U.S. and China Agree to Roll Back Some Tariffs if Deal Is Struck
- The two countries agreed that an initial trade deal would remove a portion of the tariffs placed on each others' products.
- The so-called phase one agreement has not been finalized, but the tariff pledge is a significant step toward defusing tensions.

1
00:00:03,800 --> 00:00:01,610
hey it's this my quest of meta bunker

2
00:00:06,680 --> 00:00:03,810
dog I think it's really important to get

3
00:00:09,080 --> 00:00:06,690
a variety of news sources when you're

4
00:00:10,520 --> 00:00:09,090
reading the news online what you can do

5
00:00:13,820 --> 00:00:10,530
is obviously you can just go to some

6
00:00:15,799 --> 00:00:13,830
news site like say CNN and see what's

7
00:00:18,230 --> 00:00:15,809
going on there here's something Penn say

8
00:00:20,269 --> 00:00:18,240
blah blah blah I'll jump some woman yeah

9
00:00:23,300 --> 00:00:20,279
oh you can go to another site at Fox

10
00:00:24,410 --> 00:00:23,310
News see what's going on there and it's

11
00:00:28,130 --> 00:00:24,420
good to get a bunch of different things

12
00:00:29,720 --> 00:00:28,140
but it's gonna messy going amongst all

13
00:00:30,890 --> 00:00:29,730

these things it takes a long time to go

14
00:00:32,120 --> 00:00:30,900
from one to the other and you can't

15
00:00:33,920 --> 00:00:32,130
really see them next to each other very

16
00:00:38,450 --> 00:00:33,930
easily so what I do is I use a thing

17
00:00:43,340 --> 00:00:38,460
called News meta bank org news no better

18
00:00:46,549 --> 00:00:43,350
bunk org and when you go there BAM we

19
00:00:50,569 --> 00:00:46,559
get 12 different news outlets all at the

20
00:00:53,119 --> 00:00:50,579
same time go NBC News we've got CNN

21
00:00:54,500 --> 00:00:53,129
we've got BBC news we've got NPR we've

22
00:00:58,040 --> 00:00:54,510
got the New York Times we've got Zeit

23
00:01:01,250 --> 00:00:58,050
online which is the German news Reuters

24
00:01:03,770 --> 00:01:01,260
we've got zinho dots net which is

25
00:01:07,340 --> 00:01:03,780
Chinese news Fox News we've got a

26
00:01:10,340 --> 00:01:07,350
Breitbart and RT and Press TV which is

27
00:01:12,530 --> 00:01:10,350
the Iranian and use site now these are

28
00:01:15,200 --> 00:01:12,540
just kind of a cross sample I picked

29
00:01:17,300 --> 00:01:15,210
myself just because uh sites I tend to

30
00:01:18,740 --> 00:01:17,310
look at and tend slice I tend to look at

31
00:01:21,260 --> 00:01:18,750
to get a bit of perspective on what

32
00:01:22,370 --> 00:01:21,270
various different people are doing so

33
00:01:23,929 --> 00:01:22,380
how do you get this what you can do

34
00:01:27,590 --> 00:01:23,939
obviously just go to news or metabolic

35
00:01:29,630 --> 00:01:27,600
org but if you just go to this right now

36
00:01:32,660 --> 00:01:29,640
in say Chrome what you're going to get

37
00:01:36,469 --> 00:01:32,670
is something that looks like this as you

38
00:01:37,789 --> 00:01:36,479

can see the pages are a bit too big they

39
00:01:39,770 --> 00:01:37,799
don't really fit half of them are

40
00:01:42,740 --> 00:01:39,780
missing and you scroll down to see

41
00:01:44,810 --> 00:01:42,750
things now the way to get it to be like

42
00:01:46,580 --> 00:01:44,820
I was just showing you is to do two

43
00:01:50,420 --> 00:01:46,590
things first of all you have to zoom out

44
00:01:53,060 --> 00:01:50,430
which in chrome you can do by zoom out

45
00:01:55,429 --> 00:01:53,070
with command - so I'm going to do that

46
00:01:59,149 --> 00:01:55,439
command - best that a couple of times

47
00:02:01,819 --> 00:01:59,159
until I get all of the pages back on the

48
00:02:04,490 --> 00:02:01,829
screen again now obviously we still got

49
00:02:06,020 --> 00:02:04,500
a problem here they're saying server

50
00:02:07,700 --> 00:02:06,030
address could not be found refused to

51
00:02:09,830 --> 00:02:07,710
connect like also kind of errors so

52
00:02:11,510 --> 00:02:09,840
what's going on here is I'm loading

53
00:02:13,910 --> 00:02:11,520
these in frames

54
00:02:15,740 --> 00:02:13,920
and there's some security issues with

55
00:02:18,110 --> 00:02:15,750
that so chrome stops you from doing that

56
00:02:19,580 --> 00:02:18,120
and some sites can decide whether you

57
00:02:22,220 --> 00:02:19,590
want to do it whether they let you do it

58
00:02:23,780 --> 00:02:22,230
or not if they detect if a slightly text

59
00:02:25,910 --> 00:02:23,790
that it's in a frame it decided not to

60
00:02:29,840 --> 00:02:25,920
load because it could be some kind of

61
00:02:32,060 --> 00:02:29,850
spoofing thing so what I do is I install

62
00:02:35,210 --> 00:02:32,070
this plugin from the Chrome Web Store

63
00:02:37,850 --> 00:02:35,220

core to ignore X frame headers you would

64
00:02:39,740 --> 00:02:37,860
click on this which will say install to

65
00:02:42,470 --> 00:02:39,750
Chrome then you need to go to the

66
00:02:45,320 --> 00:02:42,480
settings you can either click on all

67
00:02:47,600 --> 00:02:45,330
sites for the settings here or you can

68
00:02:49,660 --> 00:02:47,610
just do specific sites and just set the

69
00:02:53,720 --> 00:02:49,670
ones that we actually are loading and

70
00:02:58,190 --> 00:02:53,730
once you set that up then things will

71
00:03:00,710 --> 00:02:58,200
actually start working again refresh the

72
00:03:04,370 --> 00:03:00,720
page I guess the whole thing so here we

73
00:03:06,260 --> 00:03:04,380
go used at Meadowbank org now we can do

74
00:03:08,780 --> 00:03:06,270
is you can scroll these with the scroll

75
00:03:10,160 --> 00:03:08,790
bars on the side you can use the scroll

76
00:03:12,440 --> 00:03:10,170
wheel and you don't even have to click

77
00:03:14,840 --> 00:03:12,450
on each one if you click on a story it

78
00:03:17,570 --> 00:03:14,850
will open in that page which you might

79
00:03:20,090 --> 00:03:17,580
not want so what you can do is you can

80
00:03:22,430 --> 00:03:20,100
right-click on a story and do open link

81
00:03:26,930 --> 00:03:22,440
in new tab and then you can just watch

82
00:03:30,350 --> 00:03:26,940
the look at the story in full size see I

83
00:03:32,870 --> 00:03:30,360
need to zoom out one more here there we

84
00:03:34,490 --> 00:03:32,880
go so once you zoom down fully you'll

85
00:03:36,770 --> 00:03:34,500
get 6 on the top and you get 6 on the

86
00:03:39,800 --> 00:03:36,780
bottom site online here if we do an

87
00:03:41,960 --> 00:03:39,810
opening new tab here Chrome if you got

88
00:03:43,220 --> 00:03:41,970

things set up well translate things for

89
00:03:45,140 --> 00:03:43,230
you you can set it to translate

90
00:03:46,070 --> 00:03:45,150
automatically so I can just read the

91
00:03:47,840 --> 00:03:46,080
site stories

92
00:03:50,090 --> 00:03:47,850
that's basically it how does this work

93
00:03:52,400 --> 00:03:50,100
it's really just a very very simple web

94
00:03:54,260 --> 00:03:52,410
page that I set up on metaponto org I

95
00:03:55,970 --> 00:03:54,270
put it on the separate news dot meta

96
00:03:58,010 --> 00:03:55,980
bunker org domains so that the zoom

97
00:04:00,890 --> 00:03:58,020
level will be different for news meta

98
00:04:02,210 --> 00:04:00,900
bunk verses just met a bunk itself we

99
00:04:04,730 --> 00:04:02,220
don't want a normal metal bunk pages

100
00:04:08,060 --> 00:04:04,740
small but if we go to let's see view

101
00:04:09,740 --> 00:04:08,070
developer view source you can see this

102
00:04:11,420 --> 00:04:09,750
is very very straightforward page I'm

103
00:04:13,670 --> 00:04:11,430
just going to zoom in temporarily here

104
00:04:15,229 --> 00:04:13,680
so you can see what's going on I have a

105
00:04:17,750 --> 00:04:15,239
little style on the top of the page

106
00:04:19,729 --> 00:04:17,760
which is setting just the size of the

107
00:04:23,930 --> 00:04:19,739
frames that I'm going to use and then we

108
00:04:25,340 --> 00:04:23,940
have the twelve pages that we below so

109
00:04:26,750 --> 00:04:25,350
you could very easily change this to

110
00:04:30,500 --> 00:04:26,760
something else yourself if you want to

111
00:04:33,080 --> 00:04:30,510
stick a similar selection of 12 pages on

112
00:04:38,450 --> 00:04:33,090
your own server or even locally perhaps

113
00:04:41,660 --> 00:04:38,460

and it's a very good way of looking at

114
00:04:44,660 --> 00:04:41,670
all of the news I think one thing I

115
00:04:48,470 --> 00:04:44,670
notice is obviously you've got different

116
00:04:50,900 --> 00:04:48,480
sites have different biases like

117
00:04:53,780 --> 00:04:50,910
obviously Fox News is more of a trump

118
00:04:56,690 --> 00:04:53,790
supporting site CNN is a Trump attacking

119
00:04:58,370 --> 00:04:56,700
site and other sites are somewhat more

120
00:05:01,130 --> 00:04:58,380
neutral depending on your point of view

121
00:05:03,530 --> 00:05:01,140
RT pushes the Russian point of view

122
00:05:06,320 --> 00:05:03,540
Press TV pushes the Iranian point of

123
00:05:09,050 --> 00:05:06,330
view Breitbart pushes the Breitbart

124
00:05:12,050 --> 00:05:09,060
point of view and the the Chinese sites

125
00:05:15,050 --> 00:05:12,060
usually just don't really give very much

126
00:05:16,220 --> 00:05:15,060
news anything to do with the u.s. at all

127
00:05:19,010 --> 00:05:16,230
so it's kind of interesting just seeing

128
00:05:21,410 --> 00:05:19,020
a country that's really not that

129
00:05:22,910 --> 00:05:21,420
interested in the US

130
00:05:27,410 --> 00:05:22,920
except for like you know things like

131
00:05:28,940 --> 00:05:27,420
trade things so it gives you a habit of

132
00:05:30,290 --> 00:05:28,950
especially from the outside but so

133
00:05:33,110 --> 00:05:30,300
anyway this is just a very good way of

134
00:05:35,900 --> 00:05:33,120
looking at lots of different websites

135
00:05:37,790 --> 00:05:35,910
lots of different news websites all at

136
00:05:40,340 --> 00:05:37,800
the same time so you don't get stuck in

137
00:05:43,030 --> 00:05:40,350
there just looking at one site like CNN
