

1

00:00:00,000 --> 00:00:02,000

I

2

00:00:30,000 --> 00:00:59,840

You guys got

3

00:00:59,840 --> 00:01:04,960

no game you know they used to call me the human highlight right human highlight of what come on man

4

00:01:04,960 --> 00:01:06,960

a joke man oh

5

00:01:09,280 --> 00:01:12,760

So what's up with this weekend? I don't know I think we go into town

6

00:01:13,480 --> 00:01:18,440

Grab a couple beers couple women, you know, I would love to get out of here this weekend man

7

00:01:21,240 --> 00:01:25,080

That's Santos what the hell are you kidding me?

8

00:01:27,400 --> 00:01:29,400

Santos

9

00:01:29,840 --> 00:01:31,840

Wake up Santos

10

00:01:33,600 --> 00:01:35,600

Did he fall asleep with a wheel?

11

00:01:36,080 --> 00:01:38,080

Hey yo

12

00:01:38,640 --> 00:01:40,640

Wait, is he okay?

13

00:01:41,480 --> 00:01:43,480

dude Dastley

14

00:01:45,560 --> 00:01:47,560

Guys hurry

15

00:01:47,560 --> 00:01:49,560

Oh

16

00:01:57,000 --> 00:02:00,000

Creatures science refuses to recognize

17

00:02:02,640 --> 00:02:04,640

But if our eyes see it

18

00:02:06,320 --> 00:02:08,320

If our cameras capture it

19

00:02:10,080 --> 00:02:12,800

Does it exist then the monsters

20

00:02:12,800 --> 00:02:14,800

Oh

21

00:02:15,680 --> 00:02:17,680

Lost tapes

22

00:02:26,760 --> 00:02:34,480

In August 2010 the Palico oil company lost all contact with its remote drilling encampment in the New Mexico desert

23

00:02:35,120 --> 00:02:39,320

It was unclear if the employees had become victims of toxic gas

24

00:02:40,200 --> 00:02:42,800

Radiation or even a terrorist strike

25

00:02:44,200 --> 00:02:51,160

Taking extreme caution Palico contracted the enigma corporation a private security firm to investigate

26

00:02:51,720 --> 00:02:58,520

Team leader Noel Conner and specialist Elise Mooney were joined on the mission by two enigma

scientists

27

00:02:58,960 --> 00:03:02,480

Dr. Naomi Robison and Dr. Selden Fisher

28

00:03:03,160 --> 00:03:08,600

Though the team was equipped for a multitude of potential hazards including a possible hostile encounter

29

00:03:08,840 --> 00:03:15,560

What they actually discovered at the encampment was far more dangerous than anything they had prepared for

30

00:03:16,760 --> 00:03:18,920

These are their tapes

31

00:03:32,880 --> 00:03:34,880

I

32

00:03:47,080 --> 00:03:54,440

We doing on levels Robison so far so good about gas negative we should be okay

33

00:03:56,040 --> 00:03:59,440

That's the office up ahead of us use caution

34

00:04:02,760 --> 00:04:06,760

This place is like a ghost town

35

00:04:15,200 --> 00:04:17,200

Clear

36

00:04:23,760 --> 00:04:26,920

Where is everybody the hell happened here

37

00:04:27,800 --> 00:04:29,800

I

38

00:04:30,240 --> 00:04:32,880

Just looks like everybody went on a smoke break and never came back

39

00:04:35,920 --> 00:04:38,440

Whatever happened here happened before anybody can make a call

40

00:04:44,360 --> 00:04:46,360

Got a dial tone

41

00:04:48,040 --> 00:04:50,040

Right, let's move on

42

00:04:57,600 --> 00:04:59,600

Oh

43

00:05:07,760 --> 00:05:09,760

Hello

44

00:05:13,000 --> 00:05:16,840

Sure, are you all right sir

45

00:05:27,040 --> 00:05:29,040

I

46

00:05:32,800 --> 00:05:34,800

Checking out dog

47

00:05:38,360 --> 00:05:40,360

Let me see what the body can tell us

48

00:05:46,000 --> 00:05:49,480

Tissue degeneration could indicate possible cardiac arrest

49

00:05:52,000 --> 00:05:56,320

Whatever the cause is conditions suggest he died quickly minute or less perhaps

50

00:05:57,360 --> 00:05:59,360

Biological or chemical agents could have done this

51

00:06:00,760 --> 00:06:03,680

I'm gonna go check out the rest of the office copy that

52

00:06:06,960 --> 00:06:08,960

We'll get a blood sample for toxicology

53

00:06:23,120 --> 00:06:26,640

Hmm this is odd what

54

00:06:27,360 --> 00:06:30,020

This man has been relieved of a considerable amount of blood

55

00:06:32,240 --> 00:06:34,240

Where did it go

56

00:06:36,600 --> 00:06:39,320

The broadest definition of a vampire is

57

00:06:39,840 --> 00:06:46,480

That it is an entity or a person living or dead who takes your life force of the many

58

00:06:46,600 --> 00:06:53,520

Reported encounters of the vampire one of the earliest is with the Strigoi the Romanian version of

the vampire

59

00:06:54,360 --> 00:07:01,800

Strigoi have one intent in mind and that is to sustain themselves to feed like a tick they fill themselves with blood

60

00:07:02,080 --> 00:07:03,840

They would have to have

61

00:07:03,840 --> 00:07:09,240

Characteristics that would allow them to feed as constantly as they needed to that would involve shape-shifting

62

00:07:10,480 --> 00:07:12,480

invisibility

63

00:07:12,520 --> 00:07:17,360

Speed overpowering strength the Strigoi are by nature dangerous

64

00:07:17,360 --> 00:07:19,360

Conor

65

00:07:30,120 --> 00:07:32,120

Listen

66

00:07:47,360 --> 00:07:49,360

I

67

00:08:08,560 --> 00:08:14,320

I'm fine guys. I'm asking has been compromised. She's exposed what

68

00:08:17,480 --> 00:08:19,480

I

69

00:08:28,960 --> 00:08:30,960

What are you all waiting for my head to explode

70

00:08:36,240 --> 00:08:44,560

You said the time of exposure to the time of death was about a minute correct it's been about that she's not showing any signs

71

00:08:47,360 --> 00:08:49,360

I

72

00:08:50,360 --> 00:08:52,360

Don't think it's airborne

73

00:09:05,520 --> 00:09:09,280

I don't share in your sentiment here different strokes doc

74

00:09:13,160 --> 00:09:15,160

She looks fine

75

00:09:16,160 --> 00:09:20,400

All right, let's find that rat and test it Fisher see if we can give us any answers

76

00:09:26,440 --> 00:09:31,320

This isn't making any sense we ruled out radiation we ruled out poison we ruled out viral infection

77

00:09:31,320 --> 00:09:36,240

But something had to have killed those eyes. Well, I don't think it's biological and we need to find some answers in the past

78

00:09:45,480 --> 00:09:47,480

I

79

00:09:51,600 --> 00:09:58,520

Shape-shifting is common in nature you see all different kinds of insects moving from

80

00:09:59,080 --> 00:10:06,200

Pupa transforming into some other kind of shape as an adult you can see tadpoles that look almost like fish

81

00:10:07,000 --> 00:10:12,240

Transforming into a land creature a frog this Strigoi can turn into

82

00:10:12,840 --> 00:10:17,440

Any number of creatures they can turn into rats and snakes and things of this nature

83

00:10:17,440 --> 00:10:24,040

They can also turn into a couple of domesticated animals any kind of animal that will allow to draw

close to its victim

84

00:10:24,160 --> 00:10:28,680

Not in their true form, but as a dog or a cat a domesticated animal

85

00:10:28,680 --> 00:10:33,040

Even if it is a stray is more likely to be invited in

86

00:10:35,760 --> 00:10:39,080

It's like these guys went down mid-Strig yeah it does

87

00:10:43,240 --> 00:10:45,240

We make this

88

00:10:48,400 --> 00:10:50,400

It's like a weapon of some kind

89

00:10:51,400 --> 00:10:53,800

Fisher I need you to draw some blood done

90

00:11:01,480 --> 00:11:03,480

It's the same as before

91

00:11:06,880 --> 00:11:08,880

Connor

92

00:11:12,400 --> 00:11:14,400

The hell

93

00:11:22,000 --> 00:11:26,960

If that dog's been hanging around this camp, I want to test it too. I'll try and hit it with a prank dart

94

00:11:43,200 --> 00:11:45,200

I

95

00:11:47,200 --> 00:11:49,200

Think I'm inside the container

96

00:12:00,240 --> 00:12:02,760

Wait back off that's far enough. Oh, thank God. Oh

97

00:12:04,840 --> 00:12:06,840

Who are you?

98

00:12:07,120 --> 00:12:10,720

I'm Weber. I'm I'm Clint Weber. I I work here

99

00:12:11,440 --> 00:12:14,440

Hey ropes and Fisher got a live one

100

00:12:23,440 --> 00:12:25,440

No radiation

101

00:12:25,840 --> 00:12:29,520

Files are fine. I told you guys I'm fine

102

00:12:32,360 --> 00:12:34,360

And maybe you can tell us what happened here

103

00:12:34,800 --> 00:12:36,800

I

104

00:12:37,320 --> 00:12:39,320

Don't know okay

105

00:12:39,440 --> 00:12:41,440

They started off like every other day

106

00:12:42,200 --> 00:12:48,880

We had a routine morning with maintenance checks everything was fine the compound was fine and then

107

00:12:49,960 --> 00:12:51,960

Right before lunch there was this

108

00:12:52,480 --> 00:12:56,960

This dust storm that came out from the planes, but it didn't look normal. It was like this

109

00:12:57,600 --> 00:12:59,600

orange dust cloud and

110

00:13:00,280 --> 00:13:03,840

I mean within like 30 seconds it completely covered all of us

111

00:13:04,360 --> 00:13:08,560

It was like someone just threw a blanket over us. I thought my lungs were gonna explode

112

00:13:09,640 --> 00:13:12,480

And now after it passed and God only knows why I

113

00:13:13,520 --> 00:13:15,520

Don't know I was the only one left alive

114

00:13:20,360 --> 00:13:24,880

I want you two to conduct a full examination don't let him out of your sight

115

00:13:27,240 --> 00:13:32,120

Look, I don't really think I'm the problem here I survive I'm not a threat

116

00:13:33,000 --> 00:13:39,040

Well, you got the golden ticket Weber you survived the unsurvivable we may not be so lucky

117

00:13:42,320 --> 00:13:46,960

Please you good. Yeah, I'm good

118

00:13:57,280 --> 00:14:00,800

I'm not buying a story I mean come on Connor an orange dust cloud

119

00:14:02,600 --> 00:14:09,480

By the way that Weber guy really creeping me out. Let's see what else we can find on this guy

120

00:14:13,040 --> 00:14:15,040

See if you can find some personnel files

121

00:14:15,040 --> 00:14:17,040

I

122

00:14:28,240 --> 00:14:32,740

Never engineer been with Palico for three years

123

00:14:33,920 --> 00:14:36,720

Mary to children. There's nothing out of the ordinary on here

124

00:14:38,280 --> 00:14:42,280

Is there a picture profile photo ID working on it?

125

00:14:45,040 --> 00:14:47,040

Oh

126

00:14:47,520 --> 00:14:49,520

My god

127

00:14:50,440 --> 00:14:55,560

If this is the real Weber then that guy out there had something to do with this we're in trouble

128

00:14:56,480 --> 00:14:58,480

Get the van here. We need backup now

129

00:14:59,080 --> 00:15:01,080

Open your mouth, please

130

00:15:01,080 --> 00:15:03,080

Oh

131

00:15:13,600 --> 00:15:15,600

Is that the train car

132

00:15:31,080 --> 00:15:33,080

I

133

00:15:39,480 --> 00:15:43,360

Get the band here we need backup they just sent me a text

134

00:15:46,480 --> 00:15:50,840

They're not coming they're putting us under quarantine until the nature of the virus can be determined

135

00:15:52,080 --> 00:15:54,640

There is no virus these people were murdered. Oh

136

00:15:56,160 --> 00:15:58,160

My god, Robeson and Fisher

137

00:15:58,280 --> 00:16:00,040

We got to go

138

00:16:00,040 --> 00:16:02,040

Wait, wait, wait, wait

139

00:16:04,120 --> 00:16:06,120

Is that sure

140

00:16:10,240 --> 00:16:12,240

Move

141

00:16:15,040 --> 00:16:22,240

Fisher freeze stop movie don't make another move

142

00:16:23,680 --> 00:16:25,680

That's not Fisher

143

00:16:26,000 --> 00:16:28,000

Oh

144

00:16:28,320 --> 00:16:30,320

Where the hell did he go?

145

00:16:34,440 --> 00:16:36,040

Elise some careful me

146

00:16:36,040 --> 00:16:41,480

I need you to run as fast as you can to the supply shed if the biologists are still alive get them to the company truck

147

00:16:41,880 --> 00:16:47,780

I'm not there when you get there leave without me. No, I'm not leaving without you. Please just go

148

00:16:47,780 --> 00:16:49,780

Oh

149

00:17:18,780 --> 00:17:20,780

Oh

150

00:17:21,380 --> 00:17:27,180

Elise shooting it won't kill it what it's not just a dog. It's something else. Where's Weber?

151

00:17:27,420 --> 00:17:29,900

Weber's my problem. You need to clear out

152

00:17:30,420 --> 00:17:32,420

Hunter get out now

153

00:17:47,780 --> 00:17:49,780

I

154

00:18:07,580 --> 00:18:15,900

Though she sustained severe injuries after losing control of the vehicle Elise Mooney narrowly escaped her close brush with death at Silver Rock

155

00:18:16,260 --> 00:18:19,860

Aided by fellow agent Noel Connor who also survived

156

00:18:20,900 --> 00:18:26,140

Dr. Naomi Robeson and Dr. Selden Fisher were not so fortunate

157

00:18:27,460 --> 00:18:37,020

The Palika oil disaster and resulting fatalities were all officially attributed to a poisonous gas leak and the subsequent scandal forced the company to dissolve

158

00:18:37,020 --> 00:18:39,020

us operations

159

00:18:39,980 --> 00:18:44,300

Traces of animal fur and saliva collected by authorities were seized by the FBI

160

00:18:44,540 --> 00:18:50,180

But no lab results have been made public leaving a vital portion of the mystery unanswered

161

00:18:51,300 --> 00:18:57,580

What other unreported elements were in play to cause a disaster this magnitude to occur and

162

00:18:58,260 --> 00:19:00,580

Do they live among us?

163

00:19:14,300 --> 00:19:16,300

You
