

UFO Headline News | Weekend of Saturday September 23rd/Sunday September 24th, 2017

Listen on

inceptionradionetwork.com

1
00:00:05,300 --> 00:00:02,480
hello it's the weekend of Saturday

2
00:00:08,509 --> 00:00:05,310
September 23rd and Sunday September 24th

3
00:00:10,640 --> 00:00:08,519
2017 you are listening to inception

4
00:00:12,910 --> 00:00:10,650
Radio Network voice of the fringe

5
00:00:14,289 --> 00:00:12,920
majority this is Carol Caro with

6
00:00:17,480 --> 00:00:14,299
off-the-beaten-path

7
00:00:19,340 --> 00:00:17,490
the activity in the celestial regions

8
00:00:20,060 --> 00:00:19,350
doesn't stop for the weekend so why

9
00:00:22,580 --> 00:00:20,070
should we

10
00:00:24,529 --> 00:00:22,590
here comes earth sky org and their

11
00:00:26,870 --> 00:00:24,539
forecast for what you can see tonight

12
00:00:28,839 --> 00:00:26,880
and tomorrow night as well you can use

13
00:00:31,880 --> 00:00:28,849

the Big Dipper to find the North Star

14

00:00:34,190 --> 00:00:31,890

there's a chart it shows Polaris and the

15

00:00:36,500 --> 00:00:34,200

Big and Little Dippers for the month of

16

00:00:38,840 --> 00:00:36,510

September you can use that Big Dipper to

17

00:00:41,510 --> 00:00:38,850

find Polaris which is also of course

18

00:00:43,190 --> 00:00:41,520

known as the North Star there's a chart

19

00:00:46,130 --> 00:00:43,200

that will help you do that later but for

20

00:00:48,799 --> 00:00:46,140

right now imagine a line from the two

21

00:00:51,979 --> 00:00:48,809

outermost stars in the bowl of the Big

22

00:00:53,930 --> 00:00:51,989

Dipper that points to Polaris and notice

23

00:00:56,779 --> 00:00:53,940

that Polaris marks the tip of the handle

24

00:00:59,540 --> 00:00:56,789

of the Little Dipper that's handy

25

00:01:02,720 --> 00:00:59,550

the northern sky is like a large clock

26
00:01:05,240 --> 00:01:02,730
with Polaris at its center the hour hand

27
00:01:07,570 --> 00:01:05,250
is a line drawn through Dubey and maroc

28
00:01:10,130 --> 00:01:07,580
the two pointer stars of the Big Dipper

29
00:01:12,890 --> 00:01:10,140
because the stars make a full circle in

30
00:01:16,640 --> 00:01:12,900
23 hours and 56 minutes instead of

31
00:01:18,320 --> 00:01:16,650
exactly 24 hours this star clock is not

32
00:01:20,539 --> 00:01:18,330
exactly the same as the one on the wall

33
00:01:22,940 --> 00:01:20,549
but with a little practice you can learn

34
00:01:26,780 --> 00:01:22,950
to read it well that Big Dipper swings

35
00:01:31,399 --> 00:01:26,790
full circle 360 degrees around Polaris

36
00:01:33,319 --> 00:01:31,409
in 23 hours and 56 minutes in 24 hours

37
00:01:36,609 --> 00:01:33,329
the Big Dipper actually swings more than

38
00:01:39,649 --> 00:01:36,619

full circle about 361 degrees

39

00:01:42,200 --> 00:01:39,659

technically does that make a difference

40

00:01:44,749 --> 00:01:42,210

well according to earth sky and Bruce

41

00:01:46,969 --> 00:01:44,759

McClure who writes this yes it means

42

00:01:49,069 --> 00:01:46,979

that if you look at the same time each

43

00:01:51,679 --> 00:01:49,079

evening the Big Dipper will appear just

44

00:01:54,499 --> 00:01:51,689

a little bit lower in your north western

45

00:01:57,080 --> 00:01:54,509

evening sky so weather permitting get

46

00:01:59,660 --> 00:01:57,090

out there and give it a look and may we

47

00:02:01,999 --> 00:01:59,670

have a drumroll please make way for the

48

00:02:04,609 --> 00:02:02,009

Queen quick everybody find your long

49

00:02:05,179 --> 00:02:04,619

stored tiaras dust them off because here

50

00:02:08,089 --> 00:02:05,189

she comes

51
00:02:11,029 --> 00:02:08,099
Cassiopeia the Queen she could be found

52
00:02:13,130 --> 00:02:11,039
in the north east sky after sunset the

53
00:02:16,340 --> 00:02:13,140
shape of this constellation is distinct

54
00:02:18,140 --> 00:02:16,350
it will be a W or an M depending on the

55
00:02:20,270 --> 00:02:18,150
time of night you see it and from what

56
00:02:22,850 --> 00:02:20,280
we understand also your location on

57
00:02:24,500 --> 00:02:22,860
planet Earth while viewing the shape of

58
00:02:27,320 --> 00:02:24,510
this constellation makes Cassiopeia

59
00:02:30,100 --> 00:02:27,330
stars very noticeable look for the Queen

60
00:02:32,570 --> 00:02:30,110
starting at nightfall or early evening

61
00:02:35,870 --> 00:02:32,580
Cassiopeia represents an ancient queen

62
00:02:37,820 --> 00:02:35,880
of Ethiopia the entire constellation is

63
00:02:41,120 --> 00:02:37,830

sometimes also called Cassiopeia is

64

00:02:43,670 --> 00:02:41,130

chair and some old star maps depict the

65

00:02:45,500 --> 00:02:43,680

Queens sitting on the chair marked by

66

00:02:48,740 --> 00:02:45,510

the five brightest stars of this

67

00:02:53,120 --> 00:02:48,750

constellation here are those stars shed

68

00:02:57,290 --> 00:02:53,130

are that spelled sche dar caps that

69

00:03:00,410 --> 00:02:57,300

spelled CA p h Gama Cassiopeia rook ba

70

00:03:02,570 --> 00:03:00,420

and seg in if you've got a dark sky you

71

00:03:05,330 --> 00:03:02,580

can look below Cassiopeia

72

00:03:07,280 --> 00:03:05,340

underneath her chair in the northwest on

73

00:03:10,070 --> 00:03:07,290

those autumn evenings for a famous

74

00:03:13,009 --> 00:03:10,080

binocular object this object is called

75

00:03:15,440 --> 00:03:13,019

the double cluster in Perseus these are

76

00:03:17,780 --> 00:03:15,450

open star clusters each of which

77

00:03:20,030 --> 00:03:17,790

consists of young stars still moving

78

00:03:21,830 --> 00:03:20,040

together from that primordial cloud of

79

00:03:24,740 --> 00:03:21,840

gas and dust that gave birth to the

80

00:03:27,740 --> 00:03:24,750

cluster stars these clusters are

81

00:03:31,460 --> 00:03:27,750

familiarly known to stargazers as H and

82

00:03:32,569 --> 00:03:31,470

the Perseus stargazers smile when they

83

00:03:35,539 --> 00:03:32,579

peer at them through their binoculars

84

00:03:37,729 --> 00:03:35,549

not only because they are beautiful but

85

00:03:39,770 --> 00:03:37,739

also because of their names they're

86

00:03:42,710 --> 00:03:39,780

named from two different alphabets the

87

00:03:44,990 --> 00:03:42,720

Greek and the Roman stars have Greek

88

00:03:50,390 --> 00:03:45,000

letter names but most star clusters

89

00:03:53,270 --> 00:03:50,400

don't enter Johan Baier 1572 to 1625 he

90

00:03:56,120 --> 00:03:53,280

gave Chai Persei the cluster on top it's

91

00:03:58,759 --> 00:03:56,130

Greek letter name and then it said he

92

00:04:01,340 --> 00:03:58,769

ran out of Greek letters that's when he

93

00:04:04,039 --> 00:04:01,350

used a Roman letter the letter H to name

94

00:04:06,350 --> 00:04:04,049

the other cluster after midnight you can

95

00:04:09,229 --> 00:04:06,360

watch Cassiopeia swing above Polaris the

96

00:04:11,660 --> 00:04:09,239

North Star before dawn you can find her

97

00:04:14,569 --> 00:04:11,670

in the northwest but during the evening

98

00:04:16,819 --> 00:04:14,579

hours Queen Cassiopeia lights up the

99

00:04:19,430 --> 00:04:16,829

north east sky so here's the bottom line

100

00:04:23,450 --> 00:04:19,440

the constellation Cassiopeia the Queen

101
00:04:26,140 --> 00:04:23,460
has the distinct shape of a W or M find

102
00:04:28,719 --> 00:04:26,150
her in the north-northeast sky on

103
00:04:31,270 --> 00:04:28,729
temper and October evenings yes as the

104
00:04:34,570 --> 00:04:31,280
old nursery rhyme says even a cat can

105
00:04:37,270 --> 00:04:34,580
look at a queen let's go way back in

106
00:04:41,550 --> 00:04:37,280
history to the historical events of the

107
00:04:45,310 --> 00:04:41,560
day this date in history September 23rd

108
00:04:51,440 --> 00:04:45,320
1962 you possibly were there but in case

109
00:05:39,430 --> 00:04:57,110
[Music]

110
00:05:46,330 --> 00:05:43,200
[Applause]

111
00:05:48,940 --> 00:05:46,340
The Jetsons that American animated

112
00:05:51,250 --> 00:05:48,950
sitcom produced by hanna-barbera it

113
00:05:55,330 --> 00:05:51,260

originally aired in primetime from

114

00:05:58,930 --> 00:05:55,340

September 23rd 1962 to March 17 1963

115

00:05:59,620 --> 00:05:58,940

just a year oh it seems like so much

116

00:06:01,780 --> 00:05:59,630

more than that

117

00:06:05,920 --> 00:06:01,790

later it went into syndication with new

118

00:06:07,390 --> 00:06:05,930

episodes from 1985 to 1987 as something

119

00:06:10,300 --> 00:06:07,400

called the fantastic world of

120

00:06:11,860 --> 00:06:10,310

hanna-barbera the Flintstones lived with

121

00:06:14,770 --> 00:06:11,870

machines powered by birds and dinosaurs

122

00:06:17,680 --> 00:06:14,780

the Jetsons live in a world with

123

00:06:20,860 --> 00:06:17,690

elaborate robotic contraptions aliens

124

00:06:22,870 --> 00:06:20,870

Holograms and whimsical inventions

125

00:06:26,200 --> 00:06:22,880

following that primetime run the show

126
00:06:28,240 --> 00:06:26,210
aired Saturday mornings for decades so

127
00:06:30,550 --> 00:06:28,250
here we are it's a weekend and we're

128
00:06:33,130 --> 00:06:30,560
reviewing the Jetsons oh by the way we

129
00:06:35,620 --> 00:06:33,140
stumbled upon lots of episodes on ye

130
00:06:39,010 --> 00:06:35,630
olde youtube have some fun this weekend

131
00:06:41,080 --> 00:06:39,020
go way back with the Jetsons well so far

132
00:06:44,020 --> 00:06:41,090
everything seems to be fit and feisty as

133
00:06:46,270 --> 00:06:44,030
they say the end may be nigh but it's

134
00:06:48,130 --> 00:06:46,280
not gonna happen today in fact the man

135
00:06:51,940 --> 00:06:48,140
who predicted the end of the world David

136
00:06:53,620 --> 00:06:51,950
Mead spelled mea de has backed away from

137
00:06:56,230 --> 00:06:53,630
that claim he says it won't end

138
00:06:58,450 --> 00:06:56,240

September 23rd after all but instead

139

00:07:00,880 --> 00:06:58,460

Saturday will only mark the beginning of

140

00:07:03,790 --> 00:07:00,890

a series of catastrophic events to occur

141

00:07:06,610 --> 00:07:03,800

over several weeks well how many times

142

00:07:09,760 --> 00:07:06,620

has that happened on planet earth just

143

00:07:12,130 --> 00:07:09,770

saying there's bad stuff yep part of

144

00:07:14,950 --> 00:07:12,140

that is the evacuations beginning along

145

00:07:19,630 --> 00:07:14,960

the pocket echo River that spelled gu a

146

00:07:21,250 --> 00:07:19,640

J a tac a in Puerto Rico all the people

147

00:07:23,110 --> 00:07:21,260

living near that River in Northwest

148

00:07:25,870 --> 00:07:23,120

Porto Rico should evacuate immediately

149

00:07:28,150 --> 00:07:25,880

this is as of yesterday because of a

150

00:07:30,340 --> 00:07:28,160

quote imminent dam break and quotes

151
00:07:32,050 --> 00:07:30,350
you've probably heard about already the

152
00:07:35,380 --> 00:07:32,060
National Weather Service in San Juan

153
00:07:37,840 --> 00:07:35,390
issued this quote all areas surrounding

154
00:07:41,020 --> 00:07:37,850
the Guate River should evacuate now

155
00:07:44,770 --> 00:07:41,030
their lives are in danger please share

156
00:07:46,780 --> 00:07:44,780
that was via tweet about 70,000 people

157
00:07:48,760 --> 00:07:46,790
in the area of this dam had been told to

158
00:07:51,100 --> 00:07:48,770
evacuate according to National Guard

159
00:07:54,550 --> 00:07:51,110
spokeswoman yennifer Alvarez that's what

160
00:07:56,710 --> 00:07:54,560
she told CNN's layla santiago buses have

161
00:07:58,600 --> 00:07:56,720
been brought in to help people leave

162
00:08:00,730 --> 00:07:58,610
speaking out on cnn's out front with

163
00:08:03,010 --> 00:08:00,740

Erin Burnett Puerto Rican Secretary of

164

00:08:05,140 --> 00:08:03,020

State Lewis had a daughter Iveta Maureen

165

00:08:07,360 --> 00:08:05,150

said the evacuations are difficult

166

00:08:09,460 --> 00:08:07,370

because the island was heavily damaged

167

00:08:11,740 --> 00:08:09,470

by Hurricane Maria which struck earlier

168

00:08:13,840 --> 00:08:11,750

this week many parts of Puerto Rico are

169

00:08:16,570 --> 00:08:13,850

flooded and more than 3 million people

170

00:08:18,700 --> 00:08:16,580

don't have electricity Marin also said

171

00:08:21,130 --> 00:08:18,710

quote it is done in the blackness of the

172

00:08:23,140 --> 00:08:21,140

night this evacuation there's lack of

173

00:08:25,060 --> 00:08:23,150

energy especially in the mountain

174

00:08:27,370 --> 00:08:25,070

regions where winds were higher speeds

175

00:08:28,960 --> 00:08:27,380

the National Weather Service issued a

176

00:08:31,420 --> 00:08:28,970

flash flood notice for the towns of

177

00:08:34,409 --> 00:08:31,430

Isabela and capered ideas which are

178

00:08:38,800 --> 00:08:34,419

about six miles apart Isabela has about

179

00:08:40,570 --> 00:08:38,810

45,000 people k but I the s 25000 this

180

00:08:42,790 --> 00:08:40,580

dam was constructed by the Puerto Rico

181

00:08:44,860 --> 00:08:42,800

Electric Power Authority to create a

182

00:08:46,900 --> 00:08:44,870

lake that Lake provides drinking water

183

00:08:48,070 --> 00:08:46,910

to residents of the area and that's

184

00:08:51,370 --> 00:08:48,080

according to the United States

185

00:08:53,200 --> 00:08:51,380

geological study survey we send our

186

00:08:56,700 --> 00:08:53,210

hearts our prayers and our thoughts of

187

00:08:59,290 --> 00:08:56,710

healing and good energy maybe even power

188

00:09:01,600 --> 00:08:59,300

electricity energy to all those folks

189

00:09:04,270 --> 00:09:01,610

and here's a sighting from that region

190

00:09:06,040 --> 00:09:04,280

of the world a UFO sighting yes it's not

191

00:09:09,880 --> 00:09:06,050

the most current in fact it took place

192

00:09:13,690 --> 00:09:09,890

in 1994 January 7th it was reported in

193

00:09:18,610 --> 00:09:13,700

2012 on September 11th the summary says

194

00:09:22,270 --> 00:09:18,620

not an object but an entity dark black 4

195

00:09:25,090 --> 00:09:22,280

to 5 feet tall with wings citing

196

00:09:28,090 --> 00:09:25,100

specifics include a very close initial

197

00:09:30,490 --> 00:09:28,100

viewing distance 20 feet or less and the

198

00:09:33,970 --> 00:09:30,500

altitude of this thing is described as

199

00:09:36,760 --> 00:09:33,980

landed the object features none object

200

00:09:40,990 --> 00:09:36,770

flight path other object shape also

201
00:09:43,180 --> 00:09:41,000
other here's the event we were writing

202
00:09:45,670 --> 00:09:43,190
for tracks at night in a secluded

203
00:09:47,890 --> 00:09:45,680
mountainous and unpopulated coffee

204
00:09:50,470 --> 00:09:47,900
plantation it hadn't been worked in over

205
00:09:53,170 --> 00:09:50,480
50 years we were riding a trail a

206
00:09:55,000 --> 00:09:53,180
thousand feet from sea level one of the

207
00:09:58,180 --> 00:09:55,010
four tracks would heat up and shut off

208
00:09:59,770 --> 00:09:58,190
starting again after it cooled off so we

209
00:10:03,670 --> 00:09:59,780
were stopped at a stretch in the trail

210
00:10:07,000 --> 00:10:03,680
for local 4x4 jeeps no vehicles could

211
00:10:09,280 --> 00:10:07,010
traverse to one side as the mountain the

212
00:10:10,570 --> 00:10:09,290
road is wide enough to fit only a Jeep

213
00:10:13,509 --> 00:10:10,580

plus some spares

214

00:10:16,329 --> 00:10:13,519

maybe six to seven feet wide and the

215

00:10:19,000 --> 00:10:16,339

other side is a hedge with a 400 foot

216

00:10:21,699 --> 00:10:19,010

drop to a river tall trees lots of

217

00:10:24,220 --> 00:10:21,709

vegetation the two four tracks are in

218

00:10:27,069 --> 00:10:24,230

line one behind the other three people

219

00:10:29,740 --> 00:10:27,079

on the right side me on the left all of

220

00:10:33,100 --> 00:10:29,750

a sudden I start hearing a very subtle

221

00:10:36,130 --> 00:10:33,110

sound of leaves barely moving as in

222

00:10:38,350 --> 00:10:36,140

extremely soft and subtle so I think

223

00:10:41,980 --> 00:10:38,360

maybe a snake might be moving by the

224

00:10:45,220 --> 00:10:41,990

ledge or a rat mice maybe and all the

225

00:10:47,740 --> 00:10:45,230

hairs on my neck creep up and I moved to

226

00:10:50,530 --> 00:10:47,750

the other side of the four tracks again

227

00:10:52,720 --> 00:10:50,540

I hear the leaves and I tell my other

228

00:10:55,329 --> 00:10:52,730

three companions hey do you listen to

229

00:10:57,220 --> 00:10:55,339

the leaves everyone looked down to the

230

00:10:59,230 --> 00:10:57,230

edge of the hedge and whatever was

231

00:11:01,900 --> 00:10:59,240

standing there suddenly got agitated

232

00:11:04,569 --> 00:11:01,910

like trying to move faster but silently

233

00:11:06,460 --> 00:11:04,579

it was making a little more sound the

234

00:11:07,569 --> 00:11:06,470

leaves were ruffling but this was still

235

00:11:10,240 --> 00:11:07,579

very subtle

236

00:11:13,389 --> 00:11:10,250

so everybody leaned over trying to see

237

00:11:15,819 --> 00:11:13,399

what this was the entity suddenly moved

238

00:11:18,610 --> 00:11:15,829

extremely rapidly about five feet

239

00:11:20,860 --> 00:11:18,620

parallel to the hedge and we froze the

240

00:11:23,590 --> 00:11:20,870

speed at which this editing moved was

241

00:11:25,810 --> 00:11:23,600

perplexing the only thing perceived was

242

00:11:29,440 --> 00:11:25,820

the sound of the leaves being ruffled as

243

00:11:32,980 --> 00:11:29,450

it moved when it stopped a single strong

244

00:11:34,900 --> 00:11:32,990

and considerable flap was heard that

245

00:11:37,690 --> 00:11:34,910

flap pushed the leaves quite forcibly

246

00:11:41,079 --> 00:11:37,700

not like a leaf blower but more like

247

00:11:44,740 --> 00:11:41,089

geese there was one loud forceful flap

248

00:11:47,650 --> 00:11:44,750

and a shadow was seen to fly upwards the

249

00:11:49,900 --> 00:11:47,660

branch of a tree about 30 feet up that's

250

00:11:53,110 --> 00:11:49,910

where it landed and that branch bent

251

00:11:56,230 --> 00:11:53,120

down and up again this was a thick

252

00:11:58,120 --> 00:11:56,240

branch and it bent down by two feet it

253

00:12:00,880 --> 00:11:58,130

looked like something heavy landed and

254

00:12:02,980 --> 00:12:00,890

bent that branch down and then the

255

00:12:05,740 --> 00:12:02,990

branch lifted back up again with the

256

00:12:08,110 --> 00:12:05,750

heft at that time everyone automatically

257

00:12:10,720 --> 00:12:08,120

jumped on the four tracks started and

258

00:12:13,389 --> 00:12:10,730

hailed up that trail until we arrived at

259

00:12:16,420 --> 00:12:13,399

the Hacienda we never have talked about

260

00:12:18,250 --> 00:12:16,430

it among us the look on our faces was

261

00:12:21,069 --> 00:12:18,260

enough to agree not to speak about it

262

00:12:21,460 --> 00:12:21,079

out of fear of being ridiculed in the

263

00:12:24,249 --> 00:12:21,470

group

264

00:12:26,349 --> 00:12:24,259

well we consisted of two couples all in

265

00:12:29,919 --> 00:12:26,359

these three Mechanical Engineers and one

266

00:12:32,710 --> 00:12:29,929

lawyer I can say I never got a look at

267

00:12:34,539 --> 00:12:32,720

the thing only that shadow streak that

268

00:12:37,299 --> 00:12:34,549

went up from the ground and obviously

269

00:12:41,259 --> 00:12:37,309

landed on the tree branch by the way I'm

270

00:12:43,150 --> 00:12:41,269

also a hunter and a fly fisherman whoa

271

00:12:45,249 --> 00:12:43,160

in other words this individual has

272

00:12:48,789 --> 00:12:45,259

enough experience with the out-of-doors

273

00:12:51,549 --> 00:12:48,799

to know that this wasn't something usual

274

00:12:54,129 --> 00:12:51,559

and this segues right into that

275

00:12:55,689 --> 00:12:54,139

something unusual that seems to be

276

00:12:58,719 --> 00:12:55,699

popping up around the vicinity of

277

00:13:01,599 --> 00:12:58,729

Chicago Illinois in the United States we

278

00:13:03,669 --> 00:13:01,609

meander over to phantoms and monsters

279

00:13:04,599 --> 00:13:03,679

our new fav sight pulse of the

280

00:13:06,460 --> 00:13:04,609

paranormal

281

00:13:08,349 --> 00:13:06,470

it's long strickler sight and it is

282

00:13:10,449 --> 00:13:08,359

jam-packed if you're looking for

283

00:13:13,090 --> 00:13:10,459

something to do this weekend head over

284

00:13:16,029 --> 00:13:13,100

to phantoms and monsters dot-com have a

285

00:13:18,009 --> 00:13:16,039

great time today we're sharing his quote

286

00:13:21,609 --> 00:13:18,019

interesting development related to the

287

00:13:25,359 --> 00:13:21,619

Chicago phantom end quotes also known as

288

00:13:27,969 --> 00:13:25,369

the Chicago owl man etc so in the words

289

00:13:29,229 --> 00:13:27,979

of lawn strickler quote I received a

290

00:13:33,279 --> 00:13:29,239

telephone call today

291

00:13:35,199 --> 00:13:33,289

Monday September 11th 2017 at 11:30 9

292

00:13:38,349 --> 00:13:35,209

a.m. Eastern Time

293

00:13:40,960 --> 00:13:38,359

from a witness I will call p.m. she

294

00:13:45,039 --> 00:13:40,970

states she observed a quote huge winged

295

00:13:48,039 --> 00:13:45,049

object at 10:25 a.m. Central time 15

296

00:13:49,720 --> 00:13:48,049

minutes prior to her calling me this was

297

00:13:51,789 --> 00:13:49,730

the second time she's seen this winged

298

00:13:54,340 --> 00:13:51,799

object the last time she saw it was the

299

00:13:56,829 --> 00:13:54,350

month of May this witness lives on the

300

00:13:59,319 --> 00:13:56,839

25th floor of a high-rise building at

301
00:14:01,989 --> 00:13:59,329
East 47th Street and South Lake Park

302
00:14:04,749 --> 00:14:01,999
Avenue the kenwood community the south

303
00:14:08,679 --> 00:14:04,759
side of Chicago the witness told me that

304
00:14:11,019 --> 00:14:08,689
she saw a huge back like being circling

305
00:14:13,210 --> 00:14:11,029
above and along the tall buildings

306
00:14:15,579 --> 00:14:13,220
located on South Lake Park Avenue and

307
00:14:17,799 --> 00:14:15,589
then out toward the lake and that would

308
00:14:19,629 --> 00:14:17,809
be Lake Michigan she states that she

309
00:14:22,149 --> 00:14:19,639
frequently observes airplanes from her

310
00:14:25,719 --> 00:14:22,159
home but this object was definitely not

311
00:14:27,879 --> 00:14:25,729
a fixed-wing aircraft as well she has

312
00:14:31,090 --> 00:14:27,889
never seen a bird as large as this being

313
00:14:33,819 --> 00:14:31,100

she described it as having a 6 to 7 foot

314

00:14:36,449 --> 00:14:33,829

human-like body a body that was dark

315

00:14:37,660 --> 00:14:36,459

brown in color with wide black

316

00:14:40,540 --> 00:14:37,670

triangular

317

00:14:42,880 --> 00:14:40,550

shaped wings wings that closely resemble

318

00:14:43,690 --> 00:14:42,890

those of a bat and spanned at least 12

319

00:14:45,520 --> 00:14:43,700

feet

320

00:14:47,920 --> 00:14:45,530

she mentioned that the wings moved

321

00:14:50,080 --> 00:14:47,930

occasionally when it gained altitude the

322

00:14:53,710 --> 00:14:50,090

winged being eventually headed north

323

00:14:55,810 --> 00:14:53,720

toward downtown I asked if she attempted

324

00:14:58,480 --> 00:14:55,820

to take a photograph her response was

325

00:15:01,420 --> 00:14:58,490

that when she was watching the flying

326

00:15:04,090 --> 00:15:01,430

humanoid she had an overwhelming

327

00:15:06,700 --> 00:15:04,100

creepiness come over her she wasn't

328

00:15:08,800 --> 00:15:06,710

paralyzed or unable to move but she was

329

00:15:11,320 --> 00:15:08,810

shocked and transfixed by what she was

330

00:15:14,080 --> 00:15:11,330

observing and never even had a notion of

331

00:15:15,970 --> 00:15:14,090

taking a photograph when I talked to the

332

00:15:17,980 --> 00:15:15,980

witness it was obvious she was shaken by

333

00:15:20,620 --> 00:15:17,990

the incident I could hear nervousness

334

00:15:23,380 --> 00:15:20,630

exhibited by her voice although she was

335

00:15:25,360 --> 00:15:23,390

very well-spoken and forthright she

336

00:15:27,280 --> 00:15:25,370

stated that when she looked below from

337

00:15:28,840 --> 00:15:27,290

her apartment she noticed people on the

338

00:15:31,540 --> 00:15:28,850

street looking toward the being and

339

00:15:34,000 --> 00:15:31,550

pointing it out to other people other

340

00:15:36,100 --> 00:15:34,010

residents in her building also have seen

341

00:15:37,990 --> 00:15:36,110

this flying being in the past having

342

00:15:41,080 --> 00:15:38,000

commented to each other and to this

343

00:15:42,790 --> 00:15:41,090

witness on this being the witness will

344

00:15:44,860 --> 00:15:42,800

be letting others know that lon

345

00:15:46,960 --> 00:15:44,870

Strickler wants to contact them though

346

00:15:49,660 --> 00:15:46,970

forward photographs and here's LAN

347

00:15:52,120 --> 00:15:49,670

strickler's and note the witness then

348

00:15:54,370 --> 00:15:52,130

commented on some other odd occurrences

349

00:15:55,900 --> 00:15:54,380

she witnessed on the lake she stated she

350

00:15:57,460 --> 00:15:55,910

and her husband frequently jogged the

351

00:15:59,560 --> 00:15:57,470

trails along Lake Michigan front

352

00:16:01,840 --> 00:15:59,570

together and on at least two occasions

353

00:16:05,320 --> 00:16:01,850

they have both observed an unknown

354

00:16:07,840 --> 00:16:05,330

creature or being emerged from the water

355

00:16:10,390 --> 00:16:07,850

once near the lake shore along the rocks

356

00:16:12,880 --> 00:16:10,400

and at another time a bit further out

357

00:16:16,180 --> 00:16:12,890

from the shore she describes this

358

00:16:17,980 --> 00:16:16,190

creature as reptile-like but was not

359

00:16:20,830 --> 00:16:17,990

able to give much detail since most of

360

00:16:22,240 --> 00:16:20,840

the body stayed submerged LAN Strickler

361

00:16:24,670 --> 00:16:22,250

asked if it was possible that it might

362

00:16:27,910 --> 00:16:24,680

have been the same winged being emerging

363

00:16:31,720 --> 00:16:27,920

from the water her response she wasn't

364

00:16:35,280 --> 00:16:31,730

sure so lon Strickler is chasing down

365

00:16:38,500 --> 00:16:35,290

yet another critter a critter near water

366

00:16:40,750 --> 00:16:38,510

interesting so that's just Wade over to

367

00:16:43,870 --> 00:16:40,760

this article by Cheryl Kosta shall we

368

00:16:46,860 --> 00:16:43,880

from her New York Skies blog headline

369

00:16:49,090 --> 00:16:46,870

the big beautiful saucer over the water

370

00:16:50,580 --> 00:16:49,100

this account comes from the town of

371

00:16:55,500 --> 00:16:50,590

steel Akuma

372

00:16:57,930 --> 00:16:55,510

that spelled ste ILAC oom it's in Pierce

373

00:16:59,610 --> 00:16:57,940

County in the state of Washington it's

374

00:17:02,940 --> 00:16:59,620

the story of a couple of little girls

375

00:17:03,890 --> 00:17:02,950

their dad and a large flying saucer over

376

00:17:05,880 --> 00:17:03,900

the water

377

00:17:08,580 --> 00:17:05,890

Andrea and baths are now in their

378

00:17:11,670 --> 00:17:08,590

mid-70s their story happened when andrea

379

00:17:12,840 --> 00:17:11,680

was 9 and Beth was 8 it's on the coast

380

00:17:15,660 --> 00:17:12,850

of Puget Sound

381

00:17:18,120 --> 00:17:15,670

Stella Combe Washington and back in 1949

382

00:17:21,030 --> 00:17:18,130

it was a quaint place with a population

383

00:17:24,450 --> 00:17:21,040

of about 1200 these days it's grown to

384

00:17:26,910 --> 00:17:24,460

about 6,200 Andrea said it was late

385

00:17:28,410 --> 00:17:26,920

August just before school started the

386

00:17:31,170 --> 00:17:28,420

girls and their dad were down by the

387

00:17:33,540 --> 00:17:31,180

water at dusk admiring the sunset quote

388

00:17:36,660 --> 00:17:33,550

it was just about dark when this

389

00:17:39,540 --> 00:17:36,670

beautiful saucer-shaped object appeared

390

00:17:42,360 --> 00:17:39,550

out over the water which seemed close to

391

00:17:44,700 --> 00:17:42,370

us it made a humming sound said Andrea

392

00:17:48,000 --> 00:17:44,710

and it had beautiful lights all around

393

00:17:49,740 --> 00:17:48,010

it and quotes she further explained that

394

00:17:53,010 --> 00:17:49,750

the saucer hovered over the water for

395

00:17:55,260 --> 00:17:53,020

perhaps 10 minutes maybe longer quote my

396

00:17:57,660 --> 00:17:55,270

father was alarmed he grabbed my sister

397

00:17:58,680 --> 00:17:57,670

he grabbed me we got back into our car

398

00:18:02,250 --> 00:17:58,690

and drove away

399

00:18:04,800 --> 00:18:02,260

on this deserted road the saucer seemed

400

00:18:06,330 --> 00:18:04,810

to follow us for some time and that was

401
00:18:09,060 --> 00:18:06,340
something which upset my father and

402
00:18:12,510 --> 00:18:09,070
quotes Andrea said that neither she or

403
00:18:14,670 --> 00:18:12,520
her sister were afraid quote its beauty

404
00:18:17,880 --> 00:18:14,680
with the lights hovering over us made us

405
00:18:20,610 --> 00:18:17,890
feel warm inside and safe and quotes she

406
00:18:22,920 --> 00:18:20,620
said the two women said they both

407
00:18:24,810 --> 00:18:22,930
experienced a feeling of wonderment and

408
00:18:27,210 --> 00:18:24,820
joy for having been witnesses to

409
00:18:29,550 --> 00:18:27,220
something so majestic and so beautiful

410
00:18:32,040 --> 00:18:29,560
when they were children and by the way

411
00:18:35,940 --> 00:18:32,050
Washington State is number four in the

412
00:18:38,400 --> 00:18:35,950
nation for UFO sightings with 5213

413
00:18:42,420 --> 00:18:38,410

sightings reported and that's key

414

00:18:45,890 --> 00:18:42,430

reported sightings between 2001 and 2015

415

00:18:49,830 --> 00:18:45,900

Pierce County on Puget Sound reported

416

00:18:51,390 --> 00:18:49,840

473 UFO sightings that's 9 percent of

417

00:18:53,790 --> 00:18:51,400

the state sightings during that same

418

00:18:55,980 --> 00:18:53,800

period and that little town of Stella

419

00:18:59,040 --> 00:18:55,990

comb logged three of those sightings

420

00:19:03,120 --> 00:18:59,050

during that time from childhood in

421

00:19:05,909 --> 00:19:03,130

Washington in 1949 to the neon dirt

422

00:19:09,150 --> 00:19:05,919

or neanderthal if you should prefer

423

00:19:12,510 --> 00:19:09,160

here's a headline new study suggests

424

00:19:14,159 --> 00:19:12,520

Neanderthals enjoyed long childhoods

425

00:19:18,510 --> 00:19:14,169

we couldn't find a byline for this

426

00:19:22,020 --> 00:19:18,520

article but it's from npr.org nasty

427

00:19:24,240 --> 00:19:22,030

brutish and short until about the last

428

00:19:26,130 --> 00:19:24,250

decade or so that's how many of us were

429

00:19:29,010 --> 00:19:26,140

accustomed to thinking about Neanderthal

430

00:19:30,900 --> 00:19:29,020

life but a lot has changed since then

431

00:19:33,840 --> 00:19:30,910

not least of which is the emergence of

432

00:19:37,470 --> 00:19:33,850

smoking-gun DNA evidence that

433

00:19:39,539 --> 00:19:37,480

Neanderthals are in fact family now a

434

00:19:41,909 --> 00:19:39,549

new study runs counter to earlier

435

00:19:44,159 --> 00:19:41,919

thinking by suggesting that Neanderthals

436

00:19:47,220 --> 00:19:44,169

reached maturity at about the same rate

437

00:19:50,039 --> 00:19:47,230

as modern humans said Anne Gibbons who

438

00:19:51,930 --> 00:19:50,049

writes in science quote Neanderthals

439

00:19:54,570 --> 00:19:51,940

have long been seen as the James Dean's

440

00:19:57,899 --> 00:19:54,580

of human evolution they grew up fast

441

00:20:00,450 --> 00:19:57,909

died young and became legends but now a

442

00:20:02,850 --> 00:20:00,460

rare skeleton of a Neanderthal child

443

00:20:05,430 --> 00:20:02,860

suggests that our closest cousins didn't

444

00:20:08,520 --> 00:20:05,440

all lead such vast lives and that our

445

00:20:10,409 --> 00:20:08,530

own long childhoods aren't unique this

446

00:20:13,049 --> 00:20:10,419

fine may reveal how Neanderthals like

447

00:20:16,560 --> 00:20:13,059

humans had enough energy to grow bigger

448

00:20:18,450 --> 00:20:16,570

brains and quotes a leading theory says

449

00:20:21,659 --> 00:20:18,460

that big brains take longer to develop

450

00:20:23,659 --> 00:20:21,669

so in humans childhood lasts longer to

451

00:20:25,830 --> 00:20:23,669

allow our brains time to grow

452

00:20:28,080 --> 00:20:25,840

chimpanzees for instance with much

453

00:20:31,770 --> 00:20:28,090

smaller brains than modern humans mature

454

00:20:34,440 --> 00:20:31,780

much faster in 2010 Christopher Joyce

455

00:20:37,080 --> 00:20:34,450

for NPR reported on this live fast die

456

00:20:38,669 --> 00:20:37,090

young the hypothesis at that time it was

457

00:20:41,159 --> 00:20:38,679

bolstered by studies of Neanderthal

458

00:20:44,789 --> 00:20:41,169

skulls what he wrote at the time was

459

00:20:47,640 --> 00:20:44,799

quote like the slow food movement slow

460

00:20:50,250 --> 00:20:47,650

growth gave complex brains more time to

461

00:20:52,409 --> 00:20:50,260

cook so to speak and then learn all

462

00:20:54,779 --> 00:20:52,419

those things a fancy brain could learn

463

00:20:56,460 --> 00:20:54,789

end quotes that hypothesis was based

464

00:20:59,310 --> 00:20:56,470

largely on the study of Neanderthals

465

00:21:02,039 --> 00:20:59,320

teeth hominid teeth have telltale lines

466

00:21:03,960 --> 00:21:02,049

similar to tree rings these lines show

467

00:21:06,299 --> 00:21:03,970

development from birth until the end of

468

00:21:08,430 --> 00:21:06,309

childhood but that single benchmark

469

00:21:10,860 --> 00:21:08,440

might not have been enough thanks to the

470

00:21:13,380 --> 00:21:10,870

discovery of a 49 thousand year-old

471

00:21:16,890 --> 00:21:13,390

partial Neanderthal child's skeleton

472

00:21:18,480 --> 00:21:16,900

found at el sidrón in Northwest Spain

473

00:21:19,860 --> 00:21:18,490

and the latest research has benefited

474

00:21:22,410 --> 00:21:19,870

from looking at more than just teeth

475

00:21:24,390 --> 00:21:22,420

while the teeth did help put the age at

476
00:21:27,570 --> 00:21:24,400
death for ancient Neanderthal children

477
00:21:29,850 --> 00:21:27,580
at 7.7 years the team of scientists led

478
00:21:33,150 --> 00:21:29,860
by Antonio dosis also measured the

479
00:21:36,330 --> 00:21:33,160
maturation of the skull the spine elbow

480
00:21:38,880 --> 00:21:36,340
hand wrist and knee of what is believed

481
00:21:40,920 --> 00:21:38,890
to have been a boy in six key places

482
00:21:42,660 --> 00:21:40,930
that calcified during development this

483
00:21:45,090 --> 00:21:42,670
Neanderthal boy appeared to have matured

484
00:21:45,840 --> 00:21:45,100
at the same rate as a child his age

485
00:21:48,210 --> 00:21:45,850
today

486
00:21:50,880 --> 00:21:48,220
in other words Neanderthals may have

487
00:21:54,090 --> 00:21:50,890
matured even a little more slowly than

488
00:21:55,980 --> 00:21:54,100

modern humans even so it's just one

489

00:21:58,230 --> 00:21:55,990

skeleton that might not be

490

00:22:00,630 --> 00:21:58,240

representative of an average Neanderthal

491

00:22:02,940 --> 00:22:00,640

child this is what scientists caution

492

00:22:06,060 --> 00:22:02,950

said Tonya Smith of Griffith University

493

00:22:08,310 --> 00:22:06,070

in Nathan Australia quote Neanderthal

494

00:22:10,230 --> 00:22:08,320

first molars typically grow at a faster

495

00:22:13,680 --> 00:22:10,240

rate than modern human molars which

496

00:22:15,870 --> 00:22:13,690

makes this individual unusual also the

497

00:22:18,480 --> 00:22:15,880

brains and bodies of adult Neanderthals

498

00:22:20,540 --> 00:22:18,490

vary in size and this individual might

499

00:22:24,300 --> 00:22:20,550

have grown up to be a relatively small

500

00:22:27,060 --> 00:22:24,310

brained neanderthal yet another striking

501
00:22:30,690 --> 00:22:27,070
example of modern technology showing us

502
00:22:33,150 --> 00:22:30,700
ancient things ancient things like time

503
00:22:35,340 --> 00:22:33,160
which of course is a human construct but

504
00:22:38,580 --> 00:22:35,350
isn't that something we all just run out

505
00:22:40,560 --> 00:22:38,590
of time I know we have for today looking

506
00:22:43,230 --> 00:22:40,570
at the clocks on the wall all the time

507
00:22:46,500 --> 00:22:43,240
zones are indicating it's time to go

508
00:22:48,420 --> 00:22:46,510
because that's a wrap thank you for

509
00:22:50,820 --> 00:22:48,430
listening to inception radio network

510
00:22:54,270 --> 00:22:50,830
follow this broadcast at UFO headline

511
00:22:56,310 --> 00:22:54,280
news calm lovingkindness take care of

512
00:22:58,230 --> 00:22:56,320
each other we're all in this together
