1
00:00:04,249 --> 00:00:02,139
hi this is my quest I met about that org

2
00:00:06,499 --> 00:00:04,259
recently there was this video that

3
00:00:09,650 --> 00:00:06,509
showed up on the internet from Bigelow

4
00:00:11,959 --> 00:00:09,660
airspace and it wasn't clear if they're

5
00:00:14,509 --> 00:00:11,969
joking or not but people are saying that

6
00:00:16,430 --> 00:00:14,519
this shows some kind of strange some

7
00:00:17,810 --> 00:00:16,440
kind of unusual thing that's happening

8
00:00:19,910 --> 00:00:17,820
it's you know what's commonly referred

9
00:00:22,849 --> 00:00:19,920
to as an orb like a glowing piece of

10
00:00:24,349 --> 00:00:22,859
white light or something and it's moving

11
00:00:26,390 --> 00:00:24,359
in front of this kind of infrared

12
00:00:27,950 --> 00:00:26,400
security camera it really just looks

13
00:00:30,279 --> 00:00:27,960

like a mote of dust floating in the air

14
00:00:33,110 --> 00:00:30,289
he reminded me of this case which was

15
00:00:35,780 --> 00:00:33,120
shot in the air space museum and there

16
00:00:38,270 --> 00:00:35,790
was a similar type of thing a a glowing

17
00:00:40,040 --> 00:00:38,280
speck kind of just rotates around in the

18
00:00:41,660 --> 00:00:40,050
air and which i think is just simply due

19
00:00:43,310 --> 00:00:41,670
to the air currents what I think it is

20
00:00:45,529 --> 00:00:43,320
is just a speck of dust and I say oh to

21
00:00:48,380 --> 00:00:45,539
try to demonstrate this so what I did

22
00:00:51,290 --> 00:00:48,390
was I set up my camera here and it's

23
00:00:53,060 --> 00:00:51,300
infrared camera and I got this infrared

24
00:00:54,770 --> 00:00:53,070
flashlight so I'm sharing it in print at

25
00:00:56,830 --> 00:00:54,780
the camera this is a typical setup

26
00:01:00,200 --> 00:00:56,840
you'll see with security cameras

27
00:01:02,360 --> 00:01:00,210
normally you have this this ring of IR

28
00:01:03,860 --> 00:01:02,370
lights around the camera very close to

29
00:01:06,590 --> 00:01:03,870
the camera so I'm kind of simulating

30
00:01:09,109 --> 00:01:06,600
that with this infrared flashlight close

31
00:01:12,469 --> 00:01:09,119
to the camera here and I took tissue

32
00:01:14,120 --> 00:01:12,479
just a regular Kleenex here and I use

33
00:01:15,859 --> 00:01:14,130
this to generate dust because normally

34
00:01:17,300 --> 00:01:15,869
you know your room has some dust in it

35
00:01:19,429 --> 00:01:17,310
but it takes a while for something to

36
00:01:21,410 --> 00:01:19,439
happen to come very close to the camera

37
00:01:24,080 --> 00:01:21,420
so I tore up this tissue in front of the

38
00:01:27,560 --> 00:01:24,090

camera to create dust so this is what

39
00:01:29,870 --> 00:01:27,570
what we see here's my room and the

40
00:01:36,399 --> 00:01:29,880
infrared light and they take take this

41
00:01:40,039 --> 00:01:36,409
tissue here and I rip it up and you get

42
00:01:42,530 --> 00:01:40,049
these little orbs coming from it they

43
00:01:45,440 --> 00:01:42,540
just kind of float around in the air in

44
00:01:48,260 --> 00:01:45,450
front of the camera the thing is when

45
00:01:50,660 --> 00:01:48,270
you see them in when you see them in the

46
00:01:52,850 --> 00:01:50,670
ghost videos or the UFO videos or

47
00:01:54,260 --> 00:01:52,860
whatever you only ever see one because

48
00:01:55,760 --> 00:01:54,270
it's just the one that just happens to

49
00:01:56,990 --> 00:01:55,770
be floating in front of the camera now

50
00:01:58,459 --> 00:01:57,000
because there's lots of them here we can

51
00:02:00,319 --> 00:01:58,469
see that they're just dust but imagine

52
00:02:01,609 --> 00:02:00,329
you're just looking at one of them you

53
00:02:03,980 --> 00:02:01,619
know one of these interesting little

54
00:02:05,510 --> 00:02:03,990
little things moving around I say this

55
00:02:08,570 --> 00:02:05,520
one right here and you just happen to

56
00:02:10,910 --> 00:02:08,580
see you know that one make its movement

57
00:02:13,640 --> 00:02:10,920
strange movement whatever it is and you

58
00:02:16,449 --> 00:02:13,650
know it's kind of similar to what we see

59
00:02:19,819 --> 00:02:16,459
in the Bigelow thing here's his big low

60
00:02:22,640 --> 00:02:19,829
or moving around dot very low resolution

61
00:02:24,890 --> 00:02:22,650
there and here's my higher resolution

62
00:02:26,270 --> 00:02:24,900
ones but they're moving in these this

63
00:02:29,960 --> 00:02:26,280

strange kind of swirly pattern that's

64
00:02:31,250 --> 00:02:29,970
just the K same type of thing and yeah

65
00:02:32,660 --> 00:02:31,260
this this particular said if I wasn't

66
00:02:34,699 --> 00:02:32,670
able to get the dust that close to the

67
00:02:37,429 --> 00:02:34,709
camera earlier I did another experiment

68
00:02:39,229 --> 00:02:37,439
where I suspended a human hair in front

69
00:02:41,390 --> 00:02:39,239
of the camera it's very very small like

70
00:02:43,729 --> 00:02:41,400
slightly bigger than a the irregular

71
00:02:47,360 --> 00:02:43,739
motor dust but really not very much and

72
00:02:50,330 --> 00:02:47,370
I - I tied a knot in it so what I have

73
00:02:52,339 --> 00:02:50,340
here is the human hair in front of the

74
00:02:54,740 --> 00:02:52,349
camera you see it's very very small like

75
00:02:56,960 --> 00:02:54,750
a speck of dust and as it shows up close

76
00:02:59,089 --> 00:02:56,970
to the camera you can see you get this

77
00:03:01,099 --> 00:02:59,099
kind of orb like effect and there's a

78
00:03:03,530 --> 00:03:01,109
little knot in it here which gives you a

79
00:03:05,360 --> 00:03:03,540
brighter thing and if I move it around

80
00:03:07,610 --> 00:03:05,370
and move it like closer to the camera

81
00:03:09,619 --> 00:03:07,620
and away from the camera you see it

82
00:03:11,599 --> 00:03:09,629
changes size and if you can imagine a

83
00:03:13,610 --> 00:03:11,609
kind of a mote of dust kind of swirling

84
00:03:15,470 --> 00:03:13,620
around just very very small in this area

85
00:03:19,250 --> 00:03:15,480
here you would get this exact same

86
00:03:21,409 --> 00:03:19,260
effect of some kind of or moving moving

87
00:03:23,180 --> 00:03:21,419
around in front of the camera it looks

88
00:03:25,159 --> 00:03:23,190

like it's large and it's in the room but

89
00:03:28,189 --> 00:03:25,169
it's actually just a few inches if that

90
00:03:29,809 --> 00:03:28,199
away from the camera itself you know

91
00:03:32,030 --> 00:03:29,819
when you gets very close to the camera

92
00:03:33,500 --> 00:03:32,040
you can see it gets quite large this is

93
00:03:35,780 --> 00:03:33,510
something you are see quite often in

94
00:03:38,629 --> 00:03:35,790
baby monitors as well people that use

95
00:03:40,580 --> 00:03:38,639
infrared baby monitors so they don't

96
00:03:42,080 --> 00:03:40,590
wait the baby with light and you get

97
00:03:44,000 --> 00:03:42,090
these orbs and people think that they

98
00:03:46,460 --> 00:03:44,010
are ghosts there's quite a lot of orb on

99
00:03:49,339 --> 00:03:46,470
baby monitor cameras on YouTube you can

100
00:03:52,909 --> 00:03:49,349
check that out so I think this Bigelow

101
00:03:54,469 --> 00:03:52,919
airspace or video there maybe they were

102
00:04:00,050 --> 00:03:54,479
just kidding but it really is pretty
