

UFO Headline News | Friday October 20th, 2017

Listen on

inceptionradionetwork.com

1
00:00:07,880 --> 00:00:04,880
hello it's Friday October 20th 2017 you

2
00:00:10,700 --> 00:00:07,890
are listening to inception Radio Network

3
00:00:14,589 --> 00:00:10,710
voice of the fringe majority this is

4
00:00:16,820 --> 00:00:14,599
Carol Karl with UFO headline news

5
00:00:20,269 --> 00:00:16,830
what's up tonight

6
00:00:23,179 --> 00:00:20,279
well earth sky org tells us this by way

7
00:00:26,390 --> 00:00:23,189
of headline Orionid meteor shower peak

8
00:00:28,640 --> 00:00:26,400
tonight tonight and most of the weekend

9
00:00:32,150 --> 00:00:28,650
actually presents the Orionid meteor

10
00:00:34,760 --> 00:00:32,160
shower at its best and this night might

11
00:00:36,620 --> 00:00:34,770
well be the showers peak late Saturday

12
00:00:39,110 --> 00:00:36,630
night and Sunday morning might be good

13
00:00:39,619 --> 00:00:39,120

times to watch as well on both of these

14

00:00:41,600 --> 00:00:39,629

nights

15

00:00:43,910 --> 00:00:41,610

meteors should become visible starting

16

00:00:45,920 --> 00:00:43,920

at late evening they'll probably be most

17

00:00:49,610 --> 00:00:45,930

prolific in the few hours before dawn

18

00:00:53,779 --> 00:00:49,620

October 21st but if you can try watching

19

00:00:56,930 --> 00:00:53,789

before dawn on October 22nd as well from

20

00:01:00,470 --> 00:00:56,940

a dark sight you might see a maximum of

21

00:01:03,770 --> 00:01:00,480

10 to 15 meteors per hour fortunately

22

00:01:05,450 --> 00:01:03,780

today is only one day after New Moon so

23

00:01:07,340 --> 00:01:05,460

there won't be that pesky moon light to

24

00:01:10,039 --> 00:01:07,350

ruin this year's Orionid meteor shower

25

00:01:12,890 --> 00:01:10,049

in fact it will be hard to catch that

26
00:01:14,390 --> 00:01:12,900
young waxing crescent moon it'll be low

27
00:01:17,660 --> 00:01:14,400
in the West after sunset

28
00:01:19,730 --> 00:01:17,670
as with any meteor shower the best time

29
00:01:21,980 --> 00:01:19,740
to watch will be between the hours of

30
00:01:25,609 --> 00:01:21,990
midnight and Dawn regardless of what

31
00:01:28,160 --> 00:01:25,619
your timezone is the meteors vaporizing

32
00:01:30,410 --> 00:01:28,170
bits of comet ice and dust will look

33
00:01:32,270 --> 00:01:30,420
like streaks of light in the night sky

34
00:01:35,539 --> 00:01:32,280
and of course they're sometimes called

35
00:01:38,539 --> 00:01:35,549
shooting stars as that pre-dawn darkness

36
00:01:40,999 --> 00:01:38,549
starts to give way to dawn watch for the

37
00:01:44,179 --> 00:01:41,009
planets Mars and Venus to rise into your

38
00:01:46,850 --> 00:01:44,189

eastern sky there'll be a sky almanaque

39

00:01:49,999 --> 00:01:46,860

you can find it later by going to UFO

40

00:01:52,280 --> 00:01:50,009

headline news calm the Almanac can help

41

00:01:55,700 --> 00:01:52,290

you determine rising times for Mars and

42

00:01:58,880 --> 00:01:55,710

Venus in your particular area of sky or

43

00:02:00,980 --> 00:01:58,890

you can just watch for the very bright

44

00:02:05,149 --> 00:02:00,990

object that ascends in the east before

45

00:02:07,069 --> 00:02:05,159

Sun that will be Venus the pre-dawn and

46

00:02:09,380 --> 00:02:07,079

dawn sky also offers a great view of

47

00:02:11,570 --> 00:02:09,390

serious right now which is the brightest

48

00:02:13,730 --> 00:02:11,580

star in the sky you can watch for it in

49

00:02:16,340 --> 00:02:13,740

the south or if you're in the southern

50

00:02:19,760 --> 00:02:16,350

fear over your heads just before dawn

51
00:02:22,430 --> 00:02:19,770
the Orionid stem from debris from that

52
00:02:25,520 --> 00:02:22,440
most famous of all comets comet Hallie

53
00:02:29,570 --> 00:02:25,530
or Halley even Holley we've heard all

54
00:02:33,200 --> 00:02:29,580
three it spelled H a l l e y by the way

55
00:02:37,580 --> 00:02:33,210
the comet last visited earth in 1986 and

56
00:02:40,370 --> 00:02:37,590
will next return in 2061 as comet Halley

57
00:02:42,470 --> 00:02:40,380
Halley Holly moves through space it

58
00:02:44,510 --> 00:02:42,480
leaves debris in its wake

59
00:02:47,990 --> 00:02:44,520
that strikes Earth's atmosphere almost

60
00:02:50,630 --> 00:02:48,000
fully around October 20th to 22nd every

61
00:02:53,900 --> 00:02:50,640
year the comet itself is nowhere near

62
00:02:56,300 --> 00:02:53,910
but around this time every year the

63
00:02:59,120 --> 00:02:56,310

earth is intersecting the debris from

64

00:03:01,700 --> 00:02:59,130

that comet if the meteors originated

65

00:03:05,870 --> 00:03:01,710

from that comet then why are they called

66

00:03:07,970 --> 00:03:05,880

Orion it's the answer meteors in annual

67

00:03:10,460 --> 00:03:07,980

showers are named from that point in our

68

00:03:13,970 --> 00:03:10,470

sky from which they appear to radiate

69

00:03:15,530 --> 00:03:13,980

the radiant point for the Orionids is in

70

00:03:19,310 --> 00:03:15,540

the direction of the constellation Orion

71

00:03:21,470 --> 00:03:19,320

the Hunter hence the name our author

72

00:03:24,650 --> 00:03:21,480

here Bruce McClure for Earth's sky

73

00:03:27,200 --> 00:03:24,660

dot-org makes this cool suggestion bring

74

00:03:29,540 --> 00:03:27,210

along a blanket or a chair a lawn chair

75

00:03:32,660 --> 00:03:29,550

- you're watching destination after

76
00:03:35,410 --> 00:03:32,670
midnight or before dawn and then lie

77
00:03:37,940 --> 00:03:35,420
back comfortably while gazing upwards

78
00:03:40,100 --> 00:03:37,950
although a somewhat modest shower

79
00:03:42,140 --> 00:03:40,110
these Swift moving meteors are sometimes

80
00:03:45,440 --> 00:03:42,150
bright they leave what is called a

81
00:03:47,750 --> 00:03:45,450
persistent train a glowing streak that

82
00:03:51,050 --> 00:03:47,760
lingers momentarily after the meteors

83
00:03:53,570 --> 00:03:51,060
gone remember even one meteor can be a

84
00:03:54,350 --> 00:03:53,580
thrill you just have to find that dark

85
00:03:57,470 --> 00:03:54,360
sky

86
00:04:00,560 --> 00:03:57,480
bottom line best night for the Orionid

87
00:04:03,800 --> 00:04:00,570
meteor shower in 2017 will probably be

88
00:04:07,400 --> 00:04:03,810

October 20th to 21st especially between

89

00:04:10,190 --> 00:04:07,410

midnight and Dawn on October 21st you

90

00:04:12,710 --> 00:04:10,200

might see as many as 10 to 15 meteors

91

00:04:16,820 --> 00:04:12,720

per hour provided you have a dark site

92

00:04:19,310 --> 00:04:16,830

and there's no pesky moonlight well

93

00:04:22,460 --> 00:04:19,320

there's a little traveling companion for

94

00:04:24,350 --> 00:04:22,470

planet Earth a traveling buddy as it's

95

00:04:27,500 --> 00:04:24,360

being called there was talk of this and

96

00:04:30,500 --> 00:04:27,510

now there's some confirmation as to what

97

00:04:34,070 --> 00:04:30,510

it is here's the headline from Fizz org

98

00:04:38,090 --> 00:04:34,080

dot news Earth's new traveling buddy is

99

00:04:41,120 --> 00:04:38,100

definitely an asteroid not space junk at

100

00:04:43,690 --> 00:04:41,130

the 49th annual division for planetary

101
00:04:46,610 --> 00:04:43,700
sciences meeting in Provo Utah

102
00:04:49,100 --> 00:04:46,620
astronomers led by Vishnu Reddy from the

103
00:04:52,250 --> 00:04:49,110
University of Arizona confirmed the true

104
00:04:54,830 --> 00:04:52,260
nature of one of Earth's companions on

105
00:04:57,260 --> 00:04:54,840
its journey around the Sun there been

106
00:04:59,930 --> 00:04:57,270
plenty of speculation was this thing a

107
00:05:02,300 --> 00:04:59,940
burned-out rocket booster tumbling along

108
00:05:04,880 --> 00:05:02,310
a peculiar near-earth orbit around the

109
00:05:06,710 --> 00:05:04,890
Sun and only occasionally getting close

110
00:05:10,190 --> 00:05:06,720
enough to be studied with even the

111
00:05:12,680 --> 00:05:10,200
largest telescopes not at all as it

112
00:05:16,160 --> 00:05:12,690
turns out this object had been given a

113
00:05:20,690 --> 00:05:16,170

name number it was four six nine two one

114

00:05:22,970 --> 00:05:20,700

nine or twenty sixteen ho3 and based on

115

00:05:25,580 --> 00:05:22,980

previous observations most astronomers

116

00:05:28,490 --> 00:05:25,590

had strongly suspected the object was

117

00:05:31,220 --> 00:05:28,500

just an ordinary asteroid and not space

118

00:05:34,280 --> 00:05:31,230

junk it did take a team of astronomers

119

00:05:36,590 --> 00:05:34,290

led by Vishnu reddy assistant professor

120

00:05:39,590 --> 00:05:36,600

at the lunar and planetary laboratory

121

00:05:40,970 --> 00:05:39,600

out of the university of arizona working

122

00:05:43,880 --> 00:05:40,980

with one of the world's largest

123

00:05:47,630 --> 00:05:43,890

telescopes that telescope is called the

124

00:05:49,790 --> 00:05:47,640

large binocular telescope or LBT it's

125

00:05:52,370 --> 00:05:49,800

located on Mount Graham in southeastern

126
00:05:55,750 --> 00:05:52,380
Arizona and it was able to detect the

127
00:05:59,690 --> 00:05:55,760
true nature of this near-earth object

128
00:06:00,890 --> 00:05:59,700
20:16 ho3 is a small near-earth object

129
00:06:03,560 --> 00:06:00,900
or ennio

130
00:06:07,250 --> 00:06:03,570
it measures no more than 100 meters or

131
00:06:10,010 --> 00:06:07,260
330 feet across and while orbiting the

132
00:06:13,490 --> 00:06:10,020
Sun it also appears to circle around the

133
00:06:13,940 --> 00:06:13,500
earth as quote a quasi satellite and

134
00:06:16,640 --> 00:06:13,950
quotes

135
00:06:20,510 --> 00:06:16,650
only five quasi satellites have been

136
00:06:23,450 --> 00:06:20,520
discovered so far but 2016 ho3 is the

137
00:06:26,120 --> 00:06:23,460
most stable of the bunch the provenance

138
00:06:30,020 --> 00:06:26,130

of this object is unknown on timescales

139

00:06:33,950 --> 00:06:30,030

of a few centuries 2016 ho3 remains

140

00:06:37,880 --> 00:06:33,960

within the 38 to 100 lunar distances

141

00:06:40,730 --> 00:06:37,890

from us soon after its discovery in 2016

142

00:06:42,710 --> 00:06:40,740

astronomers just weren't sure where this

143

00:06:45,409 --> 00:06:42,720

jet came from but in a recent

144

00:06:47,749 --> 00:06:45,419

presentation at that annual division for

145

00:06:50,059 --> 00:06:47,759

planetary sciences conference of the

146

00:06:51,080 --> 00:06:50,069

American Astronomical Society held in

147

00:06:53,390 --> 00:06:51,090

Provo Utah

148

00:06:56,689 --> 00:06:53,400

Vishnu Reddy and his colleagues show

149

00:07:00,050 --> 00:06:56,699

that Earth's new traveling buddy is an

150

00:07:03,589 --> 00:07:00,060

asteroid and not space junk the new

151
00:07:06,650 --> 00:07:03,599
observations confirm that 2016 ho3 is a

152
00:07:09,920 --> 00:07:06,660
natural object of similar provenance to

153
00:07:13,640 --> 00:07:09,930
other small NGOs that zip by the earth

154
00:07:16,370 --> 00:07:13,650
every month a one of visualize ho3 zorb

155
00:07:18,830 --> 00:07:16,380
'it's well it's suggested here one way

156
00:07:22,279 --> 00:07:18,840
to do that is by picturing of all things

157
00:07:24,890 --> 00:07:22,289
a hula hoop dancer the Sun in this

158
00:07:27,559 --> 00:07:24,900
analogy twirling two hoops around the

159
00:07:31,219 --> 00:07:27,569
hips at the same time ever so slightly

160
00:07:33,770 --> 00:07:31,229
out of sync while it orbits the Sun the

161
00:07:36,260 --> 00:07:33,780
object makes yearly loops around the

162
00:07:38,600 --> 00:07:36,270
earth there's a link here to a YouTube

163
00:07:40,670 --> 00:07:38,610

video you can watch this all happen

164

00:07:43,850 --> 00:07:40,680

we'll post that link later at UFO

165

00:07:46,820 --> 00:07:43,860

headline news calm and as a result of

166

00:07:49,909 --> 00:07:46,830

this motion the object appears to orbit

167

00:07:52,939 --> 00:07:49,919

Earth but it's not gravitationally bound

168

00:07:56,089 --> 00:07:52,949

to our planet here's a quote from a

169

00:07:58,879 --> 00:07:56,099

Christian Villette he is the director of

170

00:08:01,909 --> 00:07:58,889

that LBT Observatory he says quote of

171

00:08:04,159 --> 00:08:01,919

the near-earth objects we know of these

172

00:08:05,930 --> 00:08:04,169

types of objects would be the easiest to

173

00:08:09,200 --> 00:08:05,940

reach so they could potentially make

174

00:08:12,469 --> 00:08:09,210

suitable targets for exploration with

175

00:08:14,870 --> 00:08:12,479

its binocular arrangement of 28.4 meter

176

00:08:17,390 --> 00:08:14,880

mirrors coupled with a very efficient

177

00:08:21,170 --> 00:08:17,400

pair of imagers and spectrographs this

178

00:08:23,480 --> 00:08:21,180

LBT large binocular telescope is ideally

179

00:08:27,080 --> 00:08:23,490

suited to the characterization of these

180

00:08:29,839 --> 00:08:27,090

Earth's companions and quotes while

181

00:08:32,329 --> 00:08:29,849

we're out in outer space we find this

182

00:08:36,440 --> 00:08:32,339

headline written by Mike Wayne ER for

183

00:08:40,399 --> 00:08:36,450

BGR something is floating around Saturn

184

00:08:42,850 --> 00:08:40,409

and NASA isn't sure what it is several

185

00:08:45,920 --> 00:08:42,860

weeks ago NASA's Cassini spacecraft

186

00:08:48,199 --> 00:08:45,930

performed its final fateful dive into

187

00:08:50,810 --> 00:08:48,209

Saturn destroying itself in the planet's

188

00:08:53,030 --> 00:08:50,820

atmosphere and ending that incredible

189

00:08:54,070 --> 00:08:53,040

mission that spanned nearly two full

190

00:08:56,769 --> 00:08:54,080

decades

191

00:08:59,199 --> 00:08:56,779

today even though its mechanical body

192

00:09:01,060 --> 00:08:59,209

has been vaporized the information it

193

00:09:04,269 --> 00:09:01,070

sent back during its time in orbit

194

00:09:06,850 --> 00:09:04,279

continues to surprise scientists the

195

00:09:09,430 --> 00:09:06,860

most recent example of this is a newly

196

00:09:12,100 --> 00:09:09,440

discovered quark within Saturn's

197

00:09:15,190 --> 00:09:12,110

atmosphere a quark which researchers are

198

00:09:17,440 --> 00:09:15,200

struggling to explain during Cassini's

199

00:09:20,650 --> 00:09:17,450

daring trips between Saturn and its

200

00:09:23,319 --> 00:09:20,660

iconic rings the spacecraft's powerful

201
00:09:25,389 --> 00:09:23,329
mass spectrometer picked up a puzzling

202
00:09:28,420 --> 00:09:25,399
mix of chemicals that made NASA

203
00:09:29,650 --> 00:09:28,430
scientists scratch their heads the most

204
00:09:32,699 --> 00:09:29,660
likely explanation

205
00:09:35,170 --> 00:09:32,709
Saturn's gorgeous rings are shedding

206
00:09:35,639 --> 00:09:35,180
Cassini's discovery wasn't just blind

207
00:09:38,019 --> 00:09:35,649
luck

208
00:09:41,019 --> 00:09:38,029
NASA's earlier missions dating back to

209
00:09:42,819 --> 00:09:41,029
the 1970s provided data which suggested

210
00:09:46,000 --> 00:09:42,829
that Saturn's upper atmosphere was

211
00:09:47,920 --> 00:09:46,010
littered with bits of ice and scientists

212
00:09:50,829 --> 00:09:47,930
believed it was coming off of the

213
00:09:52,900 --> 00:09:50,839

planet's rings in an effort to test this

214

00:09:56,079 --> 00:09:52,910

theory Cassini checked it out for itself

215

00:09:59,050 --> 00:09:56,089

finding not water but methane and

216

00:10:01,240 --> 00:09:59,060

potentially carbon monoxide other

217

00:10:03,790 --> 00:10:01,250

unidentified molecules were also

218

00:10:06,250 --> 00:10:03,800

detected and scientists are still trying

219

00:10:08,410 --> 00:10:06,260

to isolate what exactly they could be

220

00:10:10,750 --> 00:10:08,420

the concentrations of these chemicals

221

00:10:13,329 --> 00:10:10,760

are greater near the planets equator

222

00:10:15,579 --> 00:10:13,339

which points out once again the

223

00:10:18,970 --> 00:10:15,589

possibility that the material is raining

224

00:10:20,860 --> 00:10:18,980

down on Saturn from its own rings that

225

00:10:22,660 --> 00:10:20,870

makes sense but there are still some

226

00:10:25,420 --> 00:10:22,670

very puzzling questions that haven't

227

00:10:27,220 --> 00:10:25,430

been answered including the process by

228

00:10:29,590 --> 00:10:27,230

which these particles depart from the

229

00:10:32,319 --> 00:10:29,600

Rings and find their way to the planet's

230

00:10:34,000 --> 00:10:32,329

surface quote we have a lot of work to

231

00:10:36,069 --> 00:10:34,010

do to understand how they're getting in

232

00:10:38,500 --> 00:10:36,079

there and quotes that's from planetary

233

00:10:40,360 --> 00:10:38,510

scientist Mark Perry of Johns Hopkins

234

00:10:43,870 --> 00:10:40,370

University it's the Applied Physics

235

00:10:46,060 --> 00:10:43,880

Laboratory part he explains quote none

236

00:10:48,210 --> 00:10:46,070

of the models predict this end quotes

237

00:10:51,160 --> 00:10:48,220

this is a completely unexpected

238

00:10:53,500 --> 00:10:51,170

discovery and one that will surely lead

239

00:10:55,930 --> 00:10:53,510

to further theories about how Saturn and

240

00:10:58,180 --> 00:10:55,940

its rings behaved without the Cassini

241

00:11:00,819 --> 00:10:58,190

there to provide further data those

242

00:11:02,500 --> 00:11:00,829

answers might be hard to come by NASA

243

00:11:04,810 --> 00:11:02,510

doesn't currently have any concrete

244

00:11:06,819 --> 00:11:04,820

plans to return to Saturn though there

245

00:11:07,369 --> 00:11:06,829

are a reported handful of proposed

246

00:11:10,159 --> 00:11:07,379

mission

247

00:11:14,269 --> 00:11:10,169

that could see yet another robotic probe

248

00:11:18,049 --> 00:11:14,279

head to that ringed planet mysteries

249

00:11:20,419 --> 00:11:18,059

within mysteries rings upon rings shall

250

00:11:24,229 --> 00:11:20,429

we say we're about to suit up and jump

251
00:11:26,719 --> 00:11:24,239
into that UFO stalker comm UFO report

252
00:11:28,729 --> 00:11:26,729
machine but before we do this is the

253
00:11:31,159 --> 00:11:28,739
part where we again invite you to join

254
00:11:34,249 --> 00:11:31,169
us as we venture off the beaten path

255
00:11:37,099 --> 00:11:34,259
it's the same slot as the UFO headline

256
00:11:39,289 --> 00:11:37,109
news but we go off that beaten path

257
00:11:42,199 --> 00:11:39,299
tomorrow we've got a story about how an

258
00:11:45,349 --> 00:11:42,209
archaeologist has spotted hundreds of

259
00:11:47,749 --> 00:11:45,359
mysterious ancient stone gates

260
00:11:49,879 --> 00:11:47,759
thanks to Google Earth and it seems

261
00:11:52,399 --> 00:11:49,889
there might be some hardcore science

262
00:11:54,739 --> 00:11:52,409
substantiation of something many of us

263
00:11:56,960 --> 00:11:54,749

have believed for a long time that when

264

00:12:00,199 --> 00:11:56,970

we die we still have a bit of

265

00:12:02,779 --> 00:12:00,209

consciousness remaining for longer than

266

00:12:04,549 --> 00:12:02,789

previously thought and we'll toss in

267

00:12:07,819 --> 00:12:04,559

some of the latest sightings of that

268

00:12:09,679 --> 00:12:07,829

mysterious Chicago phantom we hope you

269

00:12:11,689 --> 00:12:09,689

can squeeze us into your weekend

270

00:12:14,299 --> 00:12:11,699

listening schedule right here on

271

00:12:16,639 --> 00:12:14,309

inception radio network voice of the

272

00:12:18,949 --> 00:12:16,649

fringe majority speaking of Chicago

273

00:12:21,859 --> 00:12:18,959

we'll start with a black triangle

274

00:12:23,509 --> 00:12:21,869

sighting in Rockford not too far away

275

00:12:25,909 --> 00:12:23,519

Rockford Illinois

276
00:12:28,579 --> 00:12:25,919
this is MUFON case number eight seven

277
00:12:31,879 --> 00:12:28,589
four zero seven the date of the sighting

278
00:12:35,109 --> 00:12:31,889
is the 16th of October 2017 and it got a

279
00:12:37,759 --> 00:12:35,119
next-day report here's the summary

280
00:12:41,590 --> 00:12:37,769
triangular-shaped craft seen hovering

281
00:12:44,979 --> 00:12:41,600
towards residents and then pause hover

282
00:12:47,599 --> 00:12:44,989
stationary and then a continued path

283
00:12:49,429 --> 00:12:47,609
there are citing specifics here that

284
00:12:53,629 --> 00:12:49,439
tell us the viewing distance initially

285
00:12:56,239 --> 00:12:53,639
was 101 feet eventually 500 feet the

286
00:12:58,399 --> 00:12:56,249
altitude was treetop the duration of

287
00:13:00,529 --> 00:12:58,409
this sighting was two minutes and the

288
00:13:03,559 --> 00:13:00,539

object features get a description of

289

00:13:06,319 --> 00:13:03,569

patterned surface and wings the flight

290

00:13:09,109 --> 00:13:06,329

path was hovering then path and then a

291

00:13:11,839 --> 00:13:09,119

straight-line path and then a path and

292

00:13:14,109 --> 00:13:11,849

then more a hovering and quite obviously

293

00:13:17,090 --> 00:13:14,119

this object was shaped like a triangle

294

00:13:19,340 --> 00:13:17,100

the event well-lit seemed to go

295

00:13:21,500 --> 00:13:19,350

something like this first-person words

296

00:13:23,170 --> 00:13:21,510

of our witness why

297

00:13:25,940 --> 00:13:23,180

visiting my father in Rockford Illinois

298

00:13:29,240 --> 00:13:25,950

approximately two hours after having a

299

00:13:32,240 --> 00:13:29,250

20-minute conversation about UFOs and

300

00:13:34,520 --> 00:13:32,250

the government's role in these crafts my

301
00:13:37,100 --> 00:13:34,530
father witnessed a triangular-shaped

302
00:13:39,170 --> 00:13:37,110
craft hovering just above the treetops

303
00:13:42,080 --> 00:13:39,180
and above the houses across the street

304
00:13:45,440 --> 00:13:42,090
and towards his home he saw this through

305
00:13:45,890 --> 00:13:45,450
the front bay window my father said look

306
00:13:48,830 --> 00:13:45,900
son

307
00:13:50,450 --> 00:13:48,840
there's your UFO I laughed it off

308
00:13:53,090 --> 00:13:50,460
because I thought he was making fun of

309
00:13:54,050 --> 00:13:53,100
me but about five seconds later I took

310
00:13:58,370 --> 00:13:54,060
him seriously

311
00:14:01,220 --> 00:13:58,380
I looked what I saw was a triangular

312
00:14:04,280 --> 00:14:01,230
shaped craft with four to six off white

313
00:14:05,210 --> 00:14:04,290

to yellowish lights shining down on the

314

00:14:08,480 --> 00:14:05,220

ground

315

00:14:10,940 --> 00:14:08,490

this craft had red white and blue lights

316

00:14:13,400 --> 00:14:10,950

on the side these lights seemed to be

317

00:14:16,130 --> 00:14:13,410

chasing each other in a sequential

318

00:14:18,500 --> 00:14:16,140

pattern I ran outside to get a closer

319

00:14:21,080 --> 00:14:18,510

look and the craft began to continue its

320

00:14:24,140 --> 00:14:21,090

path from east to west behind the trees

321

00:14:25,450 --> 00:14:24,150

behind those houses next door it went

322

00:14:28,040 --> 00:14:25,460

out of sight

323

00:14:31,280 --> 00:14:28,050

we stayed outside for about 30 minutes

324

00:14:33,740 --> 00:14:31,290

and saw another craft which we thought

325

00:14:36,680 --> 00:14:33,750

might be the same it was making the same

326

00:14:39,080 --> 00:14:36,690

path from east to west it had lights

327

00:14:41,330 --> 00:14:39,090

underneath and flashing lights on the

328

00:14:44,390 --> 00:14:41,340

side but it did seem to be a different

329

00:14:47,300 --> 00:14:44,400

craft because this craft made noise like

330

00:14:49,280 --> 00:14:47,310

a plane it left a jet stream whereas

331

00:14:53,030 --> 00:14:49,290

this first craft we watched made no

332

00:14:55,850 --> 00:14:53,040

noise had no jet stream no disruption to

333

00:14:57,770 --> 00:14:55,860

the atmosphere surrounding it I did

334

00:15:01,100 --> 00:14:57,780

catch this second craft on video I

335

00:15:01,940 --> 00:15:01,110

didn't submit it but I did not catch the

336

00:15:04,280 --> 00:15:01,950

first craft

337

00:15:07,730 --> 00:15:04,290

now the second craft definitely looks

338

00:15:10,400 --> 00:15:07,740

like a plane however what was awkward

339

00:15:12,740 --> 00:15:10,410

was the lights underneath this plane and

340

00:15:15,320 --> 00:15:12,750

the lights on the side of it we don't

341

00:15:17,990 --> 00:15:15,330

see normal aircraft with those lights I

342

00:15:20,840 --> 00:15:18,000

work for an airline and my father works

343

00:15:24,160 --> 00:15:20,850

for aerospace manufacturing so you might

344

00:15:26,900 --> 00:15:24,170

say we're somewhat familiar with planes

345

00:15:30,260 --> 00:15:26,910

yep always interesting to have that

346

00:15:32,840 --> 00:15:30,270

professional take on what's up there by

347

00:15:35,450 --> 00:15:32,850

process of elimination it's often easy

348

00:15:38,440 --> 00:15:35,460

for people like that to determine what

349

00:15:42,530 --> 00:15:38,450

isn't however determining what it is

350

00:15:46,490 --> 00:15:42,540

another question all together let's go

351
00:15:49,220 --> 00:15:46,500
to Redding Kansas spelled Rea D ing

352
00:15:52,460 --> 00:15:49,230
that's the setting for MUFON sighting

353
00:15:55,550 --> 00:15:52,470
number 8 7 3 8 1 the date of this

354
00:15:57,940 --> 00:15:55,560
sighting is October 16th 2017 it got a

355
00:16:00,410 --> 00:15:57,950
same-day submission here's the summary

356
00:16:03,380 --> 00:16:00,420
orange ball in the sky

357
00:16:06,889 --> 00:16:03,390
disappeared and then another appeared

358
00:16:10,250 --> 00:16:06,899
and so on happened four times until the

359
00:16:12,110 --> 00:16:10,260
final ball faded out the sighting

360
00:16:15,050 --> 00:16:12,120
specifics indicate a viewing distance

361
00:16:17,750 --> 00:16:15,060
unknown as well as the altitude it was

362
00:16:20,470 --> 00:16:17,760
also unknown the sighting duration was

363
00:16:24,590 --> 00:16:20,480

three minutes object features unknown

364

00:16:26,570 --> 00:16:24,600

flight path straight-line path and our

365

00:16:29,480 --> 00:16:26,580

witness reports this object was shaped

366

00:16:33,350 --> 00:16:29,490

like a sphere no mention of the

367

00:16:35,480 --> 00:16:33,360

meteorology so let's just proceed I was

368

00:16:38,780 --> 00:16:35,490

leaving my house around 9:00 and my road

369

00:16:41,630 --> 00:16:38,790

goes east to west so I was driving and I

370

00:16:45,140 --> 00:16:41,640

looked south often as I Drive I watched

371

00:16:47,960 --> 00:16:45,150

the stars I noticed a bright orange

372

00:16:48,920 --> 00:16:47,970

yellow light at first it resembled a

373

00:16:51,949 --> 00:16:48,930

star or planet

374

00:16:55,100 --> 00:16:51,959

I was surprised I'd never seen a star

375

00:16:57,710 --> 00:16:55,110

that bright in a southerly direction so

376

00:17:00,710 --> 00:16:57,720

I stopped my car and watched it as I

377

00:17:02,750 --> 00:17:00,720

watched it this thing faded out and then

378

00:17:07,100 --> 00:17:02,760

reappeared right next to its original

379

00:17:09,199 --> 00:17:07,110

location it faded again again appearing

380

00:17:12,770 --> 00:17:09,209

just next to where it had previously

381

00:17:16,520 --> 00:17:12,780

been and then once again once more on

382

00:17:19,699 --> 00:17:16,530

this final reappear the object faded out

383

00:17:22,579 --> 00:17:19,709

and it didn't return incidentally I've

384

00:17:27,350 --> 00:17:22,589

seen this happen twice before now in the

385

00:17:29,960 --> 00:17:27,360

same area same direction hmmm what's

386

00:17:32,750 --> 00:17:29,970

flying around over Redding Kansas and

387

00:17:35,390 --> 00:17:32,760

again we have that orange color in this

388

00:17:37,940 --> 00:17:35,400

case orange yellow hang on we found

389

00:17:41,299 --> 00:17:37,950

something more orange we've got a zip to

390

00:17:44,120 --> 00:17:41,309

North Carolina the city of spruce pine

391

00:17:46,610 --> 00:17:44,130

its MUFON Case eight seven four seven

392

00:17:47,950 --> 00:17:46,620

zero the date of this sighting was back

393

00:17:51,370 --> 00:17:47,960

in July actually

394

00:17:53,710 --> 00:17:51,380

on the 20th it was reported October 20th

395

00:17:57,850 --> 00:17:53,720

a bit later but here's the summary

396

00:18:00,480 --> 00:17:57,860

bright orange orbs they hover then move

397

00:18:03,610 --> 00:18:00,490

instantly left to right stop

398

00:18:06,460 --> 00:18:03,620

automatically never seen anything like

399

00:18:10,090 --> 00:18:06,470

this you see them every night it is

400

00:18:12,460 --> 00:18:10,100

insane and that's just the summary from

401
00:18:14,169 --> 00:18:12,470
our witness they report under sighting

402
00:18:18,039 --> 00:18:14,179
specifics of viewing distance that was

403
00:18:20,740 --> 00:18:18,049
over 1 mile an altitude treetop 500 feet

404
00:18:23,789 --> 00:18:20,750
or less the duration of this sighting

405
00:18:26,649 --> 00:18:23,799
was two hours but in spite of that

406
00:18:29,620 --> 00:18:26,659
vexing ly the object features just get a

407
00:18:32,320 --> 00:18:29,630
report of none the object flight path

408
00:18:35,019 --> 00:18:32,330
was stationary hovering and then path a

409
00:18:37,570 --> 00:18:35,029
straight-line path and then a path

410
00:18:39,370 --> 00:18:37,580
including a directional change and they

411
00:18:43,060 --> 00:18:39,380
described the shape of these objects as

412
00:18:45,159 --> 00:18:43,070
fireball it seems that it was about

413
00:18:47,409 --> 00:18:45,169

10:00 p.m. me and my boyfriend were

414

00:18:51,159 --> 00:18:47,419

driving in the Blue Ridge Parkway where

415

00:18:54,430 --> 00:18:51,169

we live close and I looked over and I

416

00:18:57,250 --> 00:18:54,440

saw a bright orange orb coming up above

417

00:19:00,130 --> 00:18:57,260

the treetops we got out of the car and

418

00:19:03,100 --> 00:19:00,140

we watched these things for two hours

419

00:19:06,580 --> 00:19:03,110

they were doing weird maneuvers and

420

00:19:08,380 --> 00:19:06,590

vanishing instantly actually we've been

421

00:19:10,899 --> 00:19:08,390

watching these things for about three or

422

00:19:13,990 --> 00:19:10,909

four months now they show up almost

423

00:19:16,630 --> 00:19:14,000

every other night when I first saw these

424

00:19:19,570 --> 00:19:16,640

orbs what I thought was their Chinese

425

00:19:23,080 --> 00:19:19,580

lanterns but they were way too bright

426

00:19:25,870 --> 00:19:23,090

and at such a distance well I also

427

00:19:28,510 --> 00:19:25,880

thought could it be a military object

428

00:19:31,720 --> 00:19:28,520

but after observing them more than once

429

00:19:34,779 --> 00:19:31,730

there's absolutely no way they move so

430

00:19:38,110 --> 00:19:34,789

quick and then instantly come to a stop

431

00:19:40,269 --> 00:19:38,120

and just hover they'll come up move

432

00:19:41,049 --> 00:19:40,279

around a bit and then go out like a

433

00:19:44,830 --> 00:19:41,059

light

434

00:19:47,830 --> 00:19:44,840

I sat and watched 13 of these things

435

00:19:51,340 --> 00:19:47,840

come up one after the other there's no

436

00:19:54,039 --> 00:19:51,350

doubt in my mind it's UFOs and it's a

437

00:19:55,870 --> 00:19:54,049

guarantee if you come you will see them

438

00:19:59,289 --> 00:19:55,880

I've never seen anything like this

439

00:20:01,660 --> 00:19:59,299

absolutely amazes me we show them to

440

00:20:05,410 --> 00:20:01,670

people all the time but they have

441

00:20:07,570 --> 00:20:05,420

no idea what it possibly could be these

442

00:20:10,720 --> 00:20:07,580

things amaze everybody who sees them I

443

00:20:13,090 --> 00:20:10,730

can never unfortunately capture them on

444

00:20:15,730 --> 00:20:13,100

a camera very well because my phone

445

00:20:19,240 --> 00:20:15,740

isn't so good so I can't even submit

446

00:20:22,450 --> 00:20:19,250

video sadly but it's an amazing thing to

447

00:20:26,020 --> 00:20:22,460

see so contact me if you can Thank You

448

00:20:28,630 --> 00:20:26,030

Sabrina and by contact her we're pretty

449

00:20:30,280 --> 00:20:28,640

sure she means move on however there is

450

00:20:33,040 --> 00:20:30,290

a place underneath each sighting where

451
00:20:36,070 --> 00:20:33,050
you can do just that we say thank you

452
00:20:38,980 --> 00:20:36,080
Sabrina and we say thank you Gentiles

453
00:20:41,710 --> 00:20:38,990
for joining us on our weekly UFO

454
00:20:45,010 --> 00:20:41,720
journeys but as it is we've got to say

455
00:20:47,830 --> 00:20:45,020
goodbye for now because that's a wrap

456
00:20:50,820 --> 00:20:47,840
follow today's broadcast at UFO headline

457
00:20:53,020 --> 00:20:50,830
news calm or I Heart Radio

458
00:20:55,480 --> 00:20:53,030
loving-kindness take care of each other

459
00:21:00,640 --> 00:20:55,490
we're all in this together this is Carol

460
00:21:02,170 --> 00:21:00,650
Carl see you tomorrow I just saved

461
00:21:04,720 --> 00:21:02,180
hundreds of dollars by switching to

462
00:21:06,850 --> 00:21:04,730
Geico I've never felt more alive

463
00:21:08,260 --> 00:21:06,860

disclaimer Geico cannot guarantee you

464

00:21:09,580 --> 00:21:08,270

will feel more alive you either

465

00:21:11,320 --> 00:21:09,590

possessed functioning respiratory and

466

00:21:12,910 --> 00:21:11,330

circulatory systems or you do not oh you

467

00:21:14,230 --> 00:21:12,920

are a zombie if you are indeed a brain

468

00:21:15,130 --> 00:21:14,240

starves Omni and you would like to save

469

00:21:16,360 --> 00:21:15,140

money on car insurance

470

00:21:17,830 --> 00:21:16,370

the Geico legal team applaud your

471

00:21:19,390 --> 00:21:17,840

excellent life choices even in your

472

00:21:20,950 --> 00:21:19,400

shambling afterlife but we strongly

473

00:21:22,330 --> 00:21:20,960

encourage you to visit Geico calm or

474

00:21:23,800 --> 00:21:22,340

download the Geico app please stay a

475

00:21:25,450 --> 00:21:23,810

minimum of 500 feet away from our large

476

00:21:28,090 --> 00:21:25,460

and presumably delicious delicious
