If we have then created
something that we would

MERGED
PODCAST

1
00:00:04,070 --> 00:00:02,090
would you consider machine learning or

2
00:00:06,050 --> 00:00:04,080
the direction it's going as a potential

3
00:00:08,330 --> 00:00:06,060
non-human intelligence absolutely oh

4
00:00:09,589 --> 00:00:08,340
yeah that Google AI bot I would rather

5
00:00:11,030 --> 00:00:09,599
have a conversation with it than

6
00:00:11,930 --> 00:00:11,040
probably many of the people that I do

7
00:00:13,070 --> 00:00:11,940
know because they can talk about

8
00:00:14,450 --> 00:00:13,080
anything and that's just the beginning

9
00:00:16,970 --> 00:00:14,460
would that speak then to another

10
00:00:19,189 --> 00:00:16,980
category yes of intelligence and thus

11
00:00:21,470 --> 00:00:19,199
there being a broader spectrum of

12
00:00:23,269 --> 00:00:21,480
intelligence if we have then created

13
00:00:25,009 --> 00:00:23,279

something that we would classify as an

14
00:00:26,570 --> 00:00:25,019
intelligence that isn't us although it

15
00:00:27,830 --> 00:00:26,580
might utilize or leverage our

16
00:00:28,910 --> 00:00:27,840
intelligence some manner we have to

17
00:00:30,529 --> 00:00:28,920
assume there's a wider class of

18
00:00:33,590 --> 00:00:30,539
intelligence out there right absolutely

19
00:00:35,990 --> 00:00:33,600
it will not be us or our immediate

20
00:00:38,510 --> 00:00:36,000
children or descendants that will be the

21
00:00:40,610 --> 00:00:38,520
first that we send to Alpha Centauri

22
00:00:42,830 --> 00:00:40,620
it'll be an advanced computer and what

23
00:00:45,650 --> 00:00:42,840
better Advanced Computer to send than an

24
00:00:48,290 --> 00:00:45,660
AI and you'd probably end up sending the

25
00:00:49,729 --> 00:00:48,300
chat bot GPT thing that everybody sees

26
00:00:51,290 --> 00:00:49,739
in the news today or some much more

27
00:00:52,910 --> 00:00:51,300
advanced version of it and maybe that's

28
00:00:55,130 --> 00:00:52,920
what we're seeing today here that's

29
00:00:56,990 --> 00:00:55,140
already pre-programmed by somebody else

30
00:00:58,610 --> 00:00:57,000
that when you get there you'll just kind
