

 UFO Headline News | Thursday September 21st, 2017

 Listen on
inceptionradionetwork.com

1
00:00:07,639 --> 00:00:04,940
hello it's Thursday September 21st 2017

2
00:00:10,190 --> 00:00:07,649
you are listening to inception Radio

3
00:00:13,070 --> 00:00:10,200
Network voice of the fringe majority

4
00:00:17,000 --> 00:00:13,080
this is Carol Carl with UFO headline

5
00:00:18,769 --> 00:00:17,010
news so what have we got to look forward

6
00:00:21,500 --> 00:00:18,779
to in tonight's sky

7
00:00:24,439 --> 00:00:21,510
let's meander over to earth sky org

8
00:00:28,130 --> 00:00:24,449
shall we for this headline Equinox moon

9
00:00:32,089 --> 00:00:28,140
and Jupiter for the next few days on

10
00:00:34,690 --> 00:00:32,099
September 21st 22nd and 23rd this year

11
00:00:38,330 --> 00:00:34,700
as the Sun crosses the celestial equator

12
00:00:40,340 --> 00:00:38,340
bringing that September 22nd equinox try

13
00:00:43,490 --> 00:00:40,350

to catch the slender waxing crescent

14

00:00:45,920 --> 00:00:43,500

moon and planet Jupiter in your western

15

00:00:48,229 --> 00:00:45,930

twilight sky try looking for them as

16

00:00:50,389 --> 00:00:48,239

soon as the sky darkens both the moon

17

00:00:52,670 --> 00:00:50,399

and Jupiter are bright and they should

18

00:00:55,010 --> 00:00:52,680

show up even in the twilight they might

19

00:00:58,189 --> 00:00:55,020

be tough from northerly latitudes on the

20

00:01:00,889 --> 00:00:58,199

21st today though so near the September

21

00:01:03,590 --> 00:01:00,899

equinox with the autumn angle of the Sun

22

00:01:06,410 --> 00:01:03,600

and moons path the ecliptic which is low

23

00:01:08,510 --> 00:01:06,420

in the twilight sky has that waxing

24

00:01:10,820 --> 00:01:08,520

crescent moon it's going to follow the

25

00:01:13,310 --> 00:01:10,830

Sun beneath the horizon before it gets

26

00:01:15,679 --> 00:01:13,320

good and dark meanwhile from Earth's

27

00:01:18,050 --> 00:01:15,689

southern hemisphere the ecliptic is now

28

00:01:20,690 --> 00:01:18,060

making a steep angle with that sunset

29

00:01:23,570 --> 00:01:20,700

horizon and the moon and Jupiter will be

30

00:01:26,719 --> 00:01:23,580

higher above that horizon after the 21st

31

00:01:29,420 --> 00:01:26,729

today from North America indeed from the

32

00:01:32,569 --> 00:01:29,430

whole world it will be easier to spot

33

00:01:34,370 --> 00:01:32,579

the moon September 22nd and 23rd when

34

00:01:36,920 --> 00:01:34,380

its distance from the sunset will be

35

00:01:39,410 --> 00:01:36,930

greater each following day will present

36

00:01:41,390 --> 00:01:39,420

a wider evening crescent higher up in

37

00:01:43,910 --> 00:01:41,400

the West at sunset and setting later

38

00:01:46,039 --> 00:01:43,920

after nightfall if you've got an

39

00:01:48,710 --> 00:01:46,049

unobstructed horizon in the direction of

40

00:01:51,170 --> 00:01:48,720

sunset Jupiter sets better than an hour

41

00:01:53,840 --> 00:01:51,180

after sundown at mid northern latitudes

42

00:01:55,969 --> 00:01:53,850

and those trusty binoculars if you've

43

00:01:58,730 --> 00:01:55,979

got them can help you to view the moon

44

00:02:01,940 --> 00:01:58,740

and Jupiter of the sooner after the

45

00:02:04,310 --> 00:02:01,950

sunset there's a sky chart but of course

46

00:02:07,880 --> 00:02:04,320

you can find it later at UFO headline

47

00:02:10,490 --> 00:02:07,890

news calm it's a handy dandy thing for

48

00:02:12,680 --> 00:02:10,500

consultation the southern hemisphere has

49

00:02:13,430 --> 00:02:12,690

the advantage on all of these dates in

50

00:02:15,770 --> 00:02:13,440

the sub

51
00:02:18,770 --> 00:02:15,780
hemisphere now as we approach the

52
00:02:20,870 --> 00:02:18,780
September equinox spring is coming for

53
00:02:23,390 --> 00:02:20,880
you in the springtime from either

54
00:02:26,030 --> 00:02:23,400
hemisphere that young crescent moon

55
00:02:29,090 --> 00:02:26,040
rides high above the sunset it's easy to

56
00:02:31,940 --> 00:02:29,100
spot so for instance tonight in

57
00:02:34,520 --> 00:02:31,950
Philadelphia Pennsylvania at 40 degrees

58
00:02:36,410 --> 00:02:34,530
north latitude the moon sets one hour

59
00:02:39,260 --> 00:02:36,420
and seven minutes after sunset

60
00:02:42,350 --> 00:02:39,270
Jupiter sets one hour and nine minutes

61
00:02:46,220 --> 00:02:42,360
after the Sun but directly south of

62
00:02:49,640 --> 00:02:46,230
Philadelphia way south at Valdivia Chile

63
00:02:52,250 --> 00:02:49,650

it's 40 degrees south latitude the moon

64

00:02:55,190 --> 00:02:52,260

on this same date tonight the 21st of

65

00:02:57,740 --> 00:02:55,200

September sets one hour and 27 minutes

66

00:03:01,310 --> 00:02:57,750

after the Sun Jupiter sets two hours and

67

00:03:02,930 --> 00:03:01,320

12 minutes after the moon and Jupiter do

68

00:03:05,120 --> 00:03:02,940

ranked as the second brightest and

69

00:03:07,220 --> 00:03:05,130

fourth brightest celestial objects to

70

00:03:09,350 --> 00:03:07,230

light up our heavens respectively with

71

00:03:11,720 --> 00:03:09,360

the Sun of course being the brightest

72

00:03:13,310 --> 00:03:11,730

and the lovely planet Venus

73

00:03:16,070 --> 00:03:13,320

the third brightest heavenly body

74

00:03:18,020 --> 00:03:16,080

appears in the east now before dawn so

75

00:03:21,440 --> 00:03:18,030

there's no mistaking Jupiter for Venus

76

00:03:23,060 --> 00:03:21,450

in the September 2017 sky here's the

77

00:03:26,210 --> 00:03:23,070

bottom line in the form of a question

78

00:03:30,140 --> 00:03:26,220

how many of you will see the moon and

79

00:03:33,140 --> 00:03:30,150

Jupiter on September 21st 2017 if you

80

00:03:36,979 --> 00:03:33,150

miss them simply try September 22nd or

81

00:03:39,650 --> 00:03:36,989

23rd and we're reminded of an old thing

82

00:03:42,259 --> 00:03:39,660

taught to us by our mother it was a

83

00:03:44,630 --> 00:03:42,269

sweet little legend who knows the source

84

00:03:47,150 --> 00:03:44,640

it was that if you make a wish when the

85

00:03:50,540 --> 00:03:47,160

moon is crescent that wish is made over

86

00:03:53,000 --> 00:03:50,550

one's left shoulder well that will make

87

00:03:55,100 --> 00:03:53,010

your wish come true our wish today is

88

00:03:57,199 --> 00:03:55,110

that the heartbreak have currently felt

89

00:04:00,110 --> 00:03:57,209

by so many people in so many places is

90

00:04:02,449 --> 00:04:00,120

somehow lessened if only just a little

91

00:04:05,270 --> 00:04:02,459

bit by all the loving prayers that

92

00:04:07,520 --> 00:04:05,280

sisters and brothers are sending that

93

00:04:10,100 --> 00:04:07,530

includes us we hope you join us we know

94

00:04:13,009 --> 00:04:10,110

you will still up in space here's a

95

00:04:16,099 --> 00:04:13,019

headline a NASA spacecraft is about to

96

00:04:18,710 --> 00:04:16,109

slingshot around earth to meet up with

97

00:04:22,099 --> 00:04:18,720

an asteroid this is written by Lauren

98

00:04:25,460 --> 00:04:22,109

grush for The Verge on Friday that's

99

00:04:27,440 --> 00:04:25,470

tomorrow September 22nd a spacecraft the

100

00:04:29,570 --> 00:04:27,450

size of an SUV

101
00:04:32,180 --> 00:04:29,580
we'll slingshot around Earth's South

102
00:04:35,830 --> 00:04:32,190
Pole altering its trajectory through

103
00:04:38,930 --> 00:04:35,840
space the probe is NASA's osiris-rex

104
00:04:44,630 --> 00:04:38,940
here's how NASA spells it it's all caps

105
00:04:47,120 --> 00:04:44,640
uppercase o S l r is - r e lowercase X

106
00:04:50,300 --> 00:04:47,130
and it's upcoming maneuver around our

107
00:04:52,850 --> 00:04:50,310
planet is known as a gravity assist a

108
00:04:55,400 --> 00:04:52,860
way to harness Earth's gravity to alter

109
00:04:57,410 --> 00:04:55,410
its orbit that move is critical since it

110
00:05:01,010 --> 00:04:57,420
will put our Cyrus Rex on course to meet

111
00:05:03,470 --> 00:05:01,020
up with an asteroid in the fall of 2018

112
00:05:06,350 --> 00:05:03,480
osiris-rex launched last year with a

113
00:05:08,570 --> 00:05:06,360

relatively straightforward purpose grab

114

00:05:11,330 --> 00:05:08,580

a sample of rocks from an asteroid and

115

00:05:13,340 --> 00:05:11,340

bring them back to earth if all goes

116

00:05:15,830 --> 00:05:13,350

well this vehicle should retrieve the

117

00:05:18,140 --> 00:05:15,840

largest sample ever collected from an

118

00:05:20,030 --> 00:05:18,150

asteroid and give scientists a chance to

119

00:05:21,710 --> 00:05:20,040

study the space rock components in more

120

00:05:24,140 --> 00:05:21,720

detail than ever before

121

00:05:27,290 --> 00:05:24,150

but first the probe has to reach the

122

00:05:31,730 --> 00:05:27,300

target a nearby asteroid that asteroid

123

00:05:33,920 --> 00:05:31,740

named Bhanu B E and nu NASA picked Bhanu

124

00:05:35,930 --> 00:05:33,930

partly because this asteroids orbit is

125

00:05:38,330 --> 00:05:35,940

similar to Earth's orbit and that makes

126

00:05:41,450 --> 00:05:38,340

it an easier target to reach but their

127

00:05:43,700 --> 00:05:41,460

paths aren't the exact same venues orbit

128

00:05:46,790 --> 00:05:43,710

is tilted by about 6 degrees compared to

129

00:05:48,860 --> 00:05:46,800

Earth's in the past year osiris-rex has

130

00:05:51,320 --> 00:05:48,870

been orbiting in the same plane as earth

131

00:05:53,750 --> 00:05:51,330

traveling slightly ahead of our planet

132

00:05:56,240 --> 00:05:53,760

and now it's time for osiris-rex to

133

00:05:58,700 --> 00:05:56,250

match been whose orbit in space there

134

00:06:00,950 --> 00:05:58,710

are two main options to change a

135

00:06:03,020 --> 00:06:00,960

spacecraft's trajectory one is to use

136

00:06:04,750 --> 00:06:03,030

the vehicle's onboard engines to propel

137

00:06:07,610 --> 00:06:04,760

the spacecraft in a certain direction

138

00:06:09,950 --> 00:06:07,620

the problem with this option is that it

139

00:06:12,530 --> 00:06:09,960

uses up the spacecraft's finite amount

140

00:06:15,350 --> 00:06:12,540

of fuel and osiris-rex would have needed

141

00:06:17,840 --> 00:06:15,360

a lot of fuel to alter its course to

142

00:06:21,320 --> 00:06:17,850

reach value in time more than it carries

143

00:06:23,840 --> 00:06:21,330

so instead the probes navigators opted

144

00:06:26,840 --> 00:06:23,850

to use the second option a gravity

145

00:06:28,490 --> 00:06:26,850

assist said Michael Moreau a flight

146

00:06:31,760 --> 00:06:28,500

engineer at NASA's Goddard Space Flight

147

00:06:34,820 --> 00:06:31,770

Center quote this was the only option to

148

00:06:36,800 --> 00:06:34,830

reach Bennu launching in 2016 this

149

00:06:39,200 --> 00:06:36,810

maneuver has been used on many previous

150

00:06:41,029 --> 00:06:39,210

space missions to decrease or increase a

151

00:06:43,959 --> 00:06:41,039

spacecraft speed and course

152

00:06:46,519 --> 00:06:43,969

it's essentially an exchange of energy

153

00:06:49,070 --> 00:06:46,529

similar to when a roller coaster speeds

154

00:06:51,889 --> 00:06:49,080

up while going down a hill when

155

00:06:54,619 --> 00:06:51,899

osiris-rex swings by earth it will steal

156

00:06:57,379 --> 00:06:54,629

a little bit of our planet's momentum in

157

00:06:59,359 --> 00:06:57,389

order to change its orbit earth is so

158

00:07:01,939 --> 00:06:59,369

massive that this manoeuvre won't really

159

00:07:04,429 --> 00:07:01,949

affect our planet but osiris-rex will

160

00:07:06,290 --> 00:07:04,439

change its speed and course by more than

161

00:07:08,389 --> 00:07:06,300

eighty four hundred miles per hour

162

00:07:10,339 --> 00:07:08,399

that's nearly twice the amount the

163

00:07:11,059 --> 00:07:10,349

spacecraft would get if it used up all

164

00:07:13,549 --> 00:07:11,069

its fuel

165

00:07:16,999 --> 00:07:13,559

this doesn't mean osiris-rex is speeding

166

00:07:18,860 --> 00:07:17,009

up or slowing down though this gravity

167

00:07:20,839 --> 00:07:18,870

assist will mostly go toward changing

168

00:07:23,329 --> 00:07:20,849

the direction of the spacecraft's orbit

169

00:07:24,079 --> 00:07:23,339

when the spacecraft flies over the South

170

00:07:27,589 --> 00:07:24,089

Pole Friday

171

00:07:29,929 --> 00:07:27,599

osiris-rex will shift its orbit by six

172

00:07:32,749 --> 00:07:29,939

point two degrees putting it in the same

173

00:07:35,119 --> 00:07:32,759

place as Ben who quote we're targeting

174

00:07:37,670 --> 00:07:35,129

the spacecraft to fly by the earth at a

175

00:07:40,100 --> 00:07:37,680

very specific point and time and quotes

176

00:07:40,659 --> 00:07:40,110

says morrow it will go something like

177

00:07:43,189 --> 00:07:40,669

this

178

00:07:46,129 --> 00:07:43,199

osiris-rex will approach the earth at a

179

00:07:49,100 --> 00:07:46,139

speed of 19,000 miles per hour flying

180

00:07:51,799 --> 00:07:49,110

over Australia first it will then make

181

00:07:55,279 --> 00:07:51,809

its closest approach to earth at 1252

182

00:07:58,730 --> 00:07:55,289

p.m. Eastern Time coming within 11,000

183

00:08:00,499 --> 00:07:58,740

miles of Antarctica around that time the

184

00:08:02,689 --> 00:08:00,509

vehicle will lose contact with NASA

185

00:08:04,699 --> 00:08:02,699

since it will be out of range with the

186

00:08:07,339 --> 00:08:04,709

Space Agency's closest tracking stations

187

00:08:09,829 --> 00:08:07,349

that blackout should last just 50

188

00:08:12,110 --> 00:08:09,839

minutes though and NASA expects to

189

00:08:13,309 --> 00:08:12,120

regain communications around 1:40 p.m.

190

00:08:15,769 --> 00:08:13,319

Eastern Time

191

00:08:18,499 --> 00:08:15,779

the vehicle is also supposed to come

192

00:08:20,360 --> 00:08:18,509

into areas dominated by satellites but

193

00:08:22,639 --> 00:08:20,370

nASA says it has taken steps to make

194

00:08:25,759 --> 00:08:22,649

sure no collisions happen during this

195

00:08:28,399 --> 00:08:25,769

gravity assist after Friday's maneuver

196

00:08:31,009 --> 00:08:28,409

osiris-rex will cruise through space for

197

00:08:33,740 --> 00:08:31,019

another year reaching venue in October

198

00:08:35,449 --> 00:08:33,750

at that point the vehicle is supposed to

199

00:08:38,240 --> 00:08:35,459

fly around the asteroid for two more

200

00:08:39,980 --> 00:08:38,250

years surveying the rocks surface before

201
00:08:42,370 --> 00:08:39,990
it actually attempts to grab that

202
00:08:45,379 --> 00:08:42,380
coveted sample and return it to earth

203
00:08:47,030 --> 00:08:45,389
the gravity assist is the first step to

204
00:08:49,280 --> 00:08:47,040
getting there and it will allow the

205
00:08:51,530 --> 00:08:49,290
mission team to meet up with Ben knew

206
00:08:54,620 --> 00:08:51,540
exactly where they need to while saving

207
00:08:57,020 --> 00:08:54,630
on fuel and that's important since

208
00:08:59,480 --> 00:08:57,030
siress Rex is going to need that fuel in

209
00:09:02,690 --> 00:08:59,490
the future asteroid Bennu is roughly

210
00:09:05,270 --> 00:09:02,700
1600 feet wide around the heights of the

211
00:09:07,280 --> 00:09:05,280
Willis Tower in Chicago making it one of

212
00:09:10,160 --> 00:09:07,290
the smallest objects nASA has ever

213
00:09:12,020 --> 00:09:10,170

orbited that poses a big navigation

214

00:09:14,300 --> 00:09:12,030

challenge for the mission team requiring

215

00:09:17,180 --> 00:09:14,310

much more frequent maneuvers to keep the

216

00:09:19,100 --> 00:09:17,190

spacecraft where it needs to be during

217

00:09:20,900 --> 00:09:19,110

its cruise the team has only had to

218

00:09:24,200 --> 00:09:20,910

adjust the spacecraft's orbit every few

219

00:09:27,140 --> 00:09:24,210

months or so to stay on track but once

220

00:09:28,700 --> 00:09:27,150

osiris-rex reaches vanu there are times

221

00:09:30,970 --> 00:09:28,710

when the team will need to adjust the

222

00:09:34,480 --> 00:09:30,980

spacecraft's direction every two days

223

00:09:37,610 --> 00:09:34,490

but first Friday has to be a success

224

00:09:40,400 --> 00:09:37,620

says Michael Morrow quote the velocity

225

00:09:42,230 --> 00:09:40,410

change of the gravity assist is larger

226
00:09:45,970 --> 00:09:42,240
than that of the other maneuvers we've

227
00:09:49,430 --> 00:09:45,980
been doing it's a big effect end quotes

228
00:09:53,420 --> 00:09:49,440
osiris-rex such an ancient moniker for

229
00:09:55,880 --> 00:09:53,430
such a new device let's drift on back to

230
00:09:58,460 --> 00:09:55,890
earth gently now shall we and we'll

231
00:10:02,120 --> 00:09:58,470
hover over the United Kingdom where we

232
00:10:06,020 --> 00:10:02,130
get this UFO sighting from UK UFO -

233
00:10:09,710 --> 00:10:06,030
dot-com headline daylight sighting small

234
00:10:12,830 --> 00:10:09,720
pale object Perranporth Cornwall August

235
00:10:15,590 --> 00:10:12,840
22nd 2017 the sighting time is

236
00:10:18,530 --> 00:10:15,600
charmingly listed as lunchtime the

237
00:10:22,160 --> 00:10:18,540
witness is named Adam W here's what Adam

238
00:10:24,260 --> 00:10:22,170

W has to say so I'm sitting on

239

00:10:27,170 --> 00:10:24,270

Perranporth beach looking up Northwest

240

00:10:29,650 --> 00:10:27,180

at the high cirrus clouds 45 degrees

241

00:10:32,150 --> 00:10:29,660

elevation wondering if they mean rain

242

00:10:34,250 --> 00:10:32,160

there's a stiff offshore breeze but the

243

00:10:37,760 --> 00:10:34,260

high clouds appear to be moving slowly I

244

00:10:40,550 --> 00:10:37,770

notice a small pale sharply-defined

245

00:10:42,770 --> 00:10:40,560

object in contrast to the clouds which

246

00:10:46,100 --> 00:10:42,780

we're diffuse it seemed to be keeping

247

00:10:48,080 --> 00:10:46,110

pace with those clouds this object was

248

00:10:50,240 --> 00:10:48,090

the kind of size you don't notice in

249

00:10:52,490 --> 00:10:50,250

peripheral vision only when you happen

250

00:10:54,950 --> 00:10:52,500

to look straight at it it gave the

251
00:10:56,960 --> 00:10:54,960
impression of great height but airliners

252
00:11:00,140 --> 00:10:56,970
don't move like that and it certainly

253
00:11:02,570 --> 00:11:00,150
wasn't a bird or a kite I watched this

254
00:11:04,760 --> 00:11:02,580
thing for about a minute and then I most

255
00:11:07,130 --> 00:11:04,770
deliberately looked away and back to

256
00:11:08,360 --> 00:11:07,140
make sure I could find it again it was

257
00:11:10,340 --> 00:11:08,370
still there

258
00:11:12,230 --> 00:11:10,350
so I reached down for my binoculars to

259
00:11:15,320 --> 00:11:12,240
see if I could make out what manner of

260
00:11:18,140 --> 00:11:15,330
aircraft this might be as I attempted to

261
00:11:20,450 --> 00:11:18,150
focus on the object it suddenly shot off

262
00:11:23,330 --> 00:11:20,460
to the southwest faster than I could

263
00:11:27,350 --> 00:11:23,340

follow it made me jump if this was a

264

00:11:28,550 --> 00:11:27,360

drone it had extreme performance drones

265

00:11:31,100 --> 00:11:28,560

are amazing they're undoubtedly

266

00:11:33,019 --> 00:11:31,110

necessary they do good things but this

267

00:11:35,540 --> 00:11:33,029

isn't one of them if it is a drone this

268

00:11:37,640 --> 00:11:35,550

confusion the blur between something

269

00:11:40,579 --> 00:11:37,650

operated by a person on earth and

270

00:11:43,790 --> 00:11:40,589

something operated by well shall we say

271

00:11:46,460 --> 00:11:43,800

other here's an other sighting from the

272

00:11:50,000 --> 00:11:46,470

same area well close by Bracknell and

273

00:11:53,360 --> 00:11:50,010

the East Hampstead area headline man

274

00:11:56,750 --> 00:11:53,370

convinced UFO spotted over Bracknell had

275

00:11:59,240 --> 00:11:56,760

its quote own life source end quotes

276

00:12:02,720 --> 00:11:59,250

this article is written by Kara O'Neill

277

00:12:04,790 --> 00:12:02,730

and Hugh fort a man who spotted a ball

278

00:12:07,460 --> 00:12:04,800

bearing shaped object in the skies above

279

00:12:11,260 --> 00:12:07,470

East Hampstead said it appeared to have

280

00:12:13,640 --> 00:12:11,270

its own life source 49 year old Bob Wise

281

00:12:16,310 --> 00:12:13,650

spotted this bizarre object at around

282

00:12:18,770 --> 00:12:16,320

midday on a bright sunny day he whipped

283

00:12:21,740 --> 00:12:18,780

out his camera his iphone to capture

284

00:12:24,380 --> 00:12:21,750

pictures and video here's what Bob wise

285

00:12:26,660 --> 00:12:24,390

said quote it was stationary just

286

00:12:29,329 --> 00:12:26,670

flashing it was dim at first but then it

287

00:12:30,980 --> 00:12:29,339

got brighter and brighter which is when

288

00:12:34,160 --> 00:12:30,990

I decided to take the pictures on my

289

00:12:37,220 --> 00:12:34,170

iPhone and quotes mr. wise then sat down

290

00:12:39,110 --> 00:12:37,230

later to edit the photos together and it

291

00:12:42,410 --> 00:12:39,120

was only then that he noticed how

292

00:12:45,800 --> 00:12:42,420

strange this object was he said quote my

293

00:12:48,770 --> 00:12:45,810

gut reaction is that it's not ours it

294

00:12:52,190 --> 00:12:48,780

was incredibly bright this thing

295

00:12:54,020 --> 00:12:52,200

appeared to have its own life source the

296

00:12:56,180 --> 00:12:54,030

light reminded me of being in chemistry

297

00:12:59,570 --> 00:12:56,190

lessons at school like burning magnesium

298

00:13:02,180 --> 00:12:59,580

it wasn't an electrical light it was

299

00:13:04,190 --> 00:13:02,190

very odd end quotes he said the skies

300

00:13:06,350 --> 00:13:04,200

about Bracknell are busy with planes and

301
00:13:09,199 --> 00:13:06,360
helicopters but conceded the objects he

302
00:13:11,690 --> 00:13:09,209
spotted on Sunday August 27th could be

303
00:13:13,910 --> 00:13:11,700
something natural he said quote I just

304
00:13:16,280 --> 00:13:13,920
don't think it's from here I'm

305
00:13:18,050 --> 00:13:16,290
open-minded about these things this

306
00:13:20,030 --> 00:13:18,060
footage is straight from my iPhone it

307
00:13:21,620 --> 00:13:20,040
hasn't been tampered with of course I'm

308
00:13:22,160 --> 00:13:21,630
still open to the fact that this could

309
00:13:24,019 --> 00:13:22,170
be some

310
00:13:26,990 --> 00:13:24,029
sort of atmospheric phenomenon end

311
00:13:30,050 --> 00:13:27,000
quotes Bracknell forest is a well-known

312
00:13:32,210 --> 00:13:30,060
UFO hotspot and mr. wise added he

313
00:13:35,269 --> 00:13:32,220

spotted a strange cylindrical shape in

314

00:13:38,449 --> 00:13:35,279

the sky himself about five years ago get

315

00:13:40,939 --> 00:13:38,459

reading a website contacted expert Nick

316

00:13:43,939 --> 00:13:40,949

Pope who investigated UFOs for the

317

00:13:46,879 --> 00:13:43,949

ministry of defense Pope said quote it's

318

00:13:49,250 --> 00:13:46,889

an intriguing piece of footage that said

319

00:13:51,259 --> 00:13:49,260

I'd like to know whether the witness saw

320

00:13:53,840 --> 00:13:51,269

this pulsating effect with a naked eye

321

00:13:56,600 --> 00:13:53,850

or only when viewing the object with the

322

00:13:59,120 --> 00:13:56,610

iPhone my suspicion is that the

323

00:14:02,030 --> 00:13:59,130

pulsating as a result of a technical

324

00:14:03,920 --> 00:14:02,040

issue with the iPhone and/or with the

325

00:14:06,019 --> 00:14:03,930

subsequent editing of the footage that I

326

00:14:08,000 --> 00:14:06,029

understand was done and not something

327

00:14:10,370 --> 00:14:08,010

that the object itself was doing I'm

328

00:14:13,069 --> 00:14:10,380

happy to be proven wrong on this but my

329

00:14:15,590 --> 00:14:13,079

experience tells me that with this sort

330

00:14:18,350 --> 00:14:15,600

of footage the issue is often with the

331

00:14:20,540 --> 00:14:18,360

camera or smartphone it's also the case

332

00:14:22,939 --> 00:14:20,550

that distortion and other artifacts can

333

00:14:24,650 --> 00:14:22,949

occur when zooming in if this is the

334

00:14:26,449 --> 00:14:24,660

case the object itself could have been

335

00:14:29,120 --> 00:14:26,459

something quite ordinary such as a

336

00:14:31,310 --> 00:14:29,130

helicopter reflecting the sunlight more

337

00:14:33,019 --> 00:14:31,320

generally it would be helpful to know if

338

00:14:35,240 --> 00:14:33,029

there were any other witnesses if

339

00:14:38,120 --> 00:14:35,250

anybody else managed to take film or

340

00:14:42,019 --> 00:14:38,130

photographs and also if anything unusual

341

00:14:44,329 --> 00:14:42,029

was tracked on radar and quotes yup and

342

00:14:47,000 --> 00:14:44,339

Nick Pope certainly knows where of he

343

00:14:49,720 --> 00:14:47,010

speaks that radar component is always

344

00:14:52,730 --> 00:14:49,730

very intriguing here's something else

345

00:14:55,790 --> 00:14:52,740

intriguing it's a UFO sighting out of an

346

00:14:58,880 --> 00:14:55,800

undisclosed city in Florida however it

347

00:15:01,069 --> 00:14:58,890

connects with the ce-5 dr. Steven Greer

348

00:15:02,689 --> 00:15:01,079

zijn ishutin it will give you the

349

00:15:04,880 --> 00:15:02,699

sighting and then will give you a few

350

00:15:05,870 --> 00:15:04,890

points on that in case you're in the

351

00:15:08,480 --> 00:15:05,880

dark we were

352

00:15:11,180 --> 00:15:08,490

it's a sighting numbered by MUFON as

353

00:15:13,759 --> 00:15:11,190

eight six seven seven eight the date on

354

00:15:15,980 --> 00:15:13,769

this sighting is September 12 2017 it

355

00:15:20,230 --> 00:15:15,990

wasn't reported till September 19th

356

00:15:23,300 --> 00:15:20,240

here's the summary used ce-5 protocol

357

00:15:26,600 --> 00:15:23,310

during this meditation heard clicking

358

00:15:30,920 --> 00:15:26,610

noises and saw an image of my back door

359

00:15:32,900 --> 00:15:30,930

I went outside and saw the UFO the

360

00:15:36,060 --> 00:15:32,910

sighting specifics here are a striking

361

00:15:38,700 --> 00:15:36,070

viewing distance 501 feet to one mile

362

00:15:42,060 --> 00:15:38,710

that's close the altitude was over 500

363

00:15:45,060 --> 00:15:42,070

feet and underneath a cloud cover the

364

00:15:47,790 --> 00:15:45,070

sighting duration 35 minutes object

365

00:15:50,490 --> 00:15:47,800

features unknown object flight path path

366

00:15:53,700 --> 00:15:50,500

with directional change and the witness

367

00:15:55,440 --> 00:15:53,710

lists this object shape as sphere the

368

00:15:58,050 --> 00:15:55,450

maximum temperature during this event

369

00:16:01,110 --> 00:15:58,060

was 88 degrees Fahrenheit 31 degrees

370

00:16:03,990 --> 00:16:01,120

Celsius minimum temperature 73 degrees

371

00:16:06,240 --> 00:16:04,000

Fahrenheit 23 degrees Celsius the

372

00:16:09,720 --> 00:16:06,250

visibility factor is pretty standard the

373

00:16:12,150 --> 00:16:09,730

usual 10 miles 16 kilometers the minimum

374

00:16:14,910 --> 00:16:12,160

however a little different 5 miles 8

375

00:16:18,150 --> 00:16:14,920

kilometers nothing abnormal about the

376

00:16:22,890 --> 00:16:18,160

weather conditions here's the account on

377

00:16:26,970 --> 00:16:22,900

September 12 2017 I meditated using the

378

00:16:29,900 --> 00:16:26,980

ce-5 protocol at my home however I did

379

00:16:33,300 --> 00:16:29,910

it twice and my session lasted two hours

380

00:16:36,810 --> 00:16:33,310

at approximately one hour and a half in

381

00:16:40,080 --> 00:16:36,820

I started saying peace and love in my

382

00:16:43,050 --> 00:16:40,090

mind repeatedly and that's when things

383

00:16:46,650 --> 00:16:43,060

started to pick up I started to hear

384

00:16:48,950 --> 00:16:46,660

clicking noises and within my mind I was

385

00:16:51,990 --> 00:16:48,960

seeing repeated images of my back door

386

00:16:54,720 --> 00:16:52,000

my alarm rang letting me then know that

387

00:16:56,610 --> 00:16:54,730

the session was over so I went through

388

00:16:58,980 --> 00:16:56,620

my back door to go to my back yard

389

00:17:03,510 --> 00:16:58,990

looked up to the sky for a minute and

390

00:17:06,120 --> 00:17:03,520

then I saw a star glow a bright orange

391

00:17:08,100 --> 00:17:06,130

yellow it then streaked to the left at a

392

00:17:10,980 --> 00:17:08,110

Northwest angle into the clouds

393

00:17:15,750 --> 00:17:10,990

it moved lightning-fast this was my

394

00:17:18,660 --> 00:17:15,760

first time seeing a UFO wow that's a

395

00:17:21,300 --> 00:17:18,670

striking experience that urge to go to

396

00:17:25,199 --> 00:17:21,310

the back door to go outside and then the

397

00:17:28,500 --> 00:17:25,209

thing in the sky it's not unusual here's

398

00:17:30,630 --> 00:17:28,510

the stuff about how this ce-5 initiative

399

00:17:33,510 --> 00:17:30,640

it fits into this sighting mind you this

400

00:17:35,610 --> 00:17:33,520

is the most brief of overviews its

401
00:17:39,090 --> 00:17:35,620
lifted from a transcript of an audio

402
00:17:41,070 --> 00:17:39,100
recording made in April of 1995 it was a

403
00:17:44,400 --> 00:17:41,080
presentation by dr. Steven Greer in

404
00:17:48,510 --> 00:17:44,410
Denver Colorado here's what he says a

405
00:17:50,280 --> 00:17:48,520
close encounter of the fifth kind ce-5

406
00:17:51,990 --> 00:17:50,290
is when humans

407
00:17:54,450 --> 00:17:52,000
liberally take the initiative to

408
00:17:56,940 --> 00:17:54,460
interact with or communicate with no

409
00:18:00,000 --> 00:17:56,950
matter how simply these life-forms and

410
00:18:01,920 --> 00:18:00,010
their spacecraft it is that simple it

411
00:18:04,680 --> 00:18:01,930
may be as rudimentary as someone driving

412
00:18:07,470 --> 00:18:04,690
down a road and seeing a spacecraft that

413
00:18:09,690 --> 00:18:07,480

is obviously not of human manufacture

414

00:18:12,690 --> 00:18:09,700

and signaling their bright lights on and

415

00:18:15,870 --> 00:18:12,700

off and the object stops comes over and

416

00:18:18,420 --> 00:18:15,880

signals back in the same sequence there

417

00:18:21,810 --> 00:18:18,430

are dozens of cases of this occurring it

418

00:18:24,540 --> 00:18:21,820

is a simple exchange this exchange may

419

00:18:26,610 --> 00:18:24,550

be ridiculed by people as simplistic but

420

00:18:29,100 --> 00:18:26,620

it is an important step because it is an

421

00:18:31,530 --> 00:18:29,110

attempt by a person to reach out to

422

00:18:34,260 --> 00:18:31,540

these occupants and they stop and take

423

00:18:36,000 --> 00:18:34,270

the time to answer back it doesn't

424

00:18:38,760 --> 00:18:36,010

matter if there was any substance to the

425

00:18:41,120 --> 00:18:38,770

communication the fact that hello was

426

00:18:44,010 --> 00:18:41,130

said and an answer came back is

427

00:18:46,740 --> 00:18:44,020

profoundly important it is a quantum

428

00:18:48,270 --> 00:18:46,750

leap in the relationship the other types

429

00:18:50,460 --> 00:18:48,280

of Close Encounters which have

430

00:18:52,230 --> 00:18:50,470

previously been described are the close

431

00:18:54,450 --> 00:18:52,240

encounter of the first kind

432

00:18:57,600 --> 00:18:54,460

that's a sighting of an extraterrestrial

433

00:18:59,400 --> 00:18:57,610

spacecraft within 500 feet a close

434

00:19:02,310 --> 00:18:59,410

encounter of the second kind is a

435

00:19:05,100 --> 00:19:02,320

landing trace or an electromagnetic

436

00:19:07,890 --> 00:19:05,110

trace some sort of physical trace that's

437

00:19:10,590 --> 00:19:07,900

left by one of these objects a close

438

00:19:12,360 --> 00:19:10,600

encounter of the third kind as everyone

439

00:19:14,730 --> 00:19:12,370

knows from Steven Spielberg's famous

440

00:19:17,100 --> 00:19:14,740

movie is the sighting of one of the

441

00:19:19,320 --> 00:19:17,110

humanoids or life-forms usually in

442

00:19:22,140 --> 00:19:19,330

association with a spacecraft but not

443

00:19:24,000 --> 00:19:22,150

always a close encounter of the Fourth

444

00:19:27,330 --> 00:19:24,010

Kind that's when someone is actually

445

00:19:29,340 --> 00:19:27,340

taken on board a craft and while this is

446

00:19:32,310 --> 00:19:29,350

rare there are a few cases where it

447

00:19:35,130 --> 00:19:32,320

happens or is suspected to have happened

448

00:19:38,190 --> 00:19:35,140

and a close encounter of the fifth kind

449

00:19:41,040 --> 00:19:38,200

then is the first category that's not

450

00:19:43,500 --> 00:19:41,050

passive if you look at the other four

451
00:19:46,110 --> 00:19:43,510
categories you see they are essentially

452
00:19:47,760 --> 00:19:46,120
passive categories even a close

453
00:19:49,980 --> 00:19:47,770
encounter of the Fourth Kind for the

454
00:19:52,260 --> 00:19:49,990
most part is a category where humans

455
00:19:55,050 --> 00:19:52,270
take the initiative and in a cooperative

456
00:19:57,330 --> 00:19:55,060
spirit attempt to interact with or have

457
00:20:00,300 --> 00:19:57,340
an exchange with these life-forms their

458
00:20:02,670 --> 00:20:00,310
spacecraft the occupants on board it is

459
00:20:03,930 --> 00:20:02,680
an important new category because it is

460
00:20:06,060 --> 00:20:03,940
a new concept

461
00:20:08,909 --> 00:20:06,070
it's a new paradigm of interaction that

462
00:20:11,369 --> 00:20:08,919
goes from the usual passive modality or

463
00:20:15,269 --> 00:20:11,379

retrospective modality to one of

464

00:20:17,730 --> 00:20:15,279

real-time proactive communication and as

465

00:20:20,879 --> 00:20:17,740

such it's a milestone in the development

466

00:20:22,980 --> 00:20:20,889

of our relationship because it conveys

467

00:20:25,049 --> 00:20:22,990

to the extraterrestrial life-forms that

468

00:20:27,810 --> 00:20:25,059

we are reaching the point of maturity

469

00:20:31,110 --> 00:20:27,820

where we're willing to end our denial

470

00:20:34,769 --> 00:20:31,120

and end even our passive observation and

471

00:20:36,869 --> 00:20:34,779

step into a state of empowerment a state

472

00:20:39,450 --> 00:20:36,879

where we can say we are communicating

473

00:20:42,210 --> 00:20:39,460

with you and we wish to communicate with

474

00:20:45,090 --> 00:20:42,220

you this is a very significant statement

475

00:20:48,389 --> 00:20:45,100

for us to make to ourselves and for us

476
00:20:50,490 --> 00:20:48,399
to make to these life-forms our sense is

477
00:20:52,680 --> 00:20:50,500
that they have been waiting for this

478
00:20:55,830 --> 00:20:52,690
statement not out of the barrel of a gun

479
00:20:58,590 --> 00:20:55,840
but out of the minds and hearts of a

480
00:21:01,919 --> 00:20:58,600
sincere attempt to say hello for at

481
00:21:05,940 --> 00:21:01,929
least 40 or 50 years now in an intense

482
00:21:08,340 --> 00:21:05,950
way so there you have it dr. Steven

483
00:21:12,090 --> 00:21:08,350
Greer has a lot of detractors this is an

484
00:21:14,369 --> 00:21:12,100
old statement made in 1995 however his

485
00:21:16,799 --> 00:21:14,379
attempts are sincere and this is a

486
00:21:19,769 --> 00:21:16,809
fascinating approach we think let's

487
00:21:22,169 --> 00:21:19,779
whisk away now to an article by Cheryl

488
00:21:25,200 --> 00:21:22,179

Costa from her New York Skies blog

489

00:21:28,320 --> 00:21:25,210

here's the headline an Illinois close

490

00:21:31,110 --> 00:21:28,330

encounter the place was an isolated

491

00:21:34,320 --> 00:21:31,120

ranch in the wilderness of northwestern

492

00:21:39,869 --> 00:21:34,330

Illinois a preteen had a close encounter

493

00:21:42,690 --> 00:21:39,879

there on February 24 2005 George a 91

494

00:21:45,600 --> 00:21:42,700

year old man was watching an ABC program

495

00:21:48,480 --> 00:21:45,610

on UFOs a program hosted by Peter

496

00:21:51,240 --> 00:21:48,490

Jennings gentle listeners time did not

497

00:21:53,340 --> 00:21:51,250

allow a sleuth on Google for this but

498

00:21:55,980 --> 00:21:53,350

we're pretty sure if we typed in Peter

499

00:21:58,499 --> 00:21:55,990

Jennings UFO show we could find it

500

00:22:00,029 --> 00:21:58,509

after watching this program he

501
00:22:03,570 --> 00:22:00,039
telephoned his adult daughter and

502
00:22:06,450 --> 00:22:03,580
inquired how to report a UFO sighting a

503
00:22:08,490 --> 00:22:06,460
sighting from when he was a youth Cheryl

504
00:22:10,019 --> 00:22:08,500
Kosta notes that all names represented

505
00:22:13,590 --> 00:22:10,029
here were changed to respect the

506
00:22:15,899 --> 00:22:13,600
family's privacy this UFO event occurred

507
00:22:17,550 --> 00:22:15,909
on an isolated ranch in the wilds of

508
00:22:19,500 --> 00:22:17,560
Henry County Illinois

509
00:22:22,170 --> 00:22:19,510
the ranch was located some six miles

510
00:22:24,330 --> 00:22:22,180
north of the town of Atkinson the

511
00:22:26,400 --> 00:22:24,340
population of Atkinson was approximately

512
00:22:28,820 --> 00:22:26,410
seven hundred persons and the Henry

513
00:22:31,500 --> 00:22:28,830

County population itself was only about

514

00:22:35,220 --> 00:22:31,510

45,000 in those days according to the

515

00:22:38,850 --> 00:22:35,230

census the elder George tells us in his

516

00:22:40,680 --> 00:22:38,860

own words of the encounter quote the

517

00:22:43,650 --> 00:22:40,690

event that I described herein happened

518

00:22:46,260 --> 00:22:43,660

in 1925 between Christmas and New Year's

519

00:22:49,650 --> 00:22:46,270

three people were present uncle James

520

00:22:51,720 --> 00:22:49,660

uncle Abel and me uncle Abel was in the

521

00:22:54,390 --> 00:22:51,730

cow section of the barn and uncle James

522

00:22:56,010 --> 00:22:54,400

was in the horse barn and quote George

523

00:22:58,260 --> 00:22:56,020

explained that the three of them were

524

00:23:00,630 --> 00:22:58,270

later than usual with doing the late day

525

00:23:03,660 --> 00:23:00,640

farm chores at the time of the encounter

526

00:23:06,600 --> 00:23:03,670

incident James was in his 20s Abel in

527

00:23:08,790 --> 00:23:06,610

his teens and George was eleven said

528

00:23:10,800 --> 00:23:08,800

George quote uncle James suggested that

529

00:23:12,930 --> 00:23:10,810

I take a bucket that was nearby and go

530

00:23:15,510 --> 00:23:12,940

to the corn crib for corn for the horses

531

00:23:17,880 --> 00:23:15,520

so I exited the barn and started for the

532

00:23:20,610 --> 00:23:17,890

corn crib it was at a lower elevation

533

00:23:21,240 --> 00:23:20,620

than the barn so I started to descend to

534

00:23:23,610 --> 00:23:21,250

that level

535

00:23:25,710 --> 00:23:23,620

I stopped then to admire the scenery

536

00:23:28,980 --> 00:23:25,720

because it was such a picture postcard

537

00:23:32,910 --> 00:23:28,990

winter scene it was about 15 degrees

538

00:23:36,000 --> 00:23:32,920

fresh snowfall clear sky the wind was

539

00:23:38,370 --> 00:23:36,010

calm so I stopped and looked around the

540

00:23:40,260 --> 00:23:38,380

stars were beginning to come out and in

541

00:23:42,180 --> 00:23:40,270

viewing the Stars looking to my left I

542

00:23:44,370 --> 00:23:42,190

noticed two stars brighter than the

543

00:23:47,070 --> 00:23:44,380

others this caught my attention so I

544

00:23:49,410 --> 00:23:47,080

studied them a little it occurred to me

545

00:23:52,740 --> 00:23:49,420

that one of them was moving away from

546

00:23:54,870 --> 00:23:52,750

the other as I watched all this going on

547

00:23:58,650 --> 00:23:54,880

all of a sudden the object above me and

548

00:24:01,740 --> 00:23:58,660

the whole area becomes as light as day I

549

00:24:03,600 --> 00:24:01,750

looked up and looked all around I could

550

00:24:06,750 --> 00:24:03,610

see the neighbors buildings as clear as

551
00:24:09,060 --> 00:24:06,760
day the object above me the source of

552
00:24:11,610 --> 00:24:09,070
this light it was not like a searchlight

553
00:24:13,680 --> 00:24:11,620
it was more like daylight so I could

554
00:24:16,110 --> 00:24:13,690
look up at this object which was just a

555
00:24:18,750 --> 00:24:16,120
short distance above me however all I

556
00:24:21,390 --> 00:24:18,760
could see was a dark space about ten

557
00:24:24,810 --> 00:24:21,400
feet in diameter it was enveloped in

558
00:24:26,880 --> 00:24:24,820
some sort of an aura atmosphere it

559
00:24:29,040 --> 00:24:26,890
remained there for a short time the

560
00:24:30,780 --> 00:24:29,050
light dimmed and then it glided over the

561
00:24:31,360 --> 00:24:30,790
field at about the same level that it

562
00:24:34,630 --> 00:24:31,370
was above

563
00:24:37,060 --> 00:24:34,640

about 25 feet in the air it went

564

00:24:39,520 --> 00:24:37,070

directly toward the buildings on ranch

565

00:24:41,770 --> 00:24:39,530

number 2 it had to ascend in order to

566

00:24:42,820 --> 00:24:41,780

clear the cow barn and it sailed off to

567

00:24:46,090 --> 00:24:42,830

the northwest

568

00:24:48,820 --> 00:24:46,100

fading from my view as I returned with

569

00:24:51,100 --> 00:24:48,830

the corn uncle James and uncle Abel were

570

00:24:53,530 --> 00:24:51,110

emerging from the barn one of them said

571

00:24:55,660 --> 00:24:53,540

what was that and then the other said

572

00:24:58,540 --> 00:24:55,670

we'll read about it in the newspaper

573

00:25:01,000 --> 00:24:58,550

when we returned home when we got home

574

00:25:03,520 --> 00:25:01,010

grandpa Peters who always read the

575

00:25:05,830 --> 00:25:03,530

newspaper thoroughly said nothing in the

576

00:25:09,000 --> 00:25:05,840

paper reported any such occurrence so

577

00:25:11,410 --> 00:25:09,010

that was the end of our event end quotes

578

00:25:13,390 --> 00:25:11,420

George said the ranch house has long

579

00:25:15,040 --> 00:25:13,400

since been demolished he said that the

580

00:25:17,980 --> 00:25:15,050

last time he spoke to his uncle Abel

581

00:25:20,410 --> 00:25:17,990

uncle Abel remembered nothing of this

582

00:25:22,600 --> 00:25:20,420

incident quote he was milking the cows

583

00:25:25,299 --> 00:25:22,610

so he didn't have much exposure end

584

00:25:26,710 --> 00:25:25,309

quotes George explained George went on

585

00:25:29,020 --> 00:25:26,720

to explain that when he asked his uncle

586

00:25:31,740 --> 00:25:29,030

James about the incident the response

587

00:25:33,880 --> 00:25:31,750

was something happened

588

00:25:37,419 --> 00:25:33,890

George's recollection of the event was

589

00:25:39,250 --> 00:25:37,429

simply I was not frightened he described

590

00:25:40,960 --> 00:25:39,260

the bright object as looking like it was

591

00:25:45,400 --> 00:25:40,970

made of something similar to modern-day

592

00:25:47,380 --> 00:25:45,410

tinted glass from 2001 through 2015 the

593

00:25:50,230 --> 00:25:47,390

great state of Illinois has logged four

594

00:25:52,810 --> 00:25:50,240

thousand one hundred and ninety-one UFO

595

00:25:55,750 --> 00:25:52,820

sighting reports mind you those are just

596

00:25:59,080 --> 00:25:55,760

the ones that get reported Henry County

597

00:26:01,870 --> 00:25:59,090

Illinois logged 12 reports with 25% of

598

00:26:05,710 --> 00:26:01,880

those sightings attributed to yep that

599

00:26:08,890 --> 00:26:05,720

town of Atkinson loved the antiquity of

600

00:26:11,440 --> 00:26:08,900

these reports the way before the general

601
00:26:15,340 --> 00:26:11,450
population was contaminated shall we say

602
00:26:18,160 --> 00:26:15,350
with a pop-culture concept of UFOs but

603
00:26:21,100 --> 00:26:18,170
the clock ticks time marches on we've

604
00:26:23,230 --> 00:26:21,110
got a March to because that's a wrap

605
00:26:25,240 --> 00:26:23,240
thank you for listening to inception

606
00:26:27,830 --> 00:26:25,250
radio network follow today's broadcast

607
00:26:30,660 --> 00:26:27,840
at UFO headline news

608
00:26:31,350 --> 00:26:30,670
lovingkindness we're all in this

609
00:26:33,460 --> 00:26:31,360
together
