

 UFO Headline News Tuesday August 8th, 2017

 Listen on  
[inceptionradionetwork.com](http://inceptionradionetwork.com)

1  
00:00:07,490 --> 00:00:05,210  
hello it's Tuesday August 8 2017 you are

2  
00:00:10,400 --> 00:00:07,500  
listening to inception Radio Network

3  
00:00:14,289 --> 00:00:10,410  
voice of the fringe majority this is

4  
00:00:16,609 --> 00:00:14,299  
Carol Karl with view fo headline news

5  
00:00:20,269 --> 00:00:16,619  
there's so much going on in our

6  
00:00:23,090 --> 00:00:20,279  
nighttime sky the much-anticipated solar

7  
00:00:25,400 --> 00:00:23,100  
eclipse we've got the Perseids still

8  
00:00:28,220 --> 00:00:25,410  
hanging in there and that bright bright

9  
00:00:31,250 --> 00:00:28,230  
moon in fact the moon is the subject of

10  
00:00:34,850 --> 00:00:31,260  
today's earth sky org report this week

11  
00:00:37,580 --> 00:00:34,860  
watch for a morning moon august 7th was

12  
00:00:38,420 --> 00:00:37,590  
the full moon and a full moon rises at

13  
00:00:41,299 --> 00:00:38,430

sunset

14

00:00:43,790 --> 00:00:41,309

so the August 8th moon rises in the east

15

00:00:45,639 --> 00:00:43,800

within an hour after sunset and it will

16

00:00:48,410 --> 00:00:45,649

rise later and later each evening

17

00:00:50,240 --> 00:00:48,420

although not late enough to leave the

18

00:00:53,569 --> 00:00:50,250

skies moon free for the rest of that

19

00:00:55,939 --> 00:00:53,579

2017 Perseid meteor shower it Peaks this

20

00:00:59,029 --> 00:00:55,949

week in fact on the mornings of August

21

00:01:01,189 --> 00:00:59,039

12th and 13th however you can catch a

22

00:01:03,470 --> 00:01:01,199

date-time moon over your western horizon

23

00:01:06,310 --> 00:01:03,480

after sunrise in the next few mornings

24

00:01:09,200 --> 00:01:06,320

and as Bruce McClure writes whoops

25

00:01:11,630 --> 00:01:09,210

view the moon in your Eastern sky before

26

00:01:14,030 --> 00:01:11,640

going to bed tonight and then look for

27

00:01:16,730 --> 00:01:14,040

it low in your western sky right after

28

00:01:18,859 --> 00:01:16,740

sunrise tomorrow the moon is up in the

29

00:01:21,800 --> 00:01:18,869

daytime much of the time but because

30

00:01:23,440 --> 00:01:21,810

it's pale against the blue sky it isn't

31

00:01:26,330 --> 00:01:23,450

as noticeable as the moon at night

32

00:01:28,399 --> 00:01:26,340

however there are those certain times of

33

00:01:30,770 --> 00:01:28,409

a month when the daytime moon is more

34

00:01:33,620 --> 00:01:30,780

noticeable and the coming week would be

35

00:01:36,080 --> 00:01:33,630

one of those times why is the daytime

36

00:01:38,990 --> 00:01:36,090

moon noticeable now the moon is up

37

00:01:40,760 --> 00:01:39,000

during the day half the time it must be

38

00:01:43,429 --> 00:01:40,770

since it orbits around the whole earth

39

00:01:44,870 --> 00:01:43,439

once a month the crescent moon is hard

40

00:01:47,480 --> 00:01:44,880

to see though because it's so near the

41

00:01:50,149 --> 00:01:47,490

Sun in the sky at the vicinity of last

42

00:01:52,460 --> 00:01:50,159

quarter moon about a week from now you

43

00:01:55,700 --> 00:01:52,470

might have to Crane your neck looking up

44

00:01:57,590 --> 00:01:55,710

to notice that after sunrise out this

45

00:01:59,899 --> 00:01:57,600

week's moon is noticeable simply because

46

00:02:02,679 --> 00:01:59,909

the moon is still showing us most of its

47

00:02:05,959 --> 00:02:02,689

lighted face it appears large in our sky

48

00:02:07,609 --> 00:02:05,969

also in those hours after sunrise the

49

00:02:09,949 --> 00:02:07,619

moon is fairly near the western horizon

50

00:02:12,710 --> 00:02:09,959

so people driving to work or school

51  
00:02:13,520 --> 00:02:12,720  
might catch sight of it at mid northern

52  
00:02:15,680 --> 00:02:13,530  
latitudes

53  
00:02:17,780 --> 00:02:15,690  
in North America the moon will set

54  
00:02:20,270 --> 00:02:17,790  
roughly one and a half hours after

55  
00:02:23,300 --> 00:02:20,280  
sunrise August 9th and was that roughly

56  
00:02:26,180 --> 00:02:23,310  
an hour later after sunrise every day

57  
00:02:27,950 --> 00:02:26,190  
thereafter day by day the lighted

58  
00:02:30,380 --> 00:02:27,960  
portion of the waning gibbous moon will

59  
00:02:32,540 --> 00:02:30,390  
shrink and the half lit last quarter

60  
00:02:35,300 --> 00:02:32,550  
moon will come on or near August 15th

61  
00:02:37,430 --> 00:02:35,310  
watch for that daytime moon it'll climb

62  
00:02:40,370 --> 00:02:37,440  
higher and higher into the western sky

63  
00:02:42,530 --> 00:02:40,380

at sunrise all this coming week so

64

00:02:45,800 --> 00:02:42,540

here's the bottom line starting around

65

00:02:49,640 --> 00:02:45,810

August 9th 2017 look for the daytime

66

00:02:52,460 --> 00:02:49,650

moon in the West after sunrise enjoy as

67

00:02:55,250 --> 00:02:52,470

the old song goes get out and get under

68

00:02:57,080 --> 00:02:55,260

the moon that's what a lot of people are

69

00:03:00,410 --> 00:02:57,090

going to be doing during the Eclipse

70

00:03:02,840 --> 00:03:00,420

getting under the moon etc here's an

71

00:03:06,699 --> 00:03:02,850

article from Earth's sky org headline

72

00:03:08,990 --> 00:03:06,709

why no eclipse every full a new moon

73

00:03:11,750 --> 00:03:09,000

interesting question and here's the

74

00:03:14,600 --> 00:03:11,760

answer a lunar eclipse happens when the

75

00:03:17,120 --> 00:03:14,610

Earth's Sun and Moon align in space with

76  
00:03:19,640 --> 00:03:17,130  
earth in between the Sun and Moon at

77  
00:03:22,400 --> 00:03:19,650  
such times Earth's shadow falls on the

78  
00:03:25,250 --> 00:03:22,410  
full moon causing that lunar eclipse a

79  
00:03:27,380 --> 00:03:25,260  
solar eclipse happens at the opposite

80  
00:03:30,920 --> 00:03:27,390  
phase of the moon new moon when the moon

81  
00:03:32,810 --> 00:03:30,930  
passes between the Earth and Sun so why

82  
00:03:35,539 --> 00:03:32,820  
aren't there eclipses at every new and

83  
00:03:37,370 --> 00:03:35,549  
full moon hello the moon takes about a

84  
00:03:40,130 --> 00:03:37,380  
month to orbit around the Earth

85  
00:03:42,440 --> 00:03:40,140  
if the moon orbited in the same plane as

86  
00:03:45,170 --> 00:03:42,450  
the ecliptic that's Earth's orbital

87  
00:03:47,390 --> 00:03:45,180  
plane we would have two eclipses every

88  
00:03:49,640 --> 00:03:47,400

month there'd be an eclipse of the moon

89

00:03:52,160 --> 00:03:49,650

at every full moon and two weeks later

90

00:03:55,400 --> 00:03:52,170

there'd be an eclipse of the Sun at new

91

00:03:58,340 --> 00:03:55,410

moon for a total of at least 24 eclipses

92

00:04:00,979 --> 00:03:58,350

every year but the moon's orbit is

93

00:04:02,930 --> 00:04:00,989

inclined to Earth's orbit by about 5

94

00:04:05,060 --> 00:04:02,940

degrees twice a month the moon

95

00:04:07,310 --> 00:04:05,070

intersects the ecliptic that's Earth's

96

00:04:08,569 --> 00:04:07,320

orbital plane and those points of

97

00:04:11,330 --> 00:04:08,579

intersection are called

98

00:04:13,490 --> 00:04:11,340

nodes if the moon is going from south to

99

00:04:15,770 --> 00:04:13,500

north in its orbit it's called an

100

00:04:19,099 --> 00:04:15,780

ascending node if the moon is going

101

00:04:21,830 --> 00:04:19,109

north to south it's a descending node if

102

00:04:25,040 --> 00:04:21,840

the full moon or new moon is appreciably

103

00:04:26,810 --> 00:04:25,050

close to one of these nodes then an

104

00:04:30,290 --> 00:04:26,820

eclipse is not only possible

105

00:04:32,630 --> 00:04:30,300

it's inevitable solar and lunar eclipses

106

00:04:34,760 --> 00:04:32,640

always come in pairs with one following

107

00:04:37,310 --> 00:04:34,770

the other in a period of one fortnight

108

00:04:39,890 --> 00:04:37,320

two weeks for example the descending

109

00:04:42,380 --> 00:04:39,900

node partial lunar eclipse on August 7th

110

00:04:45,860 --> 00:04:42,390

and 8th will be followed by an ascending

111

00:04:47,930 --> 00:04:45,870

node total solar eclipse August 21st

112

00:04:50,840 --> 00:04:47,940

we're sure that's on everybody's

113

00:04:53,510 --> 00:04:50,850

calendars at this point earth sky org

114

00:04:55,850 --> 00:04:53,520

includes some pretty cool charts and a

115

00:04:58,070 --> 00:04:55,860

video of what happens when the new moon

116

00:05:00,530 --> 00:04:58,080

and full moon are closely aligned you

117

00:05:03,380 --> 00:05:00,540

can check out those things later at UFO

118

00:05:05,690 --> 00:05:03,390

headline news.com even though the moon's

119

00:05:07,880 --> 00:05:05,700

orbit is inclined to that of Earth and

120

00:05:10,400 --> 00:05:07,890

even though there's not an eclipse with

121

00:05:12,860 --> 00:05:10,410

every full and new moon there are more

122

00:05:15,170 --> 00:05:12,870

eclipses than you might think there are

123

00:05:17,120 --> 00:05:15,180

from four to seven eclipses every year

124

00:05:20,030 --> 00:05:17,130

some are lunar some are solar

125

00:05:23,510 --> 00:05:20,040

some are total and some are partial oh

126

00:05:25,550 --> 00:05:23,520

are marvelous to behold a reminder that

127

00:05:28,190 --> 00:05:25,560

we live on a planet a chance to

128

00:05:29,590 --> 00:05:28,200

experience falling in line with great

129

00:05:32,180 --> 00:05:29,600

worlds in space

130

00:05:35,720 --> 00:05:32,190

staying in space here's something from

131

00:05:38,500 --> 00:05:35,730

amp space.com it's got a byline for

132

00:05:41,750 --> 00:05:38,510

theresa Poulter ovah here's the headline

133

00:05:46,220 --> 00:05:41,760

Hubble telescope detects stratosphere on

134

00:05:49,130 --> 00:05:46,230

a huge alien planet a huge super hot

135

00:05:51,080 --> 00:05:49,140

alien planet has a stratosphere like

136

00:05:53,900 --> 00:05:51,090

Earth does this is according to a new

137

00:05:55,970 --> 00:05:53,910

study quote the result is exciting

138

00:05:57,920 --> 00:05:55,980

because it shows that a common traits of

139

00:06:01,310 --> 00:05:57,930

most of the atmospheres in our solar

140

00:06:03,800 --> 00:06:01,320

system a warm stratosphere can also be

141

00:06:06,440 --> 00:06:03,810

found in exoplanet atmospheres end

142

00:06:09,020 --> 00:06:06,450

quotes that's from study co-author Marc

143

00:06:10,670 --> 00:06:09,030

Marley of NASA's Ames Research Center in

144

00:06:13,580 --> 00:06:10,680

California Silicon Valley

145

00:06:16,790 --> 00:06:13,590

he continued quote we can now compare

146

00:06:18,860 --> 00:06:16,800

processes in exoplanet atmospheres with

147

00:06:20,960 --> 00:06:18,870

the same processes that happen under

148

00:06:23,900 --> 00:06:20,970

different sets of conditions in our own

149

00:06:26,270 --> 00:06:23,910

solar system and quotes the research

150

00:06:29,030 --> 00:06:26,280

team led by Thomas Evans of the

151  
00:06:31,520 --> 00:06:29,040  
University of Exeter in England detected

152  
00:06:36,380 --> 00:06:31,530  
spectral signatures of water molecules

153  
00:06:40,220 --> 00:06:36,390  
in the atmosphere of w ASP - one to one

154  
00:06:43,400 --> 00:06:40,230  
B that's lowercase B a gas giant that

155  
00:06:45,500 --> 00:06:43,410  
about 880 light-years from Earth these

156  
00:06:47,450 --> 00:06:45,510  
signatures indicate that the temperature

157  
00:06:49,970 --> 00:06:47,460  
of the upper layer of the planet's

158  
00:06:52,280 --> 00:06:49,980  
atmosphere increases with the distance

159  
00:06:54,250 --> 00:06:52,290  
from the planet's surface in the bottom

160  
00:06:57,130 --> 00:06:54,260  
layer of the atmosphere the troposphere

161  
00:06:59,480 --> 00:06:57,140  
the temperature decreases with altitude

162  
00:07:05,030 --> 00:06:59,490  
according to what the study team members

163  
00:07:07,430 --> 00:07:05,040

said w ASP - 1 - 1 B lies incredibly

164

00:07:09,710 --> 00:07:07,440

close to its host star completing one

165

00:07:12,140 --> 00:07:09,720

orbit every 1.3 days

166

00:07:15,200 --> 00:07:12,150

the planet is that thing called a hot

167

00:07:18,500 --> 00:07:15,210

Jupiter temperatures at the top of its

168

00:07:21,410 --> 00:07:18,510

atmosphere reach a sizzling 4,500

169

00:07:24,350 --> 00:07:21,420

degrees Fahrenheit that's 2500 degrees

170

00:07:27,290 --> 00:07:24,360

Celsius quote the question of whether

171

00:07:29,150 --> 00:07:27,300

stratosphere z' do or do not form in hot

172

00:07:31,100 --> 00:07:29,160

Jupiters has been one of the major

173

00:07:34,100 --> 00:07:31,110

outstanding questions in exoplanet

174

00:07:36,830 --> 00:07:34,110

research since at least the early 2000s

175

00:07:40,220 --> 00:07:36,840

that's what evan said he continues quote

176

00:07:42,530 --> 00:07:40,230

currently our understanding of exoplanet

177

00:07:45,050 --> 00:07:42,540

atmospheres is pretty basic and limited

178

00:07:47,570 --> 00:07:45,060

every new piece of information we're

179

00:07:50,090 --> 00:07:47,580

able to get represents a significant

180

00:07:52,100 --> 00:07:50,100

step forward gentle listeners if you

181

00:07:54,740 --> 00:07:52,110

want to know more this article goes on

182

00:07:57,020 --> 00:07:54,750

to become quite technical but

183

00:07:59,300 --> 00:07:57,030

informative and you can find a link to

184

00:08:03,140 --> 00:07:59,310

the rest of it later at UF o headline

185

00:08:05,780 --> 00:08:03,150

news calm remember recently NASA called

186

00:08:08,210 --> 00:08:05,790

for someone to fulfill that job

187

00:08:11,450 --> 00:08:08,220

description planetary protection officer

188

00:08:13,610 --> 00:08:11,460

this is a charming response it comes

189

00:08:15,680 --> 00:08:13,620

from the Miami Herald The Associated

190

00:08:18,800 --> 00:08:15,690

Press picked it up it doesn't have a

191

00:08:21,110 --> 00:08:18,810

byline but here's the headline 9 year

192

00:08:24,520 --> 00:08:21,120

old wants to be NASA's planetary

193

00:08:26,930 --> 00:08:24,530

protection officer Trenton New Jersey a

194

00:08:29,360 --> 00:08:26,940

nine-year old New Jersey boy who

195

00:08:32,000 --> 00:08:29,370

described himself as a guardian of the

196

00:08:34,510 --> 00:08:32,010

galaxy is helping to add the real-life

197

00:08:37,909 --> 00:08:34,520

NASA title planetary protection officer

198

00:08:40,040 --> 00:08:37,919

to his resume NASA received an

199

00:08:42,980 --> 00:08:40,050

application for the position from fourth

200

00:08:45,350 --> 00:08:42,990

grader Jack Davis who asked to apply for

201  
00:08:47,750 --> 00:08:45,360  
the job in a letter the agency posted

202  
00:08:49,820 --> 00:08:47,760  
online Jack Davis acknowledged his youth

203  
00:08:52,790 --> 00:08:49,830  
but said that will make it easier for

204  
00:08:54,199 --> 00:08:52,800  
him to learn how to think like an alien

205  
00:08:56,179 --> 00:08:54,209  
he said he

206  
00:08:58,629 --> 00:08:56,189  
in all the space and alien movies he can

207  
00:09:00,980 --> 00:08:58,639  
see and he's great at video games and

208  
00:09:03,530 --> 00:09:00,990  
according to something he wrote in the

209  
00:09:06,949 --> 00:09:03,540  
handwritten letter dated August 3rd a

210  
00:09:09,619 --> 00:09:06,959  
quote my sister says I'm an alien also

211  
00:09:11,840 --> 00:09:09,629  
end quotes Jack received a letter from

212  
00:09:14,929 --> 00:09:11,850  
NASA planetary science director James

213  
00:09:17,090 --> 00:09:14,939

green encouraging him to study hard so

214

00:09:19,189 --> 00:09:17,100

he can one day join them at the agency

215

00:09:20,869 --> 00:09:19,199

the quote we are always looking for

216

00:09:23,629 --> 00:09:20,879

bright future scientists and engineers

217

00:09:25,660 --> 00:09:23,639

to help us and quotes green wrote in his

218

00:09:28,249 --> 00:09:25,670

response which was also posted online

219

00:09:30,799 --> 00:09:28,259

Green told Jack the job is about

220

00:09:33,769 --> 00:09:30,809

protecting other planets and moons from

221

00:09:36,530 --> 00:09:33,779

our germs as the agency explores the

222

00:09:38,569 --> 00:09:36,540

solar system Jack also received a phone

223

00:09:40,639 --> 00:09:38,579

call from planetary research director

224

00:09:43,699 --> 00:09:40,649

Jonathan Rahl thanking him for his

225

00:09:45,980 --> 00:09:43,709

interest that quote at NASA said green

226

00:09:48,139 --> 00:09:45,990

we love to teach kids about space and

227

00:09:51,410 --> 00:09:48,149

inspire them to be the next generation

228

00:09:53,689 --> 00:09:51,420

of explorers and quotes NASA says the

229

00:09:56,600 --> 00:09:53,699

job might not quite live up to its

230

00:09:58,789 --> 00:09:56,610

thrilling title but it is important in

231

00:10:02,150 --> 00:09:58,799

preventing microbial contamination of

232

00:10:05,119 --> 00:10:02,160

Earth and other planets the agency said

233

00:10:06,590 --> 00:10:05,129

it has had the position since the 1960s

234

00:10:08,569 --> 00:10:06,600

let's go

235

00:10:11,090 --> 00:10:08,579

from the home of enterprising

236

00:10:13,639 --> 00:10:11,100

nine-year-old Jack Davis New Jersey to

237

00:10:16,039 --> 00:10:13,649

North Plainfield in the same state

238

00:10:19,609 --> 00:10:16,049

it's MUFON case number eight five six

239

00:10:22,129 --> 00:10:19,619

nine eight courtesy of UFO stalker calm

240

00:10:25,639 --> 00:10:22,139

the date of this sighting was August 6th

241

00:10:29,090 --> 00:10:25,649

2017 it got a same-day report here's the

242

00:10:33,199 --> 00:10:29,100

summary possible UFO sighting fighter

243

00:10:35,509 --> 00:10:33,209

jets extremely low fighter jet training

244

00:10:37,519 --> 00:10:35,519

session there's a photo that accompanies

245

00:10:41,030 --> 00:10:37,529

this account you can find that later at

246

00:10:43,850 --> 00:10:41,040

UFO headline news comm citing specifics

247

00:10:46,639 --> 00:10:43,860

give a viewing distance unknown the

248

00:10:49,309 --> 00:10:46,649

altitude was over 500 feet under cloud

249

00:10:51,769 --> 00:10:49,319

cover the sighting duration was 30

250

00:10:54,049 --> 00:10:51,779

minutes long enough for the witness to

251  
00:10:57,439 --> 00:10:54,059  
make out the object features contained

252  
00:10:59,569 --> 00:10:57,449  
patterned surfaces the object flight

253  
00:11:03,769 --> 00:10:59,579  
path was a path with directional change

254  
00:11:07,910 --> 00:11:03,779  
object shape disc here is the very long

255  
00:11:10,579 --> 00:11:07,920  
account so sit back settle in and enjoy

256  
00:11:13,699 --> 00:11:10,589  
I was watching TV in my living room the

257  
00:11:16,370 --> 00:11:13,709  
balcony door was closed I began to hear

258  
00:11:19,009 --> 00:11:16,380  
a faint roaring sound the sound got

259  
00:11:21,050 --> 00:11:19,019  
louder and louder to the point that my

260  
00:11:24,350 --> 00:11:21,060  
cat was alarmed and looking for the

261  
00:11:28,069 --> 00:11:24,360  
source I went out on my deck about 150

262  
00:11:30,620 --> 00:11:28,079  
to investigate to my amazement I see an

263  
00:11:33,470 --> 00:11:30,630

extremely low plane I thought that must

264

00:11:35,569 --> 00:11:33,480

be the source the roar was easily three

265

00:11:38,329 --> 00:11:35,579

times louder than a normal passenger

266

00:11:40,639 --> 00:11:38,339

plane and I've never heard any plane

267

00:11:43,639 --> 00:11:40,649

while the TV was on in the ten months I

268

00:11:45,980 --> 00:11:43,649

lived here the plane did not look like a

269

00:11:48,110 --> 00:11:45,990

passenger plane either the wings were

270

00:11:50,780 --> 00:11:48,120

shaped much different than passenger

271

00:11:54,650 --> 00:11:50,790

planes my area gets air traffic from

272

00:11:57,410 --> 00:11:54,660

multiple airports big and small as this

273

00:11:59,960 --> 00:11:57,420

thing got closer I realized this is a

274

00:12:02,120 --> 00:11:59,970

fighter jet I was immediately taken

275

00:12:04,930 --> 00:12:02,130

aback because this thing was going to be

276  
00:12:07,790 --> 00:12:04,940  
flying almost completely over my head

277  
00:12:09,430 --> 00:12:07,800  
getting closer I noticed I could

278  
00:12:12,079 --> 00:12:09,440  
actually see a pair of missiles

279  
00:12:15,230 --> 00:12:12,089  
silhouetted in the center of the wings

280  
00:12:17,900 --> 00:12:15,240  
I drew a figure I could not now believe

281  
00:12:20,180 --> 00:12:17,910  
how low this jet was and I felt it

282  
00:12:22,850 --> 00:12:20,190  
couldn't have been safe or legal this

283  
00:12:24,829 --> 00:12:22,860  
jet flew at about a 45 degree angle by

284  
00:12:27,800 --> 00:12:24,839  
the time it passed my apartment building

285  
00:12:30,079 --> 00:12:27,810  
once it had passed overhead the plane

286  
00:12:32,810 --> 00:12:30,089  
banked hard to the left and began

287  
00:12:34,490 --> 00:12:32,820  
circling eventually ending up going to

288  
00:12:37,550 --> 00:12:34,500

the right again but with a greater

289

00:12:40,130 --> 00:12:37,560

altitude at this point 55 to 60 degrees

290

00:12:42,800 --> 00:12:40,140

after reviewing photos of fighter jets

291

00:12:47,960 --> 00:12:42,810

that we use I'd say this jet was most

292

00:12:50,809 --> 00:12:47,970

similar to an f-16 or an f-18 Hornet at

293

00:12:53,120 --> 00:12:50,819

this point I notice another object in

294

00:12:55,759 --> 00:12:53,130

the sky this one immediately looks

295

00:12:58,460 --> 00:12:55,769

different it truly looked like the

296

00:13:01,370 --> 00:12:58,470

flying disc but it was tilted at a

297

00:13:04,160 --> 00:13:01,380

diagonal position the downward end was

298

00:13:06,170 --> 00:13:04,170

kind of pointed away and it was to the

299

00:13:07,870 --> 00:13:06,180

right of me again you can see this in

300

00:13:11,300 --> 00:13:07,880

the figures I drew and submitted I

301  
00:13:13,850 --> 00:13:11,310  
wasn't sure what his craft was it could

302  
00:13:15,980 --> 00:13:13,860  
have been a jet - maybe with reflections

303  
00:13:18,439 --> 00:13:15,990  
some certain atmospheric condition

304  
00:13:21,790 --> 00:13:18,449  
making it look like something else or

305  
00:13:24,009 --> 00:13:21,800  
was this beyond that regardless

306  
00:13:27,100 --> 00:13:24,019  
this object appeared to me to be quote

307  
00:13:29,410 --> 00:13:27,110  
floating in the wind and quotes at first

308  
00:13:32,079 --> 00:13:29,420  
but then I saw it start to head towards

309  
00:13:35,019 --> 00:13:32,089  
the right to the southwest the jet

310  
00:13:36,850 --> 00:13:35,029  
continued to circle and climb while

311  
00:13:40,150 --> 00:13:36,860  
maneuvering toward the left side of this

312  
00:13:42,850 --> 00:13:40,160  
unknown object the unknown object then

313  
00:13:45,490 --> 00:13:42,860

started moving to the left towards the

314

00:13:47,230 --> 00:13:45,500

jet their apparent altitudes were

315

00:13:50,290 --> 00:13:47,240

different however so it wasn't likely

316

00:13:53,590 --> 00:13:50,300

they were going to crash this is when

317

00:13:56,019 --> 00:13:53,600

the loud roar became really loud I

318

00:13:56,560 --> 00:13:56,029

witnessed three more planes coming from

319

00:13:58,360 --> 00:13:56,570

the West

320

00:14:00,160 --> 00:13:58,370

I could tell immediately these were

321

00:14:02,530 --> 00:14:00,170

planes they weren't something unknown

322

00:14:05,800 --> 00:14:02,540

and that they were most likely the same

323

00:14:08,380 --> 00:14:05,810

type of jet I've been watching now I'm

324

00:14:10,840 --> 00:14:08,390

thinking this must be a training

325

00:14:12,910 --> 00:14:10,850

exercise and because of the heavy and

326

00:14:15,430 --> 00:14:12,920

low overcast they're doing their drills

327

00:14:18,610 --> 00:14:15,440

lower even though that first plane was

328

00:14:21,400 --> 00:14:18,620

uncomfortably low but then the unknown

329

00:14:24,069 --> 00:14:21,410

object began to climb and circle around

330

00:14:25,769 --> 00:14:24,079

and descend while the planes were all

331

00:14:28,180 --> 00:14:25,779

still maneuvering in the sky

332

00:14:31,389 --> 00:14:28,190

seriously this looked like a shot from

333

00:14:33,819 --> 00:14:31,399

Top Gun that film I am still in

334

00:14:36,760 --> 00:14:33,829

disbelief all these objects appear to be

335

00:14:39,460 --> 00:14:36,770

dogfighting or practicing evasion

336

00:14:41,650 --> 00:14:39,470

techniques this lasted for about two to

337

00:14:44,740 --> 00:14:41,660

three minutes the passenger planes at

338

00:14:46,780 --> 00:14:44,750

that point were also in the area they

339

00:14:49,269 --> 00:14:46,790

were pretty low as the other planes and

340

00:14:51,850 --> 00:14:49,279

such were dancing with each other the

341

00:14:55,150 --> 00:14:51,860

unknown object then got even smaller and

342

00:14:57,639 --> 00:14:55,160

smaller and at a pretty quick pace fled

343

00:15:03,610 --> 00:14:57,649

south the Jets did follow pursuit and

344

00:15:05,650 --> 00:15:03,620

the loud roaring diminished pace has

345

00:15:07,630 --> 00:15:05,660

grown to 5,000 stores and Counting

346

00:15:09,460 --> 00:15:07,640

that's twice as many helpful locations

347

00:15:11,560 --> 00:15:09,470

as those big warehouse stores combined

348

00:15:13,269 --> 00:15:11,570

but we're not just about numbers we're

349

00:15:14,920 --> 00:15:13,279

about helping neighbors because each one

350

00:15:17,560 --> 00:15:14,930

of our stores is part of your community

351

00:15:19,780 --> 00:15:17,570

to celebrate join us for the 5,000 store

352

00:15:21,519 --> 00:15:19,790

sale we have daily offers and incredible

353

00:15:24,130 --> 00:15:21,529

savings throughout the store for four

354

00:15:25,960 --> 00:15:24,140

days only hurry in the 5,000 store sale

355

00:15:27,880 --> 00:15:25,970

ends Monday only at your neighborhood

356

00:15:29,530 --> 00:15:27,890

ace offers now at a participating stores

357

00:15:32,380 --> 00:15:29,540

Friday through Monday only see store for

358

00:15:35,220 --> 00:15:32,390

details then 10 minutes later the

359

00:15:37,049 --> 00:15:35,230

roaring was back growing in loud

360

00:15:38,790 --> 00:15:37,059

I could hear the jet overhead that at

361

00:15:41,759 --> 00:15:38,800

first I couldn't see it it was up in the

362

00:15:44,879 --> 00:15:41,769

clouds now flying back north and the

363

00:15:47,629 --> 00:15:44,889

roaring also faded the other jets the

364

00:15:50,910 --> 00:15:47,639

unknown object nowhere to be seen

365

00:15:53,759 --> 00:15:50,920

another five to ten minutes pass and I

366

00:15:56,309 --> 00:15:53,769

hear that redshift effects of the

367

00:15:58,590 --> 00:15:56,319

roaring jet coming back overhead heading

368

00:16:02,040 --> 00:15:58,600

in a different direction this cycle

369

00:16:03,869 --> 00:16:02,050

repeated several more times I got the

370

00:16:04,619 --> 00:16:03,879

impression that this jet was searching

371

00:16:07,319 --> 00:16:04,629

for something

372

00:16:09,960 --> 00:16:07,329

could be possible that it was just

373

00:16:12,569 --> 00:16:09,970

running some type of drills ultimately I

374

00:16:14,489 --> 00:16:12,579

want to know exactly what I saw

375

00:16:16,470 --> 00:16:14,499

is there any way for me to find out if

376

00:16:18,900 --> 00:16:16,480

the military just ran a training mission

377

00:16:21,809 --> 00:16:18,910

over my apartment at an extremely low

378

00:16:25,559 --> 00:16:21,819

altitude was the unknown object really a

379

00:16:27,929 --> 00:16:25,569

jet and it just looked different and why

380

00:16:30,119 --> 00:16:27,939

did the unknown object seem to float

381

00:16:34,350 --> 00:16:30,129

around before maneuvering more

382

00:16:37,049 --> 00:16:34,360

drastically oh witness what an account

383

00:16:39,449 --> 00:16:37,059

thank you so much for the submission

384

00:16:41,639 --> 00:16:39,459

lots of pertinent questions there toward

385

00:16:44,309 --> 00:16:41,649

the end is there a way of finding out

386

00:16:47,639 --> 00:16:44,319

when military exercises are conducted

387

00:16:49,860 --> 00:16:47,649

over your heads before or after

388

00:16:52,799 --> 00:16:49,870

it's the during that we're dealing with

389

00:16:55,379 --> 00:16:52,809

here lots of mysteries with a slight

390

00:16:59,009 --> 00:16:55,389

shift in trajectory we head toward the

391

00:17:04,350 --> 00:16:59,019

Hoosier State Indiana city of Sher Ervil

392

00:17:06,269 --> 00:17:04,360

that spelled s CH ER e r VI ll e that's

393

00:17:08,909 --> 00:17:06,279

the setting from MUFON sighting number

394

00:17:11,340 --> 00:17:08,919

eight five five six to the date of this

395

00:17:14,760 --> 00:17:11,350

sighting is July 28th but it wasn't

396

00:17:18,659 --> 00:17:14,770

reported till August first both in 2017

397

00:17:22,679 --> 00:17:18,669

in summary round bright white object

398

00:17:26,159 --> 00:17:22,689

appearing disappearing in sky not moving

399

00:17:27,960 --> 00:17:26,169

in a literal path there are photos with

400

00:17:31,049 --> 00:17:27,970

this report you can check them out later

401  
00:17:33,510 --> 00:17:31,059  
do your own analysis in the comfort of

402  
00:17:36,299 --> 00:17:33,520  
your home by just heading to UFO

403  
00:17:38,450 --> 00:17:36,309  
headline news calm the sighting

404  
00:17:42,630 --> 00:17:38,460  
specifics viewing distance unknown

405  
00:17:45,379 --> 00:17:42,640  
altitude 500 feet or less then over 500

406  
00:17:48,250 --> 00:17:45,389  
feet and yep there was cloud cover

407  
00:17:50,950 --> 00:17:48,260  
sighting duration 50 minutes

408  
00:17:53,290 --> 00:17:50,960  
but in spite of almost an hour the only

409  
00:17:56,440 --> 00:17:53,300  
features the witnesses were able to

410  
00:17:59,440 --> 00:17:56,450  
detect are described as other the flight

411  
00:18:02,260 --> 00:17:59,450  
path stationary hovering and then path

412  
00:18:06,460 --> 00:18:02,270  
and then path with directional change

413  
00:18:08,380 --> 00:18:06,470

path and yep more hovering and this

414

00:18:12,280 --> 00:18:08,390

object is said to have been shaped like

415

00:18:15,760 --> 00:18:12,290

an egg it's another nice juicy report so

416

00:18:18,610 --> 00:18:15,770

here we go on Friday July 28 at around

417

00:18:20,680 --> 00:18:18,620

7:35 p.m. my girlfriend and I were

418

00:18:23,520 --> 00:18:20,690

driving northbound on Indianapolis

419

00:18:25,840 --> 00:18:23,530

Boulevard its United States highway 41

420

00:18:27,460 --> 00:18:25,850

we were going to fill up our propane

421

00:18:30,040 --> 00:18:27,470

tank for our six-year-old daughter's

422

00:18:32,950 --> 00:18:30,050

birthday party while driving to a city

423

00:18:35,860 --> 00:18:32,960

called Sher evil Indiana I noticed a

424

00:18:37,780 --> 00:18:35,870

round very bright light hovering high in

425

00:18:40,660 --> 00:18:37,790

the sky to the west side of the street

426

00:18:43,270 --> 00:18:40,670

the light was so bright I would describe

427

00:18:46,300 --> 00:18:43,280

it as a spotlight glaring right into my

428

00:18:48,610 --> 00:18:46,310

eyes yeah it caught my attention in the

429

00:18:50,560 --> 00:18:48,620

bright blue sky I told my girlfriend

430

00:18:53,050 --> 00:18:50,570

look in the direction of the object and

431

00:18:55,720 --> 00:18:53,060

I asked her to take video of it with her

432

00:18:58,000 --> 00:18:55,730

phone after having difficulties with her

433

00:19:00,730 --> 00:18:58,010

phone I just told her to use my phone's

434

00:19:03,550 --> 00:19:00,740

camera she brought up my camera on my

435

00:19:05,980 --> 00:19:03,560

phone and proceeded to video this object

436

00:19:09,070 --> 00:19:05,990

at first she couldn't see it because the

437

00:19:11,260 --> 00:19:09,080

object would disappear and reappear but

438

00:19:13,570 --> 00:19:11,270

when it appeared she saw it and took

439

00:19:16,750 --> 00:19:13,580

video until then this object would

440

00:19:20,200 --> 00:19:16,760

eventually disappear again the object

441

00:19:22,570 --> 00:19:20,210

descended descended appeared disappeared

442

00:19:26,530 --> 00:19:22,580

moving from the west to the east and

443

00:19:28,360 --> 00:19:26,540

back again we tracked this round object

444

00:19:30,850 --> 00:19:28,370

for some time until we got to our

445

00:19:32,470 --> 00:19:30,860

destination while filling our propane

446

00:19:34,390 --> 00:19:32,480

tank we told the attendant about this

447

00:19:36,880 --> 00:19:34,400

object and all of us were scanning the

448

00:19:39,550 --> 00:19:36,890

skies to see it but we couldn't find it

449

00:19:41,230 --> 00:19:39,560

in the sky after filling the propane

450

00:19:43,690 --> 00:19:41,240

tank we jumped back in our truck and

451  
00:19:45,850 --> 00:19:43,700  
proceeded northbound on Indianapolis

452  
00:19:47,920 --> 00:19:45,860  
Boulevard once more to our next

453  
00:19:50,770 --> 00:19:47,930  
destination buying party favors and

454  
00:19:53,200 --> 00:19:50,780  
balloons while driving northbound

455  
00:19:55,720 --> 00:19:53,210  
scanning the skies we saw several

456  
00:19:57,520 --> 00:19:55,730  
airplanes I then told my girlfriend try

457  
00:20:00,850 --> 00:19:57,530  
again video some airplanes for

458  
00:20:02,080 --> 00:20:00,860  
comparison to the object we saw after

459  
00:20:04,480 --> 00:20:02,090  
driving a short distance

460  
00:20:07,840 --> 00:20:04,490  
while scanning the skies for this object

461  
00:20:10,480 --> 00:20:07,850  
we once again saw it on the east side of

462  
00:20:13,630 --> 00:20:10,490  
the street again this thing was

463  
00:20:15,909 --> 00:20:13,640

appearing and disappearing moving from

464

00:20:18,460 --> 00:20:15,919

the east to the west it did not have a

465

00:20:20,919 --> 00:20:18,470

linear pattern again my girlfriend took

466

00:20:24,310 --> 00:20:20,929

video off the object until it again

467

00:20:26,529 --> 00:20:24,320

disappeared we then made it into the

468

00:20:28,210 --> 00:20:26,539

store bought our supplies and by the

469

00:20:30,340 --> 00:20:28,220

time we came out of the store it was

470

00:20:33,340 --> 00:20:30,350

getting dark we couldn't find the object

471

00:20:36,880 --> 00:20:33,350

in the sky after arriving home I took a

472

00:20:38,980 --> 00:20:36,890

really good look at these videos in the

473

00:20:42,220 --> 00:20:38,990

videos the object is round and bright

474

00:20:45,010 --> 00:20:42,230

white after zooming in on the object I

475

00:20:47,230 --> 00:20:45,020

noticed it had a black spot at its

476  
00:20:50,049 --> 00:20:47,240  
center while looking at the video of the

477  
00:20:52,269 --> 00:20:50,059  
airplane the aircraft was further away

478  
00:20:55,060 --> 00:20:52,279  
but you can see the fuselage the wings

479  
00:20:57,960 --> 00:20:55,070  
the tail of the plane so you could see

480  
00:21:00,039 --> 00:20:57,970  
details on this object if there were any

481  
00:21:02,080 --> 00:21:00,049  
after reviewing the videos with my

482  
00:21:04,570 --> 00:21:02,090  
girlfriend who by the way is a flight

483  
00:21:06,700 --> 00:21:04,580  
attendant we both are in agreement that

484  
00:21:11,380 --> 00:21:06,710  
the round bright white object we saw

485  
00:21:13,480 --> 00:21:11,390  
clearly was not an airplane for your

486  
00:21:15,850 --> 00:21:13,490  
information I'm attaching to still shots

487  
00:21:18,190 --> 00:21:15,860  
from the video we took the first still

488  
00:21:21,909 --> 00:21:18,200

is just a frame shot the second is the

489

00:21:23,950 --> 00:21:21,919

same frame shot but zoomed in on if you

490

00:21:27,549 --> 00:21:23,960

zoom in on that second shot you'll get a

491

00:21:30,100 --> 00:21:27,559

closer look at the object yes you will

492

00:21:33,960 --> 00:21:30,110

indeed gentle listeners we did still

493

00:21:36,940 --> 00:21:33,970

lots of mystery just not definitive

494

00:21:40,330 --> 00:21:36,950

let's define ourselves over to the city

495

00:21:43,419 --> 00:21:40,340

of Chicago as the song says that toddlin

496

00:21:46,960 --> 00:21:43,429

town state of Illinois its MUFON case

497

00:21:49,810 --> 00:21:46,970

number 85701 the date of this sighting

498

00:21:52,419 --> 00:21:49,820

is the 5th of August 2017 it was

499

00:21:55,779 --> 00:21:52,429

reported the next day here's what the

500

00:21:59,649 --> 00:21:55,789

witness offers by way of summary object

501  
00:22:03,639 --> 00:21:59,659  
bright red light light went off object

502  
00:22:06,970 --> 00:22:03,649  
still flying east direction citing

503  
00:22:09,940 --> 00:22:06,980  
specifics viewing distance 501 feet to

504  
00:22:12,340 --> 00:22:09,950  
one mile the altitude was over 500 feet

505  
00:22:14,350 --> 00:22:12,350  
and there wasn't any cloud cover the

506  
00:22:16,060 --> 00:22:14,360  
duration of this sighting was 5 minutes

507  
00:22:18,640 --> 00:22:16,070  
object features

508  
00:22:21,160 --> 00:22:18,650  
as unknown the flight path was a

509  
00:22:23,980 --> 00:22:21,170  
straight line path and this object was

510  
00:22:26,200 --> 00:22:23,990  
shaped like a sphere well there's

511  
00:22:27,850 --> 00:22:26,210  
weather at the time of this event in

512  
00:22:30,580 --> 00:22:27,860  
Chicago the maximum temperature was

513  
00:22:33,520 --> 00:22:30,590

eighty degrees Fahrenheit 27 degrees

514

00:22:36,400 --> 00:22:33,530

Celsius down to a minimum 60 degrees

515

00:22:38,320 --> 00:22:36,410

Fahrenheit 16 degrees Celsius the

516

00:22:41,040 --> 00:22:38,330

visibility factors were all the same

517

00:22:45,010 --> 00:22:41,050

maximum mean and minimum visibility

518

00:22:46,330 --> 00:22:45,020

stood at 10 miles 16 kilometers and the

519

00:22:49,720 --> 00:22:46,340

conditions weather-wise

520

00:22:52,270 --> 00:22:49,730

well nothing abnormal here is the

521

00:22:52,870 --> 00:22:52,280

account I was on my way to do some

522

00:22:55,930 --> 00:22:52,880

laundry

523

00:22:58,810 --> 00:22:55,940

I was walking down the street and in the

524

00:23:02,920 --> 00:22:58,820

distance to the west I saw a very bright

525

00:23:05,320 --> 00:23:02,930

single red light I've seen hundreds of

526

00:23:07,630 --> 00:23:05,330

planes and helicopters all kinds living

527

00:23:10,840 --> 00:23:07,640

in this city but I've never seen a shape

528

00:23:13,210 --> 00:23:10,850

or colored red light like that so I

529

00:23:16,780 --> 00:23:13,220

observed it it was heading east early in

530

00:23:20,110 --> 00:23:16,790

my direction about a block down a minute

531

00:23:23,320 --> 00:23:20,120

or so later the red light was just about

532

00:23:25,630 --> 00:23:23,330

over me in the sky bright red light it

533

00:23:28,210 --> 00:23:25,640

looked to be in the bottom center of

534

00:23:31,480 --> 00:23:28,220

this object as it passed as it passed

535

00:23:33,340 --> 00:23:31,490

the light went off planes and copters

536

00:23:35,250 --> 00:23:33,350

never shut off lights

537

00:23:38,800 --> 00:23:35,260

so this perplexed me even further

538

00:23:40,840 --> 00:23:38,810

looking very hard for the object I did

539

00:23:44,140 --> 00:23:40,850

see it continuing in the same path but

540

00:23:46,780 --> 00:23:44,150

without that light and now it was just a

541

00:23:49,570 --> 00:23:46,790

hazy dark object but it was sort of

542

00:23:51,280 --> 00:23:49,580

reflecting starlight it wasn't flying at

543

00:23:53,740 --> 00:23:51,290

a very high altitude like a

544

00:23:57,310 --> 00:23:53,750

coast-to-coast flight and it wasn't in

545

00:23:59,740 --> 00:23:57,320

the space station area or stars I lost

546

00:24:01,630 --> 00:23:59,750

sight of the object it headed east and

547

00:24:03,460 --> 00:24:01,640

it was too dark to make it out against

548

00:24:06,550 --> 00:24:03,470

that darkness there was no noise at all

549

00:24:08,950 --> 00:24:06,560

I do want to say that I live in a

550

00:24:12,310 --> 00:24:08,960

landing corridor for planes coming into

551

00:24:14,050 --> 00:24:12,320

O'Hare but this was lower than all of

552

00:24:16,180 --> 00:24:14,060

the planes I've ever seen come into land

553

00:24:19,000 --> 00:24:16,190

and this object was heading in a west to

554

00:24:22,210 --> 00:24:19,010

east direction whereas the landings come

555

00:24:24,190 --> 00:24:22,220

in from an east to west my best guess as

556

00:24:26,680 --> 00:24:24,200

to how high this was off the ground

557

00:24:29,350 --> 00:24:26,690

I would say five hundred to one thousand

558

00:24:29,890 --> 00:24:29,360

feet when the light went off and it was

559

00:24:33,250 --> 00:24:29,900

cruise

560

00:24:36,210 --> 00:24:33,260

along the object had a weird haze over

561

00:24:39,640 --> 00:24:36,220

it sort of like an invisibility cloak in

562

00:24:42,700 --> 00:24:39,650

Halo or ghost in the shell' but just

563

00:24:44,650 --> 00:24:42,710

like those videos and movies you could

564

00:24:47,799 --> 00:24:44,660

see something was there you just

565

00:24:50,049 --> 00:24:47,809

couldn't see details it was by far the

566

00:24:53,290 --> 00:24:50,059

weirdest object I have seen in my life

567

00:24:55,450 --> 00:24:53,300

and seen in this area I've lived in this

568

00:24:58,960 --> 00:24:55,460

same area for a decade and I've never

569

00:25:01,240 --> 00:24:58,970

seen a red light like this red lights on

570

00:25:03,790 --> 00:25:01,250

planes overhead are not as crimson

571

00:25:07,299 --> 00:25:03,800

colored as this light and there was only

572

00:25:11,080 --> 00:25:07,309

one red light again there was no noise

573

00:25:12,220 --> 00:25:11,090

whatsoever landing planes are very very

574

00:25:15,040 --> 00:25:12,230

loud near me

575

00:25:17,799 --> 00:25:15,050

the noise helicopters makes reflects off

576

00:25:19,540 --> 00:25:17,809

the buildings the big shark here the

577

00:25:22,299 --> 00:25:19,550

light in the beginning and then the

578

00:25:25,990 --> 00:25:22,309

light going off and there it was still

579

00:25:28,540 --> 00:25:26,000

cruising planes don't do that I'm sorry

580

00:25:30,640 --> 00:25:28,550

but my phone is about five years old the

581

00:25:33,190 --> 00:25:30,650

camera video is so bad I'm not

582

00:25:36,460 --> 00:25:33,200

submitting pictures or video

583

00:25:39,060 --> 00:25:36,470

well we totally understand that even the

584

00:25:41,230 --> 00:25:39,070

new stuff sometimes gets a little flaky

585

00:25:43,180 --> 00:25:41,240

interesting the witness has been there

586

00:25:46,470 --> 00:25:43,190

for long enough to know this isn't

587

00:25:50,440 --> 00:25:46,480

normal for what's in his sky at night

588

00:25:53,440 --> 00:25:50,450

UFOs alamin Chicago well it's jumpin

589

00:25:56,680 --> 00:25:53,450

just saying we've got to be jumping

590

00:25:58,480 --> 00:25:56,690

because that's a wrap thank you for

591

00:26:01,210 --> 00:25:58,490

listening to inception radio network

592

00:26:04,690 --> 00:26:01,220

follow today's broadcast at UFO headline

593

00:26:06,430 --> 00:26:04,700

news calm or iheart radio take care of

594

00:26:08,780 --> 00:26:06,440

each other we're all in this together

595

00:26:10,470 --> 00:26:08,790

this is Carol Caron see you tomorrow

596

00:26:13,810 --> 00:26:10,480

[Music]

597

00:26:16,360 --> 00:26:13,820

this place with helpful hardware folks

598

00:26:17,020 --> 00:26:16,370

pace has grown to 5,000 stores and

599

00:26:18,910 --> 00:26:17,030

Counting
