

UFO Headline News Monday August 14th, 2017

Listen on

inceptionradionetwork.com

1
00:00:07,030 --> 00:00:04,150
hello it's monday august 14 2017. you

2
00:00:09,110 --> 00:00:07,040
are listening to inception radio network

3
00:00:14,150 --> 00:00:09,120
voice of the fringe majority this is

4
00:00:18,950 --> 00:00:16,230
well the perseids have peaked and moved

5
00:00:21,349 --> 00:00:18,960
on for this time around tonight we get

6
00:00:24,550 --> 00:00:21,359
to look for that faint constellation

7
00:00:26,310 --> 00:00:24,560
ophiuchus the serpent bearer

8
00:00:27,990 --> 00:00:26,320
interestingly enough this broadcaster

9
00:00:31,189 --> 00:00:28,000
recently heard it pronounced by someone

10
00:00:33,750 --> 00:00:31,199
who should know as ophiuchus so we're

11
00:00:37,270 --> 00:00:33,760
just gonna put it in that tomato tomato

12
00:00:39,590 --> 00:00:37,280
category nevertheless tonight it appears

13
00:00:41,190 --> 00:00:39,600

in the south to southwest sky in fact

14

00:00:43,510 --> 00:00:41,200

you can see it throughout august and

15

00:00:46,229 --> 00:00:43,520

september evenings above the bright

16

00:00:48,869 --> 00:00:46,239

ruddy star antares the brightest in that

17

00:00:50,869 --> 00:00:48,879

constellation scorpius the scorpion

18

00:00:53,110 --> 00:00:50,879

note the planet saturn it'll be in the

19

00:00:56,229 --> 00:00:53,120

vicinity of antares and somewhat

20

00:00:58,389 --> 00:00:56,239

brighter than scorpius's brightest star

21

00:01:01,270 --> 00:00:58,399

this golden colored planet shines in

22

00:01:03,349 --> 00:01:01,280

front of the constellation ophiuchus at

23

00:01:06,870 --> 00:01:03,359

present and will continue to do so for

24

00:01:09,190 --> 00:01:06,880

several more months this year 2017 the

25

00:01:11,590 --> 00:01:09,200

sun travels in front of the zodiacal

26
00:01:14,710 --> 00:01:11,600
constellation scorpius from november

27
00:01:17,590 --> 00:01:14,720
23rd to november 30th and in front of

28
00:01:20,390 --> 00:01:17,600
that zodiacal constellation ophiuchus

29
00:01:22,789 --> 00:01:20,400
from november 30th to december 18th

30
00:01:24,630 --> 00:01:22,799
there are official boundary lines and

31
00:01:26,789 --> 00:01:24,640
you can see those on a chart later at

32
00:01:28,630 --> 00:01:26,799
ufo ufoheadlinenews.com

33
00:01:32,069 --> 00:01:28,640
they were drawn up by the international

34
00:01:34,069 --> 00:01:32,079
astronomical union back in the 1930s

35
00:01:36,149 --> 00:01:34,079
there are charts and there's a photo of

36
00:01:39,270 --> 00:01:36,159
the constellation ophiuchus and the

37
00:01:42,390 --> 00:01:39,280
brightest star razzle hag and scorpius's

38
00:01:44,230 --> 00:01:42,400

brightest star antares into the bargain

39

00:01:46,389 --> 00:01:44,240

russell hague marks the head of

40

00:01:48,950 --> 00:01:46,399

ophiuchus but isn't anywhere as bright

41

00:01:50,389 --> 00:01:48,960

as antares which depicts the scorpion's

42

00:01:53,590 --> 00:01:50,399

beating heart

43

00:01:56,149 --> 00:01:53,600

the zodiac also known as the pathway of

44

00:01:59,109 --> 00:01:56,159

animals represents that rather narrow

45

00:02:01,190 --> 00:01:59,119

band of sky astride the ecliptic which

46

00:02:03,670 --> 00:02:01,200

is the plane of earth's orbit projected

47

00:02:05,590 --> 00:02:03,680

onto the sphere of stars the signs of

48

00:02:08,469 --> 00:02:05,600

the zodiac are familiar to everybody who

49

00:02:10,309 --> 00:02:08,479

reads online astrology advice

50

00:02:13,750 --> 00:02:10,319

there are 12 familiar signs of the

51
00:02:14,630 --> 00:02:13,760
zodiac aries taurus gemini cancer and so

52
00:02:20,630 --> 00:02:14,640
on

53
00:02:22,630 --> 00:02:20,640
the zodiac which includes ophiuchus the

54
00:02:25,270 --> 00:02:22,640
sun moves in front of ophiuchus from

55
00:02:26,949 --> 00:02:25,280
about november 30th to december 18th

56
00:02:28,869 --> 00:02:26,959
every year

57
00:02:31,830 --> 00:02:28,879
the sky maps show that ophiuchus the

58
00:02:34,309 --> 00:02:31,840
serpent bearer is depicted as holding

59
00:02:36,630 --> 00:02:34,319
serpens the serpent which is considered

60
00:02:39,030 --> 00:02:36,640
a separate constellation altogether

61
00:02:42,390 --> 00:02:39,040
according to ancient greek star lore

62
00:02:44,550 --> 00:02:42,400
ophiuchus is esclepius the physician who

63
00:02:46,710 --> 00:02:44,560

concocted a healing potion from the

64

00:02:49,990 --> 00:02:46,720

serpent's venom mixing it with the

65

00:02:52,309 --> 00:02:50,000

gorgon's blood and some unknown herb

66

00:02:54,550 --> 00:02:52,319

this potion gave humans access to

67

00:02:56,229 --> 00:02:54,560

immortality until the god of the

68

00:02:58,869 --> 00:02:56,239

underworld appealed to zeus to

69

00:03:00,790 --> 00:02:58,879

reconsider the ramifications of the

70

00:03:02,869 --> 00:03:00,800

death of death

71

00:03:06,149 --> 00:03:02,879

moving forward into our modern world

72

00:03:08,229 --> 00:03:06,159

even today the staff of asclepius is the

73

00:03:10,710 --> 00:03:08,239

symbol of the world health organization

74

00:03:13,110 --> 00:03:10,720

and other medical organizations paying

75

00:03:15,589 --> 00:03:13,120

tribute to the constellation of yukus

76

00:03:16,550 --> 00:03:15,599

the serpent-bearer that's the bottom

77

00:03:18,630 --> 00:03:16,560

line

78

00:03:22,229 --> 00:03:18,640

here's an answer to a question we hadn't

79

00:03:25,030 --> 00:03:22,239

even asked headline why the total solar

80

00:03:27,190 --> 00:03:25,040

eclipse arrives from the west

81

00:03:29,589 --> 00:03:27,200

this is written by paul sutter he's an

82

00:03:32,949 --> 00:03:29,599

astrophysicist at ohio state university

83

00:03:35,030 --> 00:03:32,959

and the chief scientist at cosy center

84

00:03:36,949 --> 00:03:35,040

sutter lead science theme tours around

85

00:03:39,750 --> 00:03:36,959

the world out of a place called

86

00:03:41,350 --> 00:03:39,760

astrotouring.com

87

00:03:45,190 --> 00:03:41,360

here's what he writes

88

00:03:48,229 --> 00:03:45,200

every day the same routine the sun rises

89

00:03:50,550 --> 00:03:48,239

in the east breakfast off to work

90

00:03:53,509 --> 00:03:50,560

work home from work

91

00:03:54,550 --> 00:03:53,519

dinner the sun sets in the west

92

00:03:57,030 --> 00:03:54,560

repeat

93

00:03:59,509 --> 00:03:57,040

it's a pattern familiar to everyone on

94

00:04:01,270 --> 00:03:59,519

earth for countless generations we've

95

00:04:04,550 --> 00:04:01,280

relied on the regular cycles of the

96

00:04:07,030 --> 00:04:04,560

heavens to help demarcate our days

97

00:04:08,710 --> 00:04:07,040

but a total solar eclipse like the big

98

00:04:11,110 --> 00:04:08,720

one coming to the continental united

99

00:04:12,390 --> 00:04:11,120

states august 21st will break the

100

00:04:14,630 --> 00:04:12,400

routine

101

00:04:16,949 --> 00:04:14,640

in addition to the moon completely

102

00:04:19,830 --> 00:04:16,959

covering the face of the sun which let's

103

00:04:22,310 --> 00:04:19,840

admit is already pretty spectacular the

104

00:04:25,590 --> 00:04:22,320

event will move in an unfamiliar and

105

00:04:27,030 --> 00:04:25,600

possibly disquieting direction from west

106

00:04:29,670 --> 00:04:27,040

to east

107

00:04:31,990 --> 00:04:29,680

the normal daily rising and setting of

108

00:04:34,310 --> 00:04:32,000

celestial objects isn't due to their own

109

00:04:35,270 --> 00:04:34,320

movement but rather the rotation of

110

00:04:37,510 --> 00:04:35,280

earth

111

00:04:40,469 --> 00:04:37,520

as our planet spins on its axis the

112

00:04:43,030 --> 00:04:40,479

heavens appear to rise up from the east

113

00:04:44,790 --> 00:04:43,040

arch their way across the sky and settle

114

00:04:46,790 --> 00:04:44,800

into the west

115

00:04:48,629 --> 00:04:46,800

it's hard to blame our ancestors for

116

00:04:51,350 --> 00:04:48,639

assuming that earth which seemed very

117

00:04:53,830 --> 00:04:51,360

large and strong was incapable of

118

00:04:55,749 --> 00:04:53,840

movement with the ethereal denizens of

119

00:04:58,070 --> 00:04:55,759

the heavens gliding along their nested

120

00:05:01,590 --> 00:04:58,080

crystal spheres giving humans our

121

00:05:03,909 --> 00:05:01,600

familiar clockwork celestial movements

122

00:05:06,390 --> 00:05:03,919

after centuries of serious work people

123

00:05:09,270 --> 00:05:06,400

realize that earth does indeed spin and

124

00:05:10,950 --> 00:05:09,280

the motion of the sun moon and stars is

125

00:05:12,870 --> 00:05:10,960

only apparent

126

00:05:15,670 --> 00:05:12,880

but when it comes to solar eclipses

127

00:05:17,749 --> 00:05:15,680

we're faced with a new incongruity why

128

00:05:20,710 --> 00:05:17,759

does the path of a solar eclipse start

129

00:05:22,790 --> 00:05:20,720

in the west and end in the east

130

00:05:24,230 --> 00:05:22,800

the answer is simple but it's not

131

00:05:27,189 --> 00:05:24,240

something we're accustomed to thinking

132

00:05:28,790 --> 00:05:27,199

about the moon itself orbits earth from

133

00:05:31,510 --> 00:05:28,800

west to east

134

00:05:33,670 --> 00:05:31,520

in other words if you could rock it up

135

00:05:36,629 --> 00:05:33,680

high above the north pole the moon would

136

00:05:38,870 --> 00:05:36,639

trace out a counter-clockwise circle

137

00:05:41,110 --> 00:05:38,880

but earth rotates about 30 times in a

138

00:05:42,790 --> 00:05:41,120

single lunar orbit so it's not something

139

00:05:45,189 --> 00:05:42,800

we normally notice

140

00:05:47,590 --> 00:05:45,199

during a solar eclipse the path of the

141

00:05:50,790 --> 00:05:47,600

moon's shadow must follow the motion of

142

00:05:52,469 --> 00:05:50,800

the moon itself to the east

143

00:05:54,790 --> 00:05:52,479

the solar eclipse is a wonderful

144

00:05:57,510 --> 00:05:54,800

opportunity to experience astronomy at

145

00:06:00,150 --> 00:05:57,520

its most basic understanding that

146

00:06:03,430 --> 00:06:00,160

intricate dance of heavenly objects

147

00:06:05,749 --> 00:06:03,440

heavenly objects to man-made objects

148

00:06:08,629 --> 00:06:05,759

here's a headline spacex to send

149

00:06:11,749 --> 00:06:08,639

supercomputer into space this is from

150

00:06:14,790 --> 00:06:11,759

the wall street journal 24 7 written by

151

00:06:17,350 --> 00:06:14,800

paul ossic spacex technologies an

152

00:06:20,390 --> 00:06:17,360

aerospace firm founded and led by tesla

153

00:06:23,510 --> 00:06:20,400

founder and ceo elon musk is set to

154

00:06:26,070 --> 00:06:23,520

launch a supercomputer into space today

155

00:06:28,390 --> 00:06:26,080

as part of a resupply mission for nasa

156

00:06:30,230 --> 00:06:28,400

to the international space station the

157

00:06:32,629 --> 00:06:30,240

computer was built by hewlett-packard

158

00:06:35,909 --> 00:06:32,639

enterprise company and has been dubbed

159

00:06:39,110 --> 00:06:35,919

the space-born computer that of course

160

00:06:40,150 --> 00:06:39,120

is space born with a b-o-r-n-e

161

00:06:41,830 --> 00:06:40,160

spelling

162

00:06:44,469 --> 00:06:41,840

the launch is part of a year-long

163

00:06:46,550 --> 00:06:44,479

experiment by nasa and hewlett packard

164

00:06:48,390 --> 00:06:46,560

to determine whether what is basically

165

00:06:51,430 --> 00:06:48,400

an off-the-shelf high-performance

166

00:06:54,710 --> 00:06:51,440

computer can survive the rigors of space

167

00:06:56,309 --> 00:06:54,720

for a full year coincidentally a year is

168

00:06:59,589 --> 00:06:56,319

about the amount of time it would take a

169

00:07:01,270 --> 00:06:59,599

manned spacecraft to reach mars

170

00:07:03,510 --> 00:07:01,280

typically when nasa wants to send a

171

00:07:05,830 --> 00:07:03,520

computing device into space the device

172

00:07:07,670 --> 00:07:05,840

must be modified and hardened which

173

00:07:09,670 --> 00:07:07,680

takes time and money

174

00:07:12,469 --> 00:07:09,680

as a result computers sent into space

175

00:07:14,629 --> 00:07:12,479

are often generations behind devices

176
00:07:16,629 --> 00:07:14,639
already available here on earth

177
00:07:19,350 --> 00:07:16,639
computing chores that can't be handled

178
00:07:21,510 --> 00:07:19,360
by on-board devices have to be packaged

179
00:07:23,350 --> 00:07:21,520
up and sent back to earth where the

180
00:07:26,790 --> 00:07:23,360
programs are then executed and the

181
00:07:29,350 --> 00:07:26,800
results are sent back up to the iss

182
00:07:31,670 --> 00:07:29,360
this is not a huge concern at present

183
00:07:34,309 --> 00:07:31,680
because communications between the iss

184
00:07:36,629 --> 00:07:34,319
and earth are nearly instantaneous

185
00:07:39,510 --> 00:07:36,639
using the same technology would mean

186
00:07:41,430 --> 00:07:39,520
that delay 20 minutes for a spacecraft

187
00:07:43,589 --> 00:07:41,440
traveling near mars

188
00:07:46,469 --> 00:07:43,599

the only modifications to the space-born

189

00:07:48,390 --> 00:07:46,479

computer is software hardening the

190

00:07:51,110 --> 00:07:48,400

inclusion of software that's able to

191

00:07:53,670 --> 00:07:51,120

detect and fix certain conditions that

192

00:07:55,909 --> 00:07:53,680

might cause the computer to malfunction

193

00:07:58,869 --> 00:07:55,919

the spaceborne computer will be carried

194

00:08:01,350 --> 00:07:58,879

aloft by a spacex falcon 9 rocket and

195

00:08:04,150 --> 00:08:01,360

the first test of its capability is

196

00:08:06,070 --> 00:08:04,160

expected to occur around september 4th

197

00:08:09,350 --> 00:08:06,080

when scientists on the international

198

00:08:11,350 --> 00:08:09,360

space station boot up the device and

199

00:08:13,589 --> 00:08:11,360

when they do you'll hear all about it

200

00:08:15,749 --> 00:08:13,599

right here on ufo headline news on

201

00:08:17,670 --> 00:08:15,759

inception radio network

202

00:08:20,790 --> 00:08:17,680

our next headline comes via the

203

00:08:23,430 --> 00:08:20,800

telegraph yep it's all legit info we

204

00:08:26,390 --> 00:08:23,440

double checked here's the headline nasa

205

00:08:30,710 --> 00:08:26,400

to wake up new horizons spacecraft for

206

00:08:33,190 --> 00:08:30,720

voyage into mysterious third zone

207

00:08:35,589 --> 00:08:33,200

sarah knapton writes this

208

00:08:37,909 --> 00:08:35,599

nasa is to wake up its new horizon

209

00:08:40,469 --> 00:08:37,919

spacecraft next month following a

210

00:08:42,149 --> 00:08:40,479

five-month hibernation ahead of its

211

00:08:44,790 --> 00:08:42,159

deeper journey into one of the most

212

00:08:47,269 --> 00:08:44,800

mysterious regions of the solar system

213

00:08:50,389 --> 00:08:47,279

new horizons which captured incredible

214

00:08:52,870 --> 00:08:50,399

images of pluto in july of 2015 was

215

00:08:54,550 --> 00:08:52,880

powered down last april to conserve

216

00:08:57,269 --> 00:08:54,560

energy as it traveled through the kuiper

217

00:08:59,829 --> 00:08:57,279

belt that vast region of icy debris

218

00:09:02,949 --> 00:08:59,839

which encircles the sun and planets and

219

00:09:05,750 --> 00:09:02,959

it's also called the third zone

220

00:09:09,110 --> 00:09:05,760

interesting a rebranding of the kuiper

221

00:09:11,350 --> 00:09:09,120

belt it's now the third zone

222

00:09:15,389 --> 00:09:11,360

on september 11th the spacecraft will

223

00:09:18,630 --> 00:09:15,399

awaken for its 16-month journey to 2014

224

00:09:20,470 --> 00:09:18,640

mu69 an ancient object which is thought

225

00:09:22,790 --> 00:09:20,480

to be one of the early building blocks

226

00:09:24,230 --> 00:09:22,800

of the solar system the space rock

227

00:09:27,269 --> 00:09:24,240

hadn't even been discovered when the

228

00:09:30,150 --> 00:09:27,279

craft launched in 2006 and the flyby

229

00:09:32,949 --> 00:09:30,160

will be the most distant in the history

230

00:09:35,670 --> 00:09:32,959

of space exploration a billion miles

231

00:09:36,389 --> 00:09:35,680

beyond pluto four billion miles from

232

00:09:39,509 --> 00:09:36,399

earth

233

00:09:41,750 --> 00:09:39,519

recent observations of 2014 mu69 from

234

00:09:45,190 --> 00:09:41,760

the hubble space telescope show it's

235

00:09:47,750 --> 00:09:45,200

probably two binary objects or a pair of

236

00:09:51,430 --> 00:09:47,760

space rocks that are stuck together

237

00:09:53,430 --> 00:09:51,440

bodies which are around 12 miles across

238

00:09:56,230 --> 00:09:53,440

alan stern principal investigator for

239

00:09:59,750 --> 00:09:56,240

new horizons at nasa said quote we are

240

00:10:02,550 --> 00:09:59,760

very likely going to a primordial binary

241

00:10:05,670 --> 00:10:02,560

in the kuiper belt a four billion year

242

00:10:07,670 --> 00:10:05,680

old relic of solar system formation and

243

00:10:10,389 --> 00:10:07,680

an exotic building block of the small

244

00:10:12,389 --> 00:10:10,399

planets of the kuiper belt like pluto it

245

00:10:14,710 --> 00:10:12,399

may even be a swarm of smaller bodies

246

00:10:17,430 --> 00:10:14,720

left from the time when planets in our

247

00:10:20,470 --> 00:10:17,440

solar system formed new exploration

248

00:10:23,990 --> 00:10:20,480

awaits us it promises a scientific

249

00:10:26,310 --> 00:10:24,000

bonanza for the flyby end quotes

250

00:10:28,470 --> 00:10:26,320

new horizons was the fastest spacecraft

251
00:10:30,310 --> 00:10:28,480
to ever launch and it's partly powered

252
00:10:32,870 --> 00:10:30,320
by nuclear energy

253
00:10:35,910 --> 00:10:32,880
when it launched in january of 2006

254
00:10:38,230 --> 00:10:35,920
pluto was still a planet but just a few

255
00:10:41,509 --> 00:10:38,240
months later it was downgraded to a

256
00:10:44,949 --> 00:10:41,519
dwarf planet or a plutoid which is now

257
00:10:47,670 --> 00:10:44,959
officially known as asteroid number one

258
00:10:49,509 --> 00:10:47,680
three four three four zero

259
00:10:52,630 --> 00:10:49,519
after studying objects in the kuiper

260
00:10:55,350 --> 00:10:52,640
belt the third zone the spacecraft will

261
00:10:58,069 --> 00:10:55,360
eventually leave the solar system so far

262
00:11:00,150 --> 00:10:58,079
a feat only achieved by voyager

263
00:11:02,790 --> 00:11:00,160

and it's carrying the ashes of the

264

00:11:07,430 --> 00:11:02,800

scientists who discovered pluto clyde

265

00:11:09,509 --> 00:11:07,440

tombow tombow died on january 17 1997

266

00:11:11,990 --> 00:11:09,519

nine years and two days before new

267

00:11:14,790 --> 00:11:12,000

horizons launch but one of his final

268

00:11:16,230 --> 00:11:14,800

requests was for his ashes to be sent

269

00:11:18,150 --> 00:11:16,240

into space

270

00:11:20,150 --> 00:11:18,160

clyde tombaugh well it should be a

271

00:11:22,069 --> 00:11:20,160

household name we couldn't resist

272

00:11:25,670 --> 00:11:22,079

sharing this bit of information from

273

00:11:29,430 --> 00:11:25,680

wiki clyde william tombaugh february 4th

274

00:11:32,230 --> 00:11:29,440

1906 january 17 1997

275

00:11:35,750 --> 00:11:32,240

was an american astronomer he discovered

276

00:11:37,269 --> 00:11:35,760

pluto in 1930 the first object to be

277

00:11:40,310 --> 00:11:37,279

discovered in what would later be

278

00:11:42,230 --> 00:11:40,320

identified as the kuiper belt

279

00:11:44,550 --> 00:11:42,240

at the time of discovery pluto was

280

00:11:48,310 --> 00:11:44,560

considered a planet but was later

281

00:11:50,310 --> 00:11:48,320

reclassified as a dwarf planet in 2006.

282

00:11:53,509 --> 00:11:50,320

clyde tombaugh also discovered many

283

00:11:55,870 --> 00:11:53,519

asteroids and also he called for the

284

00:11:59,910 --> 00:11:55,880

serious scientific research of

285

00:12:02,710 --> 00:11:59,920

unidentified flying objects ufos

286

00:12:05,190 --> 00:12:02,720

cheers to you clyde tombaugh circling

287

00:12:07,590 --> 00:12:05,200

the heavens how perfect

288

00:12:08,949 --> 00:12:07,600

here's kind of a stopper of a headline

289

00:12:11,509 --> 00:12:08,959

it comes to us by way of the

290

00:12:13,110 --> 00:12:11,519

international business times byline for

291

00:12:14,230 --> 00:12:13,120

alanna gloats

292

00:12:16,710 --> 00:12:14,240

headline

293

00:12:19,670 --> 00:12:16,720

intelligent life in the universe might

294

00:12:22,150 --> 00:12:19,680

already be extinct

295

00:12:24,949 --> 00:12:22,160

intelligent life goes extinct shortly

296

00:12:26,629 --> 00:12:24,959

after becoming technologically advanced

297

00:12:29,990 --> 00:12:26,639

and that's why we haven't been able to

298

00:12:31,590 --> 00:12:30,000

connect with any alien species argues

299

00:12:34,069 --> 00:12:31,600

one scientist

300

00:12:36,790 --> 00:12:34,079

at the center of his assertion is the

301

00:12:39,269 --> 00:12:36,800

mediocrity principle which is popular

302

00:12:41,430 --> 00:12:39,279

among astronomers and dictates that

303

00:12:44,949 --> 00:12:41,440

there is nothing special about our

304

00:12:46,870 --> 00:12:44,959

species our planet or our solar system

305

00:12:49,030 --> 00:12:46,880

that everything that went into the

306

00:12:51,829 --> 00:12:49,040

evolution of human life on earth could

307

00:12:54,470 --> 00:12:51,839

have happened in other places as well

308

00:12:57,030 --> 00:12:54,480

it thus also dictates that the state in

309

00:12:59,350 --> 00:12:57,040

which we find ourselves is completely

310

00:13:01,590 --> 00:12:59,360

typical and can be generally applied to

311

00:13:03,910 --> 00:13:01,600

the rest of the universe

312

00:13:06,310 --> 00:13:03,920

who is this professor well it's

313

00:13:09,269 --> 00:13:06,320

university of arkansas professor daniel

314

00:13:11,430 --> 00:13:09,279

whitmire he's suggesting that if we go

315

00:13:13,350 --> 00:13:11,440

by this principle it stands to reason

316

00:13:15,590 --> 00:13:13,360

that any technological species would

317

00:13:18,710 --> 00:13:15,600

find themselves in a similar situation

318

00:13:21,030 --> 00:13:18,720

to humans on earth quote that they are

319

00:13:23,269 --> 00:13:21,040

both the first such species to evolve on

320

00:13:25,350 --> 00:13:23,279

their planet and also

321

00:13:27,910 --> 00:13:25,360

that they are early in their potential

322

00:13:29,910 --> 00:13:27,920

technological evolution end quotes

323

00:13:32,949 --> 00:13:29,920

that's according to his paper in the

324

00:13:35,350 --> 00:13:32,959

international journal of astrobiology

325

00:13:38,790 --> 00:13:35,360

he argues that this implies intelligent

326

00:13:41,110 --> 00:13:38,800

species do not exist further along in

327

00:13:44,310 --> 00:13:41,120

technological evolution because they

328

00:13:47,110 --> 00:13:44,320

have gone quote extinct soon after

329

00:13:48,389 --> 00:13:47,120

attaining a modern technology and that

330

00:13:49,829 --> 00:13:48,399

this event

331

00:13:53,750 --> 00:13:49,839

results in the extinction of the

332

00:13:55,910 --> 00:13:53,760

planet's global biosphere end quotes

333

00:13:58,870 --> 00:13:55,920

the exact details of how technologically

334

00:14:00,949 --> 00:13:58,880

advanced life on another planet evolved

335

00:14:03,910 --> 00:14:00,959

like how long it took for it to emerge

336

00:14:05,910 --> 00:14:03,920

are not relevant says daniel whitmire

337

00:14:08,550 --> 00:14:05,920

all that matter is that this life has

338

00:14:10,150 --> 00:14:08,560

developed electronic devices as well as

339

00:14:12,790 --> 00:14:10,160

technology that can affect the

340

00:14:15,189 --> 00:14:12,800

environment he continues quote a

341

00:14:17,910 --> 00:14:15,199

technological dinosaur species that

342

00:14:20,710 --> 00:14:17,920

evolved in 100 million years on a

343

00:14:22,710 --> 00:14:20,720

mars-sized planet could still be first

344

00:14:25,430 --> 00:14:22,720

and early in their technological

345

00:14:27,030 --> 00:14:25,440

evolution if we are typical of this

346

00:14:29,750 --> 00:14:27,040

reference class

347

00:14:31,910 --> 00:14:29,760

then other members would like us observe

348

00:14:34,230 --> 00:14:31,920

that their technological species is the

349

00:14:36,310 --> 00:14:34,240

first to evolve on their planet and also

350

00:14:39,269 --> 00:14:36,320

that they are early in their potential

351

00:14:40,949 --> 00:14:39,279

technological evolution end quotes

352

00:14:42,550 --> 00:14:40,959

those species very well could have been

353

00:14:45,430 --> 00:14:42,560

the first on their planets to become

354

00:14:47,829 --> 00:14:45,440

advanced rather than rising from the

355

00:14:50,069 --> 00:14:47,839

ashes of another technologically

356

00:14:52,550 --> 00:14:50,079

advanced group of beings based on how it

357

00:14:54,790 --> 00:14:52,560

happened on earth the study notes that

358

00:14:57,189 --> 00:14:54,800

the timeline for how humans emerged and

359

00:14:59,350 --> 00:14:57,199

created technology leaves enough room

360

00:15:01,590 --> 00:14:59,360

for there to have been another

361

00:15:04,150 --> 00:15:01,600

what makes new simply summer z feminine

362

00:15:06,230 --> 00:15:04,160

wash different it's simple seriously

363

00:15:08,230 --> 00:15:06,240

that's the answer it's made with simple

364

00:15:09,829 --> 00:15:08,240

ingredients ingredients that help stop

365

00:15:12,710 --> 00:15:09,839

odor and help you maintain a naturally

366

00:15:14,470 --> 00:15:12,720

healthy ph gently and effectively here's

367

00:15:17,430 --> 00:15:14,480

what simply summer's eve ingredients do

368

00:15:19,430 --> 00:15:17,440

not include harsh chemicals dyes alcohol

369

00:15:21,590 --> 00:15:19,440

or parabens and it comes in light

370

00:15:24,230 --> 00:15:21,600

refreshing scents like mandarin blossom

371

00:15:26,230 --> 00:15:24,240

and coconut water new simply summer z

372

00:15:28,550 --> 00:15:26,240

gentle foaming wash and cleansing cloths

373

00:15:32,310 --> 00:15:28,560

gentle by nature click the tile to learn

374

00:15:34,310 --> 00:15:32,320

more similar species before us on earth

375

00:15:35,990 --> 00:15:34,320

but that didn't happen

376

00:15:37,990 --> 00:15:36,000

the point at which humans became

377

00:15:40,710 --> 00:15:38,000

technological according to this study

378

00:15:43,189 --> 00:15:40,720

was about 100 years ago after the

379

00:15:45,829 --> 00:15:43,199

industrial revolution and the radio

380

00:15:48,710 --> 00:15:45,839

burst onto the scene quote according to

381

00:15:51,509 --> 00:15:48,720

the principle of mediocrity a bell curve

382

00:15:53,829 --> 00:15:51,519

of the ages of all extant technological

383

00:15:56,870 --> 00:15:53,839

civilizations in the universe would put

384

00:15:59,189 --> 00:15:56,880

us in the middle 95 percent in other

385

00:16:01,749 --> 00:15:59,199

words technological civilizations that

386

00:16:04,870 --> 00:16:01,759

last millions of years or longer would

387

00:16:07,670 --> 00:16:04,880

be highly atypical end quotes

388

00:16:09,590 --> 00:16:07,680

that leads to the questions of why there

389

00:16:12,389 --> 00:16:09,600

should only be civilizations in which

390

00:16:14,150 --> 00:16:12,399

the inhabitants are new to technology

391

00:16:15,189 --> 00:16:14,160

and are the first on their planet to get

392

00:16:17,030 --> 00:16:15,199

that far

393

00:16:19,269 --> 00:16:17,040

if we assume the evolution and

394

00:16:21,749 --> 00:16:19,279

development of humans is typical it

395

00:16:24,629 --> 00:16:21,759

follows that alien species like us were

396

00:16:27,350 --> 00:16:24,639

also the first on their planet and thus

397

00:16:30,230 --> 00:16:27,360

once species become technological quote

398

00:16:33,670 --> 00:16:30,240

they flame out and take the biosphere

399

00:16:35,670 --> 00:16:33,680

with them end quotes the university says

400

00:16:38,310 --> 00:16:35,680

the latter part about the demise of the

401
00:16:39,990 --> 00:16:38,320
rest of the biosphere is crucial to

402
00:16:42,629 --> 00:16:40,000
preventing other technologically

403
00:16:43,829 --> 00:16:42,639
advanced species cropping up on the same

404
00:16:46,150 --> 00:16:43,839
planet

405
00:16:49,509 --> 00:16:46,160
the other option is that humans and

406
00:16:51,509 --> 00:16:49,519
earth are among the outliers in which

407
00:16:54,550 --> 00:16:51,519
case professor daniel whitmire asserts

408
00:16:57,350 --> 00:16:54,560
that quote by statistics we have to be

409
00:16:59,189 --> 00:16:57,360
the dumbest guys in the galaxy

410
00:17:01,269 --> 00:16:59,199
after all we've only been technological

411
00:17:03,030 --> 00:17:01,279
for about a hundred years while other

412
00:17:05,590 --> 00:17:03,040
civilizations could be more

413
00:17:09,909 --> 00:17:05,600

technologically advanced than us by

414

00:17:12,870 --> 00:17:09,919

millions or billions of years end quotes

415

00:17:15,510 --> 00:17:12,880

oh stay tuned there must be the rest of

416

00:17:17,590 --> 00:17:15,520

the story somewhere out there and if

417

00:17:20,150 --> 00:17:17,600

they're looking down on planet earth and

418

00:17:22,710 --> 00:17:20,160

if they look into the north american

419

00:17:26,230 --> 00:17:22,720

continent something outstanding is that

420

00:17:28,470 --> 00:17:26,240

mitten shape the state of michigan

421

00:17:30,870 --> 00:17:28,480

here's a ufo sighting from michigan

422

00:17:33,029 --> 00:17:30,880

claire michigan is the city spelled

423

00:17:35,029 --> 00:17:33,039

c-l-a-r

424

00:17:37,350 --> 00:17:35,039

mufon issues case numbers for these

425

00:17:39,830 --> 00:17:37,360

sightings for purposes of tracking and

426
00:17:42,789 --> 00:17:39,840
identification hopefully this case

427
00:17:44,470 --> 00:17:42,799
number is eight five six nine five the

428
00:17:45,669 --> 00:17:44,480
date of the sighting is august first

429
00:17:49,270 --> 00:17:45,679
twenty

430
00:17:50,549 --> 00:17:49,280
it was reported august 6 2017

431
00:17:54,710 --> 00:17:50,559
the summary

432
00:17:55,909 --> 00:17:54,720
orange glowing object circle of cloud

433
00:17:57,990 --> 00:17:55,919
around it

434
00:18:01,029 --> 00:17:58,000
citing specifics include a viewing

435
00:18:03,669 --> 00:18:01,039
distance unknown the altitude was over

436
00:18:05,350 --> 00:18:03,679
500 feet without cloud cover

437
00:18:08,230 --> 00:18:05,360
the duration of this sighting was four

438
00:18:10,549 --> 00:18:08,240

minutes object features none

439

00:18:13,510 --> 00:18:10,559

the object's flight path is described as

440

00:18:15,190 --> 00:18:13,520

hovering then path and this object was

441

00:18:17,110 --> 00:18:15,200

shaped like a sphere

442

00:18:18,789 --> 00:18:17,120

there's a little bit of weather reported

443

00:18:20,630 --> 00:18:18,799

here for this event the maximum

444

00:18:23,350 --> 00:18:20,640

temperature in claire michigan at the

445

00:18:26,390 --> 00:18:23,360

time was 86 degrees fahrenheit 30

446

00:18:29,190 --> 00:18:26,400

degrees celsius minimum temperature 61

447

00:18:32,150 --> 00:18:29,200

degrees fahrenheit 16 degrees celsius

448

00:18:34,950 --> 00:18:32,160

visibility wise maximum visibility 10

449

00:18:38,230 --> 00:18:34,960

miles 16 kilometers dropping down to a

450

00:18:40,390 --> 00:18:38,240

minimum of 7 miles 11 kilometers there

451
00:18:41,510 --> 00:18:40,400
was nothing abnormal about the weather

452
00:18:43,190 --> 00:18:41,520
conditions

453
00:18:45,510 --> 00:18:43,200
here's the report

454
00:18:47,430 --> 00:18:45,520
august 1st 2017

455
00:18:50,549 --> 00:18:47,440
was watching the international space

456
00:18:53,270 --> 00:18:50,559
station passover from west to east when

457
00:18:56,950 --> 00:18:53,280
i noticed above me a circular object

458
00:18:59,270 --> 00:18:56,960
glowing pale orange light this pale

459
00:19:01,990 --> 00:18:59,280
orange light had a dark center and there

460
00:19:03,830 --> 00:19:02,000
was a perfect cloud surrounding it

461
00:19:05,750 --> 00:19:03,840
diffusing its appearance

462
00:19:07,270 --> 00:19:05,760
i ran in and got my brother who also

463
00:19:10,470 --> 00:19:07,280

witnessed this

464

00:19:12,150 --> 00:19:10,480

this thing was silent and it hovered

465

00:19:14,470 --> 00:19:12,160

and then it took a path to the north

466

00:19:16,950 --> 00:19:14,480

until i could no longer see it i have

467

00:19:18,150 --> 00:19:16,960

never seen anything like this in my

468

00:19:20,470 --> 00:19:18,160

lifetime

469

00:19:22,950 --> 00:19:20,480

i live in a rural area in michigan and

470

00:19:25,990 --> 00:19:22,960

always have a black sky and it wasn't

471

00:19:28,789 --> 00:19:26,000

cloudy that night i was watching the iss

472

00:19:31,350 --> 00:19:28,799

and earlier i saw iridium flares

473

00:19:32,789 --> 00:19:31,360

this was an unbelievable sighting of

474

00:19:35,669 --> 00:19:32,799

something that my older brother and

475

00:19:38,230 --> 00:19:35,679

myself will never forget in fact we're

476
00:19:40,150 --> 00:19:38,240
still trying to figure out what we saw

477
00:19:42,870 --> 00:19:40,160
the only events at this time where

478
00:19:45,830 --> 00:19:42,880
antares in the sky the star which does

479
00:19:48,710 --> 00:19:45,840
not move across the sky

480
00:19:50,470 --> 00:19:48,720
nope stars don't move like that

481
00:19:53,830 --> 00:19:50,480
and underneath this sighting where you

482
00:19:56,070 --> 00:19:53,840
can join the discussion someone has and

483
00:19:58,549 --> 00:19:56,080
here's what he says hello and thanks for

484
00:20:00,789 --> 00:19:58,559
this report i believe i saw the same

485
00:20:03,350 --> 00:20:00,799
object as well and then he gives the

486
00:20:05,990 --> 00:20:03,360
mufon number for his report that number

487
00:20:07,830 --> 00:20:06,000
is 85709

488
00:20:10,470 --> 00:20:07,840

he continues from my vantage point it

489

00:20:11,830 --> 00:20:10,480

was like a smudgy halo surrounding a

490

00:20:14,630 --> 00:20:11,840

bright center

491

00:20:16,710 --> 00:20:14,640

i was also watching the iss and i saw

492

00:20:18,390 --> 00:20:16,720

iridium flares as well

493

00:20:20,950 --> 00:20:18,400

and then this additional witness

494

00:20:22,950 --> 00:20:20,960

references three other cases you can

495

00:20:25,350 --> 00:20:22,960

find those later at a link at

496

00:20:27,909 --> 00:20:25,360

ufoheadlinenews.com

497

00:20:29,990 --> 00:20:27,919

he ends i'm very eager to find out if

498

00:20:33,029 --> 00:20:30,000

there's an explanation for what we saw

499

00:20:35,190 --> 00:20:33,039

or if it is truly an unknown it would be

500

00:20:37,990 --> 00:20:35,200

nice if mufon could pick this one up and

501
00:20:41,590 --> 00:20:38,000
try to find out more information

502
00:20:43,990 --> 00:20:41,600
oh to that we say amen and we say hello

503
00:20:47,029 --> 00:20:44,000
again to the state of michigan this time

504
00:20:49,990 --> 00:20:47,039
a sighting in white pigeon michigan

505
00:20:52,310 --> 00:20:50,000
mufon case 85869

506
00:20:55,830 --> 00:20:52,320
this sighting carries a date of august

507
00:20:57,669 --> 00:20:55,840
12 2017 and it got a same-day report

508
00:20:58,789 --> 00:20:57,679
here's what the witness offers by way of

509
00:21:01,990 --> 00:20:58,799
summary

510
00:21:05,190 --> 00:21:02,000
first flashing light occasional really

511
00:21:07,669 --> 00:21:05,200
bright flashes one slightly erratic

512
00:21:09,430 --> 00:21:07,679
movement with flashes

513
00:21:12,390 --> 00:21:09,440

sighting specifics tell us there was a

514

00:21:16,149 --> 00:21:12,400

viewing distance here of 501 feet to one

515

00:21:19,190 --> 00:21:16,159

mile eventually out to over one mile the

516

00:21:20,070 --> 00:21:19,200

altitude was over 500 feet nope no cloud

517

00:21:22,230 --> 00:21:20,080

cover

518

00:21:24,390 --> 00:21:22,240

the sighting duration five minutes

519

00:21:27,270 --> 00:21:24,400

object features unknown

520

00:21:30,070 --> 00:21:27,280

object flight path straight line path

521

00:21:32,710 --> 00:21:30,080

then path with directional change this

522

00:21:35,350 --> 00:21:32,720

object had a sphere shape nothing to

523

00:21:37,029 --> 00:21:35,360

note meteorologically but here is the

524

00:21:39,110 --> 00:21:37,039

sighting itself

525

00:21:40,149 --> 00:21:39,120

i was watching the meteor shower with my

526
00:21:43,430 --> 00:21:40,159
father

527
00:21:45,830 --> 00:21:43,440
after about 45 minutes i noticed a flash

528
00:21:48,310 --> 00:21:45,840
at first i thought it was a drone

529
00:21:50,710 --> 00:21:48,320
but then i realized the height of the

530
00:21:52,149 --> 00:21:50,720
object appearing to be the altitude of a

531
00:21:54,149 --> 00:21:52,159
satellite

532
00:21:55,990 --> 00:21:54,159
i pointed this out to my dad and he was

533
00:21:59,430 --> 00:21:56,000
also perplexed

534
00:22:00,870 --> 00:21:59,440
it kept flashing moving slowly across

535
00:22:02,710 --> 00:22:00,880
the night sky

536
00:22:05,669 --> 00:22:02,720
at some points it flashed brightly like

537
00:22:09,669 --> 00:22:05,679
a strobe light so i got my mom and she

538
00:22:11,590 --> 00:22:09,679

also had no clue as to what this was

539

00:22:14,470 --> 00:22:11,600

we observed this object for about 10

540

00:22:17,590 --> 00:22:14,480

minutes as its flashes got dimmer and

541

00:22:19,990 --> 00:22:17,600

dimmer until it was not viewable anymore

542

00:22:22,310 --> 00:22:20,000

my mother went inside then and my dad

543

00:22:25,190 --> 00:22:22,320

and i talked about this sighting

544

00:22:28,230 --> 00:22:25,200

about 15 minutes later we saw another

545

00:22:30,950 --> 00:22:28,240

flash we thought it was another plane

546

00:22:32,149 --> 00:22:30,960

but it was moving very fast too fast to

547

00:22:35,270 --> 00:22:32,159

be a plane

548

00:22:37,510 --> 00:22:35,280

it moved in a zigzag pattern until it

549

00:22:40,310 --> 00:22:37,520

was blocked by trees

550

00:22:42,230 --> 00:22:40,320

it had appeared to be chasing a plane

551
00:22:45,350 --> 00:22:42,240
and it seemed to be about a mile high

552
00:22:49,110 --> 00:22:45,360
its flashes were nearly exactly like the

553
00:22:52,149 --> 00:22:49,120
flashes of a ufo we saw earlier

554
00:22:55,510 --> 00:22:52,159
i have seen a ufo before in my area and

555
00:22:58,630 --> 00:22:55,520
now i have seen three

556
00:23:01,270 --> 00:22:58,640
wow three and additional witnesses mom

557
00:23:03,029 --> 00:23:01,280
and dad the best interesting it doesn't

558
00:23:05,430 --> 00:23:03,039
sound like this is the first time our

559
00:23:08,149 --> 00:23:05,440
witnesses have seen something

560
00:23:10,470 --> 00:23:08,159
what do you bet it's going to continue

561
00:23:12,789 --> 00:23:10,480
on the other hand it could be those ufos

562
00:23:15,669 --> 00:23:12,799
in michigan are just there for

563
00:23:17,830 --> 00:23:15,679

well there's going to be an event in

564

00:23:21,029 --> 00:23:17,840

cedar springs michigan

565

00:23:22,470 --> 00:23:21,039

here's an article about it forum on ufos

566

00:23:26,149 --> 00:23:22,480

in michigan

567

00:23:28,870 --> 00:23:26,159

on thursday august 17th dr ron plune

568

00:23:31,430 --> 00:23:28,880

that spelled p-l-e-u-n-e

569

00:23:33,669 --> 00:23:31,440

will hold an open forum and information

570

00:23:36,710 --> 00:23:33,679

meeting in the cedar springs library

571

00:23:39,270 --> 00:23:36,720

from 6 30 pm to 8 pm followed by a

572

00:23:43,110 --> 00:23:39,280

question and answer period from 8 pm to

573

00:23:45,029 --> 00:23:43,120

8 30 on the topic of ufos in michigan as

574

00:23:47,510 --> 00:23:45,039

well as the greater rockford cedar

575

00:23:49,430 --> 00:23:47,520

springs and sand lake areas

576

00:23:52,310 --> 00:23:49,440

dr plune is a graduate of aquinas

577

00:23:54,710 --> 00:23:52,320

college and bethany theological seminary

578

00:23:56,789 --> 00:23:54,720

with majors in business management youth

579

00:23:59,830 --> 00:23:56,799

and family counseling as well as a

580

00:24:01,510 --> 00:23:59,840

doctorate in apologetics he has taught

581

00:24:04,070 --> 00:24:01,520

at several colleges as an adjunct

582

00:24:05,590 --> 00:24:04,080

professor and recently taught an 11-week

583

00:24:09,029 --> 00:24:05,600

class at the rockford community

584

00:24:13,029 --> 00:24:09,039

education program on the billy meyer ufo

585

00:24:15,110 --> 00:24:13,039

contacts that began in 1942. in fact

586

00:24:17,669 --> 00:24:15,120

this course will be offered once again

587

00:24:20,549 --> 00:24:17,679

this coming fall dr ploun is also

588

00:24:21,750 --> 00:24:20,559

certified for mufon the mutual ufo

589

00:24:24,390 --> 00:24:21,760

network

590

00:24:27,110 --> 00:24:24,400

dr ron plune became interested in ufo

591

00:24:29,510 --> 00:24:27,120

activity in childhood and was intrigued

592

00:24:33,190 --> 00:24:29,520

with the sightings in the 1960s but he

593

00:24:35,269 --> 00:24:33,200

never saw one until the spring of 1974

594

00:24:36,950 --> 00:24:35,279

when he and his family moved to rockford

595

00:24:40,470 --> 00:24:36,960

in 1973

596

00:24:43,110 --> 00:24:40,480

and then one clear saturday morning a

597

00:24:45,669 --> 00:24:43,120

ufo hovered a couple of hundred feet

598

00:24:48,310 --> 00:24:45,679

above the backyard and a call was placed

599

00:24:50,470 --> 00:24:48,320

to the grand rapids airport oh this

600

00:24:52,310 --> 00:24:50,480

broadcaster knows it well

601
00:24:55,430 --> 00:24:52,320
that airport confirmed that many calls

602
00:24:57,350 --> 00:24:55,440
were coming in about ufos being cited in

603
00:24:59,190 --> 00:24:57,360
the rockford area

604
00:25:01,750 --> 00:24:59,200
ufo sightings continued to be an

605
00:25:04,470 --> 00:25:01,760
interest for him and led him to his ufo

606
00:25:06,710 --> 00:25:04,480
teaching efforts which began in 2016.

607
00:25:09,510 --> 00:25:06,720
they include a two-hour session on how

608
00:25:12,149 --> 00:25:09,520
to contact ufos

609
00:25:16,149 --> 00:25:12,159
personal contact efforts in 2016

610
00:25:18,870 --> 00:25:16,159
resulted in 38 ufos flashing a light

611
00:25:22,149 --> 00:25:18,880
back when he summoned by light signal

612
00:25:25,510 --> 00:25:22,159
four ufo flyovers where ufos flew

613
00:25:28,310 --> 00:25:25,520

approximately 200 feet overhead

614

00:25:31,830 --> 00:25:28,320

and one close encounter where a ufo

615

00:25:34,070 --> 00:25:31,840

hovered 50 feet off the ground just 400

616

00:25:36,230 --> 00:25:34,080

feet away just as he and his wife

617

00:25:38,149 --> 00:25:36,240

arrived at what was their common ufo

618

00:25:41,750 --> 00:25:38,159

signaling field

619

00:25:44,470 --> 00:25:41,760

in 2017 personal contacts are above the

620

00:25:46,789 --> 00:25:44,480

2016 count for him and you've got to

621

00:25:49,830 --> 00:25:46,799

hear of the ufo he summoned february

622

00:25:52,630 --> 00:25:49,840

19th as well as how ufos have flashed

623

00:25:55,350 --> 00:25:52,640

back on occasion when he has simply

624

00:25:57,029 --> 00:25:55,360

spoken into the night sky

625

00:25:59,750 --> 00:25:57,039

the community will be invited to share

626
00:26:02,470 --> 00:25:59,760
personal ufo experiences express their

627
00:26:04,870 --> 00:26:02,480
interest in the formation of a ufo

628
00:26:07,110 --> 00:26:04,880
monthly fellowship and how to sign up

629
00:26:09,029 --> 00:26:07,120
for that 11 week course on the billy

630
00:26:11,350 --> 00:26:09,039
meyer ufo story

631
00:26:14,710 --> 00:26:11,360
the cedar springs library does not

632
00:26:16,310 --> 00:26:14,720
endorse nor bear any legal liability

633
00:26:19,110 --> 00:26:16,320
regarding the subject of this meeting

634
00:26:21,990 --> 00:26:19,120
offered by dr ron plune it's simply for

635
00:26:23,269 --> 00:26:22,000
personal enrichment to those that are

636
00:26:25,830 --> 00:26:23,279
interested

637
00:26:28,070 --> 00:26:25,840
yes well they're holding the meeting at

638
00:26:30,230 --> 00:26:28,080

least and that is the surprisingly good

639

00:26:31,669 --> 00:26:30,240

part billy meyer

640

00:26:34,470 --> 00:26:31,679

who does thunk it

641

00:26:37,510 --> 00:26:34,480

what we think is what the clocks say all

642

00:26:38,549 --> 00:26:37,520

the time zones indicate we've gotta fly

643

00:26:40,870 --> 00:26:38,559

because

644

00:26:43,350 --> 00:26:40,880

that's a wrap thank you for listening to

645

00:26:44,990 --> 00:26:43,360

inception radio network follow today's

646

00:26:47,830 --> 00:26:45,000

broadcast at

647

00:26:49,909 --> 00:26:47,840

ufoheadlinenews.com or iheartradio take

648

00:26:51,990 --> 00:26:49,919

care of each other we're all in this
