1
00:00:05,059 --> 00:00:02,750
so suppose you've got a picture like

2
00:00:08,179 --> 00:00:05,069
this one here and people are saying that

3
00:00:09,379 --> 00:00:08,189
it's goat what can you do to see if it

4
00:00:11,749 --> 00:00:09,389
is actually curved well one thing you

5
00:00:14,209 --> 00:00:11,759
can do is simply scroll up to the edge

6
00:00:15,470 --> 00:00:14,219
of the screen and you'll see that

7
00:00:18,950 --> 00:00:15,480
there's a curve on the left and the

8
00:00:21,349 --> 00:00:18,960
right and you can do this is a better if

9
00:00:24,349 --> 00:00:21,359
you zoom in across just a zoom so it

10
00:00:25,849 --> 00:00:24,359
fills the full width of the image and

11
00:00:30,730 --> 00:00:25,859
you can zoom up to the top like that and

12
00:00:34,549 --> 00:00:30,740
you can see very easily that it is

13
00:00:36,139 --> 00:00:34,559

curved you don't need to eyeball it or
