

THE SUN

1
00:00:05,090 --> 00:00:02,300
he sometimes seen memes like this in

2
00:00:07,970 --> 00:00:05,100
flat earth groups here we've got a coin

3
00:00:10,669 --> 00:00:07,980
on top of the table as it moves away the

4
00:00:12,230 --> 00:00:10,679
bottom of it disappears and it seems

5
00:00:13,700 --> 00:00:12,240
pretty obvious really what's going on

6
00:00:14,900 --> 00:00:13,710
here it's just that the camera is a

7
00:00:18,859 --> 00:00:14,910
little bit lower than the top of the

8
00:00:20,300 --> 00:00:18,869
table it's the actual video you can see

9
00:00:21,500 --> 00:00:20,310
you can't see the top of the table so

10
00:00:23,000 --> 00:00:21,510
it's pretty obvious that the camera is

11
00:00:25,609 --> 00:00:23,010
below it and all that's happening as the

12
00:00:28,099 --> 00:00:25,619
coin moves away is it gets obscured by

13
00:00:30,410 --> 00:00:28,109

the front of the table I've seen other

14

00:00:31,910 --> 00:00:30,420

versions of this where they use a table

15

00:00:34,459 --> 00:00:31,920

that's a bit curved they're bowed up in

16

00:00:35,950 --> 00:00:34,469

the middle has the same effect all they

17

00:00:38,180 --> 00:00:35,960

have people working walking over a

18

00:00:39,830 --> 00:00:38,190

football field which is boat up in the

19

00:00:43,400 --> 00:00:39,840

middle what you really need to an actual

20

00:00:44,660 --> 00:00:43,410

flat surface so I did as I got my 48

21

00:00:46,970 --> 00:00:44,670

inch carpenter's level which is

22

00:00:49,130 --> 00:00:46,980

absolutely flat I put a coin on it and I

23

00:00:50,779 --> 00:00:49,140

put the camera that's close to level

24

00:00:52,880 --> 00:00:50,789

with it as I could but still being able

25

00:00:55,490 --> 00:00:52,890

to see the surface just like you can see

26
00:00:56,299 --> 00:00:55,500
the surface of the water I grabbed hold

27
00:00:58,849 --> 00:00:56,309
of the coin

28
00:01:02,540 --> 00:00:58,859
and I slid it away from me all the way

29
00:01:04,219 --> 00:01:02,550
along the level you see the whole four

30
00:01:06,170 --> 00:01:04,229
feet of the level is perfectly visible

31
00:01:08,870 --> 00:01:06,180
the entire way you can see the bottom of

32
00:01:11,240 --> 00:01:08,880
it so if the Sun was somehow magically

33
00:01:13,250 --> 00:01:11,250
at sea level and gliding away from you

34
00:01:14,990 --> 00:01:13,260
touching the surface of the water and

35
00:01:16,910 --> 00:01:15,000
even then you wouldn't dip below the

36
00:01:19,910 --> 00:01:16,920
horizon of course the Sun actually

37
00:01:21,380 --> 00:01:19,920
appears way above the water if it was

38
00:01:23,030 --> 00:01:21,390

actually moving away from you

39

00:01:25,010 --> 00:01:23,040

and it would get smaller and closer to

40

00:01:27,260 --> 00:01:25,020

the horizon when you actually get to the
