

#036

Gary Voorhis

Tic-Tac

UFO

1  
00:00:03,379 --> 00:00:01,910  
hey before we get into this episode of

2  
00:00:05,749 --> 00:00:03,389  
tales from the rabbit hole I want to

3  
00:00:07,780 --> 00:00:05,759  
give a little bit of context a little

4  
00:00:11,540 --> 00:00:07,790  
scene setting and a few little warnings

5  
00:00:15,440 --> 00:00:11,550  
the guest today is Gary Voorhis who is a

6  
00:00:18,590 --> 00:00:15,450  
witness to the 2004 Nimitz UFO encounter

7  
00:00:20,750 --> 00:00:18,600  
now Gary says he saw the UFO any number

8  
00:00:22,010 --> 00:00:20,760  
of ways you saw it visually with his own

9  
00:00:27,259 --> 00:00:22,020  
eyes through binoculars

10  
00:00:32,179 --> 00:00:27,269  
he saw radar returns of various UFOs and

11  
00:00:34,610 --> 00:00:32,189  
he saw a videotape of the the UFO

12  
00:00:39,860 --> 00:00:34,620  
incident famously referred to as the

13  
00:00:42,680 --> 00:00:39,870

tic-tac video I believe that Gary is

14

00:00:44,540 --> 00:00:42,690

telling the truth and that he believes

15

00:00:47,900 --> 00:00:44,550

exactly what he is saying and his you

16

00:00:51,229 --> 00:00:47,910

know not not lying and I don't believe

17

00:00:54,110 --> 00:00:51,239

that is some kind of physics defying

18

00:00:56,360 --> 00:00:54,120

advanced technology that he saw and so

19

00:00:58,760 --> 00:00:56,370

that's really the baseline context of

20

00:01:01,849 --> 00:00:58,770

this interview and that I'm very

21

00:01:04,189 --> 00:01:01,859

skeptical about Gary's interpretation of

22

00:01:07,630 --> 00:01:04,199

what he saw even though I believe that

23

00:01:10,190 --> 00:01:07,640

he thinks he saw what he thinks a seesaw

24

00:01:12,020 --> 00:01:10,200

so this interview is about me trying to

25

00:01:13,789 --> 00:01:12,030

understand what Gary might have seen

26

00:01:16,219 --> 00:01:13,799

trying to figure out if it does have

27

00:01:17,539 --> 00:01:16,229

some kind of mundane explanation if it

28

00:01:19,700 --> 00:01:17,549

doesn't have some kind of mundane

29

00:01:22,550 --> 00:01:19,710

explanation then how do we verify that

30

00:01:26,030 --> 00:01:22,560

how can we tell that it is actually

31

00:01:27,380 --> 00:01:26,040

something very unusual warnings the

32

00:01:29,420 --> 00:01:27,390

discussion gets a little bit technical

33

00:01:30,859 --> 00:01:29,430

at times and perhaps might be a little

34

00:01:32,749 --> 00:01:30,869

bit boring to people who aren't really

35

00:01:35,450 --> 00:01:32,759

that interested in UFOs or things like

36

00:01:36,920 --> 00:01:35,460

radars and there's also a little bit of

37

00:01:38,749 --> 00:01:36,930

background noise which can be a little

38

00:01:40,249 --> 00:01:38,759

bit distracting but if it's a topic that

39

00:01:41,569 --> 00:01:40,259

you're interested in or if you're just

40

00:01:43,520 --> 00:01:41,579

interested in a different type of

41

00:01:45,260 --> 00:01:43,530

conspiracy theory the theory that the

42

00:01:47,510 --> 00:01:45,270

government is covering up alien

43

00:01:49,340 --> 00:01:47,520

encounters then you might find it

44

00:01:50,580 --> 00:01:49,350

interesting okay let's get on with the

45

00:01:52,980 --> 00:01:50,590

show

46

00:01:56,760 --> 00:01:52,990

welcome to tales from the rabbit hole my

47

00:01:59,130 --> 00:01:56,770

guest today is gary voice gary is one of

48

00:02:02,100 --> 00:01:59,140

the navy eyewitnesses to the famous

49

00:02:05,130 --> 00:02:02,110

tic-tac UFO incident of 2004

50

00:02:07,770 --> 00:02:05,140

he's also vice president of UAP

51  
00:02:09,779 --> 00:02:07,780  
expeditions which is a non-profit set to

52  
00:02:13,140 --> 00:02:09,789  
provide testing services for technology

53  
00:02:15,720 --> 00:02:13,150  
to detect UFOs also called you ApS and

54  
00:02:17,430 --> 00:02:15,730  
so we're going to talk about the Tic Tac

55  
00:02:20,699 --> 00:02:17,440  
incident and we're gonna talk about what

56  
00:02:22,620 --> 00:02:20,709  
what Gary's doing now so Gary welcome to

57  
00:02:24,360 --> 00:02:22,630  
tales from the rabbit hole hey thanks

58  
00:02:25,979 --> 00:02:24,370  
for having me thank you very much for

59  
00:02:28,500 --> 00:02:25,989  
doing this I know you've been on a few

60  
00:02:30,150 --> 00:02:28,510  
podcasts and whatnot recently so thanks

61  
00:02:31,740 --> 00:02:30,160  
for doing my little little podcast here

62  
00:02:34,860 --> 00:02:31,750  
almost corner of the Internet

63  
00:02:37,320 --> 00:02:34,870

I usually don't turn down too many of

64

00:02:38,550 --> 00:02:37,330

them cuz it's like it's not really into

65

00:02:41,759 --> 00:02:38,560

it for the money or anything like that

66

00:02:44,070 --> 00:02:41,769

just you know for me I want to get as

67

00:02:47,070 --> 00:02:44,080

many people thinking about it as penny

68

00:02:49,830 --> 00:02:47,080

people you know angles you never know

69

00:02:52,970 --> 00:02:49,840

where you're gonna find your next clue

70

00:02:55,949 --> 00:02:52,980

so you know the more the merrier for me

71

00:02:57,750 --> 00:02:55,959

so I know you've gone over a bunch of

72

00:03:00,140 --> 00:02:57,760

times before but probably for people who

73

00:03:02,520 --> 00:03:00,150

are listening to my podcast who i

74

00:03:04,949 --> 00:03:02,530

familiar with all the details let's just

75

00:03:07,349 --> 00:03:04,959

kind of set the scene as to what this

76

00:03:10,250 --> 00:03:07,359

tic tac yeah it takes like a UFO

77

00:03:13,979 --> 00:03:10,260

incident actually was it's back in

78

00:03:14,430 --> 00:03:13,989

November 2004 it's alright yeah that's

79

00:03:16,920 --> 00:03:14,440

correct

80

00:03:18,420 --> 00:03:16,930

I'll go over like a brief synopsis okay

81

00:03:21,120 --> 00:03:18,430

it's plenty of places they can go into

82

00:03:24,000 --> 00:03:21,130

detail Nvidia didn't any Gritty of it

83

00:03:25,890 --> 00:03:24,010

but basically in 2004 the USS Princeton

84

00:03:29,009 --> 00:03:25,900

and the Nimitz battle group we're

85

00:03:31,620 --> 00:03:29,019

tracking unknown aircraft for over seven

86

00:03:34,590 --> 00:03:31,630

days and then at the end of that seven

87

00:03:37,710 --> 00:03:34,600

days we did an f-18 interrogation and

88

00:03:39,780 --> 00:03:37,720

we've got a lot of pilots and we've got

89

00:03:41,759 --> 00:03:39,790

quite a few people they got to get up

90

00:03:44,759 --> 00:03:41,769

close and personal with these objects

91

00:03:47,099 --> 00:03:44,769

and now we're just trying to figure out

92

00:03:48,990 --> 00:03:47,109

what the hell they were yeah back then

93

00:03:52,590 --> 00:03:49,000

what was the first that you personally

94

00:03:54,539 --> 00:03:52,600

heard of what was going on um so that me

95

00:03:56,490 --> 00:03:54,549

the first thing that I heard was I went

96

00:03:58,800 --> 00:03:56,500

up to smoke and you know one of the guys

97

00:04:01,589 --> 00:03:58,810

that works on that radar said that uh

98

00:04:04,230 --> 00:04:01,599

you know they had an unknown track and

99

00:04:06,990 --> 00:04:04,240

we'd have to probably recalibrated

100

00:04:10,050 --> 00:04:07,000

systems down later and basically we just

101  
00:04:11,280 --> 00:04:10,060  
had to make sure that there were no

102  
00:04:13,800 --> 00:04:11,290  
malfunctions or anything like that

103  
00:04:15,990 --> 00:04:13,810  
because we've got because it's our

104  
00:04:18,240 --> 00:04:16,000  
system we you know tell the captain we

105  
00:04:20,540 --> 00:04:18,250  
got an unknown aircraft we best damn

106  
00:04:22,920 --> 00:04:20,550  
well be sure that it's the real deal

107  
00:04:24,120 --> 00:04:22,930  
because that's you know it's kind of

108  
00:04:26,400 --> 00:04:24,130  
something you don't really just want to

109  
00:04:28,440 --> 00:04:26,410  
say oh yeah by the way we've got unknown

110  
00:04:30,300 --> 00:04:28,450  
graphs retracting you know it's it's

111  
00:04:33,240 --> 00:04:30,310  
it's it's like okay well what are they

112  
00:04:35,550 --> 00:04:33,250  
well that's their unknown okay so it's

113  
00:04:38,760 --> 00:04:35,560

like then it didn't fit any real

114

00:04:40,290 --> 00:04:38,770

profiles other than like at first you

115

00:04:42,030 --> 00:04:40,300

know at first glance they're going real

116

00:04:44,460 --> 00:04:42,040

slow they're not really doing anything

117

00:04:45,990 --> 00:04:44,470

crazy so we're just kind of like yeah

118

00:04:48,240 --> 00:04:46,000

maybe you know we got some system

119

00:04:49,950 --> 00:04:48,250

flutter or something and you know and

120

00:04:52,080 --> 00:04:49,960

you know no matter what resolution we

121

00:04:54,000 --> 00:04:52,090

went through no matter what we did while

122

00:04:57,030 --> 00:04:54,010

it was up and running you know we still

123

00:04:58,590 --> 00:04:57,040

always had these tracks and so we got

124

00:05:01,440 --> 00:04:58,600

permission from the captain to go ahead

125

00:05:04,050 --> 00:05:01,450

and take these systems down for a small

126  
00:05:06,840 --> 00:05:04,060  
duration recalibrate the system bring it

127  
00:05:09,660 --> 00:05:06,850  
back up and sure enough they're still

128  
00:05:11,910 --> 00:05:09,670  
there you know and so without a hundred

129  
00:05:14,490 --> 00:05:11,920  
or sent out we we have a solid radar

130  
00:05:16,500 --> 00:05:14,500  
track of these unknown objects and

131  
00:05:18,540 --> 00:05:16,510  
they're only doing like a hundred knots

132  
00:05:22,080 --> 00:05:18,550  
so we're just like scratching our heads

133  
00:05:24,300 --> 00:05:22,090  
like what the heck are these it was kind

134  
00:05:25,650 --> 00:05:24,310  
of like a ongoing joke for a little bit

135  
00:05:27,630 --> 00:05:25,660  
because it was just like they weren't

136  
00:05:29,370 --> 00:05:27,640  
doing anything they weren't doing any

137  
00:05:31,770 --> 00:05:29,380  
aggressive posturing they were just

138  
00:05:33,950 --> 00:05:31,780

honored knots same direction

139

00:05:38,720 --> 00:05:33,960

you know we tracked them they disappear

140

00:05:41,190 --> 00:05:38,730

we tracked them again they disappear and

141

00:05:43,710 --> 00:05:41,200

then you know this kind of went on and

142

00:05:45,620 --> 00:05:43,720

off for days until we got the word that

143

00:05:48,030 --> 00:05:45,630

there was going to be an interrogation

144

00:05:49,890 --> 00:05:48,040

now the first day I heard that it was

145

00:05:51,750 --> 00:05:49,900

going to be an interrogation nothing

146

00:05:53,640 --> 00:05:51,760

happened that day it was the next day

147

00:05:55,170 --> 00:05:53,650

that I was like alright yeah they're

148

00:05:57,390 --> 00:05:55,180

doing an interrogation because they were

149

00:06:00,090 --> 00:05:57,400

gonna do swaiiow they were gonna be

150

00:06:01,860 --> 00:06:00,100

doing exercises out there so they got

151  
00:06:04,250 --> 00:06:01,870  
they're gonna actually test these people

152  
00:06:06,690 --> 00:06:04,260  
to go see what the hell these are

153  
00:06:08,370 --> 00:06:06,700  
alright so for a few days you basically

154  
00:06:12,990 --> 00:06:08,380  
should observing them on the radar and

155  
00:06:15,090 --> 00:06:13,000  
they were these tracks that's were going

156  
00:06:17,410 --> 00:06:15,100  
south I believe about a hundred knots

157  
00:06:18,940 --> 00:06:17,420  
which is 100 million miles an hour

158  
00:06:21,310 --> 00:06:18,950  
for all intensive purposes they just

159  
00:06:26,410 --> 00:06:21,320  
weren't really doing anything at first

160  
00:06:29,140 --> 00:06:26,420  
yeah so whenever we get within 70 miles

161  
00:06:30,940 --> 00:06:29,150  
or so of them I'd always try to get a

162  
00:06:33,340 --> 00:06:30,950  
bearing of at least one of the targets

163  
00:06:35,200 --> 00:06:33,350

and whatever which one's the closest and

164

00:06:37,180 --> 00:06:35,210

I would try to go and see it and

165

00:06:39,520 --> 00:06:37,190

sometimes I could see it sometimes I

166

00:06:41,350 --> 00:06:39,530

couldn't but it would be like when

167

00:06:42,580 --> 00:06:41,360

you're at the beach and you see you know

168

00:06:44,980 --> 00:06:42,590

you know there's a ship on the horizon

169

00:06:46,390 --> 00:06:44,990

you don't know what kind of ship it is

170

00:06:47,890 --> 00:06:46,400

you know it could be a sailboat it could

171

00:06:49,870 --> 00:06:47,900

be a tanker it could be you know

172

00:06:52,900 --> 00:06:49,880

anything but you know there's a ship

173

00:06:54,970 --> 00:06:52,910

there could you see how we could get any

174

00:06:57,490 --> 00:06:54,980

sense of how big it was from that

175

00:06:58,930 --> 00:06:57,500

distance that that did on us no honestly

176

00:07:00,460 --> 00:06:58,940

I was just excited to be able actually

177

00:07:03,760 --> 00:07:00,470

actually see something at the same

178

00:07:07,090 --> 00:07:03,770

bearing and the same place that it's

179

00:07:09,610 --> 00:07:07,100

supposed to be yeah I mean you know just

180

00:07:11,560 --> 00:07:09,620

like you were saying before if if this

181

00:07:12,730 --> 00:07:11,570

wasn't a real object and you know I'd go

182

00:07:14,650 --> 00:07:12,740

up there and it just would never be

183

00:07:16,720 --> 00:07:14,660

anything there or there would be

184

00:07:18,640 --> 00:07:16,730

something that didn't resemble what we

185

00:07:21,100 --> 00:07:18,650

were tracking in any way shape or form

186

00:07:22,870 --> 00:07:21,110

but that we ended up having it wear

187

00:07:24,730 --> 00:07:22,880

whatever the bearing is I was looking at

188

00:07:26,470 --> 00:07:24,740

it may have been too far when I couldn't

189

00:07:29,230 --> 00:07:26,480

see it and during the day it was a lot

190

00:07:33,190 --> 00:07:29,240

harder to see them then at night they

191

00:07:35,110 --> 00:07:33,200

didn't be like the because it's daylight

192

00:07:38,290 --> 00:07:35,120

you couldn't see kind of that

193

00:07:40,090 --> 00:07:38,300

phosphorescent glow that they had but at

194

00:07:41,710 --> 00:07:40,100

night you could definitely see so at

195

00:07:43,210 --> 00:07:41,720

night no matter what as long as we were

196

00:07:44,830 --> 00:07:43,220

close enough I could see them you

197

00:07:46,540 --> 00:07:44,840

couldn't make out detail you just know

198

00:07:48,940 --> 00:07:46,550

it was there you see you could see where

199

00:07:51,010 --> 00:07:48,950

it is to be the antiques X bearing that

200

00:07:52,600 --> 00:07:51,020

we would be checking on the radar I'd be

201  
00:07:54,520 --> 00:07:52,610  
going back and forth just to make sure

202  
00:07:57,370 --> 00:07:54,530  
I'm still looking at the right one for

203  
00:07:59,710 --> 00:07:57,380  
me was a game you know I can I can I see

204  
00:08:01,390 --> 00:07:59,720  
it can I repeat it and I was trying to

205  
00:08:03,130 --> 00:08:01,400  
use a scientific method you know I was

206  
00:08:06,010 --> 00:08:03,140  
trying to make sure that everything I

207  
00:08:08,710 --> 00:08:06,020  
did could be repeatable and if it's not

208  
00:08:10,750 --> 00:08:08,720  
why you know if it's at the same bearing

209  
00:08:12,640 --> 00:08:10,760  
same distance why can't I still see it

210  
00:08:15,160 --> 00:08:12,650  
during the day why can't I see it at

211  
00:08:17,500 --> 00:08:15,170  
night you know if I can see it at night

212  
00:08:20,190 --> 00:08:17,510  
why can't I see it during the day well

213  
00:08:22,780 --> 00:08:20,200

it turns out it ends up being like

214

00:08:25,360 --> 00:08:22,790

because it's shadowed from light of the

215

00:08:26,320 --> 00:08:25,370

Sun during the day it's a it's dark you

216

00:08:28,660 --> 00:08:26,330

know there'll be it's like a little

217

00:08:30,940 --> 00:08:28,670

speck on the horizon at night because it

218

00:08:34,150 --> 00:08:30,950

actually has an internal growth

219

00:08:36,720 --> 00:08:34,160

you can see it relatively easier and you

220

00:08:40,000 --> 00:08:36,730

can see it for a further distance

221

00:08:42,250 --> 00:08:40,010

interesting so how far away would it be

222

00:08:47,430 --> 00:08:42,260

like when you were seeing it at night as

223

00:08:49,960 --> 00:08:47,440

a light roughly no more than 80 miles

224

00:08:52,240 --> 00:08:49,970

which is quite a good distance but you

225

00:08:54,940 --> 00:08:52,250

know using those big eyes you can you

226

00:08:56,740 --> 00:08:54,950

could really you know seep quite a ways

227

00:08:58,480 --> 00:08:56,750

away could you see it at all with the

228

00:09:01,030 --> 00:08:58,490

naked eye like when it was a speck of

229

00:09:02,650 --> 00:09:01,040

light from in the distance if you had

230

00:09:04,480 --> 00:09:02,660

real good vision you might be able to

231

00:09:06,400 --> 00:09:04,490

see just a speck but you wouldn't even

232

00:09:07,900 --> 00:09:06,410

you know you couldn't tell it from

233

00:09:09,520 --> 00:09:07,910

difference from anything background

234

00:09:11,200 --> 00:09:09,530

unless you were looking through the big

235

00:09:13,360 --> 00:09:11,210

eyes I wish we had gotten a little

236

00:09:15,430 --> 00:09:13,370

closer and I got a better look at him

237

00:09:18,580 --> 00:09:15,440

that would have been more much more

238

00:09:20,650 --> 00:09:18,590

interesting David talked about but you

239

00:09:22,870 --> 00:09:20,660

know it was just nice that I could

240

00:09:25,120 --> 00:09:22,880

actually apply something to it you know

241

00:09:26,620 --> 00:09:25,130

say all right so I know for a fact that

242

00:09:28,420 --> 00:09:26,630

the relative bearing and altitude is

243

00:09:28,720 --> 00:09:28,430

this direction and it should be right

244

00:09:30,730 --> 00:09:28,730

here

245

00:09:32,250 --> 00:09:30,740

then I take my sextant and I'd look and

246

00:09:34,960 --> 00:09:32,260

I'd say alright is it right here

247

00:09:37,600 --> 00:09:34,970

okay it's there something there it's

248

00:09:41,200 --> 00:09:37,610

okay so we have an object there so I

249

00:09:42,730 --> 00:09:41,210

mean for me it didn't really take rocket

250

00:09:46,840 --> 00:09:42,740

science to realize that these were real

251  
00:09:50,590 --> 00:09:46,850  
objects and then what blew my mind was

252  
00:09:52,450 --> 00:09:50,600  
when I heard commander flavors first

253  
00:09:55,240 --> 00:09:52,460  
interview about what they looked like

254  
00:09:57,640 --> 00:09:55,250  
yeah and then in my mind say now I saw

255  
00:10:00,250 --> 00:09:57,650  
the video of the interrogation and then

256  
00:10:03,340 --> 00:10:00,260  
him talking about it and it was like

257  
00:10:05,260 --> 00:10:03,350  
yeah it's spot-on guy the only things

258  
00:10:08,650 --> 00:10:05,270  
that were exaggerated in this story was

259  
00:10:10,720 --> 00:10:08,660  
some of the the Navy stuff not not the

260  
00:10:15,220 --> 00:10:10,730  
actual intercept and stuff like that

261  
00:10:17,590 --> 00:10:15,230  
which is pretty impressive cuz I thought

262  
00:10:19,480 --> 00:10:17,600  
for sure he would exaggerate more but he

263  
00:10:22,930 --> 00:10:19,490

really didn't exaggerate a whole lot on

264

00:10:25,480 --> 00:10:22,940

the actual interrogation part mom it

265

00:10:27,760 --> 00:10:25,490

wasn't until like the the meetings and

266

00:10:30,520 --> 00:10:27,770

the people he knows stuff like that

267

00:10:32,260 --> 00:10:30,530

I can't validate any of that stuff so

268

00:10:35,830 --> 00:10:32,270

and I'm not important enough to know any

269

00:10:38,760 --> 00:10:35,840

of those people so yeah so flavor is the

270

00:10:42,970 --> 00:10:38,770

pilot who first went out to try to

271

00:10:45,290 --> 00:10:42,980

intercept the interrogation I guess it's

272

00:10:48,920 --> 00:10:45,300

like where you go out and you see what

273

00:10:52,970 --> 00:10:48,930

yeah you he was he was the pilot tasked

274

00:10:55,280 --> 00:10:52,980

to intercept so white sir at the start

275

00:10:58,249 --> 00:10:55,290

you've got these these tracks on the

276  
00:11:00,740 --> 00:10:58,259  
radar and then you you know you think

277  
00:11:02,600 --> 00:11:00,750  
that they're there clutter then you

278  
00:11:04,280 --> 00:11:02,610  
recalibrate things and then you realize

279  
00:11:05,660 --> 00:11:04,290  
that there are they're real plane so you

280  
00:11:08,780 --> 00:11:05,670  
think that they're real planes are real

281  
00:11:11,569 --> 00:11:08,790  
craft or some store sort why isn't that

282  
00:11:13,759 --> 00:11:11,579  
a big deal immediately are these crafts

283  
00:11:15,590 --> 00:11:13,769  
like outside the area you also have to

284  
00:11:17,809 --> 00:11:15,600  
remember that a lot of that area is

285  
00:11:20,059 --> 00:11:17,819  
still civilian airspace unless we're

286  
00:11:22,850 --> 00:11:20,069  
running a flight ops and we're keeping

287  
00:11:24,650 --> 00:11:22,860  
people out of a specific area you could

288  
00:11:26,030 --> 00:11:24,660

have people drift in say say somebody

289

00:11:28,129 --> 00:11:26,040

was hot air ballooning and they just

290

00:11:29,749 --> 00:11:28,139

drifted off the coast and it would be a

291

00:11:32,360 --> 00:11:29,759

pretty big deal if we decided to shoot

292

00:11:34,280 --> 00:11:32,370

down the hot air balloon yeah granted

293

00:11:36,499 --> 00:11:34,290

they're not gonna do 100 knots that's a

294

00:11:38,269 --> 00:11:36,509

little fast for hot air balloon but you

295

00:11:40,790 --> 00:11:38,279

know and with a good tailwind I mean

296

00:11:44,720 --> 00:11:40,800

they they could possibly get up over a

297

00:11:47,259 --> 00:11:44,730

hundred knots I think the wind what

298

00:11:49,999 --> 00:11:47,269

helped it was like 28,000 feet of it

299

00:11:52,189 --> 00:11:50,009

yeah initially they kind of stuck around

300

00:11:53,720 --> 00:11:52,199

that altitude for this part and it

301  
00:11:57,110 --> 00:11:53,730  
wasn't until the interrogation that they

302  
00:11:58,900 --> 00:11:57,120  
start kind of going a little nuts so you

303  
00:12:02,509 --> 00:11:58,910  
see these these tracks on the radar now

304  
00:12:06,499 --> 00:12:02,519  
Kevin day who's the the radar operator

305  
00:12:08,749 --> 00:12:06,509  
essentially all right a he he says that

306  
00:12:11,689 --> 00:12:08,759  
he sees them dropping out of the sky

307  
00:12:13,519 --> 00:12:11,699  
from high altitude to low altitude very

308  
00:12:15,620 --> 00:12:13,529  
very rapidly is that something yeah it

309  
00:12:17,960 --> 00:12:15,630  
was observed early on or was that

310  
00:12:21,079 --> 00:12:17,970  
something in no honestly until the

311  
00:12:22,939 --> 00:12:21,089  
interrogation they generally just were

312  
00:12:24,829 --> 00:12:22,949  
benign I mean literally I mean that's

313  
00:12:28,040 --> 00:12:24,839

probably why everything was went the way

314

00:12:30,740 --> 00:12:28,050

it did but even though you know I still

315

00:12:32,329 --> 00:12:30,750

you know at the time we were still kind

316

00:12:34,340 --> 00:12:32,339

of wondering why isn't the chain of

317

00:12:36,949 --> 00:12:34,350

command you know a little bit more

318

00:12:38,150 --> 00:12:36,959

worried about this especially since you

319

00:12:40,519 --> 00:12:38,160

know we realized that they're not

320

00:12:42,559 --> 00:12:40,529

balloons you know there any balsa wood

321

00:12:47,179 --> 00:12:42,569

glider it's just sitting up there you

322

00:12:49,249 --> 00:12:47,189

know glide belong you know so I mean it

323

00:12:51,590 --> 00:12:49,259

was just like everybody was just waiting

324

00:12:53,420 --> 00:12:51,600

because I mean you know if they stayed

325

00:12:55,429 --> 00:12:53,430

there long enough eventually they're

326

00:12:57,590 --> 00:12:55,439

gonna send something but they I think

327

00:12:58,790 --> 00:12:57,600

might have been two factors in play the

328

00:13:01,040 --> 00:12:58,800

fact that they weren't

329

00:13:03,199 --> 00:13:01,050

there was no hostile intentions meaning

330

00:13:06,350 --> 00:13:03,209

they didn't do any like active radar

331

00:13:08,660 --> 00:13:06,360

jamming on us I'm not I haven't really

332

00:13:11,179 --> 00:13:08,670

heard whether it was any of the Jets

333

00:13:13,999 --> 00:13:11,189

actually got jammed or not I think

334

00:13:16,340 --> 00:13:14,009

flavor said he was being jammed but I'd

335

00:13:18,229 --> 00:13:16,350

have to go back and look I sure I've

336

00:13:21,559 --> 00:13:18,239

seen so many different things about what

337

00:13:24,919 --> 00:13:21,569

favours said what he hasn't said but as

338

00:13:27,139 --> 00:13:24,929

for like my aspect I know that our radar

339

00:13:29,449 --> 00:13:27,149

could see them clear as day regardless

340

00:13:31,160 --> 00:13:29,459

of what they were doing and they weren't

341

00:13:32,539 --> 00:13:31,170

doing any hostile but fostering they

342

00:13:36,129 --> 00:13:32,549

weren't heading directly towards our

343

00:13:40,030 --> 00:13:36,139

ships you know generally when somebody

344

00:13:43,369 --> 00:13:40,040

tries to target you they use a

345

00:13:45,859 --> 00:13:43,379

concentrated burst of RF to locate your

346

00:13:47,119 --> 00:13:45,869

you know to paint you and that's how

347

00:13:48,949 --> 00:13:47,129

they would you know that's what they

348

00:13:51,319 --> 00:13:48,959

call painting the target you know so

349

00:13:53,809 --> 00:13:51,329

there was no active tracking on us so

350

00:13:56,809 --> 00:13:53,819

that you know we would so there was no

351

00:13:58,759 --> 00:13:56,819

hostile intentions so with that close to

352

00:14:01,369 --> 00:13:58,769

civilian airspace you know we don't want

353

00:14:08,600 --> 00:14:01,379

to be the guys that shot down another

354

00:14:10,249 --> 00:14:08,610

bus so yeah yeah yeah it's just it's

355

00:14:13,069 --> 00:14:10,259

just so interesting though that I think

356

00:14:14,840 --> 00:14:13,079

that the thing a lot of people don't

357

00:14:16,910 --> 00:14:14,850

really understand about the case is this

358

00:14:19,699 --> 00:14:16,920

kind of almost like a lack of concern

359

00:14:22,369 --> 00:14:19,709

from the the higher-ups it would really

360

00:14:24,919 --> 00:14:22,379

would seem like that's does it seem like

361

00:14:26,989 --> 00:14:24,929

they know something that you don't know

362

00:14:30,530 --> 00:14:26,999

either they know something that we don't

363

00:14:32,809 --> 00:14:30,540

know or you remember that something like

364

00:14:35,569 --> 00:14:32,819

this could possibly be a career ender

365

00:14:37,220 --> 00:14:35,579

for an officer you know grunt like me we

366

00:14:40,280 --> 00:14:37,230

don't care I mean what are we gonna do

367

00:14:42,289 --> 00:14:40,290

take a stripe no but with with a captain

368

00:14:45,739 --> 00:14:42,299

he's looking I know that particular

369

00:14:48,259 --> 00:14:45,749

captain was very a go-getter definitely

370

00:14:50,090 --> 00:14:48,269

trying to make his next rank it could

371

00:14:52,309 --> 00:14:50,100

you know it could Mar your record and

372

00:14:54,559 --> 00:14:52,319

you'll be the oh you're the guy that

373

00:14:57,139 --> 00:14:54,569

tracked aliens you know they'll just

374

00:14:58,909 --> 00:14:57,149

ridicule you you know it doesn't matter

375

00:15:01,579 --> 00:14:58,919

whether they're just unknown aircrafts

376

00:15:03,889 --> 00:15:01,589

you know it doesn't matter that even if

377

00:15:06,259 --> 00:15:03,899

the captain took it serious like after I

378

00:15:08,150 --> 00:15:06,269

guarantee after the interrogations they

379

00:15:10,489 --> 00:15:08,160

were taking this serious because these

380

00:15:12,079 --> 00:15:10,499

ships out flew us you know they they

381

00:15:12,420 --> 00:15:12,089

could just fly around us and do whatever

382

00:15:15,480 --> 00:15:12,430

they

383

00:15:16,890 --> 00:15:15,490

any speed direction velocity you know

384

00:15:21,090 --> 00:15:16,900

the Jets just couldn't cope with that

385

00:15:22,560 --> 00:15:21,100

kind of an agile maneuvering but in

386

00:15:24,840 --> 00:15:22,570

Ischl II though you just had these

387

00:15:26,460 --> 00:15:24,850

targets that were like what like 70

388

00:15:28,920 --> 00:15:26,470

miles away or something and they were

389

00:15:31,380 --> 00:15:28,930

just they they varied mileage because

390

00:15:34,080 --> 00:15:31,390

you gotta remember we can we can see 256

391

00:15:37,650 --> 00:15:34,090

nautical miles around each ship yeah so

392

00:15:39,930 --> 00:15:37,660

that's that's that's the horizon so you

393

00:15:43,650 --> 00:15:39,940

know as they come within that type of

394

00:15:45,720 --> 00:15:43,660

range spy radars very powerful so within

395

00:15:48,660 --> 00:15:45,730

that with that within that zone of

396

00:15:50,340 --> 00:15:48,670

influence we can see everything let's

397

00:15:52,380 --> 00:15:50,350

talk a little bit about the radar cuz

398

00:15:54,000 --> 00:15:52,390

the case I think people don't really

399

00:15:56,810 --> 00:15:54,010

understand you know what type of radar

400

00:15:59,790 --> 00:15:56,820

we're talking about here the spy-1 radar

401  
00:16:02,130 --> 00:15:59,800  
it's not like the little rotating thing

402  
00:16:04,410 --> 00:16:02,140  
so when people think of radars they

403  
00:16:06,870 --> 00:16:04,420  
think of the parabolic dish that rotates

404  
00:16:08,370 --> 00:16:06,880  
and you know sends out a pulse and then

405  
00:16:10,380 --> 00:16:08,380  
it rotates and the pixel in the pulse

406  
00:16:13,350 --> 00:16:10,390  
back up and you know so that that's

407  
00:16:16,380 --> 00:16:13,360  
actually a very slow radar versus what

408  
00:16:18,570 --> 00:16:16,390  
ours is so like if you look up a early

409  
00:16:21,930 --> 00:16:18,580  
Burke destroyer or an eighth or a

410  
00:16:25,560 --> 00:16:21,940  
cruiser you'll see these hexagonal

411  
00:16:29,010 --> 00:16:25,570  
panels on four sides of the ship now

412  
00:16:31,410 --> 00:16:29,020  
those panels contain feed horns hundreds

413  
00:16:33,980 --> 00:16:31,420

of feet of horns each one of these feed

414

00:16:37,530 --> 00:16:33,990

horns can be directed independent

415

00:16:41,690 --> 00:16:37,540

technically they can all hold a track

416

00:16:45,330 --> 00:16:41,700

individually but they're used in in

417

00:16:48,870 --> 00:16:45,340

sequence to provide a 360 degree sweep

418

00:16:52,230 --> 00:16:48,880

of real-time radar around the entire

419

00:16:54,630 --> 00:16:52,240

ship it's it's it's a crazy tech piece

420

00:16:57,930 --> 00:16:54,640

of tech that you know honestly it's it

421

00:17:00,000 --> 00:16:57,940

impressed me from day one how this thing

422

00:17:02,310 --> 00:17:00,010

worked and I remember I when I first got

423

00:17:06,150 --> 00:17:02,320

to see up underneath the because that

424

00:17:07,949 --> 00:17:06,160

that that thing is just a cover that you

425

00:17:09,930 --> 00:17:07,959

see and then here's their stuff

426

00:17:12,270 --> 00:17:09,940

underneath it and you know it's it's

427

00:17:14,220 --> 00:17:12,280

it's it's crazy how it looks because

428

00:17:17,699 --> 00:17:14,230

it's just this like electronic field and

429

00:17:20,520 --> 00:17:17,709

you can kind of see how it's modular on

430

00:17:22,710 --> 00:17:20,530

the inside each one of those feed horns

431

00:17:25,290 --> 00:17:22,720

can be replaced and even if one got

432

00:17:25,900 --> 00:17:25,300

damaged or jammed all the rest would

433

00:17:28,480 --> 00:17:25,910

still work

434

00:17:31,510 --> 00:17:28,490

fine which is you know poses a lot of

435

00:17:33,940 --> 00:17:31,520

the problem with spoofing this type of

436

00:17:37,710 --> 00:17:33,950

radar because you basically would have

437

00:17:41,800 --> 00:17:37,720

to spoof every individual feedhorn which

438

00:17:43,960 --> 00:17:41,810

it would be next to impossible to do

439

00:17:47,230 --> 00:17:43,970

that even even with an advanced

440

00:17:49,660 --> 00:17:47,240

technology you know four of those ours

441

00:17:52,210 --> 00:17:49,670

it would be pretty amazing three of a

442

00:17:54,280 --> 00:17:52,220

spooof that kind of radar and it's not

443

00:17:55,470 --> 00:17:54,290

not a matter of like physics or anything

444

00:17:57,850 --> 00:17:55,480

like that it's just a matter of numbers

445

00:17:59,800 --> 00:17:57,860

well I mean yeah you're gonna be able to

446

00:18:00,850 --> 00:17:59,810

spooof maybe one or two feet horns but

447

00:18:02,740 --> 00:18:00,860

you're not gonna be able to spooof the

448

00:18:04,690 --> 00:18:02,750

whole thing and then because of the way

449

00:18:06,880 --> 00:18:04,700

the system works say two feet horns are

450

00:18:09,160 --> 00:18:06,890

getting some anomalous reading it'll

451  
00:18:11,050 --> 00:18:09,170  
ignore it and it won't show it and then

452  
00:18:12,730 --> 00:18:11,060  
basically our ort system would say hey

453  
00:18:15,910 --> 00:18:12,740  
no that's that's not that's not right

454  
00:18:18,250 --> 00:18:15,920  
and then it would just ignore it and I

455  
00:18:20,530 --> 00:18:18,260  
guess the sort of this this the spy

456  
00:18:22,420 --> 00:18:20,540  
radar has essentially like a big

457  
00:18:23,800 --> 00:18:22,430  
computer that takes these signals and

458  
00:18:25,540 --> 00:18:23,810  
then converts them into pictures it's

459  
00:18:27,730 --> 00:18:25,550  
not like the the old ones where it was

460  
00:18:29,410 --> 00:18:27,740  
like a direct and you're talking to the

461  
00:18:32,050 --> 00:18:29,420  
guy that used to run that computer yeah

462  
00:18:34,900 --> 00:18:32,060  
yeah yeah I heard you with it the only

463  
00:18:35,980 --> 00:18:34,910

IT guy on the the only computer tech on

464

00:18:37,780 --> 00:18:35,990

the on the ship yeah I was the only

465

00:18:39,940 --> 00:18:37,790

computer tech on the ship the ship went

466

00:18:43,660 --> 00:18:39,950

to baseline six one intern docking

467

00:18:47,370 --> 00:18:43,670

period so between a couple of guys kind

468

00:18:49,780 --> 00:18:47,380

of getting let go from the service under

469

00:18:51,150 --> 00:18:49,790

not-so-great circumstances before our

470

00:18:54,130 --> 00:18:51,160

last deployment

471

00:18:56,320 --> 00:18:54,140

land landed me one of the only computer

472

00:19:01,090 --> 00:18:56,330

technicians on board because they went

473

00:19:03,070 --> 00:19:01,100

from old you know back wiring honestly

474

00:19:06,190 --> 00:19:03,080

they went from like 60s technology took

475

00:19:08,500 --> 00:19:06,200

off-the-shelf technology and they

476

00:19:11,140 --> 00:19:08,510

basically hybridized our ship our ship

477

00:19:13,120 --> 00:19:11,150

was like a bastard hybrid of old tech

478

00:19:16,990 --> 00:19:13,130

and new tech and so we had all these

479

00:19:18,610 --> 00:19:17,000

cots off-the-shelf systems half the

480

00:19:19,980 --> 00:19:18,620

system was run with that stuff and the

481

00:19:21,760 --> 00:19:19,990

other half was run with the old

482

00:19:25,360 --> 00:19:21,770

proprietary systems

483

00:19:28,150 --> 00:19:25,370

sounds like IT fund getting all that

484

00:19:31,300 --> 00:19:28,160

stuff working together what was fun as

485

00:19:35,500 --> 00:19:31,310

making sure every fiber splice was was

486

00:19:37,870 --> 00:19:35,510

good well the guy the guy in the

487

00:19:39,880 --> 00:19:37,880

shipyard was doing the the nodes you

488

00:19:42,070 --> 00:19:39,890

know they got these big Bell house

489

00:19:43,450 --> 00:19:42,080

with these some fiber notes in them and

490

00:19:45,460 --> 00:19:43,460

there's you know thousands of

491

00:19:47,830 --> 00:19:45,470

connections inside these things and I

492

00:19:50,620 --> 00:19:47,840

mean the first time we we lit him up

493

00:19:52,090 --> 00:19:50,630

with a laser it looked like a disco so I

494

00:19:55,060 --> 00:19:52,100

don't know if that guy was drunk

495

00:19:56,440 --> 00:19:55,070

what did he hit whatever yeah I think

496

00:19:57,880 --> 00:19:56,450

people don't really realize this how

497

00:20:00,250 --> 00:19:57,890

much computer tech there is on ships in

498

00:20:01,990 --> 00:20:00,260

nowadays and you know just don't they

499

00:20:04,450 --> 00:20:02,000

know that best at the military it's like

500

00:20:05,890 --> 00:20:04,460

very getting very very heavy in terms

501  
00:20:08,650 --> 00:20:05,900  
your thought that was awesome you should

502  
00:20:11,860 --> 00:20:08,660  
see the specs on the DD 21 that thing is

503  
00:20:14,080 --> 00:20:11,870  
a technological nightmare when it comes

504  
00:20:16,140 --> 00:20:14,090  
to being a computer technician on board

505  
00:20:18,580 --> 00:20:16,150  
I can imagine and every night you have

506  
00:20:21,789 --> 00:20:18,590  
much stricter standards as an industry

507  
00:20:23,890 --> 00:20:21,799  
and in some ways because you know

508  
00:20:27,310 --> 00:20:23,900  
there's lots of things that are people's

509  
00:20:29,110 --> 00:20:27,320  
lives depend up on it well people in the

510  
00:20:32,500 --> 00:20:29,120  
ship's lives depend on all those systems

511  
00:20:34,680 --> 00:20:32,510  
yeah I mean us fire control men I mean

512  
00:20:37,360 --> 00:20:34,690  
the entire ships built around us

513  
00:20:40,630 --> 00:20:37,370

everything about that ship is for

514

00:20:44,289 --> 00:20:40,640

missile defense for fighting it is a

515

00:20:48,100 --> 00:20:44,299

fighting ship so everything is is every

516

00:20:50,980 --> 00:20:48,110

every system on that ship it was built

517

00:20:53,500 --> 00:20:50,990

around the fire control systems around

518

00:20:56,590 --> 00:20:53,510

the aegis weapon system you know so

519

00:20:58,419 --> 00:20:56,600

everything ties in right and fire

520

00:21:00,250 --> 00:20:58,429

control you know it sounds like he

521

00:21:02,200 --> 00:21:00,260

talking about like putting out fires but

522

00:21:04,810 --> 00:21:02,210

fire control is about controlling the

523

00:21:05,770 --> 00:21:04,820

firing of things we put it pretty simple

524

00:21:07,480 --> 00:21:05,780

because a lot of people make that

525

00:21:09,280 --> 00:21:07,490

mistake I say okay well I was a fire

526

00:21:12,850 --> 00:21:09,290

control I didn't put fires out I made

527

00:21:15,520 --> 00:21:12,860

there yes okay so part of the whole 10

528

00:21:18,940 --> 00:21:15,530

computer technology is the what they

529

00:21:21,820 --> 00:21:18,950

call the CEC which is cooperative

530

00:21:23,860 --> 00:21:21,830

engagement capability yep cooperative

531

00:21:25,480 --> 00:21:23,870

engagement capability so the so now I

532

00:21:27,460 --> 00:21:25,490

can talk about primary duties on the

533

00:21:29,980 --> 00:21:27,470

system I can't talk about system

534

00:21:31,510 --> 00:21:29,990

specifics or how the recording works or

535

00:21:34,210 --> 00:21:31,520

you know anything like that I can tell

536

00:21:38,650 --> 00:21:34,220

you that the recording is tied into the

537

00:21:40,330 --> 00:21:38,660

actual hard disk so that's the reason

538

00:21:44,080 --> 00:21:40,340

why they had to actually wipe that

539

00:21:46,750 --> 00:21:44,090

entire hard disk to get rid of the data

540

00:21:51,460 --> 00:21:46,760

off of that because the operating system

541

00:21:53,680 --> 00:21:51,470

port and its space for its it where it

542

00:21:55,210 --> 00:21:53,690

stored all of this information where

543

00:21:58,090 --> 00:21:55,220

was on the same disk and it was not

544

00:22:00,279 --> 00:21:58,100

partitions so it was you know if it had

545

00:22:02,769 --> 00:22:00,289

been partitioned he you know we could

546

00:22:04,360 --> 00:22:02,779

have probably saved that data and or

547

00:22:07,240 --> 00:22:04,370

just deleted the data they wanted to

548

00:22:10,110 --> 00:22:07,250

kept the operating system on but that's

549

00:22:12,460 --> 00:22:10,120

the only reason why that that was wiped

550

00:22:13,960 --> 00:22:12,470

yeah so you're kind of jumping ahead a

551

00:22:15,399 --> 00:22:13,970

little bit this is cuz I I'm getting

552

00:22:18,039 --> 00:22:15,409

that too many too many at Twitter uh

553

00:22:19,690 --> 00:22:18,049

it's conversations you guys are killing

554

00:22:22,570 --> 00:22:19,700

me with that stuff oh my god I'm so I

555

00:22:25,499 --> 00:22:22,580

attract little things there's a lot of

556

00:22:28,330 --> 00:22:25,509

people chiming in on the odd Twitter I

557

00:22:30,430 --> 00:22:28,340

tried to rein it in a little bit but

558

00:22:33,850 --> 00:22:30,440

it's you know you can only rein it in so

559

00:22:38,350 --> 00:22:33,860

far people get very very passionate

560

00:22:40,720 --> 00:22:38,360

about this topic the the UFO topic like

561

00:22:42,909 --> 00:22:40,730

that I read uh ironically there's a

562

00:22:45,389 --> 00:22:42,919

fantasy novel called the Sword of Truth

563

00:22:47,590 --> 00:22:45,399

series that has this phrasing it says

564

00:22:49,240 --> 00:22:47,600

everybody will believe anything as long

565

00:22:52,629 --> 00:22:49,250

as they either fear it'll be true or

566

00:22:55,629 --> 00:22:52,639

they want it to be true and I I feel

567

00:22:59,259 --> 00:22:55,639

that that actually holds a lot of truth

568

00:23:01,119 --> 00:22:59,269

in this field because you've got people

569

00:23:03,340 --> 00:23:01,129

like yourself they're you know very

570

00:23:04,990 --> 00:23:03,350

skeptical of these things yeah people

571

00:23:06,519 --> 00:23:05,000

like you know other people that are just

572

00:23:08,680 --> 00:23:06,529

absolutely true believers I could tell

573

00:23:10,509 --> 00:23:08,690

them that you know I found a leprechaun

574

00:23:11,830 --> 00:23:10,519

and you know sorry I can get any film

575

00:23:13,629 --> 00:23:11,840

but you know they'll sit there and just

576

00:23:17,019 --> 00:23:13,639

listen to the story all day long when I

577

00:23:18,610 --> 00:23:17,029

never actually did any of that and and

578

00:23:20,320 --> 00:23:18,620

then you know you admit okay well I

579

00:23:24,249 --> 00:23:20,330

didn't sit by the leprechaun to like oh

580

00:23:26,440 --> 00:23:24,259

you got me you know yeah then again yeah

581

00:23:28,330 --> 00:23:26,450

yeah both sides of that house so I try

582

00:23:31,950 --> 00:23:28,340

to I fall somewhere in between I'm a

583

00:23:35,680 --> 00:23:31,960

absolute skeptical believer meaning that

584

00:23:38,560 --> 00:23:35,690

if I hadn't seen these things I wouldn't

585

00:23:42,090 --> 00:23:38,570

believe that they existed let's talk

586

00:23:44,379 --> 00:23:42,100

about the the tape the year so when

587

00:23:46,119 --> 00:23:44,389

kinda forever went out and he did an

588

00:23:47,649 --> 00:23:46,129

interrogation and he saw things and he

589

00:23:50,560 --> 00:23:47,659

came back and then another plane went

590

00:23:53,470 --> 00:23:50,570

out with Chad Underwood I think it's the

591

00:23:57,129 --> 00:23:53,480

name of the pilot and he he took video

592

00:23:59,080 --> 00:23:57,139

and this is the famous video that he has

593

00:24:01,419 --> 00:23:59,090

been on the news and everything and it

594

00:24:05,470 --> 00:24:01,429

shows a it's pretty grainy and low

595

00:24:07,070 --> 00:24:05,480

resolution and it shows a dark dot in

596

00:24:09,769 --> 00:24:07,080

the distance essentially

597

00:24:11,810 --> 00:24:09,779

and it kind of moves around as the

598

00:24:12,889 --> 00:24:11,820

camera moves around and there's some

599

00:24:14,750 --> 00:24:12,899

dispute as to whether he's actually

600

00:24:18,649 --> 00:24:14,760

moving or whether it's the camera moving

601  
00:24:23,090 --> 00:24:18,659  
I actually think it's more the plane

602  
00:24:25,850 --> 00:24:23,100  
jerking around and moving at first yeah

603  
00:24:28,220 --> 00:24:25,860  
but that will nothing hauls ass towards

604  
00:24:30,049 --> 00:24:28,230  
the end of the video that was an actual

605  
00:24:32,389 --> 00:24:30,059  
thing because actually it hauls ass out

606  
00:24:36,380 --> 00:24:32,399  
of the frame and then it comes back into

607  
00:24:38,570 --> 00:24:36,390  
the frame and when you saw well

608  
00:24:40,669 --> 00:24:38,580  
well we'll just say that due to certain

609  
00:24:42,710 --> 00:24:40,679  
aspects of the film itself and its

610  
00:24:44,570 --> 00:24:42,720  
originality you could tell that the

611  
00:24:47,029 --> 00:24:44,580  
plane was staying on the same bearing

612  
00:24:49,639 --> 00:24:47,039  
alright because you had to remember the

613  
00:24:51,769 --> 00:24:49,649

original film has all the information

614

00:24:54,500 --> 00:24:51,779

along the edges of its bearing its

615

00:24:57,049 --> 00:24:54,510

admits its angle the way that the plane

616

00:25:00,169 --> 00:24:57,059

planes flying so mm-hmm that's how they

617

00:25:01,820 --> 00:25:00,179

can tell whether or not you know it's

618

00:25:03,440 --> 00:25:01,830

the object moving out of the frame or

619

00:25:06,620 --> 00:25:03,450

the frame moving out of the event away

620

00:25:08,000 --> 00:25:06,630

from the object but yeah I've spent a

621

00:25:10,159 --> 00:25:08,010

lot of time looking at that you know

622

00:25:11,659 --> 00:25:10,169

obviously I haven't seen the the

623

00:25:14,450 --> 00:25:11,669

original just seeing you know what's on

624

00:25:16,370 --> 00:25:14,460

the internet and I tend to think that

625

00:25:18,379 --> 00:25:16,380

it's the camera moving not the plane

626

00:25:21,379 --> 00:25:18,389

moving or the object moving but the

627

00:25:22,250 --> 00:25:21,389

camera itself they can have the ability

628

00:25:24,860 --> 00:25:22,260

to move also

629

00:25:26,960 --> 00:25:24,870

yeah but the camera like it's also it's

630

00:25:29,629 --> 00:25:26,970

it switches between like the infrared

631

00:25:31,970 --> 00:25:29,639

and the TV mode and it also breezes

632

00:25:35,090 --> 00:25:31,980

between different zoom lenses as well so

633

00:25:36,529 --> 00:25:35,100

it would have to kind of rotate now with

634

00:25:38,960 --> 00:25:36,539

the flurry when you look at it it's got

635

00:25:40,399 --> 00:25:38,970

all these different lenses on it and a

636

00:25:42,259 --> 00:25:40,409

lot of times when you're seeing that

637

00:25:43,970 --> 00:25:42,269

movement it's just the flared part

638

00:25:49,009 --> 00:25:43,980

itself actually just adjusting to the

639

00:25:50,330 --> 00:25:49,019

next lens and then of course if he's

640

00:25:52,039 --> 00:25:50,340

slipping through those different modes

641

00:25:55,279 --> 00:25:52,049

at that fast you will see like a

642

00:25:57,680 --> 00:25:55,289

distortion between each time he moves it

643

00:25:59,480 --> 00:25:57,690

to a different mode because the actual

644

00:26:03,350 --> 00:25:59,490

physical pod has to move to a different

645

00:26:06,889 --> 00:26:03,360

lens hey except for when I think it's

646

00:26:08,720 --> 00:26:06,899

thermal to optical I think thank you

647

00:26:11,210 --> 00:26:08,730

that's all through the same the same

648

00:26:14,539 --> 00:26:11,220

camera but I'd have to edit to go back

649

00:26:16,460 --> 00:26:14,549

and look at it but it's a whenever you

650

00:26:19,639 --> 00:26:16,470

look at these flare pods around pods

651  
00:26:20,630 --> 00:26:19,649  
yeah and on the f-18 they almost kind of

652  
00:26:23,000 --> 00:26:20,640  
look like a little

653  
00:26:25,549 --> 00:26:23,010  
we'll missile with like a little camera

654  
00:26:28,850 --> 00:26:25,559  
thing at the end of it and you know it

655  
00:26:31,190 --> 00:26:28,860  
can move in multiple directions looking

656  
00:26:34,399 --> 00:26:31,200  
at the actual video that you guys got to

657  
00:26:37,340 --> 00:26:34,409  
see it's looks like it was compressed

658  
00:26:39,740 --> 00:26:37,350  
horribly and that it was like basically

659  
00:26:42,289 --> 00:26:39,750  
made for like hey check this out like

660  
00:26:44,210 --> 00:26:42,299  
through an email back that because it

661  
00:26:46,580 --> 00:26:44,220  
would have been small enough to fit in

662  
00:26:48,350 --> 00:26:46,590  
an email so it kind of really just looks

663  
00:26:51,740 --> 00:26:48,360

like somebody just compressed it to send

664

00:26:54,379 --> 00:26:51,750

to a regular like Gmail or yahoo account

665

00:26:56,120 --> 00:26:54,389

so you watched the the original video

666

00:26:59,090 --> 00:26:56,130

did you watch it like as it happened was

667

00:27:01,430 --> 00:26:59,100

like a live feed I can't say yes because

668

00:27:03,950 --> 00:27:01,440

I was only under the impression that it

669

00:27:05,539 --> 00:27:03,960

was a live feed there's some question

670

00:27:07,700 --> 00:27:05,549

whether we had the capabilities to do a

671

00:27:09,320 --> 00:27:07,710

live feed at the time

672

00:27:12,110 --> 00:27:09,330

I haven't been able to validated that it

673

00:27:14,620 --> 00:27:12,120

was live so I can stand that it was with

674

00:27:17,299 --> 00:27:14,630

sin they had to have been with analysis

675

00:27:19,759 --> 00:27:17,309

because I mean at a certain point it was

676  
00:27:21,529 --> 00:27:19,769  
no longer on the secret driving because

677  
00:27:24,740 --> 00:27:21,539  
I remember we watched it all the way

678  
00:27:28,580 --> 00:27:24,750  
through to the end and then the camera

679  
00:27:30,980 --> 00:27:28,590  
flips off as the Jets landing and then

680  
00:27:32,810 --> 00:27:30,990  
it disappears for probably about maybe a

681  
00:27:36,379 --> 00:27:32,820  
minute and then you're able to actually

682  
00:27:40,610 --> 00:27:36,389  
go back from the beginning and play it

683  
00:27:43,100 --> 00:27:40,620  
again hmm but it wasn't until it was

684  
00:27:47,060 --> 00:27:43,110  
yeah because he was loading onto the

685  
00:27:48,529 --> 00:27:47,070  
server as as we were watching so I I was

686  
00:27:49,549 --> 00:27:48,539  
just under the impression because of

687  
00:27:51,110 --> 00:27:49,559  
what people were saying at the time

688  
00:27:52,700 --> 00:27:51,120

because somebody had grabbed me and said

689

00:27:55,669 --> 00:27:52,710

hey they're doing the intercept let's go

690

00:27:57,110 --> 00:27:55,679

watch it watch it you know he goes well

691

00:27:58,850 --> 00:27:57,120

it's on the secret this it's on the

692

00:28:01,310 --> 00:27:58,860

secret land so let's go take a look at

693

00:28:03,620 --> 00:28:01,320

so they they you know so you were

694

00:28:05,450 --> 00:28:03,630

actually watching it later that's for I

695

00:28:07,909 --> 00:28:05,460

don't know I'd be a dead honest with you

696

00:28:09,830 --> 00:28:07,919

if I had been smart at the time and

697

00:28:11,090 --> 00:28:09,840

wrote down times and stuff like that I

698

00:28:14,060 --> 00:28:11,100

could have definitely correlated that

699

00:28:17,570 --> 00:28:14,070

better but you know Murrow early 20s 15

700

00:28:19,820 --> 00:28:17,580

years ago I don't remember the timeframe

701  
00:28:22,220 --> 00:28:19,830  
is you know I know now exactly when they

702  
00:28:23,960 --> 00:28:22,230  
did the intercepts but I couldn't tell

703  
00:28:26,330 --> 00:28:23,970  
you when I actually watched it that's

704  
00:28:29,060 --> 00:28:26,340  
why I won't validate whether I can

705  
00:28:30,649 --> 00:28:29,070  
whether I saw it live or not I was just

706  
00:28:32,549 --> 00:28:30,659  
under the impression that it was yeah

707  
00:28:35,249 --> 00:28:32,559  
then I could say

708  
00:28:37,230 --> 00:28:35,259  
that would be kind of exciting so could

709  
00:28:39,840 --> 00:28:37,240  
you like like characterize like what's

710  
00:28:41,669 --> 00:28:39,850  
the the big differences between what you

711  
00:28:43,889 --> 00:28:41,679  
saw and and what's there now like

712  
00:28:46,289 --> 00:28:43,899  
obviously it was like higher resolution

713  
00:28:48,210 --> 00:28:46,299

but what could you see about the objects

714

00:28:48,989 --> 00:28:48,220

that you can't see in the video that's

715

00:28:51,539 --> 00:28:48,999

out there now

716

00:28:53,700 --> 00:28:51,549

I won't at one point when he's flipping

717

00:28:56,700 --> 00:28:53,710

through the cameras he kind of kind of

718

00:28:59,039 --> 00:28:56,710

zooms in on the object and you can see

719

00:29:01,619 --> 00:28:59,049

it's definite outline shape the tic-tac

720

00:29:02,909 --> 00:29:01,629

shape you can see the it's in the

721

00:29:06,629 --> 00:29:02,919

irregular camera mode so you're not

722

00:29:08,879 --> 00:29:06,639

seeing the flare light up we are

723

00:29:10,799 --> 00:29:08,889

actually seeing it's actual you know

724

00:29:14,580 --> 00:29:10,809

it's got like a phosphorescence to it

725

00:29:16,139 --> 00:29:14,590

but like that's kind of a wrong word for

726

00:29:18,149 --> 00:29:16,149

it because like all right so if you

727

00:29:20,940 --> 00:29:18,159

think like a regular light bulb that has

728

00:29:24,029 --> 00:29:20,950

a phosphorous and swings eye a frosted

729

00:29:25,680 --> 00:29:24,039

cover right it generally kind of starts

730

00:29:27,090 --> 00:29:25,690

really really bright on the center and

731

00:29:29,879 --> 00:29:27,100

then gets a little lighter as it goes

732

00:29:32,970 --> 00:29:29,889

out yeah where this would be one uniform

733

00:29:35,629 --> 00:29:32,980

color throughout all of the area that

734

00:29:38,430 --> 00:29:35,639

you're seeing it didn't have like a

735

00:29:41,789 --> 00:29:38,440

bright center it was just all this all

736

00:29:45,139 --> 00:29:41,799

the same brightness in the video it's

737

00:29:47,909 --> 00:29:45,149

it's dark now once it goes to the FLIR

738

00:29:51,359 --> 00:29:47,919

it's almost it's almost like a negative

739

00:29:53,489 --> 00:29:51,369

look to it and it goes dark and so

740

00:29:55,049 --> 00:29:53,499

that's mmm yeah that happens with a lot

741

00:29:57,869 --> 00:29:55,059

of jets and stuff whether you look at a

742

00:29:59,789 --> 00:29:57,879

lot of FLIR photography now the images

743

00:30:02,580 --> 00:29:59,799

go dark and then actually clear but when

744

00:30:07,200 --> 00:30:02,590

you go to actual you can did they light

745

00:30:09,509 --> 00:30:07,210

enough so the like in the in the video

746

00:30:11,730 --> 00:30:09,519

that's on the internet right now you you

747

00:30:14,009 --> 00:30:11,740

see it shows the two modes that it says

748

00:30:16,259 --> 00:30:14,019

IR for the infrared which is the the

749

00:30:19,529 --> 00:30:16,269

Fleur forward-looking infrared and it

750

00:30:23,100 --> 00:30:19,539

has T V which is the the visible light

751  
00:30:25,769 --> 00:30:23,110  
but yeah the in the TV mode it's still

752  
00:30:29,159 --> 00:30:25,779  
dark as well I think it's due to the

753  
00:30:31,109 --> 00:30:29,169  
poor resolution because when we saw it

754  
00:30:33,180 --> 00:30:31,119  
even though the craft itself was dark

755  
00:30:35,700 --> 00:30:33,190  
you could tell it was still emanating a

756  
00:30:38,190 --> 00:30:35,710  
light and you could still you could see

757  
00:30:39,779 --> 00:30:38,200  
the actual outline of it did you see

758  
00:30:42,600 --> 00:30:39,789  
that there was some type of appendages

759  
00:30:44,129 --> 00:30:42,610  
at the bottom just I couldn't I couldn't

760  
00:30:45,810 --> 00:30:44,139  
tell you like exactly what the

761  
00:30:46,710 --> 00:30:45,820  
appendages looked like

762  
00:30:50,369 --> 00:30:46,720  
so you could tell that there is

763  
00:30:52,409 --> 00:30:50,379

something protruding from everything but

764

00:30:55,049 --> 00:30:52,419

other than those everything else looks

765

00:30:56,399 --> 00:30:55,059

pretty smooth yeah that's really

766

00:31:00,389 --> 00:30:56,409

interesting that like like you're saying

767

00:31:03,440 --> 00:31:00,399

that it was light in that video but in

768

00:31:06,830 --> 00:31:03,450

the the video we have now it looks dark

769

00:31:09,570 --> 00:31:06,840

it's kind of like I figured never be

770

00:31:11,999 --> 00:31:09,580

alive you were back in this VHS days

771

00:31:14,340 --> 00:31:12,009

recorded something and then restored it

772

00:31:16,289 --> 00:31:14,350

and rerecord it and then word it's too

773

00:31:17,849 --> 00:31:16,299

many times all right I'm gonna copy too

774

00:31:20,190 --> 00:31:17,859

many times huh

775

00:31:22,669 --> 00:31:20,200

I got a feeling that this tape is

776

00:31:26,129 --> 00:31:22,679

there's a version that we got that had a

777

00:31:30,960 --> 00:31:26,139

been recopy quite a few times before it

778

00:31:33,419 --> 00:31:30,970

was ever sent digital hmm-hmm have you

779

00:31:40,259 --> 00:31:33,429

ever tried to draw a picture of what

780

00:31:43,680 --> 00:31:40,269

you've seen um I haven't but I know a

781

00:31:47,909 --> 00:31:43,690

lot of people have for me for me it was

782

00:31:50,999 --> 00:31:47,919

a the what I saw was a big irrelevant to

783

00:31:53,669 --> 00:31:51,009

what it could do and so I've always just

784

00:31:55,710 --> 00:31:53,679

been trying to figure out exactly how it

785

00:31:58,019 --> 00:31:55,720

worked so it really was never really

786

00:31:59,700 --> 00:31:58,029

important for me to draw it because the

787

00:32:02,009 --> 00:31:59,710

the depictions that I've seen of it

788

00:32:05,609 --> 00:32:02,019

already are are close enough to being

789

00:32:08,039 --> 00:32:05,619

accurate to what I saw now if you take

790

00:32:12,779 --> 00:32:08,049

even the garbage film that they released

791

00:32:15,869 --> 00:32:12,789

and you speed it up and you loop it you

792

00:32:17,310 --> 00:32:15,879

can start seeing the way the things the

793

00:32:18,629 --> 00:32:17,320

way the thing actually moves there's

794

00:32:21,869 --> 00:32:18,639

there was somebody that told me that

795

00:32:23,820 --> 00:32:21,879

they actually did it and swears to God

796

00:32:27,180 --> 00:32:23,830

that it actually changed shape a little

797

00:32:29,339 --> 00:32:27,190

bit and hey very well could be but I

798

00:32:31,859 --> 00:32:29,349

would like to get a better copy of it

799

00:32:34,349 --> 00:32:31,869

and do that but with such a small amount

800

00:32:36,930 --> 00:32:34,359

of film I don't know how accurate that

801  
00:32:40,710 --> 00:32:36,940  
would be so you're saying something that

802  
00:32:42,989 --> 00:32:40,720  
maybe you when you saw a giant shape or

803  
00:32:45,149 --> 00:32:42,999  
in in the video and talk about now

804  
00:32:47,339 --> 00:32:45,159  
somebody's reported to me that that's

805  
00:32:49,499 --> 00:32:47,349  
what he told me that he did is he took

806  
00:32:52,769 --> 00:32:49,509  
it from the very moment that it started

807  
00:32:55,200 --> 00:32:52,779  
to accelerate in the film itself to the

808  
00:32:57,900 --> 00:32:55,210  
very last moment you see in last frame

809  
00:33:00,510 --> 00:32:57,910  
and he broke it down to

810  
00:33:02,010 --> 00:33:00,520  
whatever's smaller than the frames I

811  
00:33:03,990 --> 00:33:02,020  
don't know anything about the

812  
00:33:05,790 --> 00:33:04,000  
filmography or anything like that so but

813  
00:33:08,250 --> 00:33:05,800

he said he could break it down to like

814

00:33:10,560 --> 00:33:08,260

even subframes like even smaller and

815

00:33:13,470 --> 00:33:10,570

then there's a little bit and then he

816

00:33:17,190 --> 00:33:13,480

can actually and then speed it up the

817

00:33:19,320 --> 00:33:17,200

film up to see you know more

818

00:33:21,450 --> 00:33:19,330

scientifically movement of the object so

819

00:33:23,580 --> 00:33:21,460

if you have that kind of skill set you

820

00:33:25,860 --> 00:33:23,590

could probably try that and get a better

821

00:33:27,630 --> 00:33:25,870

idea of like what it looked like I do

822

00:33:30,150 --> 00:33:27,640

but I think a lot of times when people

823

00:33:32,730 --> 00:33:30,160

do things like that they they're kind of

824

00:33:34,970 --> 00:33:32,740

adding things to the film that aren't

825

00:33:37,470 --> 00:33:34,980

actually there unintentionally because

826

00:33:39,810 --> 00:33:37,480

there really isn't very much information

827

00:33:41,130 --> 00:33:39,820

I mean you've seen that now yeah that's

828

00:33:42,630 --> 00:33:41,140

you know and that's a lot of the problem

829

00:33:45,150 --> 00:33:42,640

that's why yeah that's why it's like for

830

00:33:46,830 --> 00:33:45,160

me I'm surprised that this is taking off

831

00:33:49,800 --> 00:33:46,840

because it's such a I mean it is an

832

00:33:51,600 --> 00:33:49,810

outstanding story it is but it's it's I

833

00:33:54,090 --> 00:33:51,610

mean the story itself suffered pretty

834

00:33:55,920 --> 00:33:54,100

benign you know okay I saw these objects

835

00:33:58,380 --> 00:33:55,930

they did some crazy things they were

836

00:34:01,860 --> 00:33:58,390

solid I know that they were solid

837

00:34:04,290 --> 00:34:01,870

we had eyes on them we've seen the shape

838

00:34:06,480 --> 00:34:04,300

we have a video you know I got to see a

839

00:34:08,820 --> 00:34:06,490

much better video but I don't expect

840

00:34:10,440 --> 00:34:08,830

anybody just believe me that I that we

841

00:34:13,110 --> 00:34:10,450

were able to see that the only thing I

842

00:34:15,450 --> 00:34:13,120

have is collaboration and generally I'd

843

00:34:18,149 --> 00:34:15,460

say 80% of all of our stories are moment

844

00:34:20,010 --> 00:34:18,159

dead-on exact which generally only

845

00:34:21,629 --> 00:34:20,020

happens if the event actually does

846

00:34:25,649 --> 00:34:21,639

happen you know and I only believe about

847

00:34:27,119 --> 00:34:25,659

20% of what everybody says anyways yeah

848

00:34:28,770 --> 00:34:27,129

I certainly like you got a lot of people

849

00:34:32,970 --> 00:34:28,780

telling the same story about the radar

850

00:34:35,879 --> 00:34:32,980

and yeah having these these these radar

851  
00:34:37,860 --> 00:34:35,889  
returns and having them thinking that

852  
00:34:42,300 --> 00:34:37,870  
they are craft but you've only got like

853  
00:34:44,940 --> 00:34:42,310  
the two people you got fray VAR freefall

854  
00:34:46,010 --> 00:34:44,950  
and the female pilot is anonymous but

855  
00:34:48,899 --> 00:34:46,020  
she appeared in one of the TV shows

856  
00:34:50,669 --> 00:34:48,909  
giving the actual accounts of of the

857  
00:34:55,010 --> 00:34:50,679  
movement other other people who actually

858  
00:34:57,540 --> 00:34:55,020  
saw the craft itself besides those two

859  
00:34:59,100 --> 00:34:57,550  
for me from what I understand that

860  
00:35:01,290 --> 00:34:59,110  
they're the people that were up in the

861  
00:35:03,270 --> 00:35:01,300  
heart guy at the time actually were able

862  
00:35:04,920 --> 00:35:03,280  
to see this thing right out of their

863  
00:35:07,530 --> 00:35:04,930

port window that they think I had gotten

864

00:35:10,050 --> 00:35:07,540

close enough that they could see in

865

00:35:11,290 --> 00:35:10,060

every detail of the you know of the ship

866

00:35:14,500 --> 00:35:11,300

even close they they

867

00:35:16,930 --> 00:35:14,510

that probably the closest eyewitnesses

868

00:35:20,020 --> 00:35:16,940

in the entire event but none of them

869

00:35:21,610 --> 00:35:20,030

come forward to heaven none of them said

870

00:35:23,590 --> 00:35:21,620

that's the weird thing about this

871

00:35:26,200 --> 00:35:23,600

they're the only ones that had to sign a

872

00:35:28,390 --> 00:35:26,210

nondisclosure everybody aboard that

873

00:35:30,400 --> 00:35:28,400

plane had to sign a nondisclosure now

874

00:35:32,350 --> 00:35:30,410

I've only counted this for two things

875

00:35:34,140 --> 00:35:32,360

either they saw something we all didn't

876

00:35:38,110 --> 00:35:34,150

and aren't allowed to talk about it like

877

00:35:39,430 --> 00:35:38,120

a ship identification or an ability or

878

00:35:42,250 --> 00:35:39,440

you know because they have a lot of

879

00:35:44,260 --> 00:35:42,260

passive devices on that on that on the

880

00:35:46,270 --> 00:35:44,270

earth that way they can listen to

881

00:35:48,910 --> 00:35:46,280

different different frequencies of RF

882

00:35:51,790 --> 00:35:48,920

different you know IR frequencies

883

00:35:53,950 --> 00:35:51,800

different you know they've got all these

884

00:35:56,290 --> 00:35:53,960

passive systems just constantly

885

00:35:58,870 --> 00:35:56,300

collecting but tons of data about the

886

00:36:01,690 --> 00:35:58,880

battlefield I mean it's a there's reason

887

00:36:04,300 --> 00:36:01,700

we call it our eyes in the sky oh yeah

888

00:36:05,950 --> 00:36:04,310

to thee boy yeah the Hawkeye just for

889

00:36:07,870 --> 00:36:05,960

people who don't know is like one of

890

00:36:11,350 --> 00:36:07,880

their these radar planes that had a big

891

00:36:13,690 --> 00:36:11,360

radar radio I'm on the top of the plane

892

00:36:15,210 --> 00:36:13,700

and it gives a pretty good radar

893

00:36:21,330 --> 00:36:15,220

coverage over a wide area

894

00:36:25,300 --> 00:36:21,340

yeah so yeah I'm a bit of a skeptic I

895

00:36:28,090 --> 00:36:25,310

run like debunking website you a skeptic

896

00:36:33,280 --> 00:36:28,100

no way wait wait wait a minute I'm on a

897

00:36:36,310 --> 00:36:33,290

skeptic show I guess your agents uh put

898

00:36:39,730 --> 00:36:36,320

the wrong throw show yeah and I I don't

899

00:36:43,450 --> 00:36:39,740

care whose show I go on man I I saw what

900

00:36:45,520 --> 00:36:43,460

I saw it's not gonna change it's no I I

901  
00:36:47,860 --> 00:36:45,530  
don't doubt you know what you what you

902  
00:36:49,600 --> 00:36:47,870  
saying it ain't gonna dog in a race

903  
00:36:51,490 --> 00:36:49,610  
whether you believe me or not so it's

904  
00:36:53,770 --> 00:36:51,500  
it's you know if I did believe my I do

905  
00:36:55,870 --> 00:36:53,780  
believe you yeah I guess like my skeptic

906  
00:36:59,380 --> 00:36:55,880  
point of view is yeah people saw what

907  
00:37:02,710 --> 00:36:59,390  
they saw that it was not what they ended

908  
00:37:04,540 --> 00:37:02,720  
up thinking it was yeah and that I've

909  
00:37:06,790 --> 00:37:04,550  
got so many different theories from the

910  
00:37:10,300 --> 00:37:06,800  
most in wild by nine theories but most

911  
00:37:12,640 --> 00:37:10,310  
of my theories are based in at least a

912  
00:37:16,330 --> 00:37:12,650  
grain a scientific truth like hey like

913  
00:37:19,060 --> 00:37:16,340

it could happen if XY and z are true

914

00:37:21,670 --> 00:37:19,070

then this could definitely happen yeah

915

00:37:24,540 --> 00:37:21,680

this hypothesis under quantum mechanics

916

00:37:27,630 --> 00:37:24,550

is true then this could happen

917

00:37:30,030 --> 00:37:27,640

you know so I basically started with you

918

00:37:32,940 --> 00:37:30,040

know the end product and worked my way

919

00:37:35,040 --> 00:37:32,950

back along a lot of different pathways

920

00:37:37,590 --> 00:37:35,050

it's just kinda you know and sometimes

921

00:37:39,810 --> 00:37:37,600

it's just fun to do the wild ideas you

922

00:37:41,040 --> 00:37:39,820

know yeah you know be honest with you a

923

00:37:45,000 --> 00:37:41,050

lot of people don't even want to hear

924

00:37:47,280 --> 00:37:45,010

about my benign ideas yeah yes you say

925

00:37:48,930 --> 00:37:47,290

you're like you you you have benign

926  
00:37:50,820 --> 00:37:48,940  
ideas about you know what this craft

927  
00:37:52,560 --> 00:37:50,830  
actually was but I just

928  
00:37:56,100 --> 00:37:52,570  
is it possible to even dial it back a

929  
00:38:01,020 --> 00:37:56,110  
little bit more than that and ask you

930  
00:38:02,760 --> 00:38:01,030  
know how how absolutely convinced are

931  
00:38:05,880 --> 00:38:02,770  
you that the radar returns actually

932  
00:38:07,530 --> 00:38:05,890  
showed an actual craft I am a hundred

933  
00:38:09,000 --> 00:38:07,540  
percent sure about that and that's

934  
00:38:10,890 --> 00:38:09,010  
that's about one of the few things that

935  
00:38:13,760 --> 00:38:10,900  
I can honestly say that these were

936  
00:38:17,100 --> 00:38:13,770  
actual solid tracks

937  
00:38:19,590 --> 00:38:17,110  
so initially knowing the system the

938  
00:38:23,610 --> 00:38:19,600

world as well as I do it'd be like

939

00:38:25,440 --> 00:38:23,620

saying I don't know you know if you're

940

00:38:27,120 --> 00:38:25,450

looking at a rainbow you know what's the

941

00:38:30,180 --> 00:38:27,130

chances of it's actually diffused light

942

00:38:33,780 --> 00:38:30,190

through through a cloud you know he all

943

00:38:36,560 --> 00:38:33,790

right it's a it's a yeah it is you know

944

00:38:40,500 --> 00:38:36,570

or somebody could be you know just

945

00:38:43,860 --> 00:38:40,510

artificially making one there should be

946

00:38:45,450 --> 00:38:43,870

a high level tech that we couldn't but

947

00:38:48,060 --> 00:38:45,460

either way even if it's high level tech

948

00:38:51,570 --> 00:38:48,070

spoofing a system that is ridiculously

949

00:38:53,610 --> 00:38:51,580

hard to move that's still amazing so

950

00:38:56,460 --> 00:38:53,620

even if you're right and this is

951  
00:38:58,490 --> 00:38:56,470  
something else it's still amazing that

952  
00:39:00,690 --> 00:38:58,500  
they could do it and it's still a

953  
00:39:03,180 --> 00:39:00,700  
technology that's far beyond anything

954  
00:39:06,030 --> 00:39:03,190  
that we have on the field yeah I guess

955  
00:39:07,680 --> 00:39:06,040  
my most my most banal explanation if I'm

956  
00:39:10,410 --> 00:39:07,690  
like you're making a list of possible

957  
00:39:13,020 --> 00:39:10,420  
explanations the most banal one is that

958  
00:39:16,230 --> 00:39:13,030  
it is faulty radar returns from

959  
00:39:18,630 --> 00:39:16,240  
something like cirrus clouds in high

960  
00:39:21,150 --> 00:39:18,640  
altitude ice clouds and I know Kevin day

961  
00:39:25,230 --> 00:39:21,160  
said that at some point the captain

962  
00:39:26,880 --> 00:39:25,240  
suggested that it might be ice no he was

963  
00:39:30,090 --> 00:39:26,890

a he was a cover story at the end just

964

00:39:32,640 --> 00:39:30,100

trying to try to throw people off it was

965

00:39:35,610 --> 00:39:32,650

kind of an after-the-fact half-baked

966

00:39:37,980 --> 00:39:35,620

thought from one person on the ships

967

00:39:40,859 --> 00:39:37,990

it's not caught on yeah

968

00:39:47,370 --> 00:39:40,869

and it's a because it spontaneously

969

00:39:51,240 --> 00:39:47,380

forming ice in the atmosphere now if all

970

00:39:54,150 --> 00:39:51,250

right so ice is pretty dense and will

971

00:39:57,900 --> 00:39:54,160

definitely give us a return but

972

00:39:59,730 --> 00:39:57,910

generally an object that large full of

973

00:40:00,450 --> 00:39:59,740

ice if it was a piece of ice that's

974

00:40:03,000 --> 00:40:00,460

large

975

00:40:04,950 --> 00:40:03,010

it wouldn't be able to stay aloft I mean

976  
00:40:07,079 --> 00:40:04,960  
it's just honestly yeah yeah in too much

977  
00:40:09,210 --> 00:40:07,089  
mass well yeah I wouldn't have imagined

978  
00:40:11,700 --> 00:40:09,220  
a big ice cube fully out of the sky I

979  
00:40:14,099 --> 00:40:11,710  
mean you would have to have a ridiculous

980  
00:40:17,010 --> 00:40:14,109  
of strats just to keep it mm-hmm

981  
00:40:21,060 --> 00:40:17,020  
even from you know but it wouldn't only

982  
00:40:25,950 --> 00:40:21,070  
drop as fast right what he suggests to

983  
00:40:28,440 --> 00:40:25,960  
me and is that it would be clouds rather

984  
00:40:30,450 --> 00:40:28,450  
than than you know falling ice a big big

985  
00:40:32,550 --> 00:40:30,460  
block of ice I think because we talked

986  
00:40:35,220 --> 00:40:32,560  
about it being at 28,000 feet which is

987  
00:40:39,210 --> 00:40:35,230  
in the range of cirrus clouds and it's

988  
00:40:41,040 --> 00:40:39,220

moving south ish I'm not sure the exact

989

00:40:43,770 --> 00:40:41,050

exact size is that heading that they had

990

00:40:46,200 --> 00:40:43,780

and at about a hundred and fifteen miles

991

00:40:50,420 --> 00:40:46,210

an hour about 100 knots which is about

992

00:40:53,310 --> 00:40:50,430

the speed of the wind of their yeah now

993

00:40:57,089 --> 00:40:53,320

I would say I would say you might be

994

00:40:59,790 --> 00:40:57,099

onto something but I've seen serious

995

00:41:01,950 --> 00:40:59,800

clouds on the sky and I've seen serious

996

00:41:05,460 --> 00:41:01,960

clouds when they actually have ice

997

00:41:07,859 --> 00:41:05,470

crystals in them and basically it looks

998

00:41:10,579 --> 00:41:07,869

like a disrupt like you'll see the

999

00:41:13,230 --> 00:41:10,589

entire radar screen you look like a a

1000

00:41:16,380 --> 00:41:13,240

disrupted pattern you won't see any one

1001

00:41:19,920 --> 00:41:16,390

solid track when I see is small these

1002

00:41:21,750 --> 00:41:19,930

small kind of wisps and our system

1003

00:41:23,520 --> 00:41:21,760

wouldn't immediately say okay well

1004

00:41:25,020 --> 00:41:23,530

that's not a solid track and it would

1005

00:41:29,760 --> 00:41:25,030

literally just erase them from the

1006

00:41:32,730 --> 00:41:29,770

screen mm-hmm okay so even if there were

1007

00:41:34,650 --> 00:41:32,740

huge solid optics you know like say it

1008

00:41:38,130 --> 00:41:34,660

was faint and spontaneously forming ice

1009

00:41:39,990 --> 00:41:38,140

crystals and say they weren't a big huge

1010

00:41:42,420 --> 00:41:40,000

block and they were just small crystals

1011

00:41:46,020 --> 00:41:42,430

that could keep on an updraft you would

1012

00:41:49,050 --> 00:41:46,030

still just see a very ever-shifting it

1013

00:41:51,030 --> 00:41:49,060

would wouldn't be one solid track you

1014

00:41:51,690 --> 00:41:51,040

know it wouldn't be because the entire

1015

00:41:53,579 --> 00:41:51,700

cloud

1016

00:41:58,530 --> 00:41:53,589

self is gonna take up a lot more space

1017

00:42:00,510 --> 00:41:58,540

than an f-18 yeah you know and so so the

1018

00:42:03,120 --> 00:42:00,520

logic there's logically thinking through

1019

00:42:05,370 --> 00:42:03,130

that right say say we are attracting

1020

00:42:08,609 --> 00:42:05,380

that cloud that cloud is going to

1021

00:42:11,670 --> 00:42:08,619

immediately look like clutter and then

1022

00:42:14,010 --> 00:42:11,680

our radar will clean it up and then only

1023

00:42:16,140 --> 00:42:14,020

will only see the more solid parts of it

1024

00:42:18,630 --> 00:42:16,150

which would mean the most dense portions

1025

00:42:21,960 --> 00:42:18,640

that have ice in them and then once it

1026

00:42:22,950 --> 00:42:21,970

realizes that those are just sporadic

1027

00:42:25,290 --> 00:42:22,960

because they're gonna move around

1028

00:42:28,349 --> 00:42:25,300

they're not going to be you know in just

1029

00:42:30,990 --> 00:42:28,359

one little circle because once they got

1030

00:42:32,000 --> 00:42:31,000

dense enough they just fall alright but

1031

00:42:34,890 --> 00:42:32,010

I wasn't really thinking so much about

1032

00:42:37,920 --> 00:42:34,900

tracking a cloud as in tracking the

1033

00:42:41,069 --> 00:42:37,930

whole cloud as an object more as a kind

1034

00:42:44,910 --> 00:42:41,079

of like an optical RF not no optical

1035

00:42:46,650 --> 00:42:44,920

obviously bit RF type thing where the

1036

00:42:50,010 --> 00:42:46,660

ice crystals are arranged in such a way

1037

00:42:51,660 --> 00:42:50,020

that it reflects the radar beam in a

1038

00:42:55,710 --> 00:42:51,670

certain way now you know like

1039

00:42:57,809 --> 00:42:55,720

coronis and halos now that would work if

1040

00:42:58,829 --> 00:42:57,819

like you were talking about like a you

1041

00:43:02,730 --> 00:42:58,839

know a police radar

1042

00:43:05,220 --> 00:43:02,740

you know nice radar it will feel foggy

1043

00:43:06,660 --> 00:43:05,230

FEX it weather conditions affect it so

1044

00:43:10,260 --> 00:43:06,670

you know you can get out of your ticket

1045

00:43:14,220 --> 00:43:10,270

that way but with this system we're

1046

00:43:16,859 --> 00:43:14,230

pumping so much power out that that

1047

00:43:19,530 --> 00:43:16,869

cloud doesn't stand a chance we're just

1048

00:43:22,380 --> 00:43:19,540

we could probably burn straight through

1049

00:43:24,770 --> 00:43:22,390

it you if you if you took a turkey and

1050

00:43:28,319 --> 00:43:24,780

you put it on the outside of the that

1051  
00:43:30,900 --> 00:43:28,329  
array it would cook the turkey hmm I

1052  
00:43:35,790 --> 00:43:30,910  
mean we're talking this is a very

1053  
00:43:37,589 --> 00:43:35,800  
powerful radar I mean I don't think it

1054  
00:43:40,160 --> 00:43:37,599  
could change weather conditions but I

1055  
00:43:43,319 --> 00:43:40,170  
can guarantee that a cloud full of ice

1056  
00:43:46,460 --> 00:43:43,329  
wouldn't really be a problem for it so I

1057  
00:43:49,530 --> 00:43:46,470  
guess let the program here is the and

1058  
00:43:54,359 --> 00:43:49,540  
the precise technical details of the

1059  
00:43:57,349 --> 00:43:54,369  
this by radar are classified yeah they

1060  
00:44:00,540 --> 00:43:57,359  
are classified but I can tell you that

1061  
00:44:02,640 --> 00:44:00,550  
any type of cloud on this planet doesn't

1062  
00:44:04,340 --> 00:44:02,650  
do any problem for this radar whether it

1063  
00:44:06,110 --> 00:44:04,350

has full of ice

1064

00:44:07,850 --> 00:44:06,120

and the only thing that would stop it is

1065

00:44:10,220 --> 00:44:07,860

if there was literally a plane inside

1066

00:44:12,410 --> 00:44:10,230

the cloud all right well it's suppose

1067

00:44:14,840 --> 00:44:12,420

like okay I hear what you're saying the

1068

00:44:17,060 --> 00:44:14,850

how how would I personally go about

1069

00:44:19,670 --> 00:44:17,070

verifying that there I hear you saying

1070

00:44:24,050 --> 00:44:19,680

it and join us because you're a prophet

1071

00:44:25,520 --> 00:44:24,060

technician diamond ages technician

1072

00:44:27,740 --> 00:44:25,530

that's not the only way you would ever

1073

00:44:30,470 --> 00:44:27,750

be able to know is is is it something

1074

00:44:32,810 --> 00:44:30,480

that would essentially be covered by you

1075

00:44:34,130 --> 00:44:32,820

know secrecy and that I wouldn't be able

1076

00:44:35,900 --> 00:44:34,140

to get an answer if I went looking

1077

00:44:37,640 --> 00:44:35,910

because I tried looking at technical

1078

00:44:39,890 --> 00:44:37,650

specifications and you know trying to

1079

00:44:42,620 --> 00:44:39,900

find like papers on you might better

1080

00:44:45,710 --> 00:44:42,630

luck looking for training manuals hmm

1081

00:44:48,320 --> 00:44:45,720

you know so like look for ages training

1082

00:44:50,510 --> 00:44:48,330

committee a kookn manuals in especially

1083

00:44:52,850 --> 00:44:50,520

for the older baselines that maybe not

1084

00:44:55,150 --> 00:44:52,860

as classified anymore because like so

1085

00:44:58,040 --> 00:44:55,160

the spies been around since baseline one

1086

00:45:00,800 --> 00:44:58,050

but it wasn't one Bravo it wasn't mean

1087

00:45:02,630 --> 00:45:00,810

one Bravo ended up being you know the

1088

00:45:04,970 --> 00:45:02,640

upgraded version of the original and

1089

00:45:06,740 --> 00:45:04,980

then of course you know it's just Gandhi

1090

00:45:12,230 --> 00:45:06,750

he gotten even even more crazy

1091

00:45:13,460 --> 00:45:12,240

since then yeah but it uh yeah yes I

1092

00:45:15,770 --> 00:45:13,470

mean I guess what I'm doing it's like

1093

00:45:19,370 --> 00:45:15,780

I'm looking at how do we actually

1094

00:45:21,980 --> 00:45:19,380

eliminate this possibility now yeah you

1095

00:45:25,100 --> 00:45:21,990

only have system experts yeah and yeah

1096

00:45:26,720 --> 00:45:25,110

we've got we've got you but and you're

1097

00:45:29,090 --> 00:45:26,730

telling me that it yeah it's impossible

1098

00:45:30,560 --> 00:45:29,100

that a cirrus cloud could do it but you

1099

00:45:32,960 --> 00:45:30,570

know the skeptic in me wants to actually

1100

00:45:35,030 --> 00:45:32,970

have something written down or something

1101  
00:45:35,510 --> 00:45:35,040  
that actually verifies what you're

1102  
00:45:38,450 --> 00:45:35,520  
saying

1103  
00:45:40,190 --> 00:45:38,460  
so we'll start with like uh like a forty

1104  
00:45:43,570 --> 00:45:40,200  
nine radar which is a which is a

1105  
00:45:46,300 --> 00:45:43,580  
parabolic dish radar yeah go find a

1106  
00:45:49,790 --> 00:45:46,310  
specifications for FCS illuminators

1107  
00:45:51,310 --> 00:45:49,800  
because the FCS illuminator or just any

1108  
00:45:54,920 --> 00:45:51,320  
type of illuminator

1109  
00:46:00,470 --> 00:45:54,930  
which is basically just a dish that

1110  
00:46:02,090 --> 00:46:00,480  
shoots an hour have being if you go look

1111  
00:46:05,420 --> 00:46:02,100  
up the specifications on that and see

1112  
00:46:08,780 --> 00:46:05,430  
what they will do to a crowd then you

1113  
00:46:11,990 --> 00:46:08,790

can extrapolate because spy one Bravo is

1114

00:46:15,380 --> 00:46:12,000

the most powerful radar on the planet so

1115

00:46:18,769 --> 00:46:15,390

I wonder like either the the spy radar

1116

00:46:21,019 --> 00:46:18,779

is obviously it's it's military applique

1117

00:46:23,120 --> 00:46:21,029

is not not like or whether things it's

1118

00:46:25,579 --> 00:46:23,130

not designed to look at the weather it's

1119

00:46:27,949 --> 00:46:25,589

designed to detect incoming missiles and

1120

00:46:31,219 --> 00:46:27,959

try to lay there just to see solid

1121

00:46:35,329 --> 00:46:31,229

objects or anything that's translucent

1122

00:46:38,719 --> 00:46:35,339

or not a nada not a solid because he

1123

00:46:42,229 --> 00:46:38,729

uses algorithms to figure out what

1124

00:46:44,870 --> 00:46:42,239

things are so like say like I said you

1125

00:46:47,299 --> 00:46:44,880

know once sees solid that's inside of a

1126

00:46:50,149 --> 00:46:47,309

cloud it filters it out because it's not

1127

00:46:52,819 --> 00:46:50,159

an actual solar track yeah

1128

00:46:54,559 --> 00:46:52,829

it sees the shift it sees you know the

1129

00:46:56,539 --> 00:46:54,569

fact that all these ice crystals are

1130

00:46:58,069 --> 00:46:56,549

moving around it's not a it'd be like

1131

00:47:00,289 --> 00:46:58,079

the difference if you if I took a

1132

00:47:02,059 --> 00:47:00,299

handful of sand and I and I ran it

1133

00:47:03,679 --> 00:47:02,069

across your eyes you'd know that it was

1134

00:47:06,140 --> 00:47:03,689

sand moving across your eyes and not a

1135

00:47:09,019 --> 00:47:06,150

solid sheet of paper or I saw a machine

1136

00:47:13,249 --> 00:47:09,029

rock but now if I took that same sand

1137

00:47:15,769 --> 00:47:13,259

and I dumped it in a massive tub it's

1138

00:47:17,630 --> 00:47:15,779

still sand but now if you're not in fear

1139

00:47:19,549 --> 00:47:17,640

if your perception is just dead on

1140

00:47:20,839 --> 00:47:19,559

looking straight forward you know

1141

00:47:23,509 --> 00:47:20,849

something's moving there but you're not

1142

00:47:25,669 --> 00:47:23,519

sure if it's solid all right now what's

1143

00:47:30,199 --> 00:47:25,679

spy can do is it can say it can see all

1144

00:47:31,969 --> 00:47:30,209

these individual grains and say no these

1145

00:47:34,489 --> 00:47:31,979

are all different things it's not

1146

00:47:36,859 --> 00:47:34,499

there's no solid track there ignore that

1147

00:47:38,359 --> 00:47:36,869

move forward all right well I guess I'll

1148

00:47:40,039 --> 00:47:38,369

have to try to do some more digging then

1149

00:47:40,909 --> 00:47:40,049

and try to figure out because it you

1150

00:47:43,339 --> 00:47:40,919

know what I want to do is try to

1151

00:47:47,089 --> 00:47:43,349

eliminate possibilities yeah look look

1152

00:47:51,319 --> 00:47:47,099

look up maybe ages computer tech manuals

1153

00:47:55,579 --> 00:47:51,329

like my NEC was 1144 so if you can find

1154

00:47:57,769 --> 00:47:55,589

up and hold 11:44 ages computer manual

1155

00:48:00,499 --> 00:47:57,779

you know maybe a training guide of some

1156

00:48:04,069 --> 00:48:00,509

type if it's non classified you should

1157

00:48:07,399 --> 00:48:04,079

be able to find it with the the display

1158

00:48:09,919 --> 00:48:07,409

of the spy radar that you saw is is that

1159

00:48:11,809 --> 00:48:09,929

something that somebody could now draw a

1160

00:48:15,319 --> 00:48:11,819

picture of what that looked like without

1161

00:48:18,499 --> 00:48:15,329

it being classified all right picture

1162

00:48:20,929 --> 00:48:18,509

the standard radar I mean how could you

1163

00:48:22,069 --> 00:48:20,939

recreate what you saw like visually

1164

00:48:24,469 --> 00:48:22,079

could you actually like you know going

1165

00:48:26,409 --> 00:48:24,479

to Photoshop and make something so so

1166

00:48:29,029 --> 00:48:26,419

you could like say here this is what

1167

00:48:31,130 --> 00:48:29,039

serious plotter looks like this is for

1168

00:48:31,640 --> 00:48:31,140

Kevin it eats all those damn thing to

1169

00:48:34,220 --> 00:48:31,650

hell my

1170

00:48:36,860 --> 00:48:34,230

um think of an 80s style computer game

1171

00:48:39,380 --> 00:48:36,870

with a radar right yeah you know it mean

1172

00:48:42,230 --> 00:48:39,390

it's it pretty much looks at that you

1173

00:48:44,810 --> 00:48:42,240

know the nice heavy pixels you know

1174

00:48:46,490 --> 00:48:44,820

you're seeing a you know they were LCD

1175

00:48:48,320 --> 00:48:46,500

monitors so I mean they were they were

1176

00:48:50,660 --> 00:48:48,330

at least had a little bit of detail to

1177

00:48:52,340 --> 00:48:50,670

the track so the travel via would be it

1178

00:48:55,340 --> 00:48:52,350

would be a triangle you know and it

1179

00:48:58,460 --> 00:48:55,350

would it would have definition but I'm

1180

00:49:01,100 --> 00:48:58,470

not you know they didn't have to stare

1181

00:49:02,990 --> 00:49:01,110

at the things for hundreds of hours so

1182

00:49:04,520 --> 00:49:03,000

you know I was just a lucky little up

1183

00:49:07,160 --> 00:49:04,530

there saying hey what does this mean hey

1184

00:49:09,650 --> 00:49:07,170

what is happy yeah yeah I guess I should

1185

00:49:11,720 --> 00:49:09,660

talk to Kevin because what I'd like to

1186

00:49:13,970 --> 00:49:11,730

do is try to try that you know I'm tried

1187

00:49:16,850 --> 00:49:13,980

to eliminate possibilities and so we're

1188

00:49:18,710 --> 00:49:16,860

good is to get these pictures of why you

1189

00:49:20,900 --> 00:49:18,720

were so convinced that there was a real

1190

00:49:22,130 --> 00:49:20,910

track you know what does a a false track

1191

00:49:23,450 --> 00:49:22,140

to look like and what are these feints

1192

00:49:26,840 --> 00:49:23,460

tracks and what are the strong tracks

1193

00:49:28,820 --> 00:49:26,850

can we draw it with a in Photoshop well

1194

00:49:30,140 --> 00:49:28,830

he basically what a would like a faint

1195

00:49:33,350 --> 00:49:30,150

track would look like it's like

1196

00:49:38,080 --> 00:49:33,360

imaginary aircraft moving along it comes

1197

00:49:40,790 --> 00:49:38,090

and goes but then doesn't stay there and

1198

00:49:42,230 --> 00:49:40,800

then it might come and go again and not

1199

00:49:45,440 --> 00:49:42,240

stay there and then it just disappears

1200

00:49:46,970 --> 00:49:45,450

and it's gone that would be fun that

1201  
00:49:48,560 --> 00:49:46,980  
would be just that goes track there'd be

1202  
00:49:50,300 --> 00:49:48,570  
just something that that would be like a

1203  
00:49:52,880 --> 00:49:50,310  
ha something that seems solid for a

1204  
00:49:55,640 --> 00:49:52,890  
couple of seconds at a time but I mean

1205  
00:49:58,760 --> 00:49:55,650  
it would be a movie sometimes they're

1206  
00:50:01,100 --> 00:49:58,770  
just that quick though they're just you

1207  
00:50:05,570 --> 00:50:01,110  
know and then okay they're just gone now

1208  
00:50:08,750 --> 00:50:05,580  
with these they would pop up they would

1209  
00:50:13,100 --> 00:50:08,760  
go in that bearing for crazy amounts of

1210  
00:50:14,660 --> 00:50:13,110  
time hours and hours and where if it was

1211  
00:50:17,480 --> 00:50:14,670  
like a ghost track or if it was

1212  
00:50:19,400 --> 00:50:17,490  
cluttered they wouldn't stay solid

1213  
00:50:22,010 --> 00:50:19,410

they wouldn't you you wouldn't see the

1214

00:50:25,070 --> 00:50:22,020

track consistently for long periods of

1215

00:50:27,260 --> 00:50:25,080

time the system would automatically try

1216

00:50:30,170 --> 00:50:27,270

to determine whether clutter or not and

1217

00:50:31,850 --> 00:50:30,180

it would basically blank it out and then

1218

00:50:33,890 --> 00:50:31,860

it would come back as it got more solid

1219

00:50:36,500 --> 00:50:33,900

blank it out and then would come back as

1220

00:50:38,180 --> 00:50:36,510

it was if it was more solid but now once

1221

00:50:40,400 --> 00:50:38,190

we did recalibrations these things just

1222

00:50:42,350 --> 00:50:40,410

popped in absolutely solid and they just

1223

00:50:45,770 --> 00:50:42,360

stayed there until they decided to leave

1224

00:50:48,589 --> 00:50:45,780

so you ain't wrecking a single object

1225

00:50:50,660 --> 00:50:48,599

several hours at the same object who

1226  
00:50:52,609 --> 00:50:50,670  
have several objects you know there was

1227  
00:50:54,890 --> 00:50:52,619  
between three and ten at any given time

1228  
00:50:57,710 --> 00:50:54,900  
so then they could have been the same

1229  
00:51:00,140 --> 00:50:57,720  
ones over and over again like they could

1230  
00:51:02,809 --> 00:51:00,150  
have only been ten and then we were only

1231  
00:51:04,099 --> 00:51:02,819  
seeing the same objects of those ten

1232  
00:51:06,140 --> 00:51:04,109  
over and over again

1233  
00:51:08,930 --> 00:51:06,150  
so after you've been trekking an object

1234  
00:51:11,480 --> 00:51:08,940  
for hours how does it how does it end

1235  
00:51:14,270 --> 00:51:11,490  
how do you stop tracking it does it fly

1236  
00:51:16,400 --> 00:51:14,280  
away it either goes out of our range or

1237  
00:51:18,529 --> 00:51:16,410  
goes faster than our radar can track

1238  
00:51:21,260 --> 00:51:18,539

those are the only two options do you

1239

00:51:22,700 --> 00:51:21,270

know what speeds that would be faster

1240

00:51:25,370 --> 00:51:22,710

than the rate I we don't have to look it

1241

00:51:27,710 --> 00:51:25,380

up and I'm actually pretty sure that

1242

00:51:32,859 --> 00:51:27,720

that's actually still classified okay

1243

00:51:35,329 --> 00:51:32,869

but I will say that the system can track

1244

00:51:39,589 --> 00:51:35,339

there's there's a there was a hypersonic

1245

00:51:41,900 --> 00:51:39,599

missile that or a Mach I can't remember

1246

00:51:43,460 --> 00:51:41,910

what Mach number but it was a faster

1247

00:51:46,970 --> 00:51:43,470

than sound missile that the Russians

1248

00:51:50,059 --> 00:51:46,980

came up with mm-hmm and the C was that

1249

00:51:52,269 --> 00:51:50,069

used is also a phaser aid radar and the

1250

00:51:57,349 --> 00:51:52,279

spy one Bravo can actually track that

1251  
00:51:58,760 --> 00:51:57,359  
Mach at real time so basically think of

1252  
00:52:00,109 --> 00:51:58,770  
it like the word we were talking about

1253  
00:52:01,760 --> 00:52:00,119  
the parabolic dishes you're not

1254  
00:52:05,690 --> 00:52:01,770  
interacting at real time you're tracking

1255  
00:52:09,859 --> 00:52:05,700  
an echo of real time there's a limit the

1256  
00:52:12,260 --> 00:52:09,869  
there's a limit and it was very very

1257  
00:52:15,230 --> 00:52:12,270  
very fast because that's never still

1258  
00:52:17,870 --> 00:52:15,240  
classified no matter how you say it if

1259  
00:52:18,620 --> 00:52:17,880  
it was if these objects were going that

1260  
00:52:21,019 --> 00:52:18,630  
fast

1261  
00:52:23,269 --> 00:52:21,029  
wouldn't that immediately raise concerns

1262  
00:52:25,309 --> 00:52:23,279  
with you know the captain

1263  
00:52:27,470 --> 00:52:25,319

well they didn't move that fast until

1264

00:52:29,029 --> 00:52:27,480

out with interrogations which is exactly

1265

00:52:32,390 --> 00:52:29,039

why I said after we did the

1266

00:52:33,859 --> 00:52:32,400

interrogation so like on the first day

1267

00:52:35,500 --> 00:52:33,869

when you were you're tracking them on

1268

00:52:39,049 --> 00:52:35,510

the first day before the interrogation

1269

00:52:41,450 --> 00:52:39,059

did they just drift off when they fall

1270

00:52:42,890 --> 00:52:41,460

off the radar when you get down by San

1271

00:52:45,740 --> 00:52:42,900

Clemente where he said that they would

1272

00:52:46,490 --> 00:52:45,750

all fall off when they fall off you

1273

00:52:49,039 --> 00:52:46,500

don't worry about me

1274

00:52:50,870 --> 00:52:49,049

they're gone okay they're not within our

1275

00:52:54,410 --> 00:52:50,880

realm of influence anymore

1276  
00:52:57,829 --> 00:52:54,420  
so before the interrogation they never

1277  
00:52:59,809 --> 00:52:57,839  
did any extreme maneuvers exactly

1278  
00:53:02,630 --> 00:52:59,819  
anytime they appeared they'd just be

1279  
00:53:06,049 --> 00:53:02,640  
doing this whole drift south thing at a

1280  
00:53:08,990 --> 00:53:06,059  
hundred knots or so and not like I said

1281  
00:53:10,700 --> 00:53:09,000  
it was very non-threatening I don't

1282  
00:53:12,920 --> 00:53:10,710  
think I ever felt like I was ever in

1283  
00:53:15,470 --> 00:53:12,930  
danger and I knew what was going on but

1284  
00:53:18,859 --> 00:53:15,480  
then again I also trusted my chain of

1285  
00:53:21,319 --> 00:53:18,869  
command and so and they weren't really

1286  
00:53:22,819 --> 00:53:21,329  
stressing about it so I'm interesting

1287  
00:53:24,260 --> 00:53:22,829  
about it you know I guess if there's

1288  
00:53:25,640 --> 00:53:24,270

just you know something drifting off in

1289

00:53:28,220 --> 00:53:25,650

the distance it doesn't sound that bad

1290

00:53:29,450 --> 00:53:28,230

but when it after the interrogation you

1291

00:53:31,099 --> 00:53:29,460

know forever comes back gives these

1292

00:53:34,940 --> 00:53:31,109

reports the other pilot comes back with

1293

00:53:38,480 --> 00:53:34,950

a video and then you start to see on the

1294

00:53:40,279 --> 00:53:38,490

radar it doing extreme maneuvers by

1295

00:53:43,250 --> 00:53:40,289

dropping out of the sky like Kevin says

1296

00:53:45,079 --> 00:53:43,260

it it was dropping from 28,000 feet to

1297

00:53:46,819 --> 00:53:45,089

500 feet in a fraction of a second

1298

00:53:49,339 --> 00:53:46,829

things like that yeah and you know you

1299

00:53:52,190 --> 00:53:49,349

could actually track them going that

1300

00:53:53,809 --> 00:53:52,200

fast so that was what was kind of

1301  
00:53:56,000 --> 00:53:53,819  
blowing people's minds the fact that

1302  
00:53:58,880 --> 00:53:56,010  
they could go from such an altitude down

1303  
00:54:02,420 --> 00:53:58,890  
with a you know I mean the friction

1304  
00:54:04,809 --> 00:54:02,430  
involved would be tremendous yeah they

1305  
00:54:07,849 --> 00:54:04,819  
manatees that would be pushed on to a

1306  
00:54:09,540 --> 00:54:07,859  
subject within the object would be

1307  
00:54:11,640 --> 00:54:09,550  
tremendous

1308  
00:54:14,820 --> 00:54:11,650  
should have broke sound barrier several

1309  
00:54:16,770 --> 00:54:14,830  
times so on its way down he I think I

1310  
00:54:18,840 --> 00:54:16,780  
think it was like 0.7 seconds when they

1311  
00:54:20,700 --> 00:54:18,850  
had figured out exactly how fast it was

1312  
00:54:23,250 --> 00:54:20,710  
going like how fast it went that

1313  
00:54:25,670 --> 00:54:23,260

distance yeah I think Kevin said he

1314

00:54:28,910 --> 00:54:25,680

replayed the data and he measured it

1315

00:54:32,700 --> 00:54:28,920

yeah every planned read before it was

1316

00:54:34,320 --> 00:54:32,710

wet from fat rice poor guy it was funny

1317

00:54:35,540 --> 00:54:34,330

as well you're himself sorry for the

1318

00:54:38,280 --> 00:54:35,550

first time and I'm thinking to myself

1319

00:54:39,990 --> 00:54:38,290

yeah no exactly when you did that

1320

00:54:47,190 --> 00:54:40,000

because it was right before I wiped all

1321

00:54:50,430 --> 00:54:47,200

the drives so so after that was there a

1322

00:54:52,110 --> 00:54:50,440

change in the ship like after you had

1323

00:54:54,150 --> 00:54:52,120

the interrogation and you start to see

1324

00:54:55,560 --> 00:54:54,160

them it was tight

1325

00:54:57,360 --> 00:54:55,570

yeah things got a little bit more

1326

00:55:00,090 --> 00:54:57,370

uptight then we really want to talk

1327

00:55:03,330 --> 00:55:00,100

about it it was uh you know just a

1328

00:55:06,330 --> 00:55:03,340

running joke again and it was like they

1329

00:55:08,930 --> 00:55:06,340

were trying to blow it off so after the

1330

00:55:11,730 --> 00:55:08,940

interrogation were you still seeing them

1331

00:55:13,200 --> 00:55:11,740

um after the interrogation I didn't hear

1332

00:55:15,600 --> 00:55:13,210

anything about them seeing them anymore

1333

00:55:17,760 --> 00:55:15,610

I think after the interrogation they all

1334

00:55:21,900 --> 00:55:17,770

bugged out but I I don't know get sure

1335

00:55:25,290 --> 00:55:21,910

it's just you know it's like once once

1336

00:55:26,910 --> 00:55:25,300

the party stops you know and you go home

1337

00:55:28,650 --> 00:55:26,920

you're not gonna call back and say hey

1338

00:55:31,470 --> 00:55:28,660

is the party still going on you know

1339

00:55:34,230 --> 00:55:31,480

yeah I'd already said all right cool we

1340

00:55:36,750 --> 00:55:34,240

saw you know I saw this video I said he

1341

00:55:39,120 --> 00:55:36,760

thinks over a week and it's like I seen

1342

00:55:41,040 --> 00:55:39,130

everything I needed to see if there's

1343

00:55:42,660 --> 00:55:41,050

something new you know tell me if it

1344

00:55:45,360 --> 00:55:42,670

buzzes the ship because I want to go out

1345

00:55:47,640 --> 00:55:45,370

and look at it you know but other than

1346

00:55:50,300 --> 00:55:47,650

that I didn't hear anything past that we

1347

00:55:52,320 --> 00:55:50,310

went we went into port after that okay

1348

00:55:53,850 --> 00:55:52,330

that I'm just like trying to get a

1349

00:55:55,440 --> 00:55:53,860

timeline straight here because like you

1350

00:55:56,940 --> 00:55:55,450

said like before the interrogation you

1351  
00:56:01,320 --> 00:55:56,950  
didn't see them doing any extreme

1352  
00:56:02,850 --> 00:56:01,330  
maneuvers on the radar and then after

1353  
00:56:06,390 --> 00:56:02,860  
the interrogation and you didn't see

1354  
00:56:08,730 --> 00:56:06,400  
them so at what point with worse was

1355  
00:56:11,280 --> 00:56:08,740  
Kevin observing these extremes dropping

1356  
00:56:13,680 --> 00:56:11,290  
out of the sky during there it would be

1357  
00:56:15,420 --> 00:56:13,690  
during the day when they had okay 18

1358  
00:56:18,510 --> 00:56:15,430  
interrogations that's when they started

1359  
00:56:20,400 --> 00:56:18,520  
kind of doing these crazy maneuvers you

1360  
00:56:22,590 --> 00:56:20,410  
know going from very high altitudes to

1361  
00:56:24,980 --> 00:56:22,600  
sea level in less than seven second

1362  
00:56:28,099 --> 00:56:24,990  
point seven second

1363  
00:56:29,900 --> 00:56:28,109

you know like in the film in the

1364

00:56:34,640 --> 00:56:29,910

original film you see the thing just

1365

00:56:37,010 --> 00:56:34,650

yeah moving at tremendous speeds you

1366

00:56:39,260 --> 00:56:37,020

know it speeds that take your eyes a

1367

00:56:40,730 --> 00:56:39,270

second to realize that it's even moving

1368

00:56:42,290 --> 00:56:40,740

and then once you do realize you moving

1369

00:56:46,550 --> 00:56:42,300

you know who's moving but it's still

1370

00:56:49,780 --> 00:56:46,560

like wow I didn't even like your

1371

00:56:52,490 --> 00:56:49,790

perception just isn't there

1372

00:56:54,500 --> 00:56:52,500

did you see a like mole film

1373

00:56:56,440 --> 00:56:54,510

besides the whatever it is like you know

1374

00:56:59,570 --> 00:56:56,450

one minute that's that's out that now

1375

00:57:02,089 --> 00:56:59,580

well the film the film that we saw is

1376

00:57:05,120 --> 00:57:02,099

roughly I think right around between 8

1377

00:57:07,190 --> 00:57:05,130

and 12 minutes or so if I had to take

1378

00:57:09,920 --> 00:57:07,200

make a solid guess about 10 minutes long

1379

00:57:12,020 --> 00:57:09,930

and then you know a lot of it was just

1380

00:57:14,780 --> 00:57:12,030

you know kind of garbage it really

1381

00:57:18,170 --> 00:57:14,790

wasn't right on it but then you know and

1382

00:57:21,200 --> 00:57:18,180

then then you saw this thing come in the

1383

00:57:24,170 --> 00:57:21,210

frame you saw the the the part that you

1384

00:57:26,570 --> 00:57:24,180

guys see and then after that you see

1385

00:57:29,540 --> 00:57:26,580

this thing bug out and then come back

1386

00:57:33,920 --> 00:57:29,550

and bug out and then come back and it's

1387

00:57:36,859 --> 00:57:33,930

always doing like right turns it's it's

1388

00:57:39,980 --> 00:57:36,869

you know it's velocities are changing

1389

00:57:42,349 --> 00:57:39,990

without changing changing speeds you

1390

00:57:45,290 --> 00:57:42,359

know not it's not like slowing down to

1391

00:57:46,730 --> 00:57:45,300

take a turn it's just turning and that

1392

00:57:49,310 --> 00:57:46,740

in my brain

1393

00:57:52,579 --> 00:57:49,320

Rosi brain you saw this on the video if

1394

00:57:54,109 --> 00:57:52,589

this doing terms yes you can see it

1395

00:57:57,410 --> 00:57:54,119

doing turns in the video

1396

00:57:59,150 --> 00:57:57,420

I was wondering how what you were

1397

00:58:00,890 --> 00:57:59,160

actually seeing that because like it

1398

00:58:02,540 --> 00:58:00,900

really zoomed in on the video so it's

1399

00:58:05,359 --> 00:58:02,550

about one degree field of view so you

1400

00:58:07,220 --> 00:58:05,369

know you're not seeing how how how could

1401

00:58:09,740 --> 00:58:07,230

you tell he does turn a bull he pull he

1402

00:58:11,690 --> 00:58:09,750

pulls towards the end of the film he

1403

00:58:14,620 --> 00:58:11,700

does pull back because he's having a

1404

00:58:17,870 --> 00:58:14,630

hard time keeping it in the frame

1405

00:58:19,579 --> 00:58:17,880

anymore so that yeah that's the least

1406

00:58:21,020 --> 00:58:19,589

that's my interpretation like you know

1407

00:58:23,120 --> 00:58:21,030

so if I was sitting there filming that

1408

00:58:25,130 --> 00:58:23,130

and because he kept it kind of kept

1409

00:58:26,300 --> 00:58:25,140

dipping out of the frame and it looked

1410

00:58:29,839 --> 00:58:26,310

like he was having a hard time keeping

1411

00:58:31,940 --> 00:58:29,849

it in the frame because again I'm moving

1412

00:58:35,390 --> 00:58:31,950

kind of drifting off out of the frame

1413

00:58:38,960 --> 00:58:35,400

and then so he went to a more wide

1414

00:58:40,910 --> 00:58:38,970

look two of it so it would be just a an

1415

00:58:44,630 --> 00:58:40,920

object in the middle and then you would

1416

00:58:47,390 --> 00:58:44,640

probably have from what you guys saw

1417

00:58:49,670 --> 00:58:47,400

probably about ten times the field of

1418

00:58:51,830 --> 00:58:49,680

view then you know you'd have ten times

1419

00:58:54,800 --> 00:58:51,840

the space around it that you have seen

1420

00:58:57,050 --> 00:58:54,810

so you're not seeing the detail that you

1421

00:58:59,240 --> 00:58:57,060

have seen in the original like in the

1422

00:59:02,630 --> 00:58:59,250

first portion of it but you're gonna see

1423

00:59:04,220 --> 00:59:02,640

it's flight mechanics a lot more and I

1424

00:59:05,960 --> 00:59:04,230

think it easily that on purpose because

1425

00:59:08,030 --> 00:59:05,970

of what it was doing

1426  
00:59:12,410 --> 00:59:08,040  
could you see clouds in the background

1427  
00:59:14,300 --> 00:59:12,420  
and and water no not really

1428  
00:59:15,920 --> 00:59:14,310  
so it's just all just gray background

1429  
00:59:20,180 --> 00:59:15,930  
and you see the black yeah in the middle

1430  
00:59:23,540 --> 00:59:20,190  
yeah so it was just it was just the ship

1431  
00:59:26,000 --> 00:59:23,550  
that he was tracking and him flying and

1432  
00:59:29,210 --> 00:59:26,010  
you could tell like when he would you

1433  
00:59:32,540 --> 00:59:29,220  
know raise his nose you could see you

1434  
00:59:34,670 --> 00:59:32,550  
know because it was a it was it was from

1435  
00:59:36,110 --> 00:59:34,680  
I understand a clear day so there

1436  
00:59:39,650 --> 00:59:36,120  
wouldn't have been too many clouds

1437  
00:59:41,690 --> 00:59:39,660  
anyways but I've gotten collecting

1438  
00:59:43,400 --> 00:59:41,700

reports and you gonna remember that for

1439

00:59:44,720 --> 00:59:43,410

the most part during this whole the

1440

00:59:46,040 --> 00:59:44,730

whole interrogation and everything I

1441

00:59:48,980 --> 00:59:46,050

would have been inside the skin of the

1442

00:59:51,650 --> 00:59:48,990

ship yeah so I really don't remember

1443

00:59:54,050 --> 00:59:51,660

what the weather was like that day yeah

1444

00:59:55,580 --> 00:59:54,060

just if there's no clouds or water you

1445

00:59:57,770 --> 00:59:55,590

can't really tell whether it's the

1446

00:59:59,570 --> 00:59:57,780

camera moving or it's the object moving

1447

01:00:01,400 --> 00:59:59,580

so it's hard just to know that it's

1448

01:00:04,280 --> 01:00:01,410

actually making moves because it could

1449

01:00:05,020 --> 01:00:04,290

be just moving the camera from one side

1450

01:00:08,180 --> 01:00:05,030

to the other

1451

01:00:10,550 --> 01:00:08,190

that could be true I can give you I can

1452

01:00:13,190 --> 01:00:10,560

give you at least that one when uh with

1453

01:00:15,680 --> 01:00:13,200

the way those pods are I don't really

1454

01:00:18,470 --> 01:00:15,690

think that that would have really worked

1455

01:00:20,360 --> 01:00:18,480

that way because yeah I got a also here

1456

01:00:23,150 --> 01:00:20,370

remember we can actually see the bearing

1457

01:00:24,440 --> 01:00:23,160

of the actual plane itself yeah that

1458

01:00:26,420 --> 01:00:24,450

wouldn't change when the cameras moving

1459

01:00:27,860 --> 01:00:26,430

though I'm not saying that the jet

1460

01:00:29,390 --> 01:00:27,870

itself is moving I'm just saying the

1461

01:00:30,950 --> 01:00:29,400

cameras moving here the Jets here and

1462

01:00:34,370 --> 01:00:30,960

the cameras like you know underneath it

1463

01:00:36,980 --> 01:00:34,380

yeah so it's okay that the camera would

1464

01:00:39,140 --> 01:00:36,990

have moved to move with that with the

1465

01:00:41,180 --> 01:00:39,150

craft you know it would have been

1466

01:00:43,580 --> 01:00:41,190

tracking the craft itself so it would

1467

01:00:46,089 --> 01:00:43,590

have been moving with the craft and so

1468

01:00:48,170 --> 01:00:46,099

if you know unless the jet move

1469

01:00:50,660 --> 01:00:48,180

then you would kind of get that effect

1470

01:00:51,949 --> 01:00:50,670

like that you're talking about well if

1471

01:00:53,719 --> 01:00:51,959

if camera would still move to track the

1472

01:00:55,009 --> 01:00:53,729

craft in that case there even if a jet

1473

01:00:58,819 --> 01:00:55,019

moved because the jet moves and the

1474

01:01:02,599 --> 01:00:58,829

camera stays it the it would only move

1475

01:01:04,640 --> 01:01:02,609

if you lost lock and now also the the

1476

01:01:06,559 --> 01:01:04,650

camera wouldn't be janky it wouldn't it

1477

01:01:10,099 --> 01:01:06,569

wouldn't just be jagged no it would just

1478

01:01:13,370 --> 01:01:10,109

be a smooth move as it moves yeah so if

1479

01:01:16,519 --> 01:01:13,380

say so so the camera moving and then the

1480

01:01:17,839 --> 01:01:16,529

jet and then the objects moving in an

1481

01:01:20,479 --> 01:01:17,849

irregular didn't matter

1482

01:01:22,309 --> 01:01:20,489

the it's still you know the camera is

1483

01:01:24,319 --> 01:01:22,319

not bouncing or anything it's just

1484

01:01:28,390 --> 01:01:24,329

moving smooth it's the thing though if

1485

01:01:30,469 --> 01:01:28,400

the camera is locked on to the object

1486

01:01:32,749 --> 01:01:30,479

but then the camera is going to be

1487

01:01:37,370 --> 01:01:32,759

tracking this object and no matter which

1488

01:01:38,809 --> 01:01:37,380

way it moves up down that's right so how

1489

01:01:40,849 --> 01:01:38,819

would you how do you know the object was

1490

01:01:42,559 --> 01:01:40,859

moving it would have to move out of the

1491

01:01:44,420 --> 01:01:42,569

actual frame which means that the frame

1492

01:01:46,370 --> 01:01:44,430

had lost track system itself it would

1493

01:01:47,689 --> 01:01:46,380

actually move with the object you know

1494

01:01:50,239 --> 01:01:47,699

so you wouldn't be had to see it's

1495

01:01:52,130 --> 01:01:50,249

moving if it wasn't me well you could

1496

01:01:53,839 --> 01:01:52,140

tell if it was like a Genki move like

1497

01:01:56,679 --> 01:01:53,849

what you're talking about like so if he

1498

01:01:59,989 --> 01:01:56,689

was like uh you know if the camera was

1499

01:02:01,699 --> 01:01:59,999

was was moving at a fast rate which they

1500

01:02:04,999 --> 01:02:01,709

don't they just move at the rate that

1501  
01:02:08,359 --> 01:02:05,009  
they need it's a very smooth movement if

1502  
01:02:11,989 --> 01:02:08,369  
you look up a video of of like just look

1503  
01:02:15,079 --> 01:02:11,999  
up like a you know the manufacturer's

1504  
01:02:17,509 --> 01:02:15,089  
video of of it they have a video of how

1505  
01:02:20,599 --> 01:02:17,519  
a fusion like then you'll see how smooth

1506  
01:02:22,400 --> 01:02:20,609  
that thing actually moves yeah I'm not

1507  
01:02:24,019 --> 01:02:22,410  
sure that you would really see the

1508  
01:02:26,059 --> 01:02:24,029  
effect that you're talking about on that

1509  
01:02:28,789 --> 01:02:26,069  
yeah it's just if there's no background

1510  
01:02:31,099 --> 01:02:28,799  
you can't really see this and if it

1511  
01:02:33,069 --> 01:02:31,109  
moves out of the out of the targeting

1512  
01:02:35,479 --> 01:02:33,079  
area that means it's actually lost track

1513  
01:02:38,259 --> 01:02:35,489

which could be a camera movement rather

1514

01:02:42,319 --> 01:02:38,269

than the actual object movement

1515

01:02:44,870 --> 01:02:42,329

I'd have to replicate it but I think

1516

01:02:48,410 --> 01:02:44,880

with the way that that object did move

1517

01:02:50,089 --> 01:02:48,420

just because it's not gonna generate a

1518

01:02:53,959 --> 01:02:50,099

right turn you know you couldn't

1519

01:02:57,259 --> 01:02:53,969

generate a right turn at a constant

1520

01:02:59,600 --> 01:02:57,269

velocity or a left turn at a constant

1521

01:03:01,700 --> 01:02:59,610

velocity I mean unless the jet was layer

1522

01:03:03,080 --> 01:03:01,710

turning on its axis while the cameras

1523

01:03:06,350 --> 01:03:03,090

moving hmm

1524

01:03:07,580 --> 01:03:06,360

so then like you know so you see what I

1525

01:03:10,100 --> 01:03:07,590

mean though like all right so if you

1526

01:03:11,600 --> 01:03:10,110

were watching it yeah you could see it

1527

01:03:13,220 --> 01:03:11,610

could look like it's speeding out of the

1528

01:03:15,830 --> 01:03:13,230

frame and in and out of the frame or

1529

01:03:20,510 --> 01:03:15,840

going up and down or doing weird things

1530

01:03:23,360 --> 01:03:20,520

like that but while it's still within

1531

01:03:25,930 --> 01:03:23,370

the frame you could see it taking these

1532

01:03:29,270 --> 01:03:25,940

right turns in these left turns at

1533

01:03:31,610 --> 01:03:29,280

90-degree angles at st. and not they're

1534

01:03:34,280 --> 01:03:31,620

not slowing down so gonna spin the

1535

01:03:36,890 --> 01:03:34,290

actual frame you can see that having a

1536

01:03:38,690 --> 01:03:36,900

hard time visualizing that but I guess

1537

01:03:40,910 --> 01:03:38,700

that's something we could yeah all right

1538

01:03:42,710 --> 01:03:40,920

so all right so what it wants is a

1539

01:03:44,720 --> 01:03:42,720

picture all right so you're sitting in

1540

01:03:45,140 --> 01:03:44,730

the cockpit you're looking at your

1541

01:03:47,330 --> 01:03:45,150

camera

1542

01:03:49,820 --> 01:03:47,340

neurontin and you see you set it to

1543

01:03:52,310 --> 01:03:49,830

start tracking this okay so you flip

1544

01:03:54,230 --> 01:03:52,320

through your cameras and you okay you

1545

01:03:56,180 --> 01:03:54,240

see it all right so now you start moving

1546

01:03:57,830 --> 01:03:56,190

it around to try to get a better better

1547

01:03:59,270 --> 01:03:57,840

you know you flipped through the

1548

01:04:00,650 --> 01:03:59,280

different cameras you're trying to find

1549

01:04:02,300 --> 01:04:00,660

it you know you want to make sure that

1550

01:04:04,610 --> 01:04:02,310

you get as much film in different

1551  
01:04:06,080 --> 01:04:04,620  
versions as possible so they think and

1552  
01:04:08,270 --> 01:04:06,090  
get as much information you're looking

1553  
01:04:09,830 --> 01:04:08,280  
for jetwash you're looking for you know

1554  
01:04:12,200 --> 01:04:09,840  
anything that could be identifying on

1555  
01:04:13,940 --> 01:04:12,210  
how it's staying in the air you so

1556  
01:04:17,120 --> 01:04:13,950  
that's actually the purpose of clipping

1557  
01:04:20,420 --> 01:04:17,130  
improve all the different films alright

1558  
01:04:22,070 --> 01:04:20,430  
so if there's a jet flume you know once

1559  
01:04:25,570 --> 01:04:22,080  
you hit the thermal you'll be able to

1560  
01:04:27,770 --> 01:04:25,580  
see a jet plume you know if you you know

1561  
01:04:29,900 --> 01:04:27,780  
infrared you'll be able to see heat

1562  
01:04:31,760 --> 01:04:29,910  
signatures you'd be able to see if there

1563  
01:04:34,370 --> 01:04:31,770

is a hot spot somewhere so there could

1564

01:04:36,050 --> 01:04:34,380

be an engine you know those those that

1565

01:04:37,820 --> 01:04:36,060

would be the the reason why he would be

1566

01:04:40,100 --> 01:04:37,830

flipping it through and then he settles

1567

01:04:43,010 --> 01:04:40,110

on whatever he sees he can see the best

1568

01:04:44,660 --> 01:04:43,020

detail and then from there you see him

1569

01:04:46,700 --> 01:04:44,670

and he starts zooming in and out he's

1570

01:04:49,610 --> 01:04:46,710

trying to look for that that sweet spot

1571

01:04:51,530 --> 01:04:49,620

so he hits that sweet spot alright so

1572

01:04:53,840 --> 01:04:51,540

now it's generally not doing a whole lot

1573

01:04:57,110 --> 01:04:53,850

at that point so he's able to actually

1574

01:04:59,090 --> 01:04:57,120

do all of this stuff manually and then

1575

01:05:02,840 --> 01:04:59,100

all of a sudden it starts to move along

1576

01:05:05,330 --> 01:05:02,850

with the jet and and same so you start

1577

01:05:07,370 --> 01:05:05,340

moving it to try to follow it does work

1578

01:05:09,020 --> 01:05:07,380

and that's when you can kind of see the

1579

01:05:13,319 --> 01:05:09,030

camera move and it just kind of moves

1580

01:05:16,769 --> 01:05:13,329

off off and then he goes more towards a

1581

01:05:18,930 --> 01:05:16,779

why yeah that he zooms trashcan so that

1582

01:05:24,029 --> 01:05:18,940

it's more of a wide angle and you can

1583

01:05:26,120 --> 01:05:24,039

actually see it now moving around and at

1584

01:05:29,370 --> 01:05:26,130

certain points you can see it do like a

1585

01:05:33,390 --> 01:05:29,380

bright turn within the frame itself not

1586

01:05:36,150 --> 01:05:33,400

like going off of the frame you know so

1587

01:05:38,759 --> 01:05:36,160

within the actual field of vision of the

1588

01:05:42,299 --> 01:05:38,769

camera Susan she is through a right turn

1589

01:05:46,859 --> 01:05:42,309

at constant velocity you can see if you

1590

01:05:49,469 --> 01:05:46,869

left turns at constant velocities in

1591

01:05:51,209 --> 01:05:49,479

patterns thank you like in circular

1592

01:05:53,880 --> 01:05:51,219

patterns and ovals and things like that

1593

01:06:02,849 --> 01:05:53,890

without changing any velocities and they

1594

01:06:04,859 --> 01:06:02,859

were such tight patterns that hmm well

1595

01:06:07,499 --> 01:06:04,869

how I would tell it in a modern vehicle

1596

01:06:09,690 --> 01:06:07,509

you would be basically there you know

1597

01:06:12,839 --> 01:06:09,700

mush on the side of that that vessel

1598

01:06:14,940 --> 01:06:12,849

yeah and so I handle that kind of

1599

01:06:17,190 --> 01:06:14,950

pressure so what what do you think it

1600

01:06:22,099 --> 01:06:17,200

actually was what's your number one

1601  
01:06:26,759 --> 01:06:24,449  
basically all right so I honestly think

1602  
01:06:29,609 --> 01:06:26,769  
that it was an actual physical object

1603  
01:06:32,009 --> 01:06:29,619  
uh-huh I think it was a very very

1604  
01:06:34,259 --> 01:06:32,019  
advanced piece of technology am I

1605  
01:06:34,589 --> 01:06:34,269  
convinced of anything alien no not

1606  
01:06:37,140 --> 01:06:34,599  
really

1607  
01:06:40,140 --> 01:06:37,150  
no honestly until an alien land for my

1608  
01:06:43,739 --> 01:06:40,150  
lawn or I mean I'm an artist and then

1609  
01:06:45,630 --> 01:06:43,749  
you know I'll lose the idea that it is

1610  
01:06:47,449 --> 01:06:45,640  
plausible because I'm a big fan of Drake

1611  
01:06:49,769 --> 01:06:47,459  
and Drake's equation and the fact that

1612  
01:06:54,029 --> 01:06:49,779  
you know to think that there's no other

1613  
01:06:56,489 --> 01:06:54,039

life in the universe I you know I can

1614

01:06:58,049 --> 01:06:56,499

concede the yes there definitely is life

1615

01:06:59,729 --> 01:06:58,059

in the rest of the universe

1616

01:07:02,699 --> 01:06:59,739

yeah we've proof we've proven that just

1617

01:07:04,109 --> 01:07:02,709

with comet's comets holds that all

1618

01:07:07,049 --> 01:07:04,119

building blocks of life you know

1619

01:07:09,680 --> 01:07:07,059

basically you know nature's life giver

1620

01:07:12,479 --> 01:07:09,690

for a you know garbage planet over rock

1621

01:07:13,709 --> 01:07:12,489

you know okay here's all the basic

1622

01:07:16,410 --> 01:07:13,719

building blocks here's all your amino

1623

01:07:17,999 --> 01:07:16,420

acids yours your you know here's all of

1624

01:07:22,620 --> 01:07:18,009

your protein so that you can start

1625

01:07:24,870 --> 01:07:22,630

single-celled organism so it's a yeah

1626

01:07:27,120 --> 01:07:24,880

it's it's it's for there not to be life

1627

01:07:30,780 --> 01:07:27,130

somewhere else now possibly

1628

01:07:33,540 --> 01:07:30,790

and arranged now I Kevin youth I just

1629

01:07:36,510 --> 01:07:33,550

listen to one of his lectures and he's a

1630

01:07:38,760 --> 01:07:36,520

little bit more down-to-earth I do a lot

1631

01:07:40,590 --> 01:07:38,770

of things say he's basically generally

1632

01:07:42,210 --> 01:07:40,600

was talking about you know if there was

1633

01:07:44,100 --> 01:07:42,220

another civilization and they didn't

1634

01:07:46,050 --> 01:07:44,110

have fast for my travel which is most

1635

01:07:50,220 --> 01:07:46,060

likely which is something that I

1636

01:07:52,980 --> 01:07:50,230

actually think too that if we did get

1637

01:07:55,350 --> 01:07:52,990

visited by a balance and I don't think

1638

01:07:57,150 --> 01:07:55,360

it was a permanent trip I don't I think

1639

01:07:59,700 --> 01:07:57,160

it was these people would have to be a

1640

01:08:01,740 --> 01:07:59,710

set of people that are nomadic they have

1641

01:08:03,390 --> 01:08:01,750

to be consistently moving and they're

1642

01:08:04,710 --> 01:08:03,400

never going to go back to the home work

1643

01:08:06,570 --> 01:08:04,720

by the time they get back to the home

1644

01:08:09,060 --> 01:08:06,580

world that's you know a hundred thousand

1645

01:08:10,850 --> 01:08:09,070

years in the future yeah I mean said

1646

01:08:13,470 --> 01:08:10,860

yeah exactly

1647

01:08:16,160 --> 01:08:13,480

even if they come back here you know

1648

01:08:18,600 --> 01:08:16,170

[h\_\_h] everything's extinct that was here

1649

01:08:19,980 --> 01:08:18,610

the last time they were here you know

1650

01:08:22,590 --> 01:08:19,990

they're they're dealing with geologic

1651

01:08:26,100 --> 01:08:22,600

time in their in their realm there it's

1652

01:08:28,940 --> 01:08:26,110

only been eight months yeah so you know

1653

01:08:32,520 --> 01:08:28,950

is that love lovely time dilation Brian

1654

01:08:36,830 --> 01:08:32,530

and so as you can tell I do got a decent

1655

01:08:40,290 --> 01:08:36,840

grasp the physics yeah well so his idea

1656

01:08:43,380 --> 01:08:40,300

did generally says that you know if they

1657

01:08:45,000 --> 01:08:43,390

if they are these people and that would

1658

01:08:47,850 --> 01:08:45,010

explain why a lot of the similar crafts

1659

01:08:49,890 --> 01:08:47,860

a lot of similar you know shapes before

1660

01:08:52,650 --> 01:08:49,900

these just could be just things left

1661

01:08:56,130 --> 01:08:52,660

behind by them for all I know but most

1662

01:08:59,010 --> 01:08:56,140

likely you know we could have had a

1663

01:09:01,550 --> 01:08:59,020

cartel on technology since the 40s you

1664

01:09:03,840 --> 01:09:01,560

know I mean with you know the

1665

01:09:04,970 --> 01:09:03,850

Vanderbilts and you know all these big

1666

01:09:07,140 --> 01:09:04,980

money

1667

01:09:09,120 --> 01:09:07,150

they did it with the oil industry the

1668

01:09:10,340 --> 01:09:09,130

diamond industry why didn't I wouldn't

1669

01:09:13,020 --> 01:09:10,350

they do with the technology industry

1670

01:09:15,600 --> 01:09:13,030

mm-hmm and so if we had these crazy

1671

01:09:18,060 --> 01:09:15,610

advanced technology and I mean it may be

1672

01:09:20,400 --> 01:09:18,070

on a world platform where there's

1673

01:09:22,500 --> 01:09:20,410

actually a level of black market that

1674

01:09:27,450 --> 01:09:22,510

country's steel in black market

1675

01:09:28,950 --> 01:09:27,460

technology like this who knows yeah oil

1676

01:09:33,120 --> 01:09:28,960

and diamonds are not my secret

1677

01:09:35,400 --> 01:09:33,130

commodities the yes but then again you

1678

01:09:37,890 --> 01:09:35,410

can you can stumble across a diamond and

1679

01:09:39,330 --> 01:09:37,900

you can stumble across oil but you can't

1680

01:09:40,680 --> 01:09:39,340

stumble across an advanced piece of

1681

01:09:43,999 --> 01:09:40,690

technology

1682

01:09:47,010 --> 01:09:44,009

yeah nah do you think I'll easily it's

1683

01:09:48,570 --> 01:09:47,020

you know if they've got this this this

1684

01:09:51,630 --> 01:09:48,580

this cartel idea you're talking about

1685

01:09:54,209 --> 01:09:51,640

with keeping this advanced technology is

1686

01:09:55,740 --> 01:09:54,219

you saying that they are using the

1687

01:09:58,590 --> 01:09:55,750

technology for something else or are

1688

01:10:01,560 --> 01:09:58,600

they actually incorporating it gradually

1689

01:10:03,800 --> 01:10:01,570

into human society I think as they can

1690

01:10:06,780 --> 01:10:03,810

profit or as as I mean it's not a very

1691

01:10:09,209 --> 01:10:06,790

it's not a very far-fetched idea that

1692

01:10:11,760 --> 01:10:09,219

people would hold back something tomato

1693

01:10:14,340 --> 01:10:11,770

crop you know I mean it's been happening

1694

01:10:16,229 --> 01:10:14,350

since you know beginning of time you

1695

01:10:18,150 --> 01:10:16,239

know hey I got a bronze axe you know I

1696

01:10:20,280 --> 01:10:18,160

can make bronze axes for you but you

1697

01:10:22,260 --> 01:10:20,290

know it's costly and then you find out

1698

01:10:24,270 --> 01:10:22,270

that it's not that costly and you know

1699

01:10:26,520 --> 01:10:24,280

now eighteen guys can do it another cost

1700

01:10:28,439 --> 01:10:26,530

goes down yeah so I mean it's the same

1701

01:10:30,060 --> 01:10:28,449

cycle all the way around you know they

1702

01:10:31,560 --> 01:10:30,070

make a little blue pill that allows you

1703

01:10:33,840 --> 01:10:31,570

to enjoy your life all the way through

1704

01:10:34,439 --> 01:10:33,850

to the end then all of a sudden ten

1705

01:10:38,729 --> 01:10:34,449

years later

1706

01:10:41,220 --> 01:10:38,739

everybody can make the pill you know so

1707

01:10:44,810 --> 01:10:41,230

I mean it's it's it's the same thing you

1708

01:10:49,290 --> 01:10:44,820

know I mean we we know of chemicals that

1709

01:10:52,950 --> 01:10:49,300

[h\_\_\h] the growth those tumors but

1710

01:10:55,410 --> 01:10:52,960

they're tied up in the bureaucracy you

1711

01:10:57,630 --> 01:10:55,420

know we know of all kinds of tech that's

1712

01:10:58,860 --> 01:10:57,640

just basically sitting around waiting to

1713

01:11:01,260 --> 01:10:58,870

be completely proven

1714

01:11:03,300 --> 01:11:01,270

yeah they say this cause they can run on

1715

01:11:05,310 --> 01:11:03,310

water I don't believe you're there they

1716

01:11:07,800 --> 01:11:05,320

to say that well what it is is that

1717

01:11:10,860 --> 01:11:07,810

those are hydrogen cell cars they use

1718

01:11:12,780 --> 01:11:10,870

osmosis that's it's a simple thing they

1719

01:11:14,100 --> 01:11:12,790

basically just take water they separate

1720

01:11:16,500 --> 01:11:14,110

the hydrogen from it they use the

1721

01:11:19,439 --> 01:11:16,510

hydrogen as a fuel cell and then it

1722

01:11:20,670 --> 01:11:19,449

spits out spits out oxygen because it

1723

01:11:22,200 --> 01:11:20,680

doesn't actually work though because you

1724

01:11:24,930 --> 01:11:22,210

need the energy to split the hydrogen

1725

01:11:28,200 --> 01:11:24,940

and the oxygen well that's just it he

1726

01:11:30,060 --> 01:11:28,210

would uh once a I mean it's not even

1727

01:11:33,180 --> 01:11:30,070

even even a combustion engine is

1728

01:11:34,439 --> 01:11:33,190

insufficient yeah hey nobody said it was

1729

01:11:39,689 --> 01:11:34,449

efficient it's just that it would work

1730

01:11:42,209 --> 01:11:39,699

yeah so basically you would set this

1731

01:11:43,560 --> 01:11:42,219

thing to you know the osmosis mode at

1732

01:11:45,060 --> 01:11:43,570

night while you're sleeping to get

1733

01:11:46,860 --> 01:11:45,070

enough hydrogen to go to work in the

1734

01:11:48,439 --> 01:11:46,870

morning right well it's like plugging in

1735

01:11:50,810 --> 01:11:48,449

your electric car really essentially

1736

01:11:53,340 --> 01:11:50,820

introduced our now is this an energy

1737

01:11:54,550 --> 01:11:53,350

technique yeah exactly

1738

01:11:56,710 --> 01:11:54,560

it doesn't work but it's

1739

01:11:58,390 --> 01:11:56,720

not as efficient and it could be more

1740

01:12:01,900 --> 01:11:58,400

efficient and it could eventually work

1741

01:12:04,270 --> 01:12:01,910

well the technology's come a long ways I

1742

01:12:06,190 --> 01:12:04,280

mean even look at look at some of the

1743

01:12:08,740 --> 01:12:06,200

technology just in some of these hybrid

1744

01:12:11,110 --> 01:12:08,750

cars you know using even the therm the

1745

01:12:13,510 --> 01:12:11,120

thermal thermal coupling of the brakes

1746

01:12:15,190 --> 01:12:13,520

to generate power you know they're

1747

01:12:16,840 --> 01:12:15,200

they're trying to pull as much power as

1748

01:12:18,520 --> 01:12:16,850

they can out of these things to

1749

01:12:20,860 --> 01:12:18,530

regenerate you know the recharge the

1750

01:12:22,660 --> 01:12:20,870

batteries as long as possible yeah

1751

01:12:25,450 --> 01:12:22,670

you'll be interesting if there's

1752

01:12:27,370 --> 01:12:25,460

actually some UFO technology that's

1753

01:12:31,140 --> 01:12:27,380

incorporated into current technology

1754

01:12:34,390 --> 01:12:31,150

like you know if this you know this big

1755

01:12:37,060 --> 01:12:34,400

conspiracy is actually true you could

1756

01:12:38,770 --> 01:12:37,070

imagine that there was you know like

1757

01:12:40,450 --> 01:12:38,780

like the iPhone gets a bit better every

1758

01:12:42,280 --> 01:12:40,460

year the cars get a little better every

1759

01:12:43,600 --> 01:12:42,290

year so you have to buy a new car and so

1760

01:12:46,390 --> 01:12:43,610

the they're giving you a little bit more

1761

01:12:48,100 --> 01:12:46,400

alien technology and yeah yeah now you

1762

01:12:49,720 --> 01:12:48,110

know even if it's not even alien

1763

01:12:51,940 --> 01:12:49,730

technology but it's a you see see

1764

01:12:53,920 --> 01:12:51,950

technically see in the 40s they did pick

1765

01:12:56,110 --> 01:12:53,930

up a craft you know they they found some

1766

01:12:58,570 --> 01:12:56,120

some weird technology they don't know

1767

01:13:00,610 --> 01:12:58,580

where it's from and they start ganking

1768

01:13:01,750 --> 01:13:00,620

with it in the 40s well you know what

1769

01:13:03,430 --> 01:13:01,760

these guys in the forties would have

1770

01:13:05,590 --> 01:13:03,440

done they would have applied electricity

1771

01:13:06,910 --> 01:13:05,600

to the boards or what they thought were

1772

01:13:08,980 --> 01:13:06,920

boards they would have tried to

1773

01:13:10,540 --> 01:13:08,990

electrocute it they was trying to freeze

1774

01:13:13,350 --> 01:13:10,550

it they would have tried to catch it on

1775

01:13:16,570 --> 01:13:13,360

fire they would have tried to say hey oh

1776

01:13:18,220 --> 01:13:16,580

yeah you know basically the crude forms

1777

01:13:21,460 --> 01:13:18,230

of things because they didn't have an

1778

01:13:25,420 --> 01:13:21,470

understanding of subatomic mall you know

1779

01:13:28,180 --> 01:13:25,430

structures or or the you know even

1780

01:13:30,430 --> 01:13:28,190

semiconductors would have been like yeah

1781

01:13:31,480 --> 01:13:30,440

what like a modern go to you to you know

1782

01:13:34,480 --> 01:13:31,490

what do you mean you have an entire

1783

01:13:37,150 --> 01:13:34,490

computer on a chip that's not real

1784

01:13:38,440 --> 01:13:37,160

you know I mean yeah everything's magic

1785

01:13:42,790 --> 01:13:38,450

and everything's aliens and so let's

1786

01:13:45,280 --> 01:13:42,800

proven not to be tell me real quick

1787

01:13:49,480 --> 01:13:45,290

about you IP enterprises because I'm

1788

01:13:52,000 --> 01:13:49,490

right yeah here we got a visually a you

1789

01:13:53,410 --> 01:13:52,010

know the ragtag group of people and we

1790

01:13:56,770 --> 01:13:53,420

got some you know people like Kevin

1791

01:13:58,930 --> 01:13:56,780

Knuth and deep and deep Assad and you

1792

01:14:02,980 --> 01:13:58,940

know some really really big brains that

1793

01:14:05,980 --> 01:14:02,990

make me feel stupid and you know what

1794

01:14:09,030 --> 01:14:05,990

we're trying to do is you know figure

1795

01:14:11,560 --> 01:14:09,040

out what these what these phenomenon are

1796

01:14:14,380 --> 01:14:11,570

primarily our first task is we want to

1797

01:14:18,160 --> 01:14:14,390

go back out to where we were at when we

1798

01:14:20,680 --> 01:14:18,170

tracked these you ApS and you know since

1799

01:14:22,450 --> 01:14:20,690

we've been doing video a lot D in that

1800

01:14:24,010 --> 01:14:22,460

area and you know as long as there's

1801  
01:14:26,800 --> 01:14:24,020  
been humans there they've been reporting

1802  
01:14:28,630 --> 01:14:26,810  
these these types of sightings and it

1803  
01:14:31,479 --> 01:14:28,640  
goes back you know over a hundred years

1804  
01:14:35,919 --> 01:14:31,489  
you know and if you take into consider

1805  
01:14:38,140 --> 01:14:35,929  
and you know say 99.9% of these stories

1806  
01:14:39,959 --> 01:14:38,150  
are absolutely a drunken sailor on a

1807  
01:14:43,479 --> 01:14:39,969  
ship and somebody with a flashlight you

1808  
01:14:45,070 --> 01:14:43,489  
know something as simple as that

1809  
01:14:46,780 --> 01:14:45,080  
you know even if 1% of those stories are

1810  
01:14:49,919 --> 01:14:46,790  
true there's something to it you know if

1811  
01:14:52,660 --> 01:14:49,929  
you have a thousand unrelated people and

1812  
01:14:56,950 --> 01:14:52,670  
you know a hundred of them see something

1813  
01:15:00,280 --> 01:14:56,960

on and they all correlate well there's

1814

01:15:02,610 --> 01:15:00,290

something to it maybe there it's well so

1815

01:15:07,720 --> 01:15:02,620

something especially where there's

1816

01:15:09,520 --> 01:15:07,730

another yeah you know and I mean it's we

1817

01:15:11,500 --> 01:15:09,530

we're finding that a lot of these

1818

01:15:13,930 --> 01:15:11,510

stories are pretty dead-on

1819

01:15:16,570 --> 01:15:13,940

you know without and when we talk to

1820

01:15:18,400 --> 01:15:16,580

these people you know we're not telling

1821

01:15:20,229 --> 01:15:18,410

you anything about us or what we're

1822

01:15:22,479 --> 01:15:20,239

looking for you know we're just asking

1823

01:15:24,669 --> 01:15:22,489

them their story you know most people

1824

01:15:27,250 --> 01:15:24,679

are glad to tell us Mandie blurry

1825

01:15:29,650 --> 01:15:27,260

reluctant to tell it you know you get

1826

01:15:32,200 --> 01:15:29,660

all walks you know you get more people

1827

01:15:35,500 --> 01:15:32,210

and less rough younger people I wish we

1828

01:15:38,680 --> 01:15:35,510

could have all you know PhDs and

1829

01:15:40,300 --> 01:15:38,690

military guys you know people that at

1830

01:15:41,770 --> 01:15:40,310

least have been bedded with a background

1831

01:15:42,939 --> 01:15:41,780

you know if you have a Tufts of your

1832

01:15:48,520 --> 01:15:42,949

clearance at least we know you're not

1833

01:15:51,100 --> 01:15:48,530

insane you have to do a psych eval it's

1834

01:15:53,740 --> 01:15:51,110

you know it's it's you there's at least

1835

01:15:56,320 --> 01:15:53,750

a small bit of criteria that you can go

1836

01:15:58,150 --> 01:15:56,330

on you know so still you actually

1837

01:16:03,760 --> 01:15:58,160

working on the projects now how do you

1838

01:16:06,160 --> 01:16:03,770

Fe yeah we're working on we've got ships

1839

01:16:09,939 --> 01:16:06,170

shut up set up to be chartered we has

1840

01:16:11,830 --> 01:16:09,949

technology set up to be used to check

1841

01:16:12,970 --> 01:16:11,840

everything from um fields to the

1842

01:16:15,880 --> 01:16:12,980

environmental data

1843

01:16:18,370 --> 01:16:15,890

you know analysis of the actual water in

1844

01:16:20,490 --> 01:16:18,380

the area you know we're trying to keep

1845

01:16:23,550 --> 01:16:20,500

every stoner

1846

01:16:25,650 --> 01:16:23,560

turn every stone you know so in our

1847

01:16:27,479 --> 01:16:25,660

group ranges everybody from you know

1848

01:16:29,700 --> 01:16:27,489

guys like me their nuts and bolts and

1849

01:16:32,630 --> 01:16:29,710

more you know more pragmatic it's a guys

1850

01:16:35,010 --> 01:16:32,640

that you know this was you know a

1851

01:16:36,959 --> 01:16:35,020

life-changing thing that happens is that

1852

01:16:41,100 --> 01:16:36,969

you know they they are more spiritually

1853

01:16:43,530 --> 01:16:41,110

moved by this - mm-hmm you know and I'd

1854

01:16:45,900 --> 01:16:43,540

make more fun of that if I hadn't

1855

01:16:49,350 --> 01:16:45,910

started moving into quantum mechanics

1856

01:16:51,689 --> 01:16:49,360

and as you read deeper and deeper into

1857

01:16:54,479 --> 01:16:51,699

these these newer quantum mechanics

1858

01:16:57,290 --> 01:16:54,489

these actual sign of sugars are doing in

1859

01:17:03,780 --> 01:16:57,300

quantum sciences in the club science

1860

01:17:06,330 --> 01:17:03,790

it's borderline insane I mean you know I

1861

01:17:10,560 --> 01:17:06,340

mean basically do physics without time

1862

01:17:14,130 --> 01:17:10,570

or distance yeah and see what you get

1863

01:17:16,979 --> 01:17:14,140

and I mean that's basically what they're

1864

01:17:18,630 --> 01:17:16,989

saying is that basically time at farm

1865

01:17:21,320 --> 01:17:18,640

scale doesn't it doesn't matter and

1866

01:17:23,729 --> 01:17:21,330

dislikes doesn't matter but every single

1867

01:17:27,660 --> 01:17:23,739

particle in the entire universe

1868

01:17:31,590 --> 01:17:27,670

is quantum entangled and the interesting

1869

01:17:33,830 --> 01:17:31,600

stuff yeah it hurts my head's half the

1870

01:17:36,360 --> 01:17:33,840

time but it's it's crazy interesting

1871

01:17:38,250 --> 01:17:36,370

well do you have any questions for me

1872

01:17:41,070 --> 01:17:38,260

specific direct questions because I want

1873

01:17:43,200 --> 01:17:41,080

to make sure that you know and I've

1874

01:17:44,520 --> 01:17:43,210

tried to be as honest as I can if I

1875

01:17:46,770 --> 01:17:44,530

don't know something I don't know it on

1876

01:17:51,180 --> 01:17:46,780

I do apologize but that and I tried to

1877

01:17:53,220 --> 01:17:51,190

keep my my opinions to a minimum oh yeah

1878

01:17:55,950 --> 01:17:53,230

now I really appreciate ya everything

1879

01:17:59,250 --> 01:17:55,960

you told me I think like the the

1880

01:18:00,840 --> 01:17:59,260

difficulty really is in you know making

1881

01:18:03,060 --> 01:18:00,850

a case that doesn't just simply rely

1882

01:18:05,520 --> 01:18:03,070

upon you know this eyewitness testimony

1883

01:18:09,000 --> 01:18:05,530

and talking about things like yeah you

1884

01:18:12,300 --> 01:18:09,010

you telling me that it couldn't possibly

1885

01:18:14,189 --> 01:18:12,310

be a serious cloud or something like

1886

01:18:16,020 --> 01:18:14,199

that and yeah I think where I would like

1887

01:18:19,590 --> 01:18:16,030

to do is the next step is try to nail

1888

01:18:20,910 --> 01:18:19,600

that down and yes so I said I hope I've

1889

01:18:23,970 --> 01:18:20,920

something at least a couple of leads

1890

01:18:27,540 --> 01:18:23,980

here finding information on it and older

1891

01:18:30,270 --> 01:18:27,550

baselines so you you want to buy data

1892

01:18:31,610 --> 01:18:30,280

you know spy information be able to find

1893

01:18:34,580 --> 01:18:31,620

maybe

1894

01:18:36,830 --> 01:18:34,590

you know training manuals on spy radar

1895

01:18:39,770 --> 01:18:36,840

technician training manual is in there

1896

01:18:41,810 --> 01:18:39,780

or yeah shows computer technician

1897

01:18:43,100 --> 01:18:41,820

training manuals you know I mean even if

1898

01:18:44,630 --> 01:18:43,110

they're really old they'll give you an

1899

01:18:47,180 --> 01:18:44,640

idea what it can do

1900

01:18:52,130 --> 01:18:47,190

they'll never find information about how

1901

01:18:55,430 --> 01:18:52,140

powerful it is but it is very very very

1902

01:18:57,260 --> 01:18:55,440

sour there's one thing I one thing I

1903

01:19:00,170 --> 01:18:57,270

don't know whilst you were talking about

1904

01:19:03,590 --> 01:19:00,180

it being secret about how fast they can

1905

01:19:05,360 --> 01:19:03,600

track things but you also told me that

1906

01:19:08,570 --> 01:19:05,370

you can calculate how fast they dropped

1907

01:19:12,050 --> 01:19:08,580

out of the sky and so that puts kind of

1908

01:19:14,200 --> 01:19:12,060

like a limit on the speed little bit of

1909

01:19:17,000 --> 01:19:14,210

track you can get a little chewy but uh

1910

01:19:20,120 --> 01:19:17,010

it's it's we can track much faster than

1911

01:19:21,710 --> 01:19:20,130

that even there and it's uh so that

1912

01:19:24,410 --> 01:19:21,720

there again I would like to I'd like to

1913

01:19:27,490 --> 01:19:24,420

see the specs on yeah I had a lot of

1914

01:19:30,140 --> 01:19:27,500

people would like to see the next yeah

1915

01:19:31,670 --> 01:19:30,150

the questions are chain is you know

1916

01:19:35,990 --> 01:19:31,680

everybody that doesn't have a hideous

1917

01:19:37,970 --> 01:19:36,000

technology I'll try the dark web hey if

1918

01:19:40,700 --> 01:19:37,980

you had access to it go for just

1919

01:19:41,570 --> 01:19:40,710

remember Snowden doesn't live in Russia

1920

01:19:43,790 --> 01:19:41,580

for a reason

1921

01:19:47,480 --> 01:19:43,800

yes yes and if I'm reading his book at

1922

01:19:48,680 --> 01:19:47,490

the moment it's interesting yeah but

1923

01:19:50,720 --> 01:19:48,690

anyway that's another topic though

1924

01:19:52,880 --> 01:19:50,730

anyway Gary I'll let you get back to

1925

01:19:55,250 --> 01:19:52,890

your family and I'm gonna thank you very

1926

01:19:57,920 --> 01:19:55,260

much for taking the time to talk to me

1927

01:19:59,390 --> 01:19:57,930

and if I've got some more questions can

1928

01:20:02,480 --> 01:19:59,400

I like you know follow up with you like

1929

01:20:06,310 --> 01:20:02,490

on on Twitter or I keep I keep it you

1930

01:20:08,810 --> 01:20:06,320

you're actually on me again thank but

1931

01:20:11,390 --> 01:20:08,820

keep track of all these you know here

1932

01:20:11,950 --> 01:20:11,400

you say imagine and everybody tells you

1933

01:20:14,620 --> 01:20:11,960

you're an idiot

1934

01:20:17,390 --> 01:20:14,630

[Laughter]

1935

01:20:18,800 --> 01:20:17,400

I understand where you're coming from

1936

01:20:21,200 --> 01:20:18,810

your trunk you're trying to get a grasp

1937

01:20:23,720 --> 01:20:21,210

on you're trying to get you know an idea

1938

01:20:26,420 --> 01:20:23,730

in your own head and try to figure this

1939

01:20:28,760 --> 01:20:26,430

out what how it makes sense to you and I

1940

01:20:31,490 --> 01:20:28,770

get that and that's why I agreed to this

1941

01:20:33,140 --> 01:20:31,500

Yass broadcast and no thing if I say if

1942

01:20:35,060 --> 01:20:33,150

I thought you were just out to you know

1943

01:20:36,410 --> 01:20:35,070

crucifying me I wouldn't be here right

1944

01:20:38,630 --> 01:20:36,420

now I'd be like yeah the guy's a joke

1945

01:20:41,120 --> 01:20:38,640

you know yeah he doesn't want to know

1946

01:20:43,370 --> 01:20:41,130

anything he's just here to be the dick

1947

01:20:45,379 --> 01:20:43,380

you know but you know and then depending

1948

01:20:47,120 --> 01:20:45,389

on how this comes out well

1949

01:20:49,580 --> 01:20:47,130

that'll be you know I'll either defend

1950

01:20:51,259 --> 01:20:49,590

using the desk there I'll you know

1951

01:20:54,739 --> 01:20:51,269

basically say well he kind of hacked it

1952

01:20:58,429 --> 01:20:54,749

and that's not exactly what I said you

1953

01:21:00,169 --> 01:20:58,439

know yeah I hope you know that you can

1954

01:21:01,250 --> 01:21:00,179

download it from Sky 4 after we

1955

01:21:02,989 --> 01:21:01,260

absolutely finish talking

1956

01:21:06,370 --> 01:21:02,999

I'm vegan I'm not even worried about it

1957

01:21:09,020 --> 01:21:06,380

man I I don't pull my punches

1958

01:21:13,129 --> 01:21:09,030

so it's either it's it's either All or

1959

01:21:14,679 --> 01:21:13,139

Nothing with me you're always there yeah

1960

01:21:17,389 --> 01:21:14,689

period cool

1961

01:21:19,549 --> 01:21:17,399

take it easy all right have a good night

1962

01:21:21,040 --> 01:21:19,559

that's good make it my post your family
