

1
00:00:03,510 --> 00:00:01,829
i've done some initial analysis of this

2
00:00:04,870 --> 00:00:03,520
new ufo footage and found some

3
00:00:07,030 --> 00:00:04,880
interesting things

4
00:00:08,470 --> 00:00:07,040
one the video does not show the object

5
00:00:10,790 --> 00:00:08,480
moving rapidly left and right

6
00:00:13,509 --> 00:00:10,800
or making any sudden moves the apparent

7
00:00:16,230 --> 00:00:13,519
rapid motions are all camera motion

8
00:00:19,029 --> 00:00:16,240
two it's not one continuous shot there's

9
00:00:21,830 --> 00:00:19,039
actually a six minute cut in the middle

10
00:00:23,590 --> 00:00:21,840
three there's no clear splash down it

11
00:00:24,310 --> 00:00:23,600
just shrinks away at or behind the

12
00:00:27,990 --> 00:00:24,320
horizon

13
00:00:30,550 --> 00:00:28,000

meaning it's miles away four it's maybe

14

00:00:32,069 --> 00:00:30,560

a large infrared layer around a smaller

15

00:00:35,510 --> 00:00:32,079

heat source

16

00:00:37,190 --> 00:00:35,520

let's break all that down number one

17

00:00:38,869 --> 00:00:37,200

the most significant thing is that

18

00:00:39,430 --> 00:00:38,879

there's no change in the left right

19

00:00:41,670 --> 00:00:39,440

motion

20

00:00:43,270 --> 00:00:41,680

no sudden moves i know it looks like

21

00:00:44,869 --> 00:00:43,280

it's flying left and then right

22

00:00:46,869 --> 00:00:44,879

but the key thing to look at is the

23

00:00:49,430 --> 00:00:46,879

motion relative to the ocean

24

00:00:51,189 --> 00:00:49,440

when the video has been stabilized try

25

00:00:53,029 --> 00:00:51,199

to ignore the crosshairs moving around

26
00:00:54,310 --> 00:00:53,039
look at the region of the ocean surface

27
00:00:56,389 --> 00:00:54,320
in the orange box

28
00:00:58,549 --> 00:00:56,399
it moves smoothly from right to left

29
00:01:00,310 --> 00:00:58,559
relative to the object which means the

30
00:01:02,229 --> 00:01:00,320
object has an apparent motion to the

31
00:01:04,070 --> 00:01:02,239
right which does not change

32
00:01:06,149 --> 00:01:04,080
if you script through the entire video

33
00:01:07,030 --> 00:01:06,159
stabilize you see this constant movement

34
00:01:09,109 --> 00:01:07,040
to the right

35
00:01:12,550 --> 00:01:09,119
the ocean surface seems to move left so

36
00:01:15,590 --> 00:01:12,560
the object seems to move right

37
00:01:17,510 --> 00:01:15,600
number two there are six minutes and 21

38
00:01:19,350 --> 00:01:17,520

seconds missing from the video

39

00:01:21,109 --> 00:01:19,360

i don't know if it was cut out or it was

40

00:01:21,910 --> 00:01:21,119

actually just two videos spliced

41

00:01:23,910 --> 00:01:21,920

together

42

00:01:25,670 --> 00:01:23,920

but you see that 27 seconds into the

43

00:01:26,070 --> 00:01:25,680

video the position of the object jumps

44

00:01:28,390 --> 00:01:26,080

much

45

00:01:31,030 --> 00:01:28,400

closer to the horizon and the on-screen

46

00:01:33,990 --> 00:01:31,040

time goes from 53 minutes and 19 seconds

47

00:01:35,749 --> 00:01:34,000

to 59 minutes and 40 seconds

48

00:01:37,109 --> 00:01:35,759

if you don't notice this cut you might

49

00:01:37,990 --> 00:01:37,119

think the object was dropping a lot

50

00:01:39,830 --> 00:01:38,000

quicker

51
00:01:42,069 --> 00:01:39,840
i suspect the missing six minutes are

52
00:01:42,789 --> 00:01:42,079
really boring just showing it continuing

53
00:01:45,990 --> 00:01:42,799
to descend

54
00:01:47,830 --> 00:01:46,000
really really slowly number three

55
00:01:49,510 --> 00:01:47,840
when the object vanishes you hear people

56
00:01:51,749 --> 00:01:49,520
in the video say it's splashed

57
00:01:53,030 --> 00:01:51,759
splashed meaning it landed or crashed in

58
00:01:55,270 --> 00:01:53,040
the ocean

59
00:01:57,190 --> 00:01:55,280
but remember this is at 11 at night very

60
00:01:59,830 --> 00:01:57,200
dark and the object seems to be miles

61
00:02:01,109 --> 00:01:59,840
away based on the extreme digital zoom

62
00:02:03,030 --> 00:02:01,119
so they are probably just looking at

63
00:02:03,910 --> 00:02:03,040

this infrared video the same thing that

64

00:02:05,749 --> 00:02:03,920

we see

65

00:02:07,590 --> 00:02:05,759

the object disappears from view right at

66

00:02:09,749 --> 00:02:07,600

the horizon it does not seem to be

67

00:02:11,910 --> 00:02:09,759

gradually obscured from the bottom up

68

00:02:13,670 --> 00:02:11,920

but rather it shrinks and vanishes and

69

00:02:15,670 --> 00:02:13,680

then grows back into view for a

70

00:02:17,110 --> 00:02:15,680

fraction of a second and then rapidly

71

00:02:18,869 --> 00:02:17,120

fades out again

72

00:02:20,949 --> 00:02:18,879

some of that is hard to see due to video

73

00:02:22,229 --> 00:02:20,959

compression but the shrinking seems

74

00:02:26,470 --> 00:02:22,239

fairly clear

75

00:02:28,470 --> 00:02:26,480

which brings us to number four

76

00:02:30,550 --> 00:02:28,480

this shrinking effect would happen if

77

00:02:31,830 --> 00:02:30,560

what we were looking at was an infrared

78

00:02:34,630 --> 00:02:31,840

glare

79

00:02:37,430 --> 00:02:34,640

black is hot here and a very hot object

80

00:02:39,030 --> 00:02:37,440

like a flare creates a glare around it

81

00:02:40,150 --> 00:02:39,040

which is a lot bigger than the actual

82

00:02:42,070 --> 00:02:40,160

flare

83

00:02:43,910 --> 00:02:42,080

if a solid object goes behind the

84

00:02:44,790 --> 00:02:43,920

horizon then you see it cut in half like

85

00:02:46,869 --> 00:02:44,800

this

86

00:02:48,229 --> 00:02:46,879

but if it's a glare then you would just

87

00:02:50,150 --> 00:02:48,239

see the glare shrink

88

00:02:51,830 --> 00:02:50,160

and grow as the smaller heat source is

89

00:02:53,110 --> 00:02:51,840

obscured and pops back into view and

90

00:02:56,229 --> 00:02:53,120

then it's obscured again

91

00:02:57,830 --> 00:02:56,239

possibly by waves right on the horizon

92

00:02:59,589 --> 00:02:57,840

one thing that seems very clear from all

93

00:03:00,350 --> 00:02:59,599

this is that there is zero indication

94

00:03:02,550 --> 00:03:00,360

that it's a

95

00:03:04,149 --> 00:03:02,560

trans-medium craft that is transitioning

96

00:03:07,430 --> 00:03:04,159

to flying underwater

97

00:03:09,589 --> 00:03:07,440

we just lose sight of it at the horizon

98

00:03:10,630 --> 00:03:09,599

so what are we looking at initially

99

00:03:12,309 --> 00:03:10,640

thought a balloon

100

00:03:14,149 --> 00:03:12,319

simply because it seemed round and it

101

00:03:16,070 --> 00:03:14,159

was descending so slowly

102

00:03:18,309 --> 00:03:16,080

my number two hypothesis was a glare

103

00:03:19,910 --> 00:03:18,319

from a flare descending on a parachute

104

00:03:21,509 --> 00:03:19,920

and i move more towards that after

105

00:03:23,830 --> 00:03:21,519

looking at the shrinking that looks like

106

00:03:25,830 --> 00:03:23,840

obscuring by the horizon

107

00:03:27,430 --> 00:03:25,840

but this arrow here seems to indicate

108

00:03:29,270 --> 00:03:27,440

where north is and the wind would have

109

00:03:31,030 --> 00:03:29,280

been coming roughly from the north

110

00:03:32,789 --> 00:03:31,040

and the apparent motion of the object

111

00:03:34,070 --> 00:03:32,799

seems to be towards the north i.e

112

00:03:35,830 --> 00:03:34,080

against the wind

113

00:03:37,350 --> 00:03:35,840

so that seems to point more towards a

114

00:03:39,430 --> 00:03:37,360

powered craft

115

00:03:41,350 --> 00:03:39,440

but then if the object is far beyond the

116

00:03:42,789 --> 00:03:41,360

horizon then maybe this apparent motion

117

00:03:44,550 --> 00:03:42,799

is a bit of an illusion

118

00:03:46,229 --> 00:03:44,560

a combination of the motion of the ship

119

00:03:47,750 --> 00:03:46,239

the waves and the object

120

00:03:49,270 --> 00:03:47,760

with some of the apparent motion perhaps

121

00:03:51,350 --> 00:03:49,280

come from parallax

122

00:03:53,190 --> 00:03:51,360

it's hard to tell and it's unfortunate

123

00:03:55,110 --> 00:03:53,200

that yet again the best ufo videos that

124

00:03:57,990 --> 00:03:55,120

we get are these really poor quality

125

00:03:59,990 --> 00:03:58,000

low resolution videos so i don't know

126
00:04:02,070 --> 00:04:00,000
maybe a balloon or a parachute flare or

127
00:04:03,589 --> 00:04:02,080
maybe a distant helicopter maybe a drone

128
00:04:05,830 --> 00:04:03,599
maybe a chinese drone

129
00:04:07,750 --> 00:04:05,840
maybe a plane really far away maybe an

130
00:04:09,030 --> 00:04:07,760
alien spaceship doing some really boring

131
00:04:11,750 --> 00:04:09,040
flying

132
00:04:13,429 --> 00:04:11,760
more information will be very useful but

133
00:04:14,869 --> 00:04:13,439
what we have is not really super

134
00:04:16,870 --> 00:04:14,879
interesting

135
00:04:19,509 --> 00:04:16,880
something descends slowly towards the

136
00:04:21,909 --> 00:04:19,519
horizon as slow as a setting star
