A long-time enthusiast of classic horror, classic cars, and UFOs, Kerry tells us what happened to the poor little alien who ran into Judge Proctor’s windmill in April, 1897, in Aurura, TX, and ended up on public display before being buried in the local cemetery.

A controversial story backed up by news clippings from the period, Kerry became fascinated with the incident because of his own experience as a kid seeing a UFO land in his hometown. Taking that passion, Kerry, along with his friend John Cochran, spent the next several months working to form an outline for a screenplay based on the fictional hunt for the extraterrestrial buried in the Aurora cemetery. From there, the screenplay grew into the "Traveler," which is a novelized version of this earth crashing encounter.

Kerry has also contributed a chapter in the new book "Alien Lives Matter: It's OK to be Grey," published by Tim Beckley’s Inner Light/Global Communications During the course of the show, Beckley points out two jaw numbing synchronizations related to the much later UFO crash outside, Roswell, NM.

Some see a similarity between the Marley Woods events and the weird phenomena reported at Utah's Skinwalker Ranch. Today, the conversation centers around the most recent activity at this rural Missouri location, and includes an analysis of the various types of "spook lights" reportedly seen, and how a certain colored cluster of lights have had a negative effect on the witnesses. Tom has worked as a divemaster, machinist and electrical engineer on projects in the United States, red China and Bermuda. He has been an independent UFO researcher since 1969 to 1998 at which point Walt Andrus founder of MUFON asked him to become a section director for MUFON. Later he would go on to be assistant state director for Missouri MUFON. He then co-founded the MUFON dive team with Debbie Zieglmeyer. Ferrario then joined Ted Phillips as his assistant in 2006 and later became part of Ted's S.I.U team. Tim Beckley and Tim Swartz bring the Exploring The Bizarre (KCORradio.com) a very fascinating series of USO events - Undersea saucers.

Quartermaster Joseph Foster was on deck when he saw three objects careening at 3500 miles per hour over his Coast Guard cutter, the Mellon. Just ten minutes later, he learned of the sinking of a Soviet submarine, carrying three armed nuclear ballistic missiles and torpedoes, lost with all hands. the mysterious objects had approached from that same direction 800 miles away. The 1968 incident prompted the CIA (Project Azorian) to investigate the raise of the sub since it was during the Cold War. Foster's complete experience is told in, "Alien Lives Matter -- Its Ok To Be Grey," by Tim Beckley, Tim Swartz and 20 other contributors.

Exploring the Bizarre (KCORradio.com) hosts Tim Beckley and Tim Swartz make history again as they speak with BARBARA DELONG who was one of the original witnesses to the Ann Arbor/Dester/Hillsdale "Swamp Gas" saga as made infamous by the late Dr. J. Allen Hynek who was still on the payroll of Project Blue Book and told by his "bosses" to come up with an explanation -- "or else!"

[Transcript Link](#)

On March 21, 1966, a group of young women in MacIntyre Residence at Hillsdale College saw strange, flashing lights hovering over the Arboretum. William "Bud" Van Horn, Hillsdale County civil defense director, went to the college and observed the lights rising to a point just below a nearby airport beacon and then settling down to earth again. Even though Hynek noted the "honest reporting by the young ladies at Hillsdale College," he suggested the UFO sightings were the result of "swamp gas."

This week on Exploring the Bizarre, our guest is Barbara DeLong, who was one of the women at Hillsdale College who first saw the UFOs from a second story window in MacIntyre Residence. Barbara will discuss what she witnessed that night, and whether or not she agrees with Dr. Hynek's evaluation of the case. This is a very historical run down -- an exclusive, a first, like only we can bring you.

Barbara also discusses how this event lead up to her own consciousness expansion, her psychic work and her keen perception on channeling. DeLong hosts her own podcast which you can find

Joining us will be Ted's long-time friend and associate, Thomas M. Ferrario, who was a part of Ted's Special Investigations Unit (S.I.U.). The S.I.U. is a small group of dedicated researchers that functions like the Navy SEALs in that they are inserted into UFO hotspots armed with electronic and imaging equipment. The S.I.U. is probably best known for their intensive investigations of Marley Woods (pseudonym), a location that has been visited on numerous occasions over the years by small, inexplicable lights that vary in size, color, behavior and performance. Ted, of course, was a close associate of Dr. J. Allen Hynek whom he first met in Socorro, NM, at the site of police officer Lonnie Zamora's world famous close encounter with a UFO and its occupants, that left behind physical evidence in the form of burned soil and indentions left by its landing gear.

Thomas M. Ferrario has Worked as a divemaster, machinist and electrical engineer on projects in the United States, red China and Bermuda. Has been an independent UFO researcher since 1969 to 1998 at which point Walt Andrus founder of MUFON asked him to become a section director for MUFON.

We promise the weird on Exploring the Bizarre (KCORradio.com) and we deliver! Hosts Tim Beckley and Tim Swartz welcome Australia's "first lady of UFOlogy," SHERYL GOTTSCHALL back to our Heavenly microphones.

Sheryl is President of UFO Research Queensland, established in 1956, and has been interviewing witnesses for 31 years about their UFO sightings and close encounters.

This time around Sheryl update us on the most recent UFO activity in Australia such as cases involving missing pregnancies, invisibility, missing time (one of a police trainee squad at a military base missing for 3 hours), and vehicle interference. She also goes into elaborate detail about the first saucer nests going back to 1966 in Tully, Australia, which were the forerunners we assume of the crop circles phenomena which encircled the globe within months. The group's investigation of this world exclusive event is top notch, as "scientific" as one can possibly get.

So impressed are we with the group's work, we devoted an entire section to its research into UFOs at tree top level in our recently published, "Tim Swartz's Big Book Of Alien Encounters." Sheryl is a regular writer for the Australian bi-monthly publication UFO Encounter, and the UFO Truth Magazine published in the UK by Gary Heseltine. She also co-hosts the weekly radio show Strange Encounters and co-hosts Strange Encounters Downunder zoomcasts with author and contactee, Suzy Hansen. Links: UFO Research

Exploring the Bizarre's (KCORradio.com) Tim Beckley and Tim Swartz welcomes cryptid ufologist RYAN FUSCO who almost scared the hell out of us with his stories of phantoms, monsters, and "space" invaders. [Transcript Link](#)

Fusco got his training wheels into the unknown at an early age thanks to a strange encounter that involved a UFO fly over and a deposit of a strange goo-like substance on top of the auto he was traveling in.

Ryan was born in Olean, New York. At the age of eight, his family moved to Pittsburgh, Pennsylvania where he still lives today. Shortly after moving to Pittsburgh, Ryan, along with his father and brother, saw something in the sky they could not identify. It was a green light they got so close to their car it actually was dropping some material on it. Ryan said that "You could hear it hitting the roof of the car." Suddenly, the UFO shot up into the sky and disappeared...ever since then, he has had a fascination with the UFO topic. Ryan has been fortunate enough to be in the right place at the right time for some pretty amazing UFO sightings which ultimately involved in the UFO field. In 2016 he finally started to investigate UFO sightings locally.

In recent months he has joined phantomsandmonsters.com to be the western Pennsylvania investigator for the blog. Since November he has done UFO updates every Thursday night on 9:20 Eastern Time. At night dreams talk radio (nightdreamstalkradio.com). He

[Transcript Link](#)

Indeed, we ask, is there any evidence that UFOs are visitors from other planets? For years, many UFO researchers have tried to find proof that UFOs are actually extraterrestrial spaceships from beyond our solar system. However, as far as we know, there has been no tangible proof that this theory is correct. Our guest this week in her new book, "Future Humans and the UFOs, Time for New Thinking," presents the possibility, backed with physics and over-looked evidence, that UFO occupants are time traveling humans. Diane feels that there is sufficient evidence that some UFO occupants are "Future Humans" who, for whatever reasons, have managed to solve the mystery of time travel to keep a close eye on their ancestors.

JUST WHO IS DIANE TESSMAN?

In the late 1970s, Diane Tessman was field investigator with the Aerial Phenomenon Research Organization (APRO) and Florida State Section Director for MUFON, but her work on the UFO puzzle began when she was 4 years old, when she was abducted twice by UFO beings in 1952/'53. While living in Ireland she studied Celt shamanism and folklore. She also lived near Giant Rock in the Mojave Desert of California, where George van Tassel met the ETs

				Are there some locations that have a better chance to spot a UFO than others? Most of the time seeing a UFO is only by a lucky chance...being in the right place at the right time. But, are there some areas where UFOs seem to congregate?		
				The San Luis Valley, a region in south-central Colorado that overlaps into New Mexico, has had UFO reports dating as far back as the 1600s. The number of UFOs seen in the particular area is why our guests this week have dedicated so much of their time.		
				Judy Messoline owns and operates the UFO Watchtower (www.ufowatchtower.com/) near Hooper, Colorado, and Christopher O'Brien(http://ourstrangeplanet.com/) has logged in more than 20 years looking into UFO sightings, animal mutilations and other bizarre activity in the valley. Many of the ships, Cornet says disguise themselves as "ordinary" aircraft, as if they were coming in for a landing. They also change shape in front of witnesses. Since then, he has interviewed hundreds of witnesses and investigated a wide variety of paranormal phenomena. He is a field investigator for the Mutual UFO Network (MUFON), a ghost hunter, a paranormal researcher, and the author of 24 books and more than 100 articles on UFOs and the paranormal. His articles have appeared in numerous magazines including Fate, Atlantis Rising, MUFON UFO Journal, Nexus, Paranormal Magazine, UFO Magazine, Mysteries Magazine, Ufologist and others. His writing has been translated into several different languages including German, French, Portuguese, Russian and Icelandic. Warren dives into our latest book "UFOs Deja Vu" and agrees that not all UFOs are "nuts and bolts," but are "paraphysical in nature." Examines why UFOs are seen in certain locations and agrees that sometimes the camera can "see" what the naked eye cannot! He quotes extensively the shamanistic research and work of clairvoyant Maria D' Andrea who says she has been able to contact beings from parallel worlds while traveling out of body.	Transcript Link
				<p>Josh also theorizes along with author Tim Beckley about the reason UFOs are often seen around sacred Native American grounds, like those on the Yakama, WA reservation. Josh relates -- as described in the book -- his personal involvement over the years with North Carolina's famous Brown Mountain Lights and our "association" with a local contactee Ralph Lael who kept a little man in a box under the front counter of his roadside museum. And not to be forgotten is Beckley's holiday trip to the scene with UFOlogical trickster Jim Moseley and astute occultist Bishop Allen Greenfield. Josh also chimes in at the end of the broadcast about his own extensive research into the paranormal in the Las Vegas area (where he has recently moved to). "September 16, 2017 is the day my life changed," Sev proclaims. "The secret I had been hiding for 45 years finally exposed. The reality of my life-long experiences could no longer ignored. What I thought were dreams, were not! Dreams don't burn a red X into your back."

This is how Sev Tok starts in describing her encounters with the unknown. She says that she has had encounters with aliens in Baltimore, MD on Capitol Hill, Washington DC, and in Roswell. For most of her life she has had unexplained strange marks and bruises on her body. She spent decades ignoring her conscious memories filled with ETs, but she had a gut feeling her memories were real, she just couldn't admit it to herself or to others.

When not being "attacked" by aliens/reptilians, Sev is a Soul Purpose Coach conducting Soul Purpose Readings. Her ability to read her client's energy field and "hear, feel, and see" inter-dimensional information serves of useful purpose. Her first book, "You Have The Right to Talk to Aliens" is her coming out. In the book, she describes her many alien contacts and how she transformed her fear of ETs to understanding their intentions. Author of "The UFOlogy Umbrella" and "UFO Photo," Jason combines his experience in the RAF and career in engineering with the study of photographic/image/video-footage analysis of UFOs and associated anomalies to determine which pictures of "flying saucers" are authentic and which are likely to be "faked." Those skeptical on the reality of UFOs often point out that there has never been any GOOD photos. With practically everyone now carrying cameras in their cellphones, where, the skeptics ask, are the all to genuine UFO pictures? The problem is that if a UFO photo looks too good, it is automatically dismissed as a hoax. On the other hand, a blurry photo is usually disregarded as "it could be anything!" In many respects this edition of the program is a retrospect of occultism in NYC in the late Sixties and Nineteen Seventies when Beckley set up one of the first metaphysical centers in the country and Carole happened to be one of his students. Classes in astral projection, how to read tarot cards ,hypnosis, mediumship and witchcraft (in particular the brand known as WICCA) were the order of the day with some of the most famous paranormalists cutting their teeth at the school.</p> <p>Carole first met Timothy when she would attend talks and workshops on UFOs and paranormal topics at Beckley's Metaphysical Center. It was at Beckley's Metaphysical Center where Carole first met Walli Elmlark, the White Witch of New York. In Beckley's book "David Bowie, UFOs, Witchcraft, Cocaine and Paranoia - The Occult Saga of Walli Elmlark The "Rock N' Roll Witch of New York," Carole talks about how Walli Elmlark was the first working witch she had ever met. "She was my teenaged idea of an enchantress, Carole said. "She was beautiful, magical and was part of a world I didn't know. Walli looked like the kind of woman I wanted to be. What I learned from her was the ritual structure that is the basics of magick as practiced today. It was the start of my personal practice."</p> <p>Carole is also interested in UFOs and has written for The Village Voice, the Isis-Seshat Journal and other publications.</p>	Transcript Link

Join Exploring the Bizarre (KCORradio.com) hosts Tim Beckley and Tim Swartz as they climb the beanstalk with guest ADAM STOKES. Jack and the Beanstalk is the fairy tale that probably introduces most children to the world of giants. Ancient myths and folklore often reference giants as horrible creatures that have superhuman strength, a long lifespan, and are fond of terrorizing humans. In the Bible, the Anakites, who "come from the Nephilim," the Emmites, and the Rephaites, were giants the Israelites found living in the Promised Land. Adam O. Stokes discusses the possible origins of advanced giants who settled throughout North America and whose reality is still hotly contested by most archaeologists. Adam Oliver Stokes holds degrees in religion from Duke University and Yale Divinity School. He has written on numerous subjects including biblical studies, classical studies, LDS theology and ancient American civilization particularly the phenomenon of American ceremonial mounds and giants. His book, "Perspectives on the Old Testament," was published by Cognella Press in 2018. In addition to this, his work has been featured in the Journal of the Hebrew Scriptures, the Journal of the Book of Mormon, BYU Quarterly, the Classical Outlook and Ancient American magazine.

2019 10 10 Mr UFOs Secret Files <https://youtu.be/o9oNu08BT1M> Terror In KY Update Hopkinsville's Little Green Men

"Exploring the Bizarre" (KCORradio.com) hosts Tim Beckley and Tim Swartz welcomes GERALDINE SUTTON STITH in an historic event! 64 years ago, a rural family in Kentucky found themselves face to face with the unknown. This bizarre encounter brought the Sutton family into the bright spotlight of unwelcome media attention in which they never truly were able to escape. The Sunday of August 21, 1955 has gone down in UFO history as the night of the Kelly-Hopkinsville encounter. That night, after a UFO was seen to land behind a nearby barn, a number of strange humanoid creatures spent the night tormenting 11 people cowering in the farmhouse. This week, Geraldine Sutton Stith, will relate what it was like to grow up with the specter of the unknown hanging over her family and how, despite assertions from the skeptics, she knows that something truly frightening happened on that dark night with the family taking pot shots at the creatures who tried to enter their living quarters. This story is one of the most repeated in UFO history -- it is a real classic -- and to have someone on from the actual family is a world exclusive treat!

Geraldine is the author of the books "The Kelly Green Men" and "Alien Legacy."

In her teenage years she developed an interest in the paranormal and in 1988 she became an active UFO investigator for the Brisbane-based organisation, UFO Research Queensland (UFORQ) and has since held two terms as president for a total of 24 years. Soon after joining UFORQ, Sheryl had her own close encounter with the commonly described "grey aliens" appearing to her in her home. This was followed by the development of a serious ten year illness during which time she experienced a near death experience (NDE), out of body experiences (OBE) and other mystical, paranormal and psychic phenomena. Her quest for what was happening to her, led her on the path to shamanism and the understanding that these events were an invitation, but more importantly, an initiation into other realms populated by a variety of beings. Her personal experiences catapulted her into the world of shamanism and she now uses and teaches shamanic practices. In 1992 Sheryl also established the first close encounter support group in Brisbane after Budd Hopkins spoke in Brisbane for the first time at a conference. Sheryl is a regular writer for the Australian bi-monthly publication UFO Encounter, and the UFO Truth Magazine published in the UK by Gary Heseltine. She also co-hosts the weekly radio show Strange Encounters and co-hosts Strange Encounters Downunder zoomcasts with author and contactee, Suzy Hansen.	Transcript Link

There used to be a time when researching ghosts and the paranormal was considered pretty far out there. (Though some may still think this.) Now we have television and radio shows dedicated to "ghost hunting," and books about spirits and the supernatural are more popular than ever. There are even conferences that bring those interested in the subject together to listen to speakers and even investigate nearby "haunted" locations. Denise started Pridemore Paranormal in 2009, and along with her husband, became volunteer tour guides in 2011 for the Infamous Sallie House in Atchison, KS. Due to the experiences Denise has had at the Sallie House she was asked to appear on the show Ghost Adventures where she was asked to give the crew a tour of Sallie House. That was a very interesting experience for Denise and has brought her some local and national popularity. The rumors have circulated for years that technology of some sort was retrieved from a crashed UFO, either from Roswell, or some other crash during the late 1940s. The late Col. Philip Corso claimed that he was given the responsibility to farm out a small number of unknown items taken from the Roswell UFO in order to discover what they were and how they could be reproduced. This week's guest on Exploring the Bizarre, Don Siedenbourg, claims that more than electronics or hardware was retrieved from a crashed UFO. Siedenbourg says that he was part of a military experiment testing an alleged extraterrestrial "food source." Don Siedenbourg was 18 years old when he enlisted with the United States Army in 1954. He spent the first three weeks of his enlistment at Edwards Air Force Base in California where he participated in the testing of a food source that supposedly came from extraterrestrial sources. This is one of the few shows Don has consented to do, though he does welcome contact through Face Book and there are several of his videos "floating around" on YouTube.	Transcript Link
2019 08 24	Mr UFOs Secret Files	https://youtu.be/Yr3KbjqN0dM	The Mythology Of UFOlogy By A Long Time Student	Hosts Tim Beckley and Tim Swartz welcome to Exploring The Bizarre (KCORradio.com) DAVE HALPERIN whose friendship with Beckley goes back to when they were both teenagers. In the UFO controversy, the skeptics are right about the less important point: UFOs have no physical existence. The UFOlogists are right about the more important point: UFOs are a vitally important subject, never to be dismissed as "bunk" or "claptrap." Attention must be paid. UFOs, like religion, are a human phenomenon. They have nothing to do with space travel or life on other planets. Back in the 1960s, David Halperin was a teenage UFOlogist. Later he became a Professor of Religious Studies at the University of North Carolina at Chapel Hill, where he taught until his retirement in 2000. His specialty: religious traditions of heavenly ascent and otherworldly journeys. He is the author of five books on Jewish mysticism and messianism, and a novel, "Journal of a UFO Investigator," published in 2011 by Viking Press and translated into Spanish, Italian, and German. His non-fiction book, "Intimate Alien: The Hidden Story of the UFO," will be published next year by Stanford University Press. He blogs on UFOs, religion, and other subjects dear to his heart at www.davidhalperin.net .	Transcript Link

2019 08 18	Mr UFOs Secret Files	https://youtu.be/Bwk3VVenFhc Is DOGMAN a Shape Shifter	<p>Exploring The Bizare" (KCORradio.com) hosts Tim Beckley and Tim Swartz talk with JOHN KACHUBA about: "Shedding Our Skin For Something Better." Call them Skin-Walkers, Kitsune, Rougarou, or probably the best known through Hollywood and pop culture, the Werewolf. The notion of shapeshifters, a person that can take the shape of another creature, can be traced back thousands of years, permeating various cultures and religions. Fairy tales and mythology abound with tales of shapeshifters, who, usually with the help of magical powers, could transform themselves at will. While others would take on the form of an animal against their will because they had been cursed. Even modern tales involving UFOs have their shapeshifters known as Reptilians. These creatures are believed to be a race of aliens who have infiltrated mankind with their ability to shapeshift into human form. Our guest this week, John Kachuba, says that even though the concept of shapeshifters has been with us for thousands of years, they have not been relegated to some mythological closet but are very much with us today. Shapeshifters represent the fantasy of being able to turn one's self into something more attractive, more powerful, which is reflected in the popularity of such books as Twilight (the books and the television series), Harry Potter and The Hunger Games. John is the author of such books as: "Ghosthunting Ohio: On the Road Again"; "Dark Entry"; and "Shapeshifters: A History." Website: johnkachuba.com</p>	Transcript Link

With her proximity in the state of Utah, Erica has had a persistent interest in the Skinwalker Ranch, a location of regularly reported paranormal activity, where she has witnessed unexplainable phenomena herself. Erica has assembled several decades worth of case reports of mass UFO sightings, alien abduction reports and animal mutilations from her years of field research in and around the ranch. She has studied at length the papers of the late phenomenologist Dr. Frank Salisbury of the Department of Plant Science at Utah State University. Salisbury contributed important work on UFO reports in the state with the help of "Junior" Hicks, a well-respected UFO investigator.

This, coupled with her long-term interest in strange phenomena of nature, led her to take her first steps into radio in 2014 by developing her own programming and interview techniques of

Owen's had his own paranormal experience at the Mission Inn in Riverside, California where he witnessed a "shadow figure" that caused him to sleep with the light on for the next ten days. This experience, (and others), led to Craig's book, "Haunted By History," which is the result of three years of research with eight historic and allegedly haunted Southern California hotels along with staged photo shoots recreating the rumored apparitions.

Craig also has the Facebook page "Bizarre Los Angeles," started in 2010, which focuses on Old Hollywood personalities, forgotten tales and occasional ghost stories from around Los Angeles.

This is more than just the spirits of Marilyn Monroe, Rock Hudson and Liberace -- we are dealing with. These are serious haunting that should be given serious attention, such as the spirit that Owens himself encountered in a Warner Brothers studio.

Strange orbs -- usually orange in color, but sometimes yellow, green or blue -- have been showing up in photos and on YouTube videos for the last couple of years in increasing numbers. Some are as small as a baseball, others could be 20-30 feet in diameter. They are NOT ball lightning or any other natural phenomena, but seem to be under intelligent control. Regan and her husband had a sighting of an orb some time back that included a period of missing time. She later had strange and frightening dreams which involved "aliens." Are these orbs spirits? Ultra-terrestrials in disguise? The conversation also gets around to reports of the female in white which some like the late contactee Dana Howard claim come from Venus, while other witnesses tie their sightings in with visions of the Virgin Mary. Have you ever heard a voice calling your name in the middle of the night? Or seen a misty figure following you down a dark street? Almost everyone at some point in their lives have had a "paranormal" moment. Sceptics tend to dismiss these experiences as hoaxes or mistakes of perception...yet, who can tell? Our mainstream scientific understanding of human consciousness is by no means complete. There is still no consensus among researchers about what embodies "normal" and "abnormal" or "altered" states of consciousness. We might as well say that the paranormal exists as an intangible world that interacts with us. This week , our guest talks about her new book "Portal: A Lifetime of Paranormal Experiences," a compilation of eyewitness accounts and her own personal encounters with the unknown and terrifying. Adele Casales Rocha has traveled extensively to over 26 countries and has compiled accounts of terrifying and uncanny experiences in both her native country of the Philippines and abroad. Every new finding is pushing us towards the acceptance that we are not the first civilization on this planet...that there have been others who have been lost in the sands of time...existing long before our current civilizations and inhabiting all corners of the world.</p> <p>One persistent story is that at one time a race of giants inhabited the Earth. Ancient texts such as the Epic of Gilgamesh, the Dead Sea Scrolls Book of Giants and Indian scriptures that refer to the Daityas(giants)indicate that belief in giants was widespread. However, are these stories nothing more than myths and legends? Is there any basis of reality to these legends?</p> <p>Based on the fragments of evidence, traditions, and lore, we have limited knowledge of the earliest days of human civilization. It's probable that whole civilizations, some with advanced technology, have come and gone. Dulce, MKUltra, the Mysterious Valley, Mutations, Area 51, Bob Lazaar	Exploring the Bizarre (KCORradio.com) hosts Tim Beckley and Tim Swartz welcome NORIO HAYAKAWA and CHRIS O' BRIEN. The UFO mystery has confounded researchers for years. In the early 1950s, many were convinced that UFOs were physical spaceships from other planets. This made sense as there were many examples of UFOs being picked up on radar and leaving physical traces behind when then landed (e.g. broken tree branches, burn marks in the grass). In the 1970s a new idea emerged from people such as Dr. Jacques Vallee, John Keel and Dr Berthold Schwarz that the UFO phenomena also has characteristics that could best be described as "paranormal." Witnesses would find themselves "haunted" by UFOs and their occupants who behaved more like ghosts, angels or even demons. Places such as the "Skinwalker Ranch" in Utah and the San Luis Valley are hotbeds of UFO activity, but other bizarre occurrences such as cryptid creatures and cattle mutilations are reported side by side with the UFOs. Norio and Chris manage to sift through all the bull and come up a contemporary picture of what UFOs may and may NOT be. Free newsletter www.ConspiracyJournal.com	Transcript Link

Gef The Talking Mongoose	Ever want to know what's going on inside Area 51 UFO wise, and what makes a mongoose think he can talk? Tim Schwartz and Tim Beckley host of Exploring the Bizarre (KCORradio.com) pit down guests NICK REDFERN and HERCULES INVICTUS to find out some of the answers. Ex Brit Redfern is just out with a 400+ page tome. "Area 51 -- The Revealing Truth of UFOs, Secret Aircraft, Cover-Ups & Conspiracies," may be a long title but punker Nick goes to any means to get to the bottom of the well. Is Bob Lazar telling the truth? Do we have underground bases there? Have civilian reporters been murdered because they "knew too much" and were ready to blab? Hercules knows everything there is to know about the Greek Gods of Olympus and says they still come down from the mountain to mate with those living on the Greek Isles. He channels the spirits of the gods and says they are as real today as they were in the time that legends were being built. He will discuss books he has contributed to including, "Screwed by the Aliens," "UFO Hostilities," and the latest "Gef The Talking Mongoose: 8th Wonder Of The World." which co-host Tim Swartz had a might paw in putting together. Many refer to it as the subject's "Golden Age." Exploring the Bizarre (KCORradio.com) hosts Tim Beckley and Tim Swartz welcome ADAM GORIGHTLY and GREG BISHOP who reveal little known facts about George Adamski, the grandfather of the contactee movement who claims to have met Orthon in the desert back in 52. Beckley joins in the chatter about the coming of the Space Brothers, adding more than his two cents to the festivities, having been around during that period as a young wet behind the ears UFO researcher and in recent years have reprinted many New Age books containing channelings and tall tales of trips onboard alien space ships. Gorightly and Bishop have written a tell all book that is both entertaining and enlightening. "A. Is For Adamski" is certain to spin a few heads, just like the flying saucers used to spin in the Golden Age. Free newsletter http://ConspiracyJournal.com	Transcript Link

Secret Files <https://youtu.be/b5kXsz-Tkrc> Visiting Ghostville - Exploring the Bizarre (KCORradio.com) hosts Tim Swartz and Tim Beckley get ready for a very spooky evening as they welcome KEITH LINDER and JENNY ASHFORD to talk about one of the most perplexing haunts that have mystified teams of paranormal investigators. When Keith and his girlfriend moved into their new rental home, they thought that had found their perfect place. It was a fairly new house and was located in a great neighborhood. The only problem was that there was already something else in the house that was apparently not very happy to be sharing the place with new occupants. This began an almost four year ordeal for Keith as he both battled and sought to understand the unseen entities who constantly bedeviled him and his lady friend. Researcher and author Jenny Ashford documented the strange phenomena in Seattle and making an honest presentation of all the facts indicating that this is a solid case of paranormal happenings. By his teens Topham had exhausted his local library's supply of books on UFOs, ESP, and the like, so he joined Contact, a British UFO organisation, as well as subscribing to the Flying Saucer Review. With his mates from high school he got a small band of like minded teens together and they began to experiment with the Ouija board in the vain hope of contacting, 'the space people', as George Hunt Williamson wrote about them in "The Saucers Speak." Events escalated leading to bizarre Morse code signals on a domestic portable radio. Years later he was involved with another group, which met to use the board in an old Tudor Hall in Warwickshire, England. This period of activity included working alongside renowned psychic investigators Graham Philips and Andrew Collins. The results were exceptional and the group received many apports in the form of books. Gemstones, Cartouche cards and a wonderful photograph. Through the work of several groups, Charles became part of what is popularly known as Psychic Questing in Britain. Junkie on the other hand leads a double life: By day he serves as Grand Master in the International Sacred Order of Lucha Libre, but at night he pursues his life-long study of everything considered mysterious and/or 'paranormal' - a term he personally detests. When he's not exploring the web looking for his daily fix of Fortean, he can be found blogging, doodling, fooling around and offering his services as news administrator at The Daily Grail. Warren	Based on the research of more than a dozen UFO and paranormal researchers "Speaking of Strange" host and frequent Coast to Coast AM guest, JOSHUA P. WARREN says its almost a sure bet that humans have mated -- either willingly or unwilling -- with extraterrestrials. Indeed, the Sexterrestrials are here -- and they want to mate with you! "They saw," says the Bible (Genesis 6 1-2,4), "that their daughters were fair and took them as wives." For eons they have been pillaging and plundering our planet, and despite the fact that we might silently oppose them the molestations go on, and, despite the credible nature of a large percentage of such encounters, these sensationalistic events are perhaps the most closely guarded secret of the UFOlogical community, for fear that such disclosure will lead to ridicule on the part of skeptics, the scientific community, the media, and a large portion of the general public, who have not been privileged to scrutinize the available data -- much of which is presented in the pages of the new book Tim Beckley's "Screwed By The Aliens." 2018 09 01	Mr UFOs Secret Files	https://youtu.be/Rzvfl7ZKXa8	Reach out and touch someone...FROM BEYOND!	<p>Going as far back as the 19th century, electronic devices have been used in an attempt to contact the astral realms, or allow the astral realms to talk to us. Thomas Edison and Nikola Tesla suggested that communication with the dead might be possible using electronics. Ghost hunters have popularized using digital recorders in order to capture EVPs (electronic voice phenomena). But this was being done decades ago when people such as Konstantin Raudive and Fredrich Juergenson began to hear unexplained voices recorded on blank audio tapes.</p> <p>There have also been cases where people have received strange telephone calls, text messages, emails and radio broadcasts claiming to be messages from dead loved ones. There is even the story about a haunted cable TV box. This week on Exploring the Bizarre, William J. Hall and Jimmy "Mr Haunted" Petonito will discuss their new book "Phantom Messages" and attempt to unravel the mysterious world of impossible communications.</p>	Transcript Link

Swartz	To this day, it's unbelievable to think that human experiments continue -- it is also unconscionable to even think that DNA harvesting, along with organs skin and other body parts are being used illegally for radiation and biological experimentation.	Transcript Link
				The United States under the direction of several alphabet agencies and the Rockefeller foundation have conducted illegal experiments on humans in the past in order to document the effects of biological agents and radioactive material on the DNA of the subjects.	
				The experiments include: the exposure of people to many chemical and biological weapons (including infection of people with deadly or debilitating diseases), human radiation experiments, injection of people with toxic and radioactive chemicals, surgical experiments like KX-338, interrogation and torture experiments, tests involving mind-altering substances, and a wide variety of others. Many of these tests were performed on children, the sick, and mentally disabled individuals, often under the guise of "medical treatment". In many of the studies, a large portion of the subjects were poor, racial minorities, or prisoners	
				Funding for many of the experiments was provided by the United States government, especially the United States military, the Central Intelligence Agency, or private corporations involved with military activities. The human research programs were usually highly secretive, and in many cases information about them was not released until many years after the studies had been performed.

Vivian outside of the ring was Suzanne Miller who worked with Beckley as a psychic at the NY School of Occult Arts and Sciences and was one of the authors of "Curses and Their Reverses." I guess you could say she lived in a parallel universe. To salute her Tim B and Tim Swartz have tag teamed up with Tatevik who was a close friend of Viv and has some psychic tendencies of her own (they often discussed the topic) and Donnie who is an independent wrestler out of Augusta, Georgia who just happened to be the local "go to see" UFOlogist when there is something strange being observed in the sky (or on the ground for that matter). Vivian worked with Talismanic Magic and symbols and was fascinated with the Ouija Board. At 6 foot 1 plus with her high wrestling boots on iSue stood out, especially when she traveled with Beckley to magickal spots to check out the world of the weird. She appeared twice as the cover model on "Beyond Reality" magazine. So next time you watch a match you'll know that Pro Wrestling and the paranormal have a lot in common. Not only have many wrestlers used the supernatural as part of their persona (Gangrel, Papa Shango and Kane and The Undertaker), but they have had strange experiences to (pardon the expression) boot. Besides kidnapping humans, scaring the pants off of shotgun totting hunters, and running through dusty old homes, the Goblin Universe has its moments of levity. Just ask Tim Beckley and Tim Swartz hosts of KCORradio.com "Exploring the Bizarre" heard 10 PM Eastern every Thursday. Some call them the Abbott and Costello of the paranormal, and you can see why from these animated outtakes, created by cartoon wizard Peter Bernard for "Mr UFOs Secret Files," the YouTube version of their offbeat show that is guaranteed to knock your socks off whether you live in this universe or a parallel one. Special Guests Canadian CHRIS RUTKOWSKI and Britisher NIGEL WATSON come to Exploring the Bizarre (KCORradio.com) packed with great tales of UFO intrigue and alien hostilities. Hosts TIM BECKLEY and TIM SWARTZ listen awestruck as the cases unfold -- informed of the fact that not all UFOs are piloted by sweet, kind-hearted spacemen. But that they may be responsible for attacks on homes, disruption of power sources (we had one right on the air, no kidding!), radiation sickness, paralysis and attempts to bring down our planes. Chris is the primary investigator of the Falcoln Lake UFO Incident which transpired 50 years ago (the Canadian govt. has even issued a \$20 commemorative coin in honor of the encounter, and a annual UFO festival is held near the landing spot) in which a witness was badly burned. Its a good physical trace case to be sure that was even dramatized on TV's popular "Unsolved Mysteries." Get he scoop with photos by getting Chris's book. Link leads to our blog with lots of photos and information on this sensational case. An historical one! https://spectralvision.wordpress.com/2018/05/ And speaking of historic cases Nigel takes us back to WWI and the first sightings of foo fighters, strange objects with powerful torch lights and what even could be some humanoid encounters. Nigel writes for the "Fortean Times" and is author of numerous sensational books posted on Amazon. He contributed to our own work recently published "UFO Hostilities and the Alien Evil Agenda." NIKOLA TESLA - Though chosen to share the 1912 Nobel Prize in Physics with Edison, Tesla refused the award and during his life tore up royalty contracts which would have earned him millions of dollars. Not much is known about this "strange" loner as Tesla spent most of his life in total seclusion. However, those who did know him even slightly say he was not a normal human, but a real SUPERMAN, either a reincarnated master - or a spaceman with superior mental powers placed here to assist in earth's technological development. OTIS T. CARR - A student of Tesla's, the Baltimore-based engineer believed that every person should have the opportunity to travel to other planets which he believed to be inhabited by human-looking space people as physical as you and I. Based on conversations with his mentor, Carr constructed a flying saucer-shaped device that he believed would take us to the moon and beyond. In ages past, people saw wonderful miracles and supernatural horrors almost every day of their lives. As our knowledge increased, the things that we once saw as blessing or curses from gods and spirits were better understood and less mysterious. However, despite our new age of rational thinking and reason, things still happen in life that seem to defy any sort of rational explanation. Science has been able to crack open some of these mysteries. But science still has a long way to go to explain everything that we don't understand. We must keep an open mind and humble enough to not instantly dismiss things that can't be easily explained.	Transcript Link

Slenderman's existence began on the internet, but he didn't stay online. John DeSouza spent more than 25 years in the FBI as a Special Agent who maintained a Top Secret security clearance and worked counter-terrorism and violent crime cases. DeSouza, along with guest host Susan Demeter-St. Clair, says that there is more to our reality than we can perceive with our normal senses. Since the beginning of history, people have theorized that there are other worlds that co-exist alongside of our own. Paranormal and spiritual experiences are used as examples of these extradimensional realities, yet, empirical evidence has been difficult to obtain.</p> <p>Because we are all residents of a multi-dimensional universe, but are conscious of ourselves only in a three-dimensional world, our normal level of consciousness (which includes science, which is born of this consciousness) is inadequate to think beyond three dimensions. Even though modern science has not caught up to the theories of extradimensional consciousness, that has not stopped manifestations that seem to originate from beyond our reality. These mysterious events seem to interact with us using ways that are often incomprehensible or absurd by nature. Possibly this is because they operate on properties of space-time, or on a multi-dimensional reality in which our space-time is a subset.</p> <p>This episode on Exploring the Bizarre, John DeSouza and guest-host Susan Demeter-St. Clair will discuss consciousness, extra-dimensionality and the "other" that manifests itself into this reality.</p>	Transcript Link

He shares a wealth of information, including accounts of his own abductions. FLORCITA VIOLETA is a Virginia mother and UFO experimenter. In fact, once, a guest minister from their church refused to even set foot on the property, claiming that he sensed demonic presences associated with witchcraft. The high strangeness continued with Flori, who along with her best friend, experienced a UFO encounter in early 2016. Examining alternative viewpoints on UFOs and related phenomena with SUSAN DEMETER-ST.CLAIR AND MIKE CLELLAND.

[Transcript Link](#)

So much time, research and dedication has been poured into the UFO mystery over the past 70 years. Top Secret documents have been filed, books have been written and movies produced. However, are we now any closer to solving the mystery than we were when Kenneth Arnold had his first strange sighting over the Cascade Mountains in 1947?

Timothy Green Beckley and Tim R. Swartz discusses with guests Susan Demeter-St. Clair and Mike Clelland the stranger aspects of the UFO phenomena such as the mysterious connection between owls, synchronicity and UFO abduction. As well, Susan points out that the high-strangeness aspects of UFO (and other) encounters could be a path to understanding the human experience that goes beyond normal perceptions. Susan also talks about her experiences as a child with little figures that resembled elves, and her later perceptions of a wolf entity that may have been an offshoot of her own consciousness.

Perhaps we have not been able to find the answers about UFOs because we haven't been asking the right questions. In fact, our brains may be unable to even conceive of the questions that are needed to understand the UFO mystery. We view our world, our reality, as a mirror image of ourselves...and why not? We have no other references other than our own experience. Yet we expect to

Father and daughter WILLIAM KENT SENTER and LINDSAY SENTER share their interest in UFOs with Timothy Green Beckley and Tim R. Swartz on Exploring the Bizarre!

It can be a frustrating endeavour for those who have spent years investigating UFOs. The subject is often met with bad jokes about drinking and drugs, accompanied by the rolling of eyes and sigh's of boredom. By the 21st century, UFOs had become such a pop culture trope that the mainstream press has taken the attitude that UFOs are strictly for the tabloids.

Kent Senter, who along with George Fawcett, started the North Carolina state chapter for MUFON, says that anyone who attempts a serious study of UFOs faces severe questions concerning not only their credibility, but also sanity. Kent started The Center for UFO Research N.C. in 2013 and is no stranger to just how weird UFO research can be. One time, after investigating a cattle mutilation case, he came face to face with three bizarre characters who looked and acted just like the traditional Men-In-Black (MIB)!

Lindsay Senter says that due to her father's interests while she was growing up, she is very familiar with the paranormal. From ghosts and spirits to aliens and UFOs, the paranormal is something that is quite normal to her. Lindsay has a very rewarding career, one that involves the paranormal, as she owns a paranormal talent and event management company, Senter Stage Events. Her company manages some of the best and well known talent in the field when it comes to

The National UFO Reporting Center director discloses what over a hundred thousand anomalous reports of aerial phenomena reveal and how the Center has been fielding sightings for 40+ years and remains undaunted in an attempt to resolve the mystery. GRANT tells us that the Presidents know more than we think they do about UFOs, but that its a "slow leak," and not very likely that any head of state will go on the news and tell us out right we are being visited. The discussion takes several sharp turns and the author of "Charlie Red Star" and "Managing Magic" discloses little known facts about Canada's Wilbert Smith who established communications as far back as the 1950-60s. He also tells us about an amazing series of ET contacts on the slopes of Mount Shasta where the beings actually materialized for many witnesses to see. It seems like that much more. It seems likely that much of this ancient knowledge, especially concerning earthly and sacred locations, have been almost completely forgotten. Such ancient sites, built on a straight line system of Leys, could awaken our DNA and memories of the past. If true who is responsible. Nazi time travelers? Tesla? Skunkworks? The rumors have been around for decades that SOME of UFOs might be part of a the black budget program. Said Senator Daniel Inouye from Hawaii: "There exists a shadowy government with its own Air Force, its own Navy, its own fundraising mechanism, and the ability to pursue its own ideas of the national interest, free from all checks and balances, and free from the law itself." Zimmerman concedes that some of the sightings in the Hudson Valley could be stamped "made in the U.S.A.," though she points out that reports from the area go back as far as 1900, so that this theory is not totally acceptable. His quest began with early images from the Viking orbiter, which showed the famous "face" in the Cydonia region. He and fellow scientists examined this and subsequent pictures taken with better resolution and discovered that the formation had "nostrils" where the nose would be. Brandenburg says that Mars "was earthlike in the past." Anti travity and the secret space program are also discussed. Free newsletter at ConspiracyJournal.com	Transcript Link

Many have gone as visitors to this very beautiful mountain range only to be affected and "made" to stay. UFOs have been seen in the area for over a century. Count Saint Germain the man who lives forever has contacted individuals on the mountain. There is said to be an entrance to the capitol of the inner earth. Bigfoot and other strange cryptoids have been known to wander about. Channelers do their best work here. Metaphysician Judy Cali is among this group. A life of spiritual service to mankind Judy says she was asked by the Lemurian High Priest of Telos, Adama of the Inner Earth to come to Shasta to help form a community called Heart to Heart. She honored the call of the mountain and their Lemurian family and moved there in July of 2009. Judy has been doing intuitive healing work with the Ascended Masters since 3 years old. She was asked by Hilarion, the Ascended Master of the Emerald Ray, to go public with her gifts 15 years ago. While doing a reading Judy receives a whole picture of the person she is sitting with by seeing, hear, feeling and knowing about your soul, thus bringing forward information about Guardian Angels, Guides and Family in Spirit. 2016 02 27	Mr UFOs Secret Files	https://youtu.be/uWkLz36rC6k	UFO Hunters' Bill Birnes, THE AZTEC UFO CRASH INCIDENT AND COL CORSO REVISITED	<p>SPECIAL GUEST: FRANK THAYER -- Nothing stimulates a UFO conversation more than the discussion of a UFO crash case such as the Aztec UFO Incident. Though not as famous as the supposed UFO crash at Roswell, the Aztec incident was the subject of a best selling book by journalist Frank Scully. Published in the early 1950s, BEHIND THE FLYING SAUCERS caused an international sensation when it detailed the case of an alien spacecraft that allegedly crashed in the NM desert in March, 1948, complete with the bodies of several ETs. The craft was removed and taken to a "secret location" by the military and the case quickly became enbroiled in controversy with some of the participants being accused of creating a monumental hoax -- a label that has been attached to the incident ever since. That is until the case was reopened decades later by researchers Scott and Suzanne Ramsey. Together with co-author Frank Thayer, our special guest this evening, this dedicated research team has managed to produce more than 55,000 pieces of documentation, leaving no doubt that a downed disc was recovered by the U.S. government. . . .FRANK THAYER, Ph.D. came to the Aztec incident project in 2009 when Scott Ramsey shared witness information of the recovery at Hart Canyon. Thayer is a New Mexico native with extensive journalistic and education experience. Now a professor emeritus at NM State University in Las Cruces, he has professional experience as a writer, editor, photographer and educator both in NM and in Canada where he also lived and taught for 11 years. Over time, Whitley received first person testimony from thousands who said they had also experienced some sort of interaction with the almond-eyed entitles now popularly identified as "the Visitors." While previously known as the creator of such spine chilling horror classics as The Wolfen (1978) and The Hunger starring David Bowie (1981), Strieber found himself thrust head first into a phenomena that continues to intrigue, baffle and captivate. It has also continued to frightened deeply those who have found themselves plagued by face to face confrontations with the unknown, even going so far as to being drawn into their aerial "spheres" for unwelcome examinations and mind control purposes.</p> <p>In addition to Communion, other Visitor themed books by Whitley include Transformation, The Key, Magestic and most recently Super Natural a New Vision of the Unexplained written with Jeffrey J Kripal Profession of Religion, Rice University. The critics proclaim: "The most important book on unexplained phenomena in more than 40 years." -- Gary Jansen, author Holy Ghosts.</p> <p>... "An exceptional book. What is at stake is nothing less than the nature of our reality, and our ability as humans to grasp levels of perception that are once so dangerous and so sublime." -- Jacques Vallee. ... JOHNSON Tonight we talk about all things strange and unexplained! Jane Rodrigue found herself fascinated with theology, philosophy and metaphysics from an early age when her parents invited a variety of open minded free thinkers into their home, including scientists. Jane found she was more interested in sitting in on these conversations, rather than playing with kids her own age. She easily found the mysterious and the unexplained to her liking, rather than the conventional world. Jane is an active member of JC Johnson's Crypto 4 Corners International Team. "Mysteries fascinate me, and JC and I share a similar world view and approach many paranormal topics including cryptid topics from that world view. I do enjoy and use the scientific method and approach to collecting data in research. We have been discussing recently about Giants and the Book of Enoch, and of course there is a lot to be said about his field research and upright canids, furry people and the like." This is a great combo interview that I taped at a UFO conference. George Hansen has a very unusual take on the paranormal and of course Ted worked with Dr Hynek. His "major" in UFOlogy has been physical trace cases. The recovery of this strange "Iron Man" inside a deep cave is creepy but is well documented by Phillips.
