

GeoengineeringWatch.org

**Dane Wigington
Event M.C.**

Lead Researcher, GeoengineeringWatch.org

1
00:00:04,519 --> 00:00:02,480
in a recent presentation Dane Wigington

2
00:00:06,289 --> 00:00:04,529
the lead researcher at geoengineering

3
00:00:09,169 --> 00:00:06,299
watch.org showed what he said was the

4
00:00:10,669 --> 00:00:09,179
effect of radio frequency on water and

5
00:00:11,890 --> 00:00:10,679
he spoke of his concern on the effects

6
00:00:14,209 --> 00:00:11,900
on human health

7
00:00:18,380 --> 00:00:14,219
because you can see what frequencies due

8
00:00:21,679 --> 00:00:18,390
to water and we have no study to prove

9
00:00:25,060 --> 00:00:21,689
exactly how detrimental these are to the

10
00:00:27,769 --> 00:00:25,070
human organism or life as a whole and

11
00:00:33,860 --> 00:00:27,779
watch what happens to a flow of water

12
00:00:35,810 --> 00:00:33,870
when it's exposed to frequency the

13
00:00:37,340 --> 00:00:35,820

problem is it's not radio frequency

14

00:00:37,580 --> 00:00:37,350

that's making the water freeze admitted

15

00:00:39,979 --> 00:00:37,590

huh

16

00:00:41,660 --> 00:00:39,989

it's not even being frozen by sound it's

17

00:00:44,240 --> 00:00:41,670

actually a harmless trick of the camera

18

00:00:45,680 --> 00:00:44,250

called the wagon-wheel effect the wagon

19

00:00:47,569 --> 00:00:45,690

wheel defect was first noticed when

20

00:00:49,729 --> 00:00:47,579

filming coach chases in old westerns

21

00:00:51,770 --> 00:00:49,739

thus effecting freeze objects like a

22

00:00:53,060 --> 00:00:51,780

wagon wheel if their rotation speed is

23

00:00:54,950 --> 00:00:53,070

synchronized with the speed of the

24

00:00:59,000 --> 00:00:54,960

camera you can replicate this effect

25

00:01:00,650 --> 00:00:59,010

yourself in Winton's example of water

26

00:01:02,720 --> 00:01:00,660

hoses attached to a speaker that's

27

00:01:04,130 --> 00:01:02,730

playing a twenty four Hertz tone so it's

28

00:01:06,289 --> 00:01:04,140

moving the hose back and forth twenty

29

00:01:08,690 --> 00:01:06,299

four times a second the camera is

30

00:01:10,160 --> 00:01:08,700

recording our 24 frames a second so this

31

00:01:12,320 --> 00:01:10,170

has the effect of making the water look

32

00:01:13,969 --> 00:01:12,330

like it's stopped but it hasn't it's

33

00:01:16,760 --> 00:01:13,979

just an optical effect the wagon-wheel

34

00:01:18,590 --> 00:01:16,770

effect it's unfortunate the Wigington is

35

00:01:20,420 --> 00:01:18,600

using this cool science experiment to

36

00:01:22,130 --> 00:01:20,430

frighten people but maybe when people

37

00:01:23,780 --> 00:01:22,140

see how easily mistakes can be made
