

EXPLORING THE BIZARRE #145

1
00:00:37,470 --> 00:00:21,840

[Music]

2
00:00:44,430 --> 00:00:41,770

explode the bazaars are your e-ticket

3
00:00:47,710 --> 00:00:44,440

ride into the world of the paranoid

4
00:00:50,759 --> 00:00:47,720

strap yourself in as we traverse the

5
00:00:56,649 --> 00:00:50,769

universe exploring the unexplained UFO

6
00:01:00,610 --> 00:00:56,659

of ghosts Lost Worlds cryptozoology as

7
00:01:05,109 --> 00:01:00,620

well as other dimensions it's time to

8
00:01:07,359 --> 00:01:05,119

take back the night now your

9
00:01:14,249 --> 00:01:07,369

electrifying hosts of exploring the

10
00:01:21,940 --> 00:01:19,840

Tim hey Tim hey why are you looking

11
00:01:23,740 --> 00:01:21,950

through to the next yard is there a

12
00:01:26,680 --> 00:01:23,750

pretty girl in a bikini or something

13
00:01:28,719 --> 00:01:26,690

Shh I'm looking out for one of our

14

00:01:31,149 --> 00:01:28,729

guests tonight I heard there might be a

15

00:01:33,130 --> 00:01:31,159

nest of Bigfoot in his yard in his yard

16

00:01:35,710 --> 00:01:33,140

isn't that a strange place to find him

17

00:01:38,290 --> 00:01:35,720

family of Bigfoot hanging out I don't

18

00:01:40,330 --> 00:01:38,300

know I would think that crypt woodkid

19

00:01:42,340 --> 00:01:40,340

would have made friends with them and

20

00:01:45,010 --> 00:01:42,350

besides his mother won't let him off the

21

00:01:47,800 --> 00:01:45,020

block because he's so young yeah that's

22

00:01:49,630 --> 00:01:47,810

what they say but I guess we're just

23

00:01:51,870 --> 00:01:49,640

gonna have to find out for ourselves so

24

00:01:53,999 --> 00:01:51,880

let's just get on with the show

25

00:01:56,530 --> 00:01:54,009

absolutely time for another episode

26

00:02:00,219 --> 00:01:56,540

rip-roaring episode of exploring the

27

00:02:02,709 --> 00:02:00,229

bizarre but who the greatest host in -

28

00:02:04,899 --> 00:02:02,719

the greatest host in all of the

29

00:02:11,610 --> 00:02:04,909

paranormal right I'd like to meet them

30

00:02:17,490 --> 00:02:14,370

[Laughter]

31

00:02:22,539 --> 00:02:17,500

what's gonna go on tonight so we can

32

00:02:26,130 --> 00:02:22,549

inform our informed audience Oh be my

33

00:02:29,530 --> 00:02:26,140

pleasure well you know tonight is the

34

00:02:32,160 --> 00:02:29,540

cryptozoology illogical special boy

35

00:02:36,220 --> 00:02:32,170

that's a mouthful sometimes isn't it and

36

00:02:38,920 --> 00:02:36,230

we have on with us tonight the return of

37

00:02:41,830 --> 00:02:38,930

Katie Elizabeth now katie has been on

38

00:02:43,660 --> 00:02:41,840

our show before so it's happy we're very

39

00:02:46,689 --> 00:02:43,670

happy to have her back now Katie was

40

00:02:48,729 --> 00:02:46,699

born in a war Rhode Island and is the

41

00:02:51,280 --> 00:02:48,739

world's leading authority on the lake

42

00:02:54,190 --> 00:02:51,290

champlain monster katie has been

43

00:02:56,050 --> 00:02:54,200

study in the existence of champ since

44

00:03:01,119 --> 00:02:56,060

she was a child and she's made it her

45

00:03:03,550 --> 00:03:01,129

her lifelong dream into reality when she

46

00:03:07,179 --> 00:03:03,560

had her own sighting and experiences of

47

00:03:09,009 --> 00:03:07,189

this elusive creature now that prompted

48

00:03:11,410 --> 00:03:09,019

her to start her own group called champ

49

00:03:13,839 --> 00:03:11,420

search and the group's goal is to study

50

00:03:16,030 --> 00:03:13,849

investigate and prove the existence of

51
00:03:17,470 --> 00:03:16,040
the most importantly and most

52
00:03:19,599 --> 00:03:17,480
importantly to protect the unique

53
00:03:22,390 --> 00:03:19,609
animals that inhabit New York and

54
00:03:25,149 --> 00:03:22,400
Vermont's beautiful Lake Champlain now

55
00:03:27,759 --> 00:03:25,159
katie is the author of the book water

56
00:03:31,210 --> 00:03:27,769
horse with Lake Champlain - and of

57
00:03:33,099 --> 00:03:31,220
course it's available on amazon.com with

58
00:03:35,050 --> 00:03:33,109
us tonight now this will be his first

59
00:03:36,940 --> 00:03:35,060
appearance on exploring the bazaar and

60
00:03:38,800 --> 00:03:36,950
we're happy to have him is Colin

61
00:03:41,080 --> 00:03:38,810
Schneider now Colin is one of the

62
00:03:43,690 --> 00:03:41,090
world's youngest active researchers in

63
00:03:46,119 --> 00:03:43,700

the United States and at only 16 years

64

00:03:49,659 --> 00:03:46,129

old he's been involved in crypto zoology

65

00:03:52,089 --> 00:03:49,669

and you ethology since he was 13 after

66

00:03:54,759 --> 00:03:52,099

he visited the International

67

00:03:56,680 --> 00:03:54,769

cryptozoology Museum in Portland Maine

68

00:03:59,619 --> 00:03:56,690

a frequent attendee of conferences

69

00:04:02,409 --> 00:03:59,629

around about the unexplained there Colin

70

00:04:05,379 --> 00:04:02,419

lectures at various events around Ohio

71

00:04:08,289 --> 00:04:05,389

and Pennsylvania he's also a regional

72

00:04:11,349 --> 00:04:08,299

representative for the Center for 40 in

73

00:04:16,680 --> 00:04:11,359

zoology and the host of the crypto kid

74

00:04:19,719 --> 00:04:16,690

radio show on the W CJ V digital

75

00:04:28,839 --> 00:04:19,729

broadcasting network so welcome both of

76

00:04:33,129 --> 00:04:28,849

you to explore in the bazaar welcome

77

00:04:36,189 --> 00:04:33,139

into our ACO our digital living room hey

78

00:04:37,750 --> 00:04:36,199

Tim before we get started I did want to

79

00:04:41,760 --> 00:04:37,760

mention a couple of things I wanted to

80

00:04:46,029 --> 00:04:41,770

give a shout out to our longtime friend

81

00:04:48,999 --> 00:04:46,039

Glenda Campbell who probably most of you

82

00:04:51,460 --> 00:04:49,009

have seen him on UFO Hunters and on some

83

00:04:54,300 --> 00:04:51,470

other show on say the Discovery Network

84

00:04:58,779 --> 00:04:54,310

he was the fellow who used to climb

85

00:05:01,240 --> 00:04:58,789

freedom Ridge outside of area 51 until

86

00:05:05,230 --> 00:05:01,250

the government made it a no trespassing

87

00:05:07,420 --> 00:05:05,240

and he could no longer

88

00:05:11,680 --> 00:05:07,430

out there and spy on the activities that

89

00:05:13,839 --> 00:05:11,690

were going on in area 51 well Glenn just

90

00:05:18,309 --> 00:05:13,849

got out of the hospital and I want to

91

00:05:19,990 --> 00:05:18,319

wish him a full recovery apparently he

92

00:05:23,469 --> 00:05:20,000

had some luck he passed out while he was

93

00:05:25,360 --> 00:05:23,479

driving and I don't really know the the

94

00:05:26,589 --> 00:05:25,370

upshot of that but he was in the

95

00:05:30,400 --> 00:05:26,599

hospital for a while and now I

96

00:05:34,510 --> 00:05:30,410

understand he went to stay with his dad

97

00:05:37,330 --> 00:05:34,520

in New England so we do wish him well he

98

00:05:39,339 --> 00:05:37,340

had one of the first what would you call

99

00:05:41,320 --> 00:05:39,349

him were they chat boards bulletin

100

00:05:45,189 --> 00:05:41,330

boards yeah yeah I probably probably a

101

00:05:47,529 --> 00:05:45,199

bulletin board or BBS that goes back

102

00:05:49,810 --> 00:05:47,539

even before of my time I think yeah yeah

103

00:05:54,520 --> 00:05:49,820

I was kind of a late bloomer when it

104

00:06:01,540 --> 00:05:54,530

came to the to the Internet my first

105

00:06:03,610 --> 00:06:01,550

device was a web TV oh my gosh well it

106

00:06:06,279 --> 00:06:03,620

was it was it was a fun product and very

107

00:06:08,589 --> 00:06:06,289

easy to use but they never they never

108

00:06:11,370 --> 00:06:08,599

updated that unfortunately and so it

109

00:06:14,170 --> 00:06:11,380

just went out of existence

110

00:06:16,779 --> 00:06:14,180

they basically although there may still

111

00:06:18,399 --> 00:06:16,789

be a few people with web TV addresses I

112

00:06:21,339 --> 00:06:18,409

had one up until about a year ago Oh

113

00:06:23,230 --> 00:06:21,349

until I forgot what my password was and

114

00:06:26,110 --> 00:06:23,240

I just said well I'm not gonna spend an

115

00:06:30,070 --> 00:06:26,120

hour so hunting around for all so i

116

00:06:33,610 --> 00:06:30,080

posted a rather unusual photograph tim

117

00:06:36,550 --> 00:06:33,620

on on the internet do you know about the

118

00:06:39,490 --> 00:06:36,560

chess pieces that fell mysteriously from

119

00:06:42,159 --> 00:06:39,500

the sky outside of washington d.c no

120

00:06:44,439 --> 00:06:42,169

that's a new one well well this happened

121

00:06:47,170 --> 00:06:44,449

well it happened I guess either

122

00:06:49,060 --> 00:06:47,180

yesterday or or today and they were

123

00:06:52,330 --> 00:06:49,070

giant chess pieces I mean there's

124

00:06:56,170 --> 00:06:52,340

something right out of a cosmic chess

125

00:06:58,899 --> 00:06:56,180

board and I I think maybe Charles fort

126
00:07:01,149 --> 00:06:58,909
is trying to tell us something because

127
00:07:03,969 --> 00:07:01,159
if you remember one of the famous quotes

128
00:07:06,610 --> 00:07:03,979
that Charles fort made was about how we

129
00:07:09,790 --> 00:07:06,620
were just chess pieces of a cosmic

130
00:07:14,260 --> 00:07:09,800
checkerboard so I think that I think

131
00:07:16,779 --> 00:07:14,270
this is a synchronicity or proof indeed

132
00:07:18,800 --> 00:07:16,789
because they they smashed windows I

133
00:07:21,470 --> 00:07:18,810
think what if you would

134
00:07:24,740 --> 00:07:21,480
you know cars the windshields were

135
00:07:26,510 --> 00:07:24,750
smashed in by these giant chess pieces

136
00:07:28,760 --> 00:07:26,520
well they said that they were thrown

137
00:07:31,640 --> 00:07:28,770
from a building but that seems highly

138
00:07:34,070 --> 00:07:31,650

unlikely I mean and no proof of that but

139

00:07:36,230 --> 00:07:34,080

the smashed windows and the pieces of

140

00:07:38,390 --> 00:07:36,240

the chessboard are indeed there for all

141

00:07:42,230 --> 00:07:38,400

to see so you can find it I think you

142

00:07:45,170 --> 00:07:42,240

know rather easily on the Internet and

143

00:07:47,270 --> 00:07:45,180

if you go to my facebook page it's on

144

00:07:51,080 --> 00:07:47,280

you know my page there and you can take

145

00:07:53,120 --> 00:07:51,090

a gander and come up with your own idea

146

00:07:56,960 --> 00:07:53,130

but I want to start out I think the

147

00:08:00,500 --> 00:07:56,970

conversation this evening with the

148

00:08:02,540 --> 00:08:00,510

college now you're you are 16 years old

149

00:08:04,550 --> 00:08:02,550

is that correct no my bio is actually a

150

00:08:09,379 --> 00:08:04,560

little out of date what I sent it to you

151
00:08:12,710 --> 00:08:09,389
guys I'm 17 now you're growing old right

152
00:08:14,750 --> 00:08:12,720
before our very eyes well you know we

153
00:08:17,690 --> 00:08:14,760
kind of had a little joke there to begin

154
00:08:21,500 --> 00:08:17,700
to get your your expense but you know I

155
00:08:24,770 --> 00:08:21,510
started out a very very younger myself

156
00:08:27,350 --> 00:08:24,780
in ufology and so so did a lot of the

157
00:08:30,140 --> 00:08:27,360
people that are very active today Jean

158
00:08:32,990 --> 00:08:30,150
Steinberg who does the para cast

159
00:08:37,430 --> 00:08:33,000
let's see Jerry a Clark who was with the

160
00:08:40,310 --> 00:08:37,440
dr. Hynek Center for UFO studies and

161
00:08:44,180 --> 00:08:40,320
quite a few other researchers who are

162
00:08:46,430 --> 00:08:44,190
now you know up there in years I started

163
00:08:50,390 --> 00:08:46,440

at the the site pretty much the same

164

00:08:52,850 --> 00:08:50,400

time we all had a teenage UFO groups and

165

00:08:55,730 --> 00:08:52,860

we all found each other through ray

166

00:08:58,280 --> 00:08:55,740

Palmer's flying saucers magazine but

167

00:09:01,340 --> 00:08:58,290

tell us about your roots how did you

168

00:09:03,170 --> 00:09:01,350

find Bigfoot or did Bigfoot find you

169

00:09:06,829 --> 00:09:03,180

well I first got interested in

170

00:09:08,660 --> 00:09:06,839

cryptozoology when I watched the show

171

00:09:11,960 --> 00:09:08,670

called monster quest that probably

172

00:09:14,740 --> 00:09:11,970

everyone is familiar with um I was eight

173

00:09:17,810 --> 00:09:14,750

at the time that it started showing and

174

00:09:19,790 --> 00:09:17,820

it was kind of a perfect combination of

175

00:09:23,480 --> 00:09:19,800

two of my favorite things monsters and

176

00:09:27,079 --> 00:09:23,490

animals and in every episode there was

177

00:09:28,790 --> 00:09:27,089

just one lovely bearded guy pretty much

178

00:09:30,410 --> 00:09:28,800

on every episode and he seems to know

179

00:09:32,410 --> 00:09:30,420

everything about everything

180

00:09:34,630 --> 00:09:32,420

he seems Loren Coleman

181

00:09:39,280 --> 00:09:34,640

the most famous cryptozoologist alive

182

00:09:41,650 --> 00:09:39,290

and that just that was kind of what got

183

00:09:44,290 --> 00:09:41,660

me interested in it but what set me on

184

00:09:49,390 --> 00:09:44,300

the path that I'm on today was my family

185

00:09:50,620 --> 00:09:49,400

took a trip in 2013 to Maine and I

186

00:09:52,960 --> 00:09:50,630

actually got a chance to visit the

187

00:09:55,480 --> 00:09:52,970

museum that Lauren runs up there I got

188

00:09:58,930 --> 00:09:55,490

to meet him and we had a brief chat and

189

00:10:00,970 --> 00:09:58,940

I remember walking out of the museum

190

00:10:04,150 --> 00:10:00,980

with a stack of books after I spent all

191

00:10:06,790 --> 00:10:04,160

of my money at the gift shop thinking

192

00:10:08,710 --> 00:10:06,800

that's what I want to do I'm sure he

193

00:10:11,650 --> 00:10:08,720

appreciated that and what we're

194

00:10:13,660 --> 00:10:11,660

mentioning Loren Coleman I want to wish

195

00:10:17,620 --> 00:10:13,670

him a happy birthday because his

196

00:10:19,810 --> 00:10:17,630

birthday is that I think on Saturday and

197

00:10:22,570 --> 00:10:19,820

I know that because it's a day after

198

00:10:24,900 --> 00:10:22,580

mine so a happy birthday Lauren and I

199

00:10:28,110 --> 00:10:24,910

hope you listening there to the show and

200

00:10:31,150 --> 00:10:28,120

Colin is you're here to your

201
00:10:34,210 --> 00:10:31,160
responsibility so what what was it

202
00:10:36,040 --> 00:10:34,220
exactly about the museum that fascinated

203
00:10:38,370 --> 00:10:36,050
you the most I mean I've never been

204
00:10:42,310 --> 00:10:38,380
there what were some of the exhibits

205
00:10:46,930 --> 00:10:42,320
well when I went it was just a small

206
00:10:49,000 --> 00:10:46,940
two-room Museum now it's much bigger but

207
00:10:52,530 --> 00:10:49,010
when when I went it was very charming

208
00:10:55,360 --> 00:10:52,540
that seemed almost like it was just a

209
00:10:57,220 --> 00:10:55,370
basement of someone who's very very

210
00:10:59,310 --> 00:10:57,230
interested in this stuff and it was just

211
00:11:03,540 --> 00:10:59,320
this huge collection of this random

212
00:11:06,430 --> 00:11:03,550
things put in this order of what type of

213
00:11:09,220 --> 00:11:06,440

cryptid they're involved with and what

214

00:11:11,740 --> 00:11:09,230

what got me excited was there there was

215

00:11:13,660 --> 00:11:11,750

just there were a hair samples

216

00:11:16,500 --> 00:11:13,670

supposedly from various mystery apes

217

00:11:21,250 --> 00:11:16,510

around the world and there were

218

00:11:25,030 --> 00:11:21,260

footprints all around and um and like

219

00:11:27,700 --> 00:11:25,040

every single piece of the museum had

220

00:11:29,620 --> 00:11:27,710

such a history to it and and such a

221

00:11:31,540 --> 00:11:29,630

significance to cryptozoology I don't

222

00:11:34,750 --> 00:11:31,550

know it just wasn't one thing in

223

00:11:36,460 --> 00:11:34,760

particular I just got super excited

224

00:11:40,750 --> 00:11:36,470

about it on more than I had ever

225

00:11:44,560 --> 00:11:40,760

previously been and I just haven't

226

00:11:46,180 --> 00:11:44,570

stopped since and you know you you

227

00:11:47,950 --> 00:11:46,190

runnin or you

228

00:11:51,940 --> 00:11:47,960

your own organization or you're an

229

00:11:54,610 --> 00:11:51,950

active member of one yeah I work with

230

00:11:57,070 --> 00:11:54,620

the Center for T in zoology which is the

231

00:12:00,310 --> 00:11:57,080

largest cryptozoological organization in

232

00:12:01,540 --> 00:12:00,320

the world we do all kinds of expeditions

233

00:12:04,000 --> 00:12:01,550

around the world we have a lot of

234

00:12:06,520 --> 00:12:04,010

different outreach programs and within

235

00:12:07,600 --> 00:12:06,530

the CSV I have a couple different

236

00:12:10,360 --> 00:12:07,610

responsibilities

237

00:12:13,810 --> 00:12:10,370

I am a regional representative for Ohio

238

00:12:15,850 --> 00:12:13,820

and generally some of the surrounding

239

00:12:19,030 --> 00:12:15,860

states as well because there are a lot

240

00:12:23,320 --> 00:12:19,040

of active members in this area I am also

241

00:12:26,980 --> 00:12:23,330

a the deputy director for the BHM

242

00:12:29,860 --> 00:12:26,990

research group which is the group we

243

00:12:32,890 --> 00:12:29,870

have arm specifically dedicated to

244

00:12:34,930 --> 00:12:32,900

researching and collecting data on what

245

00:12:37,990 --> 00:12:34,940

we call big hairy monsters aka

246

00:12:41,770 --> 00:12:38,000

the hairy hominids um you know Bigfoot

247

00:12:44,200 --> 00:12:41,780

Yeti Alma whatnot and I'm also the

248

00:12:46,660 --> 00:12:44,210

director and founder of the next

249

00:12:48,220 --> 00:12:46,670

generation initiative which is an

250

00:12:51,370 --> 00:12:48,230

outreach program that we're trying to

251

00:12:53,440 --> 00:12:51,380

get off the ground for the next

252

00:12:55,150 --> 00:12:53,450

generation of cryptozoologists people

253

00:12:58,420 --> 00:12:55,160

that are my age or slightly older

254

00:13:01,000 --> 00:12:58,430

slightly younger well get some get some

255

00:13:04,240 --> 00:13:01,010

ufology people in there because we need

256

00:13:07,540 --> 00:13:04,250

we need some younger blood in the in the

257

00:13:10,750 --> 00:13:07,550

field some of us here are getting to be

258

00:13:12,490 --> 00:13:10,760

a dinosaurs which I guess is okay if

259

00:13:14,830 --> 00:13:12,500

you'd missed the a trip to zoology I I

260

00:13:18,010 --> 00:13:14,840

would guess what just like Tim I mean as

261

00:13:20,500 --> 00:13:18,020

long as we're talking yeah but you know

262

00:13:23,230 --> 00:13:20,510

it's I'm I'm I'm just I'm happy to see

263

00:13:25,930 --> 00:13:23,240

somebody you know younger interested in

264

00:13:27,100 --> 00:13:25,940

you know not you apology and kazoo ology

265

00:13:30,250 --> 00:13:27,110

and you know everything like this

266

00:13:33,760 --> 00:13:30,260

because I mean you hear a lot of people

267

00:13:35,140 --> 00:13:33,770

complain that the younger generations I

268

00:13:36,550 --> 00:13:35,150

mean they're not interested in this kind

269

00:13:39,880 --> 00:13:36,560

of stuff they're just interested in

270

00:13:41,980 --> 00:13:39,890

their cell phones about that and it's

271

00:13:45,850 --> 00:13:41,990

just you know I know it's not true you

272

00:13:48,850 --> 00:13:45,860

know there there are plenty of younger

273

00:13:50,770 --> 00:13:48,860

members coming into this and but so I

274

00:13:52,870 --> 00:13:50,780

mean I'm happy that we were able to get

275

00:13:59,170 --> 00:13:52,880

one on to our show just to prove the

276

00:13:59,860 --> 00:13:59,180
skeptics wrong I do I do a lot of

277

00:14:02,230 --> 00:13:59,870
research in every

278

00:14:05,170 --> 00:14:02,240
singing for Tiana but I promote myself

279

00:14:07,930 --> 00:14:05,180
mainly as a cryptozoologist partially

280

00:14:10,269 --> 00:14:07,940
because that's what I'm most experienced

281

00:14:13,390 --> 00:14:10,279
with and also the name crypto kids

282

00:14:17,320 --> 00:14:13,400
really catchy oh it is apps absolutely

283

00:14:20,019 --> 00:14:17,330
so now where is the the 14 group that

284

00:14:23,590 --> 00:14:20,029
you are active in where are they

285

00:14:29,250 --> 00:14:23,600
headquartered headquartered in the

286

00:14:32,079 --> 00:14:29,260
United Kingdom under the head of

287

00:14:34,930 --> 00:14:32,089
jonathan downs he's a wonderful

288

00:14:39,820 --> 00:14:34,940

wonderful man he's kind of like Hagrid

289

00:14:42,300 --> 00:14:39,830

in the flesh but their world worldwide

290

00:14:44,740 --> 00:14:42,310

organization we have people I think I'm

291

00:14:47,500 --> 00:14:44,750

pretty sure I've been I'm pretty sure

292

00:14:49,600 --> 00:14:47,510

that I've been to the site a couple of

293

00:14:53,650 --> 00:14:49,610

times over the years and I of course the

294

00:14:56,590 --> 00:14:53,660

the 14 times is selectively published

295

00:15:01,030 --> 00:14:56,600

there in the in the UK we're not

296

00:15:04,030 --> 00:15:01,040

connected to the magazine were we're

297

00:15:06,070 --> 00:15:04,040

solely a cryptozoological group we

298

00:15:09,460 --> 00:15:06,080

reason we call ourselves the Centre for

299

00:15:12,490 --> 00:15:09,470

40 in zoology is so we can research some

300

00:15:15,310 --> 00:15:12,500

of the other weirder stuff like black

301

00:15:18,220 --> 00:15:15,320

dogs and what we call new forms that may

302

00:15:21,370 --> 00:15:18,230

not fall right into the flesh and blood

303

00:15:24,040 --> 00:15:21,380

mind set for this wallet very good well

304

00:15:27,850 --> 00:15:24,050

you know there's a video of me and the

305

00:15:31,720 --> 00:15:27,860

MIB a lady on YouTube where we are

306

00:15:34,690 --> 00:15:31,730

visiting the the grave site of charles

307

00:15:37,500 --> 00:15:34,700

fort he is buried along with the rest of

308

00:15:41,199 --> 00:15:37,510

his family and the albany rural cemetery

309

00:15:44,440 --> 00:15:41,209

and at some point we've talked about

310

00:15:47,380 --> 00:15:44,450

actually having kind of a what would we

311

00:15:48,910 --> 00:15:47,390

call this a flash meeting you know where

312

00:15:51,250 --> 00:15:48,920

we just announced it and anybody who

313

00:15:53,290 --> 00:15:51,260

wants to show up can show up at the the

314

00:15:56,590 --> 00:15:53,300

grave site and give a little chat on

315

00:15:58,810 --> 00:15:56,600

Charles tour tour or ghost because the

316

00:16:03,070 --> 00:15:58,820

cemetery has its own men in black it has

317

00:16:05,440 --> 00:16:03,080

a couple of oh I guess the ghosts that

318

00:16:07,900 --> 00:16:05,450

fly over the tombstones at night in

319

00:16:10,329 --> 00:16:07,910

their pajamas carrying their candles and

320

00:16:13,680 --> 00:16:10,339

and black dogs and the whole bit it's

321

00:16:17,530 --> 00:16:13,690

kind of a real you know scent

322

00:16:19,390 --> 00:16:17,540

activity appoint 440 and phenomena in

323

00:16:21,670 --> 00:16:19,400

that area and well it should because

324

00:16:24,310 --> 00:16:21,680

Charles for two is right there keeping

325

00:16:28,210 --> 00:16:24,320

an eye on on all of that okay can you

326

00:16:30,220 --> 00:16:28,220

tell us a Colin uh maybe a case or so

327

00:16:35,400 --> 00:16:30,230

that you've investigated or been

328

00:16:38,830 --> 00:16:35,410

involved with that impressed you so um

329

00:16:43,360 --> 00:16:38,840

one of my main focuses of study is

330

00:16:44,500 --> 00:16:43,370

concerning cryptid livestock attacks and

331

00:16:46,270 --> 00:16:44,510

when I say that generally people

332

00:16:48,520 --> 00:16:46,280

immediately think of the chupacabra

333

00:16:51,180 --> 00:16:48,530

but I don't really have anything to do

334

00:16:53,950 --> 00:16:51,190

with the chupacabra I focus on attacks

335

00:16:59,680 --> 00:16:53,960

associated with other types of cryptids

336

00:17:01,690 --> 00:16:59,690

on such as Bigfoot or alien big cats my

337

00:17:05,040 --> 00:17:01,700

several dog ones so that type of thing

338

00:17:11,079 --> 00:17:05,050

um one of my favorites happened in

339

00:17:15,550 --> 00:17:11,089

December of 1972 in Oklahoma it was El

340

00:17:21,280 --> 00:17:15,560

Reno Oklahoma ha the newspapers called

341

00:17:25,600 --> 00:17:21,290

it the El Reno chicken man as a story

342

00:17:29,230 --> 00:17:25,610

goes an unnamed farmer was relaxing in

343

00:17:32,020 --> 00:17:29,240

his trailer home uh one winter night in

344

00:17:35,230 --> 00:17:32,030

December and he started hearing the

345

00:17:37,930 --> 00:17:35,240

squawking panicked sounds from his

346

00:17:39,970 --> 00:17:37,940

chicken coop so he throws on his boots

347

00:17:43,330 --> 00:17:39,980

grabs his jacket grabs his gun and goes

348

00:17:45,970 --> 00:17:43,340

out to see what was going on and what he

349

00:17:48,310 --> 00:17:45,980

finds is the chicken coop has been

350

00:17:52,720 --> 00:17:48,320

raided there's blood and feathers

351
00:17:54,640 --> 00:17:52,730
everywhere but no chickens the door was

352
00:17:57,940 --> 00:17:54,650
ripped off broken in half

353
00:18:00,300 --> 00:17:57,950
and the weird thing is he found all

354
00:18:04,300 --> 00:18:00,310
kinds of large humanoid-looking

355
00:18:09,460 --> 00:18:04,310
footprints around the chicken coop as

356
00:18:11,930 --> 00:18:09,470
well as handprints in the blood on the

357
00:18:18,019 --> 00:18:11,940
walls and on the door

358
00:18:22,569 --> 00:18:18,029
so the farmer said he he didn't know

359
00:18:25,339 --> 00:18:22,579
what to do with it he has no idea um

360
00:18:28,689 --> 00:18:25,349
what happened he had no idea what the

361
00:18:33,279 --> 00:18:28,699
footprints were so he sent them off to

362
00:18:36,729 --> 00:18:33,289
the director of the Oklahoma City Zoo

363
00:18:40,489 --> 00:18:36,739

all his name eludes me but at the time

364

00:18:42,709 --> 00:18:40,499

Lawrence Curtis at the time he was kind

365

00:18:45,769 --> 00:18:42,719

of like gee go-to guy he had mysterious

366

00:18:47,089 --> 00:18:45,779

footprints hmm you'd send them out to

367

00:18:51,549 --> 00:18:47,099

him and he'd look at him and try to

368

00:18:55,999 --> 00:18:51,559

identify them and in an interview with

369

00:18:58,909 --> 00:18:56,009

the local newspaper in February after

370

00:19:00,829 --> 00:18:58,919

they got wind of the story he said that

371

00:19:02,539 --> 00:19:00,839

it whatever happened whatever causes

372

00:19:04,969 --> 00:19:02,549

footprints it definitely wasn't human

373

00:19:07,369 --> 00:19:04,979

it definitely wasn't there but he's not

374

00:19:10,249 --> 00:19:07,379

sure what it was he said that it has

375

00:19:14,539 --> 00:19:10,259

traits of humans but it also has traits

376

00:19:18,109 --> 00:19:14,549

of a type of ape similar to a gorilla

377

00:19:20,869 --> 00:19:18,119

but larger um but he made the decision

378

00:19:23,180 --> 00:19:20,879

that he couldn't really tell exactly

379

00:19:24,469 --> 00:19:23,190

what caught what created the footprints

380

00:19:28,219 --> 00:19:24,479

um

381

00:19:31,399 --> 00:19:28,229

I've tried to track him down he's kind

382

00:19:34,609 --> 00:19:31,409

of off the grid I'm pretty sure he's

383

00:19:36,859 --> 00:19:34,619

still alive but I have not been able to

384

00:19:38,089 --> 00:19:36,869

find any contact information for him

385

00:19:42,289 --> 00:19:38,099

because I'd love to talk to him about

386

00:19:44,119 --> 00:19:42,299

the story it's it's one of my favorites

387

00:19:47,059 --> 00:19:44,129

partially because you know the chicken

388

00:19:52,609 --> 00:19:47,069

man's a great name for a cryptid that is

389

00:19:55,969 --> 00:19:52,619

why all the there is one concern with

390

00:19:57,649 --> 00:19:55,979

the story and that is that the farmer

391

00:20:00,259 --> 00:19:57,659

had something like a hundred and thirty

392

00:20:05,259 --> 00:20:00,269

chickens in the coop and according to

393

00:20:09,109 --> 00:20:05,269

the story all of them were missing and

394

00:20:12,259 --> 00:20:09,119

he had it I estimate it was only

395

00:20:15,409 --> 00:20:12,269

probably at most ten minutes between him

396

00:20:19,369 --> 00:20:15,419

first hearing the sounds and getting out

397

00:20:21,709 --> 00:20:19,379

there and in that ten minutes whatever

398

00:20:24,820 --> 00:20:21,719

supposedly stole the chicken stole all

399

00:20:28,070 --> 00:20:24,830

of them is there none left in the

400

00:20:30,499 --> 00:20:28,080

and got away before the farmer caught it

401
00:20:35,989 --> 00:20:30,509
that's a lot of it was down in one

402
00:20:40,369 --> 00:20:35,999
setting exactly it's a weird glaring

403
00:20:42,560 --> 00:20:40,379
issue in a fascinating story and I don't

404
00:20:45,470 --> 00:20:42,570
really have an answer

405
00:20:47,950 --> 00:20:45,480
that that one fact makes it slightly

406
00:20:50,889 --> 00:20:47,960
questionable but at the same time

407
00:20:54,919 --> 00:20:50,899
Laurence Curtis a zoologist did

408
00:20:59,739 --> 00:20:54,929
determine that the footprints were not

409
00:21:01,909 --> 00:20:59,749
human and they were not bear so

410
00:21:05,419 --> 00:21:01,919
something might have happened but maybe

411
00:21:07,700 --> 00:21:05,429
it was exaggerated by the media all

412
00:21:10,340 --> 00:21:07,710
right well I am going to hold you right

413
00:21:14,509 --> 00:21:10,350

there because we are coming up to our

414

00:21:17,869 --> 00:21:14,519

bottom of the hour break and when we

415

00:21:20,690 --> 00:21:17,879

come back we will bring Katie Elizabeth

416

00:21:23,389 --> 00:21:20,700

into the conversation to talk about her

417

00:21:25,940 --> 00:21:23,399

most recent research with champ the lake

418

00:21:28,820 --> 00:21:25,950

monster so you are listening to

419

00:21:31,129 --> 00:21:28,830

exploring the bizarre right here on K Co

420

00:21:42,000 --> 00:21:31,139

are we will be right back

421

00:21:48,700 --> 00:21:46,120

now back to exploring the bazaar with

422

00:21:52,030 --> 00:21:48,710

two of the most electrifying researchers

423

00:21:57,970 --> 00:21:52,040

in the Paranoid your hosts Timothy Becca

424

00:22:00,790 --> 00:21:57,980

Lee and tinsmiths alright welcome back

425

00:22:02,230 --> 00:22:00,800

to exploring the bazaar and now Tim

426

00:22:04,720 --> 00:22:02,240

we're gonna bring out Katie Elizabeth

427

00:22:06,120 --> 00:22:04,730

into the conversation Katie hi it's

428

00:22:09,130 --> 00:22:06,130

great to have you back

429

00:22:11,700 --> 00:22:09,140

hi guys it's great to be back on again

430

00:22:16,540 --> 00:22:11,710

it's been a long time

431

00:22:23,050 --> 00:22:16,550

well you are kind of a almost as elusive

432

00:22:26,320 --> 00:22:23,060

as champions really busy season for sure

433

00:22:28,300 --> 00:22:26,330

already I've just been so booked with

434

00:22:30,540 --> 00:22:28,310

everything and I'm going crazy I'm like

435

00:22:33,580 --> 00:22:30,550

I need a vacation

436

00:22:36,250 --> 00:22:33,590

well it sounds like you have that you

437

00:22:38,410 --> 00:22:36,260

are spending so much time and you're

438

00:22:41,100 --> 00:22:38,420

launch launch is that what you would

439

00:22:43,750 --> 00:22:41,110

call it or motorboat or what how do you

440

00:22:46,480 --> 00:22:43,760

define the vessel name do your research

441

00:22:50,020 --> 00:22:46,490

ah well my research vessel I guess if

442

00:22:53,800 --> 00:22:50,030

you want to put it that way well you you

443

00:22:57,180 --> 00:22:53,810

spend a lot of time on the open water on

444

00:23:00,040 --> 00:22:57,190

the lake that's a huge lake Yeah right

445

00:23:04,090 --> 00:23:00,050

yelling Champlain is around 120 miles

446

00:23:08,280 --> 00:23:04,100

long 400 feet at sea this is 65 feet at

447

00:23:10,810 --> 00:23:08,290

average depth very very large Lake

448

00:23:13,060 --> 00:23:10,820

underestimated by most there's a lot of

449

00:23:13,630 --> 00:23:13,070

bad weather that just pops up out of

450

00:23:15,700 --> 00:23:13,640

nowhere

451
00:23:17,770 --> 00:23:15,710
I've got stuck in a storm I learned the

452
00:23:21,010 --> 00:23:17,780
hard way this is last September and

453
00:23:24,550 --> 00:23:21,020
almost sunk so it I could understand all

454
00:23:27,520 --> 00:23:24,560
there's over 300 shipwrecks in the lake

455
00:23:28,750 --> 00:23:27,530
so yeah there's some treacherous

456
00:23:31,060 --> 00:23:28,760
condition you know you have the

457
00:23:32,770 --> 00:23:31,070
Adirondack Mountains on the New York

458
00:23:35,650 --> 00:23:32,780
side and you have the Green Mountains

459
00:23:37,720 --> 00:23:35,660
here on the Vermont side so what happens

460
00:23:40,690 --> 00:23:37,730
especially the area that I almost sunk

461
00:23:43,060 --> 00:23:40,700
in right in that area in particular

462
00:23:45,400 --> 00:23:43,070
there's a shipwreck called the water

463
00:23:48,350 --> 00:23:45,410

witch which is a eighty three foot long

464

00:23:52,340 --> 00:23:48,360

schooner and I hit bad weather

465

00:23:55,610 --> 00:23:52,350

right yes right above this shipwreck and

466

00:23:57,890 --> 00:23:55,620

with a reason for that area being so bad

467

00:24:01,700 --> 00:23:57,900

when the weather turns bad there's

468

00:24:03,350 --> 00:24:01,710

basically this funnel of when that goes

469

00:24:05,030 --> 00:24:03,360

through there it's like this huge jet

470

00:24:06,590 --> 00:24:05,040

stream that flows through though you

471

00:24:08,990 --> 00:24:06,600

know the mountain range right there in

472

00:24:10,880 --> 00:24:09,000

the Adirondacks so you don't want to be

473

00:24:13,010 --> 00:24:10,890

out on the lake unless you know what the

474

00:24:14,690 --> 00:24:13,020

weather is going to be and even if you

475

00:24:16,700 --> 00:24:14,700

know what the weather is going to be if

476

00:24:18,500 --> 00:24:16,710

it's one of those things they can just

477

00:24:20,990 --> 00:24:18,510

come up out of nowhere so it's good to

478

00:24:22,549 --> 00:24:21,000

have an emergency radio on hand for sure

479

00:24:26,900 --> 00:24:22,559

which I didn't have at the time

480

00:24:29,890 --> 00:24:26,910

ooh if I if I was starting out let's say

481

00:24:32,690 --> 00:24:29,900

on the New York side of the lake and

482

00:24:36,919 --> 00:24:32,700

we're headed up to the other side how

483

00:24:40,130 --> 00:24:36,929

long would it take me to get there well

484

00:24:44,360 --> 00:24:40,140

let's see I'm using West Point New York

485

00:24:47,330 --> 00:24:44,370

to Arnold a which is Pantin Vermont it

486

00:24:48,260 --> 00:24:47,340

would probably be I would say about 15

487

00:24:50,480 --> 00:24:48,270

minutes

488

00:24:53,060 --> 00:24:50,490

that's more than narrow part of the lake

489

00:24:55,730 --> 00:24:53,070

when you get up towards Burlington it's

490

00:24:59,150 --> 00:24:55,740

a lot wider that's like the broadly

491

00:25:00,860 --> 00:24:59,160

there's much more Lake up that way so

492

00:25:02,240 --> 00:25:00,870

down here it's more narrow then you get

493

00:25:04,100 --> 00:25:02,250

towards the southern part of the lake

494

00:25:06,950 --> 00:25:04,110

towards Whitehall New York which I know

495

00:25:07,640 --> 00:25:06,960

you guys are familiar with any Bigfoot

496

00:25:10,640 --> 00:25:07,650

sightings

497

00:25:13,070 --> 00:25:10,650

yeah yeah there we go maybe maybe a

498

00:25:17,350 --> 00:25:13,080

Bigfoot goes and knows you're your

499

00:25:21,520 --> 00:25:17,360

friend there a champ so we never know

500

00:25:24,590 --> 00:25:21,530

where do you do most of your hunting

501
00:25:26,330 --> 00:25:24,600
most of my research that I do is not far

502
00:25:30,260 --> 00:25:26,340
from where I live in the Feres burg

503
00:25:33,110 --> 00:25:30,270
Vermont I do basically my well the

504
00:25:35,900 --> 00:25:33,120
research that I do is mostly I'm about

505
00:25:38,240 --> 00:25:35,910
45 minutes south burlington vermont so

506
00:25:39,950 --> 00:25:38,250
i'm more towards the southern part of

507
00:25:42,140 --> 00:25:39,960
the lake but not the very bottom of the

508
00:25:46,549 --> 00:25:42,150
lakes and kind of in the middle range of

509
00:25:50,110 --> 00:25:46,559
the lake but buttoned a West Point New

510
00:25:53,000 --> 00:25:50,120
York facing Harbor is another place

511
00:25:57,049 --> 00:25:53,010
basically that whole area of the lake I

512
00:26:00,830 --> 00:25:57,059
cover probably I would say hmm probably

513
00:26:01,620 --> 00:26:00,840

20 25 miles maybe 30 I do Shelburne Bay

514

00:26:03,470 --> 00:26:01,630

which is north

515

00:26:06,900 --> 00:26:03,480

here I do so southern Burlington but

516

00:26:08,850 --> 00:26:06,910

once you get up that way like I said the

517

00:26:11,100 --> 00:26:08,860

lake is much broader and bigger and it's

518

00:26:14,070 --> 00:26:11,110

it's a little bit harder to I stick to

519

00:26:16,650 --> 00:26:14,080

where I've had experiences and captured

520

00:26:18,660 --> 00:26:16,660

video and audio recordings I try to stay

521

00:26:20,880 --> 00:26:18,670

in the same places but I'm also

522

00:26:22,890 --> 00:26:20,890

exploring different parts of the lake

523

00:26:25,350 --> 00:26:22,900

where I'm getting a new sighting reports

524

00:26:27,840 --> 00:26:25,360

and things like that so well you have

525

00:26:32,160 --> 00:26:27,850

been extremely you have been extremely

526

00:26:35,130 --> 00:26:32,170

lucky in getting some very fine video of

527

00:26:37,350 --> 00:26:35,140

what indeed might be a champ but a Tim I

528

00:26:39,390 --> 00:26:37,360

didn't mean to take the microphone away

529

00:26:44,220 --> 00:26:39,400

from you I'm afraid to touch anything

530

00:26:49,380 --> 00:26:44,230

here on my console because so I'll just

531

00:26:55,590 --> 00:26:49,390

pass it pass the baton to you that's

532

00:26:59,310 --> 00:26:55,600

right but I am I am curious so katie has

533

00:27:01,890 --> 00:26:59,320

there been much much activity this year

534

00:27:04,040 --> 00:27:01,900

I mean sightings not only you know with

535

00:27:08,760 --> 00:27:04,050

with yourself but you know with a

536

00:27:12,240 --> 00:27:08,770

tourist or a resident of the area well I

537

00:27:14,580 --> 00:27:12,250

really haven't had any recent reports

538

00:27:16,890 --> 00:27:14,590

from anyone else other than what I've

539

00:27:18,150 --> 00:27:16,900

had happen in the last few weeks I've

540

00:27:20,460 --> 00:27:18,160

actually gotten a couple interesting

541

00:27:23,970 --> 00:27:20,470

videos in the last couple of weeks so

542

00:27:25,560 --> 00:27:23,980

I'm really excited nothing like you know

543

00:27:27,450 --> 00:27:25,570

no head neck or anything like that I

544

00:27:30,030 --> 00:27:27,460

would use a very rare thing to see I had

545

00:27:32,400 --> 00:27:30,040

experience at one time unfortunately my

546

00:27:36,300 --> 00:27:32,410

camera at the time was a piece of junk

547

00:27:38,850 --> 00:27:36,310

and I think it to zoom in and it was

548

00:27:40,950 --> 00:27:38,860

just crazy but um Dennis my partner that

549

00:27:42,660 --> 00:27:40,960

also works with me doing champ stuff

550

00:27:46,980 --> 00:27:42,670

he's been doing this for the past oh

551
00:27:48,570 --> 00:27:46,990
gosh 35 years at least he was there with

552
00:27:50,310 --> 00:27:48,580
me when we had that head neck sighting

553
00:27:52,080 --> 00:27:50,320
and I cried for two hours I think I told

554
00:27:55,260 --> 00:27:52,090
you guys about that the last time I did

555
00:27:56,940 --> 00:27:55,270
the show but I'm hoping lightning will

556
00:27:59,010 --> 00:27:56,950
strike twice and I will see that again

557
00:28:01,290 --> 00:27:59,020
and I will get on video this time but it

558
00:28:04,050 --> 00:28:01,300
was it was amazing but in the last

559
00:28:06,360 --> 00:28:04,060
couple of weeks I've gathered a couple

560
00:28:09,450 --> 00:28:06,370
of videos that are quite interesting one

561
00:28:12,810 --> 00:28:09,460
a very strange week with two objects

562
00:28:14,460 --> 00:28:12,820
that appear darker in the wake and

563
00:28:15,570 --> 00:28:14,470

what's interesting in these videos that

564

00:28:18,180 --> 00:28:15,580

I'm getting are

565

00:28:20,190 --> 00:28:18,190

the same area where I've gathered

566

00:28:22,860 --> 00:28:20,200

echolocation recordings as well as

567

00:28:24,660 --> 00:28:22,870

ultra-low frequency sounds and it's also

568

00:28:28,730 --> 00:28:24,670

the same area that I captured another

569

00:28:31,140 --> 00:28:28,740

video back in 2014 so this area is just

570

00:28:33,390 --> 00:28:31,150

there's a reason why these animals are

571

00:28:36,030 --> 00:28:33,400

going and you know basically hang out in

572

00:28:38,070 --> 00:28:36,040

this area every year and the last like

573

00:28:40,620 --> 00:28:38,080

three to four years um I've been

574

00:28:43,440 --> 00:28:40,630

basically listening with the hydrophone

575

00:28:45,750 --> 00:28:43,450

system and pinpointing the location of

576

00:28:48,690 --> 00:28:45,760

these animals by listening hmm so now

577

00:28:52,110 --> 00:28:48,700

what I'm trying to do and basically use

578

00:28:56,130 --> 00:28:52,120

sonar to pinpoint you know get some sort

579

00:28:58,560 --> 00:28:56,140

of imagery you know to show you know

580

00:29:00,900 --> 00:28:58,570

exactly what's down there the only

581

00:29:03,120 --> 00:29:00,910

downside to sonar and a lot of people oh

582

00:29:05,220 --> 00:29:03,130

is like oh I can't just go down there

583

00:29:06,570 --> 00:29:05,230

with sonar and do all this stuff what

584

00:29:09,030 --> 00:29:06,580

they have to understand is that these

585

00:29:11,610 --> 00:29:09,040

animals have a high sensitivity of

586

00:29:14,250 --> 00:29:11,620

hearing extremely high sensitivity of

587

00:29:17,610 --> 00:29:14,260

hearing any only reason why I think this

588

00:29:20,160 --> 00:29:17,620

is reality with examples is that there

589

00:29:21,900 --> 00:29:20,170

are so many reports um say people

590

00:29:24,030 --> 00:29:21,910

getting out of their car and slamming

591

00:29:26,220 --> 00:29:24,040

the door or making a loud noise and

592

00:29:27,810 --> 00:29:26,230

they're just like gone so see them in

593

00:29:31,770 --> 00:29:27,820

there they turn their head and look and

594

00:29:33,300 --> 00:29:31,780

they're just out of there and also like

595

00:29:37,200 --> 00:29:33,310

with the Sandra Mansi photo that was

596

00:29:39,180 --> 00:29:37,210

taken in 1977 she described this is one

597

00:29:42,270 --> 00:29:39,190

thing that she had told me on the phone

598

00:29:45,420 --> 00:29:42,280

I spoke to her five years ago she had

599

00:29:47,370 --> 00:29:45,430

told me that before she actually after

600

00:29:50,370 --> 00:29:47,380

she saw the animal pop its head neck up

601
00:29:53,190 --> 00:29:50,380
and it looked around it before I go

602
00:29:55,050 --> 00:29:53,200
under the water it looked and kind of

603
00:29:57,000 --> 00:29:55,060
looked alerted and then went under the

604
00:29:59,400 --> 00:29:57,010
water and she said like I think it was a

605
00:30:01,500 --> 00:29:59,410
minute later this speedboat was coming

606
00:30:05,250 --> 00:30:01,510
down late you know it heard that boat

607
00:30:07,500 --> 00:30:05,260
way before it even got in its visibility

608
00:30:10,440 --> 00:30:07,510
you know it was this animal had to be

609
00:30:11,130 --> 00:30:10,450
hearing this and also with a lot of

610
00:30:13,740 --> 00:30:11,140
sightings

611
00:30:15,990 --> 00:30:13,750
there's more than one animal eyes I told

612
00:30:18,780 --> 00:30:16,000
before I I usually just say champ but

613
00:30:21,390 --> 00:30:18,790

there's champs there has to be a staying

614

00:30:25,320 --> 00:30:21,400

population of these animals in the lake

615

00:30:26,820 --> 00:30:25,330

to last this long and it's just silly

616

00:30:28,860 --> 00:30:26,830

the thing that there's just one champ

617

00:30:29,390 --> 00:30:28,870

because you'll have a sighting down here

618

00:30:32,270 --> 00:30:29,400

and say

619

00:30:34,130 --> 00:30:32,280

panton Vermont on the lake and then two

620

00:30:36,200 --> 00:30:34,140

hours later or even like 10 minutes

621

00:30:38,720 --> 00:30:36,210

later up in Burlington someone saw Jam

622

00:30:40,700 --> 00:30:38,730

so it's impossible but I'm doing it up

623

00:30:43,400 --> 00:30:40,710

and down the lake like oh I just thought

624

00:30:45,140 --> 00:30:43,410

and and there's also multiple animal

625

00:30:48,290 --> 00:30:45,150

sightings as well which I've gotten a

626

00:30:50,900 --> 00:30:48,300

video of two and three of them and

627

00:30:54,290 --> 00:30:50,910

Dennis has as well so they definitely

628

00:30:56,210 --> 00:30:54,300

like to move in groups which is

629

00:30:58,610 --> 00:30:56,220

interesting I think that is basically a

630

00:31:03,049 --> 00:30:58,620

hunting tactic that they use when

631

00:31:06,140 --> 00:31:03,059

they're hunting for food well I'm sorry

632

00:31:10,100 --> 00:31:06,150

okay yeah just let me ask this one thing

633

00:31:12,049 --> 00:31:10,110

here now in Loch Ness over the the

634

00:31:16,990 --> 00:31:12,059

centuries there have been maybe one or

635

00:31:20,510 --> 00:31:17,000

two cases where the monster has actually

636

00:31:22,370 --> 00:31:20,520

gotten up on land no more than one thing

637

00:31:23,120 --> 00:31:22,380

like that yeah well anything like that

638

00:31:28,400 --> 00:31:23,130

would chance

639

00:31:31,010 --> 00:31:28,410

oh absolutely there's quite a few really

640

00:31:33,410 --> 00:31:31,020

interesting yeah there is yeah there's

641

00:31:37,490 --> 00:31:33,420

and it's funny because don't really hear

642

00:31:40,100 --> 00:31:37,500

about these land sightings um you know

643

00:31:41,720 --> 00:31:40,110

like I mean it's just not a common thing

644

00:31:44,150 --> 00:31:41,730

to hear about and it's really

645

00:31:45,890 --> 00:31:44,160

interesting because most the report that

646

00:31:48,440 --> 00:31:45,900

I get of the on land saying except for

647

00:31:49,370 --> 00:31:48,450

one I Frank 14 Seibert she was on

648

00:31:52,669 --> 00:31:49,380

Monster quest

649

00:31:54,740 --> 00:31:52,679

and she saw two champ animals go

650

00:31:57,560 --> 00:31:54,750

underneath this light pole that she had

651
00:31:59,720 --> 00:31:57,570
in the front of her marina and what's

652
00:32:02,210 --> 00:31:59,730
really interesting about that was the

653
00:32:04,310 --> 00:32:02,220
animal came out of the woods I said to

654
00:32:06,590 --> 00:32:04,320
myself one oh really coming up Woods was

655
00:32:08,330 --> 00:32:06,600
kind of strange and this woman she's

656
00:32:10,490 --> 00:32:08,340
like one of my best friends now he

657
00:32:12,049 --> 00:32:10,500
they're just like so bonded and her

658
00:32:15,790 --> 00:32:12,059
brother's really nice and it's kind of

659
00:32:18,350 --> 00:32:15,800
like my adopted grandparent now but um I

660
00:32:21,860 --> 00:32:18,360
when you speak yo you know that she's

661
00:32:23,570 --> 00:32:21,870
just totally 120 million % honest like I

662
00:32:25,820 --> 00:32:23,580
just know according to what I seen as

663
00:32:27,830 --> 00:32:25,830

well it's like wow where it's pretty

664

00:32:29,240 --> 00:32:27,840

cool so when she said these animals came

665

00:32:31,850 --> 00:32:29,250

out of the woods I'm thinking what in

666

00:32:34,760 --> 00:32:31,860

the world is kind of weird so I ended up

667

00:32:37,490 --> 00:32:34,770

looking on Google Earth and I look

668

00:32:39,230 --> 00:32:37,500

behind where the boathouse is now with a

669

00:32:41,870 --> 00:32:39,240

boat house is situated you have the

670

00:32:42,980 --> 00:32:41,880

mouth of the Winooski River the mouth of

671

00:32:44,870 --> 00:32:42,990

the river seems you

672

00:32:48,080 --> 00:32:44,880

the very good places for these animals

673

00:32:49,790 --> 00:32:48,090

to yeah you know basically hunt for food

674

00:32:50,930 --> 00:32:49,800

I mean there's tons of fish coming out

675

00:32:53,630 --> 00:32:50,940

of these rivers and it's the perfect

676
00:32:55,940 --> 00:32:53,640
kind of camp buffet for them to be

677
00:32:58,160 --> 00:32:55,950
hanging out and feeding and then right

678
00:33:01,610 --> 00:32:58,170
behind the boathouse there's this vast

679
00:33:04,490 --> 00:33:01,620
marsh system and there's just so much

680
00:33:06,200 --> 00:33:04,500
Marsh there that that I know we're back

681
00:33:08,570 --> 00:33:06,210
these animals came out of that Marsh and

682
00:33:10,400 --> 00:33:08,580
it's an interesting because she had said

683
00:33:12,770 --> 00:33:10,410
when they came up to this light pole and

684
00:33:14,630 --> 00:33:12,780
she looked out the window she look they

685
00:33:16,790 --> 00:33:14,640
look just like a dinosaur long neck

686
00:33:18,799 --> 00:33:16,800
small head and she said you know it's

687
00:33:21,320 --> 00:33:18,809
really funny one of them a smaller one

688
00:33:23,630 --> 00:33:21,330

was brown and the larger one was pea

689

00:33:25,549 --> 00:33:23,640

green and I was like a little difference

690

00:33:28,090 --> 00:33:25,559

in color that does happening in many

691

00:33:29,990 --> 00:33:28,100

animal species but then I got thinking

692

00:33:32,210 --> 00:33:30,000

hmm in Marsh

693

00:33:34,430 --> 00:33:32,220

you see Turtles coming out of the marsh

694

00:33:36,650 --> 00:33:34,440

and they have this moss on their shell

695

00:33:38,540 --> 00:33:36,660

sometimes I'm if she said it looked all

696

00:33:41,360 --> 00:33:38,550

moldy to me that's all I could think of

697

00:33:43,520 --> 00:33:41,370

something that this animal had this type

698

00:33:45,650 --> 00:33:43,530

of moss on it and that makes a lot of

699

00:33:47,240 --> 00:33:45,660

sense because I see a lot of turtles out

700

00:33:49,820 --> 00:33:47,250

here in the lake and in the marsh and

701
00:33:51,680 --> 00:33:49,830
they're covered in this loss and this

702
00:33:55,130 --> 00:33:51,690
was in the spring and this is about I

703
00:33:57,620 --> 00:33:55,140
would say probably 25 or 30 years ago it

704
00:34:00,260 --> 00:33:57,630
was quite a long time ago but it's

705
00:34:03,350 --> 00:34:00,270
pretty interesting but that that's one

706
00:34:05,540 --> 00:34:03,360
sighting that was on land the light

707
00:34:06,799 --> 00:34:05,550
itself that they want you know they went

708
00:34:08,270 --> 00:34:06,809
underneath to check it out it was a

709
00:34:10,820 --> 00:34:08,280
brand new light that they're just put

710
00:34:12,470 --> 00:34:10,830
out at the marina but I sent thinking

711
00:34:15,139 --> 00:34:12,480
Lee what was the attraction was it the

712
00:34:16,760 --> 00:34:15,149
light itself or perhaps was it delayed

713
00:34:18,050 --> 00:34:16,770

attracting the bugs above you were

714

00:34:20,570 --> 00:34:18,060

falling in the water and a whole bunch

715

00:34:22,940 --> 00:34:20,580

of fish were feeding on the bugs so

716

00:34:24,830 --> 00:34:22,950

maybe camp was going after the fish that

717

00:34:27,260 --> 00:34:24,840

says bugs were attracting sound like a

718

00:34:30,440 --> 00:34:27,270

chain food chain type of reaction going

719

00:34:32,330 --> 00:34:30,450

on there there's a lot of possibility

720

00:34:34,430 --> 00:34:32,340

but that's one on land sighting that's

721

00:34:37,040 --> 00:34:34,440

quite interesting so I started talking

722

00:34:40,040 --> 00:34:37,050

to a lot of local people and where I

723

00:34:41,750 --> 00:34:40,050

live there's a lot of marsh and I

724

00:34:45,230 --> 00:34:41,760

actually in front of the family they own

725

00:34:47,840 --> 00:34:45,240

oh I forget how many I think 300 acres

726
00:34:50,149 --> 00:34:47,850
of marsh here and I'm fortunate enough

727
00:34:51,710 --> 00:34:50,159
to be able to go down and do a little

728
00:34:54,409 --> 00:34:51,720
bit of work there and set up game

729
00:34:56,840 --> 00:34:54,419
cameras and things like that and there's

730
00:34:59,360 --> 00:34:56,850
been quite a few stories on them

731
00:35:03,320 --> 00:34:59,370
the guy that owns part of it he said to

732
00:35:07,280 --> 00:35:03,330
me that his grandfather years ago had

733
00:35:11,690 --> 00:35:07,290
said that he saw two things out in this

734
00:35:13,730 --> 00:35:11,700
marsh and I'm like huh that he told

735
00:35:16,310 --> 00:35:13,740
somebody that the world's biggest beaver

736
00:35:19,070 --> 00:35:16,320
has lived in his marsh we know in fact

737
00:35:21,410 --> 00:35:19,080
they weren't beavers I see but they he

738
00:35:23,630 --> 00:35:21,420

said they're really two champs like he

739

00:35:26,090 --> 00:35:23,640

saw them sunbathing in the marsh just

740

00:35:28,220 --> 00:35:26,100

dark-skinned really shiny and they would

741

00:35:30,620 --> 00:35:28,230

come out every spring just like turtles

742

00:35:32,480 --> 00:35:30,630

do that was an interesting report and

743

00:35:35,690 --> 00:35:32,490

then there's actually the most recent

744

00:35:38,240 --> 00:35:35,700

report in the same exact Marsh he's a

745

00:35:40,730 --> 00:35:38,250

friend of mine now is a Matt and he was

746

00:35:43,430 --> 00:35:40,740

down camping along with marsh system one

747

00:35:47,000 --> 00:35:43,440

night and he got so scared because he

748

00:35:48,710 --> 00:35:47,010

was good to go to the bathroom and he's

749

00:35:50,390 --> 00:35:48,720

like what in the world is that noise you

750

00:35:52,490 --> 00:35:50,400

heard this thrashing through the marsh

751
00:35:54,890 --> 00:35:52,500
and he shined a light out and he saw

752
00:35:57,110 --> 00:35:54,900
these red glowing eyes turning and

753
00:35:59,090 --> 00:35:57,120
looking at him and that's not the first

754
00:36:02,720 --> 00:35:59,100
sighting in that Marsh that someone's

755
00:36:04,340 --> 00:36:02,730
seen red glowing eyes so on the marsh

756
00:36:07,010 --> 00:36:04,350
system they think they're a very easy

757
00:36:10,250 --> 00:36:07,020
feed for these animals as well as hiding

758
00:36:13,730 --> 00:36:10,260
in seclusion - they probably feed on

759
00:36:15,290 --> 00:36:13,740
frogs small fish snakes turtles who

760
00:36:18,650 --> 00:36:15,300
knows I mean they could be feeding on

761
00:36:21,230 --> 00:36:18,660
vegetation - we really don't know but I

762
00:36:24,170 --> 00:36:21,240
think it's a great place for them to

763
00:36:26,360 --> 00:36:24,180

hide in concealment and since the water

764

00:36:28,760 --> 00:36:26,370

so shallow it's an easy meal for them as

765

00:36:33,430 --> 00:36:28,770

well okay as long as you're not feeding

766

00:36:35,930 --> 00:36:33,440

on humans exactly we don't need that

767

00:36:37,580 --> 00:36:35,940

there's a lot there's a lot of the other

768

00:36:39,800 --> 00:36:37,590

guy on land sightings that are not

769

00:36:42,440 --> 00:36:39,810

talked about and their son dating

770

00:36:44,570 --> 00:36:42,450

reports as well there was a little girl

771

00:36:47,000 --> 00:36:44,580

that went down to Arnold's Bay which is

772

00:36:48,920 --> 00:36:47,010

where usually where Benedict Arnold

773

00:36:51,890 --> 00:36:48,930

burnt his ship and fled to Crown Point

774

00:36:55,910 --> 00:36:51,900

New York so that's another story but

775

00:36:58,040 --> 00:36:55,920

anyway this small bay there's been quite

776

00:37:00,020 --> 00:36:58,050

a few reports and what's really

777

00:37:03,440 --> 00:37:00,030

interesting is this little girl was

778

00:37:05,960 --> 00:37:03,450

going down and her bicycle and chant

779

00:37:07,250 --> 00:37:05,970

this animal was on the beach and she

780

00:37:09,050 --> 00:37:07,260

said it was chant this girl was like

781

00:37:10,700 --> 00:37:09,060

eight or nine at the time I'm actually

782

00:37:12,470 --> 00:37:10,710

I'm actually

783

00:37:14,720 --> 00:37:12,480

with someone that's Friends of a brother

784

00:37:16,670 --> 00:37:14,730

so I'm gonna get to talk to her and you

785

00:37:18,200 --> 00:37:16,680

in a video interview which will be

786

00:37:20,840 --> 00:37:18,210

interesting because I heard this story

787

00:37:22,970 --> 00:37:20,850

from Dennis and he had gotten a report

788

00:37:25,490 --> 00:37:22,980

from her years ago so it'll be great to

789

00:37:27,620 --> 00:37:25,500

get a new perspective on this story but

790

00:37:30,110 --> 00:37:27,630

she saw this animal laying on the beach

791

00:37:32,300 --> 00:37:30,120

with a long neck small head shiny this

792

00:37:35,750 --> 00:37:32,310

the whole description of champ sixteen

793

00:37:37,340 --> 00:37:35,760

feet a link and it heard her like a sir

794

00:37:40,010 --> 00:37:37,350

coming down there bicycle and it kind of

795

00:37:42,290 --> 00:37:40,020

looked and scurry off into the lake so

796

00:37:43,970 --> 00:37:42,300

you know that's a son dating report and

797

00:37:46,640 --> 00:37:43,980

I believe that these animals are

798

00:37:49,940 --> 00:37:46,650

ectotherms and ectothermic animals

799

00:37:53,540 --> 00:37:49,950

basically rely on the outside

800

00:37:57,320 --> 00:37:53,550

temperature to regulate their internal

801
00:38:00,130 --> 00:37:57,330
temperature alligators snakes turtles

802
00:38:03,230 --> 00:38:00,140
lizards are all ectothermic as well as

803
00:38:05,360 --> 00:38:03,240
amphibians too so that's interesting

804
00:38:07,070 --> 00:38:05,370
with the sunbathing reports they they

805
00:38:09,740 --> 00:38:07,080
like to tan out in the Sun we need to

806
00:38:12,800 --> 00:38:09,750
make some champ tanning lotion or

807
00:38:14,750 --> 00:38:12,810
something like that well that's that's

808
00:38:18,320 --> 00:38:14,760
the thing though I mean the the fact

809
00:38:22,570 --> 00:38:18,330
that these animals are able to come out

810
00:38:24,740 --> 00:38:22,580
of the water and and get on to the land

811
00:38:27,410 --> 00:38:24,750
could probably give us some pretty good

812
00:38:30,500 --> 00:38:27,420
clues on just what kind of species we're

813
00:38:32,930 --> 00:38:30,510

dealing with here yeah absolutely I mean

814

00:38:36,620 --> 00:38:32,940

it's kind of funny because I'm tossed up

815

00:38:38,210 --> 00:38:36,630

between reptile and amphibian for the

816

00:38:39,620 --> 00:38:38,220

simple reason that reptiles and

817

00:38:41,360 --> 00:38:39,630

amphibians do you have a lot of

818

00:38:44,210 --> 00:38:41,370

similarities but what's really

819

00:38:46,430 --> 00:38:44,220

interesting with the ice I'll start with

820

00:38:49,010 --> 00:38:46,440

the eye shine the eye shine that the

821

00:38:51,290 --> 00:38:49,020

report that I'm getting indicate that

822

00:38:53,600 --> 00:38:51,300

this animal is mostly nocturnal with

823

00:38:56,450 --> 00:38:53,610

this reddish yellowish eyes shine now

824

00:38:59,060 --> 00:38:56,460

american alligators give off this type

825

00:39:01,310 --> 00:38:59,070

of eye shine and the type of item is

826

00:39:04,810 --> 00:39:01,320

called tapetum lucidum which is actually

827

00:39:07,790 --> 00:39:04,820

a latin name for a bright carpet and

828

00:39:09,560 --> 00:39:07,800

basically Moe you know nocturnal animals

829

00:39:11,420 --> 00:39:09,570

have this type of eye shine and

830

00:39:13,790 --> 00:39:11,430

different species of animals give off

831

00:39:16,070 --> 00:39:13,800

different colors course is in particular

832

00:39:18,050 --> 00:39:16,080

because I have three horses of my own

833

00:39:19,970 --> 00:39:18,060

they give off a blue eye shine which is

834

00:39:22,490 --> 00:39:19,980

really interesting and you get different

835

00:39:24,410 --> 00:39:22,500

types of birds certain owls that give

836

00:39:26,510 --> 00:39:24,420

off red eye shine and

837

00:39:29,600 --> 00:39:26,520

American alligator as well as Caymans

838

00:39:31,460 --> 00:39:29,610

crocodiles they give off a red yellow

839

00:39:34,160 --> 00:39:31,470

eye shine that kind of berries here and

840

00:39:36,350 --> 00:39:34,170

there but this I shine indicates that

841

00:39:38,480 --> 00:39:36,360

the animals are mostly nocturnal and

842

00:39:41,180 --> 00:39:38,490

what's really interesting as well to go

843

00:39:43,400 --> 00:39:41,190

with that trait is the recording that I

844

00:39:46,280 --> 00:39:43,410

have captured of these animals are at

845

00:39:50,630 --> 00:39:46,290

night they usually start around 7:30

846

00:39:52,280 --> 00:39:50,640

p.m. and one night I had I think I told

847

00:39:54,740 --> 00:39:52,290

you guys about the recordings that we

848

00:39:56,930 --> 00:39:54,750

captured in button Bay and the

849

00:39:58,940 --> 00:39:56,940

recordings I mean this is like constant

850

00:40:01,880 --> 00:39:58,950

and they wouldn't shut up I was honestly

851

00:40:04,100 --> 00:40:01,890

laying in my boat with a sleeping bag

852

00:40:06,740 --> 00:40:04,110

and Dennis was sleeping on the other

853

00:40:08,360 --> 00:40:06,750

little thing that folds out and he's

854

00:40:10,280 --> 00:40:08,370

like maybe we should leave I'm like what

855

00:40:13,040 --> 00:40:10,290

are you talking about that that's so

856

00:40:15,560 --> 00:40:13,050

loud on on the speaker because I had an

857

00:40:17,930 --> 00:40:15,570

external speaker hooked up I had to turn

858

00:40:19,730 --> 00:40:17,940

that down and you know you just think of

859

00:40:22,070 --> 00:40:19,740

these animals being around the size of

860

00:40:24,590 --> 00:40:22,080

your boat so it's kind of scary and we

861

00:40:26,300 --> 00:40:24,600

heard three individuals at around yoga

862

00:40:29,510 --> 00:40:26,310

at the same time communicating back and

863

00:40:32,240 --> 00:40:29,520

forth so that was it was a pretty

864

00:40:34,970 --> 00:40:32,250

interesting night and like I said the

865

00:40:37,490 --> 00:40:34,980

sounds started around 7:30 p.m. and they

866

00:40:40,220 --> 00:40:37,500

lasted to like 2:30 in the morning and

867

00:40:43,610 --> 00:40:40,230

then they stopped to like I think it was

868

00:40:45,320 --> 00:40:43,620

4:30 and then they started for like 20 I

869

00:40:46,940 --> 00:40:45,330

get anywhere for 20 minutes and then as

870

00:40:49,400 --> 00:40:46,950

soon as the Sun came up it stops

871

00:40:53,000 --> 00:40:49,410

completely stops done

872

00:40:56,390 --> 00:40:53,010

so using that for an example of

873

00:40:58,400 --> 00:40:56,400

nocturnal behavior using the the

874

00:41:02,360 --> 00:40:58,410

sightings and video that you know I've

875

00:41:06,050 --> 00:41:02,370

captured on the lake a mostly toward you

876
00:41:08,540 --> 00:41:06,060
know dusk nighttime although around

877
00:41:11,750 --> 00:41:08,550
noontime when the Sun is at highest

878
00:41:13,310 --> 00:41:11,760
peaks I've gotten video as well but I

879
00:41:15,890 --> 00:41:13,320
think this is because they are an

880
00:41:18,260 --> 00:41:15,900
ectotherm and they're coming up to get

881
00:41:19,910 --> 00:41:18,270
that sunlight they're basically basking

882
00:41:21,320 --> 00:41:19,920
in the Sun just like the turtle do and

883
00:41:22,850 --> 00:41:21,330
the sun's really strong there's Turtles

884
00:41:25,910 --> 00:41:22,860
out there popping their heads around

885
00:41:29,360 --> 00:41:25,920
kind of the same thing so there's a lot

886
00:41:33,100 --> 00:41:29,370
of indications to me as well as an

887
00:41:35,540 --> 00:41:33,110
phibian they also have a nice shine

888
00:41:38,180 --> 00:41:35,550

certain types of salamanders they have

889

00:41:40,250 --> 00:41:38,190

this reddish yellowish eye shine

890

00:41:42,680 --> 00:41:40,260

they have the shiny skin champ has shiny

891

00:41:44,480 --> 00:41:42,690

skin but champ also has these knobs on

892

00:41:47,420 --> 00:41:44,490

their back which is a reptilian feature

893

00:41:49,490 --> 00:41:47,430

that's why I'm kind of confused like are

894

00:41:51,740 --> 00:41:49,500

they in phibian are they reptile or are

895

00:41:54,560 --> 00:41:51,750

they some sort of hybrid between the two

896

00:41:56,300 --> 00:41:54,570

and it sounds kind of crazy but with

897

00:41:58,610 --> 00:41:56,310

evolution we started out with in

898

00:42:00,110 --> 00:41:58,620

phidian's which turned into reptiles so

899

00:42:02,990 --> 00:42:00,120

there might be some sort of link right

900

00:42:06,230 --> 00:42:03,000

there that was a separate species that

901
00:42:10,040 --> 00:42:06,240
that came of maybe both I really don't

902
00:42:11,810 --> 00:42:10,050
know don't worry that absorbs it

903
00:42:13,760 --> 00:42:11,820
wouldn't expect though that reptiles

904
00:42:17,570 --> 00:42:13,770
would be able to survive the the cold

905
00:42:19,430 --> 00:42:17,580
climate up there in Vermont well we do

906
00:42:21,650 --> 00:42:19,440
have the common snapping turtle for

907
00:42:23,240 --> 00:42:21,660
example and they basically in the

908
00:42:24,710 --> 00:42:23,250
wintertime they go down and they

909
00:42:27,260 --> 00:42:24,720
hibernate down in the mud

910
00:42:29,960 --> 00:42:27,270
mostly partially in the mud and the

911
00:42:32,210 --> 00:42:29,970
reason why they can sustain boom during

912
00:42:34,940 --> 00:42:32,220
the winter time underneath the ice is

913
00:42:36,830 --> 00:42:34,950

they breathe through specialized skin

914

00:42:38,810 --> 00:42:36,840

cells beneath their tails they basically

915

00:42:43,340 --> 00:42:38,820

breathe through their but if it wasn't

916

00:42:46,250 --> 00:42:43,350

put in general term and that's how you

917

00:42:48,500 --> 00:42:46,260

know they absorb oxygen that way when in

918

00:42:50,270 --> 00:42:48,510

phibian which I believe that these

919

00:42:53,810 --> 00:42:50,280

animals had the fibia straits as well

920

00:42:55,100 --> 00:42:53,820

like I said with that they will be

921

00:42:56,960 --> 00:42:55,110

breathing through their skin and that's

922

00:42:58,460 --> 00:42:56,970

probably why we don't feed them all the

923

00:43:00,860 --> 00:42:58,470

time you know which is one of those

924

00:43:03,650 --> 00:43:00,870

things where that makes a lot of sense

925

00:43:06,680 --> 00:43:03,660

to me so like I said I'm kind of toss-up

926
00:43:08,990 --> 00:43:06,690
between the two and within phibian using

927
00:43:10,550 --> 00:43:09,000
aquatic frogs for example in the

928
00:43:13,520 --> 00:43:10,560
wintertime when they're down underneath

929
00:43:15,980 --> 00:43:13,530
the ice they actually develop these this

930
00:43:19,280 --> 00:43:15,990
type of these crystals in their

931
00:43:22,010 --> 00:43:19,290
bloodstream and it actually acts as a

932
00:43:24,950 --> 00:43:22,020
natural antifreeze which prevents them

933
00:43:27,890 --> 00:43:24,960
from freezing solid which is pretty cool

934
00:43:29,740 --> 00:43:27,900
so that's how they can sustain through

935
00:43:32,120 --> 00:43:29,750
the winter as well so you know there are

936
00:43:37,670 --> 00:43:32,130
native animals here in the Champlain

937
00:43:39,680 --> 00:43:37,680
Valley that Gail Addie deter up to your

938
00:43:41,330 --> 00:43:39,690

kid you have to go to our break so would

939

00:43:43,580 --> 00:43:41,340

we come back we will continue our

940

00:43:48,890 --> 00:43:43,590

conversation with Colin and Katie are

941

00:43:48,900 --> 00:43:52,780

[Music]

942

00:43:59,740 --> 00:43:57,830

explode the bazaar or e-ticket ride into

943

00:44:03,020 --> 00:43:59,750

the world of the paranoid

944

00:44:07,330 --> 00:44:03,030

strap yourself e'en as we traverse the

945

00:44:10,420 --> 00:44:07,340

universe exploring the unexplained UFO s

946

00:44:12,830 --> 00:44:10,430

ghosts Lost Worlds

947

00:44:16,670 --> 00:44:12,840

cryptozoology waters as well as other

948

00:44:20,480 --> 00:44:16,680

dimensions it's time to take back the

949

00:44:22,670 --> 00:44:20,490

night last night now you are

950

00:44:31,540 --> 00:44:22,680

electrifying hosts of exploring the

951
00:44:36,260 --> 00:44:33,830
all right welcome back to the second

952
00:44:40,160 --> 00:44:36,270
hour of exploring the bizarre I'm Tim

953
00:44:42,950 --> 00:44:40,170
Schwarz tonight we're having a cryptid

954
00:44:45,260 --> 00:44:42,960
night I guess would be a good way to say

955
00:44:48,290 --> 00:44:45,270
it and our guests are Collin Schneider

956
00:44:50,780 --> 00:44:48,300
and Katie Elizabeth and we're gonna

957
00:44:51,109 --> 00:44:50,790
bring Collin back into the conversation

958
00:44:56,180 --> 00:44:51,119
again

959
00:44:59,480 --> 00:44:56,190
so Collin when would we had to go to

960
00:45:01,910 --> 00:44:59,490
break the last time with you we were

961
00:45:06,290 --> 00:45:01,920
talking about how some of your favorite

962
00:45:11,000 --> 00:45:06,300
stories involves some of these cryptids

963
00:45:16,130 --> 00:45:11,010

and and animal mutilations and now I

964

00:45:18,260 --> 00:45:16,140

live in southern Indiana and Indiana has

965

00:45:24,260 --> 00:45:18,270

had over the years some really

966

00:45:27,890 --> 00:45:24,270

interesting cryptid sightings and when

967

00:45:32,000 --> 00:45:27,900

you were talking about the that the

968

00:45:36,410 --> 00:45:32,010

chicken coop invaders there was a very

969

00:45:39,200 --> 00:45:36,420

interesting case in the early 1970s and

970

00:45:43,430 --> 00:45:39,210

Rising Sun Indiana where is the same

971

00:45:46,310 --> 00:45:43,440

kind of situation where the this this

972

00:45:48,980 --> 00:45:46,320

creature would was breaking into chicken

973

00:45:50,540 --> 00:45:48,990

coops and and just basically just you

974

00:45:53,830 --> 00:45:50,550

know going through the chickens like

975

00:45:57,760 --> 00:45:53,840

popcorn but one of the fascinating

976

00:46:03,470 --> 00:45:57,770

aspects of the Rising Sun cases is that

977

00:46:06,380 --> 00:46:03,480

people would go and take take shots at

978

00:46:08,750 --> 00:46:06,390

this creature and it would disappear

979

00:46:11,930 --> 00:46:08,760

in a in a flash of light and then

980

00:46:16,609 --> 00:46:11,940

reappear like in another section of the

981

00:46:21,579 --> 00:46:16,619

yard so I mean for a lot of people who

982

00:46:24,370 --> 00:46:21,589

have have trouble with the idea that a

983

00:46:27,740 --> 00:46:24,380

Bigfoot could be it

984

00:46:30,680 --> 00:46:27,750

well that that Bigfoot is is is just you

985

00:46:31,549 --> 00:46:30,690

know say like a North American primate

986

00:46:33,440 --> 00:46:31,559

of some kind

987

00:46:35,900 --> 00:46:33,450

you know I cite some of these

988

00:46:38,390 --> 00:46:35,910

interesting cases that I think that

989

00:46:40,339 --> 00:46:38,400

there at least were some cases there

990

00:46:44,710 --> 00:46:40,349

seems to be something more going on than

991

00:46:49,029 --> 00:46:44,720

just a strictly flesh-and-blood creature

992

00:46:53,569 --> 00:46:49,039

yeah I I've heard of the that case I

993

00:46:56,120 --> 00:46:53,579

remember reading an older issue of state

994

00:46:57,529 --> 00:46:56,130

where Loren Coleman and Jerome Clark

995

00:47:00,140 --> 00:46:57,539

talked about it and they let her bring

996

00:47:02,529 --> 00:47:00,150

in a case up in their book creatures

997

00:47:06,109 --> 00:47:02,539

from the outer edge arm interestingly

998

00:47:09,849 --> 00:47:06,119

enough Indiana southern Indiana

999

00:47:13,269 --> 00:47:09,859

specifically has a long history of

1000

00:47:18,650 --> 00:47:13,279

mystery animal attacks when it comes to

1001
00:47:23,289 --> 00:47:18,660
Black Panthers coleus the best example

1002
00:47:27,859 --> 00:47:23,299
of that is the varmint scare of 1949

1003
00:47:33,650 --> 00:47:27,869
that whole year mainly from April to

1004
00:47:38,240 --> 00:47:33,660
November but the earlier and December

1005
00:47:40,460 --> 00:47:38,250
also had some cases there are all these

1006
00:47:44,059 --> 00:47:40,470
stories basically every single night on

1007
00:47:48,499 --> 00:47:44,069
a large black panther creature was

1008
00:47:51,410 --> 00:47:48,509
attacking and killing dozens of animals

1009
00:47:54,499 --> 00:47:51,420
on various farms in southern Indiana and

1010
00:47:58,069 --> 00:47:54,509
people flipped out there were there was

1011
00:48:01,339 --> 00:47:58,079
a daily newspaper coverage of the story

1012
00:48:06,200 --> 00:48:01,349
on in pretty much every newspaper in the

1013
00:48:08,059 --> 00:48:06,210

area they near the end of it they

1014

00:48:10,190 --> 00:48:08,069

started making fun of it and having a

1015

00:48:13,309 --> 00:48:10,200

good time but people were genuine

1016

00:48:16,160 --> 00:48:13,319

genuinely scared I when I talk about

1017

00:48:19,640 --> 00:48:16,170

this case I always remember there was

1018

00:48:22,070 --> 00:48:19,650

this front-page story where this

1019

00:48:26,600 --> 00:48:22,080

order lady is standing by her mailbox

1020

00:48:29,120 --> 00:48:26,610

with a shotgun and the store the the

1021

00:48:33,080 --> 00:48:29,130

caption under it is talking about how

1022

00:48:35,870 --> 00:48:33,090

she's so scared to walk the quarter-mile

1023

00:48:37,490 --> 00:48:35,880

to her mailbox that she has to that she

1024

00:48:43,190 --> 00:48:37,500

takes her gun with her to make sure that

1025

00:48:46,490 --> 00:48:43,200

the varmint doesn't attack her and the

1026

00:48:48,530 --> 00:48:46,500

bulk of the predation cases that I've

1027

00:48:50,780 --> 00:48:48,540

looked at they're not actually animal

1028

00:48:52,280 --> 00:48:50,790

mutilations it's a big confusion they're

1029

00:48:53,690 --> 00:48:52,290

separate from you know the cattle

1030

00:48:56,840 --> 00:48:53,700

mutilation that people associate with

1031

00:48:59,270 --> 00:48:56,850

UFOs what where it comes in with these

1032

00:49:00,770 --> 00:48:59,280

cases is whatever is killing what would

1033

00:49:03,410 --> 00:49:00,780

ever cause these animals to die is

1034

00:49:05,690 --> 00:49:03,420

definitely an animal it's definitely

1035

00:49:08,450 --> 00:49:05,700

some form of predation meaning they were

1036

00:49:11,720 --> 00:49:08,460

definitely attacked for food reasons or

1037

00:49:14,870 --> 00:49:11,730

for surplus killing reasons meaning

1038

00:49:18,830 --> 00:49:14,880

whatever happened would do to an animal

1039

00:49:20,930 --> 00:49:18,840

not similar to the cattle mutilations

1040

00:49:25,460 --> 00:49:20,940

where the question comes in is there a

1041

00:49:27,650 --> 00:49:25,470

lot of a lot of people feel that on some

1042

00:49:31,040 --> 00:49:27,660

of these cases are due to you know the

1043

00:49:32,930 --> 00:49:31,050

Black Panthers or Bigfoot's or mystery

1044

00:49:36,740 --> 00:49:32,940

large canines I actually have some

1045

00:49:39,530 --> 00:49:36,750

stories in Montana of hyenas in the

1046

00:49:43,670 --> 00:49:39,540

eighteen hundreds attacking um

1047

00:49:45,140 --> 00:49:43,680

chickens um so it's definitely some kind

1048

00:49:47,960 --> 00:49:45,150

of animal that are doing these various

1049

00:49:50,890 --> 00:49:47,970

cases various attacks and there is a

1050

00:49:53,660 --> 00:49:50,900

wide variety one of the things that

1051
00:49:56,900 --> 00:49:53,670
sends up red flags and causes people to

1052
00:50:00,070 --> 00:49:56,910
be alarmed and worried is when the

1053
00:50:03,170 --> 00:50:00,080
animals get attacked it's not one or two

1054
00:50:07,910 --> 00:50:03,180
it's the whole flock it's hundreds at a

1055
00:50:09,470 --> 00:50:07,920
time and that's something unusual at

1056
00:50:12,350 --> 00:50:09,480
least at least it's perceived to be

1057
00:50:15,110 --> 00:50:12,360
unusual when in reality it's actually a

1058
00:50:18,320 --> 00:50:15,120
known process that happens with a lot of

1059
00:50:21,200 --> 00:50:18,330
predators particularly cat felines and

1060
00:50:22,520 --> 00:50:21,210
canines it's seen in domestic dogs and

1061
00:50:25,820 --> 00:50:22,530
wolves and coyotes and it's called

1062
00:50:27,590 --> 00:50:25,830
surplus killing and what happens is when

1063
00:50:30,170 --> 00:50:27,600

a predator is in an area with a lot of

1064

00:50:32,150 --> 00:50:30,180

prey animals you know the chickens the

1065

00:50:33,500 --> 00:50:32,160

calves or whatnot and they're all moving

1066

00:50:36,560 --> 00:50:33,510

around

1067

00:50:39,109 --> 00:50:36,570

scared the predator will go into

1068

00:50:42,170 --> 00:50:39,119

overdrive and go and just kill

1069

00:50:45,050 --> 00:50:42,180

everything it can it won't eat them it

1070

00:50:46,970 --> 00:50:45,060

won't touch the animals further it will

1071

00:50:48,970 --> 00:50:46,980

just kill everything this has been

1072

00:50:52,780 --> 00:50:48,980

studied very heavily in wolves

1073

00:50:56,359 --> 00:50:52,790

especially in Yosemite National Park a

1074

00:50:58,790 --> 00:50:56,369

wolf group of I think five wolves took

1075

00:51:00,200 --> 00:50:58,800

down something like a hundred and fifty

1076

00:51:02,900 --> 00:51:00,210

elk in a couple hours

1077

00:51:05,000 --> 00:51:02,910

mmm wow we can take that startling

1078

00:51:09,530 --> 00:51:05,010

numbers and this is seen in domestic

1079

00:51:11,870 --> 00:51:09,540

dogs as well so and the other feature

1080

00:51:13,400 --> 00:51:11,880

that is commonly brought up that gets

1081

00:51:16,670 --> 00:51:13,410

people concerned in thinking that it's

1082

00:51:18,470 --> 00:51:16,680

not a regular animal that maybe it's a

1083

00:51:22,130 --> 00:51:18,480

monster or something out of the ordinary

1084

00:51:24,530 --> 00:51:22,140

is the animals appeared to be drained of

1085

00:51:28,160 --> 00:51:24,540

blood in a lot of the cases I tend to

1086

00:51:32,270 --> 00:51:28,170

think of the Bladen burro vampire cat

1087

00:51:35,120 --> 00:51:32,280

from 1954 Blaine Bern North Carolina

1088

00:51:37,010 --> 00:51:35,130

this big black cat was said to attack

1089

00:51:41,900 --> 00:51:37,020

various animals drain them of blood and

1090

00:51:43,490 --> 00:51:41,910

leave them to die when in fact none of

1091

00:51:44,720 --> 00:51:43,500

the case none of the animals that were

1092

00:51:48,830 --> 00:51:44,730

claimed to be drained of blood were

1093

00:51:50,420 --> 00:51:48,840

actually examined by a veterinarian to

1094

00:51:54,650 --> 00:51:50,430

determine if they were actually drained

1095

00:51:57,230 --> 00:51:54,660

of blood when something dies your body

1096

00:52:01,099 --> 00:51:57,240

cools your blood starts to thicken and

1097

00:52:02,930 --> 00:52:01,109

it starts to congregate at the center of

1098

00:52:05,410 --> 00:52:02,940

gravity the the bottom of the body

1099

00:52:09,830 --> 00:52:05,420

essentially wherever however it's laying

1100

00:52:12,020 --> 00:52:09,840

when that happens the animal can appear

1101
00:52:14,660 --> 00:52:12,030
to be completely bloodless you can you

1102
00:52:18,640 --> 00:52:14,670
know stab the animal you can shake it

1103
00:52:22,250 --> 00:52:18,650
around move around and it will not bleed

1104
00:52:23,620 --> 00:52:22,260
but it it's not actually drained of

1105
00:52:29,270 --> 00:52:23,630
blood and this process is called

1106
00:52:30,830 --> 00:52:29,280
lividity and it's it happens in

1107
00:52:32,840 --> 00:52:30,840
everything after everything dies and

1108
00:52:37,609 --> 00:52:32,850
they can take even just a couple hours

1109
00:52:40,580 --> 00:52:37,619
to occur so you take that combine it

1110
00:52:42,590 --> 00:52:40,590
with the history associated with an

1111
00:52:46,280 --> 00:52:42,600
excess number of animals being killed

1112
00:52:47,059 --> 00:52:46,290
every single night and people are

1113
00:52:49,059 --> 00:52:47,069

panicked

1114

00:52:51,680 --> 00:52:49,069

which obviously causes

1115

00:52:53,719 --> 00:52:51,690

misidentifications of animals leading to

1116

00:52:56,719 --> 00:52:53,729

the idea that they're seeing black

1117

00:53:00,039 --> 00:52:56,729

panthers or some kind of hyena or a

1118

00:53:04,880 --> 00:53:00,049

giant dog saying when in fact they're

1119

00:53:07,400 --> 00:53:04,890

panicked and they're seeing regular

1120

00:53:10,370 --> 00:53:07,410

animals at least in my opinion I'd say

1121

00:53:14,150 --> 00:53:10,380

out of the I've looked into probably

1122

00:53:18,620 --> 00:53:14,160

about 2,000 of these cases I'd say 99%

1123

00:53:21,439 --> 00:53:18,630

of them this is the case what now you

1124

00:53:23,709 --> 00:53:21,449

know what we have of course I don't know

1125

00:53:26,329 --> 00:53:23,719

if you've made any study this the

1126

00:53:29,749 --> 00:53:26,339

chupacabra mainly in Puerto Rico but in

1127

00:53:33,049 --> 00:53:29,759

a lot of other areas as well in fact one

1128

00:53:36,079 --> 00:53:33,059

of our associates Corrales is working on

1129

00:53:38,599 --> 00:53:36,089

updating some of his research findings

1130

00:53:42,640 --> 00:53:38,609

and we should have a book out in a month

1131

00:53:45,650 --> 00:53:42,650

or so called alien blood lust have you

1132

00:53:47,390 --> 00:53:45,660

investigated or read up on the

1133

00:53:50,749 --> 00:53:47,400

chupacabra and do you think that there

1134

00:53:54,199 --> 00:53:50,759

really are critters out there that maybe

1135

00:53:58,640 --> 00:53:54,209

may be more supernatural or alien than

1136

00:54:03,410 --> 00:53:58,650

earthbound so um yes I have heard about

1137

00:54:07,249 --> 00:54:03,420

the chupacabra I've read Krauss's book

1138

00:54:08,870 --> 00:54:07,259

on it from the 90s I've read several

1139

00:54:12,469 --> 00:54:08,880

others Brad stager had a book about

1140

00:54:15,319 --> 00:54:12,479

vampires populated extensively and I've

1141

00:54:21,910 --> 00:54:15,329

also read Ben Radford's book tracking

1142

00:54:24,589 --> 00:54:21,920

the chupacabra and the thing is with a

1143

00:54:29,029 --> 00:54:24,599

lot of the research concerning the

1144

00:54:32,150 --> 00:54:29,039

chupacabra lividity and normal predation

1145

00:54:36,199 --> 00:54:32,160

methods of known animals has been almost

1146

00:54:39,979 --> 00:54:36,209

entirely ignored a lot of it especially

1147

00:54:47,870 --> 00:54:39,989

in carouses original book from I think

1148

00:54:51,890 --> 00:54:47,880

in 97 he said that it was an impossible

1149

00:54:54,589 --> 00:54:51,900

to have been a dog that killed the

1150

00:54:57,189 --> 00:54:54,599

chickens and the goats that as it was

1151
00:54:59,930 --> 00:54:57,199
claimed by the skeptics at the time

1152
00:55:00,859 --> 00:54:59,940
because dogs don't attack what they

1153
00:55:02,900 --> 00:55:00,869
don't eat

1154
00:55:05,390 --> 00:55:02,910
and because the animals appeared to be

1155
00:55:08,150 --> 00:55:05,400
they he said they were drained of blood

1156
00:55:10,549 --> 00:55:08,160
but you can't tell if they were drained

1157
00:55:12,710 --> 00:55:10,559
of blood unless you do an autopsy and

1158
00:55:18,349 --> 00:55:12,720
you're a professional and at the same

1159
00:55:21,529 --> 00:55:18,359
time um dogs can dogs do it's a well

1160
00:55:25,599 --> 00:55:21,539
studied process there are dozens of

1161
00:55:30,670 --> 00:55:25,609
scientific studies on it I've talked to

1162
00:55:37,130 --> 00:55:30,680
zoologist I've talked to um there's um

1163
00:55:39,079 --> 00:55:37,140

this wonderful researcher who focuses on

1164

00:55:41,769 --> 00:55:39,089

animal predation by the name of Janet

1165

00:55:45,349 --> 00:55:41,779

four-walled daughter she does a lot with

1166

00:55:49,670 --> 00:55:45,359

looking into like animal predation and

1167

00:55:54,950 --> 00:55:49,680

how Guardian dogs like the sheepdogs

1168

00:55:57,799 --> 00:55:54,960

um prevent that and the effects of a non

1169

00:56:00,950 --> 00:55:57,809

trained domestic dog on livestock and

1170

00:56:02,630 --> 00:56:00,960

they can decimate um several hundred

1171

00:56:06,229 --> 00:56:02,640

chickens in the night can be killed by a

1172

00:56:09,140 --> 00:56:06,239

single domestic dog and the target is

1173

00:56:12,769 --> 00:56:09,150

generally the throat exactly where the

1174

00:56:16,789 --> 00:56:12,779

chupacabra is said to bite you know and

1175

00:56:18,440 --> 00:56:16,799

so I'm highly highly highly skeptical of

1176

00:56:20,809 --> 00:56:18,450

anything weird going on with the

1177

00:56:23,930 --> 00:56:20,819

chupacabra I think the whole thing's

1178

00:56:28,160 --> 00:56:23,940

kind of a bit of a mess and I think that

1179

00:56:30,470 --> 00:56:28,170

the best piece of research concerning is

1180

00:56:33,979 --> 00:56:30,480

definitely been Radford's book tracking

1181

00:56:38,720 --> 00:56:33,989

the chupacabra because he does consider

1182

00:56:42,559 --> 00:56:38,730

the scientific alternative the the other

1183

00:56:44,809 --> 00:56:42,569

sides of the story concerning predation

1184

00:56:47,859 --> 00:56:44,819

and now I also would like to say the

1185

00:56:50,089 --> 00:56:47,869

only book that I've read of paralysis

1186

00:56:53,569 --> 00:56:50,099

concerning the chupacabra only work of

1187

00:56:56,599 --> 00:56:53,579

paralysis that I've read is his 97 book

1188

00:56:59,569 --> 00:56:56,609

so if he's updated his research I'm not

1189

00:57:02,390 --> 00:56:59,579

familiar with that no you know there are

1190

00:57:07,460 --> 00:57:02,400

there are veterinarians and all who have

1191

00:57:10,059 --> 00:57:07,470

made on the spot investigation and you

1192

00:57:12,829 --> 00:57:10,069

know done the tests and oil on this and

1193

00:57:14,690 --> 00:57:12,839

determined that it wasn't the Predators

1194

00:57:16,490 --> 00:57:14,700

that there cause the

1195

00:57:20,569 --> 00:57:16,500

either the loss of blood or the removal

1196

00:57:22,609 --> 00:57:20,579

of the sexual organs and and so forth I

1197

00:57:25,130 --> 00:57:22,619

mean obviously especially with the

1198

00:57:27,380 --> 00:57:25,140

chupacabra you've got a lot of different

1199

00:57:29,569 --> 00:57:27,390

things that are mixed in together and it

1200

00:57:33,019 --> 00:57:29,579

makes the subject somewhat confusing I

1201
00:57:34,849 --> 00:57:33,029
mean we we have the reports from mainly

1202
00:57:37,490 --> 00:57:34,859
Puerto Rico of this thing that has like

1203
00:57:41,539 --> 00:57:37,500
a spot you know porcupine like guess

1204
00:57:44,059 --> 00:57:41,549
fine and then we have here in Texas and

1205
00:57:47,690 --> 00:57:44,069
maybe other states as well something

1206
00:57:51,370 --> 00:57:47,700
that looks more like a canine that maybe

1207
00:57:54,680 --> 00:57:51,380
you know disease or have some other

1208
00:57:58,759 --> 00:57:54,690
mutation about it and they all seem to

1209
00:58:00,950 --> 00:57:58,769
be get the seem to be lumped together so

1210
00:58:04,130 --> 00:58:00,960
the Texas blue dogs which is what the

1211
00:58:05,720 --> 00:58:04,140
CSE calls them um yes every single one

1212
00:58:07,700 --> 00:58:05,730
that's been caught every single one

1213
00:58:11,059 --> 00:58:07,710

that's been killed um has been

1214

00:58:12,740 --> 00:58:11,069

identified as one of four things a

1215

00:58:15,829 --> 00:58:12,750

coyote with mange

1216

00:58:19,609 --> 00:58:15,839

a domestic dog with mange a coyote dog

1217

00:58:21,499 --> 00:58:19,619

hybrid with mange or a raccoon with

1218

00:58:25,309 --> 00:58:21,509

mange actually well there was one that

1219

00:58:28,579 --> 00:58:25,319

was a bear with mange as well um every

1220

00:58:31,670 --> 00:58:28,589

single one and actually several of the

1221

00:58:34,279 --> 00:58:31,680

raccoon ones had videos of them not

1222

00:58:36,980 --> 00:58:34,289

attacking animals but eating berries and

1223

00:58:39,200 --> 00:58:36,990

rooting around for scraps like raccoon

1224

00:58:42,049 --> 00:58:39,210

oh boy oh boy I would think it would be

1225

00:58:46,609 --> 00:58:42,059

kind of hard to mistake a UH a raccoon

1226
00:58:48,410 --> 00:58:46,619
for a good chupacabra well that comes

1227
00:58:51,950 --> 00:58:48,420
without their hair they look very much

1228
00:58:54,349 --> 00:58:51,960
doglike and another thing is the

1229
00:58:57,589 --> 00:58:54,359
chupacabra is a great name for some -

1230
00:58:58,640 --> 00:58:57,599
weird so if it's weird-looking and it

1231
00:59:00,380 --> 00:58:58,650
was killed on a farm

1232
00:59:04,460 --> 00:59:00,390
it gets lumped in with the chupacabra

1233
00:59:09,230 --> 00:59:04,470
because of course it does um and it's a

1234
00:59:11,599 --> 00:59:09,240
huge mess and again Ben Radford has done

1235
00:59:13,910 --> 00:59:11,609
excellent excellent research Kearney

1236
00:59:17,779 --> 00:59:13,920
concerning the the Texas blue dogs and

1237
00:59:19,700 --> 00:59:17,789
the hairless canines and does a much

1238
00:59:22,789 --> 00:59:19,710

better job of explaining at all than I

1239

00:59:25,819 --> 00:59:22,799

to it so I highly recommend anyone

1240

00:59:27,589 --> 00:59:25,829

interested read his book talk to him he

1241

00:59:28,339 --> 00:59:27,599

said fantastic cryptids who although

1242

00:59:30,319 --> 00:59:28,349

well have

1243

00:59:33,400 --> 00:59:30,329

to have him on I will have him on as a

1244

00:59:36,950 --> 00:59:33,410

guest sometime okay well outside of

1245

00:59:39,769 --> 00:59:36,960

Bigfoot would you give a great deal of

1246

00:59:42,410 --> 00:59:39,779

credence to are there any other crypto

1247

00:59:46,279 --> 00:59:42,420

type creatures that you think might

1248

00:59:48,729 --> 00:59:46,289

exist that are and not do you know

1249

00:59:53,359 --> 00:59:48,739

regular animals that we may know about

1250

00:59:55,640 --> 00:59:53,369

so I think um with cryptozoology every

1251

00:59:58,400 --> 00:59:55,650

bit of it's a possibility but the way I

1252

00:59:59,839 --> 00:59:58,410

approach it is not I think these things

1253

01:00:01,489 --> 00:59:59,849

are flesh-and-blood animals I want to

1254

01:00:05,559 --> 01:00:01,499

prove it that's not how I approach

1255

01:00:08,390 --> 01:00:05,569

things how I approach things is um these

1256

01:00:10,339 --> 01:00:08,400

stories this missus that has been built

1257

01:00:12,259 --> 01:00:10,349

around say Bigfoot Bigfoot's an

1258

01:00:15,799 --> 01:00:12,269

excellent example it's not a creature

1259

01:00:19,630 --> 01:00:15,809

anymore it's a mythology it is folklore

1260

01:00:22,249 --> 01:00:19,640

that we are watching developed arm in

1261

01:00:25,249 --> 01:00:22,259

the the fascinating thing to me is

1262

01:00:29,989 --> 01:00:25,259

trying to figure out what caused that um

1263

01:00:31,390 --> 01:00:29,999

and that's really kind of what I Ivan

1264

01:00:34,969 --> 01:00:31,400

Sanderson and bernard heuvelmans

1265

01:00:37,370 --> 01:00:34,979

intended cryptozoology to be when they

1266

01:00:41,469 --> 01:00:37,380

were kind of putting down the groundwork

1267

01:00:44,599 --> 01:00:41,479

for it not what it has become which is

1268

01:00:46,579 --> 01:00:44,609

people believing that something exists

1269

01:00:49,759 --> 01:00:46,589

so they are going out to prove it it's

1270

01:00:54,079 --> 01:00:49,769

an investigation into what the origins

1271

01:00:56,719 --> 01:00:54,089

of this folkloric creature is with the

1272

01:01:01,249 --> 01:00:56,729

hopes that it is a new species of animal

1273

01:01:05,209 --> 01:01:01,259

um I think a lot of it's unlikely to be

1274

01:01:06,890 --> 01:01:05,219

what we think it is but I'm not

1275

01:01:13,700 --> 01:01:06,900

discounting the possibility you know

1276

01:01:16,219 --> 01:01:13,710

most certainly um when it comes to what

1277

01:01:18,170 --> 01:01:16,229

I think is most likely concerning

1278

01:01:19,940 --> 01:01:18,180

exactly what we think it is I think that

1279

01:01:24,680 --> 01:01:19,950

the thylacine has a very good chance of

1280

01:01:27,680 --> 01:01:24,690

still existing um but I think that's

1281

01:01:32,660 --> 01:01:27,690

partially just my personal attachment to

1282

01:01:36,349 --> 01:01:32,670

the idea and a lot of hope rather than

1283

01:01:39,109 --> 01:01:36,359

evidence and research on my part for

1284

01:01:42,109 --> 01:01:39,119

those listeners that are unaware the

1285

01:01:46,930 --> 01:01:42,119

thylacine was a marsupial that

1286

01:01:50,829 --> 01:01:46,940

was killed off in the 30s it was armed

1287

01:01:53,779 --> 01:01:50,839

it looked a lot like a small dog with a

1288

01:01:55,910 --> 01:01:53,789

stripe stripes on its back it's also

1289

01:01:58,910 --> 01:01:55,920

known as a Tasmanian tiger or Tasmanian

1290

01:02:01,609 --> 01:01:58,920

wolf and they were really really neat

1291

01:02:04,519 --> 01:02:01,619

animals and there's a lot of support for

1292

01:02:08,269 --> 01:02:04,529

the possibility of their survival the

1293

01:02:09,890 --> 01:02:08,279

CSV has been sending lots of expeditions

1294

01:02:12,589 --> 01:02:09,900

out there has been working with

1295

01:02:16,190 --> 01:02:12,599

researchers on-site who live in

1296

01:02:20,989 --> 01:02:16,200

Australia and Tasmania in hopes to find

1297

01:02:24,680 --> 01:02:20,999

the animal still surviving I think

1298

01:02:27,829 --> 01:02:24,690

there's a good chance partially because

1299

01:02:35,620 --> 01:02:27,839

you know we do know that they did exist

1300

01:02:39,319 --> 01:02:35,630

at one time and a lot of the things

1301

01:02:41,120 --> 01:02:39,329

concerning its extinction has been yeah

1302

01:02:44,150 --> 01:02:41,130

I think it was a little premature to

1303

01:02:48,259 --> 01:02:44,160

declared extinct well now how about some

1304

01:02:50,660 --> 01:02:48,269

of these reports of like Oh dinosaurs

1305

01:02:55,089 --> 01:02:50,670

are flying is creatures that have come

1306

01:02:59,359 --> 01:02:55,099

mainly from I think the the year Congo

1307

01:03:00,859 --> 01:02:59,369

are you talking about the kongamato well

1308

01:03:03,890 --> 01:03:00,869

I don't know the exact name but there's

1309

01:03:06,380 --> 01:03:03,900

some people like the terror hurt yeah

1310

01:03:09,859 --> 01:03:06,390

mm-hmm the pterosaur it's called the

1311

01:03:14,150 --> 01:03:09,869

kongamato if I remember correctly it

1312

01:03:16,039 --> 01:03:14,160

roughly means that which pits over boats

1313

01:03:21,640 --> 01:03:16,049

along the river or something like that

1314

01:03:26,859 --> 01:03:21,650

um yeah it's supposedly um this

1315

01:03:31,749 --> 01:03:26,869

essentially a surviving pterosaur I'm

1316

01:03:34,549 --> 01:03:31,759

skeptical of that there there's a lot of

1317

01:03:36,829 --> 01:03:34,559

evolutionary issues with the idea of the

1318

01:03:39,410 --> 01:03:36,839

dinosaurs and what characters weren't

1319

01:03:42,890 --> 01:03:39,420

dinosaurs but but um prehistoric

1320

01:03:47,299 --> 01:03:42,900

reptiles are still around um I think

1321

01:03:49,249 --> 01:03:47,309

that Ivan T Sanderson had a good idea

1322

01:03:52,460 --> 01:03:49,259

when he suggested that it might have

1323

01:03:55,849 --> 01:03:52,470

been a giant bat that we haven't found

1324

01:04:00,190 --> 01:03:55,859

yet there hasn't been really any solid

1325

01:04:03,970 --> 01:04:00,200

ports in a couple decades

1326

01:04:06,499 --> 01:04:03,980

well now I'm trying to think in name

1327

01:04:09,920 --> 01:04:06,509

makkal Roy Mackel was it

1328

01:04:12,349 --> 01:04:09,930

I had several exhibitions to the to that

1329

01:04:16,249 --> 01:04:12,359

area there I met him once remorse no

1330

01:04:18,229 --> 01:04:16,259

longer relation yeah in in the seventies

1331

01:04:20,450 --> 01:04:18,239

but since then there hasn't been

1332

01:04:23,690 --> 01:04:20,460

anything and we haven't gotten any good

1333

01:04:29,749 --> 01:04:23,700

reports no some no no funding who's

1334

01:04:32,779 --> 01:04:29,759

gonna pay our well there well I'm I'm

1335

01:04:35,329 --> 01:04:32,789

also wondering it's you know the

1336

01:04:39,140 --> 01:04:35,339

landscape of the area where it was

1337

01:04:42,049 --> 01:04:39,150

supposedly located has changed

1338

01:04:44,390 --> 01:04:42,059

dramatically so I'm wondering if there

1339

01:04:48,999 --> 01:04:44,400

if there was something there if it's

1340

01:04:52,069 --> 01:04:49,009

there anymore to be completely honest

1341

01:04:57,200 --> 01:04:52,079

just because the the encroachment of man

1342

01:04:59,720 --> 01:04:57,210

and the destruction of the jungle well

1343

01:05:02,989 --> 01:04:59,730

what what would you say would be the the

1344

01:05:05,720 --> 01:05:02,999

the best evidence that we have for the

1345

01:05:07,999 --> 01:05:05,730

existence of a Bigfoot we only have a

1346

01:05:10,970 --> 01:05:08,009

couple of minutes here to break time and

1347

01:05:14,450 --> 01:05:10,980

why haven't we gotten the one and and

1348

01:05:18,140 --> 01:05:14,460

bought it out and you know into the

1349

01:05:21,950 --> 01:05:18,150

public eye to examine it under some

1350

01:05:24,769 --> 01:05:21,960

conditions well I don't think we have

1351

01:05:26,569 --> 01:05:24,779

any good evidence to be completely

1352

01:05:28,910 --> 01:05:26,579

honest I know a lot of researchers will

1353

01:05:29,390 --> 01:05:28,920

or get on me for that but I don't think

1354

01:05:33,319 --> 01:05:29,400

so

1355

01:05:36,950 --> 01:05:33,329

everybody holds up as a best piece of

1356

01:05:38,900 --> 01:05:36,960

evidence is still disputed there are

1357

01:05:40,999 --> 01:05:38,910

scientists on both sides that argued

1358

01:05:43,249 --> 01:05:41,009

constantly I honestly think we should

1359

01:05:44,809 --> 01:05:43,259

just leave it alone the film is over 50

1360

01:05:49,579 --> 01:05:44,819

years old and we're still arguing about

1361

01:05:51,499 --> 01:05:49,589

it let's try to move on and solve this

1362

01:05:53,359 --> 01:05:51,509

mystery in a different way using

1363

01:05:55,400 --> 01:05:53,369

something else see if we can get

1364

01:05:58,299 --> 01:05:55,410

something new something better with the

1365

01:06:01,329 --> 01:05:58,309

new technology we have instead of

1366

01:06:04,130 --> 01:06:01,339

arguing over this piece of some wall

1367

01:06:07,740 --> 01:06:04,140

important to the history I don't think

1368

01:06:11,670 --> 01:06:07,750

is as important to the

1369

01:06:17,010 --> 01:06:11,680

to the whole field itself to proving

1370

01:06:19,650 --> 01:06:17,020

Bigfoot I'm I as I've worked in the

1371

01:06:21,810 --> 01:06:19,660

field of Christian theology as much as I

1372

01:06:24,930 --> 01:06:21,820

love it I become increasingly more

1373

01:06:26,610 --> 01:06:24,940

skeptical of a lot of this stuff and I

1374

01:06:30,920 --> 01:06:26,620

think a lot of it's because of poor

1375

01:06:36,570 --> 01:06:30,930

research on the part of a lot of people

1376

01:06:38,760 --> 01:06:36,580

the the thing is there's a lot that

1377

01:06:41,700 --> 01:06:38,770

people are that researchers are

1378

01:06:45,990 --> 01:06:41,710

constantly trying to hold up as big at

1379

01:06:49,410 --> 01:06:46,000

best piece do you know the the crippled

1380

01:06:53,910 --> 01:06:49,420

foot tracks with the the deformed foot

1381

01:06:58,530 --> 01:06:53,920

or or the arm the Skookum cast which is

1382

01:07:01,260 --> 01:06:58,540

the the partial body cast of a track of

1383

01:07:05,280 --> 01:07:01,270

Bigfoot that was taken by Meldrum and

1384

01:07:06,780 --> 01:07:05,290

BFRO they they they're still being

1385

01:07:08,910 --> 01:07:06,790

debated they're still being discussed

1386

01:07:11,220 --> 01:07:08,920

they're not going to prove anything I

1387

01:07:13,560 --> 01:07:11,230

think if people really believe that

1388

01:07:17,760 --> 01:07:13,570

Bigfoot exists we need to change our

1389

01:07:21,300 --> 01:07:17,770

methods of research I hear our Bigfoot

1390

01:07:32,790 --> 01:07:21,310

Tim that's right we have our break we'd

1391

01:07:39,520 --> 01:07:36,940

now back to exploring the bazaars with

1392

01:07:42,820 --> 01:07:39,530

two of the most electrifying researchers

1393

01:07:49,150 --> 01:07:42,830

in the Paranoid your hosts Timothy Becca

1394

01:07:52,210 --> 01:07:49,160

Lee and tinsmiths alright welcome back

1395

01:07:56,560 --> 01:07:52,220

yes Colin Schneider and Katie Elizabeth

1396

01:07:59,680 --> 01:07:56,570

and we've got some questions from our

1397

01:08:02,580 --> 01:07:59,690

listeners so we'll start with Colin

1398

01:08:05,170 --> 01:08:02,590

first this is from Jerry and chat and

1399

01:08:08,070 --> 01:08:05,180

Jerry wants to know does Colin have

1400

01:08:10,900 --> 01:08:08,080

issues in the field because of his age

1401
01:08:15,970 --> 01:08:10,910
having people taking him seriously with

1402
01:08:19,710 --> 01:08:15,980
his research and investigations the

1403
01:08:23,950 --> 01:08:19,720
short answer is yes the longer answer is

1404
01:08:28,810 --> 01:08:23,960
it was a very long uphill battle to get

1405
01:08:31,390 --> 01:08:28,820
where I am today and the only reason I

1406
01:08:34,329 --> 01:08:31,400
am able to do a lot of the things I do

1407
01:08:37,900 --> 01:08:34,339
is through the help of Stan Gordon who

1408
01:08:40,690 --> 01:08:37,910
has acted really as a mentor he taught

1409
01:08:43,360 --> 01:08:40,700
me how to do research right he taught me

1410
01:08:48,490 --> 01:08:43,370
how to talk to witnesses in the right

1411
01:08:51,849 --> 01:08:48,500
way and he has kind of helped me along

1412
01:08:54,130 --> 01:08:51,859
the way I remember like the fourth or

1413
01:08:57,310 --> 01:08:54,140

fifth conference I went to as a MUFON

1414

01:09:00,520 --> 01:08:57,320

event and he called me over grabbed me

1415

01:09:02,170 --> 01:09:00,530

and brought me over to all of the

1416

01:09:05,349 --> 01:09:02,180

vendors all the researchers and there

1417

01:09:08,770 --> 01:09:05,359

were some big names there Nick Pope Nick

1418

01:09:11,050 --> 01:09:08,780

Redfern some really big guys and he

1419

01:09:14,490 --> 01:09:11,060

introduced me to them and said this is

1420

01:09:17,710 --> 01:09:14,500

the next generation of UFOs

1421

01:09:20,740 --> 01:09:17,720

cryptozoology and for Dianna talked to

1422

01:09:22,060 --> 01:09:20,750

him for a minute and he's helped me get

1423

01:09:25,410 --> 01:09:22,070

a lot of the connections that I have

1424

01:09:30,599 --> 01:09:25,420

today and also working with John Downs

1425

01:09:33,579 --> 01:09:30,609

has been more or less than Dodson he

1426

01:09:37,479 --> 01:09:33,589

essentially right off the bat pushed me

1427

01:09:42,549 --> 01:09:37,489

to start writing and be able to if

1428

01:09:44,680 --> 01:09:42,559

anybody doubted my credibility be able

1429

01:09:47,069 --> 01:09:44,690

to say essentially well I've been

1430

01:09:49,479 --> 01:09:47,079

published so until Times in

1431

01:09:54,160 --> 01:09:49,489

such-and-such magazine it's not to brag

1432

01:09:55,989 --> 01:09:54,170

but to kind of prove that yes I am young

1433

01:09:59,020 --> 01:09:55,999

but I have done my research

1434

01:10:01,419 --> 01:09:59,030

I am a capable researcher I am somebody

1435

01:10:04,779 --> 01:10:01,429

that is able to be taken seriously

1436

01:10:07,319 --> 01:10:04,789

because I have this stuff but I can

1437

01:10:10,299 --> 01:10:07,329

point to hey I've got a hump that is

1438

01:10:15,060 --> 01:10:10,309

what what what do your parents think of

1439

01:10:19,899 --> 01:10:15,070

your investigative work here well my dad

1440

01:10:21,759 --> 01:10:19,909

is more or less heavy support of it he

1441

01:10:25,509 --> 01:10:21,769

gets tired of you know driving me around

1442

01:10:27,879 --> 01:10:25,519

places and sitting at conferences for

1443

01:10:31,020 --> 01:10:27,889

you know ten hours a day every couple

1444

01:10:33,160 --> 01:10:31,030

weekends but I don't mind my

1445

01:10:36,310 --> 01:10:33,170

brother-in-law used to take me around to

1446

01:10:38,500 --> 01:10:36,320

all the meetings when I lived in New

1447

01:10:41,620 --> 01:10:38,510

Jersey and I was like 14 or 15 years old

1448

01:10:43,959 --> 01:10:41,630

he would come into Manhattan with me and

1449

01:10:46,209 --> 01:10:43,969

we would go to the meetings that Jim

1450

01:10:49,870 --> 01:10:46,219

Mosley had and then like three years

1451

01:10:52,779 --> 01:10:49,880

later I was Jim Mosley's assistant and

1452

01:10:55,779 --> 01:10:52,789

later became managing editor a sorcerer

1453

01:10:59,669 --> 01:10:55,789

news that he was putting out so yeah you

1454

01:11:06,700 --> 01:11:04,390

yeah and you know my stepmom is ha ha

1455

01:11:10,629 --> 01:11:06,710

she's interested in this type of stuff

1456

01:11:12,549 --> 01:11:10,639

too so when she kind of came around I

1457

01:11:17,410 --> 01:11:12,559

got a lot easier to convince my dad to

1458

01:11:21,700 --> 01:11:17,420

take me to Congress and stuff so I'm

1459

01:11:25,629 --> 01:11:21,710

pretty lucky there other new peers how

1460

01:11:27,850 --> 01:11:25,639

about your peers my so I attend a stem

1461

01:11:33,779 --> 01:11:27,860

school science technology engineering

1462

01:11:36,339 --> 01:11:33,789

math about you pretty it's pretty

1463

01:11:40,629 --> 01:11:36,349

highbrow I don't mean to brag but it is

1464

01:11:43,359 --> 01:11:40,639

um with a lot of a lot of work a lot of

1465

01:11:45,310 --> 01:11:43,369

crazy stuff so when I first started

1466

01:11:47,020 --> 01:11:45,320

talking about well I'm interested in

1467

01:11:48,969 --> 01:11:47,030

such-and-such and I came to school with

1468

01:11:50,950 --> 01:11:48,979

my computer having you know Bigfoot on

1469

01:11:54,520 --> 01:11:50,960

it and a rugaru sticker

1470

01:11:57,370 --> 01:11:54,530

all kinds of stuff people were hesitant

1471

01:11:59,530 --> 01:11:57,380

at first and then you know we talked and

1472

01:12:02,920 --> 01:11:59,540

you know I take a very scientific or

1473

01:12:07,450 --> 01:12:02,930

historical flash yeah everything yes you

1474

01:12:09,370 --> 01:12:07,460

do very very academic so it's a lot

1475

01:12:11,350 --> 01:12:09,380

easier for them to they don't

1476

01:12:13,810 --> 01:12:11,360

necessarily agree with me but they they

1477

01:12:19,500 --> 01:12:13,820

don't make fun of me at least most of

1478

01:12:22,270 --> 01:12:19,510

that well yeah the other the other ones

1479

01:12:25,600 --> 01:12:22,280

forget about it you'll be doing this for

1480

01:12:28,450 --> 01:12:25,610

40 years now and they'll well who knows

1481

01:12:31,900 --> 01:12:28,460

what they'll be doing so hopefully

1482

01:12:34,959 --> 01:12:31,910

you'll still be doing this 40 years from

1483

01:12:38,440 --> 01:12:34,969

now or maybe or maybe if you find

1484

01:12:41,950 --> 01:12:38,450

Bigfoot you won't be doing this 40 years

1485

01:12:44,130 --> 01:12:41,960

from now Tim he was saying well no no I

1486

01:12:49,180 --> 01:12:44,140

was the same 40 years and more hopefully

1487

01:12:55,090 --> 01:12:49,190

yeah all right okay now we'll show you

1488

01:12:58,780 --> 01:12:55,100

the rights to this show take it over

1489

01:12:59,260 --> 01:12:58,790

eventually I yeah all right we have a

1490

01:13:01,270 --> 01:12:59,270

yeah

1491

01:13:04,300 --> 01:13:01,280

we have a question for Katie and this is

1492

01:13:08,830 --> 01:13:04,310

from today on skype and Tony wants to

1493

01:13:11,229 --> 01:13:08,840

know you talked about the sounds and

1494

01:13:13,479 --> 01:13:11,239

sightings that have come at night and

1495

01:13:16,150 --> 01:13:13,489

Tony is wanting to know if you've done

1496

01:13:18,790 --> 01:13:16,160

any investigations with that generation

1497

01:13:20,470 --> 01:13:18,800

three or four night-vision goggles I am

1498

01:13:23,740 --> 01:13:20,480

not particularly used those type of

1499

01:13:27,510 --> 01:13:23,750

goggles but that is on my wish list but

1500

01:13:30,790 --> 01:13:27,520

I do use a night vision monocular

1501

01:13:32,979 --> 01:13:30,800

basically military use and monoculars

1502

01:13:34,810 --> 01:13:32,989

are to brighten up everything I do have

1503

01:13:35,860 --> 01:13:34,820

a night vision not the way that I use

1504

01:13:38,200 --> 01:13:35,870

out in Marsh

1505

01:13:41,229 --> 01:13:38,210

particularly at night out on the water

1506

01:13:43,750 --> 01:13:41,239

on the lake at night I also have a very

1507

01:13:46,390 --> 01:13:43,760

high-powered spotlight that I use as

1508

01:13:50,410 --> 01:13:46,400

well in the marsh which going out at

1509

01:13:52,750 --> 01:13:50,420

night it's kind of scary and I'm like

1510

01:13:54,430 --> 01:13:52,760

you know so excited to do it but once I

1511

01:13:56,260 --> 01:13:54,440

get out I'm like oh God could you hear

1512

01:13:58,150 --> 01:13:56,270

all these sounds all these frogs

1513

01:14:00,729 --> 01:13:58,160

croaking I mean some of these frogs are

1514

01:14:01,660 --> 01:14:00,739

like he's bullfrogs and they sound like

1515

01:14:04,419 --> 01:14:01,670

beside the champ

1516

01:14:08,410 --> 01:14:06,520

and it is just really scary out there at

1517

01:14:11,919 --> 01:14:08,420

night but I have used a night vision

1518

01:14:14,200 --> 01:14:11,929

monocular also use a high-powered light

1519

01:14:16,000 --> 01:14:14,210

and also I have a thermal imaging camera

1520

01:14:18,430 --> 01:14:16,010

it's not a FLIR it's called a Sikh

1521

01:14:20,169 --> 01:14:18,440

thermal much cheaper version than the

1522

01:14:22,360 --> 01:14:20,179

FLIR because unfortunately I can't

1523

01:14:25,149 --> 01:14:22,370

afford the FLIR spend so much money out

1524

01:14:28,810 --> 01:14:25,159

of pocket money buying all my equipment

1525

01:14:30,850 --> 01:14:28,820

I have a few supporter that now and then

1526

01:14:35,169 --> 01:14:30,860

will send different funds to my GoFundMe

1527

01:14:37,810 --> 01:14:35,179

page I have up on on my basically on my

1528

01:14:40,149 --> 01:14:37,820

Facebook page for a champ search but

1529

01:14:42,459 --> 01:14:40,159

basically all of this stuff is just fun

1530

01:14:44,740 --> 01:14:42,469

self-funded from out of my own pocket

1531

01:14:47,950 --> 01:14:44,750

but when someone helps along the way

1532

01:14:49,959 --> 01:14:47,960

it's just a huge help this stuff is just

1533

01:14:51,550 --> 01:14:49,969

so expensive I have a drone which I

1534

01:14:53,800 --> 01:14:51,560

haven't got a chance to use lately

1535

01:14:57,100 --> 01:14:53,810

because unfortunately one of the motors

1536

01:14:59,530 --> 01:14:57,110

just crapped out on me so that needs to

1537

01:15:02,590 --> 01:14:59,540

be fixed and I basically have the drone

1538

01:15:05,320 --> 01:15:02,600

to go over these Mars systems to see if

1539

01:15:07,630 --> 01:15:05,330

you know we could capture some sort of

1540

01:15:09,250 --> 01:15:07,640

video of these animals in the marsh but

1541

01:15:11,979 --> 01:15:09,260

it will be really interesting is to get

1542

01:15:14,290 --> 01:15:11,989

a flyer on the drone at night and I

1543

01:15:17,189 --> 01:15:14,300

guarantee that I would see something but

1544

01:15:20,189 --> 01:15:17,199

that's very expensive thing to get so

1545

01:15:23,669 --> 01:15:20,199

big out there that wants to help me out

1546

01:15:25,870 --> 01:15:23,679

there might be how much we talking about

1547

01:15:28,689 --> 01:15:25,880

you know I'm not really quite sure I

1548

01:15:31,149 --> 01:15:28,699

looked online before I looked into it I

1549

01:15:32,950 --> 01:15:31,159

think he was like 6 to 10 grand it just

1550

01:15:36,850 --> 01:15:32,960

depends on what kind of stuff you want

1551

01:15:40,060 --> 01:15:36,860

on it so you know yeah too bad David

1552

01:15:43,090 --> 01:15:40,070

Rockefeller wasn't around because he was

1553

01:15:45,760 --> 01:15:43,100

for quite a number of years at the

1554

01:15:48,070 --> 01:15:45,770

sponsoring at Chris O'Brien but I

1555

01:15:52,030 --> 01:15:48,080

remember there yeah he would send him a

1556

01:15:55,300 --> 01:15:52,040

check every so often for \$10,000 but I

1557

01:15:56,530 --> 01:15:55,310

did well there might be a couple of

1558

01:15:58,990 --> 01:15:56,540

people out there with that kind of a

1559

01:16:01,950 --> 01:15:59,000

pocket cash I'm I'm a few hundred

1560

01:16:05,050 --> 01:16:01,960

dollars short but you know we'll keep it

1561

01:16:07,510 --> 01:16:05,060

that's right anyway wealthy benefactors

1562

01:16:10,840 --> 01:16:07,520

off there listening you know Katie

1563

01:16:14,560 --> 01:16:10,850

Elizabeth she's she's on a great track

1564

01:16:16,660 --> 01:16:14,570

here and I just imagine what great

1565

01:16:18,100 --> 01:16:16,670

things that she could discover if she

1566

01:16:21,220 --> 01:16:18,110

had a little

1567

01:16:23,500 --> 01:16:21,230

financial help well what do you what

1568

01:16:25,780 --> 01:16:23,510

would you say would bring Champa out I

1569

01:16:29,950 --> 01:16:25,790

mean is there anything you know if you

1570

01:16:31,840 --> 01:16:29,960

you know you dangle the huge the carrot

1571

01:16:35,260 --> 01:16:31,850

on the stick I mean I just use that as

1572

01:16:40,510 --> 01:16:35,270

an example what what would bring champ

1573

01:16:43,270 --> 01:16:40,520

out I mean to the surface there is many

1574

01:16:46,720 --> 01:16:43,280

different type of tactics that I'm

1575

01:16:49,629 --> 01:16:46,730

starting to use I really don't discuss

1576

01:16:51,879 --> 01:16:49,639

them just in case they work

1577

01:16:53,800 --> 01:16:51,889

we don't need 100 million people coming

1578

01:16:57,580 --> 01:16:53,810

out here and trying all these different

1579

01:16:59,560 --> 01:16:57,590

things that work so but one one of the

1580

01:17:03,520 --> 01:16:59,570

ideas that I had I can actually talk

1581

01:17:06,040 --> 01:17:03,530

about I guess is that these animals do

1582

01:17:08,620 --> 01:17:06,050

echolocate that's one of the sounds that

1583

01:17:11,169 --> 01:17:08,630

I have recorded they don't just hack a

1584

01:17:12,700 --> 01:17:11,179

locate that's the thing like I have

1585

01:17:15,250 --> 01:17:12,710

other sounds that are ultra low

1586

01:17:17,410 --> 01:17:15,260

frequency sounds comparative you know

1587

01:17:20,379 --> 01:17:17,420

comparing them to known biology in the

1588

01:17:22,689 --> 01:17:20,389

lake I study marine biology as well as

1589

01:17:25,300 --> 01:17:22,699

ichthyology which is the study of fish

1590

01:17:27,520 --> 01:17:25,310

and different fish sounds and things

1591

01:17:31,209 --> 01:17:27,530

like that to compare my recordings to

1592

01:17:34,300 --> 01:17:31,219

know and biology in the lake and with

1593

01:17:37,240 --> 01:17:34,310

that in particular using echolocation

1594

01:17:40,270 --> 01:17:37,250

these animals are putting out a beam of

1595

01:17:41,800 --> 01:17:40,280

sound and it basically like Braille for

1596

01:17:43,750 --> 01:17:41,810

a blind person you know they're putting

1597

01:17:45,939 --> 01:17:43,760

out this down and whenever it hits say a

1598

01:17:47,970 --> 01:17:45,949

school of fish or a rock or whatever it

1599

01:17:50,830 --> 01:17:47,980

bounces back and give them an internal

1600

01:17:54,459 --> 01:17:50,840

image in their brain of the surrounding

1601
01:17:56,169 --> 01:17:54,469
area in Lake Champlain visibility is not

1602
01:17:57,580 --> 01:17:56,179
that great and a lot of places and

1603
01:17:59,830 --> 01:17:57,590
unfortunately it seems to be getting

1604
01:18:02,530 --> 01:17:59,840
kind of worse in a lot of places because

1605
01:18:05,669 --> 01:18:02,540
of all of the sewage that is running

1606
01:18:08,410 --> 01:18:05,679
into the lane there's been a lot of it

1607
01:18:11,850 --> 01:18:08,420
I've been having clean I had a clean up

1608
01:18:14,320 --> 01:18:11,860
day a couple months ago to help with

1609
01:18:16,300 --> 01:18:14,330
basically the trash around the lake I

1610
01:18:18,160 --> 01:18:16,310
clean up constantly you should see the

1611
01:18:21,419 --> 01:18:18,170
garbage that I pick up it's Dana

1612
01:18:24,910 --> 01:18:21,429
to me it's very important to sustain

1613
01:18:26,800 --> 01:18:24,920

this lake I mean not just for chance and

1614

01:18:29,680 --> 01:18:26,810

and you know he's only an unknown animal

1615

01:18:31,480 --> 01:18:29,690

in the lake there that are rare but just

1616

01:18:33,220 --> 01:18:31,490

in general to you

1617

01:18:35,580 --> 01:18:33,230

for a few future generations to

1618

01:18:37,720 --> 01:18:35,590

appreciate the beauty of the lake and

1619

01:18:39,220 --> 01:18:37,730

there's just so many people that dump

1620

01:18:45,850 --> 01:18:39,230

their garbage and they just don't care

1621

01:18:48,910 --> 01:18:45,860

and I mean this is my hole or - it is it

1622

01:18:50,560 --> 01:18:48,920

really is them but I mean the sewage

1623

01:18:52,540 --> 01:18:50,570

that's getting Emily I mean millions of

1624

01:18:55,450 --> 01:18:52,550

gallons of sewage in there like Oh will

1625

01:18:57,250 --> 01:18:55,460

somebody the button got stuck at the

1626

01:18:59,740 --> 01:18:57,260

water treatment plate no no you know

1627

01:19:06,370 --> 01:18:59,750

what you should have people Manning that

1628

01:19:09,790 --> 01:19:06,380

24 hours a day I would guess today as

1629

01:19:14,230 --> 01:19:09,800

things go in Washington there are less

1630

01:19:20,110 --> 01:19:14,240

and less people were watching out for

1631

01:19:22,630 --> 01:19:20,120

things to that to that degree I would

1632

01:19:24,790 --> 01:19:22,640

guess well can you tell us what is it

1633

01:19:27,490 --> 01:19:24,800

okay we've got a lot of lake monsters

1634

01:19:29,500 --> 01:19:27,500

here and in North America I think I I

1635

01:19:30,940 --> 01:19:29,510

counted why one time did an order there

1636

01:19:32,710 --> 01:19:30,950

was actually a magazine called sea

1637

01:19:36,220 --> 01:19:32,720

monsters or sea serpents or something

1638

01:19:38,800 --> 01:19:36,230

which I was one of the editors and I

1639

01:19:44,830 --> 01:19:38,810

think we had about maybe 15 or 16

1640

01:19:47,620 --> 01:19:44,840

different lake monsters now but let's

1641

01:19:51,460 --> 01:19:47,630

take Loch Ness where I've also been and

1642

01:19:56,590 --> 01:19:51,470

compared to champ how do the two differ

1643

01:19:59,410 --> 01:19:56,600

or is there any similarity do you mean

1644

01:20:04,930 --> 01:19:59,420

between it be like say Loch Ness and

1645

01:20:07,510 --> 01:20:04,940

Lake Champlain or the animals Deluxe

1646

01:20:11,110 --> 01:20:07,520

pretty deep and pretty chilly and both

1647

01:20:15,490 --> 01:20:11,120

and deep in both regards but how about

1648

01:20:16,930 --> 01:20:15,500

the the creatures itself well what's

1649

01:20:19,570 --> 01:20:16,940

really interesting like I mentioned

1650

01:20:23,620 --> 01:20:19,580

earlier that there are on land reports

1651
01:20:25,600 --> 01:20:23,630
of Nessie and champ as well I I believe

1652
01:20:28,000 --> 01:20:25,610
I really think that these animals are

1653
01:20:31,150 --> 01:20:28,010
some if they're not the same species

1654
01:20:34,500 --> 01:20:31,160
that they are somehow related there's

1655
01:20:37,120 --> 01:20:34,510
just too many similarities of the report

1656
01:20:40,480 --> 01:20:37,130
some of the Nessie reports you know 35

1657
01:20:43,060 --> 01:20:40,490
40 feet long that's pretty large there

1658
01:20:44,950 --> 01:20:43,070
are few reports the only Champlain of

1659
01:20:48,370 --> 01:20:44,960
these animals giving

1660
01:20:50,229 --> 01:20:48,380
up to 30 35 feet but it's rare and was

1661
01:20:52,720 --> 01:20:50,239
to say I mean there could be more than

1662
01:20:55,150 --> 01:20:52,730
one one behind the other making it look

1663
01:20:56,920 --> 01:20:55,160

much larger chewing and the thing that

1664

01:20:58,600 --> 01:20:56,930

that's really interesting too is that

1665

01:21:01,300 --> 01:20:58,610

there's you know they're septics out

1666

01:21:03,700 --> 01:21:01,310

they aren't and to me it's okay it's

1667

01:21:05,920 --> 01:21:03,710

healthy to be accepted but you know a

1668

01:21:07,390 --> 01:21:05,930

lot of people knock people down oh they

1669

01:21:10,360 --> 01:21:07,400

didn't see that but you know what seems

1670

01:21:13,540 --> 01:21:10,370

believing so I mean as a person who has

1671

01:21:15,040 --> 01:21:13,550

had these experiences I I know that

1672

01:21:17,620 --> 01:21:15,050

they're there and I wouldn't spend so

1673

01:21:19,630 --> 01:21:17,630

much money and actually my whole life

1674

01:21:21,970 --> 01:21:19,640

here to Lake Champlain if I did not know

1675

01:21:24,340 --> 01:21:21,980

I'm a very logical person very

1676

01:21:27,790 --> 01:21:24,350

scientific minded and I do like I said I

1677

01:21:31,720 --> 01:21:27,800

study so much biology on the lake and

1678

01:21:34,209 --> 01:21:31,730

things like that so the thing is this

1679

01:21:36,640 --> 01:21:34,219

hundred foot long monster of sorts that

1680

01:21:37,990 --> 01:21:36,650

is going you know going back in time

1681

01:21:41,410 --> 01:21:38,000

looking at all the stories and reports

1682

01:21:44,860 --> 01:21:41,420

from the 1800s and all these crazy

1683

01:21:46,900 --> 01:21:44,870

things like almost capsizing a boat and

1684

01:21:51,280 --> 01:21:46,910

all these crazy story that's what makes

1685

01:21:53,500 --> 01:21:51,290

the lake monster idea sounds stupid to a

1686

01:21:56,110 --> 01:21:53,510

lot of people because they're looking

1687

01:21:58,270 --> 01:21:56,120

for this giant whale of swords Moby Dick

1688

01:22:00,670 --> 01:21:58,280

out on the lake you know it's it's

1689

01:22:02,650 --> 01:22:00,680

absurd and you know these animals in

1690

01:22:05,320 --> 01:22:02,660

general around 15 to 20 feet in length

1691

01:22:07,510 --> 01:22:05,330

which is not small but compared to a

1692

01:22:10,450 --> 01:22:07,520

whale I mean I was out North Atlantic

1693

01:22:13,120 --> 01:22:10,460

doing cetacean research listening with

1694

01:22:16,900 --> 01:22:13,130

my hydrophone and and doing bioacoustics

1695

01:22:20,200 --> 01:22:16,910

I remember this huge finback whale yeah

1696

01:22:23,380 --> 01:22:20,210

I think came up and I almost died of it

1697

01:22:26,020 --> 01:22:23,390

what the heck I mean it was just amazing

1698

01:22:28,330 --> 01:22:26,030

how massive this animal was myself Wow

1699

01:22:32,350 --> 01:22:28,340

make samples like a chump I mean it's

1700

01:22:35,620 --> 01:22:32,360

just no comparison so I mean but using

1701

01:22:38,770 --> 01:22:35,630

that for an example I mean the stories

1702

01:22:41,260 --> 01:22:38,780

have been blown out of proportion it's a

1703

01:22:43,440 --> 01:22:41,270

monster it's a serpent and you know I

1704

01:22:45,490 --> 01:22:43,450

just actually wrote this new law

1705

01:22:47,560 --> 01:22:45,500

protecting champ which actually got

1706

01:22:52,060 --> 01:22:47,570

passed which I'm really proud to say and

1707

01:22:53,970 --> 01:22:52,070

we're really about it do tell us I went

1708

01:22:57,040 --> 01:22:53,980

over to Port Harry New York which is

1709

01:22:58,839 --> 01:22:57,050

called the home of champ you bastard you

1710

01:23:01,569 --> 01:22:58,849

haven't even maybe there was a lot

1711

01:23:04,509 --> 01:23:01,579

champ sightings in that area is it the

1712

01:23:05,979 --> 01:23:04,519

town that has a little billboard in all

1713

01:23:09,189 --> 01:23:05,989

with the names of witnesses and things

1714

01:23:10,869 --> 01:23:09,199

on it yes yes that's it yeah there's big

1715

01:23:13,149 --> 01:23:10,879

champ sign when you drive into Port

1716

01:23:15,129 --> 01:23:13,159

Henry and I like there other side where

1717

01:23:17,049 --> 01:23:15,139

it says welcome to Port Henry home a

1718

01:23:18,399 --> 01:23:17,059

champ and there's like this perfect

1719

01:23:19,409 --> 01:23:18,409

champ on the side it's kind of

1720

01:23:22,629 --> 01:23:19,419

cool-looking

1721

01:23:24,879 --> 01:23:22,639

but anyways one of these towns in the

1722

01:23:27,279 --> 01:23:24,889

Train and when the Train opens the door

1723

01:23:29,770 --> 01:23:27,289

you see the little you know wooden

1724

01:23:35,459 --> 01:23:29,780

monster there on the lawn of something

1725

01:23:38,859 --> 01:23:35,469

really yeah I don't know it could be Oh

1726

01:23:41,169 --> 01:23:38,869

was it no was it a wooden one that was

1727

01:23:44,379 --> 01:23:41,179

like green with like a root off yes red

1728

01:23:47,020 --> 01:23:44,389

no yeah yes oh that was actually funny

1729

01:23:48,339 --> 01:23:47,030

because um that's their mascot champ

1730

01:23:52,449 --> 01:23:48,349

which is not what it's like but it's

1731

01:23:55,449 --> 01:23:52,459

cute anyway you've got the little pointy

1732

01:23:58,209 --> 01:23:55,459

nose with just funny tech and actually

1733

01:24:00,040 --> 01:23:58,219

the guy who who made that wooden champ I

1734

01:24:02,020 --> 01:24:00,050

think he sent past waving with Earl

1735

01:24:04,419 --> 01:24:02,030

Sprague and he actually had had a champ

1736

01:24:06,520 --> 01:24:04,429

sighting back in like the late 50s so I

1737

01:24:08,589 --> 01:24:06,530

know I'm familiar with that with that

1738

01:24:13,239 --> 01:24:08,599

champ and they actually is that in the

1739

01:24:15,369 --> 01:24:13,249

parade every year so so any I'm sorry I

1740

01:24:21,129 --> 01:24:15,379

didn't mean to rep you tell us about the

1741

01:24:23,469 --> 01:24:21,139

Lord well it was a it was a snowy snowy

1742

01:24:25,989 --> 01:24:23,479

day and we had terrible snowstorm here

1743

01:24:28,119 --> 01:24:25,999

on the Vermont side as well and ran this

1744

01:24:30,509 --> 01:24:28,129

storm and starting to approach I'm like

1745

01:24:33,099 --> 01:24:30,519

oh I have a meeting with actually

1746

01:24:35,319 --> 01:24:33,109

contacted the town superfly supervisor

1747

01:24:37,689 --> 01:24:35,329

over important Henry names Tom skies the

1748

01:24:39,489 --> 01:24:37,699

father so I thought well this guy is

1749

01:24:42,099 --> 01:24:39,499

gonna think I'm a crackpot and I'm crazy

1750

01:24:44,049 --> 01:24:42,109

and everything else and I had just

1751

01:24:44,859 --> 01:24:44,059

thought of this idea because back in

1752

01:24:46,810 --> 01:24:44,869

1980

1753

01:24:49,629 --> 01:24:46,820

there was a law passed to protect chance

1754

01:24:52,299 --> 01:24:49,639

at Port Henry which was actually brought

1755

01:24:55,439 --> 01:24:52,309

forward by Joseph's our zimsky who was a

1756

01:25:00,909 --> 01:24:55,449

champ researcher back in the 70s and 80s

1757

01:25:03,669 --> 01:25:00,919

so basically this law stated protection

1758

01:25:05,409 --> 01:25:03,679

of the Lake Champlain sea serpent

1759

01:25:08,679 --> 01:25:05,419

referring to one animal

1760

01:25:11,560 --> 01:25:08,689

sea monster with another line it just

1761

01:25:12,759 --> 01:25:11,570

sounded it just didn't sound logical it

1762

01:25:15,040 --> 01:25:12,769

really didn't

1763

01:25:16,870 --> 01:25:15,050

and but it was passed and because it was

1764

01:25:18,640 --> 01:25:16,880

just so many sightings over important

1765

01:25:20,500 --> 01:25:18,650

Henry that a lot of the people that were

1766

01:25:23,589 --> 01:25:20,510

on the board actually seemed champ

1767

01:25:26,319 --> 01:25:23,599

himself so that's how that was passed so

1768

01:25:29,560 --> 01:25:26,329

I said well you know this law actually

1769

01:25:31,989 --> 01:25:29,570

has dissolved because Port Henry is now

1770

01:25:34,060 --> 01:25:31,999

a hamlet of the town of Moriah so

1771

01:25:35,739 --> 01:25:34,070

basically the water was no longer as of

1772

01:25:37,239 --> 01:25:35,749

this year so I said well we need to

1773

01:25:40,089 --> 01:25:37,249

change that so I went over there and

1774

01:25:42,310 --> 01:25:40,099

like I said it was snowing out and I get

1775

01:25:45,549 --> 01:25:42,320

over to the town offices and I sit down

1776

01:25:47,410 --> 01:25:45,559

with what Tom Stassi father I told him

1777

01:25:49,330 --> 01:25:47,420

my concerns and showed him some of my

1778

01:25:51,669 --> 01:25:49,340

videos and but I'm listening my

1779

01:25:53,770 --> 01:25:51,679

recording he's like holy I've seen you

1780

01:25:55,390 --> 01:25:53,780

on History Channel and Discovery Channel

1781

01:25:57,790 --> 01:25:55,400

you do really great work and he was just

1782

01:25:59,229 --> 01:25:57,800

so interested because he had seen

1783

01:26:00,970 --> 01:25:59,239

something strange when he was younger

1784

01:26:03,310 --> 01:26:00,980

and then he had uncle that had a chant

1785

01:26:05,620 --> 01:26:03,320

fighting as well so the town meeting

1786

01:26:07,600 --> 01:26:05,630

happened and this was two months later

1787

01:26:10,509 --> 01:26:07,610

they actually put it off once they had

1788

01:26:13,000 --> 01:26:10,519

other it expire in town so they had to

1789

01:26:15,790 --> 01:26:13,010

address really really important thing so

1790

01:26:18,549 --> 01:26:15,800

um he said well next month we'll we'll

1791

01:26:20,589 --> 01:26:18,559

see we can pass it for you okay well I

1792

01:26:22,569 --> 01:26:20,599

didn't go to that town meeting and then

1793

01:26:24,819 --> 01:26:22,579

I get a call like midnight from a friend

1794

01:26:27,430 --> 01:26:24,829

of mine over in Port Henry now your law

1795

01:26:30,430 --> 01:26:27,440

passed your law passed only what I had

1796

01:26:33,069 --> 01:26:30,440

no idea so I was really excited about

1797

01:26:35,439 --> 01:26:33,079

that and basically what it says I

1798

01:26:38,770 --> 01:26:35,449

changed the wording I wrote it myself

1799

01:26:40,569 --> 01:26:38,780

um where is Lake Champlain monsters and

1800

01:26:43,120 --> 01:26:40,579

I only kept the monsters just because

1801

01:26:46,750 --> 01:26:43,130

special people no but I put an s on the

1802

01:26:48,819 --> 01:26:46,760

end has been documented documented by

1803

01:26:50,589 --> 01:26:48,829

many of our residents over the years I'm

1804

01:26:52,060 --> 01:26:50,599

kind of like cutting it down where is

1805

01:26:54,489 --> 01:26:52,070

all endangered specie they're entitled

1806

01:26:57,339 --> 01:26:54,499

to protection under both federal and New

1807

01:26:58,930 --> 01:26:57,349

York state laws and whereas champs are

1808

01:27:00,729 --> 01:26:58,940

apparently one of a kind hence of

1809

01:27:03,160 --> 01:27:00,739

protection from harm and harassment in

1810

01:27:04,660 --> 01:27:03,170

vital and there's now therefore be it

1811

01:27:06,520 --> 01:27:04,670

resolved all the waters of Lake

1812

01:27:09,819 --> 01:27:06,530

Champlain which adjoined Port Henry and

1813

01:27:11,709 --> 01:27:09,829

Mariah are hereby declared off-limits to

1814

01:27:13,569 --> 01:27:11,719

anyone who would in any way harm for

1815

01:27:14,620 --> 01:27:13,579

acid destroy the creatures known as

1816

01:27:19,270 --> 01:27:14,630

champ

1817

01:27:21,850 --> 01:27:19,280

well I rewarded that at the end so so it

1818

01:27:25,479 --> 01:27:21,860

sounds logical because this is a

1819

01:27:26,650 --> 01:27:25,489

population of in my opinion biological

1820

01:27:29,620 --> 01:27:26,660

creatures that are yet

1821

01:27:31,630 --> 01:27:29,630

to be identified I don't think that

1822

01:27:32,950 --> 01:27:31,640

these animals are in the fossil record I

1823

01:27:34,330 --> 01:27:32,960

don't think they're a pleaseö sore I

1824

01:27:37,390 --> 01:27:34,340

don't think there's a nice trophy

1825

01:27:40,840 --> 01:27:37,400

I just think they have they possess

1826

01:27:42,370 --> 01:27:40,850

reptilian and a fibia straight I don't

1827

01:27:47,890 --> 01:27:42,380

think that they're in the known fossil

1828

01:27:51,820 --> 01:27:47,900

record so hey I have to ask you what do

1829

01:27:53,320 --> 01:27:51,830

you think about the idea of a law that

1830

01:28:00,070 --> 01:27:53,330

would prevent people from taking a

1831

01:28:03,640 --> 01:28:00,080

potshot at Bigfoot so um when it comes

1832

01:28:08,200 --> 01:28:03,650

to killing animals for proving their

1833

01:28:11,500 --> 01:28:08,210

existence the thing is a body's the only

1834

01:28:15,220 --> 01:28:11,510

thing that a lot of the zoological

1835

01:28:18,070 --> 01:28:15,230

community will take as evidence that it

1836

01:28:21,400 --> 01:28:18,080

is a separate distinct species because

1837

01:28:23,530 --> 01:28:21,410

with that you can do anatomical studies

1838

01:28:28,230 --> 01:28:23,540

you can do DNA tests you can figure out

1839

01:28:30,490 --> 01:28:28,240

exactly where it falls in the taxonomy

1840

01:28:34,780 --> 01:28:30,500

there's a lot of debate whether or not

1841

01:28:39,670 --> 01:28:34,790

it's ethical I personally do not have an

1842

01:28:44,020 --> 01:28:39,680

issue with it simply because these

1843

01:28:46,180 --> 01:28:44,030

animals if they do exist in the way a

1844

01:28:49,480 --> 01:28:46,190

lot of in the way the folklore states

1845

01:28:52,750 --> 01:28:49,490

they're obviously rare they do need to

1846

01:28:57,040 --> 01:28:52,760

be protected and to be protected

1847

01:29:00,760 --> 01:28:57,050

generally they need to be discovered

1848

01:29:04,510 --> 01:29:00,770

first a lot of the laws protecting these

1849

01:29:09,760 --> 01:29:04,520

animals are just small-town laws for the

1850

01:29:14,940 --> 01:29:09,770

small areas air like the Minerva monster

1851
01:29:16,330 --> 01:29:14,950
of law hey we're running ten Mar 23

1852
01:29:18,640 --> 01:29:16,340
minutes left

1853
01:29:21,670 --> 01:29:18,650
all right well Tim you take over and

1854
01:29:23,530 --> 01:29:21,680
let's well all right let's our our

1855
01:29:26,440 --> 01:29:23,540
listeners want to know more about our

1856
01:29:28,210 --> 01:29:26,450
guests so Katie what about you where can

1857
01:29:30,730 --> 01:29:28,220
our listeners find out more about you

1858
01:29:32,890 --> 01:29:30,740
basically they can go to actually the

1859
01:29:35,590 --> 01:29:32,900
best way to follow my my research on

1860
01:29:37,540 --> 01:29:35,600
champ is through our Facebook page just

1861
01:29:40,060 --> 01:29:37,550
type in champ search in the search bar

1862
01:29:40,459 --> 01:29:40,070
and our page will pop up I basically do

1863
01:29:43,879 --> 01:29:40,469

up

1864

01:29:45,759 --> 01:29:43,889

videos live videos I'm actually working

1865

01:29:48,500 --> 01:29:45,769

on a few different papers on champ

1866

01:29:51,379 --> 01:29:48,510

different theories that I have behavior

1867

01:29:55,160 --> 01:29:51,389

morphology things like that

1868

01:30:00,169 --> 01:29:55,170

and also our website which is WWF Ischl

1869

01:30:03,439 --> 01:30:00,179

champ search webs calm alright and great

1870

01:30:08,750 --> 01:30:03,449

research yes I'll call where do people

1871

01:30:11,870 --> 01:30:08,760

read your yeah so unfortunately my radio

1872

01:30:15,109 --> 01:30:11,880

my radio station shut down a couple

1873

01:30:17,239 --> 01:30:15,119

months ago so I do not have a show

1874

01:30:19,879 --> 01:30:17,249

anymore I am working on a bunch of stuff

1875

01:30:22,729 --> 01:30:19,889

and you can find all the updates on that

1876

01:30:26,080 --> 01:30:22,739

on my facebook page which is a crypto -

1877

01:30:31,009 --> 01:30:26,090

kid and then I have a blog which is

1878

01:30:33,259 --> 01:30:31,019

paranormal 1:01 dot blog spot.com but i

1879

01:30:37,489 --> 01:30:33,269

don't update that as much generally I

1880

01:30:39,620 --> 01:30:37,499

put like book reviews and a handful of

1881

01:30:43,069 --> 01:30:39,630

announcements up there where we will

1882

01:30:44,660 --> 01:30:43,079

have to send you a couple of or we will

1883

01:30:47,089 --> 01:30:44,670

have to send you a couple copies of our

1884

01:30:49,040 --> 01:30:47,099

the books that we published on

1885

01:30:50,600 --> 01:30:49,050

cryptozoology and I want to thank our

1886

01:30:54,649 --> 01:30:50,610

guests for this evening and I want to

1887

01:30:58,520 --> 01:30:54,659

thank Tina and Peter and Carol and Tim

1888

01:31:03,410 --> 01:30:58,530

my co-host and don't forget our youtube

1889

01:31:06,529 --> 01:31:03,420

channel which is mr. ufos secret files

1890

01:31:08,930 --> 01:31:06,539

if you enjoyed the program and you

1891

01:31:11,779 --> 01:31:08,940

listen to it every Thursday night on ke

1892

01:31:14,270 --> 01:31:11,789

cor radio and it's archived there as

1893

01:31:17,239 --> 01:31:14,280

well you go to youtube because we had a

1894

01:31:24,790 --> 01:31:17,249

lot of visuals to it mr. UFO secret

1895

01:31:31,610 --> 01:31:27,740

you've been listening to exploring the

1896

01:31:34,880 --> 01:31:31,620

bazaar with hosts Timothy Beckley and T

1897

01:31:37,790 --> 01:31:34,890

Swartz they're taking back the night by

1898

01:31:40,280 --> 01:31:37,800

jetting non-stop across the cosmos in

1899

01:31:44,139 --> 01:31:40,290

search of the truly bizarre and totally

1900

01:31:46,649 --> 01:31:44,149

unexplained with you as their cold

1901

01:31:49,080 --> 01:31:46,659

Thursday nights at 7:00 p.m. Pacific

1902

01:31:52,350 --> 01:31:49,090

10:00 p.m.

1903

01:31:54,780 --> 01:31:52,360

on the K cor digital radio

1904

01:31:58,230 --> 01:31:54,790

for more information on exploring the

1905

01:32:01,110 --> 01:31:58,240

bazaar and hosts Timothy Becca and Tim

1906

01:32:04,200 --> 01:32:01,120

Swartz check out their kco our digital

1907

01:32:10,410 --> 01:32:04,210

radio network follow their YouTube
