

imagined.

1
00:00:05,990 --> 00:00:03,409
from our private experience when we find

2
00:00:08,570 --> 00:00:06,000
a partner it changes the meaning that we

3
00:00:11,089 --> 00:00:08,580
assign to our existence and in the same

4
00:00:13,490 --> 00:00:11,099
way I believe that when Humanity finds a

5
00:00:14,810 --> 00:00:13,500
partner an Interstellar partner it will

6
00:00:17,990 --> 00:00:14,820
change everything it will make the

7
00:00:19,730 --> 00:00:18,000
universe have some meaning because they

8
00:00:21,769 --> 00:00:19,740
may have answers to questions that we

9
00:00:24,290 --> 00:00:21,779
didn't figure the answers to but we

10
00:00:26,990 --> 00:00:24,300
could also interact with them in a way

11
00:00:28,910 --> 00:00:27,000
that we can learn about our future

12
00:00:31,550 --> 00:00:28,920
because if they already went through

13
00:00:33,110 --> 00:00:31,560

part of our technological future we will

14

00:00:35,630 --> 00:00:33,120

see technologies that we've never

15

00:00:37,549 --> 00:00:35,640

imagined this is knowledge that should

16

00:00:39,190 --> 00:00:37,559

be shared by All Humans because it will

17

00:00:42,110 --> 00:00:39,200

change our perspective

18

00:00:44,209 --> 00:00:42,120

about our place in the universe and for

19

00:00:46,270 --> 00:00:44,219

one thing my hope is that if we find

20

00:00:49,010 --> 00:00:46,280

evidence for a smarter

21

00:00:51,350 --> 00:00:49,020

civilization out there then we would

22

00:00:53,029 --> 00:00:51,360

realize that the small differences among

23

00:00:55,910 --> 00:00:53,039

us humans

24

00:00:57,709 --> 00:00:55,920

are meaningless and we should treat each
