2023 07 09	Merged Podcast	https://youtu.be/ZomlWljLCRU	Engaging in a Two Circle Flow with A UAP (UFO) - with David Fravor Merged Podcast %23shorts	<p>Cmdr. David Fravor is a graduate of the TOPGUN naval flight program. He was a commander of the F/A-18F squadron on the USS Nimitz when he experienced an Unidentified Anomalous Phenomena (UAP, UFO) during a routine training flight over the Pacific ocean in 2004. Video of a similar encounter has been released by the Pentagon and has been widely reported on including by the New York Times and 60 Minutes.</p> <p>===</p> <p>Ryan Graves: AIAA UAP: https://www.aiaauap.org Twitter: @uncertainvector</p> <p>Connect with Us:</p> <p>Website: http://www.mergedpodcast.com Merged Point: https://www.mergedpoint.com</p>

2023 06 24	Merged Podcast	https://youtu.be/5mwDhHdyccs	The Galileo Project Looks to the Sky - with Avi Loeb Merged Podcast %23shorts	<p>Ryan Graves sits down with Professor Avi Loeb, a renowned scientist from Harvard University, to explore the fascinating world of unidentified anomalous phenomena (UAP). As they delve into the profound implications of these mysterious phenomena, they discuss the need for a systematic survey of the sky, the potential technological nature of UAP, and the implications for our understanding of the universe. Join them on this enlightening journey as they probe the depths of UAP and its significance in shaping our perception of the cosmos.</p> <p>Professor Loeb received a PhD in plasma physics at age 24 from the Hebrew University of Jerusalem (1986) and was subsequently a long-term member at the Institute for Advanced Study in Princeton (1988-1993), where he started to work in theoretical astrophysics. In 1993 he moved to Harvard University where he was tenured three years later. He is now the Frank B. Baird Jr. Professor of Science and former chair of the department.</p> <p>Professor Loeb also holds a visiting professorship at the Weizmann Institute of Science and a Senior Professorship by special appointment in the School of Physics and Astronomy at Tel Aviv University.</p> <p>Loeb has authored over 1000 research articles and 8 books. For full publications and biographies, visit his professional site.</p>

Professor Loeb received a PhD in plasma physics at age 24 from the Hebrew University of Jerusalem (1986) and was subsequently a long-term member at the Institute for Advanced Study in Princeton (1988-1993), where he started to work in theoretical astrophysics. In 1993 he moved to Harvard University where he was tenured three years later. He is now the Frank B. Baird Jr. Professor of Science and former chair of the department.

Professor Loeb also holds a visiting professorship at the Weizmann Institute of Science and a Senior Professorship by special appointment in the School of Physics and Astronomy at Tel Aviv University.

Loeb has authored over 1000 research articles and 8 books. For full publications and biographies, visit his professional site.

2023 06 12 Merged Podcast <https://youtu.be/FTM35gBoXcE> Three Key Data Points - with Robin Hanson Merged Podcast %23shorts Join us for a riveting conversation as Ryan Graves discusses theories, impacts, and the push for further inquiry and research in the UAP (UFO) space as part of this fascinating conversation with Associate Professor Robin Hanson. From "The Great Filter" to "Grabby Aliens" join us and embrace a paradigm-shifting exploration of the ideas, technologies, and groups dedicated to furthering our understanding of UAP. [Transcript Link](#)

===

Robin Hanson is associate professor of economics at George Mason University, and research associate at the Future of Humanity Institute of Oxford University. He has a doctorate in social science from California Institute of Technology, master's degrees in physics and philosophy from the University of Chicago, and nine years experience as a research programmer, at Lockheed and NASA.

Robin has diverse research interests, with papers on spatial product competition, health incentive contracts, group insurance, product bans, evolutionary psychology and bioethics of health care, voter information incentives, incentives to fake expertise, Bayesian classification, agreeing to disagree, self-deception in disagreement, probability elicitation, wiretaps, image reconstruction, the history of science prizes, reversible computation, the origin of life, the survival of humanity, very long term economic growth, growth given machine intelligence, and interstellar colonization. He coined the phrase "The Great Filter", and has recently numerically estimated it
