Gary Mortimer
So very TRUE

1
00:00:03,590 --> 00:00:01,750
so i've noticed recently that architects

2
00:00:05,829 --> 00:00:03,600
and engineers for 9 11 truth the

3
00:00:08,070 --> 00:00:05,839
organization that thinks the world trade

4
00:00:11,430 --> 00:00:08,080
center was demolished by pre-planted

5
00:00:13,910 --> 00:00:11,440
explosives have started on a new

6
00:00:15,829 --> 00:00:13,920
tactic new strategy

7
00:00:18,470 --> 00:00:15,839
they've started to dumb it down they've

8
00:00:21,750 --> 00:00:18,480
started to use these memes that are very

9
00:00:23,189 --> 00:00:21,760
simple in some cases quite silly and i'd

10
00:00:25,429 --> 00:00:23,199
like to go back through them just kind

11
00:00:27,269 --> 00:00:25,439
of have a quick look at them and give

12
00:00:28,790 --> 00:00:27,279
some some thoughts on them

13
00:00:30,310 --> 00:00:28,800

there's quite a lot of them

14

00:00:31,990 --> 00:00:30,320

if we scroll back you'll see them all

15

00:00:33,910 --> 00:00:32,000

popping up these kind of things with

16

00:00:35,990 --> 00:00:33,920

these uh big yellow

17

00:00:37,830 --> 00:00:36,000

background texts with something very

18

00:00:39,350 --> 00:00:37,840

short and pithy

19

00:00:41,110 --> 00:00:39,360

little jokes

20

00:00:42,950 --> 00:00:41,120

uh but if we keep going back we

21

00:00:44,389 --> 00:00:42,960

eventually get to

22

00:00:46,310 --> 00:00:44,399

i think one that kind of sums up the

23

00:00:47,990 --> 00:00:46,320

whole thing

24

00:00:49,940 --> 00:00:48,000

which is there's quite a lot of them as

25

00:00:54,630 --> 00:00:49,950

you can see

26

00:00:54,640 --> 00:00:59,510

wow more than i thought

27

00:01:03,830 --> 00:01:01,670

it's not rocket science okay so this is

28

00:01:05,670 --> 00:01:03,840

the one i kind of want to start with uh

29

00:01:08,469 --> 00:01:05,680

this is this is kind of like started off

30

00:01:11,109 --> 00:01:08,479

the whole thing uh for me

31

00:01:12,630 --> 00:01:11,119

when i saw this one and i thought huh

32

00:01:14,950 --> 00:01:12,640

what does this mean it's not rocket

33

00:01:15,990 --> 00:01:14,960

science this is a building exploding

34

00:01:18,390 --> 00:01:16,000

basically they're saying it's

35

00:01:21,429 --> 00:01:18,400

self-evident that you can tell just by

36

00:01:23,030 --> 00:01:21,439

looking at what's going on that uh

37

00:01:25,429 --> 00:01:23,040

that is a building exploding it's

38

00:01:27,670 --> 00:01:25,439

obvious there it is there's a building

39

00:01:28,710 --> 00:01:27,680

exploding you can see explosions

40

00:01:30,710 --> 00:01:28,720

therefore

41

00:01:33,109 --> 00:01:30,720

it's very simple it's not rocket science

42

00:01:35,650 --> 00:01:33,119

we don't need anything complicated

43

00:01:37,749 --> 00:01:35,660

but i just like to contrast that um

44

00:01:39,670 --> 00:01:37,759

[Music]

45

00:01:42,149 --> 00:01:39,680

that sentiment with something that's a

46

00:01:44,310 --> 00:01:42,159

little bit further down the timeline

47

00:01:45,510 --> 00:01:44,320

which is

48

00:01:48,950 --> 00:01:45,520

this one here

49

00:01:53,510 --> 00:01:51,350

this is professor leroy halsey and a

50

00:01:55,590 --> 00:01:53,520

while ago architects and engineers five

51
00:01:58,149 --> 00:01:55,600
years ago i think about they started

52
00:02:00,550 --> 00:01:58,159
paid him to do a study and he had one of

53
00:02:02,870 --> 00:02:00,560
his graduate students

54
00:02:04,469 --> 00:02:02,880
do a model of the world trade center and

55
00:02:07,030 --> 00:02:04,479
they ran some tests on it and then they

56
00:02:08,070 --> 00:02:07,040
concluded from this that

57
00:02:09,350 --> 00:02:08,080
it

58
00:02:10,389 --> 00:02:09,360
could not have collapsed due to fire

59
00:02:12,710 --> 00:02:10,399
alone

60
00:02:14,949 --> 00:02:12,720
and horsery is he's a legit scientist he

61
00:02:16,710 --> 00:02:14,959
builds bridges well he analyzes bridges

62
00:02:18,710 --> 00:02:16,720
and he does forensic structural

63
00:02:20,470 --> 00:02:18,720

engineering he consults with people so

64

00:02:22,790 --> 00:02:20,480

he's a legit guy and his students i'm

65

00:02:24,470 --> 00:02:22,800

sure are legit i think there were two

66

00:02:26,309 --> 00:02:24,480

students working on this with him and

67

00:02:27,990 --> 00:02:26,319

one of them went on to work for some

68

00:02:29,510 --> 00:02:28,000

local government somewhere he's doing

69

00:02:31,270 --> 00:02:29,520

civil engineering now and the other one

70

00:02:33,110 --> 00:02:31,280

went back to china to

71

00:02:35,270 --> 00:02:33,120

teach or something so you know they're

72

00:02:36,830 --> 00:02:35,280

intelligent people

73

00:02:39,990 --> 00:02:36,840

leroy hulsey

74

00:02:43,990 --> 00:02:40,000

phd structural engineer

75

00:02:45,670 --> 00:02:44,000

now so the sentiment to this is that uh

76
00:02:47,270 --> 00:02:45,680
apparently trust science and the experts

77
00:02:49,270 --> 00:02:47,280
does not apply to everything which

78
00:02:50,630 --> 00:02:49,280
they're meaning that

79
00:02:52,710 --> 00:02:50,640
the powers that be

80
00:02:55,110 --> 00:02:52,720
the the mainstream

81
00:02:57,830 --> 00:02:55,120
is giving a false equivalence by not

82
00:03:00,229 --> 00:02:57,840
trusting leroy hulseby because he's a a

83
00:03:03,750 --> 00:03:00,239
scientist and an expert and we should

84
00:03:05,110 --> 00:03:03,760
trust him and it says says here like uh

85
00:03:06,550 --> 00:03:05,120
why is he not getting the attention of

86
00:03:08,390 --> 00:03:06,560
the mainstream media that constantly

87
00:03:10,229 --> 00:03:08,400
tells us to trust science and the expert

88
00:03:12,949 --> 00:03:10,239

so they've had this expert do this very

89

00:03:15,030 --> 00:03:12,959

complicated uh series of tests uh which

90

00:03:17,430 --> 00:03:15,040

are fatally flawed if you actually look

91

00:03:19,670 --> 00:03:17,440

into it because they they

92

00:03:21,509 --> 00:03:19,680

they used uh

93

00:03:23,509 --> 00:03:21,519

linear static analysis for something

94

00:03:24,869 --> 00:03:23,519

which was dynamic and non-linear so

95

00:03:27,190 --> 00:03:24,879

their entire

96

00:03:28,949 --> 00:03:27,200

premise doesn't make any sense uh anyway

97

00:03:30,949 --> 00:03:28,959

and then they use these ridiculous

98

00:03:33,509 --> 00:03:30,959

tipping over simulations which are just

99

00:03:35,509 --> 00:03:33,519

nonsensical but anyway it was at least

100

00:03:39,430 --> 00:03:35,519

an attempt to do science

101
00:03:40,869 --> 00:03:39,440
things and now why did they have to use

102
00:03:43,270 --> 00:03:40,879
science they had to use science because

103
00:03:45,190 --> 00:03:43,280
it's actually quite complicated how and

104
00:03:47,190 --> 00:03:45,200
why buildings collapse can actually be

105
00:03:48,789 --> 00:03:47,200
fairly complicated and

106
00:03:49,910 --> 00:03:48,799
if you can't see what's going on inside

107
00:03:51,509 --> 00:03:49,920
the building you've got to kind of

108
00:03:53,589 --> 00:03:51,519
extrapolate

109
00:03:55,750 --> 00:03:53,599
or interpolate from various things that

110
00:03:57,110 --> 00:03:55,760
you see then

111
00:03:59,190 --> 00:03:57,120
it can be complicated and you have to do

112
00:04:00,710 --> 00:03:59,200
these studies so architects and

113
00:04:03,110 --> 00:04:00,720

engineers were telling us that we should

114

00:04:06,390 --> 00:04:03,120

trust science and the experts in this

115

00:04:07,990 --> 00:04:06,400

case their particular scientific expert

116

00:04:09,110 --> 00:04:08,000

but then

117

00:04:10,229 --> 00:04:09,120

then they kind of change tech a little

118

00:04:11,830 --> 00:04:10,239

bit they start using these kind of

119

00:04:13,350 --> 00:04:11,840

cartoony things

120

00:04:14,550 --> 00:04:13,360

one guy is saying it looks to us like

121

00:04:16,629 --> 00:04:14,560

charges were used to bring it to the

122

00:04:18,870 --> 00:04:16,639

ground and dick cheney says well the way

123

00:04:20,469 --> 00:04:18,880

it looks to me the top just pancaked the

124

00:04:21,189 --> 00:04:20,479

rest of the building as if he's trying

125

00:04:25,670 --> 00:04:21,199

to

126

00:04:26,830 --> 00:04:25,680

pancaking the building as being the

127

00:04:29,510 --> 00:04:26,840

official

128

00:04:33,110 --> 00:04:29,520

story and there's this other it's just a

129

00:04:35,510 --> 00:04:33,120

cartoon it doesn't really mean anything

130

00:04:38,870 --> 00:04:35,520

and this is taking some quote of someone

131

00:04:40,870 --> 00:04:38,880

who is there a uh cnn reporter who said

132

00:04:42,310 --> 00:04:40,880

that what i guess what it looked like to

133

00:04:43,990 --> 00:04:42,320

her was the entire top of the building

134

00:04:45,510 --> 00:04:44,000

just blew up which if you're standing on

135

00:04:47,030 --> 00:04:45,520

the ground that could quite easily be

136

00:04:47,749 --> 00:04:47,040

what it looks like to you it did look

137

00:04:49,670 --> 00:04:47,759

like

138

00:04:52,070 --> 00:04:49,680

things were kind of flying everywhere it

139

00:04:53,350 --> 00:04:52,080

kind of looks like an explosion but yeah

140

00:04:54,790 --> 00:04:53,360

just because something looks like

141

00:04:58,070 --> 00:04:54,800

something does that mean it is that

142

00:04:59,909 --> 00:04:58,080

thing if something always is what it

143

00:05:02,469 --> 00:04:59,919

looks like then why do we need to do all

144

00:05:03,990 --> 00:05:02,479

these these studies to figure things out

145

00:05:06,310 --> 00:05:04,000

and we get back to it's not rocket

146

00:05:08,310 --> 00:05:06,320

science this is a building exploding as

147

00:05:10,629 --> 00:05:08,320

if we know what buildings exploding look

148

00:05:12,550 --> 00:05:10,639

like they look like these giant peeling

149

00:05:14,790 --> 00:05:12,560

away cauliflower things now this

150

00:05:16,550 --> 00:05:14,800

particular picture is very misleading

151
00:05:18,230 --> 00:05:16,560
because it kind of looks like these

152
00:05:19,909 --> 00:05:18,240
things are shooting up

153
00:05:21,510 --> 00:05:19,919
when really everything is going down if

154
00:05:23,430 --> 00:05:21,520
you look at the video of what's actually

155
00:05:25,270 --> 00:05:23,440
going on here every single thing in it

156
00:05:26,629 --> 00:05:25,280
is actually going down the middle of the

157
00:05:28,310 --> 00:05:26,639
building is coming down so it kind of

158
00:05:29,830 --> 00:05:28,320
pulls down the smoke in the middle and

159
00:05:31,590 --> 00:05:29,840
it kind of gives you this this

160
00:05:33,590 --> 00:05:31,600
impression of kind of a mushroom

161
00:05:35,430 --> 00:05:33,600
clouding away because it looks like it's

162
00:05:36,790 --> 00:05:35,440
narrower but it's just falling down all

163
00:05:39,029 --> 00:05:36,800

these bits of

164

00:05:40,629 --> 00:05:39,039

metal on the outside these big girders

165

00:05:42,310 --> 00:05:40,639

are falling down and if you notice

166

00:05:43,990 --> 00:05:42,320

there's a lot of it that's actually a

167

00:05:45,430 --> 00:05:44,000

lot lower than where the building is

168

00:05:47,350 --> 00:05:45,440

collapsed which means that the collapsed

169

00:05:49,110 --> 00:05:47,360

progression is proceeding a lot slower

170

00:05:50,390 --> 00:05:49,120

than freefall but you know i'm getting

171

00:05:51,670 --> 00:05:50,400

technical now

172

00:05:54,150 --> 00:05:51,680

apparently it's not rocket science we

173

00:05:56,390 --> 00:05:54,160

don't even need to consider things like

174

00:05:58,550 --> 00:05:56,400

the relative speed of things because

175

00:05:59,909 --> 00:05:58,560

it's not rocket science

176

00:06:02,790 --> 00:05:59,919

but maybe it is a little bit more

177

00:06:06,550 --> 00:06:02,800

complicated than they think it is

178

00:06:08,710 --> 00:06:06,560

obviously controlled demolition um

179

00:06:10,710 --> 00:06:08,720

why is this obvious this is there's no

180

00:06:13,670 --> 00:06:10,720

other control demolition that looks like

181

00:06:15,350 --> 00:06:13,680

this giant skyscraper uh

182

00:06:17,670 --> 00:06:15,360

disintegrating from the top to the

183

00:06:20,790 --> 00:06:17,680

bottom why is this obvious

184

00:06:23,830 --> 00:06:20,800

it seems like if it's obvious

185

00:06:26,070 --> 00:06:23,840

everyone would know it's obvious but

186

00:06:27,510 --> 00:06:26,080

just this kind of small plucky band of

187

00:06:28,950 --> 00:06:27,520

people on the internet know that it's

188

00:06:30,230 --> 00:06:28,960

obvious i don't you know it's in there

189

00:06:31,110 --> 00:06:30,240

what does it mean what does it mean what

190

00:06:32,390 --> 00:06:31,120

do they say

191

00:06:33,590 --> 00:06:32,400

where is the top of the building that we

192

00:06:35,430 --> 00:06:33,600

are supposed to believe is crushing the

193

00:06:37,670 --> 00:06:35,440

rest of the building hint it's not

194

00:06:39,830 --> 00:06:37,680

hiding behind the desk cloud it is the

195

00:06:41,670 --> 00:06:39,840

dust cloud so here they are kind of

196

00:06:43,749 --> 00:06:41,680

making the claim that

197

00:06:45,670 --> 00:06:43,759

all of the building has turned to dust

198

00:06:47,590 --> 00:06:45,680

in mid-air

199

00:06:49,110 --> 00:06:47,600

which

200

00:06:51,270 --> 00:06:49,120

this is not

201
00:06:52,550 --> 00:06:51,280
something obvious from looking at this

202
00:06:53,350 --> 00:06:52,560
diagram the show there's a lot of dust

203
00:06:56,870 --> 00:06:53,360
but

204
00:06:58,309 --> 00:06:56,880
a rockfall has a lot of dust uh any kind

205
00:07:00,150 --> 00:06:58,319
of building collapsing is going to have

206
00:07:02,629 --> 00:07:00,160
a lot of dust you'd expect a lot of dust

207
00:07:04,629 --> 00:07:02,639
from a building collapsing from fire and

208
00:07:06,150 --> 00:07:04,639
gravity just because a lot of dust it

209
00:07:07,990 --> 00:07:06,160
doesn't mean that the entire building

210
00:07:10,390 --> 00:07:08,000
has turned to dust this is a kind of a

211
00:07:12,390 --> 00:07:10,400
nonsensical thing that people kind of in

212
00:07:13,830 --> 00:07:12,400
the 911 movement people take for granted

213
00:07:16,070 --> 00:07:13,840

as being true

214

00:07:17,029 --> 00:07:16,080

but they don't really explain why it's

215

00:07:19,029 --> 00:07:17,039

true

216

00:07:21,029 --> 00:07:19,039

and when they start to try to explain

217

00:07:23,589 --> 00:07:21,039

why it's true then they start getting

218

00:07:28,309 --> 00:07:23,599

complicated it actually does kind of

219

00:07:33,830 --> 00:07:31,270

so here's a quote um

220

00:07:36,390 --> 00:07:33,840

where phd engineers go to have trouble

221

00:07:38,870 --> 00:07:36,400

getting a handle on building seven

222

00:07:40,309 --> 00:07:38,880

now this is um yeah the have trouble

223

00:07:42,870 --> 00:07:40,319

getting a handle on building seven was

224

00:07:44,550 --> 00:07:42,880

just an early admission by nist that it

225

00:07:46,710 --> 00:07:44,560

was difficult to understand exactly what

226
00:07:48,469 --> 00:07:46,720
went on with building seven because it's

227
00:07:50,230 --> 00:07:48,479
actually very complicated not because

228
00:07:51,749 --> 00:07:50,240
it's obvious what went on with building

229
00:07:56,150 --> 00:07:51,759
seven but because it's actually quite

230
00:08:01,270 --> 00:07:58,710
we nist are unable to provide a full

231
00:08:02,629 --> 00:08:01,280
explanation of the total collapse

232
00:08:04,390 --> 00:08:02,639
now

233
00:08:06,150 --> 00:08:04,400
i think the reason i'm not sure exactly

234
00:08:07,749 --> 00:08:06,160
where this comes from this particular

235
00:08:09,909 --> 00:08:07,759
quote but basically

236
00:08:13,270 --> 00:08:09,919
what nist did was they figured out why

237
00:08:14,550 --> 00:08:13,280
the building collapsed and they did

238
00:08:17,189 --> 00:08:14,560

simulations over it and they did

239

00:08:18,390 --> 00:08:17,199

analysis of of it up to the point that

240

00:08:19,990 --> 00:08:18,400

the top part of the building started

241

00:08:20,950 --> 00:08:20,000

falling through the bottom part of the

242

00:08:22,950 --> 00:08:20,960

building

243

00:08:24,550 --> 00:08:22,960

and at that point it was obvious

244

00:08:26,309 --> 00:08:24,560

that the progression of the collapse

245

00:08:28,390 --> 00:08:26,319

could not be arrested and this is saying

246

00:08:30,790 --> 00:08:28,400

what they say in their report and so

247

00:08:32,389 --> 00:08:30,800

they didn't bother figuring out the

248

00:08:34,149 --> 00:08:32,399

exact progression of what would happen

249

00:08:36,230 --> 00:08:34,159

and why would they it's obvious the

250

00:08:37,990 --> 00:08:36,240

entire building is going to collapse

251

00:08:42,389 --> 00:08:38,000

it's kind of irrelevant

252

00:08:43,829 --> 00:08:42,399

you know exactly which member fails when

253

00:08:45,990 --> 00:08:43,839

a lot of what we see here is people

254

00:08:48,310 --> 00:08:46,000

misunderstanding the actual structure of

255

00:08:49,590 --> 00:08:48,320

the building and the actual mechanism of

256

00:08:51,590 --> 00:08:49,600

collapse

257

00:08:53,910 --> 00:08:51,600

uh what world trade center is is kind of

258

00:08:56,150 --> 00:08:53,920

you know say tube in a tube everyone's

259

00:08:58,070 --> 00:08:56,160

kind of heard that that before it's got

260

00:09:00,070 --> 00:08:58,080

this very strong core and then it's got

261

00:09:01,829 --> 00:09:00,080

these very wide floors with lots of open

262

00:09:03,509 --> 00:09:01,839

office space and then it has these

263

00:09:05,750 --> 00:09:03,519

floors on the outside

264

00:09:07,590 --> 00:09:05,760

and uh you know plane flew into the

265

00:09:09,030 --> 00:09:07,600

building it took out a bunch of the

266

00:09:10,550 --> 00:09:09,040

outside columns it took out a bunch of

267

00:09:13,269 --> 00:09:10,560

the middle columns it caught the big

268

00:09:17,110 --> 00:09:13,279

fire the flyer fire weakened

269

00:09:19,670 --> 00:09:17,120

uh things it caused the floors to sag

270

00:09:21,110 --> 00:09:19,680

so they went from being uh

271

00:09:22,389 --> 00:09:21,120

supporting the outside of the building

272

00:09:24,310 --> 00:09:22,399

to actually pulling the building in

273

00:09:25,990 --> 00:09:24,320

because if you can imagine uh

274

00:09:28,630 --> 00:09:26,000

something turning from essentially a

275

00:09:30,470 --> 00:09:28,640

rigid structure into like a chain a

276

00:09:32,150 --> 00:09:30,480

chain a very very heavy chain that pull

277

00:09:33,910 --> 00:09:32,160

things in that's what happens so the

278

00:09:35,910 --> 00:09:33,920

building is pulled inside

279

00:09:37,750 --> 00:09:35,920

the columns can no longer support the

280

00:09:39,750 --> 00:09:37,760

weight of the building above and it

281

00:09:42,389 --> 00:09:39,760

starts to fall down

282

00:09:44,070 --> 00:09:42,399

it falls down mostly through the floors

283

00:09:46,710 --> 00:09:44,080

the floors are very designed and by the

284

00:09:48,550 --> 00:09:46,720

floor i mean the the area between the

285

00:09:51,430 --> 00:09:48,560

core and the outside

286

00:09:53,269 --> 00:09:51,440

or areas between columns in the center

287

00:09:54,870 --> 00:09:53,279

of the of the building

288

00:09:55,829 --> 00:09:54,880

it falls down through these spaces

289

00:09:58,310 --> 00:09:55,839

because it can't pull through the

290

00:09:59,590 --> 00:09:58,320

columns the columns are supporting

291

00:10:01,750 --> 00:09:59,600

uh the upper part of the building if

292

00:10:03,110 --> 00:10:01,760

you've got a very strong column uh it's

293

00:10:05,509 --> 00:10:03,120

going to be a lot harder for it to fall

294

00:10:06,790 --> 00:10:05,519

through that but it can fall through the

295

00:10:08,550 --> 00:10:06,800

plots very very easily and this is

296

00:10:10,389 --> 00:10:08,560

something you actually see you actually

297

00:10:12,949 --> 00:10:10,399

see if you watch the videos of the

298

00:10:14,550 --> 00:10:12,959

collapse that the core remains and the

299

00:10:15,750 --> 00:10:14,560

the walls kind of remain and the walls

300

00:10:17,350 --> 00:10:15,760

kind of actually

301
00:10:19,269 --> 00:10:17,360
peel away and if you look at this

302
00:10:21,430 --> 00:10:19,279
picture here

303
00:10:23,190 --> 00:10:21,440
uh try control demolition you can see

304
00:10:26,389 --> 00:10:23,200
that actually puffs the smoke

305
00:10:28,870 --> 00:10:26,399
quite a bit lower than the actual

306
00:10:30,710 --> 00:10:28,880
uh visible collapse wave and the reason

307
00:10:32,710 --> 00:10:30,720
for that is that the collapse actually

308
00:10:35,030 --> 00:10:32,720
happens inside the building first you

309
00:10:36,470 --> 00:10:35,040
see floor there are floors collapsing

310
00:10:38,310 --> 00:10:36,480
inside the building

311
00:10:40,470 --> 00:10:38,320
and obviously that compresses the air

312
00:10:42,710 --> 00:10:40,480
quite tremendously imagine you know 200

313
00:10:45,190 --> 00:10:42,720

feet by 200 feet that's a lot of a lot

314

00:10:46,470 --> 00:10:45,200

of air and it's got to go somewhere

315

00:10:47,990 --> 00:10:46,480

and

316

00:10:50,710 --> 00:10:48,000

it strips away the floors on the inside

317

00:10:52,069 --> 00:10:50,720

and then the walls actually kind of

318

00:10:54,069 --> 00:10:52,079

fall outwards

319

00:10:55,269 --> 00:10:54,079

and there's a lot of air being pushed

320

00:10:57,269 --> 00:10:55,279

outwards as well so you get this

321

00:10:59,590 --> 00:10:57,279

combination of bits of the wall falling

322

00:11:02,870 --> 00:10:59,600

outwards and you get these big clouds of

323

00:11:03,760 --> 00:11:02,880

smoke being pushed out by the by the air

324

00:11:05,670 --> 00:11:03,770

it's um

325

00:11:07,590 --> 00:11:05,680

[Music]

326

00:11:09,509 --> 00:11:07,600

and this is complicated

327

00:11:11,670 --> 00:11:09,519

but once you actually understand it it's

328

00:11:14,550 --> 00:11:11,680

uh reasonably straightforward so is it

329

00:11:16,630 --> 00:11:14,560

rocket science i don't know i kind of

330

00:11:19,030 --> 00:11:16,640

torn like when i'm explaining things do

331

00:11:20,310 --> 00:11:19,040

i give a very very detailed explanation

332

00:11:22,630 --> 00:11:20,320

or do i give a very very simple

333

00:11:24,389 --> 00:11:22,640

explanation and then i have to explain

334

00:11:26,630 --> 00:11:24,399

more things later

335

00:11:30,069 --> 00:11:26,640

it seems like

336

00:11:32,150 --> 00:11:30,079

911 truth are not really just giving a

337

00:11:34,069 --> 00:11:32,160

simple explanation here they're saying

338

00:11:35,910 --> 00:11:34,079

that it is simple

339

00:11:37,110 --> 00:11:35,920

it's actually complicated you got to

340

00:11:39,110 --> 00:11:37,120

look into these things to actually

341

00:11:40,630 --> 00:11:39,120

figure out what's going on and it's not

342

00:11:43,910 --> 00:11:40,640

immediately obvious

343

00:11:45,829 --> 00:11:43,920

sagging floor would pull pull in the

344

00:11:47,670 --> 00:11:45,839

outside columns again doesn't make sense

345

00:11:49,030 --> 00:11:47,680

to a lot of people i have little videos

346

00:11:50,470 --> 00:11:49,040

explaining it but it's it's a

347

00:11:52,150 --> 00:11:50,480

complicated thing

348

00:11:56,389 --> 00:11:52,160

it's not rocket science but it's not

349

00:12:00,310 --> 00:11:58,550

ah this is someone again saying you know

350

00:12:01,670 --> 00:12:00,320

the the perception was that the building

351
00:12:03,829 --> 00:12:01,680
looked like it had been taken out with

352
00:12:05,430 --> 00:12:03,839
charges

353
00:12:07,350 --> 00:12:05,440
if you're on the ground at the time

354
00:12:08,629 --> 00:12:07,360
looking up at a building yeah it might

355
00:12:11,110 --> 00:12:08,639
look like that

356
00:12:12,550 --> 00:12:11,120
but uh a few days later you're looking

357
00:12:13,910 --> 00:12:12,560
at the actual videos of the collapse

358
00:12:15,990 --> 00:12:13,920
you're analyzing it you figure out

359
00:12:17,990 --> 00:12:16,000
what's actually going on and look at it

360
00:12:19,670 --> 00:12:18,000
from all the different angles you do do

361
00:12:20,629 --> 00:12:19,680
the math you look at the plans of the

362
00:12:23,030 --> 00:12:20,639
building

363
00:12:24,790 --> 00:12:23,040

uh it's a different kettle of fish than

364

00:12:26,470 --> 00:12:24,800

just being there having no idea what's

365

00:12:28,230 --> 00:12:26,480

going on inside the building no idea

366

00:12:30,069 --> 00:12:28,240

exactly what damage is being done and

367

00:12:32,230 --> 00:12:30,079

then seeing the building collapse yeah

368

00:12:34,550 --> 00:12:32,240

sure you get a certain perception

369

00:12:37,829 --> 00:12:34,560

but is that perception reality

370

00:12:40,310 --> 00:12:37,839

and why would your initial perception on

371

00:12:42,150 --> 00:12:40,320

very very limited information be the one

372

00:12:44,230 --> 00:12:42,160

that you stay with forever if you

373

00:12:45,990 --> 00:12:44,240

actually look at the more information

374

00:12:47,350 --> 00:12:46,000

later you'll perhaps get a different

375

00:12:51,110 --> 00:12:47,360

perception when in fact you would get a

376

00:12:54,790 --> 00:12:52,470

how does the building crush itself

377

00:12:57,509 --> 00:12:54,800

essentially in freefall well uh it

378

00:12:58,470 --> 00:12:57,519

doesn't and but not for what ae911 truth

379

00:13:00,470 --> 00:12:58,480

is saying

380

00:13:03,910 --> 00:13:00,480

if you if you look at the collapse again

381

00:13:06,629 --> 00:13:03,920

here you will see little bits of metal

382

00:13:08,230 --> 00:13:06,639

falling ahead of the main debris wave so

383

00:13:10,389 --> 00:13:08,240

these things on the outside you know big

384

00:13:12,629 --> 00:13:10,399

chunks of steel and whatnot are falling

385

00:13:13,990 --> 00:13:12,639

at free fall but the collapse wave isn't

386

00:13:16,310 --> 00:13:14,000

it actually fell at something like

387

00:13:17,430 --> 00:13:16,320

two-thirds free-fall

388

00:13:18,710 --> 00:13:17,440

and

389

00:13:20,230 --> 00:13:18,720

which

390

00:13:22,389 --> 00:13:20,240

it's kind of what you'd expect if you've

391

00:13:24,710 --> 00:13:22,399

got the only thing that's stopping the

392

00:13:26,310 --> 00:13:24,720

building falling of these kind of

393

00:13:27,910 --> 00:13:26,320

weak floor structures that it doesn't

394

00:13:29,190 --> 00:13:27,920

really take very much to actually go

395

00:13:30,629 --> 00:13:29,200

through because it's bypassing the

396

00:13:31,990 --> 00:13:30,639

columns and then the columns have the

397

00:13:34,550 --> 00:13:32,000

floor stripped away from them so

398

00:13:36,230 --> 00:13:34,560

eventually they they topple over

399

00:13:37,990 --> 00:13:36,240

but yeah how does it crush itself in

400

00:13:39,750 --> 00:13:38,000

essentially in freefall well you know

401
00:13:41,829 --> 00:13:39,760
like this

402
00:13:52,949 --> 00:13:41,839
perhaps

403
00:13:52,959 --> 00:13:56,230
what do you see

404
00:14:01,030 --> 00:13:59,030
well uh i see

405
00:14:02,949 --> 00:14:01,040
a bit of the wall here

406
00:14:04,949 --> 00:14:02,959
which has fallen over and it's trailing

407
00:14:07,430 --> 00:14:04,959
dust behind it

408
00:14:10,069 --> 00:14:07,440
i see lots of bits of aluminum cladding

409
00:14:13,350 --> 00:14:10,079
which is the the wall so what i see

410
00:14:15,269 --> 00:14:13,360
is essentially the building

411
00:14:16,870 --> 00:14:15,279
kind of falling out with the outer walls

412
00:14:17,670 --> 00:14:16,880
are falling outwards

413
00:14:19,030 --> 00:14:17,680

the

414

00:14:21,110 --> 00:14:19,040

floors are being

415

00:14:23,990 --> 00:14:21,120

stripped away from uh from the core and

416

00:14:26,550 --> 00:14:24,000

from the outer walls and the the core

417

00:14:28,790 --> 00:14:26,560

the core is actually still here and you

418

00:14:31,189 --> 00:14:28,800

can see it in this particular photo but

419

00:14:34,790 --> 00:14:31,199

the actual core of the building uh kind

420

00:14:37,189 --> 00:14:34,800

of remained because it it was

421

00:14:39,030 --> 00:14:37,199

it had the flaws stripped away from it

422

00:14:40,470 --> 00:14:39,040

so it remained for a while but of course

423

00:14:41,990 --> 00:14:40,480

you know it didn't have enough strength

424

00:14:44,470 --> 00:14:42,000

to stay by itself with everything that

425

00:14:46,069 --> 00:14:44,480

was going on so it did eventually fall

426

00:14:48,790 --> 00:14:46,079

but yeah what's going on here why is

427

00:14:50,870 --> 00:14:48,800

this way ahead of this

428

00:14:52,629 --> 00:14:50,880

does it have rockets attached to it

429

00:14:54,629 --> 00:14:52,639

pointing down so it shoots it down

430

00:14:56,470 --> 00:14:54,639

towards the ground that's actually

431

00:14:59,269 --> 00:14:56,480

something that people in architects and

432

00:15:02,629 --> 00:14:59,279

engineers for 9 11 truth have suggested

433

00:15:04,069 --> 00:15:02,639

that there are these thermite rockets

434

00:15:06,310 --> 00:15:04,079

meals something or other i can't

435

00:15:08,069 --> 00:15:06,320

remember his name suggested that there's

436

00:15:09,910 --> 00:15:08,079

this kind of weird

437

00:15:10,870 --> 00:15:09,920

mechanism of

438

00:15:13,030 --> 00:15:10,880

thermal

439

00:15:16,069 --> 00:15:13,040

thermite rockets that pushes everything

440

00:15:17,430 --> 00:15:16,079

out in a way that resembles air being

441

00:15:19,829 --> 00:15:17,440

pushed out when a building collapses

442

00:15:21,430 --> 00:15:19,839

apparently but

443

00:15:23,990 --> 00:15:21,440

what do you see if you aren't in denial

444

00:15:28,870 --> 00:15:24,000

you'll see a building exploding nope i

445

00:15:32,710 --> 00:15:31,110

not sure what this one means super good

446

00:15:35,350 --> 00:15:32,720

way to prevent skyscrapers from

447

00:15:37,110 --> 00:15:35,360

collapsing don't demolish them

448

00:15:39,910 --> 00:15:37,120

and the comments up here

449

00:15:43,269 --> 00:15:39,920

if only they had used this in 2001 so

450

00:15:45,990 --> 00:15:43,279

many lives would have been saved

451
00:15:48,710 --> 00:15:46,000
that's just idiotic it doesn't make any

452
00:15:51,110 --> 00:15:49,829
and

453
00:15:53,030 --> 00:15:51,120
talking about the lives that would have

454
00:15:55,910 --> 00:15:53,040
been saved i don't know it just seems so

455
00:15:55,920 --> 00:16:01,670
i just can't even

456
00:16:06,629 --> 00:16:04,230
defund nist they're trying to

457
00:16:09,430 --> 00:16:06,639
piggyback on the defund the police

458
00:16:11,350 --> 00:16:09,440
memes that are going around so

459
00:16:13,110 --> 00:16:11,360
let's see defund this their fraudulent

460
00:16:14,870 --> 00:16:13,120
911 reports have killed hundreds of

461
00:16:17,269 --> 00:16:14,880
thousands of people and wasted trillions

462
00:16:19,590 --> 00:16:17,279
in the war on terror

463
00:16:21,670 --> 00:16:19,600

well uh you know some of us could agree

464

00:16:23,910 --> 00:16:21,680

with parts of that

465

00:16:27,509 --> 00:16:23,920

not that nist is responsible but that

466

00:16:29,829 --> 00:16:27,519

the us government used uh 911 as a

467

00:16:31,990 --> 00:16:29,839

pretext for invading countries like like

468

00:16:33,990 --> 00:16:32,000

iraq it gives them kind of car plans to

469

00:16:35,829 --> 00:16:34,000

go and uh do this

470

00:16:36,949 --> 00:16:35,839

this war on terror by invading other

471

00:16:39,590 --> 00:16:36,959

countries

472

00:16:41,350 --> 00:16:39,600

and uh wasted trillions i'm not sure

473

00:16:42,710 --> 00:16:41,360

about trillions that seems rather a lot

474

00:16:44,069 --> 00:16:42,720

but

475

00:16:45,430 --> 00:16:44,079

yeah certainly there's a lot of money

476
00:16:46,629 --> 00:16:45,440
wasted in the military industrial

477
00:16:48,629 --> 00:16:46,639
complex and 911 would use a

478
00:16:50,150 --> 00:16:48,639
justification for that but that just

479
00:16:51,509 --> 00:16:50,160
because bad things came out of it

480
00:16:53,749 --> 00:16:51,519
doesn't mean that the actual report

481
00:16:55,910 --> 00:16:53,759
itself was fraudulent if the report was

482
00:17:04,470 --> 00:16:55,920
entirely accurate

483
00:17:09,750 --> 00:17:07,510
okay it's real effing simple you see

484
00:17:11,909 --> 00:17:09,760
molten steel as fireman says you'll see

485
00:17:14,630 --> 00:17:11,919
molten steel running down the channel

486
00:17:17,270 --> 00:17:14,640
rails like you're in a foundry like lava

487
00:17:19,909 --> 00:17:17,280
like lava from a volcano

488
00:17:23,590 --> 00:17:19,919

fire can't melt steel

489

00:17:25,590 --> 00:17:23,600

but there's nearly no indication that

490

00:17:28,150 --> 00:17:25,600

there was any molten steel there wasn't

491

00:17:29,590 --> 00:17:28,160

any molten steel actually recovered

492

00:17:31,909 --> 00:17:29,600

and the way they talk about the molten

493

00:17:33,190 --> 00:17:31,919

steel is that there was these rivers of

494

00:17:34,310 --> 00:17:33,200

it

495

00:17:36,470 --> 00:17:34,320

like

496

00:17:38,150 --> 00:17:36,480

days after they collapsed there's rivers

497

00:17:40,950 --> 00:17:38,160

of molten steel

498

00:17:42,789 --> 00:17:40,960

there would be huge

499

00:17:44,870 --> 00:17:42,799

puddles of molten steel like essentially

500

00:17:46,549 --> 00:17:44,880

huge collections of molten steel nothing

501
00:17:47,990 --> 00:17:46,559
like that was found yeah this

502
00:17:49,430 --> 00:17:48,000
firefighter i'm sure he saw something

503
00:17:51,750 --> 00:17:49,440
that looked like molten metal it might

504
00:17:54,549 --> 00:17:51,760
have been molten uh also lead for

505
00:17:55,909 --> 00:17:54,559
example molten aluminum in a very fiery

506
00:17:57,430 --> 00:17:55,919
environment

507
00:18:00,070 --> 00:17:57,440
but you know running down the channel

508
00:18:02,230 --> 00:18:00,080
rails uh these channel rails were they

509
00:18:03,990 --> 00:18:02,240
made of why don't they melt when molten

510
00:18:06,630 --> 00:18:04,000
steel perhaps the hottest thing around

511
00:18:07,909 --> 00:18:06,640
is uh is running down them anyway that's

512
00:18:09,430 --> 00:18:07,919
kind of

513
00:18:12,150 --> 00:18:09,440

a little point but like you know again

514

00:18:14,630 --> 00:18:12,160

they're saying it's real effing simple

515

00:18:17,190 --> 00:18:14,640

fire can't melt steel so you know if

516

00:18:18,230 --> 00:18:17,200

these things are true then why do we why

517

00:18:19,590 --> 00:18:18,240

do we need all these architects and

518

00:18:21,270 --> 00:18:19,600

engineers to tell us this why do we even

519

00:18:23,350 --> 00:18:21,280

have an organization called architects

520

00:18:25,270 --> 00:18:23,360

and engineers for 911 truth if it's real

521

00:18:27,190 --> 00:18:25,280

i think simple we just need to put out a

522

00:18:29,110 --> 00:18:27,200

few little memes like this and you know

523

00:18:31,270 --> 00:18:29,120

the whole the whole jig is up everyone

524

00:18:33,270 --> 00:18:31,280

will say oh yeah all that steel all

525

00:18:35,270 --> 00:18:33,280

those tons of steel that they found on

526

00:18:37,350 --> 00:18:35,280

the world trade center site because they

527

00:18:43,430 --> 00:18:37,360

didn't they didn't find tons of steel on

528

00:18:47,669 --> 00:18:45,430

this is just getting a bit ridiculous

529

00:18:49,510 --> 00:18:47,679

sideshow bob come on people when it

530

00:18:51,350 --> 00:18:49,520

looks like my hair you know it's a

531

00:18:53,270 --> 00:18:51,360

controlled demolition of course because

532

00:18:55,190 --> 00:18:53,280

all controlled demolitions look like

533

00:18:57,190 --> 00:18:55,200

sideshow bob's hair

534

00:18:59,110 --> 00:18:57,200

no this is actually a pretty unique

535

00:19:00,470 --> 00:18:59,120

situation this is something that you

536

00:19:03,430 --> 00:19:00,480

don't actually see in controlled

537

00:19:05,350 --> 00:19:03,440

demolitions you don't demolish buildings

538

00:19:07,029 --> 00:19:05,360

from the top down

539

00:19:09,350 --> 00:19:07,039

you don't um

540

00:19:11,590 --> 00:19:09,360

you don't demolish them by

541

00:19:13,750 --> 00:19:11,600

seemingly blowing up the floors inside

542

00:19:15,510 --> 00:19:13,760

and having the the walls flop out from

543

00:19:17,669 --> 00:19:15,520

the top down no you you plant some

544

00:19:18,789 --> 00:19:17,679

explosives at the bottom of the building

545

00:19:21,029 --> 00:19:18,799

and you have the building and they're

546

00:19:22,470 --> 00:19:21,039

gonna come come down

547

00:19:24,789 --> 00:19:22,480

it doesn't

548

00:19:28,230 --> 00:19:24,799

look like a controlled demolition

549

00:19:30,549 --> 00:19:28,240

and resembling sideshow bob's hair

550

00:19:32,950 --> 00:19:30,559

is making light of this situation it's

551
00:19:38,630 --> 00:19:32,960
just kind of yeah ridiculous and a bit a

552
00:19:43,590 --> 00:19:42,070
okay so yes and this is when a 12 000

553
00:19:45,110 --> 00:19:43,600
page report which is all of the nist

554
00:19:47,350 --> 00:19:45,120
reports combined i think the actual

555
00:19:49,270 --> 00:19:47,360
report itself was about 900 pages still

556
00:19:51,510 --> 00:19:49,280
quite a lot very complicated very

557
00:19:53,590 --> 00:19:51,520
complicated thing

558
00:19:55,590 --> 00:19:53,600
and he has half a page on the events

559
00:19:57,669 --> 00:19:55,600
following the collapse initiation i.e

560
00:20:00,230 --> 00:19:57,679
the actual collapse you know it's a

561
00:20:02,630 --> 00:20:00,240
fraud but why you know the

562
00:20:03,909 --> 00:20:02,640
they did everything up to determining

563
00:20:06,390 --> 00:20:03,919

that

564

00:20:08,870 --> 00:20:06,400

collapse could not be arrested and they

565

00:20:10,470 --> 00:20:08,880

did the math like quite simply like it's

566

00:20:11,830 --> 00:20:10,480

uh

567

00:20:13,909 --> 00:20:11,840

a floor

568

00:20:16,950 --> 00:20:13,919

is the span between like one column with

569

00:20:19,590 --> 00:20:16,960

another column and they they a floor is

570

00:20:20,390 --> 00:20:19,600

only designed to support its own weight

571

00:20:21,830 --> 00:20:20,400

and

572

00:20:23,909 --> 00:20:21,840

the weight of people walking around on

573

00:20:25,590 --> 00:20:23,919

it and then the safety margin and your

574

00:20:26,870 --> 00:20:25,600

furniture and whatnot

575

00:20:28,149 --> 00:20:26,880

floors don't support the columns the

576

00:20:29,990 --> 00:20:28,159

columns just go all the way up through

577

00:20:32,710 --> 00:20:30,000

the building that support themselves the

578

00:20:35,909 --> 00:20:32,720

floors are just attached to the columns

579

00:20:37,669 --> 00:20:35,919

so when something is stripping away once

580

00:20:39,430 --> 00:20:37,679

something is falling through the floors

581

00:20:41,590 --> 00:20:39,440

through this area here not through the

582

00:20:44,710 --> 00:20:41,600

columns through this area here it just

583

00:20:48,149 --> 00:20:46,710

and then the walls on the outside

584

00:20:49,909 --> 00:20:48,159

they're not supported then there's all

585

00:20:51,909 --> 00:20:49,919

this stuff going on and they get knocked

586

00:20:54,710 --> 00:20:51,919

over the

587

00:20:56,149 --> 00:20:54,720

inside that gets uh that eventually

588

00:20:58,149 --> 00:20:56,159

loses all its support things get

589

00:20:59,350 --> 00:20:58,159

stripped away enough that it it falls

590

00:21:01,750 --> 00:20:59,360

over

591

00:21:03,669 --> 00:21:01,760

once that process has started

592

00:21:05,669 --> 00:21:03,679

it can't be stopped

593

00:21:07,190 --> 00:21:05,679

the flaws could only support nest

594

00:21:09,669 --> 00:21:07,200

calculated and i don't think there's any

595

00:21:11,510 --> 00:21:09,679

real dispute about this 12 times their

596

00:21:13,190 --> 00:21:11,520

own weight which is quite a lot really

597

00:21:15,190 --> 00:21:13,200

if you think a good or could have 12

598

00:21:17,110 --> 00:21:15,200

good or stacked upon it that's a that's

599

00:21:19,669 --> 00:21:17,120

a good static load

600

00:21:21,750 --> 00:21:19,679

but uh what we had wasn't just 12 good

601
00:21:23,430 --> 00:21:21,760
as gently stacked upon it it's like 12

602
00:21:25,430 --> 00:21:23,440
girders dropped upon it from a great

603
00:21:27,830 --> 00:21:25,440
height you know at first like 12 feet or

604
00:21:29,430 --> 00:21:27,840
so but after that hundreds of feet so

605
00:21:31,029 --> 00:21:29,440
eventually the collapse wave is going

606
00:21:31,990 --> 00:21:31,039
like 100 miles an hour so you've got

607
00:21:33,669 --> 00:21:32,000
these

608
00:21:35,270 --> 00:21:33,679
hundreds or thousands of tons of steel

609
00:21:37,750 --> 00:21:35,280
coming down at 100 miles an hour to

610
00:21:40,310 --> 00:21:37,760
something that's only going to support

611
00:21:41,510 --> 00:21:40,320
12 times its own weight gently placed

612
00:21:43,990 --> 00:21:41,520
upon it

613
00:21:46,230 --> 00:21:44,000

it's just gonna go it will fail in a

614

00:21:48,710 --> 00:21:46,240

fraction of a second

615

00:21:51,669 --> 00:21:48,720

so they knew this

616

00:21:54,789 --> 00:21:51,679

this was reasonably obvious to nist and

617

00:21:58,630 --> 00:21:56,230

didn't need

618

00:22:00,230 --> 00:21:58,640

to say exactly which floor what floors

619

00:22:02,630 --> 00:22:00,240

fell when why would they what's the

620

00:22:04,149 --> 00:22:02,640

point what is the point of saying

621

00:22:05,510 --> 00:22:04,159

exactly

622

00:22:06,789 --> 00:22:05,520

you wouldn't know because it's so

623

00:22:08,310 --> 00:22:06,799

chaotic there's there's no way of

624

00:22:09,669 --> 00:22:08,320

knowing exactly what's going on it's

625

00:22:11,430 --> 00:22:09,679

just obvious

626

00:22:13,029 --> 00:22:11,440

that the building has collapsed to a

627

00:22:15,190 --> 00:22:13,039

certain extent that there's no stopping

628

00:22:16,710 --> 00:22:15,200

it's going down the top part of the

629

00:22:18,789 --> 00:22:16,720

building is going down and gathering

630

00:22:19,990 --> 00:22:18,799

mass as it hits everything everything

631

00:22:21,909 --> 00:22:20,000

else and it's not just hitting it's not

632

00:22:26,950 --> 00:22:21,919

like

633

00:22:28,390 --> 00:22:26,960

wave a big wave of debris coming down

634

00:22:30,390 --> 00:22:28,400

and kind of getting compacted and

635

00:22:31,510 --> 00:22:30,400

spreading out and doing all kinds of

636

00:22:33,029 --> 00:22:31,520

things

637

00:22:35,350 --> 00:22:33,039

it's not actually that simple it's

638

00:22:36,950 --> 00:22:35,360

actually quite complicated

639

00:22:38,310 --> 00:22:36,960

but yeah they could have simulated it

640

00:22:40,789 --> 00:22:38,320

they could have done a simulation that

641

00:22:42,870 --> 00:22:40,799

would have demonstrated

642

00:22:44,310 --> 00:22:42,880

the building falling and collapsing but

643

00:22:45,830 --> 00:22:44,320

there was no point because it wouldn't

644

00:22:47,830 --> 00:22:45,840

have accurately

645

00:22:49,510 --> 00:22:47,840

shown exactly what happened because you

646

00:22:50,870 --> 00:22:49,520

know chaos theory

647

00:22:53,190 --> 00:22:50,880

one thing hits another thing it hits

648

00:22:54,549 --> 00:22:53,200

something else you know and a couple of

649

00:22:55,909 --> 00:22:54,559

seconds like everything is completely

650

00:22:57,669 --> 00:22:55,919

out of whack and you don't even know

651

00:22:59,190 --> 00:22:57,679

what the starting conditions are exactly

652

00:23:01,110 --> 00:22:59,200

anyway because you don't know exactly

653

00:23:03,029 --> 00:23:01,120

which car columns were were taken out or

654

00:23:04,710 --> 00:23:03,039

which columns failed first so

655

00:23:07,270 --> 00:23:04,720

it was it would be a pointless exercise

656

00:23:09,669 --> 00:23:07,280

to simulate beyond the initiation of

657

00:23:12,149 --> 00:23:09,679

collapse and it's inevitable progression

658

00:23:13,830 --> 00:23:12,159

it's inevitable so

659

00:23:15,830 --> 00:23:13,840

there's no point

660

00:23:17,669 --> 00:23:15,840

analyzing the events following collapse

661

00:23:19,270 --> 00:23:17,679

initiation because the events following

662

00:23:20,390 --> 00:23:19,280

collaboration initiation are obviously

663

00:23:22,710 --> 00:23:20,400

going to be the building fallen to the

664

00:23:24,310 --> 00:23:22,720

ground architects and engineers

665

00:23:26,230 --> 00:23:24,320

can't figure out why the building fell

666

00:23:28,149 --> 00:23:26,240

to the ground but i think that's more

667

00:23:33,110 --> 00:23:28,159

a reflection on them than uh than

668

00:23:36,950 --> 00:23:35,190

fire can't melt steel except for these

669

00:23:38,630 --> 00:23:36,960

magic fires in the world trade center

670

00:23:40,870 --> 00:23:38,640

this is not showing

671

00:23:43,750 --> 00:23:40,880

melted steel this is showing essentially

672

00:23:45,510 --> 00:23:43,760

burnt steel which means a chemical

673

00:23:48,390 --> 00:23:45,520

reaction of some sort

674

00:23:51,269 --> 00:23:48,400

uh has occurred it's not melted melted

675

00:23:52,950 --> 00:23:51,279

steel looks like little blobs of steel

676
00:23:54,710 --> 00:23:52,960
this is something that has been

677
00:23:57,110 --> 00:23:54,720
happening in the fire

678
00:23:59,590 --> 00:23:57,120
after the the collapse probably

679
00:24:01,590 --> 00:23:59,600
and uh i think there's a university of

680
00:24:04,630 --> 00:24:01,600
warwick i think lucky

681
00:24:06,549 --> 00:24:04,640
did i study on this and they said it uh

682
00:24:07,350 --> 00:24:06,559
the they studied the crystalline changes

683
00:24:08,710 --> 00:24:07,360
of the

684
00:24:09,750 --> 00:24:08,720
the steel and they said it would

685
00:24:11,269 --> 00:24:09,760
actually

686
00:24:13,510 --> 00:24:11,279
have taken several days to happen but

687
00:24:15,190 --> 00:24:13,520
it's very complicated stuff this thing

688
00:24:16,710 --> 00:24:15,200

it's not this simple fire can't melt

689

00:24:19,269 --> 00:24:16,720

steel here's some melted steel this

690

00:24:20,950 --> 00:24:19,279

isn't melted steel this is steel that

691

00:24:24,310 --> 00:24:20,960

has undergone a complex chemical

692

00:24:26,310 --> 00:24:24,320

reaction over several days in the

693

00:24:28,710 --> 00:24:26,320

debris pile which was burning and had

694

00:24:33,430 --> 00:24:28,720

all kinds of stuff in it

695

00:24:37,909 --> 00:24:35,750

okay this is just basically repeating

696

00:24:39,669 --> 00:24:37,919

the same point again that they're saying

697

00:24:42,070 --> 00:24:39,679

it's scientific fraud that john grove

698

00:24:43,510 --> 00:24:42,080

says that uh

699

00:24:44,870 --> 00:24:43,520

once the collapse initiated the video

700

00:24:46,390 --> 00:24:44,880

evidence is rather clear it was not

701
00:24:47,830 --> 00:24:46,400
stopped by the flaws below so there's no

702
00:24:49,830 --> 00:24:47,840
calculation that we did to demonstrate

703
00:24:51,190 --> 00:24:49,840
what is clear in the videos

704
00:24:53,269 --> 00:24:51,200
now yeah

705
00:24:55,990 --> 00:24:53,279
uh they're saying like you know we can

706
00:24:58,149 --> 00:24:56,000
see that it just collapsed

707
00:24:59,830 --> 00:24:58,159
they that's on top of

708
00:25:01,830 --> 00:24:59,840
the knowledge that collapse was

709
00:25:06,230 --> 00:25:01,840
inevitable

710
00:25:07,990 --> 00:25:06,240
they knew what it looked like because

711
00:25:09,669 --> 00:25:08,000
they have the video

712
00:25:11,029 --> 00:25:09,679
the video of it collapsing isn't the

713
00:25:12,549 --> 00:25:11,039

demonstration that collapse was

714

00:25:14,549 --> 00:25:12,559

inevitable it's just the actual

715

00:25:17,029 --> 00:25:14,559

manifestation of that collapse

716

00:25:19,430 --> 00:25:17,039

and doing some kind of simulation

717

00:25:20,710 --> 00:25:19,440

to show that collapse would be kind of a

718

00:25:22,710 --> 00:25:20,720

waste of time

719

00:25:24,470 --> 00:25:22,720

because it wouldn't show you exactly

720

00:25:26,710 --> 00:25:24,480

what happened it would show something it

721

00:25:29,029 --> 00:25:26,720

would show like a collapsing building

722

00:25:31,029 --> 00:25:29,039

but uh you know chaos you wouldn't be

723

00:25:32,870 --> 00:25:31,039

able to figure it out exactly so there's

724

00:25:35,510 --> 00:25:32,880

nothing wrong with what john gross has

725

00:25:39,190 --> 00:25:35,520

said there uh

726

00:25:44,310 --> 00:25:41,269

this is just simply an attack on dr

727

00:25:46,789 --> 00:25:44,320

shayam sunder who uh was just saying

728

00:25:48,950 --> 00:25:46,799

like the entire team worked really hard

729

00:25:51,990 --> 00:25:48,960

and how does he sleep at night well i'm

730

00:25:54,310 --> 00:25:52,000

sure he sleeps just fine

731

00:25:56,549 --> 00:25:54,320

these are not explosions and two plus

732

00:25:57,990 --> 00:25:56,559

two equals five two plus two equals five

733

00:26:00,950 --> 00:25:58,000

is a reference to

734

00:26:02,230 --> 00:26:00,960

two things it's a reference to uh 1984

735

00:26:03,669 --> 00:26:02,240

when

736

00:26:05,350 --> 00:26:03,679

you're supposed to believe the

737

00:26:07,110 --> 00:26:05,360

authorities when they tell you anything

738

00:26:08,789 --> 00:26:07,120

even if it's that two plus two equals

739

00:26:10,470 --> 00:26:08,799

five so that's the direct reference but

740

00:26:13,029 --> 00:26:10,480

i think they're also playing off

741

00:26:15,350 --> 00:26:13,039

uh kind of recent uh

742

00:26:17,830 --> 00:26:15,360

stuff going on in social media about

743

00:26:20,470 --> 00:26:17,840

black lives matter saying that

744

00:26:23,269 --> 00:26:20,480

uh math is a bit

745

00:26:26,070 --> 00:26:23,279

no uh racist in that he doesn't fully

746

00:26:26,789 --> 00:26:26,080

acknowledge the contributions of

747

00:26:30,710 --> 00:26:26,799

of

748

00:26:32,470 --> 00:26:30,720

then they devolved into this whole thing

749

00:26:34,710 --> 00:26:32,480

about uh

750

00:26:36,149 --> 00:26:34,720

people thinking that black lives matter

751

00:26:38,310 --> 00:26:36,159

literally thought that two plus two

752

00:26:39,830 --> 00:26:38,320

equals five because 2 plus 2 equals 4 is

753

00:26:40,789 --> 00:26:39,840

traditional maths and that's some kind

754

00:26:43,430 --> 00:26:40,799

of

755

00:26:45,350 --> 00:26:43,440

imperialistic math or something anyway

756

00:26:47,110 --> 00:26:45,360

they're just playing off this 2 plus 2

757

00:26:48,870 --> 00:26:47,120

equals 5. but what do we see here these

758

00:26:51,830 --> 00:26:48,880

are not explosions these are expulsions

759

00:26:53,669 --> 00:26:51,840

of air because inside the building there

760

00:26:56,500 --> 00:26:53,679

is a lot of stuff falling and it is

761

00:26:57,750 --> 00:26:56,510

crushing floors and it is um

762

00:26:59,669 --> 00:26:57,760

[Music]

763

00:27:01,909 --> 00:26:59,679

compressing the air

764

00:27:03,590 --> 00:27:01,919

this building is 200 feet by 200 feet

765

00:27:05,750 --> 00:27:03,600

which is you know a heck of a lot of

766

00:27:07,190 --> 00:27:05,760

square feet ahead of a lot of cubic feet

767

00:27:08,230 --> 00:27:07,200

all of a sudden crushed down to not a

768

00:27:10,230 --> 00:27:08,240

lot

769

00:27:12,630 --> 00:27:10,240

vastly high pressures

770

00:27:14,950 --> 00:27:12,640

pushes things out out of windows

771

00:27:17,029 --> 00:27:14,960

probably windows that were uh broken or

772

00:27:18,549 --> 00:27:17,039

weakened during the impact so why those

773

00:27:20,549 --> 00:27:18,559

particular windows

774

00:27:23,269 --> 00:27:20,559

probably a combination of things like

775

00:27:25,269 --> 00:27:23,279

the opposite elevator shaft doors and

776

00:27:27,510 --> 00:27:25,279

you know so that the pressure goes down

777

00:27:30,470 --> 00:27:27,520

the elevator shaft blows a door out

778

00:27:33,430 --> 00:27:30,480

sticks out the window or just simply a

779

00:27:35,990 --> 00:27:33,440

smoke comes out of a window was broken

780

00:27:37,190 --> 00:27:36,000

by something else

781

00:27:38,710 --> 00:27:37,200

it's

782

00:27:40,870 --> 00:27:38,720

both complicated and not that

783

00:27:42,950 --> 00:27:40,880

complicated i think if you become

784

00:27:44,549 --> 00:27:42,960

convinced that these actually are

785

00:27:45,750 --> 00:27:44,559

explosions

786

00:27:47,669 --> 00:27:45,760

then

787

00:27:49,269 --> 00:27:47,679

beyond just simply your argument from

788

00:27:51,190 --> 00:27:49,279

incredulity shouldn't you do a little

789

00:27:53,269 --> 00:27:51,200

bit of math as well to demonstrate they

790

00:27:54,389 --> 00:27:53,279

are i think if you actually look at the

791

00:27:57,590 --> 00:27:54,399

velocity

792

00:27:59,350 --> 00:27:57,600

of them it's not an explosion it's it's

793

00:28:02,230 --> 00:27:59,360

compressed air

794

00:28:03,830 --> 00:28:02,240

it's uh it's it's pressure on inside of

795

00:28:05,669 --> 00:28:03,840

the building blowing stuff out that's

796

00:28:07,190 --> 00:28:05,679

not what really what explosions do

797

00:28:09,269 --> 00:28:07,200

explosions are like

798

00:28:10,710 --> 00:28:09,279

it's just like you know instant thing

799

00:28:13,190 --> 00:28:10,720

but this is something that kind of

800

00:28:14,549 --> 00:28:13,200

simulates the compression of air inside

801
00:28:15,830 --> 00:28:14,559
the building which is also what you

802
00:28:18,470 --> 00:28:15,840
would get from the inside of the

803
00:28:19,909 --> 00:28:18,480
building falling down

804
00:28:21,350 --> 00:28:19,919
i was spending longer on this than i

805
00:28:22,710 --> 00:28:21,360
thought i would

806
00:28:25,430 --> 00:28:22,720
ah so this is just the quote that they

807
00:28:26,630 --> 00:28:25,440
had earlier same shame sunder says uh i

808
00:28:28,310 --> 00:28:26,640
don't really know we've had trouble

809
00:28:29,669 --> 00:28:28,320
getting a handle on building seven i

810
00:28:30,789 --> 00:28:29,679
think that comes from earlier because

811
00:28:32,549 --> 00:28:30,799
this picture is actually from the

812
00:28:34,630 --> 00:28:32,559
presentation when it was explaining what

813
00:28:36,470 --> 00:28:34,640

they thought happened in building seven

814

00:28:37,990 --> 00:28:36,480

and yeah early on in the investigation

815

00:28:39,990 --> 00:28:38,000

they did have a trouble getting a handle

816

00:28:41,430 --> 00:28:40,000

on building seven because they didn't

817

00:28:43,669 --> 00:28:41,440

understand why it would have collapsed

818

00:28:45,830 --> 00:28:43,679

because the fires didn't burn hot enough

819

00:28:47,269 --> 00:28:45,840

to damage the columns and eventually

820

00:28:48,950 --> 00:28:47,279

they figured out that the fires burned

821

00:28:51,350 --> 00:28:48,960

hot enough

822

00:28:53,110 --> 00:28:51,360

so the thermal expansion of beams would

823

00:28:54,710 --> 00:28:53,120

damage a lot of connections and

824

00:28:56,310 --> 00:28:54,720

eventually this accumulated damage would

825

00:28:57,510 --> 00:28:56,320

cause some flaws to collapse and it

826

00:28:59,029 --> 00:28:57,520

would strip the floors away from the

827

00:29:00,710 --> 00:28:59,039

columns and at that point the column

828

00:29:02,470 --> 00:29:00,720

would be weak enough to fail and then it

829

00:29:04,149 --> 00:29:02,480

failed below the penthouse

830

00:29:05,669 --> 00:29:04,159

failed on the inside of the building and

831

00:29:07,830 --> 00:29:05,679

then

832

00:29:09,510 --> 00:29:07,840

outside the building is unsupported

833

00:29:12,070 --> 00:29:09,520

outside the building falls down there

834

00:29:13,750 --> 00:29:12,080

was an explanation but uh initially yes

835

00:29:16,950 --> 00:29:13,760

they had they had trouble getting a

836

00:29:21,669 --> 00:29:19,990

worries peace uh again this is a

837

00:29:24,149 --> 00:29:21,679

1984 reference

838

00:29:26,070 --> 00:29:24,159

and uh people are being told that war is

839

00:29:28,470 --> 00:29:26,080

peace they can tell these contradictory

840

00:29:29,750 --> 00:29:28,480

things and so because of that this is a

841

00:29:32,389 --> 00:29:29,760

natural building collapse and again

842

00:29:35,510 --> 00:29:32,399

we've got these little puffs of ejected

843

00:29:36,950 --> 00:29:35,520

debris down here which is because of um

844

00:29:38,870 --> 00:29:36,960

compressed air probably this one

845

00:29:40,710 --> 00:29:38,880

specifically is from something that's

846

00:29:43,110 --> 00:29:40,720

opposite an elevator shaft

847

00:29:45,350 --> 00:29:43,120

and that's uh blown the doors off and

848

00:29:46,549 --> 00:29:45,360

blown it out but who knows who knows

849

00:29:48,470 --> 00:29:46,559

what's actually going on inside that

850

00:29:49,990 --> 00:29:48,480

building but we do know

851
00:29:52,870 --> 00:29:50,000
that uh

852
00:29:54,870 --> 00:29:52,880
the inside of the building is definitely

853
00:29:59,669 --> 00:29:54,880
bailing before the outside of the

854
00:30:05,350 --> 00:30:01,830
it's not complicated

855
00:30:07,909 --> 00:30:05,360
complicated

856
00:30:10,549 --> 00:30:07,919
why did you pay leroy hulsey at the

857
00:30:14,470 --> 00:30:10,559
university of alaska fairbanks

858
00:30:15,669 --> 00:30:14,480
i think 340 thousand dollars

859
00:30:17,110 --> 00:30:15,679
to

860
00:30:19,750 --> 00:30:17,120
have his

861
00:30:22,950 --> 00:30:19,760
graduate students build a

862
00:30:24,870 --> 00:30:22,960
complicated model flawed but complicated

863
00:30:27,269 --> 00:30:24,880

model of the world trade center seven to

864

00:30:28,950 --> 00:30:27,279

investigate what happened

865

00:30:31,990 --> 00:30:28,960

and why are you now thinking about doing

866

00:30:34,950 --> 00:30:32,000

the same thing with the the twin towers

867

00:30:36,470 --> 00:30:34,960

if it's not complicated why do you need

868

00:30:38,230 --> 00:30:36,480

why do you need all these opinions of

869

00:30:39,750 --> 00:30:38,240

these these architects and these

870

00:30:41,430 --> 00:30:39,760

engineers

871

00:30:43,909 --> 00:30:41,440

why do you even need

872

00:30:46,149 --> 00:30:43,919

these uh these opinions if it's not

873

00:30:48,230 --> 00:30:46,159

complicated if it is in fact true that

874

00:30:50,710 --> 00:30:48,240

building collapses don't shatter entire

875

00:30:52,230 --> 00:30:50,720

steel structures and pulverize concrete

876

00:30:53,350 --> 00:30:52,240

floors to dust and that's what actually

877

00:30:55,190 --> 00:30:53,360

happened

878

00:30:56,789 --> 00:30:55,200

then you don't actually need all the

879

00:30:59,110 --> 00:30:56,799

scientists you can just point out these

880

00:31:00,789 --> 00:30:59,120

simple things that you're trying to do

881

00:31:04,630 --> 00:31:00,799

now you can point out these simple

882

00:31:06,549 --> 00:31:04,640

things and everyone will believe you

883

00:31:08,789 --> 00:31:06,559

why don't the vast majority of the

884

00:31:10,870 --> 00:31:08,799

world's engineers believe you yeah there

885

00:31:11,990 --> 00:31:10,880

are literally millions

886

00:31:13,990 --> 00:31:12,000

of

887

00:31:15,590 --> 00:31:14,000

engineers who are as qualified as the

888

00:31:17,590 --> 00:31:15,600

majority of the people and architects

889

00:31:19,750 --> 00:31:17,600

for engineers and 9 11 truth a lot of

890

00:31:21,350 --> 00:31:19,760

them are retired a lot of them are old

891

00:31:22,310 --> 00:31:21,360

some of them are single

892

00:31:23,509 --> 00:31:22,320

some of them don't actually have

893

00:31:24,870 --> 00:31:23,519

children some of them cannot be

894

00:31:27,269 --> 00:31:24,880

threatened some of them might be dying

895

00:31:33,350 --> 00:31:28,389

some of them

896

00:31:35,269 --> 00:31:33,360

ideologically uh opposed to totalitarian

897

00:31:36,710 --> 00:31:35,279

government and they're going in and

898

00:31:38,710 --> 00:31:36,720

they're doing

899

00:31:40,549 --> 00:31:38,720

structural engineering there's

900

00:31:42,789 --> 00:31:40,559

millions of people

901
00:31:44,549 --> 00:31:42,799
who would be able to

902
00:31:46,389 --> 00:31:44,559
actually give complicated answers to

903
00:31:48,789 --> 00:31:46,399
these questions not just these these

904
00:31:50,389 --> 00:31:48,799
simple it's not complicated things

905
00:31:52,070 --> 00:31:50,399
there actually are millions of people

906
00:31:54,070 --> 00:31:52,080
who are qualified to comment on it and

907
00:31:56,549 --> 00:31:54,080
yet we only have this three thousand

908
00:31:58,710 --> 00:31:56,559
people in architects and engineers from

909
00:32:00,230 --> 00:31:58,720
9 11 true to really if you read their

910
00:32:02,789 --> 00:32:00,240
position statements don't have a very

911
00:32:04,710 --> 00:32:02,799
good understanding of what's going on

912
00:32:06,230 --> 00:32:04,720
but anyway this particular thing

913
00:32:08,310 --> 00:32:06,240

building collapses don't shatter

914

00:32:10,070 --> 00:32:08,320

instasteel structures

915

00:32:11,990 --> 00:32:10,080

and pulverize concrete floors to dust

916

00:32:13,830 --> 00:32:12,000

again they got this weird idea that all

917

00:32:15,430 --> 00:32:13,840

the concrete turned to dust which makes

918

00:32:17,909 --> 00:32:15,440

no sense whatsoever you can actually see

919

00:32:19,830 --> 00:32:17,919

loads of lumps of concrete on the uh the

920

00:32:21,590 --> 00:32:19,840

world trade center site

921

00:32:24,470 --> 00:32:21,600

but um and

922

00:32:26,070 --> 00:32:24,480

it didn't shatter the steel structures

923

00:32:27,269 --> 00:32:26,080

it came apart exactly as you would

924

00:32:29,190 --> 00:32:27,279

expect

925

00:32:30,710 --> 00:32:29,200

and it didn't

926

00:32:32,149 --> 00:32:30,720

come apart

927

00:32:33,590 --> 00:32:32,159

like as as you would expect with

928

00:32:35,029 --> 00:32:33,600

thermite burning the ends of all the

929

00:32:36,789 --> 00:32:35,039

columns they just

930

00:32:38,549 --> 00:32:36,799

you know the

931

00:32:39,830 --> 00:32:38,559

the main columns just snapped at the

932

00:32:42,230 --> 00:32:39,840

seams essentially because they were

933

00:32:44,310 --> 00:32:42,240

unsupported by the floors which had been

934

00:32:46,310 --> 00:32:44,320

stripped away by the falling debris the

935

00:32:48,710 --> 00:32:46,320

the outer sections kind of fell in you

936

00:32:50,230 --> 00:32:48,720

know often in quite large sections like

937

00:32:51,590 --> 00:32:50,240

as you would expect it which could come

938

00:32:53,269 --> 00:32:51,600

apart to the joints they weren't

939

00:32:55,110 --> 00:32:53,279

generally ripped apart unless a plane

940

00:32:58,149 --> 00:32:55,120

happened to fly into them

941

00:33:00,389 --> 00:32:58,159

and it basically all came to pieces

942

00:33:03,509 --> 00:33:00,399

exactly as you would expect if you

943

00:33:04,950 --> 00:33:03,519

actually understood what's going on

944

00:33:07,350 --> 00:33:04,960

which

945

00:33:09,029 --> 00:33:07,360

apparently they don't

946

00:33:11,509 --> 00:33:09,039

oh there's another quote here you have

947

00:33:14,230 --> 00:33:11,519

uh this is one of the firefighters again

948

00:33:17,029 --> 00:33:14,240

you have uh 210

949

00:33:18,149 --> 00:33:17,039

story office building oh 210 sorry

950

00:33:19,110 --> 00:33:18,159

office buildings that's two different

951
00:33:20,230 --> 00:33:19,120
buildings

952
00:33:21,350 --> 00:33:20,240
you don't find a desk you don't find a

953
00:33:22,389 --> 00:33:21,360
chair you don't find a telephone a

954
00:33:23,830 --> 00:33:22,399
computer the biggest piece of a

955
00:33:25,909 --> 00:33:23,840
telephone i find was half a keyboard the

956
00:33:27,269 --> 00:33:25,919
building collapsed to dust well you know

957
00:33:28,870 --> 00:33:27,279
it didn't collapse the dust there was

958
00:33:33,830 --> 00:33:28,880
lots of actual concrete and there was

959
00:33:36,389 --> 00:33:34,950
were

960
00:33:38,149 --> 00:33:36,399
they'd actually remain if you go to the

961
00:33:39,350 --> 00:33:38,159
911 memorial museum there's lots of

962
00:33:41,990 --> 00:33:39,360
things that were actually inside the

963
00:33:44,070 --> 00:33:42,000

building that made it out but of course

964

00:33:46,710 --> 00:33:44,080

if you've got

965

00:33:48,789 --> 00:33:46,720

thousands of tons of steel falling very

966

00:33:50,149 --> 00:33:48,799

very rapidly and then impacting the

967

00:33:52,710 --> 00:33:50,159

ground in a big

968

00:33:53,909 --> 00:33:52,720

big pile of steel girders

969

00:33:55,430 --> 00:33:53,919

essentially you've kind of got the

970

00:33:58,310 --> 00:33:55,440

world's largest

971

00:33:59,990 --> 00:33:58,320

like grinder or shredder and anything

972

00:34:02,389 --> 00:34:00,000

that's caught up in that

973

00:34:03,669 --> 00:34:02,399

is going to be be destroyed you've got

974

00:34:04,549 --> 00:34:03,679

you know if you think of the impact of

975

00:34:08,790 --> 00:34:04,559

one

976
00:34:11,109 --> 00:34:08,800
now think about that falling from a

977
00:34:12,710 --> 00:34:11,119
hundred feet now think about that times

978
00:34:15,669 --> 00:34:12,720
a thousand with all kinds of different

979
00:34:17,909 --> 00:34:15,679
things going on yeah it's obvious like

980
00:34:20,389 --> 00:34:17,919
anything that's inside the building

981
00:34:22,869 --> 00:34:20,399
isn't going to escape unscathed unless

982
00:34:25,349 --> 00:34:22,879
it falls away to the side

983
00:34:30,470 --> 00:34:27,990
yeah it's amazing it was incredible it

984
00:34:31,990 --> 00:34:30,480
was unprecedented this building this

985
00:34:34,869 --> 00:34:32,000
very with the one of the world's tallest

986
00:34:38,069 --> 00:34:34,879
buildings collapsing

987
00:34:41,109 --> 00:34:38,079
and destroying most of his contents

988
00:34:43,270 --> 00:34:41,119

because it was basically a steel grinder

989

00:34:49,430 --> 00:34:43,280

horrible horrible thing

990

00:34:54,389 --> 00:34:51,349

yes i kind of a silly where's waldo

991

00:34:56,069 --> 00:34:54,399

thing where's the top of the building um

992

00:34:57,270 --> 00:34:56,079

and you know they're just they're saying

993

00:34:58,710 --> 00:34:57,280

that the top of the building is turned

994

00:35:06,310 --> 00:34:58,720

to dust

995

00:35:07,270 --> 00:35:06,320

you still got tens of thousands of uh

996

00:35:09,910 --> 00:35:07,280

tons

997

00:35:12,710 --> 00:35:09,920

of steel like falling down

998

00:35:14,069 --> 00:35:12,720

on the floors below

999

00:35:17,190 --> 00:35:14,079

that steel is still there it's still

1000

00:35:21,270 --> 00:35:19,430

and yeah it fell to pieces but you know

1001
00:35:23,349 --> 00:35:21,280
drop a bag of rocks on your house it's

1002
00:35:25,430 --> 00:35:23,359
going to destroy your house yeah one

1003
00:35:26,870 --> 00:35:25,440
boulder on your house will destroy it

1004
00:35:31,190 --> 00:35:26,880
turn the boulder into gravel drop that

1005
00:35:32,390 --> 00:35:31,200
on your house it will destroy it

1006
00:35:32,970 --> 00:35:32,400
all right well it's like that's the last

1007
00:35:34,230 --> 00:35:32,980
one so

1008
00:35:35,910 --> 00:35:34,240
[Music]

1009
00:35:37,910 --> 00:35:35,920
i think yeah maybe if we should go back

1010
00:35:39,589 --> 00:35:37,920
to

1011
00:35:41,589 --> 00:35:39,599
it's not complicated it's not

1012
00:35:43,510 --> 00:35:41,599
complicated maybe it is complicated i

1013
00:35:46,069 --> 00:35:43,520

think it is complicated i kind of feel

1014

00:35:48,470 --> 00:35:46,079

like it is actually quite complicated

1015

00:35:51,270 --> 00:35:48,480

and it's not as self-evident as you say

1016

00:35:57,190 --> 00:35:51,280

and if it was self-evident

1017

00:36:02,870 --> 00:35:59,750

and back to the start it's not rocket

1018

00:36:05,589 --> 00:36:02,880

science this is a building exploding

1019

00:36:08,390 --> 00:36:05,599

they say it's self-evident

1020

00:36:10,390 --> 00:36:08,400

that is obviously a building exploding

1021

00:36:12,870 --> 00:36:10,400

so what's the problem

1022

00:36:14,870 --> 00:36:12,880

why have you spent you know 20 years you

1023

00:36:16,630 --> 00:36:14,880

know 15 years or whatever

1024

00:36:18,470 --> 00:36:16,640

arguing this since the formation of

1025

00:36:20,310 --> 00:36:18,480

architects and engineers from 9 11 truth

1026

00:36:21,910 --> 00:36:20,320

and not getting anywhere

1027

00:36:23,589 --> 00:36:21,920

why does all the uh why do all the

1028

00:36:24,829 --> 00:36:23,599

structural engineers in the world think

1029

00:36:29,190 --> 00:36:24,839

you're a laughing

1030

00:36:32,870 --> 00:36:31,270

maybe it's not quite as self-evident as

1031

00:36:35,510 --> 00:36:32,880

you think it is maybe you actually need

1032

00:36:36,710 --> 00:36:35,520

to do these bits of science to explain

1033

00:36:37,829 --> 00:36:36,720

it
