

NOT A MISSILE

1
00:00:03,030 --> 00:00:01,429
a bunch of people have suggested that

2
00:00:03,590 --> 00:00:03,040
the explosion in nashville wasn't

3
00:00:05,590 --> 00:00:03,600
actually an

4
00:00:07,510 --> 00:00:05,600
rv exploding but was a top-secret

5
00:00:10,390 --> 00:00:07,520
military-style missile attack being used

6
00:00:12,230 --> 00:00:10,400
to erase evidence of election fraud

7
00:00:13,589 --> 00:00:12,240
leaving aside the obvious lack of reason

8
00:00:16,550 --> 00:00:13,599
and logic in this theory

9
00:00:17,990 --> 00:00:16,560
what is the evidence to support it i've

10
00:00:19,349 --> 00:00:18,000
seen two things shared a lot

11
00:00:21,189 --> 00:00:19,359
firstly the observation that the

12
00:00:22,470 --> 00:00:21,199
explosion looks like it's on the wrong

13
00:00:24,070 --> 00:00:22,480

side of the street

14

00:00:25,830 --> 00:00:24,080

and secondly the observation of what

15

00:00:28,230 --> 00:00:25,840

looks like the trail of a missile before

16

00:00:30,070 --> 00:00:28,240

the smoke from the explosion rises

17

00:00:31,910 --> 00:00:30,080

the first one is pretty simple the

18

00:00:33,190 --> 00:00:31,920

middle of the explosion is just obscured

19

00:00:34,549 --> 00:00:33,200

by the dust cloud

20

00:00:36,549 --> 00:00:34,559

you can see it in the better quality

21

00:00:38,069 --> 00:00:36,559

video here but you can also see it

22

00:00:43,270 --> 00:00:38,079

happen in other videos like this

23

00:00:47,350 --> 00:00:44,950

the second one relies on a rather low

24

00:00:48,869 --> 00:00:47,360

quality video but we can see one trail

25

00:00:50,310 --> 00:00:48,879

seeming to shoot upwards and then

26

00:00:51,910 --> 00:00:50,320

another one just below it

27

00:00:53,270 --> 00:00:51,920

these fade away maybe because they're

28

00:00:54,310 --> 00:00:53,280

not being lit by the light of the

29

00:00:55,750 --> 00:00:54,320

explosion

30

00:00:57,350 --> 00:00:55,760

they are then followed by the rising

31

00:00:59,029 --> 00:00:57,360

cloud of smoke

32

00:01:01,110 --> 00:00:59,039

this sequence make it look like the

33

00:01:02,069 --> 00:01:01,120

trails come before the explosions and

34

00:01:05,590 --> 00:01:02,079

hence must be

35

00:01:06,950 --> 00:01:05,600

missiles but do they come first

36

00:01:08,789 --> 00:01:06,960

if we look at this building over on the

37

00:01:10,230 --> 00:01:08,799

left we can see it's glowing brighter

38

00:01:11,109 --> 00:01:10,240

and brighter from right at the start of

39

00:01:12,390 --> 00:01:11,119

the video

40

00:01:13,990 --> 00:01:12,400

this kind of indicates that the

41

00:01:15,749 --> 00:01:14,000

explosion actually happened before the

42

00:01:17,350 --> 00:01:15,759

trailers show up about one second in

43

00:01:19,749 --> 00:01:17,360

this video

44

00:01:21,990 --> 00:01:19,759

how much before well notice the glow on

45

00:01:23,670 --> 00:01:22,000

this building brightens and then dims

46

00:01:26,469 --> 00:01:23,680

we can use the peak value of this

47

00:01:28,149 --> 00:01:26,479

brightness as a time reference point

48

00:01:30,149 --> 00:01:28,159

the building is actually the Inc

49

00:01:30,950 --> 00:01:30,159

building on the corner of 4th avenue and

50

00:01:32,789 --> 00:01:30,960

church

51
00:01:34,950 --> 00:01:32,799
and we can see the Inc building in this

52
00:01:36,950 --> 00:01:34,960
video taken from krafko

53
00:01:38,550 --> 00:01:36,960
on hawthorne avenue and we can see it

54
00:01:39,670 --> 00:01:38,560
matches the brightness of the fireball

55
00:01:41,350 --> 00:01:39,680
itself

56
00:01:43,429 --> 00:01:41,360
syncing up the peak brightness in both

57
00:01:45,109 --> 00:01:43,439
videos we can see the explosion actually

58
00:01:46,710 --> 00:01:45,119
started a bit before the start of the

59
00:01:48,310 --> 00:01:46,720
black and white video

60
00:01:50,069 --> 00:01:48,320
putting all that together the initial

61
00:01:51,990 --> 00:01:50,079
blast of the explosion happened nearly

62
00:01:52,550 --> 00:01:52,000
three seconds before the two trails show

63
00:01:54,230 --> 00:01:52,560

up

64

00:01:55,670 --> 00:01:54,240

there's also no missiles or trails

65

00:01:57,350 --> 00:01:55,680

visible in those three seconds in the

66

00:01:59,270 --> 00:01:57,360

craft curve footage

67

00:02:01,190 --> 00:01:59,280

so it seems most likely these are simply

68

00:02:02,389 --> 00:02:01,200

smoke trails from some point during the

69

00:02:03,990 --> 00:02:02,399

explosion

70

00:02:06,830 --> 00:02:04,000

unless some better quality of video

71

00:02:08,469 --> 00:02:06,840

shows up that's what i'm going to go
