

UFO Headline News | Thursday October 19th, 2017

Listen on

inceptionradionetwork.com

1
00:00:05,780 --> 00:00:03,379
Thanks October 19th 2017 you are

2
00:00:08,600 --> 00:00:05,790
listening to inception Radio Network

3
00:00:13,549 --> 00:00:08,610
voice of the fringe majority this is

4
00:00:15,860 --> 00:00:13,559
Carol Karl with the UFO news let's see

5
00:00:18,680 --> 00:00:15,870
what's up for the sky watching part of

6
00:00:22,130 --> 00:00:18,690
our day at the end of the day the

7
00:00:24,529 --> 00:00:22,140
headline is Uranus at opposition tonight

8
00:00:28,339 --> 00:00:24,539
Bruce McClure writes this for Earth's

9
00:00:30,500 --> 00:00:28,349
sky dorg that planet Uranus the seventh

10
00:00:33,380 --> 00:00:30,510
planet outward from the Sun is at

11
00:00:36,290 --> 00:00:33,390
opposition in other words our planet

12
00:00:38,869 --> 00:00:36,300
Earth in its smaller faster orbit swings

13
00:00:41,720 --> 00:00:38,879

in between the Sun and Uranus today

14

00:00:44,990 --> 00:00:41,730

placing Uranus opposite the Sun in our

15

00:00:47,170 --> 00:00:45,000

sky and because Uranus is opposite the

16

00:00:49,819 --> 00:00:47,180

Sun it rises in the East at sunset

17

00:00:52,130 --> 00:00:49,829

climbs highest up for the night at

18

00:00:54,880 --> 00:00:52,140

midnight midway between sunset and

19

00:00:57,889 --> 00:00:54,890

sunrise and sets in the west at sunrise

20

00:01:00,529 --> 00:00:57,899

not only does your ana stay out all

21

00:01:02,689 --> 00:01:00,539

night long but this world is now coming

22

00:01:05,750 --> 00:01:02,699

closest to Earth for the entire year

23

00:01:08,690 --> 00:01:05,760

shining at its brightest best in our sky

24

00:01:09,980 --> 00:01:08,700

but even at its brightest Uranus is

25

00:01:12,859 --> 00:01:09,990

still quite faint

26

00:01:15,469 --> 00:01:12,869

in fact it's barely perceptible as a dim

27

00:01:19,399 --> 00:01:15,479

speck of light to the unaided eye at a

28

00:01:21,380 --> 00:01:19,409

magnitude of 5.68 Uranus shines no more

29

00:01:25,039 --> 00:01:21,390

brilliantly than the skies faintest

30

00:01:27,440 --> 00:01:25,049

stars in fact but given a dark sky free

31

00:01:29,899 --> 00:01:27,450

of light pollution you might see Uranus

32

00:01:32,090 --> 00:01:29,909

with the eye alone but you've got to

33

00:01:34,069 --> 00:01:32,100

know exactly where to look for this

34

00:01:37,160 --> 00:01:34,079

distant world in front of the rather

35

00:01:39,410 --> 00:01:37,170

faint constellation Pisces and yes there

36

00:01:41,780 --> 00:01:39,420

will be a constellation chart thanks to

37

00:01:44,359 --> 00:01:41,790

earth sky org you can find it later by

38

00:01:47,420 --> 00:01:44,369

simply heading on over to UFO headline

39

00:01:49,609 --> 00:01:47,430

news calm it's all neat and tidy the

40

00:01:52,100 --> 00:01:49,619

earth sky dot-org people have labeled

41

00:01:55,190 --> 00:01:52,110

the star Omicron Pi cesium in the

42

00:01:57,530 --> 00:01:55,200

constellation Pisces just for you this

43

00:02:00,230 --> 00:01:57,540

star which is visible to the eye alone

44

00:02:03,380 --> 00:02:00,240

on a dark night is close to the ecliptic

45

00:02:05,740 --> 00:02:03,390

in the sky chart at the far eastern left

46

00:02:09,589 --> 00:02:05,750

portion of that constellation Pisces

47

00:02:13,430 --> 00:02:09,599

once you find this star try hopping that

48

00:02:15,680 --> 00:02:13,440

star hop dance from there to Uranus as

49

00:02:18,410 --> 00:02:15,690

fortune would have it this year the new

50

00:02:20,720 --> 00:02:18,420

moon a mon most nearly between the Earth

51
00:02:23,810 --> 00:02:20,730
and Sun for this month falls October

52
00:02:26,680 --> 00:02:23,820
19th at nearly the same hour that Uranus

53
00:02:31,370 --> 00:02:26,690
reaches opposition the time for that

54
00:02:33,650 --> 00:02:31,380
1912 UTC the moon will turn new and that

55
00:02:36,830 --> 00:02:33,660
means there'll be no pesky moonlight to

56
00:02:38,810 --> 00:02:36,840
wash out the 2017 Uranus opposition take

57
00:02:41,330 --> 00:02:38,820
advantage of the moon free night tonight

58
00:02:43,520 --> 00:02:41,340
because next year's opposition of Uranus

59
00:02:45,770 --> 00:02:43,530
will fall on the same day as the full

60
00:02:49,160 --> 00:02:45,780
moon and good luck with that

61
00:02:51,710 --> 00:02:49,170
that'll be October 24th 2018 and mark

62
00:02:52,280 --> 00:02:51,720
your calendar even at its closest point

63
00:02:55,010 --> 00:02:52,290

to earth

64

00:02:55,760 --> 00:02:55,020

Uranus does not come particularly close

65

00:02:58,880 --> 00:02:55,770

to Earth

66

00:03:01,040 --> 00:02:58,890

it'll be just shy of 19 astronomical

67

00:03:03,860 --> 00:03:01,050

units away from Earth and 20

68

00:03:06,440 --> 00:03:03,870

astronomical units from the Sun oh the

69

00:03:08,960 --> 00:03:06,450

astronomical unit by the way it says

70

00:03:11,540 --> 00:03:08,970

here one astronomical unit equals the

71

00:03:13,760 --> 00:03:11,550

sun-earth distance if you've got that

72

00:03:16,070 --> 00:03:13,770

pair of trusty binoculars Uranus is

73

00:03:18,949 --> 00:03:16,080

quite easy to view although it will only

74

00:03:20,990 --> 00:03:18,959

look like a rather faint star and again

75

00:03:23,240 --> 00:03:21,000

you've got to know precisely where to

76
00:03:26,449 --> 00:03:23,250
look to find the seventh planet from the

77
00:03:28,250 --> 00:03:26,459
Sun your best bet is to find a good sky

78
00:03:30,979 --> 00:03:28,260
chart and we told you where to get that

79
00:03:34,070 --> 00:03:30,989
and then do that star hop from the 4th

80
00:03:35,990 --> 00:03:34,080
magnitude star Omicron Pi see'em fairly

81
00:03:38,600 --> 00:03:36,000
easy to see with your eye alone on a

82
00:03:41,630 --> 00:03:38,610
dark night follow that star to the

83
00:03:45,229 --> 00:03:41,640
planet Uranus and here's the bottom line

84
00:03:48,110 --> 00:03:45,239
on October 19 2017 the planet Uranus

85
00:03:51,229 --> 00:03:48,120
reaches up position and the moon turns

86
00:03:53,390 --> 00:03:51,239
new good news for providing a dark sky

87
00:03:57,340 --> 00:03:53,400
for viewing Uranus in front of the

88
00:04:01,250 --> 00:03:57,350

constellation Pisces good luck headline

89

00:04:04,640 --> 00:04:01,260

gravitational waves neutron stars killer

90

00:04:07,370 --> 00:04:04,650

Nova's what the new physics announcement

91

00:04:10,430 --> 00:04:07,380

means this is from the Washington Post

92

00:04:13,640 --> 00:04:10,440

calm with a byline for Benoit Reno and

93

00:04:16,370 --> 00:04:13,650

Sarah Kaplan let's rewind a bit on

94

00:04:18,740 --> 00:04:16,380

Monday scientists announced the first

95

00:04:21,010 --> 00:04:18,750

observation of a cosmic event using

96

00:04:23,719 --> 00:04:21,020

gravitational wave detectors and

97

00:04:26,779 --> 00:04:23,729

conventional telescopes what they

98

00:04:27,370 --> 00:04:26,789

witnessed was a kill ANOVA they spell

99

00:04:32,050 --> 00:04:27,380

that

100

00:04:33,880 --> 00:04:32,060

ILO Nov a a violent brilliant explosion

101

00:04:37,570 --> 00:04:33,890

that occurs when two neutron stars

102

00:04:40,090 --> 00:04:37,580

collide the discovery was a massive

103

00:04:41,980 --> 00:04:40,100

undertaking thousands of researchers

104

00:04:44,230 --> 00:04:41,990

from diverse fields in physics and

105

00:04:46,810 --> 00:04:44,240

astronomy played crucial roles and

106

00:04:50,110 --> 00:04:46,820

there's a lot of science to understand

107

00:04:52,720 --> 00:04:50,120

so here are some answers to basic

108

00:04:56,290 --> 00:04:52,730

questions about Monday's news

109

00:04:59,860 --> 00:04:56,300

it begins remind me what our

110

00:05:03,400 --> 00:04:59,870

gravitational waves again gravitational

111

00:05:06,100 --> 00:05:03,410

waves are ripples in space-time caused

112

00:05:08,470 --> 00:05:06,110

by cosmic events they travel at the same

113

00:05:10,960 --> 00:05:08,480

speed as light their existence was first

114

00:05:12,760 --> 00:05:10,970

predicted by Albert Einstein as a

115

00:05:15,970 --> 00:05:12,770

byproduct of his theory of general

116

00:05:18,400 --> 00:05:15,980

relativity you see Einstein had figured

117

00:05:21,820 --> 00:05:18,410

out that gravity was a consequence of

118

00:05:24,250 --> 00:05:21,830

the way mass warps space-time heavy

119

00:05:26,850 --> 00:05:24,260

objects it in the fabric of the universe

120

00:05:29,890 --> 00:05:26,860

like bowling balls on a trampoline

121

00:05:32,140 --> 00:05:29,900

curving the space around them that's why

122

00:05:34,420 --> 00:05:32,150

the moon orbits planets and planets

123

00:05:37,090 --> 00:05:34,430

orbit the Sun not because they're

124

00:05:39,220 --> 00:05:37,100

attached by some cosmic leash but

125

00:05:42,070 --> 00:05:39,230

because space-time is curling around

126

00:05:44,380 --> 00:05:42,080

this larger object and they're caught in

127

00:05:46,930 --> 00:05:44,390

the whirlpool sticking with that

128

00:05:49,450 --> 00:05:46,940

trampoline metaphor gravitational waves

129

00:05:51,850 --> 00:05:49,460

are what might happen if you smash two

130

00:05:55,540 --> 00:05:51,860

bowling balls together and cause them to

131

00:05:57,940 --> 00:05:55,550

explode that Cataclysm would vibrate the

132

00:06:01,390 --> 00:05:57,950

fabric of the trampoline sending ripples

133

00:06:04,930 --> 00:06:01,400

out toward the edge when two black holes

134

00:06:06,700 --> 00:06:04,940

collide or when neutron stars merge the

135

00:06:10,210 --> 00:06:06,710

gravitational waves from that event

136

00:06:13,810 --> 00:06:10,220

ripple through the universe so what's a

137

00:06:16,630 --> 00:06:13,820

neutron star neutron stars are formed

138

00:06:19,060 --> 00:06:16,640

when an aging mid-sized star about four

139

00:06:22,420 --> 00:06:19,070

to eight times bigger than our Sun goes

140

00:06:24,580 --> 00:06:22,430

supernova that is as the Stars outer

141

00:06:27,370 --> 00:06:24,590

layers are blown off the remnants

142

00:06:30,550 --> 00:06:27,380

collapse in on themselves forming a

143

00:06:32,770 --> 00:06:30,560

small compacted core so dense that a

144

00:06:36,370 --> 00:06:32,780

single teaspoon of matter would weigh a

145

00:06:38,620 --> 00:06:36,380

billion tons the neutron stars that

146

00:06:41,170 --> 00:06:38,630

collided to create the killer nova

147

00:06:44,080 --> 00:06:41,180

observed by astronomers were small

148

00:06:46,450 --> 00:06:44,090

not to fit inside the beltway but each

149

00:06:49,450 --> 00:06:46,460

contained as much matter as the Sun

150

00:06:51,430 --> 00:06:49,460

here's a quote from Andy Howell he's an

151
00:06:53,890 --> 00:06:51,440
astronomer at the california-based Las

152
00:06:55,830 --> 00:06:53,900
Cumbres Observatory and professor at

153
00:06:58,990 --> 00:06:55,840
University of California Santa Barbara

154
00:07:01,930 --> 00:06:59,000
quote it's the most tightly bound

155
00:07:05,140 --> 00:07:01,940
something can be and exist in our

156
00:07:07,840 --> 00:07:05,150
universe and quotes the intense gravity

157
00:07:09,969 --> 00:07:07,850
of a neutron star crushes its atoms

158
00:07:12,490 --> 00:07:09,979
compacting protons and electrons

159
00:07:15,580 --> 00:07:12,500
together until they combine to make

160
00:07:19,870 --> 00:07:15,590
neutrons subatomic particles with no

161
00:07:22,810 --> 00:07:19,880
charge at all so what happens during a

162
00:07:25,689 --> 00:07:22,820
kill Innova said Michael Siegel quote

163
00:07:29,140 --> 00:07:25,699

Nova is an ancient word it basically

164

00:07:30,969 --> 00:07:29,150

means new star and quotes Michael Siegel

165

00:07:33,659 --> 00:07:30,979

should know he's a Penn State University

166

00:07:36,129 --> 00:07:33,669

astronomer who leads the ultraviolet

167

00:07:39,219 --> 00:07:36,139

instrumentation team for NASA's Swift

168

00:07:41,529 --> 00:07:39,229

satellite stargazers of long ago

169

00:07:43,659 --> 00:07:41,539

observed new points of light in the

170

00:07:47,050 --> 00:07:43,669

night sky and assumed they'd witnessed

171

00:07:48,610 --> 00:07:47,060

the birth of infant stars but Nova

172

00:07:51,129 --> 00:07:48,620

that's a misnomer

173

00:07:53,830 --> 00:07:51,139

these Nova's weren't completely new

174

00:07:56,649 --> 00:07:53,840

objects rather they were existing Suns

175

00:07:59,920 --> 00:07:56,659

that flared up and spat out bright light

176

00:08:02,290 --> 00:07:59,930

before dying down scientists first

177

00:08:04,629 --> 00:08:02,300

coined that term Killa Nova about a

178

00:08:06,879 --> 00:08:04,639

decade ago when they calculated that

179

00:08:09,189 --> 00:08:06,889

there should be events roughly 1,000

180

00:08:11,800 --> 00:08:09,199

times brighter than that garden-variety

181

00:08:15,219 --> 00:08:11,810

cosmic Nova they're also sometimes

182

00:08:17,740 --> 00:08:15,229

called macro nova a term in Howells

183

00:08:20,290 --> 00:08:17,750

estimation that sounds quote stupid end

184

00:08:22,510 --> 00:08:20,300

quotes he says quote we're so early we

185

00:08:26,140 --> 00:08:22,520

don't have the terminology sorted out

186

00:08:28,390 --> 00:08:26,150

and quotes this Killa Nova lived up to

187

00:08:31,510 --> 00:08:28,400

its thousand times stronger namesake

188

00:08:33,219 --> 00:08:31,520

quote that was very satisfying said

189

00:08:35,800 --> 00:08:33,229

Columbia University theoretical

190

00:08:37,449 --> 00:08:35,810

astrophysicist Brian D Metzger whose

191

00:08:39,760 --> 00:08:37,459

work involves predicting the

192

00:08:42,760 --> 00:08:39,770

electromagnetic counterparts to

193

00:08:45,069 --> 00:08:42,770

gravitational waves neutron star

194

00:08:47,410 --> 00:08:45,079

collisions shoot Jets of radioactive

195

00:08:49,630 --> 00:08:47,420

matter into space they're expelled the

196

00:08:52,090 --> 00:08:49,640

guts beam out in a line

197

00:08:54,490 --> 00:08:52,100

Metzger said it was almost like smashing

198

00:08:56,920 --> 00:08:54,500

your palm on a full tube

199

00:09:00,070 --> 00:08:56,930

toothpaste a tube with holes at both

200

00:09:03,340 --> 00:09:00,080

ends he said quote a lot of matter will

201
00:09:04,840 --> 00:09:03,350
come flying out end quotes these are

202
00:09:08,080 --> 00:09:04,850
materials that the universe does not

203
00:09:11,490 --> 00:09:08,090
otherwise generate in bulk the neutron

204
00:09:15,430 --> 00:09:11,500
star merger turned out the equivalent of

205
00:09:19,120 --> 00:09:15,440
10,000 earth masses in gold and tens of

206
00:09:21,550 --> 00:09:19,130
thousand masses in uranium the focus is

207
00:09:26,230 --> 00:09:21,560
on the Cataclysm that occurred in galaxy

208
00:09:28,450 --> 00:09:26,240
NGC for 993 it suggests neutron star

209
00:09:30,850 --> 00:09:28,460
mergers are the dominant process by

210
00:09:33,520 --> 00:09:30,860
which the universe creates gold platinum

211
00:09:35,410 --> 00:09:33,530
and other elements said Metzker quote

212
00:09:38,320 --> 00:09:35,420
that's been a mystery for something like

213
00:09:40,540 --> 00:09:38,330

60 years and quotes these stars were

214

00:09:43,630 --> 00:09:40,550

probably twin stars in a binary system

215

00:09:46,090 --> 00:09:43,640

one after the other they became dead

216

00:09:48,610 --> 00:09:46,100

husks they circled each other

217

00:09:51,490 --> 00:09:48,620

shaking off gravitational waves which in

218

00:09:54,220 --> 00:09:51,500

turn pulled them closer together imagine

219

00:09:56,590 --> 00:09:54,230

two large marbles rolling toward the

220

00:10:00,130 --> 00:09:56,600

bottom of a funnel until they meet with

221

00:10:02,020 --> 00:10:00,140

a catastrophic whack there's lots more

222

00:10:04,720 --> 00:10:02,030

to this article gentle listeners it gets

223

00:10:07,210 --> 00:10:04,730

rather involved rather technical you can

224

00:10:10,600 --> 00:10:07,220

find a link to it later at UFO headline

225

00:10:13,060 --> 00:10:10,610

news calm but we'll close with this the

226

00:10:16,360 --> 00:10:13,070

question why were so many scientists

227

00:10:18,820 --> 00:10:16,370

involved something like 3500 names are

228

00:10:20,790 --> 00:10:18,830

on the author list of the biggest paper

229

00:10:23,560 --> 00:10:20,800

to come out about this observation

230

00:10:25,660 --> 00:10:23,570

according to scientist Dave shoemaker

231

00:10:28,270 --> 00:10:25,670

out of the Massachusetts Institute of

232

00:10:30,040 --> 00:10:28,280

Technology a spokesman for the LIGO

233

00:10:32,650 --> 00:10:30,050

scientific collaboration

234

00:10:34,900 --> 00:10:32,660

he said merging these two communities

235

00:10:37,600 --> 00:10:34,910

the physicists used two large

236

00:10:40,720 --> 00:10:37,610

collaborations with the astronomers some

237

00:10:43,090 --> 00:10:40,730

of whom weren't wasn't always easy in

238

00:10:45,430 --> 00:10:43,100

fact he said if he had done anything

239

00:10:47,350 --> 00:10:45,440

differently two months ago when the

240

00:10:50,380 --> 00:10:47,360

researchers realized they had a neutron

241

00:10:52,770 --> 00:10:50,390

star collision on their hands quote it

242

00:10:55,720 --> 00:10:52,780

would have been to read about the

243

00:10:58,450 --> 00:10:55,730

sociology of astronomy before making any

244

00:11:00,220 --> 00:10:58,460

decision to put papers together that

245

00:11:04,810 --> 00:11:00,230

would have saved a lot of stir mooned

246

00:11:07,750 --> 00:11:04,820

drung and quotes trending now one might

247

00:11:08,269 --> 00:11:07,760

say it seems to be drone week here's a

248

00:11:12,530 --> 00:11:08,279

headline

249

00:11:16,009 --> 00:11:12,540

CNN gets first-of-a-kind waiver to fly

250

00:11:18,319 --> 00:11:16,019

drones over crowds this gets a byline

251
00:11:22,249 --> 00:11:18,329
for Daryl Ethington who writes for

252
00:11:24,259 --> 00:11:22,259
TechCrunch CNN has won an interesting

253
00:11:27,980 --> 00:11:24,269
waiver regarding its commercial drone

254
00:11:30,530 --> 00:11:27,990
operating license with the FAA they got

255
00:11:34,189 --> 00:11:30,540
an exemption that allows it to fly its

256
00:11:36,980 --> 00:11:34,199
vantage robotics snap drone over open

257
00:11:41,389 --> 00:11:36,990
air crowds of people at altitudes of up

258
00:11:43,579 --> 00:11:41,399
to 150 feet this is a new precedent of

259
00:11:45,650 --> 00:11:43,589
this kind of waiver previous exemptions

260
00:11:48,139 --> 00:11:45,660
allowed flights of drones over people

261
00:11:50,629 --> 00:11:48,149
enclosed set operations such as

262
00:11:53,269 --> 00:11:50,639
filmmaking purposes and only when

263
00:11:56,480 --> 00:11:53,279

tethered with a maximum height of 21

264

00:11:58,819 --> 00:11:56,490

feet the new waiver granted to CNN has

265

00:12:01,790 --> 00:11:58,829

secured through its legal counsel Hogan

266

00:12:04,460 --> 00:12:01,800

Lovells allows for flight of this

267

00:12:07,519 --> 00:12:04,470

vantage UAV which is quite small and

268

00:12:10,579 --> 00:12:07,529

light above crowds regardless of

269

00:12:13,220 --> 00:12:10,589

population density this was a big win

270

00:12:15,350 --> 00:12:13,230

for the firm and the company because it

271

00:12:18,290 --> 00:12:15,360

represents a change in perspective on

272

00:12:20,360 --> 00:12:18,300

the issue for the FAA which previously

273

00:12:23,030 --> 00:12:20,370

viewed all requests for exemptions from

274

00:12:27,079 --> 00:12:23,040

a quote worst case scenario and quotes

275

00:12:29,889 --> 00:12:27,089

point of view now however the FAA has

276

00:12:33,049 --> 00:12:29,899

accepted cnn's quote reasonableness

277

00:12:35,090 --> 00:12:33,059

approach end quotes that takes into

278

00:12:37,670 --> 00:12:35,100

account not just the potential results

279

00:12:39,860 --> 00:12:37,680

of a crashed drone but also the safe

280

00:12:41,960 --> 00:12:39,870

operating history of the company doing

281

00:12:44,480 --> 00:12:41,970

the flying their built-in safety

282

00:12:46,699 --> 00:12:44,490

procedures and the features included on

283

00:12:48,829 --> 00:12:46,709

the drone model itself that are designed

284

00:12:52,100 --> 00:12:48,839

to mitigate the results of any negative

285

00:12:54,710 --> 00:12:52,110

issues this could definitely be a boon

286

00:12:56,869 --> 00:12:54,720

to news gathering since a drones eye

287

00:12:59,329 --> 00:12:56,879

view of protests demonstrations and

288

00:13:02,150 --> 00:12:59,339

other large groups would indeed aid in

289

00:13:03,949 --> 00:13:02,160

telling the story and drone use means

290

00:13:06,980 --> 00:13:03,959

not having to locate and fly a

291

00:13:09,439 --> 00:13:06,990

helicopter whenever that's desired yup

292

00:13:13,069 --> 00:13:09,449

sounds a lot more expedient now pilots

293

00:13:16,160 --> 00:13:13,079

to notify no fuelling etc we'll wait and

294

00:13:19,189 --> 00:13:16,170

see how this works out but we don't have

295

00:13:22,079 --> 00:13:19,199

to wait for UFO sightings and here they

296

00:13:25,079 --> 00:13:22,089

come from UFO stalker calm

297

00:13:26,160 --> 00:13:25,089

a UFO sighting in an undisclosed City in

298

00:13:28,559 --> 00:13:26,170

Florida

299

00:13:32,100 --> 00:13:28,569

MUFON gave this sighting a case number

300

00:13:35,189 --> 00:13:32,110

eight seven three four seven the date of

301
00:13:38,790 --> 00:13:35,199
this sighting is October 13 2017 it was

302
00:13:40,999 --> 00:13:38,800
reported October 15th by summary here's

303
00:13:42,179 --> 00:13:41,009
what we find from our witness

304
00:13:45,840 --> 00:13:42,189
donut-shaped

305
00:13:49,249 --> 00:13:45,850
Matt green glowing lights seemed like

306
00:13:53,160 --> 00:13:49,259
engines perfect sighting of the hull

307
00:13:57,480 --> 00:13:53,170
left awestruck the viewing distance here

308
00:14:00,389 --> 00:13:57,490
is rather close 101 to 500 feet the

309
00:14:03,179 --> 00:14:00,399
altitude was treetop level 500 feet or

310
00:14:05,369 --> 00:14:03,189
less the sighting duration was 15

311
00:14:07,949 --> 00:14:05,379
seconds but in spite of that short

312
00:14:10,400 --> 00:14:07,959
bursts of sighting the object features

313
00:14:13,650 --> 00:14:10,410

are described as patterned surface and

314

00:14:16,019 --> 00:14:13,660

louvers the flight path is described as

315

00:14:19,199 --> 00:14:16,029

hovering and then path and then

316

00:14:21,139 --> 00:14:19,209

ultimately other and this object is said

317

00:14:23,790 --> 00:14:21,149

to have been shaped like a diamond

318

00:14:26,340 --> 00:14:23,800

wherever this was in Florida this

319

00:14:28,110 --> 00:14:26,350

undisclosed location the maximum

320

00:14:31,079 --> 00:14:28,120

temperature at the time of this event

321

00:14:34,319 --> 00:14:31,089

was 84 degrees Fahrenheit 29 degrees

322

00:14:37,350 --> 00:14:34,329

Celsius minimum temperature 73 degrees

323

00:14:39,929 --> 00:14:37,360

Fahrenheit 23 degrees Celsius the

324

00:14:42,389 --> 00:14:39,939

maximum visibility was 10 miles 16

325

00:14:44,939 --> 00:14:42,399

kilometers pretty standard are the same

326

00:14:47,429 --> 00:14:44,949

for the mean visibility the minimum

327

00:14:50,369 --> 00:14:47,439

isn't even listed because the conditions

328

00:14:52,499 --> 00:14:50,379

indicate it was raining here's the

329

00:14:57,179 --> 00:14:52,509

account first-person words of our

330

00:14:59,519 --> 00:14:57,189

witness first let me say Wow never been

331

00:15:02,970 --> 00:14:59,529

in such awe in my life at this

332

00:15:06,829 --> 00:15:02,980

engineering marvel I went outside at

333

00:15:09,269 --> 00:15:06,839

3:48 a.m. I saw as clear as day a

334

00:15:12,509 --> 00:15:09,279

diamond-shaped object with a blunted

335

00:15:15,269 --> 00:15:12,519

rear it was a large cylindrical shaped

336

00:15:17,639 --> 00:15:15,279

matte green thing the lights were

337

00:15:20,970 --> 00:15:17,649

similar to doughnut shaped circles

338

00:15:23,519 --> 00:15:20,980

circles that were phosphorescent but did

339

00:15:26,100 --> 00:15:23,529

not emit light pollution outside of the

340

00:15:28,799 --> 00:15:26,110

light itself or within the center of

341

00:15:31,439 --> 00:15:28,809

that light it was not far I would

342

00:15:32,999 --> 00:15:31,449

estimate 500 feet up or whatever the

343

00:15:35,759 --> 00:15:33,009

ceiling height of the cloud cover was

344

00:15:39,900 --> 00:15:35,769

this object was about 200 feet

345

00:15:43,710 --> 00:15:39,910

away it was the size of about six houses

346

00:15:46,220 --> 00:15:43,720

may be as large as 12 in mass I was

347

00:15:49,019 --> 00:15:46,230

awestruck at the magnificence and

348

00:15:51,689 --> 00:15:49,029

engineering that went into this thing I

349

00:15:54,419 --> 00:15:51,699

could see the louver like body on the

350

00:15:58,229 --> 00:15:54,429

craft and the design was similar to

351

00:16:01,049 --> 00:15:58,239

plates set like red clay roof tiles as

352

00:16:04,650 --> 00:16:01,059

if the heat was dispersed by the space

353

00:16:06,569 --> 00:16:04,660

behind each plate there may be sound in

354

00:16:08,369 --> 00:16:06,579

the video I took however my

355

00:16:11,910 --> 00:16:08,379

air-conditioning unit could have caused

356

00:16:15,600 --> 00:16:11,920

that I would pass any lie-detector test

357

00:16:18,150 --> 00:16:15,610

on this I am 100% certain of what I saw

358

00:16:21,210 --> 00:16:18,160

I'm going to do my best to have some

359

00:16:24,389 --> 00:16:21,220

image rendered I grew up in Bermuda

360

00:16:26,579 --> 00:16:24,399

I was not open-minded to this I'm now

361

00:16:29,669 --> 00:16:26,589

very interested and I'm setting up

362

00:16:31,710 --> 00:16:29,679

cameras to record any anomalies although

363

00:16:34,650 --> 00:16:31,720

it doesn't accompany this event I do

364

00:16:36,479 --> 00:16:34,660

have video however it may need some

365

00:16:39,479 --> 00:16:36,489

editing to be able to get a clear view

366

00:16:43,530 --> 00:16:39,489

of what I saw I've tried to analyze the

367

00:16:46,049 --> 00:16:43,540

video I found some peculiar issues I was

368

00:16:48,749 --> 00:16:46,059

completely awestruck and after about 10

369

00:16:51,179 --> 00:16:48,759

seconds I was able to look away to open

370

00:16:53,999 --> 00:16:51,189

the camera on my phone the light from

371

00:16:57,359 --> 00:16:54,009

the screen disrupted my focus I took a

372

00:16:59,879 --> 00:16:57,369

video but that video is all black I took

373

00:17:02,910 --> 00:16:59,889

another one to see why the other video

374

00:17:05,519 --> 00:17:02,920

shows the clouds clearly I don't know

375

00:17:08,730 --> 00:17:05,529

what happened but for a good 10 seconds

376

00:17:11,220 --> 00:17:08,740

I was frozen in awe at the engineering

377

00:17:13,199 --> 00:17:11,230

that went into this object but when I

378

00:17:15,870 --> 00:17:13,209

finally allowed myself to look away and

379

00:17:19,169 --> 00:17:15,880

looked at my phone the light on the

380

00:17:21,750 --> 00:17:19,179

phone messed with my focus our witness

381

00:17:24,600 --> 00:17:21,760

closes by saying I need a video expert

382

00:17:26,669 --> 00:17:24,610

oh gentle listeners this is the part

383

00:17:29,430 --> 00:17:26,679

where we remind you that at the end of

384

00:17:31,680 --> 00:17:29,440

every UFO stalker calm entry there's a

385

00:17:35,490 --> 00:17:31,690

place that asks did you see it have a

386

00:17:37,470 --> 00:17:35,500

comment or question discuss it below if

387

00:17:40,320 --> 00:17:37,480

you want to step forward with your video

388

00:17:42,960 --> 00:17:40,330

expertise and help this witness out well

389

00:17:46,080 --> 00:17:42,970

that would bestow a favor upon us all

390

00:17:48,820 --> 00:17:46,090

perhaps how about a road trip Florida to

391

00:17:51,549 --> 00:17:48,830

Texas we can do that the city of

392

00:17:54,940 --> 00:17:51,559

Lufkin specifically it's MUFON Case

393

00:17:58,000 --> 00:17:54,950

number 87 3-3 to the date of this

394

00:18:01,930 --> 00:17:58,010

sighting is October 12th 2017 it was

395

00:18:04,750 --> 00:18:01,940

reported October 14th 2017 here's the

396

00:18:08,080 --> 00:18:04,760

summary very different than normal

397

00:18:11,289 --> 00:18:08,090

colored big bright lights that projected

398

00:18:14,350 --> 00:18:11,299

beams it's the image in the left photo

399

00:18:16,600 --> 00:18:14,360

that scares me and there are photos

400

00:18:19,480 --> 00:18:16,610

submitted with this account yep

401
00:18:22,000 --> 00:18:19,490
spooky stuff if you feel like getting

402
00:18:24,730 --> 00:18:22,010
spookified later you can head on over to

403
00:18:27,220 --> 00:18:24,740
UFO headline news comm and see these

404
00:18:29,080 --> 00:18:27,230
shots for yourselves the sighting

405
00:18:31,810 --> 00:18:29,090
specifics list an unknown viewing

406
00:18:33,879 --> 00:18:31,820
distance an unknown altitude the

407
00:18:36,519 --> 00:18:33,889
sighting duration was 13 seconds long

408
00:18:39,399 --> 00:18:36,529
and the features of the object are

409
00:18:42,610 --> 00:18:39,409
described as dome pattern surface other

410
00:18:45,159 --> 00:18:42,620
and unknown the object's flight path

411
00:18:47,409 --> 00:18:45,169
apparently was stationary and according

412
00:18:50,259 --> 00:18:47,419
to the witness the object shape just

413
00:18:52,750 --> 00:18:50,269

doesn't apply meteor logically speaking

414

00:18:55,840 --> 00:18:52,760

the maximum temperature in Lufkin Texas

415

00:18:58,600 --> 00:18:55,850

was 86 degrees Fahrenheit 30 degrees

416

00:19:02,379 --> 00:18:58,610

Celsius minimum temperature 59 degrees

417

00:19:05,529 --> 00:19:02,389

Fahrenheit 15 degrees Celsius our trio

418

00:19:08,529 --> 00:19:05,539

of visibility factors maximum mean and

419

00:19:10,389 --> 00:19:08,539

minimum were the standard 10 miles 16

420

00:19:14,139 --> 00:19:10,399

kilometers and there was nothing

421

00:19:16,539 --> 00:19:14,149

abnormal weather-wise our witness states

422

00:19:19,659 --> 00:19:16,549

I was wide awake for some strange reason

423

00:19:23,409 --> 00:19:19,669

that night and something just said go

424

00:19:26,830 --> 00:19:23,419

outside as soon as I went outside it

425

00:19:28,889 --> 00:19:26,840

felt like the energy from some big

426
00:19:32,200 --> 00:19:28,899
glowing light grabbed my attention

427
00:19:35,049 --> 00:19:32,210
instantly at first I thought this was

428
00:19:38,500 --> 00:19:35,059
the moon until I realized the moon was

429
00:19:41,320 --> 00:19:38,510
on the other side of the sky at first

430
00:19:45,279 --> 00:19:41,330
this big light just glowed very very

431
00:19:47,590 --> 00:19:45,289
bright and then beams of light glowed

432
00:19:50,980 --> 00:19:47,600
out of each side of the bigger lights

433
00:19:53,200 --> 00:19:50,990
there was something very shiny way

434
00:19:56,230 --> 00:19:53,210
bigger than a star between these two

435
00:19:59,500 --> 00:19:56,240
bright lights it's at still not glowing

436
00:20:02,350 --> 00:19:59,510
not twinkling nothing just a kind of

437
00:20:05,620 --> 00:20:02,360
oblong light it's the in

438
00:20:08,139 --> 00:20:05,630

in the left photograph I submitted this

439

00:20:11,669 --> 00:20:08,149

is the part that really terrified me I

440

00:20:14,710 --> 00:20:11,679

could not see that figure with my eyes I

441

00:20:17,680 --> 00:20:14,720

actually accidentally caught it as I was

442

00:20:20,350 --> 00:20:17,690

recording the lights it was very scary I

443

00:20:24,370 --> 00:20:20,360

used different lighting to bring it out

444

00:20:26,799 --> 00:20:24,380

and it definitely looks like a UFO when

445

00:20:29,590 --> 00:20:26,809

the lights left it looked like someone

446

00:20:33,190 --> 00:20:29,600

just turned off a light switch they

447

00:20:38,409 --> 00:20:33,200

didn't fly away drop away they just went

448

00:20:41,470 --> 00:20:38,419

off off like a switch we can't help but

449

00:20:44,440 --> 00:20:41,480

wonder if that's a cloaking device so

450

00:20:46,480 --> 00:20:44,450

often reported our sighting report

451
00:20:48,759 --> 00:20:46,490
trajectory now takes us to Northern

452
00:20:51,700 --> 00:20:48,769
California the city of Hayward in the

453
00:20:53,470 --> 00:20:51,710
Bay Area this is the setting for MUFON

454
00:20:55,870 --> 00:20:53,480
sighting number eight seven three four

455
00:20:59,549 --> 00:20:55,880
six this sighting took place October

456
00:21:03,129 --> 00:20:59,559
14th 2017 and got a next day report

457
00:21:06,009 --> 00:21:03,139
here's the summary very bright light

458
00:21:08,769 --> 00:21:06,019
traveling slowly from north northeast to

459
00:21:11,350 --> 00:21:08,779
south southeast under the categories

460
00:21:13,779 --> 00:21:11,360
that includes sighting specifics we find

461
00:21:16,000 --> 00:21:13,789
a viewing distance listed as unknown by

462
00:21:19,000 --> 00:21:16,010
our witness the altitude likewise

463
00:21:21,759 --> 00:21:19,010

unknown the sighting duration was six

464

00:21:24,519 --> 00:21:21,769

minutes the object features well they're

465

00:21:26,830 --> 00:21:24,529

unknown as well the flight path however

466

00:21:29,889 --> 00:21:26,840

was a path that included directional

467

00:21:33,039 --> 00:21:29,899

change and the object shaped you guessed

468

00:21:37,690 --> 00:21:33,049

it unknown our reporting witness writes

469

00:21:39,879 --> 00:21:37,700

this in parts 1 and part 2 part 1 my

470

00:21:42,759 --> 00:21:39,889

wife Kim and I were sitting on our rear

471

00:21:45,669 --> 00:21:42,769

deck the object appeared over the trees

472

00:21:48,490 --> 00:21:45,679

from north-northeast it appeared to be

473

00:21:51,370 --> 00:21:48,500

about the size of an aspirin tablet held

474

00:21:53,620 --> 00:21:51,380

at arm's length it was very bright much

475

00:21:56,860 --> 00:21:53,630

brighter than the background stars and

476
00:21:59,740 --> 00:21:56,870
this object did not display any normal

477
00:22:02,230 --> 00:21:59,750
aircraft marker lights of any kind which

478
00:22:05,740 --> 00:22:02,240
is what really caught our attention also

479
00:22:07,810 --> 00:22:05,750
there was no sound whatsoever the speed

480
00:22:10,450 --> 00:22:07,820
of this object seemed slow we would

481
00:22:12,669 --> 00:22:10,460
guess 100 miles per hour slower than

482
00:22:15,190 --> 00:22:12,679
light aircraft in and out of Hayward

483
00:22:16,029 --> 00:22:15,200
Airport both Kim and I got our

484
00:22:18,789 --> 00:22:16,039
binoculars

485
00:22:20,919 --> 00:22:18,799
and continued to observe the object

486
00:22:23,919 --> 00:22:20,929
appeared to be on a course of 100

487
00:22:26,859 --> 00:22:23,929
degrees shortly after the object passed

488
00:22:29,529 --> 00:22:26,869

overhead it appeared to make a mild turn

489

00:22:32,320 --> 00:22:29,539

to a new heading of approximately 80

490

00:22:34,029 --> 00:22:32,330

degrees the object continued on this

491

00:22:37,659 --> 00:22:34,039

heading for another one or two minutes

492

00:22:40,749 --> 00:22:37,669

and then it appeared to turn off its

493

00:22:43,539 --> 00:22:40,759

light the bright search light was

494

00:22:47,349 --> 00:22:43,549

extinguished consequently and a smaller

495

00:22:49,330 --> 00:22:47,359

reddish dot was visible at this time we

496

00:22:52,299 --> 00:22:49,340

guessed the object's distance at three

497

00:22:57,789 --> 00:22:52,309

to five miles the object continued until

498

00:22:59,769 --> 00:22:57,799

out of sight part two at 8:05 an object

499

00:23:01,869 --> 00:22:59,779

appeared to the west of us traveling

500

00:23:03,570 --> 00:23:01,879

south to north at a distance of

501
00:23:08,109 --> 00:23:03,580
approximately five to ten miles

502
00:23:10,869 --> 00:23:08,119
estimated speed approximately 250 to 350

503
00:23:13,239 --> 00:23:10,879
miles per hour and this object appeared

504
00:23:15,639 --> 00:23:13,249
to have the same characteristics as the

505
00:23:18,549 --> 00:23:15,649
previous object without the searchlight

506
00:23:23,139 --> 00:23:18,559
aspect so we wondered if this was the

507
00:23:26,589 --> 00:23:23,149
same object question is there any agency

508
00:23:28,919 --> 00:23:26,599
doing a scanning program for mapping for

509
00:23:32,169 --> 00:23:28,929
a geological study for earthquake study

510
00:23:34,479 --> 00:23:32,179
the reason we ask is we have viewed

511
00:23:37,930 --> 00:23:34,489
objects in the past displaying similar

512
00:23:40,389 --> 00:23:37,940
surveying characteristics so just

513
00:23:42,639 --> 00:23:40,399

thought and we find out a very

514

00:23:44,940 --> 00:23:42,649

interesting thought however it does

515

00:23:48,339 --> 00:23:44,950

occur to us that any sort of government

516

00:23:51,099 --> 00:23:48,349

surveying object in the sky airplane

517

00:23:54,810 --> 00:23:51,109

helicopter etc would still be bound to

518

00:23:57,729 --> 00:23:54,820

have those normal aircraft lights so

519

00:24:01,060 --> 00:23:57,739

heading north now we find ourselves over

520

00:24:04,719 --> 00:24:01,070

Hamel Illinois that spelled H A M E L

521

00:24:09,099 --> 00:24:04,729

that's where MUFON case number 8 7 3 8 2

522

00:24:11,349 --> 00:24:09,109

happened October 15 2017 is the sighting

523

00:24:15,549 --> 00:24:11,359

date the report date was the next day

524

00:24:19,089 --> 00:24:15,559

October 16th summary multiple times

525

00:24:22,239 --> 00:24:19,099

bright orange larger than star sized

526
00:24:25,389 --> 00:24:22,249
objects hovering 30 minutes and then

527
00:24:28,659 --> 00:24:25,399
leaving view speaking of view you can

528
00:24:29,120 --> 00:24:28,669
view the video of this object yourselves

529
00:24:32,260 --> 00:24:29,130
gentle

530
00:24:35,299 --> 00:24:32,270
nerds later at UFO headline news comm

531
00:24:38,240 --> 00:24:35,309
viewing distance unknown altitude

532
00:24:41,390 --> 00:24:38,250
unknown the sighting duration was three

533
00:24:44,000 --> 00:24:41,400
hours the object features however are

534
00:24:46,940 --> 00:24:44,010
still vexing Lee described as unknown

535
00:24:49,539 --> 00:24:46,950
the flight path was hovering and then

536
00:24:52,549 --> 00:24:49,549
path and then path that at some point

537
00:24:54,710 --> 00:24:52,559
included directional change the

538
00:24:57,650 --> 00:24:54,720

witnesses report this object was shaped

539

00:24:59,750 --> 00:24:57,660

like a boomerang a quick scan of the

540

00:25:02,960 --> 00:24:59,760

weather at the time of this event in

541

00:25:05,409 --> 00:25:02,970

Hamel Illinois maximum temperature 74

542

00:25:08,299 --> 00:25:05,419

degrees Fahrenheit 23 degrees Celsius

543

00:25:11,960 --> 00:25:08,309

dropping down to a minimum of 41 degrees

544

00:25:14,320 --> 00:25:11,970

Fahrenheit five degrees Celsius maximum

545

00:25:18,350 --> 00:25:14,330

visibility 10 miles 16 kilometers

546

00:25:21,200 --> 00:25:18,360

minimum visibility 9 miles 15 kilometers

547

00:25:24,140 --> 00:25:21,210

minimum dropping down to five miles

548

00:25:28,100 --> 00:25:24,150

eight kilometers because it was raining

549

00:25:30,200 --> 00:25:28,110

and this will show you the dedication of

550

00:25:33,799 --> 00:25:30,210

our witnesses in spite of the rain it

551
00:25:36,860 --> 00:25:33,809
was a three hour event for them here's

552
00:25:40,370 --> 00:25:36,870
how it went on the night of October 15

553
00:25:42,830 --> 00:25:40,380
2017 at roughly 8:35 p.m. Central

554
00:25:45,470 --> 00:25:42,840
Standard Time my girlfriend and I were

555
00:25:48,140 --> 00:25:45,480
driving down fruit road we were between

556
00:25:51,620 --> 00:25:48,150
Edwardsville and Hamel Illinois we were

557
00:25:55,100 --> 00:25:51,630
in Madison County 30 minutes outside of

558
00:25:58,250 --> 00:25:55,110
st. Louis we noticed one larger than

559
00:26:00,980 --> 00:25:58,260
star sized light in the sky this was

560
00:26:03,080 --> 00:26:00,990
glowing orange we watched this it

561
00:26:06,140 --> 00:26:03,090
remained motionless in the night sky for

562
00:26:08,390 --> 00:26:06,150
roughly 15 minutes we pulled over on a

563
00:26:11,299 --> 00:26:08,400

frontage road that parallels interstate

564

00:26:13,549 --> 00:26:11,309

55 this thing was roughly

565

00:26:17,419 --> 00:26:13,559

north-northeast of our position when we

566

00:26:19,820 --> 00:26:17,429

stopped the car once we parked a second

567

00:26:23,330 --> 00:26:19,830

object appeared in the sky it looked

568

00:26:26,419 --> 00:26:23,340

similar but it might or might not have

569

00:26:28,340 --> 00:26:26,429

been associated with this phenomenon we

570

00:26:31,669 --> 00:26:28,350

began at that point to photograph and

571

00:26:34,669 --> 00:26:31,679

film this anomalous floating object in

572

00:26:37,789 --> 00:26:34,679

the sky and shortly after we began to

573

00:26:40,520 --> 00:26:37,799

record the original object began to move

574

00:26:42,950 --> 00:26:40,530

at first in an eastward direction and

575

00:26:47,090 --> 00:26:42,960

then southeast towards RV

576

00:26:49,460 --> 00:26:47,100

until it flew directly overhead at this

577

00:26:53,090 --> 00:26:49,470

point we witnessed but did not record

578

00:26:56,150 --> 00:26:53,100

the previously homogenous orange glow it

579

00:26:58,760 --> 00:26:56,160

revealed itself to be a constant orange

580

00:27:01,490 --> 00:26:58,770

flow followed by a series of successive

581

00:27:04,040 --> 00:27:01,500

lights lights that flashed in an ordered

582

00:27:07,040 --> 00:27:04,050

pattern appearing to be on the same

583

00:27:08,200 --> 00:27:07,050

craft over the course of the next three

584

00:27:11,810 --> 00:27:08,210

hours

585

00:27:14,420 --> 00:27:11,820

multiple orange glowing objects appeared

586

00:27:16,340 --> 00:27:14,430

from the same point on the horizon only

587

00:27:19,160 --> 00:27:16,350

to follow a similar pattern of hovering

588

00:27:21,320 --> 00:27:19,170

then flying in various directions not

589

00:27:25,490 --> 00:27:21,330

necessarily in the same direction as the

590

00:27:29,450 --> 00:27:25,500

ones before it overall we saw four to

591

00:27:31,490 --> 00:27:29,460

five separate craft absolutely

592

00:27:33,860 --> 00:27:31,500

mysterious maybe it's just this

593

00:27:38,720 --> 00:27:33,870

broadcaster but it does seem to be that

594

00:27:41,680 --> 00:27:38,730

orange is the new UFO color orange UFO

595

00:27:44,780 --> 00:27:41,690

black sky hmm seems like Halloween

596

00:27:46,940 --> 00:27:44,790

approaches what's approached us is the

597

00:27:50,240 --> 00:27:46,950

end of this broadcast we've got a zoom

598

00:27:52,340 --> 00:27:50,250

out of here because that's a wrap thank

599

00:27:54,500 --> 00:27:52,350

you for listening to inception radio

600

00:27:57,410 --> 00:27:54,510

network you can find today's broadcast

601

00:28:00,440 --> 00:27:57,420

at UFO headlines calm lovingkindness

602

00:28:01,610 --> 00:28:00,450

we're all in this together this is Carol
