

1

00:00:00,000 --> 00:00:02,000

You

2

00:00:30,000 --> 00:00:32,000

You

3

00:00:42,520 --> 00:00:46,200

Had CUNY white bodies and these big large eyes

4

00:00:46,200 --> 00:00:48,200

You

5

00:00:58,720 --> 00:01:01,520

Kind of have a picture of what these things are supposed to be like

6

00:01:11,440 --> 00:01:15,200

Their creatures science refuses to recognize

7

00:01:16,720 --> 00:01:20,400

But new technology makes us question what is real

8

00:01:21,880 --> 00:01:23,880

If our eyes see it

9

00:01:25,480 --> 00:01:27,640

If our cameras capture it

10

00:01:29,280 --> 00:01:31,280

Does it exist?

11

00:01:31,880 --> 00:01:33,880

And to a realm where fact

12

00:01:35,000 --> 00:01:36,840

fiction

13

00:01:36,840 --> 00:01:38,840

Science meets legend

14

00:01:39,440 --> 00:01:41,600

Where nightmares come to life

15

00:01:46,960 --> 00:01:48,960

Do you believe

16

00:01:51,200 --> 00:01:53,680

Lost tapes alien

17

00:01:59,720 --> 00:02:01,720

In the spring of 2008

18

00:02:02,520 --> 00:02:06,440

astronaut captain Miranda Bach returned from her final space mission

19

00:02:07,400 --> 00:02:12,400

Soon after her arrival a state trooper pulled her over for driving erratically

20

00:02:12,800 --> 00:02:17,080

She appeared to be in extreme pain and was speaking incoherently

21

00:02:18,200 --> 00:02:24,520

Officers brought her to the local VA hospital for evaluation where she was placed under the care of psychiatrist

22

00:02:24,520 --> 00:02:28,160

Dr. Lee Morris an internist dr. Rebecca Damon

23

00:02:28,840 --> 00:02:32,800

On the surface the case didn't appear to be so unusual

24

00:02:33,560 --> 00:02:39,400

But the next 24 hours would reveal the startling source of Captain Bach's affliction

25

00:02:39,760 --> 00:02:45,000

And subject both patient and doctors to a harrowing and deadly ordeal

26

00:02:46,640 --> 00:02:48,640

These are the tapes

27

00:03:09,520 --> 00:03:11,520

Oh

28

00:03:31,000 --> 00:03:37,400

So what's the background on the patient tears declared 5150 police brought her in for 72 hour psych observation

29

00:03:38,400 --> 00:03:45,800

Prior to the suicide attempt she was complaining of unbearable skin irritation and abdominal pain you want a full workup

30

00:03:45,920 --> 00:03:52,720

Yeah, I've got to rule out any physical causes before I finalize my psychiatric evaluation anything else. I need to know about her

31

00:03:52,840 --> 00:03:54,960

Believe it or not. She's an astronaut

32

00:04:01,040 --> 00:04:06,160

Captain Miranda Bach payload commander mission t258 mission debriefing

33

00:04:06,560 --> 00:04:08,560

June 16 2008

34

00:04:08,880 --> 00:04:12,400

0800 hours the mission to release a military satellite was a success

35

00:04:12,760 --> 00:04:19,760

However an off nominal event occurred during an extra vehicular activity repair while performing the EVA with mission commander Madison

36

00:04:19,760 --> 00:04:24,600

We passed through a cloud of comet dust a nominal amount of this dust entered the STS

37

00:04:25,360 --> 00:04:30,960

Upon investigation scientists discover that this does contained a type of unknown spore

38

00:04:31,720 --> 00:04:38,120

After analysis determine the spores were in hurt and it posed no danger my crew and I were released from quarantine

39

00:04:39,160 --> 00:04:45,160

None of us have experienced any adverse side effects from this exposure. I certainly haven't in fact

40

00:04:46,000 --> 00:04:49,960

After this debriefing really looking forward to heading home to Minnesota for a little R&R

41

00:04:50,160 --> 00:05:05,640

It is very likely that inevitably you will get life on other planets because there are probably

42

00:05:06,120 --> 00:05:10,800

Lots and lots of other planets that have the right conditions for that sort of thing to happen

43

00:05:11,080 --> 00:05:17,800

The universe is so large and contains so many star systems and has so many planets that there must be

44

00:05:18,160 --> 00:05:26,000

Other planets out there that have conditions that are similar and up to earth to allow life to arise there

45

00:05:27,120 --> 00:05:29,960

We should expect that when we find life elsewhere

46

00:05:29,960 --> 00:05:31,200

It will resemble life

47

00:05:31,200 --> 00:05:36,800

We know on earth if the basic physical properties under which they evolved are at all similar

48

00:05:36,840 --> 00:05:41,880

So we might find something that looked like an insect that would probably be very

49

00:05:42,320 --> 00:05:44,880

functionally equivalent to what we see in insects on earth

50

00:05:45,840 --> 00:05:49,600

Some of the reports have been just not of the creatures like a man-like

51

00:05:50,400 --> 00:05:56,720

Creature, but of other kinds of little animals like a large ant of some sort or

52

00:05:57,920 --> 00:05:59,920

Other reptiles

53

00:05:59,960 --> 00:06:01,640

Things of that nature

54

00:06:01,640 --> 00:06:06,520

So there have been reports of all types of not just humanoid type one of these days

55

00:06:06,520 --> 00:06:11,240

I'm hoping that we'll find out for sure. Maybe we're afraid to find out. I don't know

56

00:06:15,560 --> 00:06:17,560

I

57

00:06:17,880 --> 00:06:22,840

Captain Bach Rebecca David Dr. Morris asked me to come in and take a look at you

58

00:06:23,560 --> 00:06:25,560

So how you feeling?

59

00:06:25,600 --> 00:06:28,360

These really necessary. Oh, I'm sorry, but they are

60

00:06:29,080 --> 00:06:31,080

I'm just gonna go ahead and look at your eyes

61

00:06:35,760 --> 00:06:40,440

So are you feeling any pain anywhere? Yeah, my shoulder hurts a lot right here

62

00:06:45,480 --> 00:06:48,080

How long has this been here? What was it?

63

00:06:50,800 --> 00:06:52,800

That's a nasty rash

64

00:06:54,680 --> 00:06:58,080

All right, I'm just gonna go ahead and listen to your heart, okay

65

00:07:06,960 --> 00:07:08,960

Is everything okay

66

00:07:09,920 --> 00:07:11,920

I

67

00:07:13,840 --> 00:07:16,840

Think we have been visited by extraterrestrial beings

68

00:07:16,840 --> 00:07:24,640

I also think that many of our experiences of encounters with alien creatures even abductions by them

69

00:07:25,480 --> 00:07:30,960

May be with beings who are very close to our world in the early days of July

70

00:07:31,480 --> 00:07:36,400

1947 there was an explosion the midst of a thunderstorm which scattered debris somewhere between

71

00:07:37,000 --> 00:07:39,000

Corona and Roswell of New Mexico now

72

00:07:39,440 --> 00:07:45,240

Roswell was actually the site of an air base and it was called into action as part of the

73

00:07:45,680 --> 00:07:51,600

recovery effort the debris was loaded up not only the debris but but our understanding is

74

00:07:51,920 --> 00:07:58,400

Alien bodies as well and taken to Wright Patterson Air Force Base the military on July 8th

75

00:07:59,880 --> 00:08:04,880

Changed the story from saying they had recovered a flying saucer to they had recovered

76

00:08:05,880 --> 00:08:07,880

The remains of a weather balloon

77

00:08:08,360 --> 00:08:14,800

The Barney and Betty Hill case is the first major case of missing time and abduction

78

00:08:15,280 --> 00:08:19,960

The hills were driving late at night on their way back to their home in Portsmouth, New Hampshire

79

00:08:20,600 --> 00:08:22,600

Then this craft came down

80

00:08:23,080 --> 00:08:28,600

According to Betty they had been taken aboard this craft and given medical examinations

81

00:08:28,840 --> 00:08:32,080

Skeptics tried to debunk them, but they stuck to their story

82

00:08:34,880 --> 00:08:40,960

What Dr. Damon didn't reveal the Captain Bach was that she detected two distinct heartbeats

83

00:08:42,240 --> 00:08:49,480

Bloodwork conclusively determined that she was not pregnant. However, her chest x-ray showed

another anomaly

84

00:08:53,160 --> 00:08:56,440

What is that a tumor it's inconclusive

85

00:08:58,360 --> 00:09:00,160

Stumped by their findings

86

00:09:00,160 --> 00:09:06,480

The doctors began to suspect that there might be some kind of organism inhabiting Captain Bach's body

87

00:09:18,960 --> 00:09:23,920

Parasites or organisms that have a close relationship with a host and in that relationship

88

00:09:24,280 --> 00:09:27,560

The parasite will benefit while the host will suffer

89

00:09:28,120 --> 00:09:30,600

some estimates put the percentage of

90

00:09:31,480 --> 00:09:37,120

Parasites up to 50% of all the world's species. I'm not sure if it's quite that high, but

91

00:09:37,840 --> 00:09:41,440

Definitely a substantial proportion of the world species are parasites

92

00:09:42,560 --> 00:09:46,040

In some ways humans make a great host for parasites

93

00:09:46,080 --> 00:09:53,720

They're large-bodied so they can support a high load of parasites and still survive and go on with their daily life

94

00:09:54,200 --> 00:09:57,160

They also are highly social and

95

00:09:57,760 --> 00:10:04,240

So there's a lot of contact from human to human so the parasites can spread from person to person

96

00:10:05,000 --> 00:10:10,000

It's possible and plausible that some of these aliens might be parasitic in nature

97

00:10:10,000 --> 00:10:12,640

They might need to feed off of us in some way

98

00:10:14,280 --> 00:10:19,480

Over the next several hours Captain Bach's skin condition worsened considerably

99

00:10:20,200 --> 00:10:24,800

Alarmed by this dramatic turn the doctors ordered additional tests

100

00:10:26,560 --> 00:10:28,560

Hey Captain, how are you?

101

00:10:29,840 --> 00:10:33,700

Now I'm just gonna take a little tissue sample from you today. Let's see what's wrong with you

102

00:10:33,700 --> 00:10:36,200

So I'm gonna get you out of here. I might hurt a little bit. It's the whole cell

103

00:10:44,800 --> 00:10:46,800

What happened?

104

00:10:49,480 --> 00:10:51,480

No

105

00:11:03,360 --> 00:11:10,800

The patient is now displaying a severe case of atopic eczema the rash is now covering her entire torso including her extremities

106

00:11:12,800 --> 00:11:16,520

I'm wondering if it could be some type of mutated parasite

107

00:11:20,400 --> 00:11:24,840

Lee this is like tissue. I've never seen before

108

00:11:26,040 --> 00:11:29,520

What the hell is that thing? I have no idea

109

00:11:30,800 --> 00:11:33,880

I've ordered her transferred to a specialized facility in the morning

110

00:11:36,560 --> 00:11:47,440

We also have cases of parasitoids that will ultimately end up killing the host the eastern cicada killer wasp is a good example of a parasitoid

111

00:11:48,080 --> 00:11:52,880

These wasps will capture cicadas and paralyze them with their venom

112

00:11:53,680 --> 00:11:59,580

The mother will lay a single egg on the paralyzed cicada and then bury it the

113

00:12:00,240 --> 00:12:06,160

host stays alive the venom doesn't kill the host but it keeps it alive and

114

00:12:06,880 --> 00:12:08,880

the eggs eventually hatch and

115

00:12:09,280 --> 00:12:13,680

In a pretty grotesque way eat the body of the host

116

00:12:17,440 --> 00:12:19,440

Oh

117

00:12:47,440 --> 00:12:49,440

Oh

118

00:12:59,760 --> 00:13:01,760

We can't let that get out of the building

119

00:13:03,080 --> 00:13:06,440

Security guard alzado called in an emergency ward lockdown

120

00:13:06,880 --> 00:13:15,600

They and all other hospital personnel would have only two minutes to evacuate the building before the doors would be automatically sealed

121

00:13:17,440 --> 00:13:19,440

I

122

00:13:25,920 --> 00:13:28,440

Try to escape you got to contain it

123

00:13:32,120 --> 00:13:40,480

When an animal is trapped or cornered and doesn't have an avenue for escape then its last resort is to fight back and

124

00:13:41,280 --> 00:13:44,200

Many animals will be aggressive

125

00:13:44,880 --> 00:13:49,600

When they can't find an escape route the worst thing that you can do to a wild animal

126

00:13:49,880 --> 00:13:53,120

Is to trap it in a corner so it can't get away?

127

00:13:53,440 --> 00:14:00,080

Because in that case what's gonna happen is the animal is gonna fight its way out and it will attack you

128

00:14:00,280 --> 00:14:03,320

They will kill if that's what they have to do to get away

129

00:14:06,600 --> 00:14:08,600

Let's get out of here before

130

00:14:14,400 --> 00:14:18,540

All other hospital personnel and patients were able to safely evacuate

131

00:14:18,880 --> 00:14:27,360

But having failed to escape before the lockdown the doctors and security guard were now forced to wait until authorities arrived at the scene

132

00:14:28,440 --> 00:14:30,440

What are you doing with that? What are you doing?

133

00:14:33,520 --> 00:14:35,520

Be careful

134

00:14:44,320 --> 00:14:46,320

Oh

135

00:14:51,680 --> 00:14:53,680

Let me use your camera

136

00:15:00,640 --> 00:15:04,240

Oh God, oh my god

137

00:15:14,640 --> 00:15:16,640

Yes

138

00:15:35,800 --> 00:15:41,280

Captain Buck must have picked up some sort of space parasite which using her body grew into some sort of

139

00:15:42,160 --> 00:15:47,480

Creature inside of our distorted flesh in a hardening torso and burst forth like some kind of cocoon

140

00:15:48,000 --> 00:15:51,280

Now that thing is out there. How do we know that thing can't get out of the building?

141

00:15:51,440 --> 00:15:57,640

Buildings on lockdown it can't get away. Everything's locked in. Oh, what is that acid? We might need a weapon

142

00:16:01,360 --> 00:16:03,360

You hear that

143

00:16:11,280 --> 00:16:13,280

Oh

144

00:16:20,720 --> 00:16:22,720

Do you think it's still there

145

00:16:41,280 --> 00:16:43,280

Oh

146

00:17:11,280 --> 00:17:13,280

Oh

147

00:17:41,280 --> 00:17:43,280

Oh

148

00:18:12,080 --> 00:18:19,120

All records surrounding the incident were confiscated and classified by the US government

149

00:18:19,520 --> 00:18:25,400

The official causes of death for Captain Bach, Dr. Morris and security guard Alzado

150

00:18:25,920 --> 00:18:27,920

remain a mystery

151

00:18:28,280 --> 00:18:30,840

The alien creature has never been found

152

00:18:31,360 --> 00:18:37,200

However, there are unofficial reports of spores similar to those found on Captain Bach spacecraft

153

00:18:37,600 --> 00:18:40,640

That have been detected as far away as South America

154

00:18:41,720 --> 00:18:48,800

This information as well as the videotape images from the VA hospital leads us to ask the disturbing question

155

00:18:49,640 --> 00:18:51,640

Do they live among us?

156
