

**It's hard for me to
imagine that because**

M E R G E D
PODCAST

It's
imag

to
ques

1
00:00:06,110 --> 00:00:02,450
at a high level I would say the goal of

2
00:00:08,690 --> 00:00:06,120
the Galileo project is to bring the

3
00:00:10,970 --> 00:00:08,700
search for signatures of

4
00:00:13,129 --> 00:00:10,980
extraterrestrial civilizations to a

5
00:00:15,890 --> 00:00:13,139
standard where there is rigorous

6
00:00:18,109 --> 00:00:15,900
scientific investigation and there are

7
00:00:19,550 --> 00:00:18,119
credible instruments and people Behind

8
00:00:21,170 --> 00:00:19,560
These discoveries basically bringing

9
00:00:22,670 --> 00:00:21,180
science to the conversation because I

10
00:00:24,950 --> 00:00:22,680
think that's something that's been

11
00:00:27,830 --> 00:00:24,960
perhaps missing why do you think that is

12
00:00:30,230 --> 00:00:27,840
I wish I knew it's hard for me to

13
00:00:32,990 --> 00:00:30,240

imagine that because most people I talk

14

00:00:34,250 --> 00:00:33,000

to even friends colleagues family are so

15

00:00:35,870 --> 00:00:34,260

interested in the subject and they're

16

00:00:37,430 --> 00:00:35,880

like yeah totally like we should look at

17

00:00:39,290 --> 00:00:37,440

something we don't understand it I think

18

00:00:41,630 --> 00:00:39,300

the only thing that I can justify this
