

1
00:00:03,429 --> 00:00:02,710
so uh pj thank you very much for for

2
00:00:06,309 --> 00:00:03,439
doing this

3
00:00:08,310 --> 00:00:06,319
uh you know we've kind of tangled on

4
00:00:11,190 --> 00:00:08,320
twitter a few times before now

5
00:00:12,470 --> 00:00:11,200
uh no it's a good thing to tangle though

6
00:00:15,190 --> 00:00:12,480
and it indeed we

7
00:00:15,509 --> 00:00:15,200
it's one of the ways of uh figuring out

8
00:00:18,070 --> 00:00:15,519
where

9
00:00:19,830 --> 00:00:18,080
differences are and then hopefully

10
00:00:22,150 --> 00:00:19,840
trying to resolve those differences

11
00:00:24,310 --> 00:00:22,160
correct so uh what we're talking about

12
00:00:27,349 --> 00:00:24,320
here is obviously the uh the events

13
00:00:27,750 --> 00:00:27,359

around november the 14th 2004 which is

14

00:00:34,150 --> 00:00:27,760

the

15

00:00:36,630 --> 00:00:34,160

and your initial involvement in

16

00:00:37,830 --> 00:00:36,640

in this the nimitz encounters which is

17

00:00:39,750 --> 00:00:37,840

you know the famous

18

00:00:41,990 --> 00:00:39,760

encounter with commander david fraver

19

00:00:43,830 --> 00:00:42,000

seeing a tic-tac-shaped ufo

20

00:00:45,590 --> 00:00:43,840

uh all these different radar contacts

21

00:00:47,029 --> 00:00:45,600

kevin days famously saw these these

22

00:00:48,709 --> 00:00:47,039

radar contacts

23

00:00:50,709 --> 00:00:48,719

and chad underwood producing the famous

24

00:00:52,470 --> 00:00:50,719

video which was later released

25

00:00:54,150 --> 00:00:52,480

uh so everyone can know about those

26

00:00:56,389 --> 00:00:54,160

things and and your

27

00:00:57,350 --> 00:00:56,399

your initial involvement in the in the

28

00:01:00,630 --> 00:00:57,360

events was

29

00:01:02,310 --> 00:01:00,640

i believe like mostly limited to

30

00:01:04,549 --> 00:01:02,320

this strange encounter where you had to

31

00:01:07,109 --> 00:01:04,559

hand over these these data breaks

32

00:01:08,789 --> 00:01:07,119

correct uh the other time yeah but since

33

00:01:11,109 --> 00:01:08,799

then you've kind of become a lot more

34

00:01:12,469 --> 00:01:11,119

involved in the discussion around the

35

00:01:14,630 --> 00:01:12,479

whole uh event

36

00:01:15,910 --> 00:01:14,640

uh probably because of your position as

37

00:01:18,550 --> 00:01:15,920

an eyewitness but also

38

00:01:19,030 --> 00:01:18,560

you're kind of like a technical expert

39

00:01:21,030 --> 00:01:19,040

on

40

00:01:23,109 --> 00:01:21,040

the the navy matters and the the events

41

00:01:25,670 --> 00:01:23,119

of of those days

42

00:01:28,950 --> 00:01:25,680

uh and you've also more recently become

43

00:01:31,190 --> 00:01:28,960

involved with the uap expeditions

44

00:01:32,789 --> 00:01:31,200

which is this uh this company that i

45

00:01:35,109 --> 00:01:32,799

believe kevin day

46

00:01:37,350 --> 00:01:35,119

uh and gary voorhees for the co-founders

47

00:01:39,990 --> 00:01:37,360

and uh you and a bunch of other people

48

00:01:41,190 --> 00:01:40,000

uh related to the event i've been

49

00:01:42,630 --> 00:01:41,200

involved in in this

50

00:01:44,389 --> 00:01:42,640

as well so we can talk about that as

51

00:01:47,670 --> 00:01:44,399

well so

52

00:01:51,830 --> 00:01:47,680

i just want to show you to set the scene

53

00:01:54,630 --> 00:01:51,840

um so going back to 2004

54

00:01:55,350 --> 00:01:54,640

could you just say when you personally

55

00:01:58,230 --> 00:01:55,360

were

56

00:02:00,069 --> 00:01:58,240

first aware that something unusual was

57

00:02:03,429 --> 00:02:00,079

going on

58

00:02:05,830 --> 00:02:03,439

i mean for the most generic purposes

59

00:02:08,229 --> 00:02:05,840

where we were training office of the

60

00:02:09,910 --> 00:02:08,239

coast of mexico southern california

61

00:02:12,390 --> 00:02:09,920

is a routine training area for us we've

62

00:02:14,790 --> 00:02:12,400

been there a lot the type of training we

63

00:02:16,710 --> 00:02:14,800

did the type of flight schedules we ran

64

00:02:18,630 --> 00:02:16,720

it's all relatively normal you know the

65

00:02:20,630 --> 00:02:18,640

only thing that differed very

66

00:02:22,150 --> 00:02:20,640

day-to-day was you know what time our

67

00:02:23,030 --> 00:02:22,160

plane launched or what time our plane

68

00:02:24,869 --> 00:02:23,040

came

69

00:02:28,150 --> 00:02:24,879

you know it was all standard training we

70

00:02:32,309 --> 00:02:28,160

had done previous deployments

71

00:02:33,670 --> 00:02:32,319

um so we kind of knew what was going on

72

00:02:37,190 --> 00:02:33,680

we're on deck when we need to launch our

73

00:02:38,470 --> 00:02:37,200

airplane we um

74

00:02:41,190 --> 00:02:38,480

there's a lot of systems on the hawk

75

00:02:43,030 --> 00:02:41,200

that take time to turn on and warm up

76
00:02:44,630 --> 00:02:43,040
so we're up there several hours before

77
00:02:45,990 --> 00:02:44,640
you know we can listen to radio traffic

78
00:02:47,509 --> 00:02:46,000
that plane's got a lot of radios

79
00:02:49,350 --> 00:02:47,519
sometimes we take a nap

80
00:02:50,869 --> 00:02:49,360
it's kind of hard to say what we do once

81
00:02:52,150 --> 00:02:50,879
that plane's up and running when we wait

82
00:02:53,990 --> 00:02:52,160
for the air crew

83
00:02:55,670 --> 00:02:54,000
and you know the plane eventually leaves

84
00:02:57,110 --> 00:02:55,680
with the air crew comes back

85
00:02:59,030 --> 00:02:57,120
we get back on that airplane we make

86
00:03:00,470 --> 00:02:59,040
sure they didn't break anything we

87
00:03:01,830 --> 00:03:00,480
have a bunch of classified hard drives

88
00:03:02,390 --> 00:03:01,840

on that airplane that we have to take

89

00:03:05,350 --> 00:03:02,400

off

90

00:03:05,910 --> 00:03:05,360

when we're not in the airplane um and

91

00:03:07,350 --> 00:03:05,920

that's

92

00:03:09,750 --> 00:03:07,360

obviously how i got involved in this

93

00:03:13,190 --> 00:03:09,760

whole thing um the hawkeye

94

00:03:14,550 --> 00:03:13,200

that was airborne during uh commander

95

00:03:16,149 --> 00:03:14,560

fraber's intercept

96

00:03:19,750 --> 00:03:16,159

the one that kevin day actually took

97

00:03:22,790 --> 00:03:19,760

control of fravor from

98

00:03:24,470 --> 00:03:22,800

we were running and i have to be very

99

00:03:24,789 --> 00:03:24,480

vague about this part because part of it

100

00:03:27,110 --> 00:03:24,799

is

101
00:03:28,070 --> 00:03:27,120
something classified we are running some

102
00:03:30,229 --> 00:03:28,080
system tests

103
00:03:32,309 --> 00:03:30,239
for something that was on the airplane

104
00:03:35,589 --> 00:03:32,319
that is separate from

105
00:03:38,470 --> 00:03:35,599
anything that had to do with dick it was

106
00:03:41,350 --> 00:03:38,480
not involved it was not used for it all

107
00:03:44,070 --> 00:03:41,360
we were doing was recording

108
00:03:45,670 --> 00:03:44,080
everything they saw so basically a

109
00:03:46,949 --> 00:03:45,680
complete screen capture of everything

110
00:03:48,630 --> 00:03:46,959
they did

111
00:03:51,350 --> 00:03:48,640
uh everything from you know their mouse

112
00:03:53,350 --> 00:03:51,360
clicks to what menus they open

113
00:03:55,190 --> 00:03:53,360

to what they saw to a bunch of

114

00:03:56,789 --> 00:03:55,200

background information

115

00:03:58,149 --> 00:03:56,799

all of that was being recorded on these

116

00:03:59,509 --> 00:03:58,159

bricks and i know for a fact it was

117

00:04:00,630 --> 00:03:59,519

being recorded because i'm the one who

118

00:04:04,309 --> 00:04:00,640

hit the record button

119

00:04:07,190 --> 00:04:04,319

okay um and so when it came

120

00:04:08,149 --> 00:04:07,200

out those specific bricks you know we

121

00:04:09,670 --> 00:04:08,159

obviously had to take them out of the

122

00:04:11,830 --> 00:04:09,680

airplane anyways

123

00:04:13,990 --> 00:04:11,840

but they were eventually going to be

124

00:04:16,710 --> 00:04:14,000

when we returned to san diego

125

00:04:19,030 --> 00:04:16,720

a week or so later we're going to be

126
00:04:21,670 --> 00:04:19,040
turned over to some civilians to

127
00:04:23,990 --> 00:04:21,680
basically analyze the data so they

128
00:04:27,749 --> 00:04:24,000
already had a purpose

129
00:04:29,990 --> 00:04:27,759
but what inadvertently happened because

130
00:04:31,110 --> 00:04:30,000
you know obviously somebody knew we were

131
00:04:33,510 --> 00:04:31,120
recording that stuff

132
00:04:35,670 --> 00:04:33,520
somebody wanted all that data because of

133
00:04:37,510 --> 00:04:35,680
all the other stuff they could have seen

134
00:04:40,070 --> 00:04:37,520
you know it had radar information on it

135
00:04:41,350 --> 00:04:40,080
had esm information on it

136
00:04:44,390 --> 00:04:41,360
there was a lot of information that

137
00:04:47,909 --> 00:04:44,400
those um those bricks had

138
00:04:49,909 --> 00:04:47,919

so after you know i got those bricks out

139

00:04:52,550 --> 00:04:49,919

of the airplane

140

00:04:53,830 --> 00:04:52,560

take them down put them in our safe you

141

00:05:00,310 --> 00:04:53,840

know

142

00:05:03,110 --> 00:05:00,320

timeline of minutes after

143

00:05:03,990 --> 00:05:03,120

this many years but it was within 15 20

144

00:05:07,270 --> 00:05:04,000

minutes of

145

00:05:10,390 --> 00:05:07,280

me putting those bricks back in the safe

146

00:05:11,909 --> 00:05:10,400

my commanding officer and two guys in

147

00:05:14,150 --> 00:05:11,919

air force flight shoots

148

00:05:16,629 --> 00:05:14,160

show up at our door on this on the ship

149

00:05:18,550 --> 00:05:16,639

and where my work center was on the ship

150

00:05:20,870 --> 00:05:18,560

if you ever look at the the flight deck

151
00:05:22,870 --> 00:05:20,880
of an aircraft carrier from the top

152
00:05:24,310 --> 00:05:22,880
on the left-hand side you see the the

153
00:05:26,390 --> 00:05:24,320
landing lenses

154
00:05:27,590 --> 00:05:26,400
the fresno lenses that they use to to

155
00:05:29,909 --> 00:05:27,600
judge

156
00:05:31,350 --> 00:05:29,919
landing right my shop is almost right

157
00:05:34,230 --> 00:05:31,360
underneath that

158
00:05:35,670 --> 00:05:34,240
okay we're far away from where the ready

159
00:05:37,029 --> 00:05:35,680
room is and far away from where my

160
00:05:39,189 --> 00:05:37,039
skipper is and

161
00:05:40,310 --> 00:05:39,199
they don't come to our shop we go to

162
00:05:41,749 --> 00:05:40,320
them

163
00:05:43,590 --> 00:05:41,759

so for my skipper to come all the way

164

00:05:44,230 --> 00:05:43,600

over to my shop was abnormal enough

165

00:05:46,230 --> 00:05:44,240

already

166

00:05:47,749 --> 00:05:46,240

for him to show up with two guys in air

167

00:05:50,950 --> 00:05:47,759

force flight suits

168

00:05:54,150 --> 00:05:50,960

who stick out like thor sore thumbs

169

00:05:57,430 --> 00:05:55,909

you know all that starts adding up to

170

00:06:00,230 --> 00:05:57,440

things that are weird

171

00:06:02,629 --> 00:06:00,240

and he simply says i need the bricks off

172

00:06:06,309 --> 00:06:02,639

that last flight

173

00:06:09,029 --> 00:06:06,319

no no paperwork no other

174

00:06:09,510 --> 00:06:09,039

discussion no nothing he just wanted

175

00:06:11,110 --> 00:06:09,520

them

176

00:06:13,029 --> 00:06:11,120

we got him out of the safe put him in

177

00:06:16,070 --> 00:06:13,039

the bags he took them

178

00:06:16,790 --> 00:06:16,080

they left and honestly that was the last

179

00:06:19,189 --> 00:06:16,800

i'd

180

00:06:21,510 --> 00:06:19,199

thought about it for for quite a while

181

00:06:25,189 --> 00:06:21,520

and then roger who is

182

00:06:29,670 --> 00:06:25,199

a friend of mine uh another enlisted

183

00:06:32,469 --> 00:06:29,680

avionics tech was flying on that flight

184

00:06:33,749 --> 00:06:32,479

he went through debrief and a bunch of

185

00:06:36,070 --> 00:06:33,759

other stuff

186

00:06:37,110 --> 00:06:36,080

some of which he was able to share um he

187

00:06:40,950 --> 00:06:37,120

shared with both myself

188

00:06:43,189 --> 00:06:40,960

and with dave beatty um

189

00:06:44,309 --> 00:06:43,199

when he came back he kind of started to

190

00:06:47,510 --> 00:06:44,319

tell us

191

00:06:51,270 --> 00:06:49,749

and then somebody walked in and he was

192

00:06:53,029 --> 00:06:51,280

shut down real quick

193

00:06:55,670 --> 00:06:53,039

so that was basically the end of it for

194

00:06:58,150 --> 00:06:55,680

ages and it became a drinking story

195

00:06:59,830 --> 00:06:58,160

until i saw dave beatty's documentary

196

00:07:02,550 --> 00:06:59,840

and obviously

197

00:07:03,749 --> 00:07:02,560

started diving back into everything to

198

00:07:06,710 --> 00:07:03,759

relearn

199

00:07:08,629 --> 00:07:06,720

what i had forgotten about and dave

200

00:07:11,670 --> 00:07:08,639

bailey's documentary that came out in

201
00:07:15,510 --> 00:07:11,680
uh like 2019 or something uh

202
00:07:17,670 --> 00:07:15,520
somewhere about there yeah yeah 1819.

203
00:07:19,589 --> 00:07:17,680
so which is quite a long time quite a

204
00:07:21,189 --> 00:07:19,599
long time after the uh the the incident

205
00:07:24,230 --> 00:07:21,199
of 2004 it's like 15

206
00:07:27,270 --> 00:07:24,240
plus years uh around 15 years

207
00:07:29,510 --> 00:07:27,280
uh so you you you say you didn't think

208
00:07:31,270 --> 00:07:29,520
about it at all in between 2004 and

209
00:07:32,550 --> 00:07:31,280
2015. i mean you must have thought about

210
00:07:34,550 --> 00:07:32,560
it obviously but

211
00:07:35,990 --> 00:07:34,560
it's not it was never to the level that

212
00:07:38,950 --> 00:07:36,000
obviously it is now

213
00:07:40,870 --> 00:07:38,960

it'd come up randomly in conversation um

214

00:07:42,629 --> 00:07:40,880

i had random conversations with some of

215

00:07:44,869 --> 00:07:42,639

the other people i worked with

216

00:07:46,469 --> 00:07:44,879

who've honestly one of the conversations

217

00:07:48,469 --> 00:07:46,479

i completely forgot i had

218

00:07:50,629 --> 00:07:48,479

until the guy reached out to me and

219

00:07:54,469 --> 00:07:50,639

reminded me the conversation we had

220

00:07:56,070 --> 00:07:54,479

um it was it was a bunch of abnormal

221

00:07:57,430 --> 00:07:56,080

stuff that happened

222

00:07:59,029 --> 00:07:57,440

um and i'm sure you've heard it

223

00:08:01,270 --> 00:07:59,039

especially if you've talked to any or

224

00:08:04,710 --> 00:08:01,280

watched any of fraver's interviews

225

00:08:06,869 --> 00:08:04,720

um yeah the air wing itself puts out a

226

00:08:08,150 --> 00:08:06,879

uh it's the airplane it's you know

227

00:08:09,749 --> 00:08:08,160

what's happening the next day what

228

00:08:11,270 --> 00:08:09,759

flights are going out what missions are

229

00:08:12,950 --> 00:08:11,280

doing et cetera et cetera

230

00:08:14,710 --> 00:08:12,960

and there's usually a cartoon that goes

231

00:08:18,629 --> 00:08:14,720

along with it

232

00:08:20,230 --> 00:08:18,639

and it they're the most crudely drawn

233

00:08:20,869 --> 00:08:20,240

things and it's normally just the air

234

00:08:22,869 --> 00:08:20,879

wing

235

00:08:24,869 --> 00:08:22,879

officers poking fun out of each other

236

00:08:27,909 --> 00:08:24,879

you know somebody did something stupid

237

00:08:30,150 --> 00:08:27,919

they're gonna make a joke about it and

238

00:08:32,310 --> 00:08:30,160

the next couple days were all alien

239

00:08:36,149 --> 00:08:32,320

related those little cartoons

240

00:08:37,909 --> 00:08:36,159

the ship or television started playing

241

00:08:39,990 --> 00:08:37,919

you know independent i think it was

242

00:08:41,269 --> 00:08:40,000

independence day but all alien themed

243

00:08:44,630 --> 00:08:41,279

movies

244

00:08:46,230 --> 00:08:44,640

and it became nobody quite knew

245

00:08:49,190 --> 00:08:46,240

what it was about but it became a big

246

00:08:51,269 --> 00:08:49,200

joke so you you saw these these

247

00:08:52,870 --> 00:08:51,279

uh videos being played like independence

248

00:08:56,310 --> 00:08:52,880

day but you didn't know yet

249

00:08:59,110 --> 00:08:56,320

about the the encounters i mean i knew

250

00:08:59,750 --> 00:08:59,120

but the vast majority of ship had no

251
00:09:01,509 --> 00:08:59,760
clue

252
00:09:02,790 --> 00:09:01,519
i mean there would have been people on

253
00:09:05,590 --> 00:09:02,800
um

254
00:09:06,949 --> 00:09:05,600
some of the shipboard systems that had

255
00:09:08,070 --> 00:09:06,959
access to the outside networks that

256
00:09:11,110 --> 00:09:08,080
would have had a clue

257
00:09:13,269 --> 00:09:11,120
but an aircraft carrier of 6 000 people

258
00:09:15,350 --> 00:09:13,279
you're probably looking at maybe 150

259
00:09:17,430 --> 00:09:15,360
that had a clue what was going on

260
00:09:19,350 --> 00:09:17,440
but obviously the people who are in the

261
00:09:21,509 --> 00:09:19,360
positions to

262
00:09:22,790 --> 00:09:21,519
make those cartoons and kind of control

263
00:09:23,509 --> 00:09:22,800

stuff they're the ones who knew so

264

00:09:26,230 --> 00:09:23,519

they're the ones

265

00:09:27,509 --> 00:09:26,240

making a joke it was more the air wing

266

00:09:28,070 --> 00:09:27,519

that knew because the air wing was

267

00:09:31,670 --> 00:09:28,080

involved

268

00:09:36,070 --> 00:09:34,230

so uh just you just helped me understand

269

00:09:36,710 --> 00:09:36,080

something here like i was a bit confused

270

00:09:40,389 --> 00:09:36,720

about the

271

00:09:42,870 --> 00:09:40,399

involvement of uh the air force uh

272

00:09:44,230 --> 00:09:42,880

do were the air force involved in the

273

00:09:46,870 --> 00:09:44,240

exercise

274

00:09:47,750 --> 00:09:46,880

with the air force planes playing no

275

00:09:50,230 --> 00:09:47,760

there was

276

00:09:51,190 --> 00:09:50,240

uh it was strictly an air wing exercise

277

00:09:53,190 --> 00:09:51,200

there other than

278

00:09:55,590 --> 00:09:53,200

one of the air wing or the one of the

279

00:09:58,550 --> 00:09:55,600

strike group ships that was pierside in

280

00:10:00,470 --> 00:09:58,560

hawaii they were still working with us

281

00:10:03,190 --> 00:10:00,480

they were just piercing hawaii

282

00:10:04,550 --> 00:10:03,200

there was nobody outside of strike group

283

00:10:06,630 --> 00:10:04,560

11 and air wing 11 that were

284

00:10:08,150 --> 00:10:06,640

participating in that exercise

285

00:10:10,870 --> 00:10:08,160

and when we're out to see there's only

286

00:10:13,910 --> 00:10:10,880

two ways of getting on that ship

287

00:10:16,550 --> 00:10:13,920

one is by cod which

288

00:10:17,990 --> 00:10:16,560

is taken care of by my squadron so i

289

00:10:18,790 --> 00:10:18,000

would have seen anybody coming off the

290

00:10:20,069 --> 00:10:18,800

back of that

291

00:10:21,509 --> 00:10:20,079

because i was the only one with cod

292

00:10:22,389 --> 00:10:21,519

experience so i was always the one who

293

00:10:25,269 --> 00:10:22,399

got the

294

00:10:26,230 --> 00:10:25,279

uh straw to go up and catch it it's a c2

295

00:10:27,910 --> 00:10:26,240

greyhound

296

00:10:29,509 --> 00:10:27,920

it looks very similar to a hawkeye

297

00:10:30,710 --> 00:10:29,519

except without the big dish on top and

298

00:10:32,710 --> 00:10:30,720

it's a little fatter

299

00:10:35,269 --> 00:10:32,720

it carries past 20 or so passengers and

300

00:10:38,550 --> 00:10:35,279

cargo it's kind of like a shuttle type

301
00:10:40,230 --> 00:10:38,560
exactly and the only other way besides

302
00:10:41,990 --> 00:10:40,240
that is helicopter

303
00:10:43,509 --> 00:10:42,000
right the cod stands out you're going to

304
00:10:44,870 --> 00:10:43,519
notice somebody getting on on off the

305
00:10:47,750 --> 00:10:44,880
cod because

306
00:10:48,550 --> 00:10:47,760
everything shuts down when that happens

307
00:10:50,630 --> 00:10:48,560
you know

308
00:10:53,030 --> 00:10:50,640
they come in at the end of the landing

309
00:10:54,949 --> 00:10:53,040
cycle and everybody has to help unload

310
00:10:58,150 --> 00:10:54,959
it everybody sees the passengers

311
00:11:00,550 --> 00:10:58,160
but the helicopters they come on and off

312
00:11:02,630 --> 00:11:00,560
the deck so often throughout the day

313
00:11:04,150 --> 00:11:02,640

they could have easily gotten somebody

314

00:11:05,990 --> 00:11:04,160

off those and nobody would have noticed

315

00:11:08,230 --> 00:11:06,000

nobody would have paid attention

316

00:11:09,910 --> 00:11:08,240

because they didn't show up on the cod

317

00:11:11,190 --> 00:11:09,920

so i have no idea how those two officer

318

00:11:12,630 --> 00:11:11,200

air force officers

319

00:11:14,630 --> 00:11:12,640

even got on board the only thing i can

320

00:11:18,150 --> 00:11:14,640

think of is they came on board

321

00:11:20,310 --> 00:11:18,160

be a helo yeah i think you said you

322

00:11:22,310 --> 00:11:20,320

you were you would normally hand over

323

00:11:23,269 --> 00:11:22,320

the the data bricks the hard drives at

324

00:11:26,550 --> 00:11:23,279

the end of uh

325

00:11:29,030 --> 00:11:26,560

of the mission uh or the the exercise

326

00:11:30,150 --> 00:11:29,040

uh but you wouldn't hand them over to

327

00:11:34,150 --> 00:11:30,160

these air force people

328

00:11:36,069 --> 00:11:34,160

no normally those those bricks um

329

00:11:37,750 --> 00:11:36,079

we call them bricks they're basically a

330

00:11:40,150 --> 00:11:37,760

removable hard drive

331

00:11:41,430 --> 00:11:40,160

um they're barracuda hard drives if

332

00:11:43,430 --> 00:11:41,440

you've ever heard of that brand

333

00:11:45,829 --> 00:11:43,440

yeah it's just a standard computer hard

334

00:11:48,630 --> 00:11:45,839

drive yeah inside a fancy case

335

00:11:49,990 --> 00:11:48,640

and normally we use those until they die

336

00:11:51,350 --> 00:11:50,000

and then we replace them with something

337

00:11:53,190 --> 00:11:51,360

new and

338

00:11:54,790 --> 00:11:53,200

the old ones get shredded and smashed

339

00:11:56,710 --> 00:11:54,800

and destroyed

340

00:11:58,230 --> 00:11:56,720

but the only time we ever send them away

341

00:12:00,790 --> 00:11:58,240

is for

342

00:12:02,710 --> 00:12:00,800

um like special testings if we've done a

343

00:12:04,790 --> 00:12:02,720

major systems upgrade

344

00:12:05,990 --> 00:12:04,800

they'll ask for a set off a flight just

345

00:12:08,870 --> 00:12:06,000

to

346

00:12:10,550 --> 00:12:08,880

help test or help check for any

347

00:12:12,470 --> 00:12:10,560

remaining system errors that they hadn't

348

00:12:15,269 --> 00:12:12,480

tested out

349

00:12:16,710 --> 00:12:15,279

because they have the two groups we'd

350

00:12:19,269 --> 00:12:16,720

normally send them to

351

00:12:20,389 --> 00:12:19,279

have basically duplicates of our

352

00:12:23,190 --> 00:12:20,399

airplane

353

00:12:25,110 --> 00:12:23,200

sitting in a air-conditioned room and

354

00:12:27,190 --> 00:12:25,120

they can run and test everything almost

355

00:12:30,550 --> 00:12:27,200

identically to

356

00:12:33,829 --> 00:12:30,560

our airplane which is why

357

00:12:35,509 --> 00:12:33,839

when the bug issue comes up

358

00:12:37,030 --> 00:12:35,519

i get a little defensive because i know

359

00:12:38,790 --> 00:12:37,040

how much testing

360

00:12:41,269 --> 00:12:38,800

is involved before that stuff hits the

361

00:12:43,910 --> 00:12:41,279

fleet um

362

00:12:45,590 --> 00:12:43,920

yeah but because we don't normally we

363

00:12:47,190 --> 00:12:45,600

don't normally send them off but this

364

00:12:48,230 --> 00:12:47,200

was one of the times where it was kind

365

00:12:50,629 --> 00:12:48,240

of planned out

366

00:12:51,350 --> 00:12:50,639

and it just so happens it never happened

367

00:12:54,949 --> 00:12:51,360

because

368

00:12:56,310 --> 00:12:54,959

that data got taken right so you you

369

00:12:57,990 --> 00:12:56,320

were planning to hand them over because

370

00:12:59,190 --> 00:12:58,000

they were doing this this test of

371

00:13:00,870 --> 00:12:59,200

something that's classified that you

372

00:13:03,190 --> 00:13:00,880

can't discuss

373

00:13:05,670 --> 00:13:03,200

and but you think that they recorded

374

00:13:07,110 --> 00:13:05,680

additional information

375

00:13:09,590 --> 00:13:07,120

and i think specifically you mentioned

376

00:13:13,190 --> 00:13:09,600

somewhere else it was the uh the esm

377

00:13:16,069 --> 00:13:13,200

data can you explain what esm is uh

378

00:13:16,870 --> 00:13:16,079

much of esm is classified but there is a

379

00:13:19,110 --> 00:13:16,880

bit of

380

00:13:20,550 --> 00:13:19,120

generic information you can get on

381

00:13:22,870 --> 00:13:20,560

lockheed martin's website

382

00:13:24,710 --> 00:13:22,880

even wikipedia if you look it up it's a

383

00:13:27,110 --> 00:13:24,720

passive sensor system that looks for

384

00:13:30,470 --> 00:13:27,120

electronic signals

385

00:13:34,230 --> 00:13:30,480

how it does it how it recognizes it and

386

00:13:36,550 --> 00:13:34,240

exactly what range of electronic signal

387

00:13:39,670 --> 00:13:36,560

it can look for is what's classified

388

00:13:41,829 --> 00:13:39,680

but i mean as a hint

389

00:13:43,269 --> 00:13:41,839

i can tell you know if you're running a

390

00:13:45,269 --> 00:13:43,279

microwave inside your house because i'm

391

00:13:46,949 --> 00:13:45,279

going to pick up that electric signal

392

00:13:49,030 --> 00:13:46,959

so that alone should kind of give you an

393

00:13:51,110 --> 00:13:49,040

idea how sensitive it is

394

00:13:53,430 --> 00:13:51,120

um we used to actually drag a microwave

395

00:13:55,110 --> 00:13:53,440

on a long extension cord out to tag

396

00:13:56,870 --> 00:13:55,120

certain antennas when we were testing it

397

00:13:58,710 --> 00:13:56,880

just

398

00:13:59,990 --> 00:13:58,720

the well there's a built-in test set to

399

00:14:02,389 --> 00:14:00,000

do the same thing

400

00:14:04,389 --> 00:14:02,399

but it sucked we got better reliability

401
00:14:06,710 --> 00:14:04,399
picking up a stupid microwave

402
00:14:08,069 --> 00:14:06,720
than we did the actual test set so that

403
00:14:11,269 --> 00:14:08,079
is funny yeah

404
00:14:11,910 --> 00:14:11,279
um i use my microwave to testing my my

405
00:14:15,350 --> 00:14:11,920
uh

406
00:14:19,509 --> 00:14:15,360
meters

407
00:14:23,670 --> 00:14:19,519
there you go yeah but

408
00:14:26,710 --> 00:14:23,680
you know the radar on a hawkeye then

409
00:14:28,069 --> 00:14:26,720
for as old as it was was a very very

410
00:14:30,230 --> 00:14:28,079
good radar

411
00:14:31,990 --> 00:14:30,240
but it's uh it's a pulse doppler radar

412
00:14:35,350 --> 00:14:32,000
it's an older style radar

413
00:14:37,430 --> 00:14:35,360

you know it spins you know i can get

414

00:14:40,710 --> 00:14:37,440

into a lot of technical jargon

415

00:14:42,389 --> 00:14:40,720

but for as good as it is

416

00:14:44,710 --> 00:14:42,399

it's not going to hold a constant track

417

00:14:45,829 --> 00:14:44,720

on something moving as fast as a tic

418

00:14:49,590 --> 00:14:45,839

neck was

419

00:14:52,710 --> 00:14:49,600

right or as we believe we think it is

420

00:14:56,710 --> 00:14:52,720

it held slower targets it held

421

00:14:59,590 --> 00:14:56,720

the the reigning ufo type style

422

00:15:01,269 --> 00:14:59,600

that kevin day described i've been told

423

00:15:03,350 --> 00:15:01,279

they were tracking those

424

00:15:05,110 --> 00:15:03,360

and they were tracking it intermittently

425

00:15:06,310 --> 00:15:05,120

but when they were constantly picking it

426

00:15:08,790 --> 00:15:06,320

up it was via

427

00:15:10,710 --> 00:15:08,800

esm which means that object was

428

00:15:11,110 --> 00:15:10,720

transmitting some sort of electronic

429

00:15:13,430 --> 00:15:11,120

signal

430

00:15:15,430 --> 00:15:13,440

that they were able to pick up so i

431

00:15:16,550 --> 00:15:15,440

believe that is why they went after

432

00:15:18,389 --> 00:15:16,560

those bricks and that's what the

433

00:15:20,470 --> 00:15:18,399

information they wanted

434

00:15:22,710 --> 00:15:20,480

do you know if it was picking up esm

435

00:15:25,350 --> 00:15:22,720

data like before the 14th

436

00:15:27,030 --> 00:15:25,360

before the actual encounter with when

437

00:15:28,550 --> 00:15:27,040

you know kevin describes it as

438

00:15:30,389 --> 00:15:28,560

being several days of the things

439

00:15:31,350 --> 00:15:30,399

drifting down the screen just radio

440

00:15:34,150 --> 00:15:31,360

contacts but

441

00:15:35,910 --> 00:15:34,160

there was no interest i've spoken at

442

00:15:37,829 --> 00:15:35,920

length with the crew that was airborne

443

00:15:39,350 --> 00:15:37,839

during favorite flight

444

00:15:40,870 --> 00:15:39,360

and i've spoken with a few other

445

00:15:41,910 --> 00:15:40,880

officers that i've remained friends with

446

00:15:44,150 --> 00:15:41,920

over the years

447

00:15:45,590 --> 00:15:44,160

who were airborne throughout that time

448

00:15:49,990 --> 00:15:45,600

and

449

00:15:51,430 --> 00:15:50,000

off our scopes

450

00:15:53,509 --> 00:15:51,440

intermittently throughout that whole

451
00:15:56,069 --> 00:15:53,519
period just like they were the princeton

452
00:15:57,030 --> 00:15:56,079
um because for the most part when our

453
00:15:58,470 --> 00:15:57,040
systems are on

454
00:16:00,230 --> 00:15:58,480
they don't discriminate it's not like we

455
00:16:02,870 --> 00:16:00,240
only look at one small

456
00:16:04,150 --> 00:16:02,880
slice of the sky it's looking everywhere

457
00:16:06,949 --> 00:16:04,160
so even if we're

458
00:16:08,470 --> 00:16:06,959
you know 200 miles away over here on on

459
00:16:10,230 --> 00:16:08,480
this training mission

460
00:16:11,509 --> 00:16:10,240
it's still picking up everything so if

461
00:16:12,710 --> 00:16:11,519
it's in that airspace they're going to

462
00:16:14,710 --> 00:16:12,720
see it

463
00:16:16,230 --> 00:16:14,720

so i have no way of physically

464

00:16:18,389 --> 00:16:16,240

confirming it because i can't see the

465

00:16:20,870 --> 00:16:18,399

data i can't do any of that stuff

466

00:16:21,990 --> 00:16:20,880

but i am being told by the crews that

467

00:16:24,310 --> 00:16:22,000

were flying

468

00:16:26,389 --> 00:16:24,320

that they were on and off uh tracking

469

00:16:29,829 --> 00:16:26,399

these objects throughout the week

470

00:16:33,269 --> 00:16:29,839

okay uh

471

00:16:34,949 --> 00:16:33,279

so you know what you described about the

472

00:16:36,230 --> 00:16:34,959

in the older radar not being the same as

473

00:16:37,350 --> 00:16:36,240

good as the princeton's radar that kind

474

00:16:39,910 --> 00:16:37,360

of ties into

475

00:16:41,189 --> 00:16:39,920

uh like what happened with fraber's

476

00:16:43,189 --> 00:16:41,199

intercept where uh

477

00:16:45,509 --> 00:16:43,199

i think initially fravor and there's a

478

00:16:47,509 --> 00:16:45,519

huge difference between

479

00:16:49,910 --> 00:16:47,519

that the the radar on like favorite

480

00:16:50,470 --> 00:16:49,920

fighter those radars that were in his

481

00:16:52,389 --> 00:16:50,480

plane

482

00:16:54,629 --> 00:16:52,399

as brand new as the super hornets were

483

00:16:55,670 --> 00:16:54,639

then have already been replaced

484

00:16:57,829 --> 00:16:55,680

they were never meant to be the

485

00:17:00,710 --> 00:16:57,839

permanent radar in a super hornet

486

00:17:01,430 --> 00:17:00,720

they were basically a stop gap they're

487

00:17:03,590 --> 00:17:01,440

not meant

488

00:17:05,669 --> 00:17:03,600

they're meant to track a plane to fire a

489

00:17:08,230 --> 00:17:05,679

missile and get that missile from the

490

00:17:09,590 --> 00:17:08,240

the rail on framers fighter to whatever

491

00:17:12,710 --> 00:17:09,600

target he's shooting

492

00:17:18,710 --> 00:17:12,720

they're not meant to search for

493

00:17:20,390 --> 00:17:18,720

like a body in the water they're not

494

00:17:22,309 --> 00:17:20,400

meant to search for ballistic missiles

495

00:17:24,309 --> 00:17:22,319

they're not meant to do all that

496

00:17:25,909 --> 00:17:24,319

princeton was designed to track

497

00:17:27,029 --> 00:17:25,919

ballistic missiles that's his primary

498

00:17:28,789 --> 00:17:27,039

purpose

499

00:17:31,990 --> 00:17:28,799

it just so happens that radar because it

500

00:17:34,470 --> 00:17:32,000

can do that can do so much more

501
00:17:35,430 --> 00:17:34,480
you know the hawkeye's radar is meant

502
00:17:37,110 --> 00:17:35,440
for

503
00:17:39,430 --> 00:17:37,120
airspace control it's supposed to see

504
00:17:41,110 --> 00:17:39,440
everything you know

505
00:17:43,590 --> 00:17:41,120
it does that very well you know a

506
00:17:46,630 --> 00:17:43,600
hawkeye i've seen pick up driftwood

507
00:17:48,549 --> 00:17:46,640
at you know well over 250 miles and if

508
00:17:50,390 --> 00:17:48,559
you see a piece of driftwood

509
00:17:51,990 --> 00:17:50,400
floating on the surface of the ocean you

510
00:17:53,990 --> 00:17:52,000
can see how small it is and tells you

511
00:17:56,070 --> 00:17:54,000
how good that radar actually is

512
00:17:58,310 --> 00:17:56,080
but it's not meant to it's it's not

513
00:18:01,110 --> 00:17:58,320

meant to track a ballistic missile

514

00:18:03,590 --> 00:18:01,120

you know that's why the speed it will

515

00:18:06,630 --> 00:18:03,600

eventually

516

00:18:09,110 --> 00:18:06,640

out do that radar's capabilities whereas

517

00:18:10,549 --> 00:18:09,120

the princeton is meant for that speed

518

00:18:12,630 --> 00:18:10,559

it's going to track that object a lot

519

00:18:16,549 --> 00:18:12,640

better that way okay

520

00:18:21,909 --> 00:18:19,750

the so with fraver

521

00:18:23,029 --> 00:18:21,919

fravo's out there doing his exercise uh

522

00:18:24,789 --> 00:18:23,039

him and his wingman

523

00:18:26,549 --> 00:18:24,799

so there's you know four people they

524

00:18:29,190 --> 00:18:26,559

were essentially doing uh

525

00:18:30,789 --> 00:18:29,200

good guy versus bad guy and they go out

526

00:18:34,070 --> 00:18:30,799

and dog fight with each other

527

00:18:37,990 --> 00:18:34,080

with each other okay yeah um

528

00:18:41,270 --> 00:18:38,000

they were doing 2v2 which is exactly

529

00:18:42,870 --> 00:18:41,280

um they discussed two marine pilots that

530

00:18:45,510 --> 00:18:42,880

were airborne

531

00:18:47,029 --> 00:18:45,520

um around that same time commander or

532

00:18:47,750 --> 00:18:47,039

colonel couth or lieutenant colonel

533

00:18:49,190 --> 00:18:47,760

couth

534

00:18:50,870 --> 00:18:49,200

i can't remember the dude's name but

535

00:18:52,630 --> 00:18:50,880

starts with a k

536

00:18:54,549 --> 00:18:52,640

um they were actually supposed to be

537

00:18:58,630 --> 00:18:54,559

fravor and his wingman's opponents

538

00:19:01,029 --> 00:18:58,640

for that training evolution

539

00:19:03,590 --> 00:19:01,039

and the hawkeye obviously controls

540

00:19:06,630 --> 00:19:03,600

everything going on in that airspace

541

00:19:07,510 --> 00:19:06,640

unless somebody specific requests

542

00:19:09,350 --> 00:19:07,520

otherwise

543

00:19:10,549 --> 00:19:09,360

which in this case was kevin day in the

544

00:19:13,029 --> 00:19:10,559

princeton

545

00:19:14,390 --> 00:19:13,039

the hawkeye then turned fravor and his

546

00:19:16,390 --> 00:19:14,400

wingmen

547

00:19:17,750 --> 00:19:16,400

over to the princeton the princeton was

548

00:19:19,909 --> 00:19:17,760

then controlling those

549

00:19:21,830 --> 00:19:19,919

but no airwing asset is airborne without

550

00:19:24,710 --> 00:19:21,840

being controlled by the hawkeye

551

00:19:24,950 --> 00:19:24,720

or the princeton and most of the time it

552

00:19:28,150 --> 00:19:24,960

is

553

00:19:32,470 --> 00:19:28,160

the hawkeye we are always airborne

554

00:19:34,230 --> 00:19:32,480

okay okay so that makes sense uh

555

00:19:36,230 --> 00:19:34,240

uh and so very specifically with with

556

00:19:40,870 --> 00:19:36,240

fraber's encounter uh

557

00:19:44,150 --> 00:19:40,880

uh the way kevin remembers it uh

558

00:19:47,190 --> 00:19:44,160

he decided he wanted to intercept

559

00:19:48,870 --> 00:19:47,200

uh this this group of five uh things

560

00:19:52,150 --> 00:19:48,880

that he saw on the scope

561

00:19:55,669 --> 00:19:52,160

and he knew that fravo was out there and

562

00:19:58,870 --> 00:19:55,679

uh but at the time

563

00:20:00,070 --> 00:19:58,880

the hawkeye didn't have uh these targets

564

00:20:01,350 --> 00:20:00,080

on their scope

565

00:20:03,350 --> 00:20:01,360

to my knowledge no i believe you're

566

00:20:04,230 --> 00:20:03,360

correct we did not see him at that exact

567

00:20:13,029 --> 00:20:04,240

point

568

00:20:13,990 --> 00:20:13,039

um dave beatty and i were told by the

569

00:20:15,750 --> 00:20:14,000

individual we've

570

00:20:17,510 --> 00:20:15,760

called roger because we're not going to

571

00:20:21,190 --> 00:20:17,520

reveal his actual name

572

00:20:24,149 --> 00:20:21,200

at some point during that flight the

573

00:20:25,669 --> 00:20:24,159

tic tac object or a tic tac object i

574

00:20:26,630 --> 00:20:25,679

don't know if it's the identical one the

575

00:20:29,830 --> 00:20:26,640

same one

576
00:20:31,270 --> 00:20:29,840
but one of those objects got real close

577
00:20:33,029 --> 00:20:31,280
to the hawkeye

578
00:20:34,950 --> 00:20:33,039
basically came up said hi and then took

579
00:20:36,950 --> 00:20:34,960
off um

580
00:20:38,870 --> 00:20:36,960
okay and that was during that was this

581
00:20:40,870 --> 00:20:38,880
about the same time as fravos

582
00:20:42,230 --> 00:20:40,880
during like that i don't have the exact

583
00:20:43,909 --> 00:20:42,240
yeah middle of the flight end of the

584
00:20:46,549 --> 00:20:43,919
flight but during

585
00:20:47,510 --> 00:20:46,559
that flight and it's a three and a half

586
00:20:50,710 --> 00:20:47,520
hour or so

587
00:20:53,270 --> 00:20:50,720
block of time that

588
00:20:54,390 --> 00:20:53,280

that all happened yeah so at some point

589

00:20:56,230 --> 00:20:54,400

during that

590

00:20:59,430 --> 00:20:56,240

one of those objects came up and said hi

591

00:21:01,510 --> 00:20:59,440

to the hawkeye and then took off

592

00:21:03,270 --> 00:21:01,520

and if you i just shared roger's quote

593

00:21:06,470 --> 00:21:03,280

on twitter right before we hopped on

594

00:21:08,870 --> 00:21:06,480

oh yeah so what what was that um

595

00:21:10,470 --> 00:21:08,880

well roughly i'm actually gonna have

596

00:21:12,070 --> 00:21:10,480

still got it up i was gonna

597

00:21:14,149 --> 00:21:12,080

i'll read it directly better than me

598

00:21:15,669 --> 00:21:14,159

trying to

599

00:21:17,190 --> 00:21:15,679

dave betty is quoting the email between

600

00:21:19,510 --> 00:21:17,200

him and roger

601
00:21:21,510 --> 00:21:19,520
okay but he says basically first off i

602
00:21:24,149 --> 00:21:21,520
did see something that transited

603
00:21:26,470 --> 00:21:24,159
very quickly by our e2 and i cannot

604
00:21:28,710 --> 00:21:26,480
honestly say i've seen anything like it

605
00:21:30,549 --> 00:21:28,720
the object joined up with us briefly and

606
00:21:32,549 --> 00:21:30,559
all on board had a few

607
00:21:34,230 --> 00:21:32,559
upon arrival back to the nimitz we were

608
00:21:35,270 --> 00:21:34,240
told to follow an individual down for a

609
00:21:37,270 --> 00:21:35,280
debriefing

610
00:21:38,710 --> 00:21:37,280
we made our way to a secure area on the

611
00:21:40,149 --> 00:21:38,720
ship where the events were discussed

612
00:21:41,830 --> 00:21:40,159
individually and then they were told it

613
00:21:43,430 --> 00:21:41,840

did not happen

614

00:21:46,149 --> 00:21:43,440

and roger is one of the crew who signed

615

00:21:48,230 --> 00:21:46,159

the nda so obviously that's why he's not

616

00:21:51,510 --> 00:21:48,240

elaborating any more

617

00:21:54,549 --> 00:21:51,520

on what he actually saw

618

00:21:56,390 --> 00:21:54,559

now this this nda that they signed do

619

00:21:58,390 --> 00:21:56,400

you think that was to do with the object

620

00:22:00,310 --> 00:21:58,400

or to do with these the

621

00:22:02,710 --> 00:22:00,320

the other stuff that you talked about i

622

00:22:04,470 --> 00:22:02,720

think it's a combination of all of it

623

00:22:06,789 --> 00:22:04,480

if you've ever seen a government nda

624

00:22:09,510 --> 00:22:06,799

it's a very bland basic document right

625

00:22:10,789 --> 00:22:09,520

yeah um i can't tell you how many have i

626

00:22:11,990 --> 00:22:10,799

signed and most of them just have to

627

00:22:14,390 --> 00:22:12,000

deal with

628

00:22:15,909 --> 00:22:14,400

my basic security clearance or certain

629

00:22:17,110 --> 00:22:15,919

programs i worked on while i was in the

630

00:22:20,470 --> 00:22:17,120

navy

631

00:22:24,149 --> 00:22:20,480

it's basically a catch-all what makes

632

00:22:28,710 --> 00:22:26,789

what makes an actual nda is the briefing

633

00:22:31,590 --> 00:22:28,720

that comes along with it

634

00:22:32,789 --> 00:22:31,600

it's okay it's it's what they say that

635

00:22:34,470 --> 00:22:32,799

they don't write down that

636

00:22:35,990 --> 00:22:34,480

actually is more critical than what's on

637

00:22:37,590 --> 00:22:36,000

that piece of paper

638

00:22:39,270 --> 00:22:37,600

because they will literally say you can

639

00:22:40,230 --> 00:22:39,280

say this you can say this you can say

640

00:22:45,590 --> 00:22:40,240

this

641

00:22:47,190 --> 00:22:45,600

right and that's what would have

642

00:22:49,350 --> 00:22:47,200

happened in

643

00:22:50,230 --> 00:22:49,360

again i was not in their debrief i was

644

00:22:53,990 --> 00:22:50,240

not

645

00:22:55,430 --> 00:22:54,000

what they were told or what they

646

00:22:58,870 --> 00:22:55,440

couldn't say

647

00:23:00,070 --> 00:22:58,880

um i've pushed i'm going to say i push

648

00:23:02,470 --> 00:23:00,080

the limits of my friendship

649

00:23:03,990 --> 00:23:02,480

with roger to try and get him to share

650

00:23:07,669 --> 00:23:04,000

more than he can

651
00:23:10,549 --> 00:23:07,679
and you want to know exactly

652
00:23:11,590 --> 00:23:10,559
but you know i do respect why he sticks

653
00:23:13,510 --> 00:23:11,600
by his nda

654
00:23:15,350 --> 00:23:13,520
i do respect why he doesn't want to come

655
00:23:19,110 --> 00:23:15,360
forward you know

656
00:23:22,789 --> 00:23:19,120
i know what job he presently does

657
00:23:25,669 --> 00:23:22,799
and an error in any of this

658
00:23:27,190 --> 00:23:25,679
could seriously affect what he does not

659
00:23:28,630 --> 00:23:27,200
that he was doing anything intentionally

660
00:23:29,590 --> 00:23:28,640
he is not still in the navy he has

661
00:23:32,710 --> 00:23:29,600
gotten out

662
00:23:34,070 --> 00:23:32,720
but he does work in the defense industry

663
00:23:36,710 --> 00:23:34,080

got it out do you make it sound like

664

00:23:38,870 --> 00:23:36,720

it's uh some kind of

665

00:23:40,310 --> 00:23:38,880

some kind of uh ordeal being in the

666

00:23:43,830 --> 00:23:40,320

middle

667

00:23:44,710 --> 00:23:43,840

it can be all right all right so let's

668

00:23:49,110 --> 00:23:44,720

get back to fravor

669

00:23:50,630 --> 00:23:49,120

uh the fraver encounter um

670

00:23:53,110 --> 00:23:50,640

one of the things like that kevin dave

671

00:23:55,350 --> 00:23:53,120

mentioned about uh

672

00:23:56,630 --> 00:23:55,360

these radar contacts like before just

673

00:23:58,070 --> 00:23:56,640

directly before favors encounter we'll

674

00:24:00,870 --> 00:23:58,080

get to in a second was that

675

00:24:01,990 --> 00:24:00,880

he was told that there were uh the

676
00:24:05,830 --> 00:24:02,000
ballistic missile

677
00:24:07,750 --> 00:24:05,840
tracking uh system was detecting them

678
00:24:09,750 --> 00:24:07,760
coming down from space

679
00:24:11,110 --> 00:24:09,760
uh through sixty thousand feet or three

680
00:24:12,630 --> 00:24:11,120
eighty thousand feet

681
00:24:15,350 --> 00:24:12,640
and then coming down to the surface of

682
00:24:18,470 --> 00:24:15,360
the water is that something that you

683
00:24:22,710 --> 00:24:18,480
you have heard

684
00:24:24,470 --> 00:24:22,720
the group of us myself gary kevin jason

685
00:24:26,950 --> 00:24:24,480
we've all obviously talked at length and

686
00:24:28,630 --> 00:24:26,960
we you know talk via text message and

687
00:24:29,350 --> 00:24:28,640
facebook messenger who knows however

688
00:24:32,630 --> 00:24:29,360

else

689

00:24:35,990 --> 00:24:32,640

going to talk about

690

00:24:37,430 --> 00:24:36,000

um yeah he's the instigator of these

691

00:24:41,029 --> 00:24:37,440

discussions

692

00:24:42,549 --> 00:24:41,039

he is he's he's more of the uh

693

00:24:44,470 --> 00:24:42,559

i'm going to stick to and get it done

694

00:24:47,590 --> 00:24:44,480

kind of guy than the rest of us

695

00:24:49,909 --> 00:24:47,600

right but my last uh

696

00:24:51,669 --> 00:24:49,919

in person kevin uh discussion with kevin

697

00:24:53,350 --> 00:24:51,679

was actually in brooklyn

698

00:24:54,789 --> 00:24:53,360

i don't know probably seven months ago

699

00:24:59,750 --> 00:24:54,799

now

700

00:25:01,909 --> 00:24:59,760

um the rain

701
00:25:05,350 --> 00:25:01,919
i hate to i hate to even correct kevin

702
00:25:07,110 --> 00:25:05,360
because he's not wrong on what he says

703
00:25:09,350 --> 00:25:07,120
it's just i don't know if he used the

704
00:25:12,870 --> 00:25:09,360
best choice of words

705
00:25:14,070 --> 00:25:12,880
to say what he said you know there's no

706
00:25:17,590 --> 00:25:14,080
reason to doubt

707
00:25:21,029 --> 00:25:17,600
that they were way up high coming down

708
00:25:23,269 --> 00:25:21,039
you know that's the that's

709
00:25:24,630 --> 00:25:23,279
you know the range of spy one that's

710
00:25:26,230 --> 00:25:24,640
where it's supposed to look

711
00:25:28,710 --> 00:25:26,240
that's where ballistic missiles travel

712
00:25:30,549 --> 00:25:28,720
is way up high you know so

713
00:25:32,710 --> 00:25:30,559

i have every confidence that that's

714

00:25:34,310 --> 00:25:32,720

where they retract

715

00:25:36,470 --> 00:25:34,320

i don't know if that's where they

716

00:25:39,350 --> 00:25:36,480

started versus where that's

717

00:25:40,310 --> 00:25:39,360

where they were tracked from that's my

718

00:25:44,390 --> 00:25:40,320

only

719

00:25:47,750 --> 00:25:46,549

is just i don't know if you know some

720

00:25:50,149 --> 00:25:47,760

people say well

721

00:25:51,350 --> 00:25:50,159

that's where they started tracking them

722

00:25:52,470 --> 00:25:51,360

well that means they came from outer

723

00:25:53,909 --> 00:25:52,480

space

724

00:25:55,350 --> 00:25:53,919

i don't necessarily know if that means

725

00:25:57,110 --> 00:25:55,360

outer space that just means that's where

726

00:25:58,549 --> 00:25:57,120

we started tracking them

727

00:26:01,190 --> 00:25:58,559

yeah i think outer space is quite a bit

728

00:26:03,669 --> 00:26:01,200

higher than 80 000 feet

729

00:26:06,630 --> 00:26:03,679

exactly it's could they have come from

730

00:26:10,070 --> 00:26:06,640

outer space hypothetically yes but

731

00:26:12,789 --> 00:26:10,080

it just people can't take

732

00:26:13,750 --> 00:26:12,799

what he said as that's where they

733

00:26:15,750 --> 00:26:13,760

started

734

00:26:17,750 --> 00:26:15,760

you know he could have tracked them at

735

00:26:19,269 --> 00:26:17,760

max range of spy one

736

00:26:21,350 --> 00:26:19,279

and that's where he started to see them

737

00:26:24,070 --> 00:26:21,360

but that does not mean that's where they

738

00:26:26,149 --> 00:26:24,080

they started it's just like a hawkeye

739

00:26:28,950 --> 00:26:26,159

radar it's got a very large range

740

00:26:30,310 --> 00:26:28,960

the further out you get the less

741

00:26:31,909 --> 00:26:30,320

accurate it is

742

00:26:34,230 --> 00:26:31,919

right and it's it's the same with any

743

00:26:37,269 --> 00:26:34,240

radar system no matter what

744

00:26:38,230 --> 00:26:37,279

technology it is the further you get to

745

00:26:41,590 --> 00:26:38,240

the end of the range

746

00:26:45,110 --> 00:26:41,600

the harder it is for you to be as

747

00:26:47,350 --> 00:26:45,120

accurate as you were close up just like

748

00:26:48,470 --> 00:26:47,360

the objection you have with the flir

749

00:26:50,630 --> 00:26:48,480

video is

750

00:26:53,269 --> 00:26:50,640

he was at max range it's a lot harder to

751
00:26:55,990 --> 00:26:53,279
be as accurate with that flir

752
00:26:57,350 --> 00:26:56,000
at max range than it is at mid range or

753
00:27:01,029 --> 00:26:57,360
up close

754
00:27:03,269 --> 00:27:01,039
yeah yeah definitely uh but

755
00:27:04,710 --> 00:27:03,279
with this you know the ballistic thing i

756
00:27:06,549 --> 00:27:04,720
think this was something that

757
00:27:09,029 --> 00:27:06,559
kevin didn't observe himself it was

758
00:27:12,230 --> 00:27:09,039
something that somebody told him later

759
00:27:14,310 --> 00:27:12,240
uh that he he said so it's not

760
00:27:15,909 --> 00:27:14,320
you know directly from the horse's mouth

761
00:27:17,269 --> 00:27:15,919
uh but if

762
00:27:18,950 --> 00:27:17,279
something like that is happening this is

763
00:27:21,029 --> 00:27:18,960

kind of a more general question

764

00:27:22,149 --> 00:27:21,039

uh to do with like all the events of the

765

00:27:25,029 --> 00:27:22,159

day

766

00:27:26,389 --> 00:27:25,039

do you think that um what do you think

767

00:27:29,750 --> 00:27:26,399

of the response

768

00:27:31,269 --> 00:27:29,760

from from command basically uh

769

00:27:33,430 --> 00:27:31,279

as what was going on because it's been

770

00:27:36,710 --> 00:27:33,440

described as as like

771

00:27:38,149 --> 00:27:36,720

an act of war uh with with radar jamming

772

00:27:40,389 --> 00:27:38,159

and things like that

773

00:27:41,830 --> 00:27:40,399

i i mean hypothetically that if you if

774

00:27:42,789 --> 00:27:41,840

you look at the basic description of

775

00:27:45,110 --> 00:27:42,799

what an act of war

776

00:27:46,230 --> 00:27:45,120

is you know some of the events that

777

00:27:49,510 --> 00:27:46,240

happened

778

00:27:52,470 --> 00:27:49,520

do fri do actually fit that criteria um

779

00:27:55,029 --> 00:27:52,480

an unknown when we're doing training

780

00:27:56,870 --> 00:27:55,039

exercises

781

00:27:59,110 --> 00:27:56,880

what we're doing is not publicized but

782

00:28:00,710 --> 00:27:59,120

where we are it's not a secret where we

783

00:28:04,070 --> 00:28:00,720

operate it's not a secret

784

00:28:06,070 --> 00:28:04,080

you know all of that area is annotated

785

00:28:07,590 --> 00:28:06,080

on almost any fishing map or any map

786

00:28:08,549 --> 00:28:07,600

you're gonna find saying stay the heck

787

00:28:10,549 --> 00:28:08,559

out

788

00:28:12,230 --> 00:28:10,559

you know it's it's devoid of air

789

00:28:13,909 --> 00:28:12,240

corridors for that same reason there's

790

00:28:15,590 --> 00:28:13,919

no reason the civilian airplane is even

791

00:28:19,269 --> 00:28:15,600

gonna get close to that

792

00:28:22,149 --> 00:28:19,279

without you know drastically being off

793

00:28:25,269 --> 00:28:24,630

that area is set aside for us to safely

794

00:28:28,070 --> 00:28:25,279

operate

795

00:28:30,310 --> 00:28:28,080

without interfering with you know

796

00:28:31,269 --> 00:28:30,320

civilian fishing boats or civilian

797

00:28:32,710 --> 00:28:31,279

aircraft

798

00:28:34,710 --> 00:28:32,720

because you're not going to want a

799

00:28:35,990 --> 00:28:34,720

civilian 737

800

00:28:38,230 --> 00:28:36,000

flying right through the middle of a

801
00:28:40,389 --> 00:28:38,240
dogfight with four f-18s something bad

802
00:28:43,269 --> 00:28:40,399
is going to happen

803
00:28:44,470 --> 00:28:43,279
it's yeah it's our way of protecting

804
00:28:47,269 --> 00:28:44,480
ourselves

805
00:28:49,269 --> 00:28:47,279
and everybody else that's why those

806
00:28:51,190 --> 00:28:49,279
operating areas exist

807
00:28:52,870 --> 00:28:51,200
you know they exist there they exist off

808
00:28:54,070 --> 00:28:52,880
the east coast they exist in a lot of

809
00:28:56,870 --> 00:28:54,080
places

810
00:28:57,190 --> 00:28:56,880
for us to safely train and it's not just

811
00:28:59,830 --> 00:28:57,200
us

812
00:29:00,470 --> 00:28:59,840
canada has their own mexico has their

813
00:29:02,389 --> 00:29:00,480

own

814

00:29:03,909 --> 00:29:02,399

you know a lot of the country with ma

815

00:29:04,630 --> 00:29:03,919

countries with major navies all have

816

00:29:06,230 --> 00:29:04,640

their

817

00:29:07,909 --> 00:29:06,240

little safe operating areas for the

818

00:29:10,549 --> 00:29:07,919

military to train

819

00:29:12,149 --> 00:29:10,559

all right so when something that's not

820

00:29:14,389 --> 00:29:12,159

supposed to be in that area

821

00:29:15,510 --> 00:29:14,399

ends up in that area a lot of red flags

822

00:29:17,830 --> 00:29:15,520

are thrown

823

00:29:22,310 --> 00:29:17,840

you know people get on alert people are

824

00:29:28,070 --> 00:29:25,350

but the way that kevin describes this uh

825

00:29:29,909 --> 00:29:28,080

is that there were these constant groups

826
00:29:30,630 --> 00:29:29,919
popping up over catalina island in the

827
00:29:33,669 --> 00:29:30,640
north

828
00:29:35,110 --> 00:29:33,679
and then flying south at 100 knots which

829
00:29:37,590 --> 00:29:35,120
is about wind speed

830
00:29:39,110 --> 00:29:37,600
uh at that altitude and then

831
00:29:42,230 --> 00:29:39,120
disappearing of

832
00:29:42,630 --> 00:29:42,240
guadalupe in the south and when they did

833
00:29:45,510 --> 00:29:42,640
this

834
00:29:48,470 --> 00:29:45,520
they they traveled right through the

835
00:29:50,549 --> 00:29:48,480
operations area

836
00:29:52,830 --> 00:29:50,559
wouldn't wouldn't they have been

837
00:29:55,669 --> 00:29:52,840
immediately intercepted the very first

838
00:29:59,269 --> 00:29:55,679

time that happened

839

00:30:01,190 --> 00:29:59,279

you would think so i would think so

840

00:30:02,710 --> 00:30:01,200

in practice i believe that's how it

841

00:30:05,590 --> 00:30:02,720

should happen

842

00:30:08,789 --> 00:30:05,600

but there's a lot of decision making on

843

00:30:10,950 --> 00:30:08,799

a lot of

844

00:30:12,549 --> 00:30:10,960

when we're in a when we're in the

845

00:30:14,630 --> 00:30:12,559

persian gulf we always have alert

846

00:30:16,470 --> 00:30:14,640

aircraft set if we're not flying

847

00:30:18,870 --> 00:30:16,480

they can get a jet off the deck in seven

848

00:30:20,389 --> 00:30:18,880

minutes or even less if they had to

849

00:30:21,990 --> 00:30:20,399

there's somebody sitting in a fighter

850

00:30:24,310 --> 00:30:22,000

jet fully armed ready

851
00:30:26,389 --> 00:30:24,320
to go and protect us if we had to one

852
00:30:29,350 --> 00:30:26,399
more training

853
00:30:31,669 --> 00:30:29,360
unless they're specifically training for

854
00:30:33,350 --> 00:30:31,679
that status for an alert status

855
00:30:35,029 --> 00:30:33,360
we don't have alert fighters set it's

856
00:30:36,389 --> 00:30:35,039
going to take a lot more than

857
00:30:37,990 --> 00:30:36,399
you know seven minutes to get an

858
00:30:40,950 --> 00:30:38,000
aircraft loaded with weapons and off

859
00:30:47,669 --> 00:30:44,389
we don't react the same way

860
00:30:51,029 --> 00:30:47,679
in a training area as we do in a

861
00:30:54,149 --> 00:30:51,039
a war zone or an open ocean zone

862
00:30:55,590 --> 00:30:54,159
so there's an obvious delay in reacting

863
00:30:58,310 --> 00:30:55,600

to anything

864

00:30:58,710 --> 00:30:58,320

yeah so do you think it was the case

865

00:31:02,870 --> 00:30:58,720

that

866

00:31:06,470 --> 00:31:02,880

radar glitches

867

00:31:08,630 --> 00:31:06,480

i'm sure it was because for

868

00:31:09,990 --> 00:31:08,640

you know the princeton is essentially

869

00:31:13,029 --> 00:31:10,000

designed around

870

00:31:15,029 --> 00:31:13,039

that spy one radar that radar is why

871

00:31:16,630 --> 00:31:15,039

that whole boat exists practically

872

00:31:18,710 --> 00:31:16,640

obviously it's got other missions and

873

00:31:20,710 --> 00:31:18,720

other capabilities but that's its

874

00:31:24,549 --> 00:31:20,720

biggest asset that's what it's for

875

00:31:27,029 --> 00:31:24,559

for them to take that radar offline

876

00:31:28,870 --> 00:31:27,039

and you know check it and go through it

877

00:31:30,789 --> 00:31:28,880

and bring it back online which is what

878

00:31:33,110 --> 00:31:30,799

gary did

879

00:31:34,950 --> 00:31:33,120

they think something was wrong there's

880

00:31:35,590 --> 00:31:34,960

no doubt about that gary will even tell

881

00:31:38,950 --> 00:31:35,600

you

882

00:31:40,389 --> 00:31:38,960

that they thought that those were errors

883

00:31:41,750 --> 00:31:40,399

in the radar essentially

884

00:31:43,590 --> 00:31:41,760

and that's why they shut it down and

885

00:31:45,750 --> 00:31:43,600

restarted everything

886

00:31:48,230 --> 00:31:45,760

when they brought it up the problem was

887

00:31:51,669 --> 00:31:48,240

now those tracks that were

888

00:31:55,110 --> 00:31:51,679

um you know 50 or 60 percent

889

00:31:59,110 --> 00:31:55,120

quality were now 90 to 100

890

00:32:00,789 --> 00:31:59,120

quality and it's hard to deny that once

891

00:32:02,310 --> 00:32:00,799

you shut it down and brought it back up

892

00:32:05,190 --> 00:32:02,320

you're now seeing all these things

893

00:32:06,789 --> 00:32:05,200

better than you were before and it's

894

00:32:08,710 --> 00:32:06,799

somewhere around there that kevin was

895

00:32:12,149 --> 00:32:08,720

then able to

896

00:32:14,950 --> 00:32:12,159

convince his commanding officer to get

897

00:32:17,190 --> 00:32:14,960

some fighters to go look at this stuff

898

00:32:21,269 --> 00:32:17,200

it's quite a while though it's about you

899

00:32:25,350 --> 00:32:23,750

yeah that the problem was is it's not

900

00:32:26,549 --> 00:32:25,360

that they were in our area or they were

901
00:32:28,230 --> 00:32:26,559
traveling through it

902
00:32:31,110 --> 00:32:28,240
they weren't bothering us they weren't

903
00:32:33,669 --> 00:32:31,120
endangering anybody they weren't

904
00:32:34,710 --> 00:32:33,679
they weren't encroaching on us exactly

905
00:32:37,830 --> 00:32:34,720
um

906
00:32:39,909 --> 00:32:37,840
mexico in the area yes yeah i mean

907
00:32:42,070 --> 00:32:39,919
so at some point somebody made a

908
00:32:43,750 --> 00:32:42,080
decision not to do anything

909
00:32:45,430 --> 00:32:43,760
you know but that's that's way above my

910
00:32:47,190 --> 00:32:45,440
head that's way above gary's head that's

911
00:32:48,630 --> 00:32:47,200
even way above kevin's head

912
00:32:50,549 --> 00:32:48,640
so i suppose that kind of leads to like

913
00:32:52,950 --> 00:32:50,559

is this a clue uh

914

00:32:53,669 --> 00:32:52,960

is this a clue that it it was actually

915

00:32:56,789 --> 00:32:53,679

something

916

00:32:59,509 --> 00:32:56,799

that the powers that be like the captain

917

00:33:00,070 --> 00:32:59,519

actually knew what it it actually was

918

00:33:04,710 --> 00:33:00,080

you know

919

00:33:05,509 --> 00:33:04,720

it's i've been asked more than once if i

920

00:33:07,190 --> 00:33:05,519

believe that

921

00:33:09,509 --> 00:33:07,200

they would test something of ours

922

00:33:11,430 --> 00:33:09,519

against us without telling us

923

00:33:13,509 --> 00:33:11,440

the answer is yes i've watched them do

924

00:33:16,789 --> 00:33:13,519

it um

925

00:33:19,110 --> 00:33:16,799

i've seen it i participated in it

926
00:33:20,149 --> 00:33:19,120
just because i don't know or just

927
00:33:21,830 --> 00:33:20,159
because

928
00:33:24,470 --> 00:33:21,840
kevin doesn't know or fragra even

929
00:33:25,990 --> 00:33:24,480
doesn't know doesn't mean

930
00:33:27,909 --> 00:33:26,000
the admiral in charge of the strike

931
00:33:30,950 --> 00:33:27,919
group doesn't know

932
00:33:32,470 --> 00:33:30,960
right i know that's interesting because

933
00:33:34,950 --> 00:33:32,480
i i think only people who would

934
00:33:35,830 --> 00:33:34,960
be told in something like that are the

935
00:33:37,590 --> 00:33:35,840
actual

936
00:33:39,029 --> 00:33:37,600
absolute critical people who needed to

937
00:33:50,230 --> 00:33:39,039
know

938
00:33:52,549 --> 00:33:50,240

deployment that was our priority that's

939

00:33:54,789 --> 00:33:52,559

what we needed to do

940

00:33:56,870 --> 00:33:54,799

so if they wanted to run something

941

00:34:00,230 --> 00:33:56,880

through our area

942

00:34:04,070 --> 00:34:00,240

to just check on their systems or

943

00:34:05,269 --> 00:34:04,080

test something it wouldn't

944

00:34:07,269 --> 00:34:05,279

they wouldn't need to tell everybody

945

00:34:09,430 --> 00:34:07,279

they'd need to tell a select few group

946

00:34:11,190 --> 00:34:09,440

of people and that's all who would know

947

00:34:12,950 --> 00:34:11,200

so it's very possible they could be

948

00:34:13,349 --> 00:34:12,960

testing something on us and that's why i

949

00:34:16,389 --> 00:34:13,359

leaned

950

00:34:19,349 --> 00:34:16,399

towards it being something of ours and i

951
00:34:23,109 --> 00:34:21,190
it's extraterrestrial i've seen them

952
00:34:26,230 --> 00:34:23,119
test it i've

953
00:34:28,629 --> 00:34:26,240
participated testing you know i spent

954
00:34:30,230 --> 00:34:28,639
three days sitting in a trailer

955
00:34:31,909 --> 00:34:30,240
somewhere on the east coast

956
00:34:35,030 --> 00:34:31,919
watching the learjet go up and down the

957
00:34:36,310 --> 00:34:35,040
coast playing a bad gun just as testing

958
00:34:38,710 --> 00:34:36,320
but the only people who knew what that

959
00:34:39,909 --> 00:34:38,720
leader jet were doing were maybe six of

960
00:34:42,149 --> 00:34:39,919
us

961
00:34:42,950 --> 00:34:42,159
you know it was traveling over naval

962
00:34:45,190 --> 00:34:42,960
stations and

963
00:34:48,069 --> 00:34:45,200

over carrier strike groups it was doing

964

00:34:49,430 --> 00:34:48,079

stuff but everybody doesn't know

965

00:34:51,109 --> 00:34:49,440

because they have no need to know it's

966

00:34:52,629 --> 00:34:51,119

not endangering them it's not hurting

967

00:34:54,389 --> 00:34:52,639

them it's not going to interfere with

968

00:34:56,149 --> 00:34:54,399

what they're doing

969

00:34:58,150 --> 00:34:56,159

so if something like that is happening

970

00:35:00,230 --> 00:34:58,160

and yeah this this

971

00:35:02,230 --> 00:35:00,240

this experiment whatever is flying over

972

00:35:03,270 --> 00:35:02,240

the the top of the group wouldn't there

973

00:35:06,630 --> 00:35:03,280

be a way for

974

00:35:06,950 --> 00:35:06,640

if someone had concerns to you know kind

975

00:35:10,230 --> 00:35:06,960

of

976
00:35:11,670 --> 00:35:10,240
escalate the inquiry and uh and and ask

977
00:35:14,150 --> 00:35:11,680
like are you guessing something in the

978
00:35:17,190 --> 00:35:14,160
area the question is if anybody thought

979
00:35:19,109 --> 00:35:17,200
to even ask that um

980
00:35:22,390 --> 00:35:19,119
but it would go up the chain of command

981
00:35:27,910 --> 00:35:25,670
essentially kevin day raised the concern

982
00:35:31,670 --> 00:35:27,920
kevin went to his commanding officer his

983
00:35:33,430 --> 00:35:31,680
commanding officer didn't just

984
00:35:35,670 --> 00:35:33,440
say okay you can take control of those

985
00:35:37,990 --> 00:35:35,680
fighters at some point he checked with

986
00:35:40,390 --> 00:35:38,000
somebody to get that decision made

987
00:35:41,750 --> 00:35:40,400
and he would have gone to whoever's

988
00:35:43,589 --> 00:35:41,760

right above him

989

00:35:44,950 --> 00:35:43,599

somebody in the strike group and

990

00:35:46,550 --> 00:35:44,960

somebody in that strike group might have

991

00:35:48,069 --> 00:35:46,560

already known what was going on and said

992

00:35:48,950 --> 00:35:48,079

go ahead or might have asked somebody

993

00:35:50,550 --> 00:35:48,960

else

994

00:35:51,910 --> 00:35:50,560

but they would have gone up the the

995

00:35:53,349 --> 00:35:51,920

chain of command until they reached

996

00:35:54,550 --> 00:35:53,359

somebody who had a clue what was going

997

00:35:56,470 --> 00:35:54,560

on

998

00:35:57,670 --> 00:35:56,480

and it would have either kept going up

999

00:35:58,950 --> 00:35:57,680

till they found somebody or it would

1000

00:36:01,349 --> 00:35:58,960

have been stopped at some point because

1001
00:36:03,430 --> 00:36:01,359
somebody knew what was going on

1002
00:36:04,870 --> 00:36:03,440
or it's entirely possible nobody knew

1003
00:36:05,510 --> 00:36:04,880
what's going on and that's why they gave

1004
00:36:15,670 --> 00:36:05,520
the

1005
00:36:18,310 --> 00:36:15,680
it gets vectored out to it uh by

1006
00:36:20,630 --> 00:36:18,320
the princeton by kevin essentially or

1007
00:36:23,829 --> 00:36:20,640
kevin's uh controller guy

1008
00:36:27,829 --> 00:36:23,839
and then they arrive there and

1009
00:36:30,230 --> 00:36:27,839
uh there's some uh

1010
00:36:32,630 --> 00:36:30,240
discrepancies you know did you did you

1011
00:36:35,589 --> 00:36:32,640
see the whole thing i did with kevin

1012
00:36:37,349 --> 00:36:35,599
i have watched a good question okay so

1013
00:36:39,270 --> 00:36:37,359

kevin describes the initial encounter a

1014

00:36:40,069 --> 00:36:39,280

bit differently to how fraga describes

1015

00:36:41,510 --> 00:36:40,079

it

1016

00:36:43,190 --> 00:36:41,520

i mean obviously you wouldn't be able to

1017

00:36:44,470 --> 00:36:43,200

resolve this but it's kind of is this

1018

00:36:46,630 --> 00:36:44,480

something you've talked about with

1019

00:36:48,390 --> 00:36:46,640

with with kevin and the guys about these

1020

00:36:49,430 --> 00:36:48,400

differences like kevin describes it as

1021

00:36:54,950 --> 00:36:49,440

the

1022

00:36:56,870 --> 00:36:54,960

object is actually at his altitude and

1023

00:36:58,790 --> 00:36:56,880

then the object flies down

1024

00:37:02,470 --> 00:36:58,800

and then fraga follows it down which is

1025

00:37:02,480 --> 00:37:07,589

i hate to say it none of us

1026
00:37:11,510 --> 00:37:09,829
believe favor is lying you know we

1027
00:37:12,870 --> 00:37:11,520
we've talked about that man at length

1028
00:37:14,230 --> 00:37:12,880
we've tried to reach out to him we've

1029
00:37:16,630 --> 00:37:14,240
tried to talk to him

1030
00:37:17,430 --> 00:37:16,640
he wants nothing to do with us we all

1031
00:37:20,470 --> 00:37:17,440
came out

1032
00:37:22,550 --> 00:37:20,480
to support what he said we all opened

1033
00:37:24,630 --> 00:37:22,560
our mouths because we saw what he was

1034
00:37:26,790 --> 00:37:24,640
doing and we wanted to

1035
00:37:28,310 --> 00:37:26,800
obviously not directly support him but

1036
00:37:30,470 --> 00:37:28,320
support the whole narrative of what

1037
00:37:31,829 --> 00:37:30,480
happened to get to the truth you know

1038
00:37:34,829 --> 00:37:31,839

that's why any of us have opened our

1039

00:37:39,349 --> 00:37:37,910

it's fraber is looking at it from one

1040

00:37:41,349 --> 00:37:39,359

point of view

1041

00:37:42,710 --> 00:37:41,359

kevin is looking at it from an entire

1042

00:37:44,470 --> 00:37:42,720

different point of view

1043

00:37:46,710 --> 00:37:44,480

and the two of them have two complete

1044

00:37:47,670 --> 00:37:46,720

set completely different sets of

1045

00:37:50,790 --> 00:37:47,680

training

1046

00:37:51,910 --> 00:37:50,800

behind how they make their observations

1047

00:37:54,310 --> 00:37:51,920

they're not going to look at the

1048

00:37:56,069 --> 00:37:54,320

situation exactly the same

1049

00:37:58,790 --> 00:37:56,079

they're not going to recall it exactly

1050

00:38:00,790 --> 00:37:58,800

the same even though it may be the exact

1051

00:38:02,630 --> 00:38:00,800

situation that happened

1052

00:38:04,150 --> 00:38:02,640

they're not going to say it the same way

1053

00:38:05,990 --> 00:38:04,160

because they have two different ways of

1054

00:38:07,910 --> 00:38:06,000

looking at everything yeah yeah

1055

00:38:11,030 --> 00:38:07,920

kevin has an advantage kevin actually

1056

00:38:15,190 --> 00:38:11,040

went to top gun

1057

00:38:17,349 --> 00:38:15,200

kevin got a good chunk of

1058

00:38:19,270 --> 00:38:17,359

that pilot not the direct pilot training

1059

00:38:20,550 --> 00:38:19,280

but a good chunk of learning what those

1060

00:38:23,510 --> 00:38:20,560

pilots

1061

00:38:25,670 --> 00:38:23,520

did and saw and how they observe things

1062

00:38:28,470 --> 00:38:25,680

fravor has no idea

1063

00:38:30,310 --> 00:38:28,480

what kevin's job is favor has no idea

1064

00:38:32,790 --> 00:38:30,320

how kevin does his job

1065

00:38:34,550 --> 00:38:32,800

faber has no idea how kevin is going to

1066

00:38:37,670 --> 00:38:34,560

interpret any of that

1067

00:38:39,109 --> 00:38:37,680

all he knows about kevin day is he's the

1068

00:38:40,230 --> 00:38:39,119

guy i'm talking to on the other end of

1069

00:38:42,550 --> 00:38:40,240

the radar

1070

00:38:43,670 --> 00:38:42,560

and i'm just supposed to essentially do

1071

00:38:46,069 --> 00:38:43,680

what he tells me unless it's going to

1072

00:38:48,790 --> 00:38:46,079

endanger my aircraft

1073

00:38:51,270 --> 00:38:48,800

that's what fraver knows about kevin so

1074

00:38:52,950 --> 00:38:51,280

it's not that either of them are wrong

1075

00:38:54,870 --> 00:38:52,960

it's they're looking at it from two

1076

00:38:57,349 --> 00:38:54,880

different points of view

1077

00:38:58,710 --> 00:38:57,359

so there's gonna be some variation in

1078

00:39:01,030 --> 00:38:58,720

what they've said

1079

00:39:02,150 --> 00:39:01,040

yeah but this particular variation

1080

00:39:03,910 --> 00:39:02,160

wasn't just like

1081

00:39:06,230 --> 00:39:03,920

kevin's perspective this is kevin

1082

00:39:07,670 --> 00:39:06,240

remembering what fraver told him

1083

00:39:09,589 --> 00:39:07,680

uh later when they were back at the

1084

00:39:12,550 --> 00:39:09,599

beach

1085

00:39:14,150 --> 00:39:12,560

uh so it's it's it's kind of a you know

1086

00:39:14,790 --> 00:39:14,160

a difference in recollection really

1087

00:39:17,109 --> 00:39:14,800

really the

1088

00:39:17,990 --> 00:39:17,119

difference in perspective uh on that

1089

00:39:19,990 --> 00:39:18,000

particular thing which is

1090

00:39:21,030 --> 00:39:20,000

quite understandable i must say over

1091

00:39:23,430 --> 00:39:21,040

such a long time

1092

00:39:25,430 --> 00:39:23,440

and it's been what 14 years now give or

1093

00:39:27,349 --> 00:39:25,440

take 15 somewhere in there

1094

00:39:30,230 --> 00:39:27,359

i would like to think everything i say

1095

00:39:32,470 --> 00:39:30,240

is as accurate as it was

1096

00:39:34,230 --> 00:39:32,480

you know when the event happened but i

1097

00:39:35,030 --> 00:39:34,240

know i've gotten some details wrong here

1098

00:39:38,150 --> 00:39:35,040

and there

1099

00:39:39,990 --> 00:39:38,160

i correct myself when

1100

00:39:41,349 --> 00:39:40,000

i know for a fact that i said something

1101
00:39:42,710 --> 00:39:41,359
wrong and it's not the first time i've

1102
00:39:45,990 --> 00:39:42,720
corrected myself

1103
00:39:47,589 --> 00:39:46,000
you know it's there's certain parts of

1104
00:39:49,190 --> 00:39:47,599
the story that i just didn't remember

1105
00:39:50,710 --> 00:39:49,200
the only way i know the details is

1106
00:39:52,630 --> 00:39:50,720
because i've spoken with other people to

1107
00:39:55,190 --> 00:39:52,640
kind of fill in the blanks to

1108
00:39:56,230 --> 00:39:55,200
what i know yeah it's a shame that

1109
00:39:58,790 --> 00:39:56,240
fravor won't uh

1110
00:40:00,069 --> 00:39:58,800
won't really talk to more people outside

1111
00:40:04,790 --> 00:40:00,079
of uh you know the the kind of the

1112
00:40:10,230 --> 00:40:08,630
i've got his home address and his email

1113
00:40:11,670 --> 00:40:10,240

i haven't called him because you know i

1114

00:40:13,670 --> 00:40:11,680

don't want to be rude to the guy

1115

00:40:14,790 --> 00:40:13,680

but i sent him a very nice polite email

1116

00:40:16,470 --> 00:40:14,800

saying hey

1117

00:40:18,550 --> 00:40:16,480

you're not far from me it's a couple

1118

00:40:20,550 --> 00:40:18,560

hour drive i'll i will

1119

00:40:23,670 --> 00:40:20,560

grab a case of beer i will come up i

1120

00:40:26,950 --> 00:40:23,680

will you know we can talk about it

1121

00:40:28,630 --> 00:40:26,960

nothing no expectations about anything

1122

00:40:30,630 --> 00:40:28,640

but we just want to you know learn and

1123

00:40:34,230 --> 00:40:30,640

reach out so you know

1124

00:40:36,230 --> 00:40:34,240

there's more than just you but you know

1125

00:40:37,750 --> 00:40:36,240

he just wants nothing to do with us for

1126

00:40:40,630 --> 00:40:37,760

some reason

1127

00:40:42,470 --> 00:40:40,640

yeah it's just a shame uh because my big

1128

00:40:44,069 --> 00:40:42,480

issue with fravor is not that he doesn't

1129

00:40:47,670 --> 00:40:44,079

want to talk to us

1130

00:40:50,710 --> 00:40:47,680

because he a long time ago spoke to paco

1131

00:40:52,470 --> 00:40:50,720

carey i can never say his last name and

1132

00:40:56,870 --> 00:40:52,480

now paco goes everywhere

1133

00:40:57,589 --> 00:40:56,880

and and and retells favorite story but

1134

00:41:00,390 --> 00:40:57,599

he's got

1135

00:41:01,190 --> 00:41:00,400

nothing to do with it and people take

1136

00:41:04,550 --> 00:41:01,200

his word as

1137

00:41:07,990 --> 00:41:04,560

you know gospel and drives me nuts right

1138

00:41:09,829 --> 00:41:08,000

you know paco it's kind of funny when i

1139

00:41:11,990 --> 00:41:09,839

first reached out to dave beatty

1140

00:41:13,670 --> 00:41:12,000

i only reached out to him because he he

1141

00:41:14,950 --> 00:41:13,680

said at the end of his documentary his

1142

00:41:16,470 --> 00:41:14,960

initial version

1143

00:41:18,550 --> 00:41:16,480

you know hey if you know anything reach

1144

00:41:20,870 --> 00:41:18,560

out and you know i just wanted to reach

1145

00:41:22,630 --> 00:41:20,880

out and say hey you know here's a short

1146

00:41:25,670 --> 00:41:22,640

little tiny part of the story you don't

1147

00:41:27,190 --> 00:41:25,680

know and that's how i got involved and

1148

00:41:28,870 --> 00:41:27,200

he then put me in touch with gary and

1149

00:41:32,069 --> 00:41:28,880

kevin and everybody

1150

00:41:35,030 --> 00:41:32,079

um but when i initially

1151
00:41:36,069 --> 00:41:35,040
did that it's trying to remember what i

1152
00:41:42,630 --> 00:41:36,079
was going to say

1153
00:41:44,950 --> 00:41:42,640
when he fraver or dave beatty didn't

1154
00:41:47,990 --> 00:41:44,960
want to just take my word for it

1155
00:41:50,309 --> 00:41:48,000
he wanted to try and essentially

1156
00:41:51,589 --> 00:41:50,319
make me prove i knew what i was saying

1157
00:41:54,630 --> 00:41:51,599
that i was i was

1158
00:41:56,230 --> 00:41:54,640
authentic and i don't blame him you know

1159
00:41:57,670 --> 00:41:56,240
you don't want to just take you know

1160
00:41:58,950 --> 00:41:57,680
anybody's word for it

1161
00:42:01,670 --> 00:41:58,960
you want to get some kind of

1162
00:42:03,030 --> 00:42:01,680
verification that's how he got in touch

1163
00:42:07,349 --> 00:42:03,040

with

1164

00:42:08,710 --> 00:42:07,359

he could essentially independently

1165

00:42:10,309 --> 00:42:08,720

verify

1166

00:42:12,470 --> 00:42:10,319

you know everything i was saying so he's

1167

00:42:15,750 --> 00:42:12,480

not just taking my word for it

1168

00:42:17,670 --> 00:42:15,760

but in our initial conversations

1169

00:42:19,829 --> 00:42:17,680

i would kind of tell dave beatty

1170

00:42:22,790 --> 00:42:19,839

something he'd come back to me and say

1171

00:42:24,790 --> 00:42:22,800

well paco said there's no windows in a

1172

00:42:27,990 --> 00:42:24,800

hawkins

1173

00:42:28,870 --> 00:42:28,000

well that that that's almost a direct

1174

00:42:31,910 --> 00:42:28,880

quote

1175

00:42:35,670 --> 00:42:31,920

i simply sent dave back a video

1176
00:42:37,270 --> 00:42:35,680
of not only the windows in the back of

1177
00:42:38,630 --> 00:42:37,280
the hawkeye being open

1178
00:42:39,910 --> 00:42:38,640
because they're little flaps you can

1179
00:42:40,950 --> 00:42:39,920
close the windows in the back of the

1180
00:42:42,150 --> 00:42:40,960
hawkeye

1181
00:42:44,390 --> 00:42:42,160
when the radar is operating they

1182
00:42:47,109 --> 00:42:44,400
normally have those windows closed

1183
00:42:49,270 --> 00:42:47,119
but they can be open so i sent him a

1184
00:42:51,510 --> 00:42:49,280
video of those windows being open

1185
00:42:53,109 --> 00:42:51,520
you know everything i was telling dave

1186
00:42:54,870 --> 00:42:53,119
dave was trying to verify

1187
00:42:56,309 --> 00:42:54,880
paco kept telling him i was wrong i was

1188
00:42:58,870 --> 00:42:56,319

wrong i was wrong

1189

00:43:00,950 --> 00:42:58,880

and i just kept sending tafe baby photo

1190

00:43:01,750 --> 00:43:00,960

or video or evidence to support i was

1191

00:43:03,589 --> 00:43:01,760

saying

1192

00:43:05,750 --> 00:43:03,599

and that's why i don't like paco being

1193

00:43:07,670 --> 00:43:05,760

involved in any of this because

1194

00:43:09,190 --> 00:43:07,680

all he wants to do is believe favor and

1195

00:43:11,270 --> 00:43:09,200

say what fragrance said

1196

00:43:12,710 --> 00:43:11,280

right but that was a little yeah that's

1197

00:43:15,750 --> 00:43:12,720

a shame it's a shame that

1198

00:43:17,589 --> 00:43:15,760

it's uh no that's fine it's uh like you

1199

00:43:19,430 --> 00:43:17,599

know obviously um

1200

00:43:21,109 --> 00:43:19,440

there's lots of different people

1201

00:43:23,910 --> 00:43:21,119

involved in this uh

1202

00:43:25,910 --> 00:43:23,920

and lots of different opinions and i

1203

00:43:28,069 --> 00:43:25,920

think it's it would be good if we could

1204

00:43:29,589 --> 00:43:28,079

have them get together and talk about it

1205

00:43:31,030 --> 00:43:29,599

i know you've you've been in uh

1206

00:43:32,790 --> 00:43:31,040

discussions where it's like but it's

1207

00:43:33,430 --> 00:43:32,800

like you and the guys like you and gary

1208

00:43:35,510 --> 00:43:33,440

and uh

1209

00:43:36,470 --> 00:43:35,520

and kevin day and then kind of on the

1210

00:43:40,069 --> 00:43:36,480

other side you've got

1211

00:43:42,390 --> 00:43:40,079

like uh fraver and chad underwood

1212

00:43:43,510 --> 00:43:42,400

uh and you know i've tried to talk to

1213

00:43:46,630 --> 00:43:43,520

them because

1214

00:43:49,270 --> 00:43:46,640

i'll be honest chad underwood

1215

00:43:51,750 --> 00:43:49,280

basically we he did reach out to us and

1216

00:43:54,470 --> 00:43:51,760

we did have a very

1217

00:43:56,309 --> 00:43:54,480

short collective discussion with him

1218

00:43:57,990 --> 00:43:56,319

through dave beatty

1219

00:43:59,829 --> 00:43:58,000

uh at least i think it was through dave

1220

00:44:02,069 --> 00:43:59,839

it was through somebody at this point

1221

00:44:03,190 --> 00:44:02,079

but he just wanted to get his portion of

1222

00:44:04,790 --> 00:44:03,200

the story out

1223

00:44:06,950 --> 00:44:04,800

and be done with it he didn't want to

1224

00:44:07,990 --> 00:44:06,960

keep going with it he didn't want to you

1225

00:44:11,270 --> 00:44:08,000

know keep discussing

1226

00:44:14,069 --> 00:44:11,280

it um but he at least

1227

00:44:15,430 --> 00:44:14,079

spoke to us even if it was briefly so

1228

00:44:17,190 --> 00:44:15,440

i'll give him that much

1229

00:44:18,710 --> 00:44:17,200

and like the female fighter pilot i know

1230

00:44:20,550 --> 00:44:18,720

for a fact of who that is i've had many

1231

00:44:23,829 --> 00:44:20,560

conversations with that lady on the ship

1232

00:44:26,150 --> 00:44:23,839

oh yeah but again doesn't want to come

1233

00:44:28,230 --> 00:44:26,160

forward

1234

00:44:29,910 --> 00:44:28,240

i know the entire hawkeye crew and who

1235

00:44:31,109 --> 00:44:29,920

was flying and

1236

00:44:32,630 --> 00:44:31,119

none of them want to come forward

1237

00:44:34,470 --> 00:44:32,640

because they don't want to deal with any

1238

00:44:37,430 --> 00:44:34,480

of the

1239

00:44:40,390 --> 00:44:37,440

potential repercussions for the things

1240

00:44:41,750 --> 00:44:40,400

that they are currently doing

1241

00:44:43,829 --> 00:44:41,760

well they they've obviously signed an

1242

00:44:45,750 --> 00:44:43,839

nda as well but the female pilot

1243

00:44:47,430 --> 00:44:45,760

do you know what her her reason is

1244

00:44:48,069 --> 00:44:47,440

exactly i mean i've heard that she's got

1245

00:44:59,990 --> 00:44:48,079

a

1246

00:45:02,069 --> 00:45:00,000

before

1247

00:45:04,230 --> 00:45:02,079

when you know i first got involved and

1248

00:45:06,710 --> 00:45:04,240

then she decided

1249

00:45:07,430 --> 00:45:06,720

with fravor's pushing as far as i can

1250

00:45:10,790 --> 00:45:07,440

tell

1251
00:45:13,270 --> 00:45:10,800
to do unidentified um but they obviously

1252
00:45:16,829 --> 00:45:13,280
kept her identity

1253
00:45:20,230 --> 00:45:16,839
secret but i'll be brutally honest

1254
00:45:20,710 --> 00:45:20,240
if someone took the time to figure out

1255
00:45:23,829 --> 00:45:20,720
who she

1256
00:45:25,829 --> 00:45:23,839
is it's very easy to do

1257
00:45:28,150 --> 00:45:25,839
yeah nobody just wants to put two

1258
00:45:31,109 --> 00:45:28,160
together

1259
00:45:33,030 --> 00:45:31,119
nobody wants to find that out no and

1260
00:45:34,150 --> 00:45:33,040
everyone's being very polite and uh it's

1261
00:45:35,829 --> 00:45:34,160
great i think

1262
00:45:37,190 --> 00:45:35,839
that's all we can request is respecting

1263
00:45:40,069 --> 00:45:37,200

her privacy

1264

00:45:40,710 --> 00:45:40,079

i i did email her asking her uh if she

1265

00:45:43,670 --> 00:45:40,720

would

1266

00:45:45,589 --> 00:45:43,680

uh you know be interviewed anonymously

1267

00:45:46,870 --> 00:45:45,599

but she initially responded which is you

1268

00:45:47,910 --> 00:45:46,880

know it's fine it's understandable

1269

00:45:50,790 --> 00:45:47,920

people

1270

00:45:51,910 --> 00:45:50,800

don't want to uh get involved in things

1271

00:45:55,510 --> 00:45:51,920

like this because in a way

1272

00:45:58,870 --> 00:45:55,520

it's a media circus and i know uh was it

1273

00:46:02,230 --> 00:45:58,880

um commander slay uh

1274

00:46:05,829 --> 00:46:02,240

slate it's late right yeah he

1275

00:46:09,430 --> 00:46:05,839

he was he was the the wizzo on

1276
00:46:12,150 --> 00:46:09,440
fravis plane the weapon systems operator

1277
00:46:12,710 --> 00:46:12,160
and i think he went on this one fox news

1278
00:46:14,790 --> 00:46:12,720
interview

1279
00:46:16,309 --> 00:46:14,800
view but it was kind of almost like a

1280
00:46:18,230 --> 00:46:16,319
hit piece because the guy

1281
00:46:20,069 --> 00:46:18,240
interviewing them did this this silly

1282
00:46:20,710 --> 00:46:20,079
thing beforehand where he was making

1283
00:46:24,390 --> 00:46:20,720
jokes about

1284
00:46:26,950 --> 00:46:24,400
aliens uh oh yes and they just

1285
00:46:29,030 --> 00:46:26,960
i'll be honest i've done what two

1286
00:46:30,710 --> 00:46:29,040
television shows now

1287
00:46:32,630 --> 00:46:30,720
one being identified which was season

1288
00:46:34,550 --> 00:46:32,640

two and the other was the one william

1289

00:46:37,109 --> 00:46:34,560

shatner does

1290

00:46:38,550 --> 00:46:37,119

the only reason i agreed to do

1291

00:46:40,309 --> 00:46:38,560

unidentified

1292

00:46:42,309 --> 00:46:40,319

aside from the fact that gary and kevin

1293

00:46:44,710 --> 00:46:42,319

had already done it was i wanted to have

1294

00:46:46,470 --> 00:46:44,720

a sit down conversation with lou

1295

00:46:48,870 --> 00:46:46,480

all right and my conversation with lou

1296

00:46:50,710 --> 00:46:48,880

elizondo was a lot longer than

1297

00:46:52,790 --> 00:46:50,720

what was shown and how they portrayed it

1298

00:46:54,309 --> 00:46:52,800

on the tv i don't really care how they

1299

00:46:55,750 --> 00:46:54,319

portrayed it on the tv i wanted the

1300

00:46:57,510 --> 00:46:55,760

conversation with lou

1301
00:46:59,910 --> 00:46:57,520
and i got several answers that i hadn't

1302
00:47:03,109 --> 00:46:59,920
gotten before directly from lou

1303
00:47:04,710 --> 00:47:03,119
through that anything you can share

1304
00:47:07,270 --> 00:47:04,720
i mean it's nothing secret i've shared

1305
00:47:11,190 --> 00:47:07,280
it before you know i never knew

1306
00:47:12,790 --> 00:47:11,200
where my bricks went other than

1307
00:47:14,309 --> 00:47:12,800
they got taken i never knew where they

1308
00:47:15,910 --> 00:47:14,319
went lou did

1309
00:47:17,349 --> 00:47:15,920
lou knew the answer he knew exactly

1310
00:47:18,470 --> 00:47:17,359
where they went he knew exactly what i

1311
00:47:21,270 --> 00:47:18,480
was talking about

1312
00:47:25,270 --> 00:47:21,280
before i even broached the subject they

1313
00:47:27,829 --> 00:47:25,280

were taken and they were used to make

1314

00:47:30,150 --> 00:47:27,839

briefings for senior dod officials he

1315

00:47:31,430 --> 00:47:30,160

wouldn't tell me exactly who was briefed

1316

00:47:33,270 --> 00:47:31,440

can't blame him it's probably not

1317

00:47:35,510 --> 00:47:33,280

something he's supposed to share but the

1318

00:47:39,190 --> 00:47:35,520

fact that he knew

1319

00:47:44,230 --> 00:47:39,200

and he was able to tell me in such a way

1320

00:47:46,069 --> 00:47:44,240

that he knew what was on those bricks

1321

00:47:48,470 --> 00:47:46,079

and he wouldn't have known what was on

1322

00:47:50,150 --> 00:47:48,480

those bricks if he didn't actually know

1323

00:47:52,069 --> 00:47:50,160

what happened to them

1324

00:47:53,430 --> 00:47:52,079

because it's not something that he would

1325

00:47:57,190 --> 00:47:53,440

have just known

1326

00:47:59,430 --> 00:47:57,200

um does he know the classified portion

1327

00:48:01,990 --> 00:47:59,440

that you were discussing earlier

1328

00:48:03,910 --> 00:48:02,000

like i said he knew he knew the answers

1329

00:48:05,589 --> 00:48:03,920

that he shouldn't have known

1330

00:48:07,109 --> 00:48:05,599

if he didn't actually have access to

1331

00:48:09,190 --> 00:48:07,119

those at some point

1332

00:48:10,710 --> 00:48:09,200

so it was like i said i wanted the

1333

00:48:11,990 --> 00:48:10,720

conversation with lou i could have cared

1334

00:48:13,589 --> 00:48:12,000

less about the television

1335

00:48:15,109 --> 00:48:13,599

i mean it was a novelty it was nice it

1336

00:48:16,630 --> 00:48:15,119

was kind of fun but

1337

00:48:19,750 --> 00:48:16,640

i wanted the conversation with louis

1338

00:48:23,270 --> 00:48:19,760

alessandro yeah that's what

1339

00:48:26,309 --> 00:48:23,280

at that time i just go ahead no go ahead

1340

00:48:27,990 --> 00:48:26,319

so at that time lou was still part of to

1341

00:48:31,270 --> 00:48:28,000

the stars academy

1342

00:48:34,069 --> 00:48:31,280

uh which is the tom de long

1343

00:48:35,910 --> 00:48:34,079

and and others organization which in in

1344

00:48:37,990 --> 00:48:35,920

a large part i think is is responsible

1345

00:48:40,069 --> 00:48:38,000

for the the media interest because they

1346

00:48:41,430 --> 00:48:40,079

they promoted stuff and they they

1347

00:48:45,109 --> 00:48:41,440

essentially worked with

1348

00:48:47,190 --> 00:48:45,119

uh leslie keane and ralph blumenthal

1349

00:48:49,030 --> 00:48:47,200

at the new york times and doing the

1350

00:48:52,230 --> 00:48:49,040

publicity

1351

00:48:53,430 --> 00:48:52,240

uh what what's your opinion of to the

1352

00:48:55,990 --> 00:48:53,440

stars academy

1353

00:48:56,790 --> 00:48:56,000

like i guess then and now because now

1354

00:48:59,589 --> 00:48:56,800

they've kind of

1355

00:49:01,109 --> 00:48:59,599

broken up a little bit and so now i have

1356

00:49:04,790 --> 00:49:01,119

no clue what to tell you about them

1357

00:49:06,950 --> 00:49:04,800

right but then it was they at least had

1358

00:49:09,349 --> 00:49:06,960

an objective to try and

1359

00:49:10,870 --> 00:49:09,359

i never quite had a solid grasp on what

1360

00:49:14,390 --> 00:49:10,880

their overall

1361

00:49:17,510 --> 00:49:14,400

intention was but

1362

00:49:19,109 --> 00:49:17,520

through them a lot of information was

1363

00:49:20,790 --> 00:49:19,119

able to be released a lot of information

1364

00:49:22,549 --> 00:49:20,800

was able to be discovered

1365

00:49:24,150 --> 00:49:22,559

even if they didn't do the direct work

1366

00:49:25,910 --> 00:49:24,160

themselves

1367

00:49:28,630 --> 00:49:25,920

you know guys like dave beatty and tim

1368

00:49:31,270 --> 00:49:28,640

mcmillan wouldn't have been able to

1369

00:49:32,390 --> 00:49:31,280

dig up a lot of the information they had

1370

00:49:35,589 --> 00:49:32,400

without at least

1371

00:49:38,470 --> 00:49:35,599

to the stars starting

1372

00:49:40,390 --> 00:49:38,480

right you know i i have no idea what

1373

00:49:41,910 --> 00:49:40,400

their like i said overall mission was or

1374

00:49:43,750 --> 00:49:41,920

what their intention was

1375

00:49:44,420 --> 00:49:43,760

or what their goal was i don't really

1376

00:49:45,990 --> 00:49:44,430

care

1377

00:49:47,990 --> 00:49:46,000

[Music]

1378

00:49:49,109 --> 00:49:48,000

but they got a lot of this started in my

1379

00:49:52,069 --> 00:49:49,119

opinion and that's

1380

00:49:53,270 --> 00:49:52,079

a good thing yeah it's certainly been

1381

00:49:55,270 --> 00:49:53,280

very interesting

1382

00:49:58,069 --> 00:49:55,280

because of them and uh you know

1383

00:50:00,069 --> 00:49:58,079

essentially it's the three videos

1384

00:50:01,829 --> 00:50:00,079

you know fragrance video and fragrance

1385

00:50:04,390 --> 00:50:01,839

account was actually out there before

1386

00:50:06,790 --> 00:50:04,400

uh tsa came along they just kind of

1387

00:50:09,270 --> 00:50:06,800

bumped it up in the public awareness and

1388

00:50:11,589 --> 00:50:09,280

made it more real i think by by uh you

1389

00:50:13,750 --> 00:50:11,599

know having some kind of official link

1390

00:50:15,109 --> 00:50:13,760

with uh you know and eventually getting

1391

00:50:17,750 --> 00:50:15,119

the navy to admit that the

1392

00:50:19,109 --> 00:50:17,760

they were actually navy videos like i

1393

00:50:20,950 --> 00:50:19,119

said i think they just lended some

1394

00:50:24,150 --> 00:50:20,960

credibility to it all

1395

00:50:25,589 --> 00:50:24,160

yeah yeah uh so i

1396

00:50:27,990 --> 00:50:25,599

with underwater's encounter underwater

1397

00:50:30,309 --> 00:50:28,000

was the guy who filmed the

1398

00:50:32,230 --> 00:50:30,319

the whole thing uh filmed the you know

1399

00:50:34,630 --> 00:50:32,240

the famous video of this little

1400

00:50:36,390 --> 00:50:34,640

rather fuzzy thing in the distance uh

1401

00:50:38,710 --> 00:50:36,400

which is a subject of great debate

1402

00:50:40,069 --> 00:50:38,720

which i'm i i contribute to quite a bit

1403

00:50:42,150 --> 00:50:40,079

with oh yeah my

1404

00:50:44,150 --> 00:50:42,160

my youtube analysis that is honestly

1405

00:50:45,510 --> 00:50:44,160

something that needs to be debated

1406

00:50:47,910 --> 00:50:45,520

i don't necessarily agree with

1407

00:50:50,150 --> 00:50:47,920

everything that certain people have said

1408

00:50:52,069 --> 00:50:50,160

but the only way we're gonna get to the

1409

00:50:52,790 --> 00:50:52,079

truth about that is by dissecting it as

1410

00:50:55,910 --> 00:50:52,800

much as we

1411

00:50:56,309 --> 00:50:55,920

yeah which is kind of where you and i

1412

00:50:57,670 --> 00:50:56,319

all

1413

00:50:59,349 --> 00:50:57,680

definitely don't agree on everything

1414

00:51:00,710 --> 00:50:59,359

that's that's not a secret to anybody

1415

00:51:03,990 --> 00:51:00,720

who's followed twitter

1416

00:51:07,510 --> 00:51:04,000

but you've at least tried to stay

1417

00:51:09,030 --> 00:51:07,520

relatively grounded in your

1418

00:51:10,870 --> 00:51:09,040

in your intention to figure out what

1419

00:51:12,470 --> 00:51:10,880

that object is

1420

00:51:14,790 --> 00:51:12,480

you know versus some other people who

1421

00:51:16,630 --> 00:51:14,800

are just throwing wild accusations out

1422

00:51:19,750 --> 00:51:16,640

there

1423

00:51:21,670 --> 00:51:19,760

yes i i you know i i would admit that

1424

00:51:22,790 --> 00:51:21,680

like the navy i have not identified

1425

00:51:24,710 --> 00:51:22,800

these objects

1426

00:51:26,870 --> 00:51:24,720

uh i've just you know essentially put

1427

00:51:27,750 --> 00:51:26,880

out hypotheses as to what i think they

1428

00:51:30,309 --> 00:51:27,760

might be

1429

00:51:31,990 --> 00:51:30,319

and i i guess pointed out things that

1430

00:51:34,309 --> 00:51:32,000

other people have claimed

1431

00:51:35,670 --> 00:51:34,319

that i think are wrong like with with

1432

00:51:36,870 --> 00:51:35,680

underwood's video

1433

00:51:38,710 --> 00:51:36,880

and this is something that underwood

1434

00:51:41,510 --> 00:51:38,720

himself believes is the

1435

00:51:43,030 --> 00:51:41,520

at the end of the video uh when it goes

1436

00:51:45,030 --> 00:51:43,040

off to the left

1437

00:51:47,589 --> 00:51:45,040

he's saying that's because it

1438

00:51:50,390 --> 00:51:47,599

accelerated very rapidly to the left

1439

00:51:51,589 --> 00:51:50,400

and i say that that's not the case and

1440

00:51:53,750 --> 00:51:51,599

it was actually because

1441

00:51:55,589 --> 00:51:53,760

uh uh the camera stopped tracking

1442

00:51:57,990 --> 00:51:55,599

because he switched video modes

1443

00:51:59,109 --> 00:51:58,000

and uh that changes the alignment of the

1444

00:52:04,390 --> 00:51:59,119

camera slightly

1445

00:52:05,910 --> 00:52:04,400

and both are entirely possible yeah

1446

00:52:07,430 --> 00:52:05,920

the only difference in interpretation

1447

00:52:08,230 --> 00:52:07,440

not that you're wrong or not that he's

1448

00:52:12,549 --> 00:52:08,240

right

1449

00:52:14,630 --> 00:52:12,559

is he has

1450

00:52:16,870 --> 00:52:14,640

the operator experience to go along with

1451
00:52:18,630 --> 00:52:16,880
that video when he makes his discussion

1452
00:52:20,710 --> 00:52:18,640
which is something you and i neither of

1453
00:52:22,230 --> 00:52:20,720
us have i mean i know a good deal about

1454
00:52:23,910 --> 00:52:22,240
that system just because of

1455
00:52:26,150 --> 00:52:23,920
of learning about it and talking to guys

1456
00:52:27,510 --> 00:52:26,160
who worked on it but i still don't have

1457
00:52:31,270 --> 00:52:27,520
that same

1458
00:52:33,190 --> 00:52:31,280
experience with it that he does but

1459
00:52:35,270 --> 00:52:33,200
both what he said and what you said are

1460
00:52:37,750 --> 00:52:35,280
both completely possible

1461
00:52:39,589 --> 00:52:37,760
you know he stated many times that he

1462
00:52:41,589 --> 00:52:39,599
was flipping through modes trying to get

1463
00:52:44,950 --> 00:52:41,599

anything he could on it

1464

00:52:48,069 --> 00:52:44,960

you know that doesn't necessarily

1465

00:52:50,790 --> 00:52:48,079

yeah he's not going to get the best

1466

00:52:52,309 --> 00:52:50,800

of anything going through it so quickly

1467

00:52:54,309 --> 00:52:52,319

and it very well could be that

1468

00:52:56,069 --> 00:52:54,319

when he switched that last time it lost

1469

00:52:58,390 --> 00:52:56,079

track you lost all of that

1470

00:52:59,990 --> 00:52:58,400

just like you said yeah it could be a

1471

00:53:01,750 --> 00:53:00,000

combination it could have gone fast and

1472

00:53:02,790 --> 00:53:01,760

lost track it could have just gone fast

1473

00:53:04,710 --> 00:53:02,800

you never know

1474

00:53:08,069 --> 00:53:04,720

that's it's one of those answers i don't

1475

00:53:11,670 --> 00:53:08,079

think we're truly going to get

1476

00:53:13,589 --> 00:53:11,680

the full answer to that

1477

00:53:15,510 --> 00:53:13,599

my feeling with that is that i think if

1478

00:53:16,790 --> 00:53:15,520

we do like you said do a bit more

1479

00:53:19,589 --> 00:53:16,800

digging into it

1480

00:53:21,670 --> 00:53:19,599

uh i think we could perhaps you know

1481

00:53:25,109 --> 00:53:21,680

resolve some of the disagreements

1482

00:53:27,109 --> 00:53:25,119

and the attempts to um

1483

00:53:28,150 --> 00:53:27,119

dig into it as kind of rebuttals to what

1484

00:53:31,109 --> 00:53:28,160

i've been saying i

1485

00:53:33,430 --> 00:53:31,119

don't really think uh stand up like like

1486

00:53:36,549 --> 00:53:33,440

underwood did actually give an interview

1487

00:53:38,710 --> 00:53:36,559

with jeremy corbell and i just listened

1488

00:53:40,790 --> 00:53:38,720

to that yesterday again

1489

00:53:41,910 --> 00:53:40,800

and it was a very very disjointed

1490

00:53:43,990 --> 00:53:41,920

interview because it was quite highly

1491

00:53:48,710 --> 00:53:44,000

edited but you know basically

1492

00:53:50,230 --> 00:53:48,720

uh uh i think

1493

00:53:51,430 --> 00:53:50,240

jeremy kobiel kind of asked the wrong

1494

00:53:53,270 --> 00:53:51,440

questions then this is something i've

1495

00:53:55,030 --> 00:53:53,280

discussed on the other videos that you

1496

00:53:57,030 --> 00:53:55,040

know yes was it the change to two times

1497

00:53:58,390 --> 00:53:57,040

zoom that made it lose the lock when it

1498

00:53:59,910 --> 00:53:58,400

that wasn't what i was saying it's

1499

00:54:02,470 --> 00:53:59,920

actually the change between

1500

00:54:03,990 --> 00:54:02,480

i think uh the narrow mode and the wide

1501
00:54:07,190 --> 00:54:04,000
field of view mode

1502
00:54:10,390 --> 00:54:07,200
uh so we're not really we're

1503
00:54:12,309 --> 00:54:10,400
kind of like talking past each other

1504
00:54:13,910 --> 00:54:12,319
which is something lex friedman said and

1505
00:54:14,790 --> 00:54:13,920
that we're not really talking directly

1506
00:54:17,990 --> 00:54:14,800
and i think

1507
00:54:19,510 --> 00:54:18,000
it would be great to have people who

1508
00:54:20,790 --> 00:54:19,520
know what they're talking about with

1509
00:54:26,150 --> 00:54:20,800
this system

1510
00:54:33,270 --> 00:54:30,470
i can answer one one plausible

1511
00:54:35,109 --> 00:54:33,280
thing put put out by more than one

1512
00:54:38,549 --> 00:54:35,119
person i think you're one of them

1513
00:54:42,230 --> 00:54:38,559

it's not an airplane there are

1514

00:54:44,630 --> 00:54:42,240

too many things that would have to fail

1515

00:54:46,470 --> 00:54:44,640

for an airplane to get anywhere near

1516

00:54:49,510 --> 00:54:46,480

them without us knowing about it

1517

00:54:51,430 --> 00:54:49,520

yeah it would have to get by

1518

00:54:52,950 --> 00:54:51,440

the airborne hawkeye it would have to

1519

00:54:55,190 --> 00:54:52,960

get by the

1520

00:54:56,630 --> 00:54:55,200

air radars on the nimitz it would have

1521

00:54:57,510 --> 00:54:56,640

to get by the air radars on the

1522

00:54:59,589 --> 00:54:57,520

princeton

1523

00:55:01,030 --> 00:54:59,599

it would have to get by the spy one

1524

00:55:04,230 --> 00:55:01,040

right on the princeton

1525

00:55:07,589 --> 00:55:04,240

it would have to get by many many

1526

00:55:10,789 --> 00:55:07,599

civilian air traffic control radars yeah

1527

00:55:12,309 --> 00:55:10,799

to even get close to us i i would agree

1528

00:55:12,789 --> 00:55:12,319

with all of that except for the first

1529

00:55:15,829 --> 00:55:12,799

part

1530

00:55:17,030 --> 00:55:15,839

like uh you said it it's not an airplane

1531

00:55:19,349 --> 00:55:17,040

and then you're saying that if it was an

1532

00:55:21,990 --> 00:55:19,359

airplane it would be on the radar my

1533

00:55:23,430 --> 00:55:22,000

my theory here is that it was on the

1534

00:55:26,710 --> 00:55:23,440

radar

1535

00:55:29,270 --> 00:55:26,720

but what he was pointing his camera at

1536

00:55:29,910 --> 00:55:29,280

uh was something that was on the radar

1537

00:55:31,829 --> 00:55:29,920

but

1538

00:55:33,349 --> 00:55:31,839

his estimation of where that actually

1539

00:55:37,990 --> 00:55:33,359

was

1540

00:55:40,230 --> 00:55:38,000

either

1541

00:55:42,069 --> 00:55:40,240

further away or closer probably further

1542

00:55:45,990 --> 00:55:42,079

away

1543

00:55:47,190 --> 00:55:46,000

that's possible but that means it'd be a

1544

00:55:50,789 --> 00:55:47,200

huge screw-up

1545

00:55:53,030 --> 00:55:50,799

on underwood's park

1546

00:55:56,150 --> 00:55:53,040

yeah i don't know about huge but

1547

00:55:57,270 --> 00:55:56,160

certainly a bit of a screw-up

1548

00:55:59,349 --> 00:55:57,280

you're just looking at it from a

1549

00:56:01,430 --> 00:55:59,359

different point of view than i am yeah

1550

00:56:04,950 --> 00:56:01,440

you know every military aircraft in that

1551

00:56:10,150 --> 00:56:08,309

the idea of that aircraft and what it is

1552

00:56:11,510 --> 00:56:10,160

and who it is and all that is well

1553

00:56:14,470 --> 00:56:11,520

established

1554

00:56:15,750 --> 00:56:14,480

you know they brief on who else is going

1555

00:56:18,950 --> 00:56:15,760

to be in the air

1556

00:56:20,470 --> 00:56:18,960

they know you know they may not know

1557

00:56:22,309 --> 00:56:20,480

exactly what the other group of fighters

1558

00:56:23,430 --> 00:56:22,319

is training on but they know there's

1559

00:56:24,309 --> 00:56:23,440

another group of fighters over there

1560

00:56:26,230 --> 00:56:24,319

training

1561

00:56:27,670 --> 00:56:26,240

and it should be six chips and they're

1562

00:56:29,109 --> 00:56:27,680

doing three versus three

1563

00:56:31,990 --> 00:56:29,119

they know who else is in there they

1564

00:56:33,670 --> 00:56:32,000

deconflict the airspace so they're all

1565

00:56:35,109 --> 00:56:33,680

in their own little areas they're all

1566

00:56:38,549 --> 00:56:35,119

training

1567

00:56:42,470 --> 00:56:38,559

the hawkkeye alone

1568

00:56:44,710 --> 00:56:42,480

knows everything

1569

00:56:45,670 --> 00:56:44,720

you know every fighter automatically

1570

00:56:47,829 --> 00:56:45,680

tells

1571

00:56:49,510 --> 00:56:47,839

the hawkkeye who it is the hawkkeye is

1572

00:56:50,309 --> 00:56:49,520

smart enough to know what that fighter

1573

00:56:53,190 --> 00:56:50,319

is

1574

00:56:53,750 --> 00:56:53,200

even if the fighter turned its off

1575

00:56:56,950 --> 00:56:53,760

you know

1576
00:56:58,789 --> 00:56:56,960
yeah you've got more than one system

1577
00:57:01,109 --> 00:56:58,799
that identifies

1578
00:57:03,270 --> 00:57:01,119
every air wing aircraft up there you

1579
00:57:05,109 --> 00:57:03,280
know the the fighters have mids the hawk

1580
00:57:08,390 --> 00:57:05,119
has got jtids there's

1581
00:57:10,630 --> 00:57:08,400
basically as simple as iff which even in

1582
00:57:12,710 --> 00:57:10,640
training every jet's got mode four going

1583
00:57:15,510 --> 00:57:12,720
which is um

1584
00:57:16,069 --> 00:57:15,520
iff if you look it up it's essentially

1585
00:57:18,870 --> 00:57:16,079
good guy

1586
00:57:20,390 --> 00:57:18,880
bad guy you know every jet's got a code

1587
00:57:22,230 --> 00:57:20,400
in it that says hey i'm a good guy and

1588
00:57:24,150 --> 00:57:22,240

it automatically pops up

1589

00:57:25,670 --> 00:57:24,160

on all those other systems and it's all

1590

00:57:29,270 --> 00:57:25,680

tied into each other

1591

00:57:34,390 --> 00:57:29,280

when i say if he was tracking

1592

00:57:36,470 --> 00:57:34,400

a jet that was identified with his fleer

1593

00:57:37,589 --> 00:57:36,480

he basically lost all his situational

1594

00:57:40,950 --> 00:57:37,599

awareness

1595

00:57:43,030 --> 00:57:40,960

and he made a mistake tracking something

1596

00:57:46,710 --> 00:57:43,040

that he already knew what it was

1597

00:57:49,510 --> 00:57:46,720

you know he would have been able to

1598

00:57:49,990 --> 00:57:49,520

um just down his mid systems alone which

1599

00:57:53,270 --> 00:57:50,000

is a

1600

00:57:55,030 --> 00:57:53,280

distributed data link um it's got a

1601

00:57:57,829 --> 00:57:55,040

slower update rate than say

1602

00:57:59,109 --> 00:57:57,839

cec does but all the fighters have it

1603

00:58:01,349 --> 00:57:59,119

and they're all tied into the network

1604

00:58:04,390 --> 00:58:01,359

with the hawkeye with the ship

1605

00:58:07,109 --> 00:58:04,400

you know there's such a giant

1606

00:58:08,069 --> 00:58:07,119

battle group pitcher painted yeah that

1607

00:58:11,030 --> 00:58:08,079

they have access

1608

00:58:13,349 --> 00:58:11,040

to that's why i say if he was tracking

1609

00:58:16,069 --> 00:58:13,359

something that we had already identified

1610

00:58:16,549 --> 00:58:16,079

he made a giant mistake going after well

1611

00:58:19,589 --> 00:58:16,559

i think

1612

00:58:22,390 --> 00:58:19,599

yeah she had underwood as uh

1613

00:58:23,990 --> 00:58:22,400

someone asked him if he would come on my

1614

00:58:26,069 --> 00:58:24,000

podcast and he

1615

00:58:27,829 --> 00:58:26,079

uh refused emphatically so i don't think

1616

00:58:31,349 --> 00:58:27,839

he's ever going to do it

1617

00:58:33,109 --> 00:58:31,359

uh so i i think

1618

00:58:34,710 --> 00:58:33,119

i think actually he did make a mistake

1619

00:58:35,270 --> 00:58:34,720

and i think this kind of shows up a

1620

00:58:39,109 --> 00:58:35,280

little bit

1621

00:58:42,150 --> 00:58:39,119

in in the video and the way it ends

1622

00:58:44,150 --> 00:58:42,160

and at the end of the video he

1623

00:58:46,230 --> 00:58:44,160

is zoomed in all the ways in the narrow

1624

00:58:46,789 --> 00:58:46,240

field of view and two times zoom so he's

1625

00:58:49,589 --> 00:58:46,799

got this

1626
00:58:51,349 --> 00:58:49,599
very and the very last thing he does is

1627
00:58:53,190 --> 00:58:51,359
switch to two times zoom

1628
00:58:54,390 --> 00:58:53,200
which makes the object go off the side

1629
00:58:56,789 --> 00:58:54,400
even quicker

1630
00:58:58,870 --> 00:58:56,799
uh and then he loses the object and

1631
00:59:01,349 --> 00:58:58,880
doesn't reacquire it

1632
00:59:03,030 --> 00:59:01,359
but all he would have to do to reacquire

1633
00:59:05,510 --> 00:59:03,040
it would be just to switch to the wild

1634
00:59:06,870 --> 00:59:05,520
field of view because it's it's super

1635
00:59:08,309 --> 00:59:06,880
zoomed in it's got this

1636
00:59:10,150 --> 00:59:08,319
this tiny little patch of the sky is

1637
00:59:10,870 --> 00:59:10,160
looking at and this object just moving

1638
00:59:13,270 --> 00:59:10,880

really quickly

1639

00:59:15,510 --> 00:59:13,280

statement unless that object actually

1640

00:59:20,390 --> 00:59:15,520

took off as fast as he said it did

1641

00:59:26,069 --> 00:59:23,829

no i'm not i'm not i'm not by any means

1642

00:59:29,670 --> 00:59:26,079

confirming what he said i'm just saying

1643

00:59:31,990 --> 00:59:29,680

if you're right if he backed out

1644

00:59:32,950 --> 00:59:32,000

and essentially maybe repositioned his

1645

00:59:34,230 --> 00:59:32,960

jet a little

1646

00:59:36,309 --> 00:59:34,240

he should have easily been able to

1647

00:59:37,670 --> 00:59:36,319

retract it yeah but he wouldn't even

1648

00:59:39,910 --> 00:59:37,680

need to reposition his jet

1649

00:59:41,670 --> 00:59:39,920

because it's it's the camera can go up

1650

00:59:43,349 --> 00:59:41,680

from there to there pretty much and he

1651
00:59:44,950 --> 00:59:43,359
he's he was almost like looking straight

1652
00:59:45,990 --> 00:59:44,960
ahead at this point and the object was

1653
00:59:48,549 --> 00:59:46,000
basically just

1654
00:59:50,390 --> 00:59:48,559
you know essentially one degree to the

1655
00:59:52,150 --> 00:59:50,400
left so it's a tiny tiny little

1656
00:59:53,750 --> 00:59:52,160
bit it's information i don't know for

1657
00:59:56,870 --> 00:59:53,760
sure that's the only reason i'm

1658
00:59:57,829 --> 00:59:56,880
saying it the way i'm saying it but if

1659
01:00:00,309 --> 00:59:57,839
he had backed out

1660
01:00:00,950 --> 01:00:00,319
and like you suspect it was still right

1661
01:00:02,789 --> 01:00:00,960
there

1662
01:00:04,390 --> 01:00:02,799
yeah he could have required it but at

1663
01:00:05,190 --> 01:00:04,400

the same time if he backed out and it

1664

01:00:07,030 --> 01:00:05,200

had already

1665

01:00:08,630 --> 01:00:07,040

hightailed it out of the area backing it

1666

01:00:10,309 --> 01:00:08,640

out wouldn't have done any good

1667

01:00:12,549 --> 01:00:10,319

yeah but he never even talks about that

1668

01:00:15,349 --> 01:00:12,559

he doesn't talk about backing out

1669

01:00:15,990 --> 01:00:15,359

and in the early reports uh there's this

1670

01:00:18,390 --> 01:00:16,000

this

1671

01:00:19,510 --> 01:00:18,400

written report i think which includes an

1672

01:00:22,789 --> 01:00:19,520

interview with him

1673

01:00:25,030 --> 01:00:22,799

i think this is the the longer executive

1674

01:00:26,230 --> 01:00:25,040

report which isn't like i said it's not

1675

01:00:28,549 --> 01:00:26,240

real

1676

01:00:29,750 --> 01:00:28,559

yeah but what it says there's some

1677

01:00:31,430 --> 01:00:29,760

missing information

1678

01:00:33,190 --> 01:00:31,440

it seems like there's a direct interview

1679

01:00:35,430 --> 01:00:33,200

with him in that though

1680

01:00:37,190 --> 01:00:35,440

the problem with that whole document is

1681

01:00:39,430 --> 01:00:37,200

it's not an official navy document

1682

01:00:42,710 --> 01:00:39,440

yeah no official navy document in the

1683

01:00:45,430 --> 01:00:42,720

world no military document in the world

1684

01:00:46,069 --> 01:00:45,440

of the united states military will ever

1685

01:00:50,710 --> 01:00:46,079

reference

1686

01:00:55,030 --> 01:00:50,720

the

1687

01:00:57,430 --> 01:00:55,040

that aircraft it will reference

1688

01:00:59,910 --> 01:00:57,440

some other navy document or other

1689

01:01:03,109 --> 01:00:59,920

military document it will never

1690

01:01:05,829 --> 01:01:03,119

ever reference wikipedia

1691

01:01:08,390 --> 01:01:05,839

that document a was done several years

1692

01:01:13,270 --> 01:01:11,750

so there could be you know already

1693

01:01:15,270 --> 01:01:13,280

errors in it from that

1694

01:01:17,270 --> 01:01:15,280

yeah there are people involved that are

1695

01:01:18,630 --> 01:01:17,280

interviewed in there there are people

1696

01:01:21,349 --> 01:01:18,640

interviewed in there that were not

1697

01:01:23,670 --> 01:01:21,359

involved and there are flat out

1698

01:01:24,710 --> 01:01:23,680

parts of it that are just missing that

1699

01:01:27,829 --> 01:01:24,720

have

1700

01:01:30,789 --> 01:01:27,839

that they didn't even touch on

1701

01:01:31,589 --> 01:01:30,799

well do you know if if they actually

1702

01:01:33,270 --> 01:01:31,599

interviewed

1703

01:01:34,870 --> 01:01:33,280

underwood for it though because it seems

1704

01:01:37,190 --> 01:01:34,880

like direct quotes

1705

01:01:38,630 --> 01:01:37,200

i know for a fact they ain't the

1706

01:01:41,750 --> 01:01:38,640

individual

1707

01:01:43,670 --> 01:01:41,760

speaking for the hawkeye um

1708

01:01:45,270 --> 01:01:43,680

that they i mean i'm not gonna list any

1709

01:01:47,030 --> 01:01:45,280

names because most people don't know the

1710

01:01:48,630 --> 01:01:47,040

version with the names in it

1711

01:01:50,789 --> 01:01:48,640

um but that person had nothing to do

1712

01:01:52,309 --> 01:01:50,799

with it and was more clueless than

1713

01:01:54,470 --> 01:01:52,319

you know the average twitter user about

1714

01:01:58,069 --> 01:01:54,480

what actually happened

1715

01:02:01,910 --> 01:01:58,079

you know somebody whoever

1716

01:02:04,230 --> 01:02:01,920

you know what squadrons were in that

1717

01:02:05,750 --> 01:02:04,240

whole situation is public knowledge you

1718

01:02:06,630 --> 01:02:05,760

know it takes two seconds of googling to

1719

01:02:09,029 --> 01:02:06,640

figure out what

1720

01:02:10,150 --> 01:02:09,039

what squadrons are on that ship and it

1721

01:02:14,230 --> 01:02:10,160

doesn't take much

1722

01:02:15,510 --> 01:02:14,240

for anybody whoever actually wrote that

1723

01:02:19,109 --> 01:02:15,520

document to be able to say

1724

01:02:21,510 --> 01:02:19,119

okay well let me call vaw117

1725

01:02:22,789 --> 01:02:21,520

the hawkeye squadron and actually try

1726
01:02:24,390 --> 01:02:22,799
and find somebody who was there maybe

1727
01:02:26,549 --> 01:02:24,400
they'll talk to me

1728
01:02:29,109 --> 01:02:26,559
you know and the person they were

1729
01:02:31,349 --> 01:02:29,119
directed to like i said had no clue

1730
01:02:32,549 --> 01:02:31,359
so i don't trust to that document

1731
01:02:34,390 --> 01:02:32,559
whatsoever

1732
01:02:36,870 --> 01:02:34,400
not saying that what's in there may not

1733
01:02:39,670 --> 01:02:36,880
be accurate or may not be

1734
01:02:41,029 --> 01:02:39,680
you know usable it's just there's no

1735
01:02:43,029 --> 01:02:41,039
proof of

1736
01:02:44,870 --> 01:02:43,039
you know a lot of people want the actual

1737
01:02:48,309 --> 01:02:44,880
hard documentation

1738
01:02:49,670 --> 01:02:48,319

have been made up by anybody for all we

1739

01:02:53,270 --> 01:02:49,680

know

1740

01:02:55,190 --> 01:02:53,280

to do is get

1741

01:02:56,950 --> 01:02:55,200

underwater and sit him down and go

1742

01:02:57,670 --> 01:02:56,960

through the video with him like frame by

1743

01:03:00,390 --> 01:02:57,680

frame but i

1744

01:03:01,029 --> 01:03:00,400

i really don't think he's gonna do that

1745

01:03:03,430 --> 01:03:01,039

yeah

1746

01:03:04,390 --> 01:03:03,440

is it seems very uh aggressively not

1747

01:03:06,549 --> 01:03:04,400

wanting to do

1748

01:03:09,829 --> 01:03:06,559

anything like that which is unfortunate

1749

01:03:13,829 --> 01:03:09,839

really and i think a lot of the time

1750

01:03:17,029 --> 01:03:15,510

for you or somebody with your point of

1751
01:03:17,990 --> 01:03:17,039
view to really get to the bottom of that

1752
01:03:19,750 --> 01:03:18,000
video

1753
01:03:21,510 --> 01:03:19,760
is to literally get in touch with an

1754
01:03:25,190 --> 01:03:21,520
engineer for

1755
01:03:27,270 --> 01:03:25,200
at flear somebody flat out work

1756
01:03:30,950 --> 01:03:27,280
i realize how impossible that is but

1757
01:03:33,109 --> 01:03:30,960
somebody who actually you know

1758
01:03:34,630 --> 01:03:33,119
designed and worked on that system and

1759
01:03:37,990 --> 01:03:34,640
knows it in and

1760
01:03:38,950 --> 01:03:38,000
out better than even the pilots

1761
01:03:41,109 --> 01:03:38,960
they're the ones who are going to be

1762
01:03:42,470 --> 01:03:41,119
able to give the most educated answer as

1763
01:03:45,349 --> 01:03:42,480

to what happened

1764

01:03:46,069 --> 01:03:45,359

yeah i did actually talk to one uh i

1765

01:03:48,710 --> 01:03:46,079

talked to one

1766

01:03:49,829 --> 01:03:48,720

anonymous person who was a guy who did

1767

01:03:52,150 --> 01:03:49,839

uh maintenance

1768

01:03:54,230 --> 01:03:52,160

on i don't think it was even the aptlyer

1769

01:03:57,349 --> 01:03:54,240

system but it was a very similar uh

1770

01:04:00,630 --> 01:03:57,359

system yeah basically

1771

01:04:02,630 --> 01:04:00,640

the same technology and and he kind of

1772

01:04:04,230 --> 01:04:02,640

more or less agreed with me and said

1773

01:04:05,589 --> 01:04:04,240

yeah this is what happens and even like

1774

01:04:07,349 --> 01:04:05,599

with the gimbal thing with

1775

01:04:09,190 --> 01:04:07,359

the glare the rotating glare he says

1776

01:04:11,349 --> 01:04:09,200

that's something that happens when

1777

01:04:12,789 --> 01:04:11,359

uh someone tries to clean the front

1778

01:04:14,230 --> 01:04:12,799

screen and it gets

1779

01:04:15,829 --> 01:04:14,240

streaks on it and you get those kind of

1780

01:04:17,430 --> 01:04:15,839

blur shapes

1781

01:04:19,109 --> 01:04:17,440

where they stick those pods it gets all

1782

01:04:21,829 --> 01:04:19,119

kinds of crap on them

1783

01:04:22,870 --> 01:04:21,839

yeah so they claim all the time yeah so

1784

01:04:24,710 --> 01:04:22,880

he says that

1785

01:04:26,069 --> 01:04:24,720

the explanation i gave the gimbal system

1786

01:04:27,349 --> 01:04:26,079

made sense and he wasn't really that

1787

01:04:30,870 --> 01:04:27,359

familiar with the

1788

01:04:32,950 --> 01:04:30,880

the fleur one one the uh the nimitz uh

1789

01:04:34,789 --> 01:04:32,960

tic tac video but he kind of more or

1790

01:04:36,789 --> 01:04:34,799

less agreed with me but you know he's an

1791

01:04:38,309 --> 01:04:36,799

anonymous guy he didn't want to come

1792

01:04:39,190 --> 01:04:38,319

forward and this is the problem that you

1793

01:04:41,349 --> 01:04:39,200

have

1794

01:04:43,270 --> 01:04:41,359

that was like the only guy i could i've

1795

01:04:43,990 --> 01:04:43,280

been able to get because no one wants to

1796

01:04:46,390 --> 01:04:44,000

talk

1797

01:04:47,910 --> 01:04:46,400

because they're all bound by ndas

1798

01:04:50,549 --> 01:04:47,920

because this is this is

1799

01:04:52,710 --> 01:04:50,559

sensitive technology so it's it's this

1800

01:04:54,710 --> 01:04:52,720

very frustrating wall of secrecy that we

1801
01:04:57,349 --> 01:04:54,720
have that we can never get through

1802
01:04:57,990 --> 01:04:57,359
i mean i i get blasted almost every time

1803
01:05:01,029 --> 01:04:58,000
i say that

1804
01:05:02,789 --> 01:05:01,039
about you know not wanting to to violate

1805
01:05:05,750 --> 01:05:02,799
my security clearance or

1806
01:05:06,630 --> 01:05:05,760
an nda i signed or just flat out share

1807
01:05:09,510 --> 01:05:06,640
tactics

1808
01:05:11,990 --> 01:05:09,520
that would endanger somebody um it's

1809
01:05:14,470 --> 01:05:12,000
like the weapons and tactics that we use

1810
01:05:16,069 --> 01:05:14,480
on a hawkeye they're not all classified

1811
01:05:17,670 --> 01:05:16,079
but they're not exactly public knowledge

1812
01:05:20,470 --> 01:05:17,680
and there's a reason for that

1813
01:05:23,910 --> 01:05:20,480

yeah you know i'm always going to err on

1814

01:05:30,470 --> 01:05:28,069

and i i promise anybody who watches your

1815

01:05:31,670 --> 01:05:30,480

your show and or listening to this i

1816

01:05:34,470 --> 01:05:31,680

would much rather

1817

01:05:36,549 --> 01:05:34,480

just tell you everything i know and not

1818

01:05:38,870 --> 01:05:36,559

have to walk that line

1819

01:05:40,710 --> 01:05:38,880

because it would be so much easier

1820

01:05:42,309 --> 01:05:40,720

there's a lot of information i have

1821

01:05:44,870 --> 01:05:42,319

access to and i know

1822

01:05:46,390 --> 01:05:44,880

that answers a lot of questions but i

1823

01:05:48,230 --> 01:05:46,400

essentially have to play stupid because

1824

01:05:52,390 --> 01:05:48,240

i can't say anything about

1825

01:05:56,710 --> 01:05:55,670

even the 2015 incident with the gimbal

1826

01:06:00,470 --> 01:05:56,720

and all that

1827

01:06:02,549 --> 01:06:00,480

i have nothing to do with that but

1828

01:06:03,589 --> 01:06:02,559

somebody who's on that ship on that

1829

01:06:05,190 --> 01:06:03,599

hawkeye

1830

01:06:07,270 --> 01:06:05,200

in that squadron you used to be my

1831

01:06:08,549 --> 01:06:07,280

roommate you know i've had a

1832

01:06:10,069 --> 01:06:08,559

conversation with him i know some

1833

01:06:12,470 --> 01:06:10,079

information about that

1834

01:06:13,109 --> 01:06:12,480

i can't say diddly i can say i know

1835

01:06:15,589 --> 01:06:13,119

something

1836

01:06:17,510 --> 01:06:15,599

but i can't say anything because the

1837

01:06:19,029 --> 01:06:17,520

hawkeye they have

1838

01:06:21,109 --> 01:06:19,039

for lack of a better term is twice as

1839

01:06:24,870 --> 01:06:21,119

classified as what i worked on

1840

01:06:27,910 --> 01:06:24,880

yeah it's it's just a fact of life for

1841

01:06:29,670 --> 01:06:27,920

those of us who have to deal with that

1842

01:06:31,109 --> 01:06:29,680

trust me we would all rather just say

1843

01:06:33,910 --> 01:06:31,119

what we know

1844

01:06:34,870 --> 01:06:33,920

you know because a little tidbit that i

1845

01:06:40,470 --> 01:06:34,880

share

1846

01:06:42,150 --> 01:06:40,480

give somebody like you the ability to oh

1847

01:06:43,589 --> 01:06:42,160

now i can go find this answer

1848

01:06:45,270 --> 01:06:43,599

but the problem is i can't share that

1849

01:06:47,270 --> 01:06:45,280

tidbit you're never going to get

1850

01:06:50,549 --> 01:06:47,280

connected with that random answer

1851

01:06:52,150 --> 01:06:50,559

it's it's just a fact of life i hate

1852

01:06:53,589 --> 01:06:52,160

yeah it's unfortunate and this is

1853

01:06:54,230 --> 01:06:53,599

unfortunately something that occurs a

1854

01:06:57,109 --> 01:06:54,240

lot in

1855

01:06:58,950 --> 01:06:57,119

the the more general ufo field as the a

1856

01:07:00,069 --> 01:06:58,960

lot of these things are behind the wall

1857

01:07:02,150 --> 01:07:00,079

of secrecy

1858

01:07:03,270 --> 01:07:02,160

uh and like the tsa stuff you know

1859

01:07:05,750 --> 01:07:03,280

essentially it's like

1860

01:07:06,710 --> 01:07:05,760

poking some holes in this this wall and

1861

01:07:08,630 --> 01:07:06,720

showing you some

1862

01:07:10,069 --> 01:07:08,640

fascinating little tidbit but there's

1863

01:07:12,309 --> 01:07:10,079

almost no context and then

1864

01:07:13,270 --> 01:07:12,319

the navy gives you these these uh

1865

01:07:15,109 --> 01:07:13,280

boilerplate

1866

01:07:17,430 --> 01:07:15,119

statements which aren't really helpful

1867

01:07:19,750 --> 01:07:17,440

at all and then it just kind of

1868

01:07:21,589 --> 01:07:19,760

oh yeah just repeating the same thing

1869

01:07:23,750 --> 01:07:21,599

over and over again

1870

01:07:24,710 --> 01:07:23,760

that's uh yeah that's that's their job

1871

01:07:26,950 --> 01:07:24,720

so

1872

01:07:28,470 --> 01:07:26,960

you know i think that a lot of the time

1873

01:07:30,390 --> 01:07:28,480

they uh

1874

01:07:32,309 --> 01:07:30,400

would rather the ufo people just kind of

1875

01:07:35,589 --> 01:07:32,319

go away because they're

1876

01:07:37,270 --> 01:07:35,599

they just you know they're either

1877

01:07:38,870 --> 01:07:37,280

hovering around the edges of something

1878

01:07:40,470 --> 01:07:38,880

that's classified or they're just kind

1879

01:07:40,870 --> 01:07:40,480

of wasting their time with with stuff

1880

01:07:42,789 --> 01:07:40,880

that's

1881

01:07:45,029 --> 01:07:42,799

this is irrelevant but they can't talk

1882

01:07:46,710 --> 01:07:45,039

about either one so it's it must be

1883

01:07:50,309 --> 01:07:46,720

annoying for for them

1884

01:07:56,390 --> 01:07:53,750

all right uh said what's going on with

1885

01:07:59,990 --> 01:07:56,400

uh uap expeditions

1886

01:08:03,109 --> 01:08:00,000

we um we have

1887

01:08:04,870 --> 01:08:03,119

kind of stepped back and regrouped um

1888

01:08:07,510 --> 01:08:04,880

we had some people associated with us

1889

01:08:08,069 --> 01:08:07,520

who not that they're bad people at any

1890

01:08:11,029 --> 01:08:08,079

any

1891

01:08:11,670 --> 01:08:11,039

they're all highly talented people but

1892

01:08:14,230 --> 01:08:11,680

because of

1893

01:08:15,270 --> 01:08:14,240

the coronavirus our initial plan of

1894

01:08:19,110 --> 01:08:15,280

going out on the ship

1895

01:08:21,269 --> 01:08:19,120

and and actually doing hard science

1896

01:08:22,870 --> 01:08:21,279

off a catalina in that whole area where

1897

01:08:25,669 --> 01:08:22,880

all this happened

1898

01:08:28,149 --> 01:08:25,679

it's not going to happen you know but

1899

01:08:32,229 --> 01:08:30,789

um so we're we're dropping back we're

1900

01:08:35,910 --> 01:08:32,239

regrouping

1901

01:08:37,349 --> 01:08:35,920

um we want to get some

1902

01:08:38,709 --> 01:08:37,359

we don't want to speculate we don't want

1903

01:08:41,110 --> 01:08:38,719

to guess we don't want to do anything we

1904

01:08:45,189 --> 01:08:41,120

want to try and get some hard science

1905

01:08:46,309 --> 01:08:45,199

some hard data that people can then work

1906

01:08:47,669 --> 01:08:46,319

with

1907

01:08:50,309 --> 01:08:47,679

and one of the ways we want to do that

1908

01:08:53,030 --> 01:08:50,319

now is through

1909

01:08:54,229 --> 01:08:53,040

we want to get some hubs set up in some

1910

01:08:57,189 --> 01:08:54,239

critical areas

1911

01:08:57,590 --> 01:08:57,199

um they're working with somebody on uh

1912

01:08:59,349 --> 01:08:57,600

cattle

1913

01:09:01,829 --> 01:08:59,359

with catalina island to try and get this

1914

01:09:05,030 --> 01:09:01,839

guy out there

1915

01:09:06,630 --> 01:09:05,040

we're trying to get some of the types of

1916

01:09:09,510 --> 01:09:06,640

devices that we can

1917

01:09:11,349 --> 01:09:09,520

get without you know going bankrupt in

1918

01:09:14,789 --> 01:09:11,359

some places to hopefully get us

1919

01:09:17,269 --> 01:09:14,799

some some actual hard evidence

1920

01:09:18,630 --> 01:09:17,279

and obviously once we get that we're

1921

01:09:21,510 --> 01:09:18,640

going to share with everybody

1922

01:09:21,910 --> 01:09:21,520

you know there's no purpose behind it um

1923

01:09:25,430 --> 01:09:21,920

but

1924

01:09:28,709 --> 01:09:25,440

yeah skype sounds very interesting

1925

01:09:32,550 --> 01:09:28,719

skyhub is gary himself wants to uh

1926

01:09:34,550 --> 01:09:32,560

turn his jeep into a whole my mobile

1927

01:09:36,309 --> 01:09:34,560

science station and knowing gary he's

1928

01:09:38,070 --> 01:09:36,319

actually going to do it so

1929

01:09:40,309 --> 01:09:38,080

yeah i had a conversation with one of

1930

01:09:43,669 --> 01:09:40,319

the guys at sky hub who who's done that

1931

01:09:46,390 --> 01:09:43,679

that exact thing and his uh

1932

01:09:47,910 --> 01:09:46,400

idea it was i'm not sure if it was a

1933

01:09:49,189 --> 01:09:47,920

jeep it probably was achieved but it

1934

01:09:51,030 --> 01:09:49,199

looks pretty uh

1935

01:09:52,870 --> 01:09:51,040

pretty amazing looks like a lot of fun

1936

01:09:56,470 --> 01:09:52,880

as well

1937

01:10:01,030 --> 01:09:56,480

yeah yeah it's like a mobile

1938

01:10:03,590 --> 01:10:01,040

ufo um bait slash detecting platform

1939

01:10:05,750 --> 01:10:03,600

which would be uh very interesting to do

1940

01:10:06,950 --> 01:10:05,760

so it is like i said with all that hard

1941

01:10:08,630 --> 01:10:06,960

evidence to

1942

01:10:11,110 --> 01:10:08,640

to get ourselves to the point when we

1943

01:10:11,750 --> 01:10:11,120

are ready to to gear up and go out on a

1944

01:10:16,310 --> 01:10:11,760

ship we

1945

01:10:19,430 --> 01:10:16,320

we can bring much more specific

1946

01:10:22,390 --> 01:10:19,440

equipment to get to you know

1947

01:10:23,750 --> 01:10:22,400

yeah the truth for better or for us for

1948

01:10:24,870 --> 01:10:23,760

for words but

1949

01:10:26,630 --> 01:10:24,880

instead of just going out there and

1950

01:10:28,470 --> 01:10:26,640

guessing we're hoping these interim time

1951

01:10:30,149 --> 01:10:28,480

with some things like sky hubs

1952

01:10:32,950 --> 01:10:30,159

and some other technology to actually

1953

01:10:35,590 --> 01:10:32,960

get some more specific

1954

01:10:36,790 --> 01:10:35,600

direction for when we actually go out

1955

01:10:39,990 --> 01:10:36,800

yeah it would be interesting

1956

01:10:43,030 --> 01:10:40,000

have you have you personally had any ufo

1957

01:10:45,350 --> 01:10:43,040

experiences no no sir

1958

01:10:46,950 --> 01:10:45,360

my this is this is my only time and i

1959

01:10:48,070 --> 01:10:46,960

can't say i'm

1960

01:10:50,550 --> 01:10:48,080

you know people try and get me to

1961

01:10:52,470 --> 01:10:50,560

comment on on other stuff

1962

01:10:54,950 --> 01:10:52,480

and i just a don't have the knowledge to

1963

01:10:55,990 --> 01:10:54,960

really comment on it in a useful way or

1964

01:10:57,990 --> 01:10:56,000

be honest but they don't have the

1965

01:11:01,030 --> 01:10:58,000

interest my interest in in

1966

01:11:02,790 --> 01:11:01,040

all this is regardless of what we think

1967

01:11:07,110 --> 01:11:02,800

it is or

1968

01:11:10,229 --> 01:11:07,120

there was something in our airspace

1969

01:11:11,510 --> 01:11:10,239

in 2014 or 20 2004

1970

01:11:13,510 --> 01:11:11,520

you know way back then there was

1971

01:11:14,390 --> 01:11:13,520

something that wasn't supposed to be

1972

01:11:16,149 --> 01:11:14,400

there

1973

01:11:17,750 --> 01:11:16,159

and i don't care if it turns out to be a

1974

01:11:19,510 --> 01:11:17,760

glorified weather balloon i at least

1975

01:11:21,750 --> 01:11:19,520

want to know what it is

1976

01:11:23,430 --> 01:11:21,760

you know and that's one of the reasons i

1977

01:11:25,110 --> 01:11:23,440

keep contributing what i can to the

1978

01:11:28,790 --> 01:11:25,120

story to get to it

1979

01:11:31,030 --> 01:11:28,800

you know yeah well i appreciate uh

1980

01:11:32,550 --> 01:11:31,040

you kind of talking to me here is there

1981

01:11:33,590 --> 01:11:32,560

anything else you want to talk about

1982

01:11:34,310 --> 01:11:33,600

that we haven't really covered or

1983

01:11:37,590 --> 01:11:34,320

anything that we

1984

01:11:38,950 --> 01:11:37,600

i didn't i don't think so yeah but but i

1985

01:11:41,510 --> 01:11:38,960

will do you a favor

1986

01:11:43,430 --> 01:11:41,520

people associate with you associate you

1987

01:11:46,470 --> 01:11:43,440

with the whole seagull story

1988

01:11:48,070 --> 01:11:46,480

and i i am one who

1989

01:11:50,790 --> 01:11:48,080

pokes at that seagull every once in a

1990

01:11:52,149 --> 01:11:50,800

while but you were joking when you said

1991

01:11:53,110 --> 01:11:52,159

it you weren't actually calling it a

1992

01:11:55,270 --> 01:11:53,120

seagull

1993

01:11:57,270 --> 01:11:55,280

you know yeah so people have to let that

1994

01:11:59,110 --> 01:11:57,280

go even if i'm one of the ones who keeps

1995

01:12:00,550 --> 01:11:59,120

poking at it we all need to let the

1996

01:12:02,149 --> 01:12:00,560

seagull die

1997

01:12:04,149 --> 01:12:02,159

thank you thank you i appreciate that

1998

01:12:06,709 --> 01:12:04,159

and to be fair on the seagull thing

1999

01:12:08,550 --> 01:12:06,719

like i i did mention it in a

2000

01:12:09,669 --> 01:12:08,560

conversation with ufo jesus and

2001

01:12:11,750 --> 01:12:09,679

if you're watching you can see that we

2002

01:12:13,990 --> 01:12:11,760

are kind of joking around but

2003

01:12:15,910 --> 01:12:14,000

uh what i was saying was that when

2004

01:12:17,030 --> 01:12:15,920

fravor first saw the thing down by the

2005

01:12:18,709 --> 01:12:17,040

water there might have been a whole

2006

01:12:20,870 --> 01:12:18,719

bunch of white things down there like

2007

01:12:22,229 --> 01:12:20,880

flecks of water and boats and possibly

2008

01:12:24,070 --> 01:12:22,239

even seagulls

2009

01:12:25,669 --> 01:12:24,080

uh just down there at the water i didn't

2010

01:12:27,110 --> 01:12:25,679

mean that the actual thing that flew up

2011

01:12:28,310 --> 01:12:27,120

and flew around him was a seagull

2012

01:12:29,510 --> 01:12:28,320

because that's obviously completely

2013

01:12:32,709 --> 01:12:29,520

nonsense

2014

01:12:34,390 --> 01:12:32,719

um and and really the whole seagull

2015

01:12:37,030 --> 01:12:34,400

thing comes from

2016

01:12:37,669 --> 01:12:37,040

my initial theory for the the go fast

2017

01:12:38,870 --> 01:12:37,679

object

2018

01:12:41,110 --> 01:12:38,880

which is you know one of the other

2019

01:12:42,870 --> 01:12:41,120

videos completely different event

2020

01:12:44,390 --> 01:12:42,880

and people you know they thought that it

2021

01:12:46,709 --> 01:12:44,400

was ridiculous for that which

2022

01:12:47,669 --> 01:12:46,719

it wasn't entirely but uh that's another

2023

01:12:50,550 --> 01:12:47,679

story and

2024

01:12:51,830 --> 01:12:50,560

it kind of got tacked on to the uh to

2025

01:12:54,550 --> 01:12:51,840

the whole nimitz thing

2026

01:12:56,630 --> 01:12:54,560

but you know people like to people like

2027

01:12:59,189 --> 01:12:56,640

to have their little memes and things

2028

01:13:00,229 --> 01:12:59,199

it's just uh annoying it's a little bit

2029

01:13:03,110 --> 01:13:00,239

annoying because

2030

01:13:04,870 --> 01:13:03,120

it's a distraction and it makes people

2031

01:13:06,550 --> 01:13:04,880

like not take the actual things i say

2032

01:13:08,070 --> 01:13:06,560

seriously because they think oh that's

2033

01:13:10,709 --> 01:13:08,080

mick west the seagull guy

2034

01:13:11,830 --> 01:13:10,719

or not i'm the tic tac guy i even made a

2035

01:13:15,270 --> 01:13:11,840

model of the tic tac

2036

01:13:17,990 --> 01:13:15,280

at one point to do experiments with

2037

01:13:18,550 --> 01:13:18,000

yeah i think uh i think i think framer

2038

01:13:21,030 --> 01:13:18,560

did see

2039

01:13:22,790 --> 01:13:21,040

a real object uh that uh that time i

2040

01:13:25,110 --> 01:13:22,800

just don't know what it was

2041

01:13:26,229 --> 01:13:25,120

correct i said it you just want to get

2042

01:13:28,390 --> 01:13:26,239

to that truth

2043

01:13:33,350 --> 01:13:28,400

yeah and the frame is out there give me

2044

01:13:35,350 --> 01:13:33,360

a call

2045

01:13:36,550 --> 01:13:35,360

yeah i was very happy to talk to anybody

2046

01:13:37,669 --> 01:13:36,560

about this this type of thing and i

2047

01:13:39,910 --> 01:13:37,679

think the more

2048

01:13:40,870 --> 01:13:39,920

uh discussions we have and the more we

2049

01:13:43,030 --> 01:13:40,880

can actually dig

2050

01:13:44,870 --> 01:13:43,040

i think we actually need to do digging

2051

01:13:47,110 --> 01:13:44,880

and not just be telling stories

2052

01:13:48,070 --> 01:13:47,120

uh if we get digged down with the actual

2053

01:13:50,630 --> 01:13:48,080

data we can

2054

01:13:52,950 --> 01:13:50,640

perhaps at least answer some of the

2055

01:13:55,830 --> 01:13:52,960

questions that some people have

2056

01:13:57,590 --> 01:13:55,840

that's the help all right well thank you
