

1

00:00:00,000 --> 00:00:07,260

Listen, do not under any circumstances try this at home. We're what you call experts. We do this for a living

2

00:00:09,840 --> 00:00:17,520

It's a blast from the past as the myth busters answer their critics and retest their greatest hits

3

00:00:18,040 --> 00:00:22,880

The chicken gun. I'm not gonna debate this endlessly. You fought for this ice bullet

4

00:00:23,720 --> 00:00:27,960

Exploding implants. I wish we could get in there and feel it. I'm sure you do

5

00:00:27,960 --> 00:00:30,440

Were you shocked by the third rail?

6

00:00:30,440 --> 00:00:35,560

There are problems. This is like 50 people in the room. Left breathless by body paint

7

00:00:36,560 --> 00:00:37,000

What's up?

8

00:00:37,000 --> 00:00:43,000

Hung up on cell phones. This is the people. In this episode the myth busters find out

9

00:00:46,200 --> 00:00:48,200

Is my missing an eyebrow?

10

00:00:49,120 --> 00:00:55,760

Adam Savage. I reject your reality and substitute my own. And Jamie Heineman. Crack, damn you.

11

00:00:55,760 --> 00:00:57,760

I wouldn't say Jamie's an evil genius

12

00:00:58,800 --> 00:01:04,480

Between them more than 30 years special effects experience when will the fun ever stop?

13

00:01:04,480 --> 00:01:08,120

They don't just tell the myths they put them to the test

14

00:01:19,440 --> 00:01:24,080

Well, it seems that we have to revisit the story peeing on the third rail

15

00:01:24,160 --> 00:01:28,360

We thought we did a great job with it. We tested it. We thought we busted the myth

16

00:01:29,920 --> 00:01:36,760

In the original test the myth busters replicated the electrified third rail often used to power

17

00:01:36,960 --> 00:01:43,900

Subway as the P aim look P aim looks pretty good to me with our test subject. Oh, Mellie's stoic assistance

18

00:01:44,000 --> 00:01:46,000

They found in normal circumstances

19

00:01:46,480 --> 00:01:50,400

There's no way a fatal current can jump up a urine stream

20

00:01:50,680 --> 00:01:56,200

Not a thing the reason a few inches after release the urine stream breaks up

21

00:01:56,200 --> 00:01:59,000

It needs to be solid to carry the jolt

22

00:02:00,680 --> 00:02:02,680

But a lot of people are

23

00:02:02,880 --> 00:02:08,640

Sending us emails saying that well I peed on a electric fence on the farm and I got a shock

24

00:02:08,760 --> 00:02:15,320

Okay, Jamie and Adam have called in builder Tori Balechi from their workshop to help put this one together

25

00:02:15,320 --> 00:02:19,820

I basically think we're still gonna be right about the reasons you can't get electrified peeing on the third rail

26

00:02:19,820 --> 00:02:22,660

But we've got to build a rig that simulates an electric fence

27

00:02:22,660 --> 00:02:27,420

Okay, so I think we ought to have half the farm fence with a single wire and half like you know

28

00:02:27,420 --> 00:02:31,500

Maybe a two-foot square section of chain link fence as well. You should probably pee on the city side

29

00:02:32,980 --> 00:02:34,980

Farm boy city boy. Yeah

30

00:02:36,740 --> 00:02:42,860

To recreate those viewers adventures down on the farm the myth busters need a fence

31

00:02:43,180 --> 00:02:49,340

It'll be half chain link and half single wire and they'll hook it up to an electric fence energizer

32

00:02:49,820 --> 00:02:53,980

Then they'll do what comes naturally. It just doesn't seem right

33

00:02:54,980 --> 00:03:03,980

To prevent killing livestock the energizer delivers a low current in very short pulses. It's not gonna continue to zap you

34

00:03:03,980 --> 00:03:08,660

It's only gonna be in a pulse. So, you know, it's just enough to give you a serious jolt

35

00:03:13,180 --> 00:03:18,120

The build team starts making the fence while Jamie's got to make a decision

36

00:03:18,440 --> 00:03:22,400

Well, I still haven't decided whether I actually want to do this or not. It's like

37

00:03:23,000 --> 00:03:25,000

He's so boring

38

00:03:25,080 --> 00:03:28,320

Well, I don't do this anymore. Come on

39

00:03:28,840 --> 00:03:33,360

All that time you spent as a political prisoner in South America, and they never once attached a battery to your

40

00:03:33,600 --> 00:03:35,600

Well, why do you think I don't want to do it?

41

00:03:37,080 --> 00:03:44,160

As construction forages ahead Jamie contemplates risking his all but before that moment of truth

42

00:03:44,280 --> 00:03:47,800

The mythbusters want to recover their mightest stuff

43

00:03:48,920 --> 00:03:56,480

In one of the mythbusters first-ever experiments Jamie stepped into the skin of Goldfinger's famous painted woman

44

00:03:59,640 --> 00:04:05,680

According to the myth if you're going to paint your whole body leave a patch bare so the skin can breathe

45

00:04:05,720 --> 00:04:12,240

The woman in the movie couldn't sweat she overheated and died in the myth that actress

46

00:04:12,440 --> 00:04:20,400

Shirley Eaton died too, but in reality she made it out without a scratch. Well, as you can see, I'm very much alive

47

00:04:20,880 --> 00:04:23,280

myth busted or is it

48

00:04:23,640 --> 00:04:30,080

Jamie left a little skin clear just in case but strangely the paint seemed to affect him anyway

49

00:04:30,800 --> 00:04:36,600

We got some anomalous readings, you know the blood pressure. I don't really understand it all but

50

00:04:37,280 --> 00:04:43,040

Neither did the EMTs or the doctors at the time the hairs so if Jamie's blood pressure went crazy

51

00:04:43,400 --> 00:04:47,840

Will Adams they'll try again with one small difference

52

00:04:48,000 --> 00:04:55,280

They took Jamie's temperature with an ear probe. That's so hard. The ear probe temperature would not be very accurate

53

00:04:55,600 --> 00:04:59,540

You do need a core temperature and that's where the rectal probe

54

00:05:00,160 --> 00:05:03,640

Comes in rectal probe the rectal temperature

55

00:05:03,640 --> 00:05:06,680

I'll get the lard

56

00:05:13,680 --> 00:05:18,600

Latex paint will pull every hair off Adam's body if he doesn't shave first

57

00:05:18,600 --> 00:05:22,560

If I shave both the goatee in my hair my head looks like a grape

58

00:05:33,640 --> 00:05:35,640

Are you guys ready for this?

59

00:05:42,640 --> 00:05:44,640

Yeah, well, you know

60

00:05:49,840 --> 00:05:55,960

Medics Sanjay and Orvis need Adams baseline vitals to compare with results after he's painted

61

00:05:57,520 --> 00:06:01,400

Heart rate blood pressure and of course temperature

62

00:06:02,200 --> 00:06:09,120

Before the paint goes on Adam can handle that part himself in the privacy of the bathroom

63

00:06:12,400 --> 00:06:19,320

Embarrassment and pain and humiliation are you know a good thing for Adam to experience on the show

64

00:06:24,200 --> 00:06:26,200

99 came out at 99 even

65

00:06:26,960 --> 00:06:34,360

Yeah, blood pressure about 128 over 80. That's reasonably good under the circumstance. I'm surprised that it's quite so normal

66

00:06:34,960 --> 00:06:38,280

Heart rate 57 it means he's pretty relaxed with what he's doing

67

00:06:38,880 --> 00:06:43,960

He was relaxed, but now it's time to gild his lily white hide

68

00:06:44,640 --> 00:06:49,880

It's a memorable first day on the job for new myth turn Christine Chamberlain

69

00:06:56,760 --> 00:06:58,760

Consistency

70

00:07:00,360 --> 00:07:07,800

She's only got herself to blame she's an artist and builder and answered our call for a myth turn to join the team

71

00:07:08,680 --> 00:07:13,200

This is her prize Christine when you sent in your tape to myth busters

72

00:07:18,080 --> 00:07:23,440

You know, I think in some countries I might be you know ordained as the like supreme ruler after a ceremony like this

73

00:07:24,440 --> 00:07:28,560

The paint has been mixed with a pigment it dries gold and

74

00:07:29,680 --> 00:07:31,680

Sticky I got one eye for a while

75

00:07:32,080 --> 00:07:34,080

Oh

76

00:07:46,960 --> 00:07:48,960

Heidi I'm coming after you

77

00:07:49,880 --> 00:07:56,960

Like Jamie just to be safe Adams been left with some bare skin the paint will take 30 minutes to dry

78

00:07:57,760 --> 00:08:04,200

While they wait it occurs to dr. Morelle Jamie's original results might have had more to do with his own

79

00:08:04,640 --> 00:08:07,360

Physiology than the paint that one 36 over 80

80

00:08:10,680 --> 00:08:15,920

Sure enough even now Jamie's blood pressure is substantially higher than Adams

81

00:08:17,080 --> 00:08:20,400

136 over 80 I'd be suspicious that his blood pressure is truly

82

00:08:21,200 --> 00:08:23,200

Elevated and they might need attention

83

00:08:24,160 --> 00:08:31,680

So Jamie's vital signs probably had nothing to do with the paint, but the final proof will come in Adams results

84

00:08:33,040 --> 00:08:36,480

After an hour his heart rate and blood pressure haven't moved

85

00:08:37,240 --> 00:08:41,880

And now there's just the delicate matter of body temperature

86

00:08:44,920 --> 00:08:51,840

Seniority you pulling a rink if it's cleaning out it was not or inserting pros. It's just a job

87

00:08:52,680 --> 00:08:55,680

Adam seems to be taking it all a little more personal

88

00:08:55,680 --> 00:08:57,680

Oh

89

00:09:18,880 --> 00:09:24,280

97.5 his temperature has dropped not risen as predicted in the myth

90

00:09:24,640 --> 00:09:26,640

His other vitals are fine too

91

00:09:27,000 --> 00:09:32,680

But the blood pressure is being still within normal limits the heart rate is being also within normal limits

92

00:09:32,680 --> 00:09:35,520

The temperature went down and definitely nothing I'm not

93

00:09:36,320 --> 00:09:40,520

That's good enough for Adam. He's out of there man. There's wacky

94

00:09:43,440 --> 00:09:47,480

The gold finger myth is busted not once but twice

95

00:09:55,000 --> 00:10:02,640

Builders Tori and Carrie Byron are finishing the electric fence

96

00:10:08,960 --> 00:10:11,060

Carrie's designated guinea pig

97

00:10:16,000 --> 00:10:22,040

So Tori what do you got for us? Well, here's your wired fence

98

00:10:24,840 --> 00:10:29,120

20,000 volts most men would shrink from the challenge not Adam

99

00:10:31,120 --> 00:10:33,040

You but I've had five or six glasses of water

100

00:10:33,040 --> 00:10:38,440

I'm not looking forward to it, but I'm ready to try the experiment. Are you I'm not doing it

101

00:10:38,840 --> 00:10:42,600

Can I point out that I've already been painted with gold paint and had an anal probe today?

102

00:10:43,400 --> 00:10:45,400

You're doing a wonderful job

103

00:10:46,880 --> 00:10:52,920

It seems an electric jolt to the genitals is beyond the limits of myth-busting solidarity

104

00:10:53,120 --> 00:10:59,960

It's just Adam the fence and his now close friends the paramedics with their heart monitor just in case

105

00:11:01,720 --> 00:11:05,000

Just you know like to get a confirmation of my assumption that

106

00:11:05,440 --> 00:11:09,200

an extremely low-amperage high voltage hit is not going to perhaps

107

00:11:09,840 --> 00:11:11,840

cost my to

108

00:11:12,320 --> 00:11:14,320

Malfunction from here on it

109

00:11:15,160 --> 00:11:18,040

Yeah, you're not P shy or anything. I'm not P shy

110

00:11:18,920 --> 00:11:22,800

I believe I've proved that I'm not shy in any way

111

00:11:23,720 --> 00:11:27,880

Time to show your stuff. Why don't you hold my hand while I pee it then maybe you'll get a shot

112

00:11:30,640 --> 00:11:37,680

Okay, we're gonna try and aim here the voltage is higher than in the original third rail experiment and even more importantly

113

00:11:38,080 --> 00:11:44,720

This time Adams much closer just three inches from the wire. There should be a solid stream

114

00:11:48,480 --> 00:11:49,680

I

115

00:11:49,680 --> 00:11:53,040

May be a little peace. I just like 50 people in the room

116

00:11:54,360 --> 00:11:56,360

All right, here we go

117

00:11:56,360 --> 00:11:58,360

ready

118

00:12:03,800 --> 00:12:05,800

There we go, I got a shit

119

00:12:06,600 --> 00:12:09,880

It was nothing. It was nothing. I got it. You did

120

00:12:14,440 --> 00:12:17,720

Beautiful we prove that I got a shot right

121

00:12:18,640 --> 00:12:20,640

It was nothing

122

00:12:22,120 --> 00:12:27,280

Our initial results still hold, you know the myth is busted. We never said it was impossible to get shocked

123

00:12:27,400 --> 00:12:30,240

We just said that even though you're in conducts electricity

124

00:12:30,240 --> 00:12:35,680

You have to be ridiculously close to the source for that to conduct and we proved that again

125

00:12:35,680 --> 00:12:38,280

We still yet to find a single case

126

00:12:39,080 --> 00:12:45,480

Confirmed of someone dying from being electrocuted by peeing on an electrified rail. I was being cautious

127

00:12:45,840 --> 00:12:52,280

Yeah, that was everybody in our viewing audience should also be this one's definitely busted. Let's move on. Okay

128

00:12:57,200 --> 00:13:03,680

Later busting the inflatable brassiere, what are you doing and ice cold killings?

129

00:13:04,040 --> 00:13:09,900

But next another day another chicken. It's the chicken gun reloaded

130

00:13:15,600 --> 00:13:17,600

It

131

00:13:19,560 --> 00:13:25,640

Sounded like such an easy myth to bust the chicken gun the foul firing cannon

132

00:13:25,800 --> 00:13:29,480

NASA uses to test aircraft's ability to withstand bird strike

133

00:13:30,480 --> 00:13:35,320

According to the myth they lent the gun to British rail to test high speed trains

134

00:13:35,480 --> 00:13:41,300

But they ran into a problem and the problem was that the chickens were going right through the windshields of the trains and even

135

00:13:41,300 --> 00:13:45,380

Embedding themselves in the seats and they sent a tape back to NASA asking for help

136

00:13:46,060 --> 00:13:49,620

NASA replied saying gentlemen, thaw your chickens

137

00:13:51,700 --> 00:13:56,740

To test if indeed a frozen chicken does cause more damage than a thawed one

138

00:13:57,140 --> 00:14:05,380

Jamie and Adam build their own chicken gun using compressed air to shoot birds at a light aircraft with spectacular results

139

00:14:06,100 --> 00:14:11,700

What both frozen and thawed chicken smashed through the windshield with equal ease

140

00:14:11,700 --> 00:14:16,900

I think that would mean that the myth is definitely busted or maybe not

141

00:14:17,380 --> 00:14:22,380

Those windshields weren't rated for bird strike the test proved nothing

142

00:14:23,380 --> 00:14:27,220

Jamie that's the biggest screw up we've ever done, but the day was young

143

00:14:27,940 --> 00:14:31,660

They tried to salvage things by carefully timing the impact

144

00:14:32,460 --> 00:14:36,380

Same time argued the myth busters equals same force

145

00:14:38,460 --> 00:14:42,300

At these speeds frozen or thawed chicken myth busted no difference at all

146

00:14:43,340 --> 00:14:49,100

Not according to viewers who complained that's like comparing a cannonball to a lemon cream pie

147

00:14:49,580 --> 00:14:53,900

What counts is penetration, so it's back to the drawing board

148

00:14:56,380 --> 00:15:00,140

This time the myth busters will fire the chickens into blocks of foam

149

00:15:00,780 --> 00:15:05,100

If the myth is true the frozen birds should penetrate deeper

150

00:15:05,740 --> 00:15:11,260

Okay, good lower down lower down once again, they're breaking out the big guns

151

00:15:11,740 --> 00:15:17,740

Adam happy to leave the heavy work to builder scottie chapman all the things we built last year.
This is my favorite

152

00:15:17,980 --> 00:15:22,860

Yeah, like building like using one inch bolts. Yeah big tools

153

00:15:23,660 --> 00:15:25,660

They're big bolts and big nuts

154

00:15:26,780 --> 00:15:28,780

Walking away

155

00:15:29,660 --> 00:15:32,060

They're taking no chances with compressed air

156

00:15:32,940 --> 00:15:37,580

Jamie's rigged up the scissor lift to fire the cannon while they're behind a blast screen

157

00:15:38,620 --> 00:15:40,460

Well, that seemed like that worked

158

00:15:40,460 --> 00:15:45,260

They'll be firing the cannon inside the workshop at two foot square foam blocks

159

00:15:45,580 --> 00:15:51,260

Again, the chickens will be encased in foam sabbos to ensure a snug fit in the barrel

160

00:15:53,660 --> 00:15:58,140

You know, I did this exactly the way adam told me how to do it. Now was your first mistake

161

00:15:59,660 --> 00:16:06,700

It's time to let chickens fly look at that the first shot will be with a thawed bird

162

00:16:07,580 --> 00:16:08,860

three

163

00:16:08,860 --> 00:16:09,980

two

164

00:16:09,980 --> 00:16:11,980

one

165

00:16:15,500 --> 00:16:18,460

It's a hit but jamie's not happy

166

00:16:19,020 --> 00:16:23,820

This went right through this was the thawed chicken. Yeah, the other one's gonna do the same thing

167

00:16:24,140 --> 00:16:26,860

Plus I don't like the way that it's going off to one side

168

00:16:27,260 --> 00:16:33,580

Because it's like who knows a leg was hanging out over here and kind of made it go off to one angle depends on how exactly it impacts

169

00:16:33,980 --> 00:16:35,980

It's not going to give us consistent data

170

00:16:37,820 --> 00:16:45,740

Despite jamie's reservations, they keep working this time a frozen bird three two one

171

00:16:46,700 --> 00:16:54,300

Well, it's good it didn't make it all the way through this time so from the front of the target

172

00:16:56,220 --> 00:17:01,660

It's a 15 inches for the frozen chicken two one

173

00:17:04,300 --> 00:17:06,940

Make sure you treat this like an archaeological dig

174

00:17:07,180 --> 00:17:09,180

All right

175

00:17:11,980 --> 00:17:14,540

It's two feet it went two feet

176

00:17:16,860 --> 00:17:20,140

Okay, that's a thawed chicken. Yeah one

177

00:17:21,420 --> 00:17:24,620

To jamie's eye the results are disturbingly random

178

00:17:25,420 --> 00:17:30,940

The penetration seems to have more to do with the individual foam block than the state of the chicken

179

00:17:32,300 --> 00:17:36,140

But adam's convinced the results are accurate enough to answer the myth

180

00:17:36,940 --> 00:17:41,580

I have to say I think that the penetrating power of both the frozen and the thawed chicken is totally equal

181

00:17:42,300 --> 00:17:47,500

This simple myth is getting the better of the guys again. I don't know what's going on with those

182

00:17:47,900 --> 00:17:53,580

We got deflections. We got something like a ricochet glance off to the side. This is messy

183

00:17:53,980 --> 00:17:59,580

I don't see much different between the impact sites. It's the same amount of mass passing through the same point in space

184

00:18:00,060 --> 00:18:01,420

That right there

185

00:18:01,500 --> 00:18:05,180

Is like I don't know. I don't know what it's doing adam's furious

186

00:18:05,740 --> 00:18:07,740

jamie's holding firm

187

00:18:08,300 --> 00:18:14,140

There will be no consensus. I i'm not gonna debate this endlessly you fought for this you fought for this

188

00:18:14,620 --> 00:18:17,420

As an as an experimental as a way to gather data

189

00:18:17,660 --> 00:18:21,100

It seemed it seemed like a good idea to the time as it did to all of us

190

00:18:21,500 --> 00:18:24,540

The chicken gun has shot them down a third time

191

00:18:25,260 --> 00:18:28,700

You know, if we don't get it right, we're gonna get held accountable for this

192

00:18:29,020 --> 00:18:35,020

Or should that be tarred and feathered they have to find a way to answer this myth once and for all

193

00:18:35,980 --> 00:18:41,500

Coming up the chicken gun comes home to ruse. I want to do it again. Like I want needles in my eyes

194

00:18:41,660 --> 00:18:49,580

But next the ice bullets back eyes and ears and the controversial cell phone and the gas station myth. It's ringing

195

00:18:52,860 --> 00:18:57,660

Remember don't try this at home. We've got years of experience that keeps us safe

196

00:18:59,420 --> 00:19:01,420

I

197

00:19:05,580 --> 00:19:09,340

This is definitely one that caused a lot of stir when we aired at the first time

198

00:19:10,700 --> 00:19:14,620

The ice bullet that amazing vanishing projectiles

199

00:19:14,940 --> 00:19:19,980

Preferred ordinance for kennedy conspiracy theorists and hollywood produces a light

200

00:19:20,780 --> 00:19:22,780

The myth sounds reasonable

201

00:19:23,340 --> 00:19:28,380

Replace lead with ice which melts in the body no clues for the cops see

202

00:19:29,180 --> 00:19:31,180

Looks good. Looks like a bullet to me

203

00:19:31,340 --> 00:19:33,340

But when the mythbusters tried

204

00:19:33,580 --> 00:19:35,820

All they got was a puff of steam

205

00:19:36,300 --> 00:19:40,220

The hot gases in the chamber melted the ice as it left the barrel

206

00:19:41,420 --> 00:19:46,140

The problem that they said was that we weren't freezing it right. We were freezing it too

207

00:19:46,620 --> 00:19:49,340

Quickly by dropping it into liquid nitrogen

208

00:19:49,740 --> 00:19:52,380

So what we've done is we figured out a way of

209

00:19:53,180 --> 00:19:57,660

Very methodically freezing the ice for the ice bullet so that it forms

210

00:19:58,220 --> 00:20:01,740

Very carefully formed crystal that's much harder and and stronger

211

00:20:02,620 --> 00:20:07,020

The trick here is to get the ice to form bullet shaped inside the casing

212

00:20:07,900 --> 00:20:12,700

And to do that over a period of several hours to ensure it's as strong as possible

213

00:20:13,340 --> 00:20:16,620

To do it they'll need dry ice an aluminum plate

214

00:20:17,100 --> 00:20:19,100

Bullets and a silicone mold

215

00:20:19,740 --> 00:20:25,420

We only got one night to get this right and it's not frozen. We're screwed. Yeah. All right. Well,

you guys ready. Let's get to it

216

00:20:25,580 --> 00:20:27,580

all right

217

00:20:27,660 --> 00:20:31,740

The build team has been given its challenge and the clock is ticking

218

00:20:34,700 --> 00:20:39,820

This is the aluminum plate that we're going to make a bullet mold on i'm going to zap these in with some glue

219

00:20:40,300 --> 00:20:44,300

We have a row of tin and then i'll build a box around it and then fill it with silicone

220

00:20:44,700 --> 00:20:47,980

When the silicone sets up then we'll have a mold for the bullets

221

00:20:48,940 --> 00:20:55,820

It'll take several hours for the silicone to set in the meantime jamie and adam have to make a phone call or two

222

00:21:04,060 --> 00:21:07,260

It was a case of dial d for destruction

223

00:21:08,460 --> 00:21:13,820

Adam singed and sorry after putting the cell phone in the gas station myth to the test

224

00:21:14,300 --> 00:21:16,300

So

225

00:21:17,180 --> 00:21:23,020

Well an early story that we did involving a cell phone and an explosion at a gas station caused a lot of

226

00:21:23,660 --> 00:21:28,220

Controversy apparently well, they felt that we had abandoned certain aspects of the myth too early

227

00:21:29,020 --> 00:21:35,020

It's a modern-day myth that using your cell phone while filling your car can spark an explosion

228

00:21:35,580 --> 00:21:41,980

Certainly gas station fires happen, but the mythbusters just couldn't start one with a cell phone

229

00:21:42,460 --> 00:21:43,980

No explosion

230

00:21:43,980 --> 00:21:49,340

According to the experts most gas station fires are triggered by static electricity sparks

231

00:21:49,740 --> 00:21:53,260

Often when the person gets in and out of their car while filling

232

00:21:53,900 --> 00:21:59,580

Here in simple we don't have any accidents involving a cell phone at a service station. It just doesn't happen

233

00:22:00,700 --> 00:22:02,700

Some viewers still weren't happy

234

00:22:03,740 --> 00:22:10,220

They felt that uh, we hadn't gotten the right time for when the cell phone's actually putting out the maximum amount

235

00:22:10,460 --> 00:22:12,460

Of electromagnetic energy

236

00:22:12,620 --> 00:22:18,540

Secondly, uh, they suggested that we could possibly get a spark off of the aerial to something that was metal

237

00:22:18,860 --> 00:22:24,860

And third was actually there was some brand new information that some aftermarket batteries were actually shorting out

238

00:22:25,980 --> 00:22:28,380

Exploding and causing these explosions

239

00:22:29,260 --> 00:22:31,260

So three tests to try

240

00:22:31,740 --> 00:22:34,540

Find the time when the phone is outputting the most energy

241

00:22:35,180 --> 00:22:38,460

Second put the antenna near metal to see if it sparks

242

00:22:39,100 --> 00:22:43,740

And third try to short out a battery and cause an explosion that way

243

00:22:44,220 --> 00:22:47,740

You know, it's really easy to put to rest the first part of this criticism

244

00:22:47,820 --> 00:22:52,220

And all we had to do is get this electromagnetic field meter and

245

00:22:52,860 --> 00:22:54,860

Test the highest output

246

00:22:54,860 --> 00:22:56,860

Coming out of this cell phone

247

00:22:56,940 --> 00:23:00,700

Okay, so uh, you want to try calling it from your cell phone? Okay, see what that does

248

00:23:01,740 --> 00:23:05,260

These meters are often used to test for leaks in microwave ovens

249

00:23:05,580 --> 00:23:08,540

It'll show when the electromagnetic field is strongest

250

00:23:11,260 --> 00:23:13,260

Big spike

251

00:23:14,220 --> 00:23:16,220

All right, it went up to 94

252

00:23:16,780 --> 00:23:21,900

That's a spike and now it's going back and forth between like three and seven. It's kind of going up and down

253

00:23:22,060 --> 00:23:24,060

Okay, let's see here. I'm gonna answer it

254

00:23:25,820 --> 00:23:27,820

Hello

255

00:23:31,820 --> 00:23:33,820

Hello

256

00:23:35,260 --> 00:23:41,740

Um, let me try and call your cell phone. Yeah, there we go. Oh bump to 97

257

00:23:45,580 --> 00:23:47,580

There we go

258

00:23:50,300 --> 00:23:53,580

97 basically did the same thing as it did when it was answering the phone

259

00:23:53,660 --> 00:23:57,900

There was an initial spike and now it's going back and forth between like three and 20

260

00:24:00,300 --> 00:24:01,660

And we're back again

261

00:24:01,660 --> 00:24:05,500

So the peak happens when contact is first made with the base station

262

00:24:06,620 --> 00:24:11,500

Sending or receiving which is exactly what the myth busters tested first time round

263

00:24:12,460 --> 00:24:19,020

So criticism one it's busted absolutely busted flat. Let's move on to uh blowing stuff up. Okay

264

00:24:22,620 --> 00:24:29,420

Back in the ice bullet workshop carries working on the targets ballistic gel busts of adam's head

265

00:24:29,980 --> 00:24:35,500

The recipe is ridiculously complicated for something as simple as mix and pour

266

00:24:36,940 --> 00:24:39,500

The silicone mold is set and it's perfect

267

00:24:40,380 --> 00:24:43,820

Now the lead slugs need to be shaken loose from their casings

268

00:24:47,820 --> 00:24:53,500

The gunpowder is poured back into the casing and sealed with wax now for the water

269

00:24:53,500 --> 00:25:01,020

The water fills the mold to the exact shape of the lead slug just make sure it's a constant pressure straight down

270

00:25:03,100 --> 00:25:05,100

Perfect

271

00:25:05,260 --> 00:25:12,380

Finally the big chill the mold will sit on the ice overnight then this myth will be put to the test

272

00:25:15,260 --> 00:25:22,140

Back at cell phone central jaymie and adam are setting up test number two the antenna next to metal

273

00:25:22,780 --> 00:25:26,860

Jamie's taking no chances. He remembers last time they tried this

274

00:25:28,380 --> 00:25:34,380

I lost a lot of hair on my arm risky or not. They've resurrected that fuel filled blast chamber

275

00:25:35,020 --> 00:25:37,660

We put a cell phone in there with metal near its antenna

276

00:25:37,980 --> 00:25:42,620

And now we're going to see if calling that phone which we know gets the highest spike in emf waves

277

00:25:43,020 --> 00:25:49,500

Makes the set on fire jaymie. I think we're ready. I think the gasoline is vaporized ready for the cell phone calling the cell phone spark test

278

00:25:49,580 --> 00:25:50,940

You good?

279

00:25:51,020 --> 00:25:52,060

Here we go

280

00:25:53,500 --> 00:25:55,500

Calling

281

00:26:01,420 --> 00:26:03,900

Imagine this nothing is happening

282

00:26:05,340 --> 00:26:08,620

Now given the idea that somebody may have a damaged cell phone

283

00:26:08,620 --> 00:26:13,740

We're going to peel off some of the insulation off of the antenna of the phone and then we're going to do the same test again

284

00:26:14,220 --> 00:26:18,300

That's it. Look at that. So the antenna is bare metal. This is lethal

285

00:26:18,700 --> 00:26:21,340

If it can spark it definitely will

286

00:26:22,540 --> 00:26:24,540

I'm calling now

287

00:26:28,060 --> 00:26:30,060

It's ringing

288

00:26:32,220 --> 00:26:35,260

And still nothing happens

289

00:26:36,700 --> 00:26:39,420

The antenna spark theory looks busted too

290

00:26:40,620 --> 00:26:46,540

To ensure the problem isn't with the chamber jaymie uses an electric igniter ready ready

291

00:26:49,260 --> 00:26:52,060

We got it down to a science

292

00:26:53,340 --> 00:26:55,420

Oh, I missed a call apparently

293

00:26:56,380 --> 00:27:02,300

Jamie and adam's last hope of cell phone destruction lies in the exploding battery test

294

00:27:02,780 --> 00:27:09,180

There have been instances of non-name brand batteries exploding, but can the mythbusters make it happen?

295

00:27:09,980 --> 00:27:13,500

This is really exciting. I mean not only do we get to short out a battery

296

00:27:13,740 --> 00:27:16,220

But we get to do it in a gasoline rich environment

297

00:27:17,020 --> 00:27:19,260

I mean, I can't think of a better way to spend a monday afternoon

298

00:27:20,380 --> 00:27:23,180

A better way would be with a spontaneous explosion

299

00:27:23,900 --> 00:27:26,860

Well, I'm trying to short the battery out with a clip lead and

300

00:27:27,740 --> 00:27:30,220

Get a spark out of it and I'm not getting anything

301

00:27:30,860 --> 00:27:34,940

High quality batteries come with an electronic safeguard against shorting

302

00:27:35,820 --> 00:27:39,580

In one last desperate attempt adam's ripped that off

303

00:27:39,740 --> 00:27:43,500

I mean, we're doing everything you possibly can do to get a spark off a battery

304

00:27:43,980 --> 00:27:48,060

In a scenario that absolutely wouldn't happen with any phone and we're still not getting anything

305

00:27:48,780 --> 00:27:51,100

What they are getting is a hot battery

306

00:27:52,060 --> 00:27:55,900

There's no melting and certainly no cell phone explosion

307

00:27:57,340 --> 00:28:05,020

Last time neither the phone nor static electricity worked in the end they resorted to ignition by neon transformer

308

00:28:05,500 --> 00:28:17,180

We tested the antennas we tested the peak output and

309

00:28:17,660 --> 00:28:22,380

We've been tested shorting out a battery and it just the energy just isn't there isn't there exactly

310

00:28:22,380 --> 00:28:28,220

I stand behind our original conclusion that this myth is a hundred percent totally busted

311

00:28:28,780 --> 00:28:38,940

After such a letdown what better way to relieve the disappointment than to shoot something

312

00:28:39,740 --> 00:28:43,660

It's time to put the ice bullets to the test at the firing range

313

00:28:44,540 --> 00:28:48,460

They've been frozen overnight and should be harder than the ones used

314

00:28:49,260 --> 00:28:54,140

Unsuccessfully in the original attempt. All right, so as soon as one comes out, we're going to spray it with a little teflon spray

315

00:28:54,700 --> 00:28:56,700

But will they be a lethal weapon?

316

00:28:57,580 --> 00:28:59,580

They're lightly because it may melt it

317

00:29:01,740 --> 00:29:05,500

This is what it looks like when a real bullet hits a ballistic gel head

318

00:29:05,820 --> 00:29:10,220

It's exactly the effect the guys want to see with the new improved ice bullets

319

00:29:11,740 --> 00:29:13,740

But will they

320

00:29:14,220 --> 00:29:16,860

Eyes and ears ready here we go

321

00:29:20,940 --> 00:29:24,220

They might as well have been firing blanks. Oh, look at that

322

00:29:24,940 --> 00:29:30,940

No ice hit the target a little bit of a mark just some wax from the cartridge and some unburned gunpowder

323

00:29:31,180 --> 00:29:36,300

Oh, well, no ice and no I clearly was aimed right. It clearly just vaporized the water

324

00:29:37,820 --> 00:29:41,660

They'll move the head in closer just to be sure. No, okay

325

00:29:43,500 --> 00:29:46,780

We're cocked and loaded everybody clear everybody's clear

326

00:29:47,500 --> 00:29:49,500

You

327

00:29:52,380 --> 00:29:54,380

Doesn't look like anything came out

328

00:29:54,620 --> 00:29:59,900

Even at point blank range the only danger to the victim would be a nasty steam burn

329

00:30:00,700 --> 00:30:05,180

Well, jimmy, you know, we actually did the ice bullet again here. We froze it slowly

330

00:30:05,260 --> 00:30:11,420

We froze it from the tip. We coated it in teflon. We got it in fast and there's nothing here

331

00:30:11,580 --> 00:30:15,100

No penetration at all. No, so we finally put this one to rest

332

00:30:15,420 --> 00:30:21,100

Yes, you cannot shoot a frozen water bullet from a rifle like they do in the movies

333

00:30:21,100 --> 00:30:23,500

It just can't be done. You're gonna end up with vaporized water

334

00:30:24,700 --> 00:30:27,100

All right, so stop emailing me

335

00:30:31,180 --> 00:30:35,100

After the break the sky's the limit for the inflatable brazier

336

00:30:35,100 --> 00:30:39,820

There's definitely some real expansion from that thing and the biscuit bullet bites back

337

00:30:40,460 --> 00:30:42,460

Lanter currant

338

00:30:45,740 --> 00:31:00,060

Well, you know jimmy, this is one of our very first stories the biscuit bullet and it worked

339

00:31:01,820 --> 00:31:02,700

Oh

340

00:31:02,700 --> 00:31:09,020

The myth concerns cans of raw biscuit dough exploding in the back seat of a summer hot car

341

00:31:09,580 --> 00:31:11,580

Splattting the driver right in the head

342

00:31:11,980 --> 00:31:16,780

She thought she'd been shot and desperately grabbed her skull to hold in her brains

343

00:31:17,340 --> 00:31:20,940

And when the paramedics pry the woman's fingers off the back of her head

344

00:31:21,180 --> 00:31:24,700

They find that she's hanging on to this massive raw biscuit dough

345

00:31:28,300 --> 00:31:30,940

Maybe it didn't happen that just went everywhere

346

00:31:31,020 --> 00:31:37,660

But by heating up adam's car the myth must has proved beyond doubt that it could have it's definitely brains

347

00:31:38,460 --> 00:31:41,660

This isn't a correction so much as actually an update

348

00:31:41,820 --> 00:31:45,020

There is a story about aerosol cans under pressure

349

00:31:45,580 --> 00:31:50,540

Sitting in a hot car actually exploding and embedding themselves in the upholstery of the car

350

00:31:51,740 --> 00:31:59,660

So on an 85 degree day, Earl the myth busters catalac gets customized. All right, bring it on mechanical lubricant

351

00:32:00,460 --> 00:32:01,340

check

352

00:32:01,340 --> 00:32:03,340

hairspray

353

00:32:03,340 --> 00:32:08,700

Spray paint spray cooking oil with green spray glue starter fluid

354

00:32:12,060 --> 00:32:19,020

There's no doubt Earl will be one hot caddy in this sun, but will it be hot enough to cause detonation?

355

00:32:20,700 --> 00:32:23,020

There is a small chance of danger

356

00:32:23,420 --> 00:32:26,860

If say the propellant of some of the cans is definitely flammable

357

00:32:27,500 --> 00:32:30,860

That could then explode and give a much bigger kuh-wump than we expect

358

00:32:31,020 --> 00:32:36,860

Well, if we you know lit a fire inside the car, then I could see something happening short of that. I don't think so

359

00:32:39,180 --> 00:32:43,980

While the cans are heating up jaymy and adam have another myth to get off their chests

360

00:32:46,780 --> 00:32:50,380

It's the sky high drama of exploding implants

361

00:32:53,260 --> 00:32:58,460

There's a woman with silicon implants on an airplane and as the plane goes higher

362

00:32:59,100 --> 00:33:04,620

The implants get bigger and bigger and bigger and bigger until finally they explode

363

00:33:05,340 --> 00:33:11,340

Using a vacuum chamber to simulate high altitude. They couldn't even make an implant expand significantly

364

00:33:12,140 --> 00:33:17,980

Let alone explode. I didn't really notice any difference at all myth busted or so they thought

365

00:33:18,620 --> 00:33:25,500

We had some irate viewers that indicated that there was an aspect of this story that we didn't touch at all and that was

366

00:33:26,220 --> 00:33:28,220

Surrounding inflatable braziers

367

00:33:28,860 --> 00:33:31,900

And like this the air pockets they have inflatable

368

00:33:32,540 --> 00:33:34,540

Pockets in them. What are you doing?

369

00:33:35,980 --> 00:33:41,260

Sure enough back in the 50s inflatable bras were the biggest thing in town

370

00:33:41,580 --> 00:33:45,660

They're worth testing so the myth busters have built a new chamber

371

00:33:47,020 --> 00:33:53,820

A vacuum pump sucks out the air and an aircraft altimeter shows what height they're simulating as the pressure drops

372

00:33:54,060 --> 00:33:57,980

A blast screen will protect them from an unplanned

373

00:33:58,860 --> 00:34:01,820

Implosion. All right, we're gonna hit the switch over here

374

00:34:04,060 --> 00:34:06,060

It's coming up really fast. Yeah

375

00:34:13,580 --> 00:34:19,100

The braziers are going to inflate we know this just like a balloon will inflate in a vacuum and

376

00:34:19,820 --> 00:34:21,820

The only question is whether they'll inflate enough

377

00:34:22,380 --> 00:34:24,380

Uh, you know to explode

378

00:34:24,380 --> 00:34:29,260

All right, honey you want to put that on the bras will be fitted to a cut-down mannequin for their flight

379

00:34:29,820 --> 00:34:35,740

We'll call her janet first bra up this version with non-removable air pockets

380

00:34:36,380 --> 00:34:40,780

Pretty as a picture. I'd say we're good to go. Shall we power this puppy up? Yeah

381

00:34:41,500 --> 00:34:47,420

As the air is sucked out of the chamber, there's less pressure on the inflatable pouches and they'll expand

382

00:34:48,300 --> 00:34:53,180

We're at 10,000 feet right now and that there's definitely some real expansion from that thing

383

00:34:54,220 --> 00:34:56,220

It just knocked the shoulder strap off

384

00:35:00,380 --> 00:35:04,220

Altitude now is um coming up on 40,000 feet

385

00:35:04,940 --> 00:35:11,100

By now janet would have expired in the thin atmosphere, but her expanding bra lives on

386

00:35:12,060 --> 00:35:14,060

And they're still climbing

387

00:35:14,060 --> 00:35:19,260

We've actually gone beyond what the altimeter can read. I mean it's above 70,000 feet elevation

388

00:35:19,500 --> 00:35:23,340

Now this is ever twice as high as what a normal airliner would fly at

389

00:35:24,380 --> 00:35:26,380

I wish we could get in there and feel it

390

00:35:28,140 --> 00:35:30,140

I'm sure you do

391

00:35:30,460 --> 00:35:32,460

I mean for scientific reasons

392

00:35:33,580 --> 00:35:37,900

Unfortunately, I think we're gonna have to call this the black brazier is not gonna blow. Let's go for the white brazier

393

00:35:38,940 --> 00:35:39,980

All right

394

00:35:39,980 --> 00:35:44,060

It's a disappointment, but the mythbusters are nothing if not persistent

395

00:35:44,860 --> 00:35:46,860

This bra has removable cups

396

00:35:47,980 --> 00:35:50,140

With less support, maybe they'll blow

397

00:35:51,420 --> 00:35:54,940

Oh, yeah, look the air pocket one is horribly distended down here

398

00:35:55,660 --> 00:35:58,860

Yeah, I mean you can just see it's just like pushing down there

399

00:35:59,820 --> 00:36:01,820

My god, it's gonna blow. Come on, baby

400

00:36:02,860 --> 00:36:09,100

They've passed 30,000 feet, but grow as it might janet's bra just won't explode

401

00:36:10,620 --> 00:36:13,420

Come on. Can we just shoot this thing with a baby or something?

402

00:36:14,220 --> 00:36:19,340

Again mythbusters flight one has soared beyond 70,000 feet

403

00:36:19,740 --> 00:36:25,180

But it's amazing how much the falses expand if you happen to find yourself in the vacuum of space

404

00:36:26,380 --> 00:36:30,940

As janet descends from the heavens she brings with her a reassuring message

405

00:36:31,260 --> 00:36:36,540

The flying public need have no fear of inflatable wardrobe malfunction

406

00:36:36,940 --> 00:36:43,660

You'd be dead long before you'd be worrying about, you know, some tightness on your breasts. So 100 busted still

407

00:36:48,140 --> 00:36:54,380

Back at the biscuit bullet those cans have spent several hours in the hot car and just won't explode

408

00:36:55,900 --> 00:37:02,060

It's only 120 degrees inside the mythbusters were hoping for at least 150

409

00:37:02,220 --> 00:37:04,860

I think you take your hood off jamie because I don't think it's gonna do anything

410

00:37:05,740 --> 00:37:08,940

Uh, what do you think whipped cream is like if it's been in your car for all day?

411

00:37:12,060 --> 00:37:14,620

No, it's not even warm, you know once again

412

00:37:15,180 --> 00:37:17,180

We've tested the circumstances of the myth

413

00:37:17,820 --> 00:37:23,580

And we don't duplicate the results. So obviously we have to build an oven or some such heating device

414

00:37:24,220 --> 00:37:27,180

And see what temperature these things are actually going to blow at

415

00:37:29,980 --> 00:37:34,300

You want to take off your hood and participate in this conversation? I kind of like it in here.
It's private

416

00:37:34,940 --> 00:37:36,060

All right

417

00:37:36,060 --> 00:37:38,940

Time for a little cookout mythbusters style

418

00:37:39,500 --> 00:37:44,220

All you need is a kiln blast screen and spray lubricant

419

00:37:45,100 --> 00:37:48,380

This will take them well beyond the temperatures in the car

420

00:37:49,580 --> 00:37:52,460

Um, it's saying around 300

421

00:37:54,940 --> 00:37:56,940

Now it's up to about 325

422

00:37:58,460 --> 00:38:00,460

It's hot

423

00:38:01,020 --> 00:38:03,020

Oh, wow, there we go

424

00:38:03,260 --> 00:38:06,620

Okay, if it's gonna blow good guys get your it's a result of sorts

425

00:38:06,940 --> 00:38:12,140

But more a fizz than the explosion in the myth and at 320 degrees

426

00:38:12,460 --> 00:38:16,140

It's twice the hottest temperature likely to be found in a car

427

00:38:16,700 --> 00:38:18,700

Live to carve it

428

00:38:18,700 --> 00:38:21,820

Well, you know the spray lubricant might not have done it, but I understand

429

00:38:22,300 --> 00:38:27,740

Soda's left in the car can really make quite an explosion. So mythbusters cola going in

430

00:38:28,540 --> 00:38:33,980

In their never-ending pursuit of explosion, it's the old cola in the kiln routine

431

00:38:35,500 --> 00:38:37,500

It's getting hotter

432

00:38:44,860 --> 00:38:48,300

Oh, yeah, that was great

433

00:38:49,500 --> 00:38:52,460

On the mythbusters explosion scale of one to ten

434

00:38:53,500 --> 00:38:55,500

This one rates as a music

435

00:38:57,900 --> 00:39:02,780

And occurring at well over 300 degrees. There's no way it could happen in your car

436

00:39:04,220 --> 00:39:08,700

The revisit we got to see something blow up, but we busted it again. Yep busted

437

00:39:14,220 --> 00:39:20,940

Next can the mythbusters finally solve the mystery of the chicken gun that would be a result

438

00:39:21,180 --> 00:39:29,340

We're doing the chicken cannon again

439

00:39:30,620 --> 00:39:34,140

Because the last time we did it they were not happy with

440

00:39:34,940 --> 00:39:39,100

The results that they got I'm not too excited about doing this experiment at all

441

00:39:40,540 --> 00:39:43,900

We took it all down and now we have to put it back up again

442

00:39:44,540 --> 00:39:47,980

I want to do it again. Like I want needles in my eyes. I want to be done with it

443

00:39:48,460 --> 00:39:58,380

It's once more into the breach for the chicken gun the mythbusters are trying to determine which

has more penetrating power

444

00:39:59,100 --> 00:40:01,100

Frozen chicken or thawed

445

00:40:01,660 --> 00:40:06,220

Adam sure it makes no difference. Jamie's convinced frozen packs more punch

446

00:40:07,180 --> 00:40:10,700

After three failed experiments. This is getting personal

447

00:40:11,260 --> 00:40:15,980

We don't get a result from this experiment. It can only be his fault. It's your fault

448

00:40:16,940 --> 00:40:21,740

This time instead of foam they'll be shooting the chickens at panes of glass

449

00:40:22,220 --> 00:40:26,140

Here's my thinking is that we'll start by firing thawed chickens at it

450

00:40:26,380 --> 00:40:32,940

And when we find the point at which a thawed chicken stops breaking the glass then we fired the frozen chicken if that breaks the glass

451

00:40:33,660 --> 00:40:36,140

Exactly then we come up with a difference there

452

00:40:36,940 --> 00:40:40,140

So they'll stack up 12 sheets of quarter inch glass

453

00:40:41,340 --> 00:40:44,620

More panes broken equals more penetrating power

454

00:40:46,460 --> 00:40:51,500

I've actually put more thought into this particular experiment than any of the other experiments that we've done

455

00:40:52,300 --> 00:40:57,980

And um, and I this is becoming one of my favorite ones because it it's it's one of those

456

00:40:58,300 --> 00:41:00,700

Simple things that turns out to be very difficult

457

00:41:01,020 --> 00:41:06,460

My prediction is the glass was a poor way to go and I think we might just blow through all 12 sheets here

458

00:41:07,820 --> 00:41:11,740

Because if you go through one you're gonna go through all of them glass is not that flexible

459

00:41:13,580 --> 00:41:15,180

We will see

460

00:41:15,260 --> 00:41:17,820

There's more at stake here than myth busting pry

461

00:41:18,460 --> 00:41:22,940

A lifetime of bragging rights is up for grabs. Looks good to me though

462

00:41:24,780 --> 00:41:31,420

Maybe we'll finally be done with this experiment. All right. Well, shall we fire away? Sure. All right, let's go

463

00:41:32,380 --> 00:41:37,820

It all comes down to an air cannon a thawed chicken and 12 panes of glass

464

00:41:38,620 --> 00:41:41,740

Again, they're firing remotely using the scissor lift

465

00:41:45,340 --> 00:41:49,500

Excellent excellent excellent excellent did not go through all 12 panes

466

00:41:50,380 --> 00:41:52,380

I wrote the first

467

00:41:52,780 --> 00:41:54,780

And the fourth sheets of glass

468

00:41:55,740 --> 00:41:57,740

That's like one of those karate things

469

00:41:58,140 --> 00:41:59,980

It's a good start

470

00:41:59,980 --> 00:42:02,220

The thawed chicken only broke two panes

471

00:42:03,180 --> 00:42:05,180

Will the frozen one break more?

472

00:42:06,460 --> 00:42:08,460

All right, here we go

473

00:42:09,340 --> 00:42:12,780

Firing in three two here's to some results

474

00:42:15,180 --> 00:42:23,340

That would be a result

475

00:42:27,420 --> 00:42:30,300

The frozen chicken hasn't just cracked a couple of pains

476

00:42:31,340 --> 00:42:33,980

It's blasted a hole right through the glass

477

00:42:34,780 --> 00:42:36,780

And adam's theory

478

00:42:37,420 --> 00:42:40,620

Uh, no, this is not nearly the outcome I expected. Um

479

00:42:41,180 --> 00:42:48,620

If we can repeat this, uh, it appears the frozen chicken has far more penetrating power than the thawed chicken

480

00:42:49,420 --> 00:42:55,340

To ensure they didn't have a super strong chicken or weak glass, they'll repeat both shots

481

00:42:56,060 --> 00:42:58,060

First the thawed

482

00:42:59,100 --> 00:43:01,100

Three two

483

00:43:04,860 --> 00:43:07,500

Looks very similar to the first shot with a thawed chicken

484

00:43:08,300 --> 00:43:11,580

Once more the thawed chicken has broken two panes

485

00:43:12,220 --> 00:43:14,380

If the frozen one smashes through again

486

00:43:15,180 --> 00:43:21,100

This chicken myth will be laid to rest in five four three

487

00:43:25,820 --> 00:43:30,620

Well, I think that might be as definitive as it gets within the confines of this test

488

00:43:31,660 --> 00:43:35,820

Adam's trying hard, but he can't hide the egg on his face

489

00:43:37,820 --> 00:43:42,300

Well, uh, this is one that I have to go back on my original assessment of I have to say

490

00:43:42,700 --> 00:43:46,380

It's pretty definitive this test that this myth is in fact

491

00:43:47,100 --> 00:43:52,300

Really plausible. So you're saying that you were wrong and I I was right, right? Yeah, don't get me wrong

492

00:43:52,540 --> 00:43:57,340

You're still a pain in the I have to say I had to fight to stick to my guns on this

493

00:43:57,660 --> 00:44:03,420

I mean, yeah, I'm ecstatic with the results. So I think you deserve the honor of wrapping this puppy up

494

00:44:04,060 --> 00:44:11,180

Well after four separate attempts, we've finally overturned our original analysis of the of the myth

495

00:44:11,740 --> 00:44:15,340

And we can clearly say that this one is totally plausible

496

00:44:15,740 --> 00:44:19,900

If I never fired this chicken gun again, it'll be too soon. Let's wrap it up and go home. All right

497

00:44:20,620 --> 00:44:22,620

All right

498

00:44:29,500 --> 00:44:30,540

Coming up next

499

00:44:30,540 --> 00:44:33,980

Can a Peterbilt tractor trailer take on new life as a motorcycle?

500

00:44:34,300 --> 00:44:41,900

See for yourself as jesse and his crew of maverick mechanics attempt to transform this 18-wheeler into a two-wheeler on monster garage

501

00:44:49,900 --> 00:44:52,300

You
