1
00:00:08,810 --> 00:00:07,039
it's a rotator why does this UFO rotate

2
00:00:10,400 --> 00:00:08,820
you might be that it's an airplane

3
00:00:12,770 --> 00:00:10,410
that's actually rotating like a fighter

4
00:00:15,110 --> 00:00:12,780
jet going into a banked turn or a flying

5
00:00:16,970 --> 00:00:15,120
saucer just ignoring gravity but it

6
00:00:19,540 --> 00:00:16,980
might be something simpler the rotation

7
00:00:21,800 --> 00:00:19,550
of the infrared glare around the engines

8
00:00:23,660 --> 00:00:21,810
we know that infrared glare can look

9
00:00:26,060 --> 00:00:23,670
very different to the actual plane like

10
00:00:28,700 --> 00:00:26,070
here where an Airbus a340 looks like a

11
00:00:30,950 --> 00:00:28,710
giant peanut we also know that the

12
00:00:33,350 --> 00:00:30,960
Raytheon at Fleur camera is housed

13
00:00:35,299 --> 00:00:33,360

behind a glass window that rotates on a

14
00:00:37,430 --> 00:00:35,309
gimbal system to keep the object in view

15
00:00:39,530 --> 00:00:37,440
the actual camera is on another gimbal

16
00:00:41,000 --> 00:00:39,540
behind the window to keep it level it's

17
00:00:43,369 --> 00:00:41,010
what if the occasional rotation in the

18
00:00:44,720 --> 00:00:43,379
window caused the glare to rotate I set

19
00:00:47,180 --> 00:00:44,730
up an experiment with an infrared camera

20
00:00:49,010 --> 00:00:47,190
pointing at a light I use a lightly

21
00:00:50,810 --> 00:00:49,020
smudged glass slide to simulate the

22
00:00:53,330 --> 00:00:50,820
window and I rotated it in front of the

23
00:00:56,240 --> 00:00:53,340
camera the result is a saucer shaped

24
00:00:58,189 --> 00:00:56,250
flare which rotates with the glass so

25
00:01:00,110 --> 00:00:58,199
while this doesn't prove the UFO is just

26
00:01:02,380 --> 00:01:00,120
a distant plane with some infrared glare

27
00:01:04,609 --> 00:01:02,390
it's certainly a possibility to consider
