

UFO Headline News | Thursday October 5th, 2017

Listen on

inceptionradionetwork.com

1
00:00:06,869 --> 00:00:04,230
it's thursday october 5th 2017. you are

2
00:00:09,110 --> 00:00:06,879
listening to inception radio network

3
00:00:13,589 --> 00:00:09,120
voice of the fringe majority this is

4
00:00:16,230 --> 00:00:13,599
carol carl with ufo headline news

5
00:00:17,550 --> 00:00:16,240
let's grab our nighttime sky watching

6
00:00:20,470 --> 00:00:17,560
info from

7
00:00:22,310 --> 00:00:20,480
earthsky.org tonight that full moon

8
00:00:25,109 --> 00:00:22,320
you'll see ascending in the east after

9
00:00:28,550 --> 00:00:25,119
sunset is the northern hemisphere's

10
00:00:31,750 --> 00:00:28,560
harvest moon yep as the old song says

11
00:00:34,470 --> 00:00:31,760
shine on shine on harvest moon over the

12
00:00:37,750 --> 00:00:34,480
years we've seen lots of informal uses

13
00:00:39,830 --> 00:00:37,760

of that term harvest moon some people in

14

00:00:42,790 --> 00:00:39,840

the northern hemisphere call the full

15

00:00:45,350 --> 00:00:42,800

moons of september and october all by

16

00:00:47,350 --> 00:00:45,360

that name and that's fine for the next

17

00:00:50,549 --> 00:00:47,360

few months around the autumn equinox

18

00:00:52,709 --> 00:00:50,559

both september and october for us in the

19

00:00:55,510 --> 00:00:52,719

northern hemisphere that time of moon

20

00:00:57,670 --> 00:00:55,520

rise is close to the time of sunset for

21

00:01:00,310 --> 00:00:57,680

several evenings in a row around the

22

00:01:02,709 --> 00:01:00,320

time of full moon it's as if there are a

23

00:01:03,990 --> 00:01:02,719

few full moons in a row during each

24

00:01:06,469 --> 00:01:04,000

autumn month

25

00:01:09,030 --> 00:01:06,479

astronomers are scientists though and

26

00:01:12,390 --> 00:01:09,040

it's no surprise that to them the term

27

00:01:14,469 --> 00:01:12,400

full moon or the name harvest moon means

28

00:01:16,789 --> 00:01:14,479

something very specific

29

00:01:18,789 --> 00:01:16,799

to astronomers the harvest moon is the

30

00:01:21,990 --> 00:01:18,799

full moon closest to the september

31

00:01:24,789 --> 00:01:22,000

equinox and the full moon comes at that

32

00:01:27,990 --> 00:01:24,799

instant when the moon is 180 degrees

33

00:01:31,510 --> 00:01:28,000

from the sun in ecliptic or celestial

34

00:01:34,550 --> 00:01:31,520

longitude in 2017 this equinox took

35

00:01:36,710 --> 00:01:34,560

place as you remember on september 22nd

36

00:01:39,030 --> 00:01:36,720

the closest full moon to the autumn

37

00:01:42,390 --> 00:01:39,040

equinox reaches the crust of its full

38

00:01:44,789 --> 00:01:42,400

phase october 5th that's today at 1840

39

00:01:47,350 --> 00:01:44,799

utc for everybody living in the

40

00:01:50,550 --> 00:01:47,360

continental united states the moon turns

41

00:01:54,069 --> 00:01:50,560

precisely full during the daytime hours

42

00:01:57,030 --> 00:01:54,079

thursday today by united states clocks

43

00:02:00,389 --> 00:01:57,040

that full moon instant comes at 2 40 p.m

44

00:02:03,990 --> 00:02:00,399

eastern daylight time for instance 1 40

45

00:02:07,030 --> 00:02:04,000

p.m central daylight time 12 40 p.m

46

00:02:09,910 --> 00:02:07,040

mountain daylight time 11 40 pacific

47

00:02:11,510 --> 00:02:09,920

daylight time and on and on there'll be

48

00:02:12,790 --> 00:02:11,520

a chart if you want to further

49

00:02:14,869 --> 00:02:12,800

investigate

50

00:02:17,589 --> 00:02:14,879

but don't worry too much about that

51
00:02:20,550 --> 00:02:17,599
instant a full moon or the time on your

52
00:02:22,949 --> 00:02:20,560
clock or even where you are on the globe

53
00:02:25,670 --> 00:02:22,959
no matter where you live worldwide

54
00:02:28,229 --> 00:02:25,680
you're going to see a full looking moon

55
00:02:29,990 --> 00:02:28,239
shining from dusk till dawn on the night

56
00:02:32,630 --> 00:02:30,000
of october 5th

57
00:02:35,350 --> 00:02:32,640
tonight's october harvest moon rises in

58
00:02:37,830 --> 00:02:35,360
the east around sunset climbs highest up

59
00:02:40,470 --> 00:02:37,840
around midnight and sets in the west

60
00:02:44,229 --> 00:02:40,480
just about sunrise at the vicinity of

61
00:02:46,150 --> 00:02:44,239
full moon the moon as always stays out

62
00:02:49,990 --> 00:02:46,160
all night long

63
00:02:51,509 --> 00:02:50,000

so is tonight's moon the harvest moon

64

00:02:53,910 --> 00:02:51,519

well according to deborah bird who

65

00:02:56,790 --> 00:02:53,920

writes this for earthsky.org

66

00:02:59,110 --> 00:02:56,800

it sure is at least for the northern

67

00:03:01,030 --> 00:02:59,120

hemisphere meanwhile for you gentle

68

00:03:04,550 --> 00:03:01,040

listeners in the southern hemisphere

69

00:03:07,430 --> 00:03:04,560

it's the first full moon of spring and

70

00:03:10,070 --> 00:03:07,440

so says this article what's the big deal

71

00:03:12,309 --> 00:03:10,080

about the harvest moon why are the full

72

00:03:14,630 --> 00:03:12,319

moons special in autumn

73

00:03:17,509 --> 00:03:14,640

around the time of the autumn equinox

74

00:03:20,229 --> 00:03:17,519

the elliptic or the path of the sun moon

75

00:03:22,390 --> 00:03:20,239

and planets makes a narrow angle with

76

00:03:24,470 --> 00:03:22,400

the horizon at sunset

77

00:03:27,750 --> 00:03:24,480

every full moon rises around the time of

78

00:03:29,990 --> 00:03:27,760

sunset and on average each successive

79

00:03:32,789 --> 00:03:30,000

moonrise comes about 50 minutes later

80

00:03:35,270 --> 00:03:32,799

daily but on september and october

81

00:03:37,910 --> 00:03:35,280

evenings because of that narrow angle of

82

00:03:40,229 --> 00:03:37,920

the ecliptic on the horizon the moon

83

00:03:42,470 --> 00:03:40,239

rises sooner than average

84

00:03:45,030 --> 00:03:42,480

and instead of rising 50 minutes later

85

00:03:48,149 --> 00:03:45,040

in the days after full moon the waning

86

00:03:50,710 --> 00:03:48,159

gibbous moon might rise only 35 minutes

87

00:03:52,789 --> 00:03:50,720

later or thereabouts and for several

88

00:03:54,710 --> 00:03:52,799

days in a row at mid-northern latitudes

89

00:03:57,110 --> 00:03:54,720

that's gonna be the case

90

00:04:00,070 --> 00:03:57,120

at far northern latitudes for example

91

00:04:03,030 --> 00:04:00,080

fairbanks alaska the moon rises about 15

92

00:04:04,869 --> 00:04:03,040

minutes later for days on end

93

00:04:07,750 --> 00:04:04,879

that fact was important to people in

94

00:04:09,429 --> 00:04:07,760

earlier times for farmers for instance

95

00:04:12,149 --> 00:04:09,439

bringing in the harvest before the days

96

00:04:14,309 --> 00:04:12,159

of tractor lights it meant there was no

97

00:04:16,789 --> 00:04:14,319

long period of darkness between sunset

98

00:04:19,270 --> 00:04:16,799

and moonrise for several days after full

99

00:04:21,509 --> 00:04:19,280

moon and that meant farmers could work

100

00:04:25,510 --> 00:04:21,519

in the fields bringing in those crops by

101
00:04:27,830 --> 00:04:25,520
moonlight hence the name harvest moon at

102
00:04:30,150 --> 00:04:27,840
mid-northern latitudes watch for that

103
00:04:32,790 --> 00:04:30,160
harvest moon to shine from dusk till

104
00:04:33,749 --> 00:04:32,800
dawn for the next few or even several

105
00:04:36,670 --> 00:04:33,759
days

106
00:04:41,590 --> 00:04:36,680
and here's the bottom line enjoy that

107
00:04:44,230 --> 00:04:41,600
2017 harvest moon oh let it shine on

108
00:04:46,150 --> 00:04:44,240
we can't leave earthsky.org without

109
00:04:50,230 --> 00:04:46,160
giving you this headline

110
00:04:53,510 --> 00:04:50,240
is dust what's dimming tappy's star

111
00:04:56,790 --> 00:04:53,520
deborah bird wrote this for earthsky.org

112
00:04:59,670 --> 00:04:56,800
astronomers say they found a smoking gun

113
00:05:02,629 --> 00:04:59,680

that rules out the idea of that energy

114

00:05:05,030 --> 00:05:02,639

harvesting megastructure or dyson sphere

115

00:05:07,430 --> 00:05:05,040

built by an alien civilization

116

00:05:09,350 --> 00:05:07,440

surrounding taffy's star

117

00:05:12,830 --> 00:05:09,360

deborah bird writes have you been

118

00:05:14,390 --> 00:05:12,840

following that strange case of kic

119

00:05:16,390 --> 00:05:14,400

8462852

120

00:05:18,790 --> 00:05:16,400

well if you've been listening to ufo

121

00:05:21,270 --> 00:05:18,800

headline news here on inception radio

122

00:05:23,830 --> 00:05:21,280

network we have

123

00:05:26,790 --> 00:05:23,840

it's a star that behaves like no other

124

00:05:29,350 --> 00:05:26,800

ever seen a star whose dramatic and

125

00:05:31,189 --> 00:05:29,360

weird dips in brightness have caused

126
00:05:34,629 --> 00:05:31,199
some astronomers to speculate about a

127
00:05:37,430 --> 00:05:34,639
possible dyson sphere a megastructure

128
00:05:39,670 --> 00:05:37,440
around that star possibly built by an

129
00:05:42,469 --> 00:05:39,680
advanced civilization with a goal of

130
00:05:44,469 --> 00:05:42,479
large-scale energy harvesting

131
00:05:47,670 --> 00:05:44,479
the kepler space telescope has seen

132
00:05:50,629 --> 00:05:47,680
tabby's star dim up to 20 over a matter

133
00:05:53,830 --> 00:05:50,639
of days but the star also has a much

134
00:05:57,029 --> 00:05:53,840
subtler longer term enigmatic dimming

135
00:06:00,150 --> 00:05:57,039
trend with one continuing today

136
00:06:03,110 --> 00:06:00,160
on october 4th 2017 a study was

137
00:06:06,230 --> 00:06:03,120
announced suggesting an uneven dust

138
00:06:08,870 --> 00:06:06,240

cloud moving around the star as the

139

00:06:10,230 --> 00:06:08,880

cause of the long-term dimming no dyson

140

00:06:12,309 --> 00:06:10,240

sphere needed

141

00:06:14,230 --> 00:06:12,319

but is it true

142

00:06:17,189 --> 00:06:14,240

the astronomers who publish the study

143

00:06:19,830 --> 00:06:17,199

point to a smoking gun they say their

144

00:06:21,909 --> 00:06:19,840

observations which use the spitzer and

145

00:06:25,830 --> 00:06:21,919

swift space missions as well as the

146

00:06:28,230 --> 00:06:25,840

belgian astral ab iris observatory found

147

00:06:31,590 --> 00:06:28,240

less dimming in the infrared light from

148

00:06:34,550 --> 00:06:31,600

the star than in its ultraviolet light

149

00:06:36,870 --> 00:06:34,560

so their statement explains it thus

150

00:06:39,350 --> 00:06:36,880

quote any object larger than dust

151
00:06:41,909 --> 00:06:39,360
particles such as the great beams and

152
00:06:44,230 --> 00:06:41,919
girders of a dyson sphere

153
00:06:46,390 --> 00:06:44,240
would dim all wavelengths of light

154
00:06:50,309 --> 00:06:46,400
equally when passing in front of tabby's

155
00:06:53,110 --> 00:06:50,319
star end quotes enter juan meng at the

156
00:06:55,590 --> 00:06:53,120
university of arizona tucson meng is the

157
00:06:58,790 --> 00:06:55,600
lead author of the new study which also

158
00:07:01,510 --> 00:06:58,800
has as co-author none other than tabitha

159
00:07:04,150 --> 00:07:01,520
boyajian from yale she's the astronomer

160
00:07:07,510 --> 00:07:04,160
for whom tabi's star is named she also

161
00:07:09,830 --> 00:07:07,520
made this star famous there's a 2016 ted

162
00:07:12,230 --> 00:07:09,840
talk about it you can find a link later

163
00:07:13,430 --> 00:07:12,240

at ufoheadlinenews.com

164

00:07:15,830 --> 00:07:13,440

the studies published in the

165

00:07:18,070 --> 00:07:15,840

peer-reviewed astrophysical journal

166

00:07:20,629 --> 00:07:18,080

here's what meng says quote

167

00:07:22,870 --> 00:07:20,639

this pretty much rules out the alien

168

00:07:25,990 --> 00:07:22,880

megastructure theory as that could not

169

00:07:28,469 --> 00:07:26,000

explain the wavelength dependent dimming

170

00:07:31,029 --> 00:07:28,479

we suspect instead there is a cloud of

171

00:07:34,070 --> 00:07:31,039

dust orbiting the star with a roughly

172

00:07:35,749 --> 00:07:34,080

700-day orbital period the astronomer's

173

00:07:38,070 --> 00:07:35,759

statement explained why they consider

174

00:07:40,790 --> 00:07:38,080

their explanation that idea that the

175

00:07:44,070 --> 00:07:40,800

dimming is caused by dust as the best

176

00:07:46,870 --> 00:07:44,080

one quote we experience the uniform

177

00:07:48,629 --> 00:07:46,880

dimming of light often in everyday life

178

00:07:51,110 --> 00:07:48,639

if you go to the beach on a bright sunny

179

00:07:53,189 --> 00:07:51,120

day and sit under an umbrella that

180

00:07:56,150 --> 00:07:53,199

umbrella reduces the amount of sunlight

181

00:07:59,029 --> 00:07:56,160

hitting your eyes in all wavelengths

182

00:08:01,110 --> 00:07:59,039

but if you wait for the sunset the sun

183

00:08:03,110 --> 00:08:01,120

looks red because the blue and

184

00:08:04,629 --> 00:08:03,120

ultraviolet light is scattered away by

185

00:08:07,189 --> 00:08:04,639

tiny particles

186

00:08:09,189 --> 00:08:07,199

this new study suggests the objects

187

00:08:12,270 --> 00:08:09,199

causing the long period dimming of

188

00:08:15,350 --> 00:08:12,280

tabby's star can be no more than a few

189

00:08:18,469 --> 00:08:15,360

micrometers in diameter about one ten

190

00:08:20,230 --> 00:08:18,479

thousandth of an inch end quotes they

191

00:08:23,350 --> 00:08:20,240

explained that they observed tabby's

192

00:08:25,510 --> 00:08:23,360

star in ultraviolet using swift and in

193

00:08:27,189 --> 00:08:25,520

infrared using spitzer

194

00:08:30,309 --> 00:08:27,199

these observations took place from

195

00:08:32,550 --> 00:08:30,319

january to december of 2016.

196

00:08:34,630 --> 00:08:32,560

supplementing the space telescopes

197

00:08:36,949 --> 00:08:34,640

researchers also observed the star in

198

00:08:40,550 --> 00:08:36,959

visible light during that same period

199

00:08:43,269 --> 00:08:40,560

using the astral ab iris that's a public

200

00:08:46,630 --> 00:08:43,279

observatory that features a 27-inch wide

201
00:08:48,389 --> 00:08:46,640
68 centimeter reflecting telescope it's

202
00:08:49,590 --> 00:08:48,399
located near the belgian village of

203
00:08:51,829 --> 00:08:49,600
zillaback

204
00:08:55,030 --> 00:08:51,839
here's what that statement said quote

205
00:08:56,949 --> 00:08:55,040
based on the strong ultraviolet dip we

206
00:08:59,910 --> 00:08:56,959
determined the blocking particles must

207
00:09:01,910 --> 00:08:59,920
be bigger than interstellar dust small

208
00:09:03,990 --> 00:09:01,920
grains that could be located anywhere

209
00:09:06,550 --> 00:09:04,000
between earth and the star

210
00:09:08,630 --> 00:09:06,560
such small particles could not remain in

211
00:09:10,550 --> 00:09:08,640
orbit around the star because pressure

212
00:09:12,310 --> 00:09:10,560
from the starlight would drive them

213
00:09:14,990 --> 00:09:12,320

further into space

214

00:09:18,150 --> 00:09:15,000

dust that orbits a star is called

215

00:09:20,230 --> 00:09:18,160

circumstellar dust it's not so small

216

00:09:22,790 --> 00:09:20,240

that it would fly away but it's also not

217

00:09:24,790 --> 00:09:22,800

big enough to uniformly block light in

218

00:09:27,190 --> 00:09:24,800

all wavelengths this is currently

219

00:09:30,150 --> 00:09:27,200

considered the best explanation although

220

00:09:32,070 --> 00:09:30,160

others are possible end quotes

221

00:09:34,230 --> 00:09:32,080

in their study these astronomers are

222

00:09:36,470 --> 00:09:34,240

addressing the long-term dimming of

223

00:09:38,070 --> 00:09:36,480

tabby's star they did not address the

224

00:09:39,990 --> 00:09:38,080

shorter term dimming events that

225

00:09:41,590 --> 00:09:40,000

happened in that three-day spurt in

226

00:09:43,990 --> 00:09:41,600

2017.

227

00:09:46,949 --> 00:09:44,000

they also did not confront the mystery

228

00:09:48,870 --> 00:09:46,959

of the major 20 dips in brightness that

229

00:09:52,150 --> 00:09:48,880

kepler observed while studying the

230

00:09:55,430 --> 00:09:52,160

cygnus field on its primary mission

231

00:09:57,670 --> 00:09:55,440

in other words more mysteries remain

232

00:10:00,070 --> 00:09:57,680

but ask deborah bird who wrote this

233

00:10:02,389 --> 00:10:00,080

isn't that always the case

234

00:10:04,389 --> 00:10:02,399

so here's the bottom line a new study

235

00:10:08,070 --> 00:10:04,399

published in the astrophysical journal

236

00:10:09,990 --> 00:10:08,080

on october 4th suggests dust as the

237

00:10:11,670 --> 00:10:10,000

source for the long-term dimming of

238

00:10:14,389 --> 00:10:11,680

tabby's star

239

00:10:17,430 --> 00:10:14,399

those other dimming trends well they

240

00:10:19,269 --> 00:10:17,440

just remain unexplained

241

00:10:21,350 --> 00:10:19,279

we've gathered up a bunch of those

242

00:10:23,030 --> 00:10:21,360

unexplained sightings from

243

00:10:26,069 --> 00:10:23,040

ufostalker.com

244

00:10:29,030 --> 00:10:26,079

first person eyewitness accounts let's

245

00:10:32,069 --> 00:10:29,040

begin in glassing gals scotland that's

246

00:10:35,430 --> 00:10:32,079

mufon case number 87148

247

00:10:37,430 --> 00:10:35,440

the date of this sighting is 10 5 2017.

248

00:10:39,190 --> 00:10:37,440

it got a same-day report

249

00:10:40,310 --> 00:10:39,200

here's what our witness offers in

250

00:10:44,150 --> 00:10:40,320

summary

251
00:10:47,269 --> 00:10:44,160
october 5th three flashes bright white

252
00:10:48,550 --> 00:10:47,279
light moving across sky near dunblane

253
00:10:50,630 --> 00:10:48,560
scotland

254
00:10:53,910 --> 00:10:50,640
the sighting specifics offer a viewing

255
00:10:56,550 --> 00:10:53,920
distance unknown an altitude over 500

256
00:10:58,550 --> 00:10:56,560
feet underneath the cloud cover the

257
00:11:00,630 --> 00:10:58,560
sighting duration was a mere three

258
00:11:03,670 --> 00:11:00,640
seconds so the object features

259
00:11:06,389 --> 00:11:03,680
understandably are called none and

260
00:11:09,110 --> 00:11:06,399
unknown the object flight path was a

261
00:11:11,910 --> 00:11:09,120
path with directional change and the

262
00:11:14,470 --> 00:11:11,920
object shape is described as square and

263
00:11:17,190 --> 00:11:14,480

rectangular there doesn't seem to be any

264

00:11:19,829 --> 00:11:17,200

mention of meteorology so will weather

265

00:11:21,350 --> 00:11:19,839

the weather whatever here's the account

266

00:11:23,910 --> 00:11:21,360

of the event

267

00:11:26,870 --> 00:11:23,920

it was the evening of the 5th of october

268

00:11:29,430 --> 00:11:26,880

2017 just before 8 pm

269

00:11:32,470 --> 00:11:29,440

we were driving north on the a9 from

270

00:11:34,710 --> 00:11:32,480

sterling towards perth in scotland

271

00:11:36,550 --> 00:11:34,720

it had been raining but it was dry at

272

00:11:39,030 --> 00:11:36,560

the time of this sighting

273

00:11:40,949 --> 00:11:39,040

there were some dark cloud covers but

274

00:11:43,350 --> 00:11:40,959

this was breaking up there were breaks

275

00:11:44,630 --> 00:11:43,360

in the cloud and a full moon was even

276

00:11:47,670 --> 00:11:44,640

visible

277

00:11:50,310 --> 00:11:47,680

this sighting happened at 1955.

278

00:11:51,670 --> 00:11:50,320

it was a brief event over in a matter of

279

00:11:53,670 --> 00:11:51,680

seconds

280

00:11:55,670 --> 00:11:53,680

i noticed a bright white light in the

281

00:11:56,949 --> 00:11:55,680

sky above while i was looking at this

282

00:11:58,550 --> 00:11:56,959

full moon

283

00:12:00,949 --> 00:11:58,560

initially i didn't think it was anything

284

00:12:01,990 --> 00:12:00,959

in particular just that it was a bright

285

00:12:04,069 --> 00:12:02,000

light

286

00:12:06,629 --> 00:12:04,079

this sighting consisted of three

287

00:12:09,030 --> 00:12:06,639

separate bright flashes moving from left

288

00:12:11,350 --> 00:12:09,040

to right and as i've said this entire

289

00:12:12,629 --> 00:12:11,360

event was over very quickly in about

290

00:12:16,470 --> 00:12:12,639

three seconds

291

00:12:18,949 --> 00:12:16,480

this object or light was composed of two

292

00:12:21,750 --> 00:12:18,959

rectangular shapes right next to each

293

00:12:24,870 --> 00:12:21,760

other the object flashed once to the

294

00:12:27,750 --> 00:12:24,880

right once above and once slightly to

295

00:12:28,790 --> 00:12:27,760

the left in a shallow kind of v-shaped

296

00:12:30,550 --> 00:12:28,800

pattern

297

00:12:33,590 --> 00:12:30,560

it left the impression of the object

298

00:12:35,910 --> 00:12:33,600

moving almost instantaneously in time

299

00:12:38,550 --> 00:12:35,920

from one location to the next i felt

300

00:12:41,790 --> 00:12:38,560

excited i felt that i was witnessing

301
00:12:44,949 --> 00:12:41,800
something strange something unusual and

302
00:12:47,350 --> 00:12:44,959
unexplainable the word ufo sprang to

303
00:12:49,910 --> 00:12:47,360
mind even if just because it was

304
00:12:51,990 --> 00:12:49,920
unexplainable it was too fast to be any

305
00:12:55,829 --> 00:12:52,000
kind of aircraft such as a plane or

306
00:12:59,110 --> 00:12:55,839
helicopter it was too low too large too

307
00:13:01,990 --> 00:12:59,120
bright and moving way too fast to be a

308
00:13:03,829 --> 00:13:02,000
star or the international space station

309
00:13:05,829 --> 00:13:03,839
its movements were quick

310
00:13:07,910 --> 00:13:05,839
flashes of light appearing at different

311
00:13:10,230 --> 00:13:07,920
parts of the sky in quick succession

312
00:13:13,269 --> 00:13:10,240
traveling as if on a path

313
00:13:15,350 --> 00:13:13,279

there did not appear to be any trails

314

00:13:17,430 --> 00:13:15,360

i eventually lost sight of this object

315

00:13:20,629 --> 00:13:17,440

because it appeared to go behind cloud

316

00:13:22,629 --> 00:13:20,639

cover and it did not appear after that

317

00:13:23,430 --> 00:13:22,639

third flash

318

00:13:26,470 --> 00:13:23,440

hmm

319

00:13:29,030 --> 00:13:26,480

third time's the charm and why the

320

00:13:31,030 --> 00:13:29,040

flashes why make yourselves apparent to

321

00:13:34,629 --> 00:13:31,040

humans here on earth if you don't wish

322

00:13:37,269 --> 00:13:34,639

to be seen propulsion system we don't

323

00:13:39,350 --> 00:13:37,279

know it's anybody's guess

324

00:13:41,670 --> 00:13:39,360

with a slight juxtaposition of

325

00:13:44,949 --> 00:13:41,680

geolocation now let's head from scotland

326

00:13:48,870 --> 00:13:44,959

to yonkers in new york that's the

327

00:13:53,030 --> 00:13:48,880

setting for move on sighting number 8695

328

00:13:57,269 --> 00:13:53,040

the date of this sighting is 9 23 2017

329

00:13:58,710 --> 00:13:57,279

the date submitted 9 26 2017

330

00:14:02,389 --> 00:13:58,720

in summary

331

00:14:06,470 --> 00:14:02,399

dot size green flash overhead high

332

00:14:08,550 --> 00:14:06,480

altitude changes to red flashes flies

333

00:14:11,030 --> 00:14:08,560

off southeast

334

00:14:13,750 --> 00:14:11,040

citing specifics give us some clues a

335

00:14:16,389 --> 00:14:13,760

viewing distance unknown an altitude

336

00:14:19,189 --> 00:14:16,399

unknown as well the sighting duration

337

00:14:21,110 --> 00:14:19,199

was 10 minutes the object features well

338

00:14:24,230 --> 00:14:21,120

you might have guessed they are also

339

00:14:27,750 --> 00:14:24,240

unknown the flight path was hovering and

340

00:14:29,990 --> 00:14:27,760

then path the object shape other

341

00:14:32,310 --> 00:14:30,000

if you're wondering about the weather in

342

00:14:35,269 --> 00:14:32,320

yonkers at the time of this event we can

343

00:14:38,230 --> 00:14:35,279

clear that up the maximum temperature

344

00:14:41,350 --> 00:14:38,240

was 86 degrees fahrenheit 30 degrees

345

00:14:44,710 --> 00:14:41,360

celsius minimum temperature 78 degrees

346

00:14:46,870 --> 00:14:44,720

fahrenheit 26 degrees celsius and the

347

00:14:49,829 --> 00:14:46,880

minimum temperature was 70 degrees

348

00:14:52,230 --> 00:14:49,839

fahrenheit 21 degrees celsius those

349

00:14:55,110 --> 00:14:52,240

visibility factors maximum mean and

350

00:14:57,910 --> 00:14:55,120

minimum all stood the same 10 miles 16

351
00:14:59,670 --> 00:14:57,920
kilometers there was nothing abnormal

352
00:15:02,230 --> 00:14:59,680
about the weapon i just saved hundreds

353
00:15:05,110 --> 00:15:02,240
of dollars by switching to geico i'm so

354
00:15:06,550 --> 00:15:05,120
happy i feel like i can fly disclaimer

355
00:15:07,990 --> 00:15:06,560
you will not be able to fly by switching

356
00:15:09,350 --> 00:15:08,000
to geico this is against the laws of

357
00:15:10,710 --> 00:15:09,360
physics and nature if you find yourself

358
00:15:12,310 --> 00:15:10,720
flying please seek professional and or

359
00:15:13,829 --> 00:15:12,320
medical help immediately in the unlikely

360
00:15:15,430 --> 00:15:13,839
event you find yourself flying you might

361
00:15:17,189 --> 00:15:15,440
be a superhero or a pigeon or a

362
00:15:18,710 --> 00:15:17,199
superhero named pidgewoman who was

363
00:15:20,470 --> 00:15:18,720

bitten by a radioactive pigeon if you

364

00:15:21,750 --> 00:15:20,480

are indeed pitch woman geico retains all

365

00:15:23,269 --> 00:15:21,760

licensing publishing rights in the event

366

00:15:25,590 --> 00:15:23,279

pidge woman the movie becomes a top

367

00:15:28,550 --> 00:15:25,600

grossing hollywood blockbuster geico 15

368

00:15:31,189 --> 00:15:28,560

minutes could save you 15 or more

369

00:15:33,189 --> 00:15:31,199

weather conditions over yonkers

370

00:15:35,430 --> 00:15:33,199

here's the sighting event itself in the

371

00:15:39,509 --> 00:15:35,440

first person words of our witness

372

00:15:41,750 --> 00:15:39,519

on the night of september 23rd 2017 in

373

00:15:44,949 --> 00:15:41,760

southern westchester county new york

374

00:15:47,030 --> 00:15:44,959

near the nys throughway i was sitting on

375

00:15:49,430 --> 00:15:47,040

my back porch listening to music

376

00:15:50,310 --> 00:15:49,440

it was around 10 pm eastern standard

377

00:15:52,389 --> 00:15:50,320

time

378

00:15:54,870 --> 00:15:52,399

it was such a clear night that when i

379

00:15:56,470 --> 00:15:54,880

looked directly up at the sky i could

380

00:15:58,790 --> 00:15:56,480

see a few stars

381

00:16:01,030 --> 00:15:58,800

i saw this one star that was brighter

382

00:16:03,910 --> 00:16:01,040

than the others directly above me it was

383

00:16:05,189 --> 00:16:03,920

slightly north of four other stars next

384

00:16:07,430 --> 00:16:05,199

to it

385

00:16:09,189 --> 00:16:07,440

approximately five minutes went by i

386

00:16:12,710 --> 00:16:09,199

looked up again

387

00:16:14,389 --> 00:16:12,720

that's when i saw a green light it was

388

00:16:16,710 --> 00:16:14,399

the size of a dot

389

00:16:18,470 --> 00:16:16,720

only slightly larger than that bright

390

00:16:19,670 --> 00:16:18,480

star i was looking at just a few minutes

391

00:16:21,430 --> 00:16:19,680

before

392

00:16:23,670 --> 00:16:21,440

this appeared to be very high in

393

00:16:26,150 --> 00:16:23,680

altitude in the night sky probably

394

00:16:29,189 --> 00:16:26,160

thousands of feet up in the air well

395

00:16:31,430 --> 00:16:29,199

past the airspace of regular air travel

396

00:16:33,350 --> 00:16:31,440

it was to the left of that bright star

397

00:16:35,590 --> 00:16:33,360

that was slightly north of the other

398

00:16:36,629 --> 00:16:35,600

stars in the sky and directly over my

399

00:16:40,230 --> 00:16:36,639

head

400

00:16:42,870 --> 00:16:40,240

and this green dot was flashing

401
00:16:45,829 --> 00:16:42,880
it was a green color as vivid as the

402
00:16:47,829 --> 00:16:45,839
green in a traffic light this flash was

403
00:16:49,749 --> 00:16:47,839
one flash per second

404
00:16:51,350 --> 00:16:49,759
i went inside to call my neighbor so i

405
00:16:52,790 --> 00:16:51,360
could get a second witness but she

406
00:16:55,110 --> 00:16:52,800
wasn't home

407
00:16:57,430 --> 00:16:55,120
so i came back outside thinking this

408
00:16:58,389 --> 00:16:57,440
object had gone away but it was still

409
00:17:00,949 --> 00:16:58,399
there

410
00:17:03,509 --> 00:17:00,959
it then moved to the right slightly

411
00:17:05,909 --> 00:17:03,519
blocking that bright star

412
00:17:09,669 --> 00:17:05,919
the green flashing dot all of a sudden

413
00:17:12,470 --> 00:17:09,679

then changed to a red flashing dot same

414

00:17:15,270 --> 00:17:12,480

tempo of flashes the red color was just

415

00:17:17,590 --> 00:17:15,280

as vivid as stoplight red

416

00:17:21,270 --> 00:17:17,600

for approximately one minute then it

417

00:17:23,350 --> 00:17:21,280

flashed red and then slowly drifted east

418

00:17:25,189 --> 00:17:23,360

all the while flashing

419

00:17:27,270 --> 00:17:25,199

it moved east until the tall oak trees

420

00:17:28,950 --> 00:17:27,280

in my yard blocked my vision of this

421

00:17:32,230 --> 00:17:28,960

object in the sky

422

00:17:34,870 --> 00:17:32,240

and that's it no punchline no point in

423

00:17:37,110 --> 00:17:34,880

hanging around nothing to see here folks

424

00:17:40,230 --> 00:17:37,120

move along but our witness definitely

425

00:17:41,830 --> 00:17:40,240

saw something green then red and

426

00:17:45,190 --> 00:17:41,840

flashing

427

00:17:47,590 --> 00:17:45,200

from new york to georgia to the city of

428

00:17:50,750 --> 00:17:47,600

warner robins where this sighting took

429

00:17:53,430 --> 00:17:50,760

place mufon gave it a case number

430

00:17:56,470 --> 00:17:53,440

87140 the date of this sighting is the

431

00:17:58,950 --> 00:17:56,480

3rd of october 2017. it was reported

432

00:18:01,110 --> 00:17:58,960

october 5th here's what our witness

433

00:18:02,950 --> 00:18:01,120

offers by way of summary bright

434

00:18:06,310 --> 00:18:02,960

star-sized light

435

00:18:10,549 --> 00:18:06,320

grew dim and bright had bluish green

436

00:18:12,549 --> 00:18:10,559

lights possibly black round body two of

437

00:18:14,710 --> 00:18:12,559

them let's check out the sighting

438

00:18:18,150 --> 00:18:14,720

specifics in this case the viewing

439

00:18:21,669 --> 00:18:18,160
distance was 101 feet to 500 feet

440

00:18:24,470 --> 00:18:21,679
initially and then unknown the altitude

441

00:18:26,870 --> 00:18:24,480
treetop 500 feet or less

442

00:18:28,470 --> 00:18:26,880
object features are described as other

443

00:18:30,950 --> 00:18:28,480
and unknown

444

00:18:33,510 --> 00:18:30,960
the flight path is described as a path

445

00:18:36,630 --> 00:18:33,520
that included directional change and

446

00:18:38,470 --> 00:18:36,640
then a path that included hovering and

447

00:18:40,950 --> 00:18:38,480
according to our witness the object

448

00:18:43,430 --> 00:18:40,960
shape does not apply just a brief

449

00:18:45,990 --> 00:18:43,440
glimpse of the meteorology involved the

450

00:18:48,870 --> 00:18:46,000
maximum temperature over warmer robins

451
00:18:51,750 --> 00:18:48,880
georgia for this event was 72 degrees

452
00:18:54,390 --> 00:18:51,760
fahrenheit 22 degrees celsius the

453
00:18:58,470 --> 00:18:54,400
visibility factors were standard all of

454
00:19:00,950 --> 00:18:58,480
them 10 miles 16 kilometers no abnormal

455
00:19:02,310 --> 00:19:00,960
weather in other words so let's hear the

456
00:19:04,950 --> 00:19:02,320
account

457
00:19:08,070 --> 00:19:04,960
i live 80 miles south of atlanta one

458
00:19:10,549 --> 00:19:08,080
quarter mile from robins air force base

459
00:19:11,590 --> 00:19:10,559
so i'm used to air traffic all day and

460
00:19:17,110 --> 00:19:11,600
night

461
00:19:19,750 --> 00:19:17,120
and i looked to my northwest where i see

462
00:19:21,510 --> 00:19:19,760
a bright star-shaped thing

463
00:19:23,830 --> 00:19:21,520

i couldn't tell much about the direction

464

00:19:26,070 --> 00:19:23,840

it was heading at first but it looked

465

00:19:28,630 --> 00:19:26,080

like it was rising over the tree line

466

00:19:30,630 --> 00:19:28,640

rising in a vertical motion

467

00:19:32,870 --> 00:19:30,640

i then realized it was actually coming

468

00:19:34,870 --> 00:19:32,880

towards me and i was sitting to the

469

00:19:37,990 --> 00:19:34,880

southeast of this thing

470

00:19:41,029 --> 00:19:38,000

i watched it i watched it pass over me

471

00:19:43,270 --> 00:19:41,039

it seemed like the light was floating

472

00:19:45,909 --> 00:19:43,280

just over the treetops

473

00:19:47,990 --> 00:19:45,919

i think i may have seen a round black

474

00:19:49,430 --> 00:19:48,000

silhouette around the light i can't

475

00:19:51,830 --> 00:19:49,440

confirm it though

476

00:19:54,150 --> 00:19:51,840

there were also bluish green lights on

477

00:19:56,549 --> 00:19:54,160

this almost as though they were wings

478

00:19:58,950 --> 00:19:56,559

but i saw no wings

479

00:20:01,029 --> 00:19:58,960

after it went over i looked to the north

480

00:20:03,270 --> 00:20:01,039

and see another one

481

00:20:06,470 --> 00:20:03,280

and then besides that there appeared to

482

00:20:09,350 --> 00:20:06,480

be a third or possibly the return of the

483

00:20:11,909 --> 00:20:09,360

first one i didn't hear a sound and due

484

00:20:12,870 --> 00:20:11,919

to being so close to the base

485

00:20:15,190 --> 00:20:12,880

well

486

00:20:17,830 --> 00:20:15,200

there are multiple bands on drones in

487

00:20:21,029 --> 00:20:17,840

this area and i can't find any other

488

00:20:23,990 --> 00:20:21,039

report on this at all very soon after

489

00:20:26,630 --> 00:20:24,000

these lights were all gone some sort of

490

00:20:28,870 --> 00:20:26,640

aircraft took off from the base however

491

00:20:31,350 --> 00:20:28,880

that could have just been training

492

00:20:34,470 --> 00:20:31,360

i saw this again tonight and i also

493

00:20:37,029 --> 00:20:34,480

heard no sound from the object

494

00:20:39,909 --> 00:20:37,039

i want to also mention one more time

495

00:20:40,950 --> 00:20:39,919

drones are banned here

496

00:20:43,110 --> 00:20:40,960

so

497

00:20:45,029 --> 00:20:43,120

we gentle listeners can tally up the

498

00:20:47,830 --> 00:20:45,039

fact that this is in proximity one

499

00:20:50,630 --> 00:20:47,840

quarter mile from robbins air force base

500

00:20:53,270 --> 00:20:50,640

and a prohibition understandably on

501
00:20:55,990 --> 00:20:53,280
drones in the area so perhaps it begs

502
00:20:59,830 --> 00:20:56,000
the question what's going on at robbins

503
00:21:02,630 --> 00:20:59,840
air force base in the state of georgia

504
00:21:05,430 --> 00:21:02,640
let's zoom into the northern territory

505
00:21:07,990 --> 00:21:05,440
shall we the state of michigan city of

506
00:21:10,870 --> 00:21:08,000
luther that's the setting for mufon

507
00:21:13,029 --> 00:21:10,880
sighting number 87079

508
00:21:16,149 --> 00:21:13,039
it's a slightly older sighting the month

509
00:21:18,950 --> 00:21:16,159
of august the sixth to be specific this

510
00:21:20,470 --> 00:21:18,960
year 2017 it wasn't reported until

511
00:21:23,669 --> 00:21:20,480
october 2nd

512
00:21:26,470 --> 00:21:23,679
the summary says seemed small

513
00:21:28,230 --> 00:21:26,480

oval-shaped there are photos that

514

00:21:31,350 --> 00:21:28,240

accompany this account you can check

515

00:21:34,310 --> 00:21:31,360

them out later at ufoheadlinenews.com

516

00:21:36,230 --> 00:21:34,320

do your own home analysis

517

00:21:39,270 --> 00:21:36,240

the citing specifics offer a viewing

518

00:21:42,070 --> 00:21:39,280

distance listed as unknown the altitude

519

00:21:43,350 --> 00:21:42,080

was treetop the features are described

520

00:21:44,950 --> 00:21:43,360

as other

521

00:21:47,990 --> 00:21:44,960

the flight path is described as

522

00:21:50,310 --> 00:21:48,000

stationary and the shape of the object

523

00:21:52,390 --> 00:21:50,320

as we've heard is oval

524

00:21:55,510 --> 00:21:52,400

the maximum temperature for this event

525

00:21:58,310 --> 00:21:55,520

was 78 degrees fahrenheit 26 degrees

526
00:22:01,510 --> 00:21:58,320
celsius dropping down to a minimum of 50

527
00:22:03,350 --> 00:22:01,520
degrees fahrenheit 10 degrees celsius

528
00:22:07,270 --> 00:22:03,360
all of the visibility factors were

529
00:22:10,310 --> 00:22:07,280
standard 10 miles 16 kilometers nothing

530
00:22:13,750 --> 00:22:10,320
abnormal meteorologically here's the

531
00:22:16,070 --> 00:22:13,760
account first person from our witness

532
00:22:18,789 --> 00:22:16,080
we stopped to take some pictures of some

533
00:22:20,950 --> 00:22:18,799
nice deer deer that were eating as they

534
00:22:23,270 --> 00:22:20,960
were going over a dirt berm

535
00:22:25,750 --> 00:22:23,280
i took four photos of these deer

536
00:22:27,350 --> 00:22:25,760
the second photo is the only one that

537
00:22:29,110 --> 00:22:27,360
shows the object

538
00:22:31,669 --> 00:22:29,120

all these photos were taken from the

539

00:22:33,270 --> 00:22:31,679

same place at the same time just a few

540

00:22:35,830 --> 00:22:33,280

seconds apart

541

00:22:38,070 --> 00:22:35,840

i did not notice what was in the photo

542

00:22:40,630 --> 00:22:38,080

until i looked at these photos a couple

543

00:22:42,870 --> 00:22:40,640

of days later there were three of us in

544

00:22:44,710 --> 00:22:42,880

the truck i took photos from the front

545

00:22:47,270 --> 00:22:44,720

passenger seat and a buddy of mine took

546

00:22:49,029 --> 00:22:47,280

two photos out of the driver's window

547

00:22:50,310 --> 00:22:49,039

there was nothing different about his

548

00:22:51,909 --> 00:22:50,320

two photos

549

00:22:54,390 --> 00:22:51,919

the other guy was sitting in the back

550

00:22:56,950 --> 00:22:54,400

seat watching the deer but he never saw

551

00:22:59,270 --> 00:22:56,960

that thing around the deer

552

00:23:03,029 --> 00:22:59,280

perhaps you could shed some light on

553

00:23:04,390 --> 00:23:03,039

what this is in photo number two thanks

554

00:23:08,149 --> 00:23:04,400

jay

555

00:23:12,070 --> 00:23:08,159

oj shedding some light yep devoutly to

556

00:23:14,310 --> 00:23:12,080

be sought but we have no idea what this

557

00:23:16,630 --> 00:23:14,320

is gentle listeners take a look for

558

00:23:18,710 --> 00:23:16,640

yourself see if you can shed any light

559

00:23:21,350 --> 00:23:18,720

and if you have ideas there is a place

560

00:23:23,190 --> 00:23:21,360

underneath every ufostalker.com

561

00:23:24,870 --> 00:23:23,200

entry where you can leave your comment

562

00:23:27,029 --> 00:23:24,880

your suggestions

563

00:23:29,950 --> 00:23:27,039

let's head from that mitten shaped state

564

00:23:33,510 --> 00:23:29,960

of michigan to the well we could say

565

00:23:36,630 --> 00:23:33,520

ufo-shaped state of arizona but that's a

566

00:23:39,270 --> 00:23:36,640

stretch lots of sightings there however

567

00:23:41,830 --> 00:23:39,280

and here's one more it's move on case

568

00:23:44,390 --> 00:23:41,840

number eight seven zero eight eight

569

00:23:47,669 --> 00:23:44,400

the date of this sighting is ten one

570

00:23:50,549 --> 00:23:47,679

twenty seventeen it was reported ten to

571

00:23:51,350 --> 00:23:50,559

twenty seventeen here's the summary

572

00:23:53,270 --> 00:23:51,360

two

573

00:23:56,870 --> 00:23:53,280

one cone-shaped and reflective

574

00:23:59,029 --> 00:23:56,880

stationary and another a globe mottled

575

00:24:01,750 --> 00:23:59,039

one it turned

576

00:24:03,190 --> 00:24:01,760

there were three and then all three

577

00:24:05,430 --> 00:24:03,200

vanished

578

00:24:07,430 --> 00:24:05,440

under the categories that include citing

579

00:24:10,710 --> 00:24:07,440

specifics our witness lists a viewing

580

00:24:14,149 --> 00:24:10,720

distance of 20 feet or less initially

581

00:24:16,549 --> 00:24:14,159

and then 500 feet to one mile and

582

00:24:19,350 --> 00:24:16,559

eventually unknown

583

00:24:22,549 --> 00:24:19,360

the altitude was 500 feet or less and

584

00:24:26,070 --> 00:24:22,559

then later over 500 feet and underneath

585

00:24:29,190 --> 00:24:26,080

the cloud cover over 500 feet without

586

00:24:31,110 --> 00:24:29,200

the cloud cover later it's complicated

587

00:24:33,990 --> 00:24:31,120

the entire sighting duration took place

588

00:24:36,149 --> 00:24:34,000

over two hours and thirty minutes

589

00:24:37,909 --> 00:24:36,159

the object features are described as a

590

00:24:40,870 --> 00:24:37,919

patterned surface

591

00:24:43,350 --> 00:24:40,880

the flight path stationary and then a

592

00:24:46,310 --> 00:24:43,360

path that included directional change

593

00:24:47,789 --> 00:24:46,320

and this object was shaped like a cone

594

00:24:50,149 --> 00:24:47,799

there's a rather truncated

595

00:24:53,029 --> 00:24:50,159

meteorological report it simply notes

596

00:24:56,310 --> 00:24:53,039

the maximum temperature which was 95

597

00:24:58,470 --> 00:24:56,320

degrees fahrenheit 35 degrees celsius

598

00:25:01,830 --> 00:24:58,480

the mean temperature 78 degrees

599

00:25:05,029 --> 00:25:01,840

fahrenheit 26 degrees celsius minimum

600

00:25:06,710 --> 00:25:05,039

temperature 62 degrees fahrenheit 17

601
00:25:09,909 --> 00:25:06,720
degrees celsius

602
00:25:13,750 --> 00:25:09,919
it seemed to go something like this

603
00:25:16,870 --> 00:25:13,760
at about 5 45 pm a neighbor called me

604
00:25:19,029 --> 00:25:16,880
out to my third floor balcony to watch

605
00:25:22,310 --> 00:25:19,039
what he'd been seeing

606
00:25:25,430 --> 00:25:22,320
i grabbed my binoculars and i cited an

607
00:25:27,590 --> 00:25:25,440
inverted teardrop shaped object highly

608
00:25:30,310 --> 00:25:27,600
reflective silver

609
00:25:32,870 --> 00:25:30,320
it appeared to have a canoe-shaped

610
00:25:35,430 --> 00:25:32,880
object suspended beneath it

611
00:25:38,789 --> 00:25:35,440
it never moved as the sun began to set

612
00:25:41,590 --> 00:25:38,799
this object turned orange red and then

613
00:25:43,909 --> 00:25:41,600

at full dark it disappeared

614

00:25:46,789 --> 00:25:43,919

it was in the northeast it was at a

615

00:25:49,510 --> 00:25:46,799

great but unknown altitude

616

00:25:52,789 --> 00:25:49,520

after settling in to observe this object

617

00:25:55,750 --> 00:25:52,799

we noticed three circular objects flying

618

00:25:58,470 --> 00:25:55,760

quickly horizontally south to north

619

00:25:59,830 --> 00:25:58,480

these objects seem to be about 500 feet

620

00:26:03,029 --> 00:25:59,840

in altitude

621

00:26:04,390 --> 00:26:03,039

they were a mottled dull red orange and

622

00:26:06,630 --> 00:26:04,400

brown

623

00:26:09,830 --> 00:26:06,640

one of these objects seemed to roll and

624

00:26:11,190 --> 00:26:09,840

become flat and the group then suddenly

625

00:26:13,909 --> 00:26:11,200

vanished

626
00:26:16,310 --> 00:26:13,919
i'm a retired air force airborne command

627
00:26:18,230 --> 00:26:16,320
and control superintendent my neighbor

628
00:26:20,230 --> 00:26:18,240
who initially spotted this is retired

629
00:26:22,390 --> 00:26:20,240
united states navy

630
00:26:24,950 --> 00:26:22,400
this morning he told me that a third

631
00:26:27,110 --> 00:26:24,960
neighbor had seen this single silver

632
00:26:28,230 --> 00:26:27,120
object and photographed it with his

633
00:26:30,549 --> 00:26:28,240
iphone

634
00:26:33,110 --> 00:26:30,559
i have not yet spoken with him or seen

635
00:26:36,470 --> 00:26:33,120
that photo but both my neighbor bill and

636
00:26:38,789 --> 00:26:36,480
i will speak to anybody if requested to

637
00:26:41,029 --> 00:26:38,799
do so good hunting

638
00:26:43,390 --> 00:26:41,039

and by anybody we're pretty sure he

639

00:26:44,950 --> 00:26:43,400

means move on and

640

00:26:48,630 --> 00:26:44,960

ufostalker.com

641

00:26:52,710 --> 00:26:48,640

good hunting indeed tracking that wild

642

00:26:55,110 --> 00:26:52,720

and elusive beast known as the ufo

643

00:26:57,510 --> 00:26:55,120

what we're tracking is the clock which

644

00:26:59,430 --> 00:26:57,520

tells us with its ceaseless ticking we

645

00:27:01,830 --> 00:26:59,440

gotta go because

646

00:27:04,549 --> 00:27:01,840

that's a wrap thank you for listening to

647

00:27:06,460 --> 00:27:04,559

inception radio network follow today's

648

00:27:07,669 --> 00:27:06,470

broadcast at ufoheadlinenews.com

649

00:27:09,830 --> 00:27:07,679

[Music]

650

00:27:12,149 --> 00:27:09,840

lovingkindness take care of each other

651
00:27:16,230 --> 00:27:12,159
we're all in this together this is carol

652
00:27:20,710 --> 00:27:17,990
i just saved hundreds of dollars by

653
00:27:22,950 --> 00:27:20,720
switching to geico i've never felt more

654
00:27:24,630 --> 00:27:22,960
alive disclaimer kaiko cannot guarantee

655
00:27:25,750 --> 00:27:24,640
you will feel more alive you either

656
00:27:27,750 --> 00:27:25,760
possess functioning respiratory and

657
00:27:29,190 --> 00:27:27,760
circulatory systems or you do not or you

658
00:27:30,310 --> 00:27:29,200
are a zombie if you are indeed a brain

659
00:27:31,750 --> 00:27:30,320
starved zombie and you would like to

660
00:27:33,190 --> 00:27:31,760
save money on car insurance the geico

661
00:27:35,029 --> 00:27:33,200
legal team applaud your excellent life

662
00:27:36,390 --> 00:27:35,039
choices even in your shambling afterlife

663
00:27:38,149 --> 00:27:36,400

but we strongly encourage you to visit

664

00:27:39,669 --> 00:27:38,159

geico.com or download the geico app

665

00:27:41,350 --> 00:27:39,679

please stay a minimum of 500 feet away

666

00:27:44,070 --> 00:27:41,360

from our large and presumably delicious
