

1  
00:00:04,670 --> 00:00:02,600  
hey this is my quest of Medibank org I

2  
00:00:06,980 --> 00:00:04,680  
looked up earlier today and I noticed

3  
00:00:08,900 --> 00:00:06,990  
these really unusual contrails there

4  
00:00:11,180 --> 00:00:08,910  
were curves and circles and there was

5  
00:00:13,400 --> 00:00:11,190  
trails going from Horizon to Horizon it

6  
00:00:15,169 --> 00:00:13,410  
was very impressive and I'm sure the

7  
00:00:18,410 --> 00:00:15,179  
chemtrail folk were thinking the worst

8  
00:00:20,810 --> 00:00:18,420  
so I immediately hopped on flightradar24

9  
00:00:23,210 --> 00:00:20,820  
to try to figure out what was going on I

10  
00:00:26,120 --> 00:00:23,220  
quickly narrowed it down to Alaskan

11  
00:00:28,609 --> 00:00:26,130  
flight 286 - from Everett in Washington

12  
00:00:30,439 --> 00:00:28,619  
to Los Angeles and for some reason this

13  
00:00:32,510 --> 00:00:30,449

was flying a couple of 360s over

14

00:00:35,720 --> 00:00:32,520

Sacramento and this is what was making

15

00:00:37,760 --> 00:00:35,730

some of the contrails that I saw that

16

00:00:39,709 --> 00:00:37,770

wasn't all I assumed out a bit to make

17

00:00:42,139 --> 00:00:39,719

an animation of this plane over

18

00:00:43,700 --> 00:00:42,149

Sacramento and I was rather surprised to

19

00:00:45,860 --> 00:00:43,710

see that there was scores of planes in

20

00:00:47,600 --> 00:00:45,870

holding patterns all of them were

21

00:00:50,209 --> 00:00:47,610

heading for LAX and a lot of them were

22

00:00:51,709 --> 00:00:50,219

at high altitude here's my plane and you

23

00:00:55,340 --> 00:00:51,719

can actually see there's another plane

24

00:00:56,930 --> 00:00:55,350

doing the same loop I contacted an air

25

00:00:59,630 --> 00:00:56,940

traffic controller friend and he told me

26

00:01:01,910 --> 00:00:59,640

that LAX had a ground stop because they

27

00:01:04,009 --> 00:01:01,920

were socked in with fog this lasted

28

00:01:08,830 --> 00:01:04,019

about 30 to 45 minutes and then everyone

29

00:01:13,920 --> 00:01:11,520

I then helped on the

30

00:01:16,890 --> 00:01:13,930

17 satellite image viewer and looked at

31

00:01:19,740 --> 00:01:16,900

the playback sure enough there was Mike

32

00:01:21,270 --> 00:01:19,750

on trail he's actually visible where he

33

00:01:23,070 --> 00:01:21,280

formed as it's too thin
