

JUST BOKEH

Jesse Footage

"Pyramid" Footage

1
00:00:05,269 --> 00:00:03,429
this ufo video does not show a pyramid

2
00:00:06,869 --> 00:00:05,279
there's a triangle shape but that looks

3
00:00:08,710 --> 00:00:06,879
exactly like an effect caused by a

4
00:00:10,310 --> 00:00:08,720
bright light being out of focus and a

5
00:00:13,190 --> 00:00:10,320
night vision camera with a triangular

6
00:00:15,990 --> 00:00:13,200
iris like this one

7
00:00:16,710 --> 00:00:16,000
or a triangular lens cover like this one

8
00:00:20,310 --> 00:00:16,720
this effect

9
00:00:22,150 --> 00:00:20,320
is known as bokie it's also probably a

10
00:00:24,070 --> 00:00:22,160
plane because it blinks in the same

11
00:00:26,150 --> 00:00:24,080
pattern as a boeing 737

12
00:00:27,830 --> 00:00:26,160
and the ship the uss russell was

13
00:00:29,830 --> 00:00:27,840

directly under the route for planes

14

00:00:32,229 --> 00:00:29,840

flying into los angeles from hawaii and

15

00:00:33,350 --> 00:00:32,239

asia there are a couple more triangles

16

00:00:35,270 --> 00:00:33,360

in the scene

17

00:00:37,110 --> 00:00:35,280

those are probably stars because they

18

00:00:39,190 --> 00:00:37,120

look exactly like stars taking with a

19

00:00:42,150 --> 00:00:39,200

night vision camera out of focus with a

20

00:00:43,590 --> 00:00:42,160

triangular iris

21

00:00:45,670 --> 00:00:43,600

there's some bright lights at the start

22

00:00:47,910 --> 00:00:45,680

of the pyramid ufo video

23

00:00:50,069 --> 00:00:47,920

that's probably jupiter and some stars

24

00:00:52,389 --> 00:00:50,079

because it matches exactly where jupiter

25

00:00:54,229 --> 00:00:52,399

and some stars were on that day

26

00:00:56,069 --> 00:00:54,239

they don't show up as sharp triangles

27

00:00:57,029 --> 00:00:56,079

because the cameraman has not zoomed in

28

00:00:58,630 --> 00:00:57,039

yet

29

00:01:00,549 --> 00:00:58,640

but they look the same shape as the

30

00:01:03,110 --> 00:01:00,559

supposed flashing pyramid does when it

31

00:01:04,469 --> 00:01:03,120

first arrives

32

00:01:06,870 --> 00:01:04,479

there's some points of light in the

33

00:01:09,830 --> 00:01:06,880

video that sometimes look like stars

34

00:01:11,910 --> 00:01:09,840

they are not stars they are random noise

35

00:01:12,550 --> 00:01:11,920

stray electrons in the image intensify a

36

00:01:14,710 --> 00:01:12,560

tube

37

00:01:17,030 --> 00:01:14,720

they change from frame to frame they

38

00:01:18,950 --> 00:01:17,040

don't show up as triangles as they form

39

00:01:21,350 --> 00:01:18,960

in the image intensifier tube

40

00:01:23,109 --> 00:01:21,360

which is behind the iris so they are not

41

00:01:25,109 --> 00:01:23,119

affected by it

42

00:01:26,550 --> 00:01:25,119

i first saw this video one week ago on

43

00:01:28,310 --> 00:01:26,560

april the 8th

44

00:01:29,910 --> 00:01:28,320

i instantly realized it looked like a

45

00:01:31,510 --> 00:01:29,920

plane from the flashing lights and

46

00:01:33,270 --> 00:01:31,520

quickly figured out that bokeh was the

47

00:01:33,910 --> 00:01:33,280

best explanation for the triangular

48

00:01:35,990 --> 00:01:33,920

lights

49

00:01:37,590 --> 00:01:36,000

but i had no evidence and no night

50

00:01:38,950 --> 00:01:37,600

vision monocular and couldn't find a

51
00:01:41,350 --> 00:01:38,960
night vision binocular that had a

52
00:01:43,270 --> 00:01:41,360
triangular iris

53
00:01:44,789 --> 00:01:43,280
so i tried duplicating it by taping a

54
00:01:45,910 --> 00:01:44,799
triangular hole in the front of my

55
00:01:47,670 --> 00:01:45,920
regular camera

56
00:01:49,670 --> 00:01:47,680
this gave nice triangles for lights and

57
00:01:51,270 --> 00:01:49,680
stars when out of focus

58
00:01:52,870 --> 00:01:51,280
i also found that taping holes in the

59
00:01:54,230 --> 00:01:52,880
front of night vision binoculars was

60
00:01:55,830 --> 00:01:54,240
actually something people did

61
00:01:57,429 --> 00:01:55,840
although i couldn't find any triangular

62
00:02:01,149 --> 00:01:57,439
shapes

63
00:02:05,109 --> 00:02:03,510

jesse3959 on metabunk took a look at his

64

00:02:05,429 --> 00:02:05,119

night vision binocular and discovered

65

00:02:07,910 --> 00:02:05,439

hey

66

00:02:09,749 --> 00:02:07,920

it has a triangular iris i asked him for

67

00:02:10,469 --> 00:02:09,759

some footage of lights and stars and he

68

00:02:12,470 --> 00:02:10,479

delivered

69

00:02:14,869 --> 00:02:12,480

then using a styrofoam holder he

70

00:02:16,550 --> 00:02:14,879

recorded the output with his phone

71

00:02:18,070 --> 00:02:16,560

he changed the focus and that changed

72

00:02:19,750 --> 00:02:18,080

the size of the triangles

73

00:02:21,670 --> 00:02:19,760

and when he filmed the darker sky you

74

00:02:23,670 --> 00:02:21,680

get exactly the same faint stars and

75

00:02:27,190 --> 00:02:23,680

sparkly noise that you do in the pyramid

76
00:02:32,710 --> 00:02:29,750
then another breakthrough a friend told

77
00:02:34,309 --> 00:02:32,720
me he had a military style pvs-14 night

78
00:02:36,150 --> 00:02:34,319
vision binocular

79
00:02:37,910 --> 00:02:36,160
he taped a triangular hole on the front

80
00:02:39,589 --> 00:02:37,920
and got just the same results as with

81
00:02:41,270 --> 00:02:39,599
the triangular iris

82
00:02:42,790 --> 00:02:41,280
lights took on a triangular shape that

83
00:02:44,550 --> 00:02:42,800
changed with focus

84
00:02:46,150 --> 00:02:44,560
stars looked like the faint objects in

85
00:02:50,470 --> 00:02:46,160
the pyramid ufo video

86
00:02:52,869 --> 00:02:50,480
and we get the exact same noise

87
00:02:54,790 --> 00:02:52,879
this pvs-14 footage also shows a

88
00:02:55,670 --> 00:02:54,800

circular glare around the triangular

89

00:02:57,190 --> 00:02:55,680

bokeh

90

00:02:59,350 --> 00:02:57,200

something that appears in the pyramid

91

00:03:00,710 --> 00:02:59,360

ufo footage and that people thought was

92

00:03:03,270 --> 00:03:00,720

evidence that it was actually

93

00:03:05,509 --> 00:03:03,280

triangular shaped but it's not the

94

00:03:07,190 --> 00:03:05,519

circular glare is just spreading light

95

00:03:09,110 --> 00:03:07,200

it happens all through the camera so it

96

00:03:10,790 --> 00:03:09,120

looks round and even the triangle is a

97

00:03:12,550 --> 00:03:10,800

different thing only affected by the

98

00:03:14,309 --> 00:03:12,560

front iris or lens cover

99

00:03:15,589 --> 00:03:14,319

so the triangle and circle are

100

00:03:17,990 --> 00:03:15,599

independent

101
00:03:19,910 --> 00:03:18,000
so why couldn't the navy figure this out

102
00:03:23,270 --> 00:03:19,920
why did they confirm the videos were

103
00:03:25,350 --> 00:03:23,280
real why does it show up on a slide for

104
00:03:28,390 --> 00:03:25,360
the uap test force described as an

105
00:03:30,470 --> 00:03:28,400
unknown unmanned aerial system as 700

106
00:03:32,229 --> 00:03:30,480
feet

107
00:03:33,990 --> 00:03:32,239
well the key thing here is that the task

108
00:03:35,910 --> 00:03:34,000
force investigates sightings that were

109
00:03:38,070 --> 00:03:35,920
initially unidentified

110
00:03:40,149 --> 00:03:38,080
this includes examinations of incursions

111
00:03:41,830 --> 00:03:40,159
that are initially reported as uap

112
00:03:43,350 --> 00:03:41,840
when the observer cannot immediately

113
00:03:45,509 --> 00:03:43,360

identify what he or she

114

00:03:46,869 --> 00:03:45,519

is observing and i think that's what

115

00:03:49,110 --> 00:03:46,879

we're seeing here

116

00:03:50,630 --> 00:03:49,120

these are some lights in the sky that

117

00:03:52,550 --> 00:03:50,640

navy observer filmed with an

118

00:03:54,309 --> 00:03:52,560

accidentally out of focus night vision

119

00:03:56,710 --> 00:03:54,319

monocular and a phone

120

00:03:57,910 --> 00:03:56,720

initially they were unidentified maybe

121

00:04:00,070 --> 00:03:57,920

they still are

122

00:04:02,309 --> 00:04:00,080

maybe some with chinese drones at 700

123

00:04:03,670 --> 00:04:02,319

feet maybe someone misidentified planes

124

00:04:05,670 --> 00:04:03,680

heading for los angeles
