

1  
00:00:04,550 --> 00:00:01,730  
this is my quest made a bunker org

2  
00:00:07,610 --> 00:00:04,560  
somebody asked me to recreate this video

3  
00:00:09,740 --> 00:00:07,620  
it's a really old video that everyone

4  
00:00:12,140 --> 00:00:09,750  
thinks is just some kind of model hung

5  
00:00:14,780 --> 00:00:12,150  
from a string so what I did is I hung a

6  
00:00:17,599 --> 00:00:14,790  
model from a string and he's my version

7  
00:00:19,790 --> 00:00:17,609  
it starts off a little bit wobbly it

8  
00:00:22,550 --> 00:00:19,800  
kind of sails down guess that could have

9  
00:00:25,460 --> 00:00:22,560  
nice like pendulum motion back to back

10  
00:00:26,960 --> 00:00:25,470  
and I by moving by moving the pole

11  
00:00:28,939 --> 00:00:26,970  
around you can duplicate all the

12  
00:00:30,589 --> 00:00:28,949  
different types of motion like you can

13  
00:00:33,170 --> 00:00:30,599

swing from side to side I can get a move

14

00:00:34,850 --> 00:00:33,180

to one side and kind of stop on that

15

00:00:37,040 --> 00:00:34,860

side and I'll show a little bit more of

16

00:00:39,200 --> 00:00:37,050

those later but how did I do this it

17

00:00:42,350 --> 00:00:39,210

basically it's a long pole this is just

18

00:00:45,979 --> 00:00:42,360

a extendable pole used for trimming

19

00:00:47,930 --> 00:00:45,989

trees with the saw blade removed and you

20

00:00:49,459 --> 00:00:47,940

just crop it appropriately now of course

21

00:00:52,250 --> 00:00:49,469

the original have like you know very

22

00:00:55,130 --> 00:00:52,260

blurry and grainy images so I kind of

23

00:00:58,040 --> 00:00:55,140

added that really that's all there is to

24

00:01:00,590 --> 00:00:58,050

it now I only spent maybe I don't know

25

00:01:03,170 --> 00:01:00,600

like a couple of hours yesterday and a

26  
00:01:05,539 --> 00:01:03,180  
couple of hours today messing with this

27  
00:01:08,330 --> 00:01:05,549  
of course some of these people who do

28  
00:01:10,340 --> 00:01:08,340  
hoax videos they do it for years the

29  
00:01:13,700 --> 00:01:10,350  
coyote of the original video Billy Mia

30  
00:01:18,200 --> 00:01:13,710  
he's been hosting these videos for many

31  
00:01:21,050 --> 00:01:18,210  
years back in the 70s I guess a long

32  
00:01:22,880 --> 00:01:21,060  
time ago and you get very good at doing

33  
00:01:25,130 --> 00:01:22,890  
something if you do it for a long period

34  
00:01:27,020 --> 00:01:25,140  
of time I could probably do much better

35  
00:01:28,969 --> 00:01:27,030  
videos if I spent like you know months

36  
00:01:31,550 --> 00:01:28,979  
and months practicing my technique like

37  
00:01:33,499 --> 00:01:31,560  
like he had obviously done but this is

38  
00:01:36,140 --> 00:01:33,509

just like a quick pass a quick proof of

39

00:01:39,920 --> 00:01:36,150

concept and I think it still shows the

40

00:01:41,390 --> 00:01:39,930

the same basic things it shows an object

41

00:01:44,960 --> 00:01:41,400

flying with no visible means of support

42

00:01:47,210 --> 00:01:44,970

when i zoom in and it does all kinds of

43

00:01:50,510 --> 00:01:47,220

weird maneuvers and it looks a bit

44

00:01:52,819 --> 00:01:50,520

saucer shaped the you could probably

45

00:01:55,630 --> 00:01:52,829

improve it by just changing the angles

46

00:01:59,420 --> 00:01:55,640

of things if I was at a higher position

47

00:02:01,819 --> 00:01:59,430

you could do it you get a better better

48

00:02:03,679 --> 00:02:01,829

angle you could put more weight in the

49

00:02:06,499 --> 00:02:03,689

object so it wouldn't spend so much you

50

00:02:07,910 --> 00:02:06,509

could change the pivot point so it had

51

00:02:10,369 --> 00:02:07,920

multiple pivot points which would stop

52

00:02:11,930 --> 00:02:10,379

it tilting and you could just mess

53

00:02:13,880 --> 00:02:11,940

around with the angles to frame it
