Planefinder.net has playback for the day in question.

The footage is dated 11 November 2014 at 1400 local time (UTC-3). The coordinates are here:

1
00:00:03,560 --> 00:00:01,850
this is my quest a meadow belt an org

2
00:00:05,120 --> 00:00:03,570
with a metabolic minute a 60-second

3
00:00:07,579 --> 00:00:05,130
explanation of something in the news I

4
00:00:09,560 --> 00:00:07,589
heard about the Chilean Navy UFO story a

5
00:00:11,419 --> 00:00:09,570
UFO investigation group released a video

6
00:00:12,680 --> 00:00:11,429
of infrared footage of something and

7
00:00:14,419 --> 00:00:12,690
said they couldn't figure out what it

8
00:00:15,680 --> 00:00:14,429
was after two years of trying the

9
00:00:17,689 --> 00:00:15,690
footage seemed to show it spraying

10
00:00:19,790 --> 00:00:17,699
something this immediately reminded me

11
00:00:21,590 --> 00:00:19,800
of an aerodynamic contrail which often

12
00:00:23,210 --> 00:00:21,600
start and stop quite abruptly so I

13
00:00:25,519 --> 00:00:23,220

posted this idea in the sky identify

14
00:00:28,429 --> 00:00:25,529
four of our meta Bank use a trailblazer

15
00:00:30,200 --> 00:00:28,439
found the plane find a net had data for

16
00:00:32,179 --> 00:00:30,210
that time there were only two planes in

17
00:00:33,709 --> 00:00:32,189
the area so I wrote some code to extract

18
00:00:36,200 --> 00:00:33,719
the track data and it's displayed in

19
00:00:37,700 --> 00:00:36,210
Google Earth using the GPS coordinates

20
00:00:39,670 --> 00:00:37,710
in the video some wider shots of the

21
00:00:42,380 --> 00:00:39,680
coastline I recreated some of the shots

22
00:00:44,060 --> 00:00:42,390
ip68 30 was a perfect match for position

23
00:00:46,490 --> 00:00:44,070
time size and angle for nearly all the

24
00:00:48,740 --> 00:00:46,500
video although la 330 max a shot at the

25
00:00:50,450 --> 00:00:48,750
end better I made a model of the a340

26
00:00:52,069 --> 00:00:50,460
using four candles to demonstrate how

27
00:00:53,990 --> 00:00:52,079
the relatively small engines flare up

28
00:00:55,340 --> 00:00:54,000
into two blobs and made a 3d model to

29
00:00:56,990 --> 00:00:55,350
put into Google Earth to show the scale

30
00:00:58,400 --> 00:00:57,000
since everything matches the planes

31
00:01:00,170 --> 00:00:58,410
actually were there and that's my
