with Coulthart and Zabel

1  
00:00:00,080 --> 00:00:03,200  
i'm just going to take a moment\h  
here and veer off from the uh\h\h

2  
00:00:04,240 --> 00:00:12,080  
the interesting and valid point you just made into\h  
the the sublimely ridiculous but uh if it's\h\h

3  
00:00:12,080 --> 00:00:17,440  
if it's a a warning at all about how the\h  
department of defense wants us to look at\h\h

4  
00:00:17,440 --> 00:00:23,280  
what's going on you referred to the newly\h  
formed uap well there was a uap task force\h\h

5  
00:00:23,280 --> 00:00:28,720  
and now the defense department is calling\h  
it the aoi msg which we've been laughing\h\h

6  
00:00:28,720 --> 00:00:34,160  
about because it stands for and let's see if\h  
we can do it airborne object identification

7  
00:00:38,720 --> 00:00:43,280  
see it's designed to be forgettable rise\h  
designed to be forgettable well folks you\h\h

8  
00:00:43,280 --> 00:00:47,600  
those of you who have been following us remember\h  
that a couple episodes back we just said well\h\h

9  
00:00:47,600 --> 00:00:52,240  
damn it we're gonna have to come up with our\h  
own uh way to refer to this office because\h\h

10  
00:00:52,240 --> 00:00:57,040  
i don't think we want to go through the next\h  
years talking about ayomsga or whatever and as\h\h

11

00:00:57,040 --> 00:01:03,760

my wife pointed out msg to her means monosodium\h  
glo monosodium glutamate and you know the whole\h\h

12

00:01:03,760 --> 00:01:10,800

thing is strange so uh ross you and i have decided\h  
uh that at least for our purposes we should call\h\h

13

00:01:10,800 --> 00:01:19,120

that office the uap office only uap stands for\h  
something different now the um i love this ì\h\h

14

00:01:19,120 --> 00:01:25,840

think we're very clever coming up with this\h  
unpronounceable acronym from the pentagonal

15

00:01:34,880 --> 00:01:38,880

yes folks you heard it here first i ì\h  
hope it catches on i don't know if it\h\h
