

1  
00:00:09,320 --> 00:00:04,690  
this plane flew by about two minutes ago

2  
00:00:12,680 --> 00:00:09,330  
trail is drifting towards the Sun nearly

3  
00:00:16,460 --> 00:00:12,690  
at the Sun there and when it crosses the

4  
00:00:19,279 --> 00:00:16,470  
Sun there's going to be a contrail shout

5  
00:00:23,060 --> 00:00:19,289  
out that you can know you see a bit of a

6  
00:00:27,490 --> 00:00:23,070  
slab of shadow underneath it just wait a

7  
00:00:30,529 --> 00:00:27,500  
minute I see my prediction is correct

8  
00:00:40,400 --> 00:00:30,539  
you can already kind of see a couple of

9  
00:00:42,950 --> 00:00:40,410  
vague shadows and it is that's the was

10  
00:00:45,139 --> 00:00:42,960  
perfectly annoying is the Sun that

11  
00:00:52,080 --> 00:00:45,149  
should count tighten up into a solid

12  
00:01:02,340 --> 00:00:58,440  
you can make out a dark line which would

13  
00:01:04,829 --> 00:01:02,350

be at sea like down here yeah there was

14

00:01:08,340 --> 00:01:04,839

no control at all because it's quite a

15

00:01:11,580 --> 00:01:08,350

solid line there see where the trail is

16

00:01:16,200 --> 00:01:11,590

relative to the Sun just coming up on

17

00:01:18,120 --> 00:01:16,210

the Sun full Sun as it does go get the

18

00:01:20,160 --> 00:01:18,130

strongest shadow because it depends if

19

00:01:22,350 --> 00:01:20,170

the contrail is perfectly straight or

20

00:01:29,210 --> 00:01:22,360

not generalize are at least like a

21

00:01:31,499 --> 00:01:29,220

little bit curved well it's probably

22

00:01:34,740 --> 00:01:31,509

probably not in this case that looks

23

00:01:37,109 --> 00:01:34,750

pretty straight so you go you can see

24

00:01:41,850 --> 00:01:37,119

the country of shadow is formed now in

25

00:01:46,620 --> 00:01:41,860

line with the trail the trail is no good

26

00:01:49,499 --> 00:01:46,630

just past the Sun and the shadow is

27

00:01:52,380 --> 00:01:49,509

going to such spread out the other way

28

00:01:55,980 --> 00:01:52,390

all that just before it was on this side

29

00:01:59,430 --> 00:01:55,990

here and I sketch reading out on this

30

00:02:03,810 --> 00:01:59,440

side because the Sun is on the other

31

00:02:13,110 --> 00:02:08,999

and the doc line the shadows laughs has

32

00:02:15,210 --> 00:02:13,120

almost entirely dissipated because the
