

1
00:00:03,379 --> 00:00:02,000
there's a follow-up to the organite test

2
00:00:05,150 --> 00:00:03,389
I was asked what would happen if you put

3
00:00:06,230 --> 00:00:05,160
a bottle of water between the meter and

4
00:00:10,040 --> 00:00:06,240
the Wi-Fi router

5
00:00:12,440 --> 00:00:10,050
since Wi-Fi radiation is grounded the

6
00:00:15,440 --> 00:00:12,450
same as microwave radiation and so you

7
00:00:17,750 --> 00:00:15,450
would expect water to absorb it so let's

8
00:00:19,730 --> 00:00:17,760
again we'll see what happens with the

9
00:00:22,040 --> 00:00:19,740
organizer stick that in there with my

10
00:00:24,140 --> 00:00:22,050
hand in there it goes down to zero take

11
00:00:27,259 --> 00:00:24,150
my hand away the reading has increased

12
00:00:31,519 --> 00:00:27,269
such 300 and something there without the

13
00:00:34,580 --> 00:00:31,529

orgonite it is 200 and southern 190 with

14

00:00:36,370 --> 00:00:34,590

water do the same thing goes down to

15

00:00:38,869 --> 00:00:36,380

zero with my hand they remove my hand

16

00:00:43,639 --> 00:00:38,879

initially goes up to 500 which is a lot

17

00:00:47,299 --> 00:00:43,649

higher so don't try to block it
