

1  
00:00:03,800 --> 00:00:02,450  
this is a bungee cord that I soaked in

2  
00:00:05,630 --> 00:00:03,810  
water and then frozen my freezer

3  
00:00:08,900 --> 00:00:05,640  
overnight I suspended it between these

4  
00:00:13,190 --> 00:00:08,910  
two posts and attached this weight in

5  
00:00:16,550 --> 00:00:13,200  
the middle and speed this up you see as

6  
00:00:18,800 --> 00:00:16,560  
the bungee cord thor's it sags very

7  
00:00:21,140 --> 00:00:18,810  
slowly and gradually now i'm speeding it

8  
00:00:23,300 --> 00:00:21,150  
up a hundred times here and going back

9  
00:00:25,130 --> 00:00:23,310  
and forth look at the post on the right

10  
00:00:29,089 --> 00:00:25,140  
you can see it's moving back and forth

11  
00:00:32,060 --> 00:00:29,099  
as the bungee cord loses its little bit

12  
00:00:35,569 --> 00:00:32,070  
of stiffness that it had it acts more
