,379
past week but this particular day was

257
00:11:46,259 --> 00:11:45,049
warm sunny and the skies were mostly

258
00:11:49,719 --> 00:11:46,269
clear

259
00:11:53,079 --> 00:11:49,729
very interesting walking and praying

260
00:11:55,749 --> 00:11:53,089
well could that be a possible candidate

261
00:11:58,449 --> 00:11:55,759
for that basket marked conscious contact

262
00:12:00,789 --> 00:11:58,459
and we leave it for your decision gentle

263
00:12:03,639 --> 00:12:00,799

listeners now let's stay in the state of

264

00:12:07,869 --> 00:12:03,649

California but travel about 440 miles

265

00:12:10,509 --> 00:12:07,879

north a slight jog west oh if you know

266

00:12:12,579 --> 00:12:10,519

the way to San Jose it's right about

267

00:12:15,699 --> 00:12:12,589

there it's a city called Concord

268

00:12:18,519 --> 00:12:15,709

California and it's the next sighting up

269

00:12:22,569 --> 00:12:18,529

move on has given it a case number for

270

00:12:25,419 --> 00:12:22,579

tracking and ID purposes that number 855

271

00:12:27,699 --> 00:12:25,429

one to the date of this sighting is July

272

00:12:31,439 --> 00:12:27,709

30th this year and it got a same-day

273

00:12:34,869 --> 00:12:31,449

report the summary floating and

274

00:12:36,549 --> 00:12:34,879

following the Ike's the sighting

275

00:12:41,259 --> 00:12:36,559

specifics include a viewing distance

276

00:12:45,249 --> 00:12:41,269

quite close 21 to 100 feet the altitude

277

00:12:47,499 --> 00:12:45,259

is described as landed and treetop the

278

00:12:49,449 --> 00:12:47,509

sighting duration five minutes this

279

00:12:52,119 --> 00:12:49,459

object features simply get that

280

00:12:54,849 --> 00:12:52,129

description of unknown its flight path

281

00:12:57,219 --> 00:12:54,859

was a straight-line path and then other

282

00:13:00,489 --> 00:12:57,229

and this object was shaped like a sphere

283

00:13:02,139 --> 00:13:00,499

here's the account first person I was

284

00:13:04,749 --> 00:13:02,149

taking a video of the night sky to

285

00:13:06,699 --> 00:13:04,759

hopefully catch a shooting star after I

286

00:13:09,189 --> 00:13:06,709

started recording I went inside for

287

00:13:12,039 --> 00:13:09,199

something to drink and when I returned I

288

00:13:14,529 --> 00:13:12,049

noticed something floating down on my

289

00:13:15,939 --> 00:13:14,539

camera screen I looked up to confirm

290

00:13:19,070 --> 00:13:15,949

that what I'd seen on the screen was

291

00:13:22,400 --> 00:13:19,080

really there it was definitely there

292

00:13:25,520 --> 00:13:22,410

almost floating down changing shapes and

293

00:13:29,030 --> 00:13:25,530

then it disappeared after it landed a

294

00:13:31,430 --> 00:13:29,040

few minutes later I looked up and I saw

295

00:13:33,830 --> 00:13:31,440

another one moving in from west to east

296

00:13:37,040 --> 00:13:33,840

right behind it was something with a

297

00:13:39,560 --> 00:13:37,050

solid white light following that second

298

00:13:42,260 --> 00:13:39,570

object and then they both went out of my

299

00:13:44,660 --> 00:13:42,270

sight line over the trees I'm uploading

300

00:13:47,000 --> 00:13:44,670

two different videos of this one is raw

301
00:13:50,090 --> 00:13:47,010
footage and the other is edited to try

302
00:13:52,340 --> 00:13:50,100
to clear it up a bit however gentle

303
00:13:54,230 --> 00:13:52,350
listeners don't bother to look for that

304
00:13:56,330 --> 00:13:54,240
video there was either a glitch in the

305
00:13:58,460 --> 00:13:56,340
matrix or gremlins in the pipeline

306
00:14:01,700 --> 00:13:58,470
somewhere there's even a comment here

307
00:14:04,580 --> 00:14:01,710
after this submission from the submitter

308
00:14:07,730 --> 00:14:04,590
it's someone called Mike and he says why

309
00:14:10,610 --> 00:14:07,740
did they not post my video well all we

310
00:14:13,330 --> 00:14:10,620
can say is check out UFO stalker com

311
00:14:16,010 --> 00:14:13,340
maybe somebody has corrected this issue

312
00:14:19,370 --> 00:14:16,020
alrighty then it's way back Wednesday

313
00:14:24,040 --> 00:14:19,380

here is part two of our story alien

314

00:14:27,260 --> 00:14:24,050

being shot dead by MPs January 18

315

00:14:30,380 --> 00:14:27,270

1978 this features the military

316

00:14:32,570 --> 00:14:30,390

complexes at Fort Dix and Fort McGuire

317

00:14:34,520 --> 00:14:32,580

in years to come they would be combined

318

00:14:38,210 --> 00:14:34,530

but at that time they were two separate

319

00:14:40,700 --> 00:14:38,220

entities more or less and just the recap

320

00:14:44,390 --> 00:14:40,710

here during the early morning hours of

321

00:14:47,210 --> 00:14:44,400

January 18th 1978 UFOs were sighted

322

00:14:49,190 --> 00:14:47,220

flying over Fort Dix and Fort McGuire

323

00:14:52,790 --> 00:14:49,200

Air Force Base they were adjacent

324

00:14:54,920 --> 00:14:52,800

military bases shortly afterwards an Air

325

00:14:56,990 --> 00:14:54,930

Force security patrol was ordered to go

326

00:15:00,710 --> 00:14:57,000

to the back gate of McGuire Air Force

327

00:15:02,750 --> 00:15:00,720

Base they needed to allow entry to at

328

00:15:04,550 --> 00:15:02,760

Hackensack Meridian health we believe

329

00:15:05,530 --> 00:15:04,560

the best healthcare is perfectly

330

00:15:07,940 --> 00:15:05,540

orchestrated

331

00:15:10,120 --> 00:15:07,950

researchers working with doctors to

332

00:15:12,380 --> 00:15:10,130

treat the most complex conditions

333

00:15:14,870 --> 00:15:12,390

specialists identifying problems sooner

334

00:15:17,420 --> 00:15:14,880

and everything you need from primary

335

00:15:21,260 --> 00:15:17,430

care to emergency care home health to

336

00:15:24,169 --> 00:15:21,270

rehab is all perfectly in tune here when

337

00:15:27,470 --> 00:15:24,179

everyone works together your war gets

338

00:15:29,199 --> 00:15:27,480

better Hackensack Meridian health life

339

00:15:32,210 --> 00:15:29,209

years ahead

340

00:15:35,389 --> 00:15:32,220

new jersey state police they were

341

00:15:37,879 --> 00:15:35,399

searching for something one of the

342

00:15:40,789 --> 00:15:37,889

airmen on duty at that time was our hero

343

00:15:43,609 --> 00:15:40,799

here sergeant Jeff Morse nope not his

344

00:15:45,710 --> 00:15:43,619

real name the state trooper from New

345

00:15:48,949 --> 00:15:45,720

Jersey State Police told Morse that a

346

00:15:51,439 --> 00:15:48,959

Fort Dix MP military police had been

347

00:15:54,470 --> 00:15:51,449

pursuing a low-flying object that had

348

00:15:57,439 --> 00:15:54,480

hovered over his car and then a small

349

00:16:01,280 --> 00:15:57,449

being with a large head and slender body

350

00:16:03,650 --> 00:16:01,290

appeared in front of his car the MP had

351

00:16:07,429 --> 00:16:03,660

panicked he'd shot that alien several

352

00:16:09,379 --> 00:16:07,439

times with a 45 automatic the being fled

353

00:16:12,439 --> 00:16:09,389

over the fence between the two bases

354

00:16:16,729 --> 00:16:12,449

before falling dying on the deserted

355

00:16:19,939 --> 00:16:16,739

runway a chaos ensued the usual cover up

356

00:16:22,369 --> 00:16:19,949

troops were brought in these troops also

357

00:16:25,309 --> 00:16:22,379

wore blue berets which were a feature of

358

00:16:27,829 --> 00:16:25,319

these military bases but the faces were

359

00:16:29,689 --> 00:16:27,839

not familiar to Moore's or the others

360

00:16:31,849 --> 00:16:29,699

and they seemed to have arrived at the

361

00:16:33,859 --> 00:16:31,859

scene awfully quickly there is

362

00:16:36,409 --> 00:16:33,869

suggestion they were on the base all the

363

00:16:38,449 --> 00:16:36,419

time later that day a team from

364

00:16:43,189 --> 00:16:38,459

wright-patterson Air Force Base arrived

365

00:16:46,099 --> 00:16:43,199

in a c-141 cargo aircraft crated up the

366

00:16:49,009 --> 00:16:46,109

body loaded it on board and took off

367

00:16:51,169 --> 00:16:49,019

Morse and his companion were warned not

368

00:16:52,429 --> 00:16:51,179

to talk about the incident or they would

369

00:16:54,229 --> 00:16:52,439

be court-martialed

370

00:16:55,639 --> 00:16:54,239

two days later Morse and other

371

00:16:57,829 --> 00:16:55,649

participants were taken to

372

00:17:00,859 --> 00:16:57,839

wright-patterson air force base dayton

373

00:17:03,439 --> 00:17:00,869

ohio where they underwent intimidating

374

00:17:07,069 --> 00:17:03,449

interrogation and were again warned not

375

00:17:10,189 --> 00:17:07,079

to talk about the incident we left off

376

00:17:14,120 --> 00:17:10,199

last week with Morse not his real name

377

00:17:17,120 --> 00:17:14,130

being ushered into a room for that

378

00:17:19,819 --> 00:17:17,130

examination as you recall the setting

379

00:17:21,949 --> 00:17:19,829

was sparse wright-patterson like that of

380

00:17:24,919 --> 00:17:21,959

a court-martial room is how it's

381

00:17:28,250 --> 00:17:24,929

described a table and chairs in an

382

00:17:30,139 --> 00:17:28,260

unadorned room and we're picturing just

383

00:17:33,619 --> 00:17:30,149

very dirty windows for some reason a

384

00:17:37,159 --> 00:17:33,629

dark atmosphere here is how Jeff Morse

385

00:17:39,440 --> 00:17:37,169

describes it quote while we were there

386

00:17:42,230 --> 00:17:39,450

we were all together except for actual

387

00:17:44,690 --> 00:17:42,240

interrogations my interrogation had two

388

00:17:48,200 --> 00:17:44,700

men one apparently a civilian with a

389

00:17:50,390 --> 00:17:48,210

pipe and beard who never spoke at one

390

00:17:53,870 --> 00:17:50,400

point there were three men one played

391

00:17:57,530 --> 00:17:53,880

nice guy one mean guy and of course that

392

00:18:00,230 --> 00:17:57,540

silent civilian all they wanted to know

393

00:18:02,420 --> 00:18:00,240

was the nature of the incident what I

394

00:18:06,110 --> 00:18:02,430

knew and then they told me about my duty

395

00:18:08,870 --> 00:18:06,120

to keep my mouth shut I signed a form

396

00:18:12,380 --> 00:18:08,880

and it is supposed to bind me for life

397

00:18:14,510 --> 00:18:12,390

and quotes never one says Morse recalls

398

00:18:17,000 --> 00:18:14,520

did any of the interrogators offer

399

00:18:19,970 --> 00:18:17,010

information no explanation of this

400

00:18:22,970 --> 00:18:19,980

incident nor did anyone ever refer to

401
00:18:25,460 --> 00:18:22,980
they retrieved dead body which had been

402
00:18:27,350 --> 00:18:25,470
crated up and removed or suggests that

403
00:18:30,470 --> 00:18:27,360
it might have been of extraterrestrial

404
00:18:32,480 --> 00:18:30,480
origin said Morse they beat around the

405
00:18:35,870 --> 00:18:32,490
bush all the references to it were

406
00:18:38,030 --> 00:18:35,880
indirect and quotes the day after the

407
00:18:40,670 --> 00:18:38,040
interrogation Morse returned to McGuire

408
00:18:43,730 --> 00:18:40,680
was debriefed by his commanding officer

409
00:18:47,360 --> 00:18:43,740
Lieutenant Colonel FM and released for

410
00:18:50,330 --> 00:18:47,370
normal duty this incident he said was

411
00:18:52,240 --> 00:18:50,340
not discussed again by anyone it was as

412
00:18:55,820 --> 00:18:52,250
though it had never happened

413
00:18:58,460 --> 00:18:55,830

here's the latest information the last

414

00:19:01,630 --> 00:18:58,470

section of this information is compiled

415

00:19:04,610 --> 00:19:01,640

by Leonard Springfield and Richard Hall

416

00:19:06,500 --> 00:19:04,620

the former Air Force security policeman

417

00:19:11,330 --> 00:19:06,510

who claims to have witnessed a UFO

418

00:19:13,340 --> 00:19:11,340

incident On January 18th 1978 involving

419

00:19:16,370 --> 00:19:13,350

military police at McGuire Air Force

420

00:19:19,390 --> 00:19:16,380

Base New Jersey and adjacent Fort Dix

421

00:19:22,190 --> 00:19:19,400

and New Jersey State Police recently

422

00:19:25,220 --> 00:19:22,200

visited the Washington DC area from

423

00:19:26,930 --> 00:19:25,230

overseas where he's employed and he met

424

00:19:30,800 --> 00:19:26,940

with the authors of this report

425

00:19:33,800 --> 00:19:30,810

Springfield and Hall the fund for UFO

426
00:19:35,810 --> 00:19:33,810
research an organization sponsored a

427
00:19:38,330 --> 00:19:35,820
mini conference to bring Springfield

428
00:19:40,850 --> 00:19:38,340
from Cincinnati Ohio and have

429
00:19:43,280 --> 00:19:40,860
representatives of the fund meet with

430
00:19:45,430 --> 00:19:43,290
the witness as to allow them to form

431
00:19:48,140 --> 00:19:45,440
their own impressions of his credibility

432
00:19:52,580 --> 00:19:48,150
that mini conference took place on

433
00:19:55,850 --> 00:19:52,590
January 24th 1987 at a large shop in the

434
00:19:58,820 --> 00:19:55,860
Washington DC area suburbs in addition

435
00:20:01,039 --> 00:19:58,830
to authors Hall in Springfield and Jeff

436
00:20:04,430 --> 00:20:01,049
Morse not his real name our witness

437
00:20:06,890 --> 00:20:04,440
there was dr. Bruce s Maccabee chairman

438
00:20:09,740 --> 00:20:06,900

of the fund a big name really

439

00:20:12,560 --> 00:20:09,750

well-respected researcher and William H

440

00:20:15,140 --> 00:20:12,570

Hall electronics engineer brother of

441

00:20:18,169 --> 00:20:15,150

Richard Hall were in attendance also

442

00:20:20,299 --> 00:20:18,179

present was dr. John B Carlson from the

443

00:20:23,419 --> 00:20:20,309

University of Maryland an astronomer and

444

00:20:26,029 --> 00:20:23,429

a fund board member was to have been

445

00:20:28,279 --> 00:20:26,039

present but a postponement caused a

446

00:20:30,610 --> 00:20:28,289

reschedule and a conflict he was out of

447

00:20:33,049 --> 00:20:30,620

town on the date of that conference

448

00:20:34,549 --> 00:20:33,059

William hall a former technical

449

00:20:36,230 --> 00:20:34,559

consultant to the National

450

00:20:38,930 --> 00:20:36,240

investigations committee on aerial

451

00:20:40,760 --> 00:20:38,940

phenomena we call them NICAP is

452

00:20:42,340 --> 00:20:40,770

substituted since he had a number of

453

00:20:44,539 --> 00:20:42,350

things in common with Jeff Morse

454

00:20:47,659 --> 00:20:44,549

including a military police background

455

00:20:49,789 --> 00:20:47,669

and overseas duty stations it was felt

456

00:20:51,680 --> 00:20:49,799

he would have the ability to judge Jeff

457

00:20:55,190 --> 00:20:51,690

Morse as credibility as he talked about

458

00:20:57,950 --> 00:20:55,200

his activities by prior arrangement Jeff

459

00:21:00,440 --> 00:20:57,960

Morse remained incognito using only his

460

00:21:02,120 --> 00:21:00,450

first name but he talked freely and

461

00:21:04,940 --> 00:21:02,130

responded to questions by Bruce Maccabee

462

00:21:07,279 --> 00:21:04,950

and William Hall the authors of this

463

00:21:10,430 --> 00:21:07,289

article by the way do know his full name

464

00:21:13,789 --> 00:21:10,440

his employment status his past biography

465

00:21:16,039 --> 00:21:13,799

etc during this questioning and review

466

00:21:17,450 --> 00:21:16,049

of the alleged incident Morse filled in

467

00:21:20,029 --> 00:21:17,460

details that were missing from his

468

00:21:22,610 --> 00:21:20,039

previous account but nothing he offered

469

00:21:24,590 --> 00:21:22,620

was startling or new a number of

470

00:21:27,110 --> 00:21:24,600

questions were clarified and some new

471

00:21:29,690 --> 00:21:27,120

information including claims that can be

472

00:21:32,450 --> 00:21:29,700

checked and proved or disproved were

473

00:21:34,460 --> 00:21:32,460

offered however Hall in Springfield

474

00:21:36,230 --> 00:21:34,470

again were impressed by Morse's

475

00:21:38,840 --> 00:21:36,240

straightforwardness his lack of

476
00:21:40,880 --> 00:21:38,850
embellishment the most significant new

477
00:21:43,130 --> 00:21:40,890
information related by Morris briefly

478
00:21:45,049 --> 00:21:43,140
was his claim that on a trip to the

479
00:21:48,490 --> 00:21:45,059
United States to visit his family in

480
00:21:51,769 --> 00:21:48,500
October of 1986 he had been detained

481
00:21:54,950 --> 00:21:51,779
while in California under obscure

482
00:21:56,750 --> 00:21:54,960
pretenses outraged he filed a lawsuit

483
00:21:59,720 --> 00:21:56,760
against the california-based Authority

484
00:22:01,730 --> 00:21:59,730
and notified Stringfield by letter that

485
00:22:04,159 --> 00:22:01,740
he would return to the United States in

486
00:22:06,910 --> 00:22:04,169
January in 1987 for court appearances

487
00:22:09,100 --> 00:22:06,920
and that that time he would be willing

488
00:22:11,530 --> 00:22:09,110

to meet with Stringfield and dick Hall

489

00:22:15,220 --> 00:22:11,540

and a couple of well trusted other

490

00:22:17,530 --> 00:22:15,230

friends to discuss this matter but as it

491

00:22:19,450 --> 00:22:17,540

turned out during Morse's layover in the

492

00:22:22,090 --> 00:22:19,460

states he could learn nothing about the

493

00:22:24,550 --> 00:22:22,100

cause or the reason for this California

494

00:22:26,890 --> 00:22:24,560

detainment nor the identity of the

495

00:22:30,130 --> 00:22:26,900

source who dictated the pick up and hold

496

00:22:32,710 --> 00:22:30,140

order all of his legal probes for some

497

00:22:35,100 --> 00:22:32,720

inexplicable reason had been stalled in

498

00:22:37,240 --> 00:22:35,110

that tangle of red tape

499

00:22:39,100 --> 00:22:37,250

among other things discussed at this

500

00:22:41,710 --> 00:22:39,110

mini conference was the entire question

501
00:22:44,590 --> 00:22:41,720
of alleged harassment of UFO crash

502
00:22:46,710 --> 00:22:44,600
retrieval witnesses apparently in an

503
00:22:50,290 --> 00:22:46,720
attempt to intimidate them into silence

504
00:22:52,540 --> 00:22:50,300
if Jeff Morris's story is credible he is

505
00:22:54,700 --> 00:22:52,550
potentially an important witness who

506
00:22:56,130 --> 00:22:54,710
would tend to undermine any official

507
00:22:58,210 --> 00:22:56,140
cover-up and

508
00:23:01,000 --> 00:22:58,220
unfortunately this makes him vulnerable

509
00:23:04,030 --> 00:23:01,010
to retaliation which may account for

510
00:23:06,120 --> 00:23:04,040
this detainment it inhibits his ability

511
00:23:08,890 --> 00:23:06,130
to lead a normal life

512
00:23:11,670 --> 00:23:08,900
skepticism about crash retrieval reports

513
00:23:14,020 --> 00:23:11,680

may be fully justified and entirely

514

00:23:17,440 --> 00:23:14,030

understandable on the part of UFO

515

00:23:20,080 --> 00:23:17,450

believers and disbelievers alike unless

516

00:23:23,320 --> 00:23:20,090

they've met Jeff Morse or one of his

517

00:23:25,090 --> 00:23:23,330

many counterparts face-to-face Jeff

518

00:23:27,220 --> 00:23:25,100

Morse has now provided many additional

519

00:23:29,380 --> 00:23:27,230

leads that the authors of this article

520

00:23:32,500 --> 00:23:29,390

are intending to check and they will

521

00:23:35,710 --> 00:23:32,510

report those findings meanwhile the

522

00:23:37,930 --> 00:23:35,720

authenticity of the incident report form

523

00:23:40,420 --> 00:23:37,940

from Morse the one he supplied to

524

00:23:43,750 --> 00:23:40,430

Stringfield and that's reproduced by the

525

00:23:46,060 --> 00:23:43,760

way in the MUFON 1985 UFO symposium

526

00:23:49,060 --> 00:23:46,070

proceedings it was obtained from a

527

00:23:51,550 --> 00:23:49,070

colleague still on active duty and it's

528

00:23:54,510 --> 00:23:51,560

been disputed by the Air Force Office of

529

00:23:57,970 --> 00:23:54,520

Special Investigations of fuzzy on the

530

00:24:01,480 --> 00:23:57,980

grounds that the style and terminology

531

00:24:04,030 --> 00:24:01,490

used allegedly does not follow proper

532

00:24:05,880 --> 00:24:04,040

Air Force style and therefore is

533

00:24:08,170 --> 00:24:05,890

probably a hoax

534

00:24:11,290 --> 00:24:08,180

one of the key statements made by a

535

00:24:14,590 --> 00:24:11,300

fuzzy was that paygrades e 2 and e 3

536

00:24:18,370 --> 00:24:14,600

were given instead of ranks as corporal

537

00:24:20,380 --> 00:24:18,380

and sergeant on this official form aside

538

00:24:23,050 --> 00:24:20,390

from the fact that had claimed all along

539

00:24:25,900 --> 00:24:23,060

this was a rough-draft a back room copy

540

00:24:28,360 --> 00:24:25,910

subject to review and revision and that

541

00:24:30,880 --> 00:24:28,370

minor errors would be corrected by

542

00:24:33,490 --> 00:24:30,890

responsible officials before the final

543

00:24:36,130 --> 00:24:33,500

report was filed this Air Force Office

544

00:24:40,000 --> 00:24:36,140

of Special Investigations statement is

545

00:24:41,740 --> 00:24:40,010

in accurate pay grades rather than ranks

546

00:24:43,290 --> 00:24:41,750

are routinely filed in official Air

547

00:24:45,190 --> 00:24:43,300

Force reports

548

00:24:47,160 --> 00:24:45,200

participants of the mini conference

549

00:24:49,600 --> 00:24:47,170

discussed ways of obtaining additional

550

00:24:52,090 --> 00:24:49,610

information about this incident and

551
00:24:55,450 --> 00:24:52,100
various initiatives are being undertaken

552
00:24:58,930 --> 00:24:55,460
to do so mind you this is a few years

553
00:25:01,210 --> 00:24:58,940
ago we haven't heard much lately but as

554
00:25:03,400 --> 00:25:01,220
a result of this mini conference there

555
00:25:06,100 --> 00:25:03,410
are two additional persons Bruce McAfee

556
00:25:08,770 --> 00:25:06,110
and William Hall they've met now they've

557
00:25:10,900 --> 00:25:08,780
talked with Jeff Morse personally they

558
00:25:13,870 --> 00:25:10,910
can confirm that he is not a quote fairy

559
00:25:16,060 --> 00:25:13,880
tale end quotes he's not a figment of

560
00:25:18,420 --> 00:25:16,070
the imagination and they're now in a

561
00:25:22,120 --> 00:25:18,430
position to help confirm or disconfirm

562
00:25:24,550 --> 00:25:22,130
his story there are official documents

563
00:25:26,830 --> 00:25:24,560

relating to this incident there's a link

564

00:25:29,890 --> 00:25:26,840

that you can find later at UFO headline

565

00:25:32,620 --> 00:25:29,900

news calm thanks again a tip of the hat

566

00:25:34,990 --> 00:25:32,630

to our man in the high castle for this

567

00:25:37,480 --> 00:25:35,000

concept of this story or way back

568

00:25:39,820 --> 00:25:37,490

Wednesday if you'd like sleuth around

569

00:25:42,100 --> 00:25:39,830

we're sure there might be pieces bits

570

00:25:44,590 --> 00:25:42,110

that you can find that we just couldn't

571

00:25:46,420 --> 00:25:44,600

it's something to occupy one's time

572

00:25:49,570 --> 00:25:46,430

speaking of time we've got to fly

573

00:25:51,850 --> 00:25:49,580

because that's a wrap thank you for

574

00:25:55,650 --> 00:25:51,860

listening to inception radio network and

575

00:25:58,870 --> 00:25:55,660

follow us on iTunes radio

576

00:26:02,520 --> 00:25:58,880

we're all in this together this is Carol

577

00:26:07,810 --> 00:26:05,200

okay keep your eyes closed okay I want

578

00:26:10,530 --> 00:26:07,820

to show you my first ever painting all

579

00:26:15,220 --> 00:26:10,540

right okay oh

580

00:26:18,520 --> 00:26:15,230

that's a lot of colors and shades so be

581

00:26:20,650 --> 00:26:18,530

honest what do you think well I like how

582

00:26:22,210 --> 00:26:20,660

if you switch to Geico you could save

583

00:26:25,420 --> 00:26:22,220

hundreds of dollars on car insurance oh

584

00:26:27,700 --> 00:26:25,430

yeah that's that's true yeah here why

585

00:26:30,520 --> 00:26:27,710

don't I hold your paintbrush while you

586

00:26:32,410 --> 00:26:30,530

call them Geico because saving 15% or
